In this way the empire received in the "Constitution of Lothair" an indirect influence over the election of the pope and a supervision of the papal government in the States of the Church. But soon after this the Carlovingians were so busily occupied by their dynastic quarrels that they had but little time to concern themselves about Rome. Leo IV had, in concert with some seaport towns of Italy, to take measures personally for the defence of Rome against the Saracens. The soldiers blessed by him won a brilliant victory at Ostia in 849. As the right bank of the Tiber with its Basilica of St. Peter was exposed to the pillage of the Saracens, Leo fortified it with a wall (848–52), and in his honour the part of the city so protected was called *Civitas Leonina*. In 850 Leo crowned Lothair's son, Louis II, as emperor. Although this emperor bravely opposed the Saracens in Lower Italy with all his power, this power was no longer that of Charlemagne, for Louis's rule extended only over Italy. To the papacy, then represented by Nicholas II, the regency of Louis II was at times a danger rather than a protection. His representative, Duke Lambert of Spoleto, under the pretence of superintending the election of the pope, invaded Rome in 867, and treated it as conquered territory. This was the prelude to the wretched period following the death of Louis (875), when Rome and the pope were placed at the mercy of the neighbouring feudal lords, who had come into Italy with the Carlovingians, and who now quarrelled first with the Carlovingians still ruling beyond the Alps, then among themselves for the apple of discord, the imperial crown. In vain did the able Pope John VIII hope for help and protection from the West Frankish king, Charles the Bald, who had been crowned emperor in 875. It is true Charles renewed the old charter relative to protection and donations and increased the domain of the States of the Church by new donations (Spoleto and Benevento); he also gave up the claim to have envoys present at the consecration of the pope as well as the assignment to these envoys of the administration of justice. But beyond these donations on paper he did nothing. John VIII, at the head of his fleet at Cape Circeo (877), had to defend himself unaided against the Saracens. Fleeing from the dukes Lambert of Spoleto and Adalbert of Tuscany, who bore themselves as representatives of the imperial power, he went to France, vainly imploring the Carlovingians for help. The East Frank, Charles the Fat, who received the imperial crown from John VIII in 881, likewise did nothing, and Arnulf, who was crowned emperor in 896, was compelled by illness to suspend further interference. Severely did the defenceless pope have to suffer for having summoned him. Pope Stephen V had previously (891) yielded to the urging of Duke Guido of Spoleto and bestowed on him the imperial crown. Stephen's successor, Pope Formosus, had been compelled to give the crown also to Guido's son, Lambert, as the associate of his father in the empire (892); he thus incurred the fierce hatred of Lambert, when he afterwards summoned Arnulf to Rome and crowned him emperor. When Lambert, after the death of Formosus, entered Rome in 897, he took a horrible revenge upon the corpse of the pope through the medium of Stephen VI.

The papacy was now completely at the mercy of the struggling factions of the nobility. Benedict IV in 901 crowned as emperor Louis, King of Lower Burgundy, who had been summoned by the Italian nobles. In 915 John X crowned Louis's opponent, the Marquis Berengar of Friuli. Berengar was the last to receive the imperial crown before the founding of the Roman Empire of the German Nation. At Rome itself the greatest influence was won by the family of the later Counts of Tusculum, which traced its descent to the senator and *dux*, Theophylactus, and whose power was for a time represented by the wife of Theophylactus, Theodora (called *Senatrix* or *Vesteratrix*), and her daughters Marozia and Theodora the Younger. The papacy also came under the power of these women. Alberic, the husband of Marozia, with John X, who had been raised to the papacy by the elder Theodora, defeated the Saracens on the Garigliano (916), and thereafter called himself Consul of the Romans. After his death this rank was transmitted to Marozia, and, on her fall, to his son Alberic. Marozia had John X deposed, and finally had her own son by her first husband placed upon the papal chair as John XI. John XI was entirely dominated by his mother. When Marozia's son, Alberic II, finally put an end to the despotic rule of his mother (932), the Romans proclaimed him their lord and master, conferred on him all temporal power, and restricted the pope's authority to purely spiritual matters. Alberic, who had a palace on the Aventine, refused the German king Otto I permission to enter Rome, when the latter appeared in Upper Italy in 951. But, when Otto appeared for the second time in Italy, conditions had changed.

(2) *From the Coronation of Otto I as Emperor to the end of the Hohenstaufen Line.*—Alberic II died in 954. In accordance with a promise made to him, the Romans in 955 elected to the papacy as John XII his seventeen-year-old son Octavian, who had succeeded him in the temporal power. This pontiff thus united the spiritual and temporal power, but only in the territory which had been subject to Alberic—that is substantially the old Duchy of Rome, or the "Patrimonium Petri". The Pentapolis and the exarchate were in other hands, ultimately falling to King Berengar of Ivrea. To obtain protection against Berengar, John XII called upon Otto I for help. Otto came and on 2 February, 962, received the imperial crown. On 13 February he drew up the charter (still extant in a contemporary caligraphic copy, preserved in the archives of the Vatican), in which he renewed the well-known covenants of his predecessors, increased the donations by the addition of several new ones, and undertook to secure the canonical election of the popes. The pope was not to be consecrated until imperial envoys had assured themselves of the legality of the election and obtained from the pope a sworn promise of allegiance (cf. Th. Sickel, "Das Privilegium Ottos I für die römische Kirche", Innsbruck, 1883). The necessary condition for the coöperation of emperor and pope was their common opposition to Berengar. This was removed when John XII, who not unreasonably feared Otto's power, entered into secret negotiations with Berengar. Otto thereupon again came to Rome, which the pope had left, and demanded of the Romans an oath that henceforth they would never again elect a pope without the express consent and sanction of the emperor. Therewith the papacy was declared subject to the emperor. This at once became evident, when a synod, over which Otto presided, deposed the pope. But Leo VIII, who was chosen in accordance with Otto's wishes, was unable to remain at Rome without Otto. The Romans, after the death of John XII, elected Benedict V, but Otto sent him into exile at Hamburg. Other afflictions beset John XIII, to secure whose elevation the Romans and Otto had acted in harmony in 966. John needed the protection of the emperor against a rebellious faction of the nobility, whereupon Otto appointed a prefect of Rome and enfeoffed him with drawn sword. In return the pope crowned the son of Otto I (Otto II) with the imperial crown in the next year (967), and later married him to the Greek princess Theophano. Otto II had to render the same protection to the popes of his time. John XIII's successor, Benedict VI, was imprisoned and murdered in the Castle of S. Angelo by hostile nobles. The Frank who was chosen in his place (Boniface VII) had to flee to Constantinople, but the position of Benedict VII, who was raised to the papacy with the consent of Otto II, remained uncertain until Otto in 980 came to Rome, where, after his defeat near Capo Colonne, he died (983) and was buried in St. Peter's. Boniface VII, who returned from Constantinople, had during the minority of Otto's son displaced John XIV, the successor of Benedict VII, and exposed him to death by starvation in the Castle of S. Angelo. And beside John XV, who was made pope after the fall of Boniface VII, the dux, Crescentius, under the usurped title of "Patrician", ruled over Rome, so that the times of an Alberic seemed to have returned.

John V therefore earnestly desired the arrival of a German army. It appeared in 996 under the command of the sixteen-year-old Otto III. As John had died before Otto entered Rome, the German king, whom the Romans had asked to propose a candidate, designated, on the advice of the princes, his relative, the young Bruno, who was then elected at Rome and graced the papal chair as Gregory V (996–99). Crescentius was besieged in the Castle of S. Angelo and beheaded. Gregory V, who crowned Otto III emperor, was the first German pope. His successor, the first French pope, also designated by Otto, was the learned Sylvester II, near whom on the Aventine the emperor desired permanently to make his residence, that he might govern the West as the Roman emperors had once done. The old Roman law and a ceremonial fashioned after Byzantine forms were to be put into effect. But these plans soon came to naught. Only a few years later, in 1002, the youthful and visionary emperor, bitterly disillusioned, died in his camp outside Rome, which had risen against him. And, when Sylvester II also passed away in 1003, John Crescentius, the son of the Crescentius who had been beheaded by Otto III, having possessed himself of the patriciate, seized the government at Rome. After his death the Counts of Tusculum began to contend with the Crescentians for the supremacy, and, in opposition to the pope set up by their opponents, raised one of their own followers to the papal chair as Benedict VIII; the latter was recognized as the lawful pope by Henry II, whom he crowned emperor at Rome on 14 February, 1014. An intimate friendship united Benedict and Henry. Together they planned a reform of the Church, which unfortunately was not carried out. Benedict was succeeded by his brother, John XIX, a man less worthy of the honour, who had previously held the temporal power in the city, and who as pope for the most part thought only of the interests of his family. These urged him to gain the good will of Henry's successor, Conrad II, whom he crowned emperor at Rome in 1027. The papal dignity sank to a still lower level under the nephew of John XIX, Benedict IX, whose elevation to the papal throne at the age of twenty was secured by his family through simony and violence. When the Romans set up an anti-pope, Sylvester III, in opposition, Benedict wavered for a time in doubt whether he ought not to resign; finally he relinquished the pontificate to his godfather John Gratian for 1000 pounds of silver. The purchaser had had recourse to this measure only to put an end to the abominable practices of the Tusculan. He called himself Gregory VI, and stood in friendly relations with the Cluniac monks. But as John again asserted his claims, and all three popes had evidently secured the dignity only through simony, the party of reform saw no other remedy than to induce the German king, Henry III, to intervene. Henry III, through the synods of Sutri and Rome, had all three popes deposed. Gregory VI in the capacity of secretary went into exile to Germany with Hildebrand (later Pope Gregory VII). Then, marking the zenith of the German imperial power at Rome, there followed a number of German popes: Clement II, who crowned Henry III emperor in 1046, conferring on him also the rank of Patrician, and with it the right of nomination at papal elections; Damasus II; Saint Leo IX of Alsace, with whom the drift toward ecclesiastical reform finally reached the papal chair; and Victor II.

The reaction soon set in. Under the Burgundian Nicholas II the effort to free the papacy from the commanding influence of the empire becomes clearly noticeable. At the Easter Synod of 1059 the papal election was placed under new regulations, being reposed essentially in the hands of the cardinals. The German king was no longer to have the right of designation, but at most only that of confirmation. As the German Court was unwilling to yield the right of designation without a struggle, which, according to its concept, was conferred together with the hereditary rank of Patrician, the first conflicts between empire and papacy began. In opposition to Alexander II, who was elected to succeed Nicholas II, the German Government set up Bishop Cadalus of Parma (Honorius II). Soon afterward, under Henry IV and Gregory VII, the conflicts broadened out into the conflict concerning investiture. In this contest the papacy had pressing need of a temporal power to support it against the German Empire. This support was destined to be furnished by the Normans, whose state, founded in Lower Italy, became of ever-increasing importance to the papacy.

The relations between the Holy See and the Normans were not always friendly. When these at the time of Leo IX advanced into the Lombard Duchy of Benevento, the Beneventans sought to defend themselves against them by expelling the reigning prince and electing the pope in 1051 as their sovereign. Thus was Benevento added to the States of the Church. Actually, of course, the popes had possession only of the city of Benevento with the district immediately under its jurisdiction, and that only since 1077. Through Benevento Leo IX became involved in a quarrel with the Normans and took the field against them, but was defeated and made captive near Civitate in 1053. The victors, however, did not fail to recognize and to respect in the captive the successor of Peter, and subsequently, as the result of negotiations with Nicholas II, the treaty of Melfi was made in 1059, in which the Normans acknowledged themselves vassals of the Holy See for the conquered territories—Benevento was excepted—and engaged to pay a yearly tribute. They now also took upon themselves the protection of the papacy and the States of the Church, as well as of the canonical election of the pope. A Norman army under Robert Guiscard rescued Gregory VII in the greatest distress, when Henry IV had come to Rome with his anti-pope Clement III, received the imperial crown from the latter, and imprisoned Gregory VII in the Castle of S. Angelo. Before the powerful Norman army Henry had to withdraw from Rome in 1084.

A valuable ally of the papacy in its conflict with the empire was the great Countess Matilda of Tuscany, at whose Castle of Canossa King Henry IV appeared in January, 1077, to beg Gregory VII for absolution from the ban of the Church. Matilda had by will bequeathed her freehold estates to the pope, but had also in 1111 made promises to Emperor Henry V, but probably only in such a way that the Roman Church would remain chief owner. The succession to the lands bequeathed by Matilda furnished after her death (1115) a new cause, first for strained relations, then for a quarrel between emperor and pope. This was partly due to the fact that the lands, because of their location, had a high strategic value. Whoever possessed them commanded the passage of the Apennines from the plains of the Po into Tuscany. Henry V at once took possession of the lands, and subsequent kings and emperors to Frederick II also occupied or bestowed them in spite of the repeated protests of the Curia. Amid all this we often see pope and emperor working in harmony. The anti-pope Anacletus II with his protector, King Roger II of Sicily, was attacked by Emperor Lothair, who took up the cause of Innocent II. Frederick I had Arnold of Brescia, who had openly preached against the temporal power of the popes, executed as a heretic and rebel (1155).

The various matters of dispute, which had led under Frederick I to the eighteen years' conflict with Alexander III and had been then settled in the Treaty of Venice, were again revived when Henry VI, as husband of the Norman heiress Constance, at the death of the childless King William II in 1189, laid claim to the Norman Kingdom, which embraced Sicily and Lower Italy. The pope as lord paramount wished to have the unrestricted disposal of the Norman kingdom, and first bestowed it on the illegitimate Tancred of Lecce. But Henry disregarded this action, and conquered the kingdom after Tancred's death in 1194. He desired to transform Italy and Germany into an hereditary monarchy. He also made old parts of the States of the Church subject to him, when in 1195 he placed the Margravate of Ancona, the Duchy of Ravenna, and the ancient exarchate (the Romagna) under the lord high steward of the realm, Markwald of Anweiler, as his viceroy. But with his death in 1197 all the plans for world dominion collapsed. In Italy a national movement was started, which the youthful and energetic Innocent III utilized to reestablish and extend the States of the Church. First of all he enforced the papal authority at Rome itself by exacting an oath of allegiance from the senators as well as from the prefect, previously appointed by the emperor. After this nearly all the towns and villages of the territory bequeathed by Matilda, in the March of Ancona, and in the Duchy of Spoleto, also Assisi and Perugia, submitted to him. Innocent thus became the restorer of the States of the Church. After the precedent set by Otto IV (Neuss, 8 June, 1201), the son of Henry VI, Frederick II, who had been protected by Innocent III, confirmed anew the States of the Church in their constituent parts by a golden bull executed in the name of the empire at Eger on 12 July, 1213: these parts were the old Patrimony from Ceperano to Radicofani, the March of Ancona, the Duchy of Spoleto, the territories of Matilda, the County of Bertinoro (south of Ravenna), the exarchate, and the Pentapolis. All these new acquisitions and the States of the Church in their entirety were again placed in the greatest jeopardy when the great struggle between Frederick II and the Curia broke out. With the exception of the city of Rome the emperor had brought the States of the Church into his power. Innocent IV fled to his native city Œcumenical Genoa and thence to Lyons, where at the thirteenth Œcumenical Council in 1245 he placed Frederick II under the ban of the Church and deposed him. The conflict raged for several years longer, but the star of the Hohenstaufen was rapidly setting. The emperor's son Enzio, commander-in-chief in Central and Upper Italy, was captured by the Bolognese in 1249. The emperor himself died in 1250, and his son Conrad IV died a few years later (1254). When Frederick's illegitimate son Manfred undertook the continuation of the struggle and had himself crowned at Palermo, the French pope Clement IV summoned to his aid the brother of King Louis IX of France, Charles of Anjou, who had accepted the Kingdom of Lower Italy as a fief of the pope. Charles vanquished Manfred in 1266 at Benevento, and Conradin, the youthful nephew of Frederick II, at Tagliacozzo in 1268, and had this last descendant of the Hohenstaufen house executed in the market-place of Naples. With this the danger to the papacy from the Hohenstaufen was removed, but a worse danger took its place.

(3) *From the Avignon Exile to the End of the Fifteenth Century.*—The papacy was now not only dependent upon the protection of France, but was also entirely at its mercy. This was seen in the utter disregard shown by Philip the Fair in his attitude toward Boniface VIII and his successors. Clement V, a native of Southern France, did not venture to go to Italy, after his election in 1305, but had himself crowned at Lyons, and after 1309 resided at Avignon, which now remained the residence of the popes until 1376. The country about Avignon constituted the County of Venaissin or the Margravate of Provence, which, on the ground of a former donation of the Counts of Toulouse in 1273, had been given up to the pope by the French king, Philip III the Bold. The city of Avignon itself first came into the possession of the Holy See by purchase in 1348. During the residence of the popes in Avignon the papal dominion in the States of the Church almost ceased. In Rome the Colonna and Orsini fought for the supremacy. In the other cities the French regents, who were sent from Avignon, found anything but willing obedience. Bologna revolted in 1334 against the pope's relative, Beltram. Cola di Rienzi deluded the Romans with the phantom of a republic. The state of anarchy was first ended by the Castilian Cardinal Albornoz (see Gil de Albornoz, Alvarez Carillo), whom Innocent VI sent to the States of the Church as his vicar-general in 1353. Albornoz not only brought the States of the Church under subjection to the pope, but also reorganized them by means of the Ægidian Constitutions, which were in force in the States of the Church until 1816. But the successes of Albornoz were soon nullified again, when the Great Schism occurred during the residence at Avignon. After its termination Martin V (1417–31) sought to establish a centralized monarchy out of the various conflicting rights, privileges, and usurpations, and in this had much success. New afflictions were brought by the period of the Renaissance, in which visionaries of radical views loved to pose as liberators from tyranny. Thus the conspiracy of Stefano Porcaro alarmed Nicholas V in 1453, and the conspiracy of 1468 alarmed Paul II. Other dangers lay in the growth of power of certain families of the feudal nobility in the States of the Church, in the nepotism of some of the popes, who provided for their relatives at the expense of the States of the Church, or in their international policies, for which the States of the Church had to suffer.

(4) *From the Sixteenth Century to the Treaty of Vienna.*—Under Alexander VI the States of the Church disintegrated into a series of states held by papal relatives of the Borgia family. Cesare Borgia, whom Machiavelli admired, laboured earnestly from his Duchy of Romagna to transform the States of the Church into a Kingdom of Central Italy. After his fall (1504) Venice sought to bring the cities on the Adriatic Sea under its power. Julius II then in his impetuous way had recourse to force to re-establish and extend the States of the Church. He conquered Perugia and Bologna and by the League of Cambrai forced Venice to give up Ravenna, Cervia, Faenza, and Rimini. But, after he had been satisfied by the Venetians, he concluded the Holy League for the expulsion of the French from Italy. It is true that the French in 1512 were once more victorious over the troops of the League at Ravenna, but thanks chiefly to the Swiss mercenaries, whom the pope had enlisted through Cardinal Schinner, Julius attained his object. On the surrender of the Duchy of Milan to Maximilian Sforza, Julius II made a still further gain for the States of the Church, since Parma and Piacenza were taken from the duchy and incorporated in the States of the Church. Reggio and Modena, which belonged to the Duke of Ferrara, were also taken possession of by the pope, but his successor Leo X had to restore these cities to the duke in 1515. A dreadful catastrophe was brought upon Rome by the vacillating policy of Clement VII. The disorderly troops of Charles V overran and plundered the States of the Church, occupied Rome on 6 May, 1527, and for eight days rioted there frightfully (*Sacco di Roma*). In the Castle of S. Angelo the pope was held captive until 6 December. It was long before these wounds were healed, although the pope in 1529 concluded a peace with the emperor at Barcelona and received back the States of the Church. The conclusion of peace was confirmed by the Conference of Bologna, at which Charles V on 24 April, 1530, received the imperial crown from Clement VII.

During this time as well as later a number of districts were for a time separated from the States of the Church and conferred as separate principalities by popes on their relatives. The Rovere pope Sixtus IV had in 1474 made Federigo of Montefeltro Duke of Urbino, and married Federigo's daughter Giovanna to his nephew Giovanni della Rovere. The son of this Giovanni, Francesco Maria della Rovere, came into possession of the Duchy of Urbino in 1508, during the pontificate of the other Rovere pope, Julius II. In addition to this Julius II in 1512 conferred on him the Vicariate of Pesaro, which had previously been a fief in the hands of the Malatesta and since 1445 of the Sforza. Not until the male line of the Rovere became extinct in 1631 were Montefeltro and Urbino together with Pesaro restored to the States of the Church. Pope Paul III in 1545 bestowed Parma and Piacenza as a duchy on his son Pier Luigi Farnese. Even after the Farnese line had become extinct, the duchies reverted, not to the States of the Church, but to a branch of the Spanish Bourbons, and finally in 1860 to Sardinia. To make up for this Ferrara, which had once belonged to Matilda of Canossa as a papal fief, had in 1208 fallen to the Guelph family of Este, and had in 1471 been made a duchy. After the main line of the Este had become extinct in 1597, Ferrara reverted to the States of the Church, and remained part thereof (except during the Napoleonic period) until the Italian annexation in 1860. Modena and Reggio, however, fell in 1597 to a collateral line of the Este as a fief of the empire. Thus the States of the Church before the outbreak of the French Revolution embraced substantially the territory that had belonged to them at the time of Charlemagne, except that some portions of the old Duchy of Spoleto had been added in the south since the time of Innocent III.

Rapid changes came with the time of the French

Revolution and of Napoleon. In 1791 the French National Assembly announced the union of Avignon and Venaissin with France, and in the Peace of Tolentino (1797) Pius VI had to give them up, while at the same time relinquishing the legations of Ferrara, Bologna, and Romagna to the Cisalpine Republic. In February, 1798, General Berthier, who had been sent to Rome by Napoleon, formed the rest of the States of the Church into the Roman Republic. The pope, because he would not renounce his claim, was taken away as a captive and eventually confined in Valence, where death soon released him (29 August, 1799). People were already rejoicing that the papacy and the church had come to an end. Their joy was, however, premature. Under the protection of Emperor Francis II the cardinals in 1800 elected Pius VII as pope at Venice. But hard trials awaited him. It is true that in 1801 Pius VII by Napoleon's favour got back the States of the Church as bounded in the Peace of Tolentino. But the position of the States of the Church remained extremely precarious. Napoleon in 1806 conferred Benevento on Talleyrand and Pontecorvo on Bernadotte. In 1808, because Pius VII would not close his ports to the English, the States of the Church were again occupied and in 1809 completely confiscated. The Marches, Urbino, Camerino, and Macerata were annexed to the newly-created Kingdom of Italy, the rest of the States of the Church to France. Not until the Congress of Vienna, where the able Consalvi represented the pope, were the States of the Church again established (1815), almost in their old dimensions except that Avignon and Venaissin were not restored to the pope, and Austria received a narrow strip along the frontier of the Ferrara district north of the Po and the right of garrisoning Ferrara and Comachio.

(5) *From the Peace of Vienna to 1870.*—The liberal and national ideas prevalent throughout Central Europe undermined the States of the Church, just as they did the rest of Italy, and found expression in the high-sounding phrases "constitution" and "national unification". The French Revolution and Napoleon had awakened these ideas. The name of a Kingdom of Italy, whose crown Napoleon had worn, was not forgotten. With the old conditions, which the congress of Vienna had restored, the people were by no means satisfied. They lamented the division of Italy into various states, bound together by no common bond, and above all the fact that they were ruled by foreigners. The pope and the King of Sardinia alone were looked upon as really native rulers. The other rulers were regarded more or less as foreigners. Naples-Sicily was ruled by the Bourbon line, which had come there in 1738, and which was opposed particularly by Sicily. In Parma and Piacenza also the Bourbon line, first established here in 1748, ruled again from the death (1847) of Marie-Louise, wife of Napoleon I. In Modena and Tuscany collateral lines of the house of Austria ruled: in the Duchy of Modena, a line which had in 1803 become the heir of the ancient ducal house of Este; in Tuscany, which, after the Medici had become extinct, had fallen to the ducal house of Lorraine, the line sprung from Ferdinand III, brother of Emperor Francis I of Austria. Furthermore, the Austrians were the immediate rulers of the Lombard-Venetian Kingdom. The current of national feeling was directed above all against the rule of the Austrians at Milan and Venice, hated as a government by foreigners, and also against the governments which pursued the policies of and were protected by Austria. Austria's statesman Metternich had at heart the maintenance of the order established by the Congress of Vienna in 1815. As the States of the Church were included among the governments under Austria's protection, they gradually shared the hatred against Austria.

The narrow police spirit of the absolute governments, which did not distinguish between what was justifiable and what was not, promoted the growth of dissatisfaction, which first took shape in secret societies. Carbonarism and freemasonry spread rapidly. The Greek war of independence, which excited universal admiration, aroused the national spirit in Italy. The Sanfedists (*per la santa fede*), as the loyal Catholics were called, were only a weak support for the Papal Government in the States of the Church. The Carbonari, led by exiles and made fugitives in Paris and yielding to the impression made by the Revolution of July, profited by the vacancy of the papal chair after the death of Pius VIII, in 1830, to inaugurate rising in the States of the Church, especially in Bologna. Under the presidency of Mazzini, the founder of the revolutionary society of the "Giovane Italia", delegates assembled at Bologna in 1831, as a parliament of the united provinces, to establish a republican form of government, and elected a provisional government. When the new pope Gregory XVI asked for Austria's assistance, Metternich was ready to intervene without delay. The Austrians restored peace in the States of the Church, as also in Modena and Parma. But hardly had the troops departed, when new disorders broke out, and, in answer to the pope's renewed call for help, the Austrians reappeared at Bologna in 1832 under Radetsky. To neutralize the influence of the Austrians the French Government of Louis Philippe sent to Ancona troops, which remained there as long as the Austrians occupied Bologna (until 1838). In opposition to the followers of Mazzini there were not lacking for a while men who strove to bring about the unification of Italy with the co-operation of the pope. Their spokesman was at first the former chaplain of King Charles Albert of Sardinia, Vincenzo Gioberti, who in 1843, as an exile in Brussels, wrote the treatise "Il primato morale e civile degli Italiani", a publication which caused a great sensation. He desired that the pope should become the head of the national union of states in Italy, from which the foreign princes were to be excluded. Piedmont, however, was to act as regularly appointed protector of the pope and Italy. The priest, Count Antonio Rosmini, desired an Italian confederation with the pope at its head and two deliberative chambers. He published his ideas in 1848 in the treatise "Delle cinque piaghe della S. Chiesa", in which he also particularly recommended the reform of the Church. The son-in-law of Manzoni, Marchese Massimo d' Azeglo, set forth the perverse political conditions in Italy and especially in the States of the Church more unsparingly in the treatise "Gli ultimi casi di Romagna" (1846), in which he urgently advocated reform, but at the same time warned against conspiracy and revolution. The majority of those who were enthusiastic about the unification of Italy put their hope in Piedmont, "la spada d' Italia". Cesare Balbo in his book "Le speranze d' Italia", which appeared in 1844, expected first of all the founding of a union of the Lombard states.

The demand for reform in the States of the Church was in fact not unjustified. It was expected that it would be inaugurated by Gregory XVI's successor, who was hailed with extravagant hopes, when as Pius IX he ascended the papal chair on 16 June, 1846. Men saw in him the pope of whom Gioberti had dreamed. Pius IX convoked at Rome a council of state composed of representatives of the various provinces, established a formal cabinet council, and sanctioned the formation of a militia in the States of the Church. In addition he suggested to Tuscany and Sardinia the formation of an Italian customs union. But the country was wrought up too highly to continue peacefully and slowly along such a course. The Liberals at Rome were dissatisfied because the laity were excluded from participation in the government of the States of the Church. Even before the outbreak of the French Revolution of February they forced by a popular uprising the appointment in 1848 of a cabinet of laymen. On 14 March, 1848, Pius IX after long hesitation decided to proclaim the fundamental law for the temporal government of the lands of the Holy See; as in other lands two chambers were to vote upon the laws, which were to be drawn up by a council of state. But the chambers were forbidden to interfere in any way in questions purely spiritual or of a mixed character, and the College of Cardinals had the right of veto over the decision of the chambers. This proved unsatisfactory. Pius IX was also expected to accommodate himself to the national desires when Milan and Venice after the outbreak of the revolution in Vienna had risen against the Austrians and Piedmont was preparing to support the uprising. The pope too, it was thought, should draw the sword against Austria.

When Pius IX in an Encyclical announced on 29 April, 1848, that he could never persuade himself to engage in a war against a Catholic power such as Austria, and that he would never assume the headship of an Italian confederation, his popularity in Liberal-National circles was wellnigh at an end. The party of those, who with Gioberti had dreamed of a unification of Italy under the pope, crumbled away. Mazzini made the demand that Rome be erected into a republic. A portion of the civic guard surrounded the Castle of S. Angelo and compelled the pope to appoint Liberal ministers. But the revolutionary republicans would have nothing to do with such a compromise. They became bolder than ever when King Charles Albert was defeated by Radetsky at Custozza on 24–25 July, 1848, and the monarchical national party had thereby met with complete failure. When the Liberal minister Rossi sought to reorganize the States of the Church and at the same time urged on the formation of a confederation of the Italian states, he was stabbed to death on the steps of the Palace of the Cancelleria on 15 November, 1848. On the following day the pope found himself besieged in the Quirinal. Only with difficulty could the Swiss Guards protect him from the fury of the populace. On 24 November Pius IX escaped in disguise to Gaeta in the Neapolitan Kingdom, whither King Ferdinand II had returned to take command in person. After the flight of the pope an assembly was elected to administer the government, the republic was proclaimed at Rome on 9 February, 1849, and the temporal sovereignty declared abolished. Mazzini with his international following ruled at Rome. In Florence also the republic was proclaimed on 18 February. But reaction followed quickly. This was hastened when the Austrians in a new passage of arms had defeated the Piedmontese at Mortara on 21 March, 1849, and at Novara on 23 March. Charles Albert thereupon resigned in favour of his son Victor Emmanuel II. The Austrians were now more powerful in Upper Italy than ever. They brought back to Florence the Grand Duke of Tuscany. Ferdinand II suppressed the revolution in Sicily. Pius IX was readily heard when he appealed to the Catholic powers for assistance against the republic. To anticipate Austria Louis Napoleon, then president of the Second Republic, with the consent of the Constituent Assembly in Paris, sent a force under Oudinot into the States of the Church, where besides Mazzini many revolutionaries from other lands (including Garibaldi) had gathered, and a triumvirate, composed of Mazzini, Aurelio Saffi, and Carlo Armellini, was administering the government. Oudinot's small force soon after its landing at Civitavecchia was, it is true, at first defeated before Rome. But now the Austrians also entered the States of the Church in the north, in the south the Neapolitans, while in Terracina Spaniards landed. Oudinot received reinforcements and began the siege of Rome. Garibaldi with 5000 volunteers cut his way through to continue the struggle in the Apennines. On 2 July, 1849, Oudinot entered Rome and again restored the temporal power of the pope. Pius IX re-entered Rome on 12 April, 1850.

Thus not only the Piedmontese and their followers, but the Republicans also had been routed, and had shown that they were unable to bring about the unity of Italy. By the military power of Austria all of Italy's forces had been shattered. But the object was not abandoned. A different programme was now adopted: to proceed with foreign aid under Piedmont's leadership against the pope. Piedmont sought to retain the sympathies of all Liberals by keeping the constitution, while the remaining governments of Italy had returned to absolutism. Pius IX, bitterly disillusioned, declared the retention of a constitution wholly incompatible with the most vital interests and the canons of the Church, as well as with the independence and freedom of the pope. Between him, the States of the Church, and Italy no efforts could bring about an understanding that was satisfactory to all. A French garrison maintained the sovereignty of the pope at Rome, while the Austrians secured tranquillity in the legations. The question was: how long would the two foreign powers continue harmoniously side by side in Italy? It was answered when Napoleon III undertook to show Europe the splendour of his imperial power and to force Austria out of its position of military supremacy in Italy. The change of temper in those circles of Italy that were striving for national unification was shown in a new treatise of Gioberti, who in 1843 in his "Primato" had assigned the guidance to the pope. In 1851 he published his book "Rinnovamento civile d' Italia", in which he set forth that the unification could be accomplished without Rome, and even against Rome with the aid of Piedmont. To prepare Piedmont for this rôle was the task of Camillo Cavour, who was made prime minister in 1852. It was also he who found for Sardinia the ally who united with it against Austria. At Plombières, a watering-place in Lorraine, he interested Napoleon in his plans in July, 1859, and all measures down to the smallest details were here agreed upon. The Piedmontese succeeded in joining their forces with the French army, and the allies defeated the Austrians at Magenta and Solferino. Napoleon, however, then swiftly concluded with the Emperor Francis Joseph the Peace of Villafranca-Zürich, by the terms of which Austria had to give up Lombardy only, not Venetia; in it provision was also made for an Italian confederation, into which all Italian states, including Austria for Venetia, were to enter, and over which it was intended that the pope should preside. Napoleon feared the intervention of the other powers, and at the same time was eager to show consideration for the feelings of the French Catholics.

In national circles in Italy men were at first furious at the conditions of this treaty of peace. But calm soon returned when it was seen that Napoleon made no preparations to bring back the expelled petty princes, and that the pope would have nothing to do with the rôle assigned to him. Cavour was able to continue his efforts in behalf of his schemes by the secret path of conspiracy. At his instigation apparently independent governments were established at Florence, Modena, and Bologna; in reality, however, these were directed from Turin, and were supported by England, since England did not desire a Kingdom of Italy dependent on France. In Tuscany, in the district of Modena-Parma, which had formed itself into the Republic of Emilia, and in the legations a vote of the inhabitants was taken, 15–20 March, 1860, which resulted unanimously in favour of annexation to Sardinia. Napoleon himself had half desired this deceptive expedient, by means of which he had himself once risen to power, in order that he might have an excuse for letting matters take their own course. By the same expedient he now had voted to him the indemnity, stipulated in advance, for his interference in Italy, namely Savoy and Nice, which by a popular vote declared themselves for France. The pope did not suffer the annexation of the legations quietly. He excommunicated Victor Emmanuel and those who had assisted him. At the same time he issued a call for the formation of a volunteer army, which was joined by many of the French legitimists. The command of the army was undertaken by a bitter enemy of Napoleon, General Lamoricière, who had distinguished himself in Algeria. In a very short time the volunteer army saw active service. Garibaldi with 1000 armed insurgents had come from Genoa and landed at Marsala in May, 1860, had revolutionized Sicily, and was marching against Naples. The Government at Turin, which had at first allowed Garibaldi to do as he pleased, now saw with displeasure the progress of the Republicans, and feared that these might anticipate it at Rome and Naples. It sent an army to the south. Napoleon, whose consent Cavour had sought for the foreseen clash with the pope, sent word to Turin "Fate presto" (act quickly) and crossed to Algeria that he might not see what was going on. At Castelfidardo, not far from Ancona, the Piedmontese army met the papal forces under Lamoricière, and Lamoricière was defeated on 18 September, 1860. The Piedmontese occupied the Marches, and then advanced into the Kingdom of Naples. By a vote of the inhabitants on 21 September the population was then allowed to declare itself in favour of annexation to Sardinia. King Francis II of Naples after a brave defence was forced to capitulate at Gaeta on 13 February, 1861, and retired to Rome. All the annexed provinces sent representatives to the Turin Parliament, and Victor Emmanuel II was here proclaimed King of Italy on 13 March, 1861. Rome and Venetia alone were still to be won. Venetia was added to Italy in 1866 as the result of the victories of its ally, Prussia.

At last Rome was also to follow. Napoleon had at the end of December, 1866, withdrawn the small French garrison from Rome. It is true indeed that a foreign legion, composed for the most part of French soldiers and officers, was formed at Antibes to undertake the protection of Rome, but its position was nevertheless very critical. Garibaldi in the autumn of 1867 invaded the States of the Church with his insurgents. Then Napoleon once more sent a force from Toulon, which together with the papal army repulsed the forces of Garibaldi near Mentana, northeast of Rome on 3 November, 1867. The French garrison after this remained in Rome, since the Parisian Government had to yield to the wishes of the Catholics of France. Not until 20 July, 1870, after the Franco-German War had broken out, were the troops withdrawn. After Napoleon had been taken prisoner at Sedan, Italy, which had removed its capital to Florence in 1865, sent troops against Rome under Cadorna, and these on 20 September, 1870, entered the city through the breach at the Porta Pia. A vote, which declared in favour of annexation to Turin, was here also to give approval to the occupation. Pius IX excommunicated all participants in and authors of the occupation of the States of the Church. All Catholics condemned the action of Italy. To protect itself against the remonstrances, Italy on 13 May, 1871, issued the so-called law of the Papal Guarantees (see GUARANTEES, LAW OF), which was to secure to the pope his sovereignty, the inviolability of his person, as well as the freedom of the conclave and of the œcumenical councils. In addition to this a yearly pension of 3,225,000 francs was voted to him. The Vatican, the Lateran, and the country-seat Castel Gandolfo were declared extra-territorial. But Pius IX, to maintain his protests against the seizure of the States of the Church, refused to accept the law, and shut himself up in the Vatican.

The Roman question remains unsettled to the present day, since its solution by Italy has thus far been absolutely one-sided, besides having been brought about by violence. Without heeding the protests of the pope, Rome was declared the capital of Italy on 30 June, 1871. The radical elements, who were hostile to the Church and who had contributed so much to the unification of Italy, continued for the future also to hold the upper hand. Pope Pius IX by the Decree "Non expedit" of 29 February, 1868, had forbidden the Italian Catholics to participate in the political life and especially in the election of representatives of the Kingdom of Italy. Only in very recent years has a gradual tendency to a change of relations become noticeable. Although Pius X, because of the principle involved, adheres to the "Non expedit", he permits the participation of Catholics in administrative elections (municipal and provincial elections), and since the Encyclical "Certum Consilium" of 11 June, 1905, in certain cases on the recommendation of the bishop also participation in the parliamentary elections. Since that time the Catholics have begun to take part in the political life of Italy (1909: 22 representatives) and to exert an influence which we hope will redound to the welfare of the Church and of Italy.

GENERAL WORKS.—THEINER, *Codex diplomaticus dominii temporalis S. Sedis* (3 vols., Rome, 1861); REUMONT, *Gesch. der Stadt Rom* (3 vols., Berlin, 1867—); GREGOROVIUS, *Gesch. der Stadt Rom im Mittelalter* (8 vols., 4th ed., Stuttgart, 1886—); BROSCH, *Gesch. des Kirchenstaates*, I (Gotha, 1880), dealing with the sixteenth and seventeenth centuries, II (1882), extending from 1700 to 1870; SUGENHEIM, *Gesch. der Entstehung u. Ausbildung des Kirchenstaates* (Leipzig, 1854).

SPECIAL WORKS TO THE FIRST AND SECOND PERIODS.—HARTMANN, *Geschichte Italiens im Mittelalter*, III (Gotha, 1908–11); FICKER, *Forschungen zur Reichs- u. Rechtsgesch. Italiens* (4 vols., Innsbruck, 1868–74); NIEHUES, *Gesch. des Verhältnisses zwischen Kaisertum u. Papsttum im Mittelalter*, I (2 vols., 2nd ed., Münster, 1877), 87; GIESEBRECHT, *Gesch. der deutschen Kaiserzeit* (6 vols., Leipzig, 1881–95); SIMSON, *Jahrbücher des fränkischen Reiches unter Ludwig d. Frommen* (2 vols., Leipzig, 1874–76); DÜMMLER, *Gesch. des ostfränkischen Reiches* (2nd ed., 3 vols., Leipzig, 1887—); DOPFFEL, *Kaisertum u. Gustav Schnürer.

Station Days.—Days on which in the early Church fast was observed until the Hour of None (between twelve and three o'clock), later of Sext (nine to twelve), as distinct from the strict observance of the fast day proper until Vespers (three to six). The ancient liturgical writers commonly apply the word *statio* to fast days, but a distinction must be made between *jejunium* and *statio*. Pamelius will not admit this distinction, but Cardinal Bona is less uncompromising and admits that though *statio* is sometimes identical with *jejunium* this is not an absolute rule. The *statio* came to an end at the Hour of None, but the *jejunium* was not broken till the Hour of Vespers, which is a notable difference. However, Tertullian speaks of a less rigorous fast which was broken sooner and which he calls *semi-jejunium*. In this case the faithful did as on a day of *statio*, and the fast did not differ from the one on that day. To Tertullian *solvere stationem* meant exactly the same as *solvere jejunium*. But St. Gregory the Great designated certain churches in Rome as *stationes* and recommended that on the more solemn festivals they should be made stations (*stationes fieri*) until the Hour of Sext, and at these same churches on the appointed days (*statis diebus*) the faithful should assist at the Office. The stations have long since been abandoned and have left their trace only in the Missal, but in some instances the fast lasted longer and has been preserved even to modern times. The classic text on the *stationes* is found in Tertullian's "De Oratione" (XIV): "Similiter et stationum diebus non putant plerique sacrificiorum orationibus interveniendum quod statio solvenda sit accepto corpore Domini". (In the same way many think that on Station days we must not be present at the prayers of the sacrifices because the Station should be finished when the Lord's Body is received.) Comparison of other phrases of the same author with this passage shows that the *statio* was celebrated on Wednesday and Friday, of each week, lasting until the ninth hour. The 69th Apostolic Canon enjoins the observance of a fast on these two days.

An explanation of the fast of the *stationes* has been found in the fact that the solemnity was fixed *statis diebus*, but this is a purely verbal coincidence; and it seems difficult to find in it anything else. St. Ambrose gives a reason which may have been accepted in his time: "Our fasts", he says (Sermo XXV), "are our encampments against the attacks of the devil; they are called *stationes* because we remain standing" (*stantes*). It also seems probable that these days of fasting and prayer were characterized by endless watchings, and processions either within or around the church, when the faithful were obliged to remain standing, *stantes*, as is said in modern French in exactly the same sense, *stationner*, to stand. *Statio* became the place before which or within which the faithful walked in procession and, tired out, but always standing, sometimes leaning on a stick, assisted, before separating, at the celebration of the Liturgy. The churches to which they repaired took the name of *stationes*, though incorrectly, and the route followed to reach them became *statio ad*. . . . The tomb of a martyr became the object of a kind of pilgrimage to which the faithful went in a body, and thus arose another *statio ad*. . . . But the *martyria* alone did not attract the crowds; it became the custom to go to the celebrated basilicas, and sometimes all the clergy of a large city assembled at a certain point, probably in the vicinity of the episcopal residence, to go thence with the bishop, the patriarch, or the pope himself to the place assigned for the celebration of the Eucharist. As time went on parishes or *tituli* were formed in the cities and their grouping gave rise to vexatious questions of precedence, which were solved as well as could be by "rotation". Rome has preserved the most complete accounts of its stational churches, but we know that these celebrations also took place at Jerusalem and Constantinople. The going to the *statio* was quite a ceremony; thither were carried the sacred vessels, liturgical instruments, all that was peculiar to the service of the pope, and also, doubtless, all that would supplement the insufficient liturgical furniture of the church to which they were going. The "Liber pontificalis" states that Leo III (795) had twenty silver vessels made which were borne by acolytes in the processions to the stations. There is extant a writing called "De locis sanctis martyrum quæ sunt foris civitatis Romæ", the last chapter of which contains the list of "station basilicas" of Rome. This little document, the work of a German pilgrim, dates from the pontificate of Honorius I (625–38), but seems to be based on an older compilation dating at least from Pelagius II (579–90).

The following is the list of the station churches as it was compiled in the time of St. Gregory: Patriarchal basilicas, S. Giovanni in Laterano, S. Pietro, S. Maria Maggiore, S. Paolo Fuori le Mura, S. Lorenzo Fuori le Mura; cardinalitial titles, S. Sisto, SS. Giovanni e Paolo, SS. Quattro Coronati, S. Clemente, S. Marcellino e Pietro, S. Pietro in Vincoli, S. Silvestro ai Monti, S. Prassede, S. Pudenziana, S. Eusebio, S. Vitale, S. Susanna, S. Ciriacos, S. Marcello, S. Lorenzo in Lucina, S. Lorenzo in Damaso, S. Marco, S. Anastasia, S. Nereo e Achilleo, S. Balbina, S. Sabina, S. Prisca, S. Maria in Trastevere, S. Cecilia, S. Crisogono; diaconates (those which had been stations before they were diaconates), S. Nicolo in Carcere, SS. Cosma e Damiano, S. Maria in Via Lata, S. Maria in Porticu, S. Maria in Domnica. The number of stations is eighty-six, and, that of the churches being less, some of them have the station several times in the year. S. Sabina, the station established by Urban VIII for Ash Wednesday, is the most important of all because it was long customary for the popes to repair thither on that day to distribute the ashes to the people.

Persons desirous of gaining the station indulgences first repair to a church in the vicinity of the station in imitation of the ancient collect, or gathering of the clergy and the people, preparatory to the procession. In this church prayers are recited from the Station Manual, consisting of invocations to the Blessed Virgin and the Martyrs. Then begins the journey to the station accompanied by the recitation of the Miserere, 5 Paters, the Ave and Gloria, and the steps of the Passion of Christ. On arrival at the station church the Litany of the Saints is said with versicles and prayers, ending with the "De Profundis". The pope grants dispensations to all who are unable to go in person to the stations, such as cloistered religious, prisoners, the sick, etc., who are free to visit their own church and say the prayers prescribed. Cardinals and their attendants and prelates of the papal court may gain the station indulgence by reciting certain prayers in their oratory. These prayers are printed annually and distributed to the cardinals and prelates who assist at the first Sistine chapel of Lent.

Statistics, ECCLESIASTICAL.—In dealing with statistics, both theoretically and practically, it is unimportant whether the men, matters, or actions subject to observation are ecclesiastical or civil. Hence the methods used for the collection and tabulation of ecclesiastical statistics ought not to differ from those employed in the preparation of general statistics, if accurate results are to be attained. The concise classification tested and adopted for general statistics will therefore serve for ecclesiastical statistics: (a) personal statistics, when men are the object of observation; (b) material statistics, when things and actions are under observation.

By the study of theoretical statistics (methods, scope, limitation, etc.) practical statistics were by degrees perfected until they reached the point where it is possible to sift thoroughly the materials gathered and to discover their connecting links. Ecclesiastical statistics need no other methods or technic. The statistics of economics sift, classify, and group all possible questions concerning economic and industrial life. Ethical statistics group and collate all manifestations, whether favourable, indifferent, or unfavourable, of the free will of man in the sphere of morals, while other branches of this science investigate clearly-defined groups of interests. Similarly, ecclesiastical statistics have their own peculiar province, though the boundaries between this and other branches of statistics cannot always be sharply defined in every direction. The method of gathering statistics concerns itself with resultant totals, in order to enable us to investigate properly the most varied conditions, events, circumstances, omissions, etc. The science of statistics handles the data thus obtained in its own peculiar way, so that we may acquire a correct knowledge of the facts of governmental, ecclesiastical, and national life. For our purpose it is irrelevant whether statistics are an exact science or not.

1.—HISTORY.—From time immemorial the city, State, and Church have called for tabulation in some form, however rough and empirical, of the statistical knowledge acquired. The fixing of the relationship of family and tribe (see the statements of the Old Testament), the just division of public burdens, the preparation of lists of men able to bear arms, and many other matters gradually led the proper authorities to make the desired records. The execution of such records continually improved, though naturally dependent on the means of intercourse and administrative powers at hand. The medieval Church, through its organs and institutions, notably influenced statistical science, however unreliable in many cases the results obtained. Later the increase of general culture, the greater freedom of intercourse, and the larger claims made by the modern State upon its citizens led through the taking of a census at indefinite periods, or for casual reasons, to a regular periodical enumeration. It has not hitherto been noticed in statistical science that the earliest of these periodical enumerations are those of the inhabitants of Rome which were annually made at Easter by the parish priests. As the parish priests were supported by the civil power, all persons residing at Rome—Christians of all kinds, Jews, Mohammedans, pagans—were counted and classified under definite heads. These very exact statistical enumerations can be traced back far into the sixteenth century and ceased only with the fall of the temporal power in 1870. Rich printed material still awaits investigation. Immense manuscript records of the Roman parishes show exactly the methods used in making these enumerations. Not until the seventeenth century do secular statistics show a periodical census; it becomes more frequent in the eighteenth century. In Prussia the first periodical census was taken in 1719. In 1755 Sweden began a comprehensive agricultural census. In 1790 the United States of America took a census of its own on a large scale (census every ten years). In the nineteenth century periodical census-taking reached its acme. In the German Empire the census of 1 December, 1871, was thorough and scientific.

It was not for statistical science, but solely for purposes of discipline and administration that the Catholic Church ordained the exact keeping of registers of all kinds, first by special laws, then by the general Tridentine law. There were baptismal registers, cemetery registers, confirmation books, etc. Sixtus V (1585–90) made it the duty of all bishops to send comprehensive reports of their dioceses at stated periods. These are of great value in the administration of the Church (see Constitution "Romanus Pontifex", of 20 December, 1585). Similarly the Apostolic nuncios were commanded to send to Rome full reports of ecclesiastical conditions in their respective territories. This original material, official in character, has never been officially elaborated on its statistical side. Of late years attempts have been made, solely for the sake of its historical interest, to publish it (Schmidlin, Pasture, Friedensburg, and others); so far, however, no comprehensive statistical tabulation of the material has appeared. With episcopal reports as a basis, it would not be difficult to produce a general ecclesiastical manual of statistics; attention is particularly called to this continuous authoritative source of ecclesiastical statistics. In the "Acta Apostolicæ Sedis" (1910), pp. 1 and 17, appeared a new and exhaustive list of queries for these reports. Other Roman authorities, particularly the Congregation of Propaganda, have likewise collected valuable material, intended almost entirely for disciplinary and administrative purposes. Access to these statistical sources is rather difficult, though in course of time they may be thrown open. Mention should also be made here of the very valuable reports sent to Rome for many centuries by the heads of orders from all the respective provinces of their orders, but these reports have been made accessible to students only in a restricted way.

It is evident from these and other facts not here mentioned, that the history of ecclesiastical statistics is of great interest, even though these materials were not collected to serve the ends of scientific statistics. The missionaries were probably the first to present ecclesiastical conditions in a more or less crudely digested statistical form; it was necessary for them to show their patrons in what way the given alms had been used. The first imperfect attempts to present ecclesiastical statistics in a periodical way are found in old works containing collections of missionary reports.

Among those who contributed to develop statistics as a science special mention is due to Hermann Conring (1606–81), professor at the University of Helmstädt; Gottfried Aschenwall (1719–72), professor at Göttingen; Johann Peter Süssmilch (1707–67), superintendent and consistorial councillor in Prussia, who obtained largely from ecclesiastical registers the material for his epoch-making work: "Die göttliche Ordnung in den Veränderungen des menschlichen Geschichtes"; also Quételet (1796–1874), a Belgian, who must be regarded as the father of moral statistics, although the philosophical basis of his theory should be rejected as wrong. In the last fifty years so many distinguished writers in most civilized countries have given their attention to the establishment and maintenance of statistics that we cannot mention even the most noted of them. Readers are referred to the work of Mayr, "Statistik und Gesellschaftslehre" (1895–97).

Among the difficulties that obstruct the advantageous and exhaustive collection of statistics by private individuals are modern intercourse and industrial life, the highly specialized development of governmental, parliamentary, and municipal administration, and the military organization of most civilized countries. Statistics had first to be put under control of the State, and then to be taken up by the municipal and county authorities. Thus began the statistical bureaux aided by government authority in their investigations. On the other hand their tasks, serving purely practical ends, are exactly laid down for them, without any regard to larger scientific demands. Nevertheless the labours of the official statistical bureaux are satisfactory and valuable. Official ecclesiastical bureaux for the collection of ecclesiastical statistics are almost entirely lacking, although numerous suggestions and propositions have been made for such.

A clear distinction must be made between statistics concerning religions and ecclesiastical statistics. The classification of mankind according to religions pertains to general statistics, i. e. so far as the civilized countries of the whole world are concerned (see STATISTICS OF RELIGIONS). Hitherto only a few countries, and these for trivial reasons, have failed to ascertain exactly this important fact. The religious classification being made, then, ecclesiastical statistics are the work of those who hold the Christian faith; the first task of these statistics is to make a further classification of Christian denominations. After this each denomination makes such collections of statistics as enable the investigation (so far as possible) of all the diverse relations of the individual, the parish, and the whole body to the denominations, ecclesiastical authorities, institutions, etc. It can, therefore, be said that the statistics of religions separate mankind into groups, and that ecclesiastical statistics in the strict sense classify the great Christian group into subdivisions; that in these subdivisions religious statistics investigate methodically all religious and ecclesiastical events capable of being considered statistically, make clear their characteristic criteria, and lay bare the connexion between cause and effect. In addition to questions strictly religious and ecclesiastical, Church statistics should include all those other domains in which a Christian population and the ecclesiastical authorities should be interested, as: schools, charities, religious associational life, missions, and many other matters. Ecclesiastical geography, topography, and similar topics are naturally excluded from the survey of ecclesiastical statistics, even though they necessarily make much use of statistics.

In ecclesiastical statistics, as in every statistical collection of aggregates, the reliability of the surveys depends upon the excellence of the preparation and execution of the undertaking. The most essential preliminary conditions for a well-managed statistical survey are: determination of the period of time and extent of space to be covered; selection of the collectors of the statistics and their procedure; the preparation of clear, simple, comprehensive questions for the statistical inquiry-papers. Next come revision, supplementary additions, and expert arrangement of the original material. Third, one of the known methods of performing such work must be selected, as the system of small strokes, that of small blanks to be filled, or an electrical counting-machine, and the respective divisions of the work must be closely scrutinized. The most common way of presenting results is to exhibit the matter in the form of a table, the figures of which [illegible] have a qualified or an unconditional value. Particularly clear results are obtained by the calculation of averages and by relative numbers; their scientific valuation, however, is subject to certain precautions. It is easily understood that the full value of many results can be recognized only when they are placed in suitable relation to other results. Of late, the use of the graphical method has somewhat increased in ecclesiastical statistics, while, so far as I know, the plastic method has not yet been tried. Diagrams (geometrical figures of all kinds) have been profitably used; ecclesiastical statistics also use what are called cartograms, or coloured representations of geographical surfaces. Occasionally, use has been made of various combinations of these forms of presentation, the reading of which is easy to the practised eye. Such presentations of statistical results in popular forms were employed in secular statistics on a large scale for the first time by Hickmann of Vienna in his various pocket atlases, of which large editions were printed and sold. While it is evident that Catholics cannot concede to statistical laws the character of unchangeable natural laws, ecclesiastical statistics show that the absolutely free will of man is indeed influenced by passions, customs, environment, education, character, etc., but can never be entirely annulled.

Ecclesiastical statistics have not shared so far in the benefits of international coöperation in the treatment of statistical questions. Not even in the larger civilized countries has it been possible to introduce uniform, and universally observed principles. At the general congress of German Catholics held at Osnabrück in 1901, the present writer urged the establishment of an international bureau of ecclesiastical statistics. The proposition was received enthusiastically, but nothing further has been done. On account of the large demands now made on ecclesiastical life everywhere, it is imperatively necessary that the question then discussed and afterwards dropped should receive more practical consideration.

If the total of Protestant statistical work and that of the Catholic Church be compared, it may be said that both bodies have accomplished about the same and with the same success. If the work of the two bodies be compared in individual countries or in large sections of a country, the result is sometimes favourable to Protestant statistics, sometimes to Catholic. Differences of considerable importance are to be found in the methods of carrying on the work, so that the requirements of comparative statistics cannot, very often, be met. This is most perceptible in the views on which are based the methods of collecting aggregates in missionary statistics, e. g. what constitutes a catechumen, an ordained missionary, and similar questions. Since this article does not propose to go more fully into Protestant statistics, those desiring to learn more on that head are referred to the bibliography at the end.

Catholic Church statistics can be classified in the most varied manner. The following classification is in accordance with the most important principles:—

I. Arranged according to the source of collection: (a) official statistics, when they are classified for official purposes by the central administration of the Church, or by metropolitans, bishops, or parish priests in their official capacity; (b) associational statistics, when orders, sodalities, associations, or parts of such organizations are accustomed to gather statistics in any manner for their own needs; (c) private statistics, when individuals or groups of such collect and digest statistical data for scientific or practical ends.

II. Classified according to geographical area: (a) statistics of the world, for all or any category of church questions that can be statistically considered; (b) national statistics, when the above-mentioned statistics refer to a country or an essential part of it; (c) provincial and diocesan statistics, when the observation of aggregates is confined to a church province or diocese; (d) parish statistics, when the statistical investigations refer only to a parish; (e) associational statistics, when the geographical territory claimed by the members of a society as the field of their work is investigated.

III. Classified according to the subject-matter and extent of the inquiries: (a) general statistics for the whole world; (b) world-wide statistics for special questions; (c) partial statistics for special questions.

Without considering further classifications it may be said that by far the weakest point in the first group is official statistics.

If Catholic church statistics are to be complete, the subject-matter should include all persons, objects, and actions connected directly or indirectly with the Church, its entire organization, its authorities, and all its various regulations. Statistics of this exhaustive character do not now exist nor will it be possible in the near future to obtain such, even if it be conceded that the carrying out of such a task be possible. What exists is the tabulation of some of the most important ecclesiastical objects and persons of the Catholic world; these statements, however, are not official but solely the result of private industry. Consequently, the new statistical tables (Baumgarten and Krose) only claim to have the value of the material on which they are based. For earlier general statistical work see Streit, "Führer durch die deutsche katholische Missionsliteratur" (Freiburg, 1911), 99–102. Both authors were but seldom in a position where they could either obtain an enumeration themselves or always fill out the gaps in the available material.

Theoretically it must be conceded that the central administration of the Church has the necessary means and power to attain in time an exhaustive, absolutely correct description of all the possessions of the Church in the world. Practically no use has been made of this power, for the "Gerarchia cattolica", now the "Annuario pontificio" (1912), is not a statistical work. Leaving out scattered and unimportant statistical researches made by this or that Roman administrative board, the Congregation of Propaganda alone has given official attention to statistics. The result of the inquiries of the congregation in the regions under its care are seen in a work which appears at irregular intervals, "Missiones Catholicæ cura S. Congregationis de Propaganda Fide descriptæ". This bulky work (last edition, Rome, 1907) serves, indeed, the purposes of an historical and statistical work of modest pretensions, but it lacks that scientific exactness which the compilation of modern statistics demands. It is a striking fact that the German periodical, "Die katholische Missionen" of Freiburg is often able to make statements more really exact than this official manual of the Congregation of Propaganda. The reviews of the irregularly issued volumes of this work often point out clearly enough its very considerable defects, but no essential improvement in the collection or treatment of the matter has followed.

The English-speaking branches of the Catholic Church have the best official statistical publications for entire countries and continents. Without exception they all issue year-books which contain the most important records more or less complete. Although the statistics are seldom thoroughly worked over in these publications, yet the statistician does not lay great stress on this, because he can do it himself, and is satisfied if he can get the raw material fairly complete. The best of these annual publications is "The Official Catholic Directory and Clergy List", which was formerly published at Milwaukee, Wisconsin, now at New York. The publication of this year-book is a private undertaking, but in reality, in a certain sense, it is an official ecclesiastical work, because the publisher is almost entirely dependent on the co-operation of the episcopal authorities of the United States. It must, however, be said that the episcopal chanceries measure the very important figures of the increase of Catholics in the individual dioceses more by estimate than as a result of detailed information. Arthur Preuss, in his "Catholic Fortnightly Review", has often pointed out this unfortunate defect, without, however, any great improvement in this regard being attained. It should be said that the difficulties encountered in determining exactly the number of Catholics in a diocese are especially great in the United States. The same applies to the statistics of schools and school-children, which must be characterized as inadequate. Most excellent, on the other hand, are the carefully revised records of the number of priests and their addresses at the time of publication. The statements of this year-book concerning other American countries are also serviceable, although not quite so copious and reliable.

The second place belongs to "The Irish Catholic Directory and Almanac, with Complete Directory in English" (Dublin). This excellent year-book not only contains the usual general statistical statements, but also includes well-arranged tables hardly to be found elsewhere. Especially well presented are the losses in population so characteristic of Ireland. There is some lack of uniformity in the statements.

"The Catholic Directory, Ecclesiastical Register and Almanac" (London) is an official annual publication for the Catholic Church in England. Although it would be desirable to have a greater uniformity in the contributions of the different dioceses, yet the copious material offered is a cause of great satisfaction. In view of the difficulties attending the problem of pastoral care in the large cities of England, it is at times a cause of surprise that the statistics presented can be so exact. The fourth year-book to be noticed is described in its title as official: "The Catholic Directory for the Clergy and Laity in Scotland. By Authority of the Archbishops and Bishops of Scotland" (Aberdeen). It is a great credit to the small body of Catholics in Scotland that they have an official year-book of their own; at the same time it reflects on those countries which, with many millions of Catholics, have not yet made equal progress in this direction. Even in this carefully-prepared annual there are some records that require more careful supervision. The fifth place is to be assigned to an annual year-book, issued at Madras for the whole of south-eastern Asia, and formerly entitled "The Madras Catholic Directory and General Annual Register", but now (1912) "The Catholic Directory of India", a work of great industry. If in a number of particulars the other year-books were taken as models, this meritorious publication could be brought to a high standard of excellence. The typographical work is somewhat poor, but that matters little. The sixth place belongs to the year-book: "Australasian Catholic Directory containing the Ordo Divini Officii, the Fullest Ecclesiastical Information and an Alphabetical List of the Clergy of Australasia" (Sydney). The organization of the church provinces is well given in this work, but the accounts of the individual missionary districts, especially of those on the mainland, are not complete. The list of year-books issued in English-speaking countries may be closed with "The Catholic Directory of British South Africa" (Capetown). This offers only a limited amount of data to the statistician, still a very praiseworthy effort is evident to develop gradually the contents of the directory.

There is an evident difference in the value of the works just mentioned, but that does not detract from the fact that this group of church year-books presents as a whole a very imposing piece of work. The annual publication of such volumes is made possible by the aid of advertisements which enable the publishers not only to cover the heavy expenses, but also to obtain a moderate return for their work. This points out clearly the way in which other countries can reach the same goal.

Each year the "Annuaire pontifical catholique", edited by Battandier (Paris), offers a great variety of useful statistical information which can be found elsewhere with difficulty or not at all; it contains also many historically and otherwise instructive articles and other valuable ecclesiastical information. For a number of years there has been published in Italy the comprehensive work "Annuario ecclesiastico", which presents the conditions of the Church in Italy with great minuteness, if not always with clearness and reliability. The large amount of matter that may be drawn from its records is shown in the present writer's volume, "Kirchliche Statistik" (Wörishofen, 1905). It should be said that the editors make every effort to overcome the inequalities still to be found in the contributions. The material offered by the "Annuario" for countries outside of Italy has no claim to consideration. If it were possible to develop this second part, so that it should be unexceptionable, there would be the beginning of a statistical handbook for the entire Catholic world. In that case the Italian part would have to be somewhat abridged, and the whole work divided into two volumes. The "Annuaire complet du clergé belge et répertoire des établissements religieux" (Brussels) is well arranged and copious in matter. It would have been well to include in it also the statistics concerning the Congo. The same excellent standard is maintained by the yearbook issued in Holland, the "Pius-Almanak". Besides information regarding the Church there are also literary contributions, while the Dutch colonies receive suitable mention. Up to 1904 two year-books were issued in France, of which, unfortunately, the larger and better, the "Clergé français" (Tours) ceased with the publication of 1904. The volumes of this annual still have a great and permanent value, because they have presented in a manner that is absolutely a model the life of the French orders. The second publication, "La France ecclésiastique", has existed for sixty years and meets more modest statistical demands. As to the two Spanish hand-books, "Anuario eclesiástico de España" and "Guia eclesiástica de España", no recent information is forthcoming, and it is doubtful if new editions have appeared during recent years. The Hungarian yearbook and schematism "Évkönyve és Névtára" is a successful work in which much industry has been displayed, as far as the specific Hungarian records are concerned. The statistical data concerning other hierarchies have been obtained at second and third hand.

The small book, "Taschenkalender für den katholischen Klerus" seeks, more or less successfully, to collect the data for Germany, and the "Frommes Kalender für den katholischen Klerus Oesterreich-Ungarns" undertakes to do the same for the Austro-Hungarian monarchy. Neither is suited in any way to the importance of the hierarchies of both countries. The excellent "Kirchliches Handbuch", edited by Krose, issued by Herder since 1908, gives full information regarding the affairs of the Church in Germany; every effort is made to improve and develop the work. (For fuller discussion of ecclesiastical statistics in Germany, see below.)

As the majority of Catholics in Canada are of French descent and still speak French, especially in the Province of Quebec, the Canadian year-book is published in French; it is entitled "Le Canada ecclésiastique". The book is accurately and carefully prepared and does good service. However, nearly all its statistical records are to be found in the "Official Directory" of the United States, so that it is seldom necessary to consult the Canadian work. There are a few other smaller publications which need hardly be enumerated here. The foregoing description will serve as a sufficiently exhaustive summary of the statistical authorities of official or semi-official character. It should also be said that in writings on the subject reference is made to a kind of general statistical outline for the whole of Portugal, but when the statistical tables for the present writer's large work, "Die katholische Kirche unserer Zeit und ihre Diener in Wort und Bild", were being prepared it was not possible to find a copy of this Portuguese publication. Neither is it known whether any general ecclesiastico-statistical work has been published in the South American countries, except the "Guía eclesiástica de la Republica Argentina". Such compendiums would be all the more desirable, because the zealous activity of Pius X in increasing the number of ecclesiastical provinces and dividing dioceses has greatly increased the difficulties in determining from a distance the statistics of these territories. (See summaries in "Theologische Revue", 1904, Nos. 4, 5, 12, 15, 16, and in "Literarische Rundschau", Nos. 7, 8.)

After the year-books for entire countries or continents come the diocesan compendiums, so far as the contents of these exceed purely liturgical information in reference to the observances of the church year, commands or prohibitions for the clergy, and similar administrative matter. Excellent samples of general outlines, and large historical and statistical records are to be found in Bavaria, Austria, Hungary, as well as a number in Germany outside of Bavaria and in Switzerland. They are model diocesan compendiums and are of great value to the statistician. Although all are not issued regularly, yet so large a proportion are published annually that they can easily be placed among the ecclesiastical year-books. Publications of the same character containing serviceable matter also appear in some other countries, but copies are hard to find, so that it is impossible to present an exact summary. Official compendiums of this kind should be issued, if not in all dioceses, at least in all ecclesiastical provinces. The aims of the *Landesdirektorien*, or government directories, are frequently other than those of ecclesiastico-statistical compendiums, from which many more details of their subjects are expected. (See Brüning, "Bemerkungen zu den Handbüchern und Schematismen der deutschen Diözesen" in "Literarische Beilage der Kölnischen Volkszeitung", No. 42, 19 October, 1911; Liese, "Die Diözesanschematismen", ibid., No. 44, 2 Nov., 1911.) Some years ago, when, owing to the pressure of modern conditions, the former customary general parochial supervision was replaced by the supervision of the individual members of the parish, all ways and methods were sought to reach the individual in some practical way, especially in the large cities. This led to the excellent proposal to issue periodical parish papers, so as to give the members of the parish all the essential facts of the parochial life. This method has been successfully tried in a good many places in Austria, Germany, England, and, here and there, in the United States. In these papers, which appear at regular or irregular intervals, statistical records and reports collected by the parochial authorities are published with constantly increasing frequency. These statements have in all instances attracted much attention and have often developed new interest in the parish and its religious services. If this good custom were introduced everywhere, it would soon be easy to draw up a really lifelike presentation of the Church in every diocese.

After this enumeration of the various kinds of statistical works prepared by the church authorities, or at least liberally aided by them, it must be noted that in not a few countries the government authorities collect information concerning ecclesiastical matters or present, in the national statistical works, first-hand material which is exceedingly valuable to the ecclesiastical statistician. He is, indeed, frequently dependent upon them, because these figures are not to be found anywhere else. In addition the "Hofkalender" or "Almanach de Gotha", as it is called in the French edition, gives statistics of all kinds, the exactness of which may generally be relied upon. This almanac is well known throughout the world. The state directories and the "Hofkalender", which are frequently the authoritative and the only sources for the statistics of religion, are sometimes also important sources for ecclesiastical statistics. While formerly the public had but little interest in exact data concerning the great Catholic orders, there has been a change in the present era. The latest statistics collected are published more or less regularly and attract much attention. These figures are based on thorough investigations, which make it possible at regular intervals to offer an exact summary of the growth and development of the respective orders. Only a few, however, of these important statistical records are published, and only in isolated instances are they to be found by the laity in the book trade or elsewhere. Two important works belong to this class, "Schematismus totius ordinis Fratrum Minorum" (Assisi) and "SS. Patriarchæ Benedicti Familæ confœderatæ" (Rome). Along with these are excellent outlines for the congregations. General statistics are drawn from the catalogues of each Jesuit province which are at the disposal of those who desire to know, while the catalogues themselves are very seldom given to the public. It is not possible to say, from the only—and very scanty—statistics of the Dominican Order known to the present writer, whether, besides the enumeration of provinces, congregations, monasteries, and members of the order, other statistical work is also undertaken. The Capuchins publish statistical summaries in their "Analecta ordinis", of which one volume is issued annually. The further statistical summaries of other orders need not be mentioned here; for these the reader is referred to the respective articles in THE CATHOLIC ENCYCLOPEDIA. There are only a few statistical outlines of monasteries for entire countries. The year-books mentioned above give copious records of the monasteries for both sexes in the territories covered at the time of publication.

A very important section of ecclesiastical statistics is that comprising the statistics of the missionary labours of the Catholic Church. As already mentioned, this branch of statistical work was the earliest undertaken and the most has been done in it. Consequently it is in this field that we have the most thorough and complete statistics. What the Propaganda has, in this respect, done officially has already been noted. The statistical labours of the missionaries have, from crude beginnings, developed in the present time to imposing performances. It is not, however, meant that there could not be improvements and additions in many particulars: above all there might be greater uniformity in the *questionnaires* and clearer, presentation of the headings to be conveyed. The immense amount of material, brought together by individual missionaries, by orders and congregations, and from other sources, has of late been critically examined and collated, largely by German and French scholars. For further particulars of this collation see MISSIONS, CATHOLIC, where a copious bibliography is given; see also the work of Streit mentioned above, on the bibliography of German Catholic missions.

Much alarm was expressed by the timid at the time when the statistics of charitable work were first demanded, when the opinion was maintained that a statistical record should be kept of needy persons and applicants for help, and a combined organization of charitable work was demanded. The fear was expressed that the noble, world-embracing conception of Christian love would suffer from the business-like treatment of it that would be necessary. Nothing of this kind has happened; the result of the new method has rather been to add new and enthusiastic members to charitable associations, because each could see clearly that the impelling force of Christian charity had really increased through the unity of organization and the labours of statisticians. The statistics which reveal a good, a merely even, or a poor ratio between relief and need, on the one hand, and between the work done and the expenditures, on the other, make possible a more exact use or a greater output of the power latent in the forces in question. Another, and very important, point is that exact statistical records covering large territories facilitate the prevention of unwise expenditures. From the present writer's experience it may be asserted that lack of knowledge of organizations still capable of doing work has led to the establishment of new ones on much the same lines for which no need existed. The fact that those desiring to inaugurate charitable work of a certain kind did not know the existence near by of organizations with the same object has, unfortunately, been at times the reason for a needless expenditure of money which was far more imperatively needed for other purposes. It may also be noted here that the statistics of the actual results are effectual to inspire to greater endeavours those who co-operate in the work.

The idea of combining all Catholic charitable organizations was first realized on a large scale in the celebrated charity organization society (*Charitasverband*) established in Germany in 1897. This was followed in Austria by an imperial organization for all the charitable societies in the monarchy. For further particulars concerning the two organizations see "Kirchliches Handlexikon", s. v. "Charitas", where a bibliography is also given. For the United States a beginning of such general organization was made in the First National Conference of Catholic Charities held at the Catholic University, Washington, in 1910. An exceedingly valuable work is done in many countries—as Belgium, Bavaria, Prussia, Austria—and in many cities and provinces by the preparation of statistical summaries of all charitable associations with which Catholics are connected. Such handbooks of Christian benevolence save much time and labour; they show exactly what exists and also make existing gaps equally plain. In addition to this is the work done by the secretaries of the charity organization, who are able from their records to distinguish between the really needy and worthy and the professional beggars. Thus it is evident that a comprehensive statistical grasp of Christian benevolence has already been exceedingly useful and beneficial, and will be still more so in the future. But, while these two facts by no means, exhaust the list of advantages, a further enumeration cannot be entered upon here.

Wherever Catholic schools are permitted in addition to state schools, the number of these schools, of their teachers and scholars, and the expenditure on the same form an important branch of ecclesiastical statistics. Figures are far more merciless than the most severe denunciation of the indolent. In addition to the importance of such statistics for the elementary schools, statistics of the middle schools and universities show whether any, and how many, Catholics receive a liberal education, or are studying for technical callings, or pursue literary courses, and also make clear whether the figures are in proportion to the Catholic population. For if a deficiency in Catholic intelligence appears, because Catholics do not send their sons in sufficient numbers to the higher schools, leaders will surely be lacking to the Catholics in the next generation.

Ecclesiastical statistics also include the statistics of Catholic associations, whether purely religious, social, political, religious-political, or of any other kind. They show whether the individual societies are sufficiently developed and whether they are working with success or not. As regards the reports of the boards of managers of these societies, it may be said that, as all societies have more or less to do with money, it is desirable that the total amount of money given for the purposes of the society from its foundation should be counted up and that this total sum should appear in the annual report together with the amounts for the year, so that the reader of the report may be able to estimate the whole work done by the society. If the society has other works besides the collection and disbursement of money, these should also be presented in condensed form from the time of the establishment of the society. Once the labour of collecting these statistics for the entire period of the existence of the society is done, it is only necessary after that to add to these totals the records of the year just closed.

The brief outline given above by no means exhausts the possible applications of ecclesiastical statistics. Each one must apply the principles here explained to spheres not yet under statistical examination in order to gain a full realization of the great usefulness and absolute necessity of thorough statistical records. When the statistical work of the State takes up ecclesiastical affairs, it is not necessary in every case to reject it at once. There are, however, undoubtedly affairs of the Church which are outside of all statistical investigation on the part of the State. The State can successfully collect statistics of the external activities of the Church in training and education, associational life, and similar branches. In my opinion the church authorities of all ranks have in such case the imperative duty of collecting for their respective departments all those statistics which are adapted to present an image of the labours of the Church in each field. The uses of the often difficult and prolonged computations are evident. The filling out of exact statistical papers is of great value for all leaders of the Catholic people, showing who are really Catholics. This applies just as much to what is purely religious as to what pertains to charitable, social, and associational life. Comparative statistics make it possible to detect failures from the figures, and also to find out what fields it is absolutely necessary to cultivate, what have not been worked at all or worked but little. In the same way the successes are as easily to be seen from the figures and greatly increase the desire to go on working and the joy in the work.

As daily experience shows, the sum total of the statistical records of the Church is of great importance for the reputation of the Church. The opponents of the Church take more interest in its statistics than many Catholics. When, therefore, from the carelessness of those whose duty it is, the statistical presentation is an imperfect one, the importance of the Church is greatly damaged, because its opponents can conclude, with apparent right, that the Church is absolutely unable to produce effects in this or that domain, or else labours with very little success. As an example of what is needed in this direction, it may be well to notice here a brochure recently published by Bishop Canevin of Pittsburgh, "An Examination, Historical and Statistical, into Losses and Gains of the Catholic Church in the United States" (1912). The frequent unedifying controversies with opponents, who fall back on our scanty statistical figures, show that every force should be strained to produce an exact, complete, satisfactory statistical survey of the Church. Father Alberts says in "Literarische Rundschau", No. 8 (1905): "Like all statistical material, the protocols of visitations are a two-edged sword in the hands of the user, according as he wishes to use them for a good or undesirable end. As a rule the latter aim is the one sought, as it is seldom or not at all customary to keep a record of good works. If, therefore, any association in State or Church is not willing to yield the records of its inner administration to unrestrained misuse, it must itself undertake the publication of such statistics themselves in order to set the user on the right road by offering the necessary explanations."

It is not necessary in an article on church statistics to give the titles of the numberless works in which the results of these computations are arranged and given. These results have been published in various articles of The Catholic Encyclopedia treating matters in which church statistics were necessarily referred to. Chief among these are the numerous geographical, ecclesiastical, social, and historical articles, which give the bibliographies of the respective subjects. Besides the books and treatises mentioned in the course of this article, it is only necessary to mention a few publications which treat church statistics, their uses, and necessity theoretically: *Kirchliches Handlexikon*, s. v. *Statistik;* Baumgarten, *Kirchliche Statistik* (Wörishofen, 1905); *Historische-politische Blätter*, CXXXIV, 831; *Germania* (Berlin, 1905), No. 5, 6 January, in regard to the question of the establishment of a German bureau for church statistics; *Augsburger Postzeitung* (1905), No. 49, 1 March; *Zur kirchlichen Statistik* in *Kölnische Volkszeitung* (Cologne, 1905), No. 63, 22 January; *Neues vom Gebiete der kirchlichen Statistik* in No. 272 (1905), 3 April; *Berliner protestantisch-kirchliche Statistik* (1905), No. 600, 22 July.

Paul Maria Baumgarten.

In Germany, beginning with the earliest years of the twentieth century, an active movement took shape towards the creation of a general and uniform body of ecclesiastical statistics. At the Forty-eighth Congress of the Catholics of Germany at Osnabrück the erection of a German bureau for ecclesiastical statistics was warmly recommended as a preliminary step towards an international institute for ecclesiastical statistics. This resolution has, indeed, not been carried out as yet; but the endeavours of the Catholic Congresses have not remained without result. The want of universal ecclesiastical statistics was to some degree supplied by a book on general ecclesiastical statistics for Germany which appeared in 1908 under the title of "Kirchliches Handbuch"; a second volume was published in 1909 and a third in 1911. It gives statistical information from governmental and ecclesiastical official publications dealing with the movement of the Catholic population of Germany. It includes also the number of priests and of candidates for the priesthood, statistics of religious orders, ecclesiastical action, and the position of Catholics regarding national education and morality. The manual, moreover, gives information on the organization of the whole Church in general and of the Church of Germany in particular, on ecclesiastical legislation and decisions, on the social and philanthropic activity of Catholics, the position of the Church in other countries, and Catholic missions among the heathen. The church authorities, too, favoured a further development of ecclesiastical statistics, both by recommending the "Kirchliches Handbuch", and especially by drawing up a *questionnaire* satisfying every scientific requirement. Whether these efforts of the church authorities will produce the desired effect depends on the response they meet with from governmental and municipal statistical bureaus and from registrars' offices; for without such co-operation the proportion of baptisms to births, of marriages before a minister of the Church to those before a registrar, and of ecclesiastical funerals to deaths cannot be ascertained.

The Protestant State Churches of Germany followed the example of the Catholics with regard to the keeping of parish-registers. But the results were published only in the nineteenth century, especially during the last decades. This is chiefly due to the "Kirchliches Jahrbuch", edited by J. Schneuder, which has been published for thirty-eight years; statistical records of individual churches, however, and a general account published in 1862 by the statistician Zeller of Würtemberg (Zur kirchlichen Statistik des evangelischen Deutschland im Jahr 1862) preceded the publication of the "Jahrbuch". The Church Conference of Eisenbach (now "Deutsche evangelische Kirchenkonferenz"), in which all the Protestant Churches of Germany are represented, has formed a special statistical commission which, since 1880, has annually published the "Statistischen Mitteilungen aus den deutschen evangelischen Landeskirchen", a table of the baptisms, marriages, funerals, confirmations, communicants, losses, and conversions within the states of the German Empire and the provinces of Prussia. These statistics are accompanied by the corresponding figure of the movement of the Protestant population, which are for this purpose placed at disposal of the conference by the governmental statistical bureaus. An official centre for ecclesiastical statistics has, however, not yet been erected by the Protestant Churches of Germany.

German Diocesan Form of Statistical Table.

1. Chief Churches of the Parish
2. Dependent Churches
3. Public Chapels

Church Institutions for:—

4. (a) Teaching
5. (b) Care of Orphans
6. (c) Communicants
7. (d) Sickness, Insanity and Incurables
8. (e) the Care of the Poor and Old
9. (f) Other Purposes
10. Parish Priests
11. Other Secular Priests
12. Other Priests belonging to Orders
13. Houses of Male Orders
14. Members of Orders in them

Chief Occupation of These Regulars Consists in:—

15. (a) Cure of Souls, at
16. (b) Contemplative Life, at
17. (c) Training and Education, at
18. (d) Christian Charities, at
19. Houses of Female Orders
20. Members of Orders in them

Valuable material for ecclesiastical statistics is also offered by many of the German diocesan year-books. They are limited, however, to statements concerning the particular diocese and have, therefore, only special interest. The directories issued in English, as Kenedy, "Official Catholic Directory", "The Catholic Directory" (London) "Australian Catholic Directory", "Madras Directory", "Catholic Directory of British South Africa", have the advantage over the German works of this class, that they give information of ecclesiastical affairs for a much larger part of a country. In particular, the "Official Catholic Directory" contains much matter and is an indispensable reference-work for anyone who wishes to gain information concerning the affairs of the Church in the United States and Canada. The statements in these directories are generally limited to the names of the dignitaries of the Church and the priests, to the church institutions, schools, and monastic houses. The statistical records in the British and American directories are scanty and are not generally collected on a uniform plan. There is an almost entire lack of statistical records as to ecclesiastical action, the receiving of the sacraments, and the proportion of Catholic baptisms to births from Catholic and mixed marriages, of religious betrothals to Catholic and mixed marriages, burials with the rites of the Church to the deaths among Catholics.

It would be a good thing if the uniform table of ecclesiastical statistics which has been introduced of late in all the German dioceses were adopted by Catholics of other countries, as it meets all scientific demands. A translation of this table is given above. In German dioceses there are two query-sheets: Sheet A, which contains the queries given above, is sent by the episcopal curia to all the parish priests of the diocese. Before a definite date Sheet A must be filled out by the parish priest and sent to the dean, who is to examine it as to completeness and correctness and is to enter and summarize by a definite date all the events of his deanery in the blank provided for the district supervised by a dean (Sheet B); it is then sent to the episcopal curia, where the statistics for the entire diocese are put together.

H. A. Krose.

Statistics of Religions.—I. Definition.—This study concerns itself with religious bodies, the number of their members, and their distribution over various countries. In a wider sense the numerical account of the external manifestations of religious life also belongs to the same study, but of late it has been customary to comprise this latter group of facts under the designation of "Ecclesiastical Statistics" and to treat of them separately. As the whole field has only in the last decades been thoroughly worked, language has not as yet afforded a clear distinction between these terms. Practical reasons, however, speak in favour of such a distinction, and therefore we retain it in the present article, and treat ecclesiastical statistics separately (see Statistics, Ecclesiastical).

II. Historical Development.—The first attempts to determine exactly the number of members of a religious body are found in the records of the Jesuit and Franciscan missionaries of the sixteenth and seventeenth centuries. But they only give the number of the Christians, and not that of the adherents of the indigenous religions in the respective countries. Dating from the eighteenth century, some accounts indeed of the various religious systems and their spread are extant, but they only mention the countries over which the respective religions extended; as to the number of their followers we possess but scattered data even of that period, and no comprehensive and comparative records. It was only in the nineteenth century that an effort was made to distinguish statistically, according to religion, the entire population of the earth. The accounts given in Table I are the most accurate.

In all these calculations the total of the earth's population is considerably underrated. The numbers of the non-Christians are evidently only vague estimates without any solid foundation, as is clear from the round numbers and the great differences between the various estimates. Regarding Christians the computation is indeed more accurate, but very far from the exactness requisite for scientific research. Even the attempts made by geographers, such as Hübner, Peterman, Kolb, between 1850 and 1880, do not show any essential progress.

Statistics of religions that should come up to the requirements of science would be possible only if for every country the number of members of the various religious bodies were ascertained from reliable sources, and the totals arrived at from the individual results were tabulated. Average estimates that extend over entire groups of countries without definite indications of the numbers of the population and its distribution with regard to religious denominations are of little use for statistical investigations. Detailed religious statistics, dealing distinctly with all countries of the earth, were for the first time presented by Fournier de Flaix to the second congress of the International Institute of Statistics, held in Paris, in 1889. His example was followed by F. Von Juraschek (1898), H. Zeller, and H. A. Krose, S.J. (1903). The figures given by Fournier de Flaix mostly correspond to the conditions at the beginning or the middle of the eighties; those of Juraschek to the period 1890–97. Zeller has in essentials taken over the statements of Juraschek and made them the basis of his own investigations: he has, however, completed and arranged them more clearly (in Warneck's "Allgemeine Missionszeitschrift," 1903), and has added exact references for the various items. The numbers as given by Krose belong to the last decade of the nineteenth century and only in a few cases to 1901. The total results of these four accounts are shown in Table II.

Table I.

	Malte Brun 1810	Graberg 1813	C. G. Stein 1819	Pinkerton 1827	Balbi 1844
Christians	228,000,000	236,000,000	228,000,000	235,000,000	260,000,000
Jews	5,000,000	5,000,000	6,600,000	5,000,000	4,000,000
Mohammedans	110,000,000	120,000,000	120,000,000	120,000,000	96,000,000
Brahmins	60,000,000	60,000,000		60,000,000	60,000,000
Buddhists	150,000,000	150,000,000	353,400,000	180,000,000	170,000,000

Total	653,000,000	686,000,000	708,000,000	700,000,000	737,000,000

Table II.

	Fournier de Flaix	Juraschek and Zeller	Krose
Catholics	230,866,533	254,500,000	264,505,922
Protestants	143,237,625	165,830,000	166,627,109
Greek-Orthodox	98,016,000	106,480,000	109,147,272
Other Christians	4,960,000	8,130,000	8,737,038
Total Christians	477,080,158	534,940,000	549,017,341
Jews	7,056,000	10,860,000	11,036,607
Mohammedans	176,834,372	175,290,000	202,048,240
Brahmins	190,000,000	214,570,000	210,100,000
Ancient Indian Cults	......	......	12,113,756
Buddhists	147,900,000	120,750,000	120,250,000
Adherents of Ancestor Worship and of Confucianism	256,000,000	300,630,000	235,300,000
Shintoists	14,000,000	14,000,000	17,000,000
Taoists	43,000,000	......	32,000,000
Other Heathens	117,681,669	173,300,000	144,700,000
Others and Undenominational	......	170,000	2,544,482
Total	1,429,552,199	1,544,510,000	1,536,110,426

The differences between the first and the last two accounts seem to be considerable. But we must keep in mind that Fournier's figures refer to a time about ten years previous to that of Juraschek-Zeller; and that the distance in time from Krose's record is even greater. Within a period like this an increase of from 10 to 15 per cent is by no means extraordinary. Hence, so far as regards the Christians, the statements may easily be made to agree. (The Raskolniks have apparently been counted with the "Greek Orthodox" by Fournier and with "Other Christians" by Juraschek-Zeller.) Neither is the disagreement regarding the Mohammedans and the Brahmins remarkable. The number of the Jews, however, has evidently been underrated by Fournier, and that of the Buddhists overestimated. The latter may easily be accounted for, as in the great Chinese Empire, with its hundreds of millions of inhabitants, Buddhism, Confucianism, and ancestor-worship cannot be sharply separated from one another; they are at times professed and practised by the same individual. It must be borne in mind, too, that the population of China has hitherto been difficult to estimate precisely—as much so, indeed, as that of the interior of Africa. Regarding the three religions of Eastern Asia, as well as the Fetishism of Africa, the statistical data necessary for a reliable calculation are wanting even now, and therefore fluctuations of the estimates are easily understood. Again, Juraschek-Zeller did not make special categories for Taoism in Japan and ancient cults in India, but added them to the great collective groups just mentioned; and the individuals having no religious denomination seem to have been allotted by Juraschek to other groups on certain principles. Juraschek decidedly underestimated the number of Mohammedans: recent investigations have proved that Mohammedanism is far more widely extended in Africa than was believed. Otherwise the statistical accounts of Juraschek-Zeller and Krose show a far-reaching agreement, considering the different periods of their estimates. Their calculations having been carried out in complete independence of each other, this harmony no doubt confirms the reliability of the results.

III. Present Status of Religious Bodies.—The tables of Juraschek-Zeller and Krose given in section II correspond on the whole to the last decade of the nineteenth century. At present, therefore, the first decade of the twentieth century being over, their accounts need complementing and revising. This is especially necessary with the various Christian denominations considering their steady and vigorous increase, while the estimates made ten years ago of the Asiatic and African religions may even now be to a large extent accepted in the absence of more exact computation. The great difficulties of religious statistics have been hinted at above. They are indeed greater than the difficulties of any other branch of statistics bearing on population. Even countries possessing in other respects well-grounded official statistics often lack official accounts regarding religion. The science of statistics has long since come to the conclusion that religion belongs to the essential items of every census. As early as 1872 the Eighth International Congress for Statistics at St. Petersburg expressly emphasized this, pointing out the great importance that must be attributed to a full and clear statement of the individual's religion, "one of the most essential elements of civilization". This want is less felt in countries like Belgium, Spain, Portugal, and the majority of the republics of South and Central America, whose populations generally profess one and the same religion, excepting a small minority, whose number can usually be ascertained in other ways with sufficient accuracy. But the difficulty is great with countries of mixed denominations, like Great Britain and the United States, where up to now the distribution of the various religious bodies has not been ascertained by a universal census. In such cases the defect is to some degree remedied by an ecclesiastical census; but this is the case only when all the individuals are counted; and the census is not reliable when only the communicants or those with full right of membership are counted, and a certain ratio is added for the rest, as is commonly done in the Protestant denominations of England and America. The totals arrived at in this way are vague estimates, possessing only approximate value. The same applies to Protestant missionary statistics as far as English and American missionary societies are concerned.

Another difficulty in comprehensive statistics of religions lies in the classification of the various creeds. We cannot but combine smaller communities into collective groups. This, however, is a great inconvenience; for thus denominations differing from one another must be connected, and then the large totals produce the impression that one important religion is meant, whereas in fact it is but a combination of a number of religious communities, possessing neither common organization nor identity of belief. In the first place this holds good of that great collective group comprised under the designation of "Protestantism". This term can, in the statistics of religions, be applied only in the widest and merely negative sense, i. e., as meaning all those Christians who are neither Roman Catholic nor members of a Greek or Oriental schismatical Church. As soon as we try to point out a note proper to this whole group and to it exclusively, we find ourselves at a loss. In the following list, therefore, we have reckoned the group, designated as "Other Christians" in some official statistics, under the heading "Protestants". On principle, only those are to be counted as Catholics who are in communion with the Church of Rome; it is evident that differences in rite or liturgical language, which do not constitute any diversity of creed, are to be neglected. The self-styled "Old Catholics" do not belong to the Catholic Church, even though the official statistics of some countries reckon them as Catholics; this, however, is of no importance, as their number is insignificant. The designation "Schismatic Greeks" comprises all the Russian or Greek Orthodox, whether they acknowledge the Patriarch of Constantinople as their head or belong to independent Churches. The schismatic Armenians, Syrians, Chaldeans, Copts, and Thomas Christians may be collectively grouped under "Schismatic Orientals". The Russian Raskolniks, on the contrary, must be regarded as a separate group, distinct from the Christian denominations mentioned above.

With all religious bodies only external membership comes under statistical reckoning. Thereby it is not denied that, e. g., among the 38 millions of France belonging exteriorly to the Catholic Church many, perhaps even many millions, are interiorly altogether separated from the Church, just as in Germany and other Teutonic nations we have the analogous fact regarding Protestantism. In the Christian religions which are, after all, the most important, membership, ever since the days of primitive Christianity, is founded on baptism; this membership, from the point of view of statistics, must be considered as severed only by a formal withdrawal or excommunication from the particular religious body. In official census of religions nothing but the individual's own declaration comes into consideration.

A census represents the religious status of a country at a given date. Of course, when hundreds of states are to be taken into account, there cannot be one fixed date, but at least a limited period ought to be assigned, so that the calculations for the different countries may not lie too far apart. Otherwise the general impression conveyed would not be correct.

On these principles the following tables are made up, the data being taken as a rule from the years 1905 to 1910, in most cases 1907 or 1908. The results of official census taken in 1910 and 1911 have not yet been published, and although a few more recent figures have become known since these lists were put together in 1910 for the "Staatslexikon der Görresgesellschaft", they have not been incorporated, in order not to impair the uniform character of the tables. In the first place, the official government census of religions has been followed in each case; but with regard to those countries in which since 1900–1901 no Government census of religions has been taken, though the numerical status of the population is officially ascertained every year, the ratio of the various religious bodies established by the preceding census of religions has been applied to the present number of inhabitants; for, excepting the "immigration countries", the ratio of denominational membership shows little change within ten years. Where a government census is wanting, the data of the religious bodies themselves are made use of. Our sources are given in full in the bibliography at the end of this article. In Table III (second column) the results of the government census of religions are marked C, along with the year in which the census was taken; the computations founded upon the ratio derived from previous official records, are marked R; the non-official figures and estimates are marked E. (See Table III.)

Of the nearly 430 millions living in Europe at present, almost 411 millions (95·5 per cent) are Christians. The number of Jews (2·3 per cent) may in reality be a little less than appears in the table, as the considerable emigration of Jews from Russia during the last decade could not be taken into account. On the other hand, the natural increase of the Jewish population of Russia, in contrast to that of the Jews in Germany and Western Europe, was exceptionally large within the period in question, so that the total number of Jews living at present (1911) in Europe should be at least 9 millions. Not quite so large is the number of Mohammedans (2 per cent). Finally there remain 1 million (2 per thousand) of other non-Christians, of individuals without religious denomination, etc. Among the Christians, Catholics form by far the most numerous group. They make up 43·8 per cent of the total population of Europe. Formerly the percentage was even higher. The extraordinary increase of the Slavic races, chiefly Greek Orthodox, and the great exodus of emigrants from Austria-Hungary, Italy, Spain, and Ireland are the principal causes of the relative decrease of Catholics. The Greek Orthodox have, on account of their high birth-rate, outnumbered the Protestants. The former are now 26·4 per cent of the total, the latter only 24·7 per cent, while, according to the earlier computation by Krose, the Greek Orthodox (omitting the

Schismatic Orientals added to the "Greek-Catholics" by Juraschek-Zeller and others) were a little below the Protestants. In the total of Christians are included 2,056,000 Raskolniks in Russia (the real number probably is much greater), 232,000 Gregorian Armenians in Turkey, Bulgaria, and Rumania, 24,000 Old Catholics in Austria, and about 9000 Jansenists in Holland.

In Asia (see Table IV) government censuses of religions have been taken only within Russian and British territories. Regarding the other countries only the number of Christians and Jews can be ascertained with any degree of certainty. Of the widespread religions of Eastern Asia we have nothing but estimates of very doubtful value. The Christians of the various creeds amount in all to about 32,270,000, only 3·9 per cent of the total population of Asia, which may be reckoned as 829 millions. Among the Christians the Greek Orthodox (in round numbers, 13,800,000) are the best represented; yet the Catholics (12,660,000) come fairly close to them. The Protestants (2,350,000) are far fewer, even if the high estimates of Warneck regarding China and Korea be accepted. The remainder (3,500,000) are Armenians, Raskolniks, Thomas Christians in India, and what is still left of the old Christian communities in Japan.

(1) With dependencies.

(2) This number corresponds to the ratio (14 in 10,000) deducted from the last official census of religions; according to the Jewish Year Book, London, 1910, the number of Jews in France runs up to 95,000.

(3) Inclusive of "other Christians."

(4) Together with Malta, Gibraltar and the Channel Islands.

(5) Without Madeira.

(6) Together with Finland.

(7) Inclusive of 2,056,000 Raskolniks.

(8) Without the Canary Islands.

(9) With Crete.

(10) Inclusive of 200,000 Armenians.

Of about 6,634,000 inhabitants of Australia and Oceania (see Table V), about 5,240,000 are Christians. The Protestant denominations take the lead (almost 77 per cent of the total). The Australian continent, Tasmania, New Zealand, New Caledonia, Fiji, the Tonga and Navigator Islands are almost completely Christianized; whereas the populations of New Guinea, the Bismarck Archipelago, the Solomon Islands, and most of the smaller groups of islands are for the most part pagan. Jews are few on the Australian continent and New Zealand; Buddhists and Mohammedans are found among the immigrants in Hawaii and on the continent. An official census of religions was taken in New Zealand in 1906 and by the Commonwealth in 1900. As, however, the population has grown very considerably since the last census, we have applied to the Catholics of the Australian Commonwealth the results of the ecclesiastical census of 1909 and raised in due proportion the number of Protestants ascertained in 1900. With regard to the other countries and islands, the Catholic and Protestant missionary statistics have served as our chief sources of information. Thus a fairly high degree of accuracy is attained concerning the Christians, while for the pagans mere estimates have had to suffice.

In Africa (see Table VI) there are, in a total of about 126 millions, more than 11 millions of Christians, of whom more than half belong to the Monophysites of Abyssinia and Egypt. Catholics and Protestants are in almost equal numbers, if we add to Africa the Canary Islands and Madeira, which administratively belong to the European possessions of Spain and Portugal. The main stock of Protestants live in British South Africa, the numerous immigrants being for the most part of English and Dutch extraction; but the Protestants have won many converts among the natives. Of Catholics the greater number reside in the French, Spanish, and Portuguese colonies. With regard to the last-named, especially Angola, much higher figures were formerly given, but without sufficient foundation; hence we have inserted in our table the lowest estimate. Jews are somewhat more numerous in Abyssinia, Tunis, Algeria, and Morocco, their total being about half a million. More than one-third of Africa professes Mohammedanism, which is ever gaining ground and encroaching on paganism; yet the latter remains the religion of the majority. A more accurate determination of the number of Mohammedans and pagans in Africa is not possible, as the population has not yet been ascertained in many districts of the interior.

America (see Table VII) roughly counts 169 millions of inhabitants. Of these more than half (87,614,635, or 51·8 per cent) are Catholics; 70,868,923 (41·9 per cent) Protestants. In all 93·7 per cent are Christians. The number of Jews, very small up to a few decades ago, has increased considerably of late on account of the immigration from Russia. There are nearly 2 millions at present. The pagan Indians and Negroes may be put down at from 2¼ to 2½ millions; in their case a more accurate estimate is out of the question. The great variety of denominations in the United States makes it very difficult to determine their creeds; an official census of religions has never yet been taken. The American statistician, Dr. Carroll, has tried to find a substitute by inquiries addressed to the church authorities, but in this way he has ascertained only the number of communicants (i. e., according to English and American usage, partakers of the Lord's Supper, or full members), not the total number of adherents to the different denominations. These data, however, do not carry us very far for the purposes of general statistics of religions. The proportion of communicants to non-communicants differs widely in the various denominations. Calculation of membership in the denominations from these data results only in vague estimates of very doubtful value. Still, as Carroll's list is of some interest, his figures for the more important denominations are given below (table: "Number of Communicants, United States") as they appear in "The Christian Advocate" for 26 January, 1911, omitting only the ordinal numbers indicating the relative numerical importance of each denomination. From this table it is evident that the Catholic Church is by far the largest religious denomination in the United States, and that, excepting the Mormons, no other body shows as high a rate of increase within the last twenty years, the

number of communicants having almost doubled. Further, the totals of the official Catholic Directory (for 1909: 14,347,027; for 1910: 14,618,761) are by far too low. For, although the proportion of non-communicants is much smaller among Catholics than among Protestants, yet, even with Catholics, the number of communicants was, up to 1910, hardly more than two-thirds of the total. Moreover, the statistics furnished by the parochial clergy for Wiltzius' Directory can, from the nature of the case, comprise only those Catholics who have for some time resided in a parish and are known to the clergy; such records, therefore, fall far short of the reality, on account of the great Catholic immigration and the great fluctuation in the population. Hence the present writer believes that, of the 5½ millions whose denomination is marked in our tables as unknown, the majority are Catholics. In those tables, however, Wiltzius' figures for 1909 have been used in default of any accurate data for another estimate.

NUMBER OF COMMUNICANTS, UNITED STATES

(1) Inclusive of United Oriental Catholics, who were put down separately in the official census of 1907.
(2) Inclusive of Canary Islands.
(3) Inclusive of Madeira.
(4) With regard to the Catholics of Angola the data vary considerably; we have taken the lowest estimate, 250,000.

The total number of Protestant communicants in the United States, according to Carroll, is 21,663,248. As, on the average, there is one communicant to every 2·6 inhabitants, this would mean at most 56 millions of Protestants, and it is quite clear from Carroll's statistics that there are millions in the United States unconnected with any denomination, a fact which ought to be taken into consideration in calculating the total number of adherents from the number of communicants. Taking, however, the term "Protestant" in the wider sense explained above (Christians who are neither Catholics nor connected with the Greek or Oriental schismatical Churches), we have put down the number as 65 millions. The number of Jews in full membership given by Carroll is evidently far too low, nor is it clear what Carroll understands by this term in the case of Jews. We have therefore given preference to the number of "The Jewish Year Book" for 1910 (1,777,000).

In Southern and Central America the determination of religious profession is easier, as the entire population may be regarded as Catholic, making allowance for the few Protestants and the uncivilized Indians not included in the census. The same may be said of Cuba, Porto Rico, Haiti, San Domingo, and the French West Indies, while in the British, Danish, and Dutch colonies there are partly official, partly ecclesiastical data. In Mexico, too, a census of religions was taken by the Government in 1901.

According to the synopsis presented in Table VIII, the entire population of the Earth at present (i. e. the average for the years 1906–08) amounts to about 1561 millions. The various figures show a notable difference when compared with the previous accounts of Krose and Zeller-Juraschek. In the first place, the latest figures are considerably higher, at least as far as the Christian denominations are concerned. The reason of this is that more than a decade has passed since the last calculations. Considering the high birth-rate of the Christian nations, an increase of 10 to 15 per cent is not improbable. Besides, the recent and more accurate census in Southern and Central America brought in far higher figures than the older and rougher estimates. As these territories are almost exclusively Catholic, it is clear that the increase of Catholics apparently surpasses that of the Protestants. On the other hand, the column of Fetish-worshippers and other pagans of lower civilization shows a very considerable decrease, which is explained by the recent estimate of the population of Central Africa. While in 1898 Juraschek supposed the population of Africa to be 178 millions, in 1908 he reckoned the population as 129 millions. Thus in these regions religious statistics are subject to great fluctuations. The total number of Christians amount to 618 millions, or 39·6 per cent. of the entire population of the earth. Of the Christians, not quite one-half—292¾ millions, or 47·4 per cent—belong to the

Catholic Church; 186 millions, or 30.1 per cent are Protestants; 127½ millions, or 20·6 per cent, Greek Orthodox; the rest are Oriental Schismatics or belong to sects not separately mentioned in the table—Raskolniks, Jansenists, Old Catholics etc. The Roman Catholic Church alone comprises almost one-fifth of mankind, and has more followers than any other form of religion. Buddhism, Ancestor-worship, and Confucianism, which, taken together, would indeed possess a larger number of adherents, are not distinct religious bodies, but forms of religion and systems of religious customs all of which, as mentioned above, are at times observed by the same individual. With reference to the number of adherents, Brahminism and Mohammedanism, of all religious denominations, approach nearest to Catholicism: they each have more than 200 millions of followers. But their extension is not so universal as that of Catholicism; locally and ethnographically they are much more limited. In Table VIII the Jews probably appear more numerous than they are in reality, as the great emigration from Russia could not be determined numerically for want of reliable official statistics, while in the most recent records from countries to which they migrate, the Jews seem to be included. Nevertheless the total number of Jews can scarcely fail to reach 12 millions. (See also MIGRATION: *Immigration to the United States.*) The remaining

H. A. Krose.

Stattler, Benedict, Jesuit theologian, b. at Kötzting, Bavaria (Diocese of Ratisbon), 30 Jan., 1728; d. at Munich, 21 Aug., 1797. He entered the Jesuit novitiate at Landsberg in 1745 and, after the usual studies, taught philosophy and theology in Solothurn (Switzerland), Innsbruck, and Ingolstadt. In the last-named place he continued to occupy the chair of theology even after the suppression of the Society. In 1783, when all former Jesuits were excluded from the office of teaching, he took charge of the parish of Kemnath, but soon exchanged this post for that of ecclesiastical adviser and member of the electoral committee on censures in Munich. After four years his health compelled him to resign this office, and he lived thereafter in retirement till his death. A man of keen intellectual vision and an unlimited capacity for work, Stattler was ever ready to guard and defend Catholic principles. Shortly after Adam Weishaupt had founded the secret society of the Illuminati, Stattler, in an anonymous work, laid bare the rationalistic ideas and the pernicious designs of these forerunners of freemasonry. Kant's "Critique of Pure Reason" appeared in its first edition in 1781; in 1788 Stattler launched against its subversive principles his "Anti-Kant", and skilfully parried the attack which his book provoked in the literary world of Germany. When the doctrines of the French revolutionists began to be echoed in his fatherland, he lost no time in pointing out to his compatriots the false ring which he detected in their boastful promises of liberty. The bulk of his writings, however, is devoted to Catholic philosophy and theology. It was his avowed purpose to adapt the traditional teachings of the School to the living needs of his time, "to plow anew the entire field of scholastic philosophy and theology and to fructify it with fresh seeds", as Bishop Sailer of Ratisbon, Stattler's great pupil, expressed it. With this end in view, he wrote "Philosophia methodo scientiæ propria explanata" (Augsburg, 1769–72) and "Demonstratio Evangelica" (Augsburg, 1770). Yet his attachment to the rationalistic philosophy of Wolff and the far-going concessions he made to religious toleration and Febronianism led him astray and marred the lustre of his merits. The suppression of his order and the consequent loss of wise direction by superiors proved a veritable calamity to him. His "Demonstratio Catholica" (Pappenheim, 1775) fell under the censure of the Roman authorities, and, shortly before his death, his "Loci Theologici" (Weissenburg, 1775), "Theologia Christiana Theoretica" (Ingolstadt and Munich, 1776–79) and two other works were placed on the Index.

Biography by Sailer in *Sämmtl. Werke* (Sulzbach, 1841), xxxviii, 115 sq.; Hurter, *Nomenclator*, III, 236 sqq.; Sommervogel, *Bibliothèque*, VII, 1498 sqq.; Werner, *Gesch. d. kath. Theologie* (Munich, 1866).

A. C. Cotter.

Staudenmaier, Franz Anton, theologian, b. at Donzdorf, Würtemberg, 11 Sept., 1800; d. at Freiburg im Breisgau, 19 Jan., 1856. He was a pupil at the Latin school of Gmünd in the years 1815-18, and at the Gymnasium at Ellwangen 1818-22. During the years 1822-26 he studied theology and philosophy at the University of Tübingen, where Drey, Herbst, Hirscher, and Möhler were his teachers; in the autumn of 1826 he entered the seminary at Rottenburg, where he was ordained priest on 15 Sept., 1827. After performing the duties of a parish priest for a year he became, in the autumn of 1828, a tutor in the Catholic theological seminary, "Wilhelmsstift" at Tübingen; in 1830 he was made regular professor of dogmatic theology in the newly-established Catholic theological faculty of the University of Giessen, which owed its brief period of prosperity largely to Staudenmaier and his colleague Kuhn. In the autumn of 1837 he became the regular professor of dogmatic theology at the University of Freiburg im Breisgau; from 1843 he was also a cathedral canon.

Staudenmaier was one of the most brilliant figures in the Catholic theology of Germany in the first half of the nineteenth century, and one of the most important writers on dogmatics of the Catholic Tübingen school. He was a scholar of far-reaching knowledge, of great productive energy, and at the same time a philosopher with a brilliant talent for speculation. His imperishable service consisted in securing a deep speculative foundation for Christian truth and in defending this truth against the errors of the pantheistic speculation of that era, especially of the Hegelian philosophy. The most important of his numerous literary works are the following: "Geschichte der Bischofswahlen" (Tübingen, 1830); "Johannes Scotus Erigena und die Wissenschaft seiner Zeit" (1 pt. only, Frankfort, 1834); "Encyklopädie der theologischen Wissenschaften als System der gesammten Theologie" (Mainz, 1834; 2nd ed. 1 vol. only, Mainz, 1840), at the time of its publication an epoch-making work in the domain of Catholic theology; "Der Pragmatismus der Geistesgaben oder das Wirken des göttlichen Geistes im Menschen und in der Menschheit" (Tübingen, 1835); "Der Geist des Christenthums dargestellt in den heiligen Zeiten, in den heiligen Handlungen und in der heiligen Kunst" (2 pts., Mainz, 1835; 5th ed., 1855; 8th ed., 1880), an introduction to the understanding of Catholic Christianity and its worship, based on a presentation of the Catholic Church year, and expressed in language that can be understood by all educated Christians, the most widely-circulated book of Staudenmaier; "Geist der göttlichen Offenbarung, oder Wissenschaft der Geschichtsprincipien des Christenthums" (Giessen, 1837); "Die Philosophie des Christenthums oder Metaphysik der heiligen Schrift als Lehre von den göttlichen Ideen und ihrer Entwicklung in Natur, Geist, und Geschichte: Vol. I, Die Lehre von der Idee" (Giessen, 1840); "Darstellung und Kritik des Hegel'schen Systems. Aus dem Standpunkt der christlichen Philosophie" (Mainz, 1844); "Die christliche Dogmatik" (vols. I–IV, i, Freiburg im Br., 1844-52). This is Staudenmaier's principal work; unfortunately it was never finished. He also published "Das Wesen der katholischen Kirche, mit Rücksicht auf ihre Gegner dargestellt" (Freiburg im Br., 1845); "Zum religiösen Frieden der Zukunft, mit Rücksicht auf die religiös-politische Aufgabe der Gegenwart" 3 pts., Freiburg im Br., 1846-51). In addition he did much for two theological periodicals which he aided in founding and on which he collaborated; with his colleagues at Giessen he established the "Jahrbücher für Theologie und christliche Philosophie" (three yearly series in seven vols., Frankfort-on-the-Main, 1834-35; Mainz, 1836); in conjunction with his colleagues at Freiburg he established the "Zeitschrift für Theologie" (21 vols., Freiburg im Br., 1839-49). Both periodicals came into existence chiefly through his efforts and attained high scholarly reputation largely through his contributions.

Lauchert, *Franz Anton Staudenmaier, 1800–1856, in seinem Leben und Wirken dargestellt* (Freiburg im Br., 1901), with portrait.

Friedrich Lauchert.

Staupitz, Johann von, Abbot, b. at Motterwitz near Leisnig (or Moderwitz near Meustadt an der Orla) about 1460; d. at Salzburg, 28 Dec., 1524. He was descended from an ancient family of Saxony, studied at Leipzig, and was matriculated in 1485. He later joined the Augustinian Order, probably at Munich, and in 1497 moved to Tübingen, where in 1498 he became prior and in 1500 Doctor of Theology. He was subsequently prior at Munich, and in 1503 was elected Vicar-General of the German Congregation of Augustinians and summoned as professor to the new University of Wittenberg, in which he was the first dean of the theological faculty. In 1512 he resigned his professorship, and moved to South Germany, where he thenceforth resided (at Munich, Nuremberg, and Salzburg), except for some journeys to the Netherlands and Belgium. He resigned the office of vicar-general in 1520, received a dispensation to join the Benedictines in 1522, and finally became Abbot of St. Peter's, Salzburg. On a tour of visitation he had become acquainted with Luther in the monastery at Erfurt, and had consoled the emaciated brother, who was torturing himself with his sinfulness, by speaking to him of the sinremitting grace of God and man's redemption in the Blood of Christ. For this Luther remained always grateful. In 1518 he was deputed by the promagister of the order to remonstrate with the heretic Luther. Luther remained obstinate and through Staupitz sent an explanation of his theses on indulgences to Rome. This circumstance has led some to include Staupitz among Luther's followers. In reality his attitude was hesitating—being partly suspicious and anxious, and partly encouraging and confirmatory—because he still believed that it was only a question of a protest against ecclesiastical abuses. By releasing Luther from obedience to the order, he separated its fate from that of Luther, but also gave the latter freedom of action. In 1520 revocation and abjuration were demanded of Staupitz; he hesitated at first, because there was no need to revoke what he had never asserted, but finally declared that he recognized the pope as his judge. Luther saw in this declaration a defection. However, Staupitz was no Lutheran but thoroughly Catholic in matters of faith (especially as regards the freedom of the will, the meritoriousness of good works, and justification). This has been established by Paulus from the writings of Staupitz.

Klemens Löffler.

Stauropolis, a titular metropolitan see of the Province of Caria. The city, founded by the Leleges, was at first called Megalopolis, then Ninoe, and finally Aphrodisias. The legend which in explanation of the name Ninoe attributes its foundation to Ninus only proves that the town is very ancient. Built at the foot of Mount Cadmus and watered by numerous sources, Aphrodisias had a celebrated temple of Aphrodite which secured for it from the Roman emperors, especially from Cæsar, the privilege of a free city and the right of asylum. Apollonius, the historian of Caria, was born there, as was Alexander, the commentator of Aristotle in the second century of our era. The name Aphrodisias is still used by the "Hierocles Synecdemus", by Novel clx of Justinian, and figures in the signatures of the Fifth Œcumenical Council in 553. That of Stauropolis appears for the first time about 640 in the "Ecthesis" of pseudo-Epiphanius (Gelzer, "Ungedruckte . . . Texte der Notitiæ episcopatuum", 534). The name Tauropolis, said to have been borne by the town prior to that of Stauropolis, is an error of several scholars (Revue des études grecques, XIX, 228–30).

Le Quien (Oriens christ., I, 899–904) mentions twenty bishops of this see, among whom were Ammonius at Nicæa in 325, Eumenius at Constantinople in 381, Cyrus at Ephesus in 431, Critonianus at Chalcedon in 451, Severianus at Constantinople in 553, Ephræm of Caria, a liturgical poet, etc. Another was Theopropios, mentioned by an inscription (Revue des études grecques, XIX, 298). In the seventh century Stauropolis had twenty-eight suffragan bishops and twenty-six at the beginning of the tenth century. Between 1356 and 1361 the see must have been abandoned by the metropolitan, but the title was long retained and he was given the revenues of other churches (Waechter, "Der Verfall des Griechentums in Kleinasien im XIV. Jahrhundert", Leipzig, 1903, 34–7). Isaias of Stauropolis attended the Council of Florence (1439) and fled to avoid signing the decree of union. Excavations begun in 1904 at Ghere, the modern name of Stauropolis in the caza of Echme and the sanjak of Saroukhan, have brought to light the *thermæ*, the temple of Aphrodite dating from the second century after Christ, and the stadium. A part of the walls, which date from the fourth century of our era, is preserved.

Stedingers (a word meaning those living along a shore), a tribe of Frisian peasants in Northern Germany who revolted against their lord, the Archbishop of Bremen, and had to be subdued by arms. The Stedingers refused to pay tithes and to perform forced labour as serfs. These duties were demanded of them with considerable severity, and Archbishop Gerhard II of Bremen (1219–58) sent troops against them. His army, however, was defeated in 1229, whereupon the Stedingers destroyed churches and monasteries, and ill-treated and killed priests. A synod held at Bremen, 17 March, 1230, accused them, in addition to the acts of violence above-mentioned, of contempt for the authority of the Church and for the sacraments, as well as of superstitious practices; it also excommunicated them. The Stedingers refused to submit, and Gregory IX commissioned the Bishop of Lübeck and the Dominicans to labour among them for the extirpation of unbelief. The Emperor Frederick II placed the rebels under the ban of the empire, and on 9 Oct., 1232, Gregory IX issued a Bull commanding the Bishops of Lübeck, Minden, and Ratzeburg to preach a crusade against them. An army was collected and advanced against the Stedingers, but it was defeated in the winter of 1232–33. A new crusading army defeated a part of the tribe, but the other part was once more victorious. The pope now issued another Bull, addressed to several bishops of Northern Germany, commanding a fresh crusade, and on 27 May, 1234, the Stedingers were completely defeated near Bremen. The majority of them now submitted; on 24 August, 1236, Gregory IX commanded that they should be relieved from excommunication after performing penance and satisfaction, and should be received again in the Church.

The Stedingers were not heretics, but rebels against lawful ecclesiastical and secular authority.

Stefaneschi, Giacomo Gaetani, cardinal deacon, b. at Rome, about 1270; d. at Avignon, 23 June, 1343. He was the son of the senator Pietro Stefaneschi and his wife, Perna Orsini. He received his early education at Rome, and was sent to the University of Paris to pursue higher studies. After three years of diligent application he received the degree of Master of Arts, and intended to devote himself to the study of philosophy and Holy Scripture, having already begun to teach at the university, when his parents recalled him to Italy in order that he should study canon and civil law. He was highly esteemed by Celestine V, who made him canon of St. Peter's and auditor of the Rota; and was created cardinal-deacon of the titular Church of San Giorgio in Velabro, 17 Dec., 1295, by Boniface VIII, who also sent him as legate to Cesena, Forli, Faenza, and Bologna in 1296, to suppress civil disturbances. John XXII appointed him protector of the Minorites, 23 July, 1334. He was never ordained priest.

Stefaneschi is best known as the author of "Opus Metricum", a life of Celestine V composed in dactylic hexameter. Abstracting from a short autobiography left in his cell by Celestine when he became pope, the "Opus Metricum" of Stefaneschi is the earliest biography of the hermit-pontiff. It is composed of three parts, each complete in itself and written at a different time. In 1319 the author united these three separate poems into one work and sent it with a dedicatory epistle to the prior and the monks of San Spirito at Sulmona, the mother-house of the Celestines. The first part contains in three books an account of the election, reign, and abdication of Celestine. It was written before Stefaneschi became cardinal. The second part describes in two books the election and coronation of Boniface VIII, and was written five years later, when Stefaneschi was already cardinal. The third part is composed of three books and describes the life of Celestine after he had abdicated, his canonization, and miracles. The poem is preceded by an introduction in prose, which contains valuable data of the author's life and a synopsis of the whole work. Though of great historical value, the poem is devoid of all literary excellence, and at times is even extremely clumsy and barbarous. It was first edited by Papebroch, "Acta SS.", IV, May, 436–483. A new edition by Professor Sdralek of Breslau is in course of preparation. The other works of Stefaneschi are: "Liber de Centesimo sive Jubileo", edited by Quattrocchi in "Bessarione" (Rome, 1900, VII, 299–317), an interesting and historically important account of the first Roman Jubilee, held in 1300; "Liber ceremoniarum Curiæ Romanæ", a book of ceremonies to be observed at the Roman Court, edited according to a highly interpolated manuscript by Mabillon in "Museum Italicum" (II, 243–443), re-edited in part by Ehrle in "Archiv für Literatur und Kirchengeschichte" (V, 565–587), and by Labande in "Bibliothèque de l'école des chartes" (LIV, 45–74); "Vita S. Georgii Martyris", a eulogy on St. George, the patron of Stefaneschi's titular church; and "Historia de miraculo Mariæ facto Avinione", a short narrative of how a young man, who had been condemned to death at Avignon, was miraculously delivered by the Virgin Mary.

Michael Ott.

Stefano, Cavaliere Giovanni di. See Lanfranco, Giovanni.

Steffani, Agostino, titular Bishop of Spiga, diplomatist and musician, b. at Castelfranco in the Province of Treviso, in 1655; d. at Frankfort in 1728 or 1730. At the age of twelve he was brought to Munich by Count Tattenbach, who had heard him singing at St. Mark's in Venice. At the Court of the Elector of Bavaria, where he remained for twenty-one years, he soon obtained the position of court and chamber musician, and afterwards that of director and court organist. In 1673 he went for one year to Rome in order to perfect himself in his art. In 1688 he left Munich, and was attached as musician to the Court of Hanover, where resided the famous philosopher Leibniz with whom he was on intimate terms. Ten years later, in 1698, he took up his residence at the Court of the Elector Palatine, at Düsseldorf. His compositions may be ranged in three classes: (1) his religious music, for example, a "Laudate pueri" for nine voices in two choirs, a "Psalmodia Vespertina" scored for eight voices, a "Stabat Mater" for six voices and orchestral accompaniment (of which it has been said that his great contemporary Alessandro Scarlatti produced nothing finer); (2) his chamber duets, more than a hundred of which are preserved, and which were esteemed the most perfect of their kind, so that the most renowned singers delighted in them; (3) and his operas for the stage, five of which are known to have been written for the Court at Munich, nine for that of Hanover, and at least two for Düsseldorf. In later years, when his high position did not allow him to appear as composer of operas, his secretary and copyist Gregorio Piva signed these compositions for him. In 1695 he published a pamphlet, "Sui Principii della Musica", in which is shown how music is grounded on nature and science.

But this remarkable man is not only famous for his musical talents. Being ordained priest, probably about 1680, the Holy See made him Prothonotary Apostolic for North Germany, and in recognition of his services for the cause of Catholicism in Hanover, the Holy Father appointed him Bishop of Spiga (the ancient Cyzicus), in Asia Minor. When in 1712 a new church had been built at Brunswick by the Duke Anton Ulrich, who had become a Catholic, the pope sent Bishop Steffani, "Vicario Apostolico delle Missioni Settentrionali," to perform the consecration and opening service of the new building. But if he was held in such esteem by the ecclesiastical authorities, he was also the confidant and ambassador of temporal princes. A delicate mission was entrusted to him at the various German courts in 1696, and in 1698 at the court in Brussels, for which office he was singularly fitted by his gentle and prudent manners. His merits as a musician were solemnly recognized in London by the Academy of Ancient Music electing him its honorary president for life (1724).

Steinamanger (Szombathely), Diocese of, in Hungary, suffragan of Gran, founded in 1777 under Queen Maria Theresa. Originally Colonia Claudia Sabaria and capital of Pannonia during the Roman era, the city was in 445 laid waste by the Huns. In the ninth century Steinamanger, an episcopal see even before the invasion of the Huns, was placed under the jurisdiction of the Archbishop of Salzburg; King St. Stephen, it is said, gave Steinamanger to the Bishop of Veszprém. In 1777 the see was reconstituted at the expense of the Dioceses of Agram and Veszprém. It includes the Counties of Vas and Zala and the territory lying on the River Mura. Its first bishop was John Szily (1777–99), who built the episcopal residence and the cathedral. His successor, Cardinal Franz Herzen (1799–1804), was envoy of Joseph II to the Holy See. Bishop Count Mikes is the present incumbent (since 1911). The Abbey of Jaák, one of the chief Romanesque edifices in Hungary, is in this diocese. The chapter of Steinamanger sprang from the chapter of Vasvár that claims as its founder King St. Stephen, though its documents are of later date. This chapter, richly endowed by the Hungarian kings, declined in the fifteenth century, and in 1578, during the invasions of the Turks, was removed to Steinamanger; on the foundation of the see it became the cathedral chapter. The number of canons was 6 with as many titular canons. The diocese has 6 archdeaneries, 189 priests, 54 parishes. A right of patronage is exercised. There are 5 abbeys and 3 titular abbots, 4 titular provosts, and 25 monasteries with 216 members. The clergy numbers 268 and the Catholic laity 463,947.

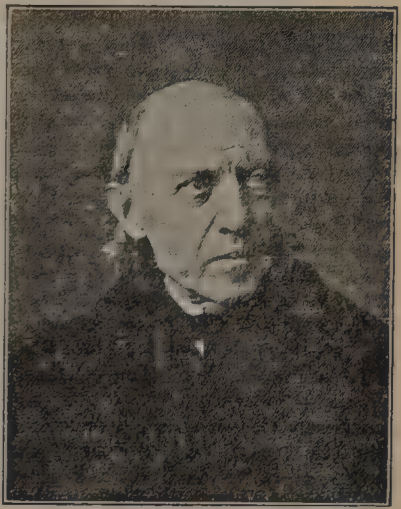
Steinle, Eduard von, historical painter, b. at Vienna, 2 July, 1810; d. at Frankfort, 19 Sept., 1886. Steinle came successively under the influence of the painters Kupelweiser, Overbeck, and Cornelius, and was thus introduced into the new and vigorous methods of the German painters who had formed themselves into a school at Rome. Steinle went himself several times to Rome, but preferred to work in Germany. He received his first large commission, the painting of the chapel of the Castle of Rheineck, while living at Frankfort-on-the-Main; a second one was for work in the Hall of the Emperors (*Kaisersaal*) at Frankfort, where he painted the pictures of Albert I and Ferdinand III. These commissions and his friendship with Philip Veit and the Brentano family decided him to take up his permanent residence at Frankfort. From 1850 he was professor of historical painting at the Städel Art Institute of Frankfort. Like his friend Schwind he was one of the last of the great painters of the Romantic School and one of those of this school who were largest in their scope. Like Schwind also he was probably more a master in the art of painting ordinary subjects. Still Constant von Wurzbach was able to write an appreciation of Steinle with the title "Ein Madonnamaler unserer Zeit" (Vienna, 1879), for Steinle left more than a hundred religious panel pictures, besides numerous cartoons for church windows. He was also regarded as the great master of monumental fresco painting in the districts of the Rhine.

Besides his work at Rheineck he painted cycles of pictures in the Castle of Klein-Heubach, in the Church of St. Ægidius at Münster, and in the Church of Our Lady at Aachen. He also painted the groups of angels in the choir of the cathedral at Cologne, and did part of the work in the apse of the choir of the Minster at Strasburg and in the imperial cathedral at Frankfort. Nevertheless, however striking these frescoes may be, too much stress is laid on detail, and the large, monumental character essential to such painting is not sufficiently apparent. This lack is still more evident in the frescoes showing the historical development of civilization on the stairway of the Wallraf-Richartz Museum at Cologne. Among Steinle's smaller religious pictures are some very fine ones, as that of the enthroned "Madonna holding the Child" while an angel plays a musical instrument in front of them, the "Visitation", the "Holy Family at the Spring", "Mary Magdalen seeking Christ", "Christ Walking with His Disciples", the "Legend of St. Euphrosyne", and the "Great Penitentiary". Steinle was not so willing to condescend to extremes in pleasing popular taste as Schwind, although he had a keen eye for ordinary life and a sense of humour. He placed the idea presented by the picture prominently in the foreground, so that at times the method of portrayal seems too artificial. Among his noblest and most universally admired paintings that are not directly religious are: the "Warder of the Tower", the "Fiddler", the "Sibyl", the "Lorelei", and the pictures of the story of Parsifal; no less remarkable are his illustrations of Shakespeare, and especially those to accompany Brentano's writings. Steinle's works show both graceful and well-defined composition, poetic conception, healthy religious feeling, and, of not less importance, pleasing colour.



Eduard von Steinle

G. Gietmann.

Steinmeyer (Farmer), Ferdinand, Jesuit missionary, b. in Swabia, Germany, 13 Oct., 1720; d. at Philadelphia, 17 Aug., 1786. He entered the Society of Jesus at Landsberg in Sept., 1743. He desired to labour on the missions in China but was sent to America instead, whither he came in 1752. His first mission was at Lancaster, where he remained until 1758, when he was transferred to St. Joseph's Church in Philadelphia, to look after the Germans in that section. His labours were not, however, limited to that city. He made numerous missionary journeys through Eastern Pennsylvania and Northern and Central New Jersey. He also crossed over into New York, but of his priestly labours in the latter state prior to the close of the Revolution we have no written record. This absence of written evidence is easily accounted for by the fact that a priest rendered himself liable to the death penalty for attempting to enter New York while it remained under British rule. There can be little doubt, however, that Father Farmer on his journeys through Northern New Jersey crossed over into New York and attended to the Catholics there, even venturing into the city itself, where he kept the faith alive and practically founded St. Peter's Church. With all his missionary work he found time to take an active interest in public and literary affairs. In 1779 he was appointed one of the first trustees of the University of Pennsylvania, while as a philosopher and astronomer his reputation had reached the learned societies of Europe with whom he corresponded. He died at Philadelphia a few months after returning from a missionary trip to New York. His funeral was held at St. Mary's Church, but the remains were interred in old St. Joseph's.

Steno, Nicolaus (Niels Steensen). an eminent Danish anatomist and geologist, convert and saintly bishop, b. at Copenhagen, 1 Jan., 1638; d. at Schwerin in Germany. 25 Nov., 1686. For many years the name of Steno was almost forgotten; in science he was centuries in advance of his time. During the last thirty years justice has been done to his merits as a scientist. When a young man of twenty-two years he went to the Netherlands to proceed with his anatomic studies; there he discovered, among other things, the excretory duct of the parotid glands (*ductus Stenonianus*) and the circulation of the blood in the human body. In spite of his achievements his countrymen failed to appoint him professor at the University of Copenhagen, in consequence of which he went to Florence, where he was cordially received by the Grand Duke of Tuscany. He was appointed anatomist at the Hospital of Santa Maria Nuova and continued his researches. Even while residing in the Netherlands he had begun to doubt the truth of the Lutheran doctrines. At Cologne he conferred with a Jesuit, and at Florence he became convinced of the truth of Catholicism. After many struggles he entered the Church on 4 November, 1667. Shortly after a royal letter came from Denmark, that called him home and offered him a high annual salary. But it was too late; as a Catholic he could not return to Denmark. He remained in Italy and made many geological discoveries, which were not appreciated until our time. He was also the first who gave a scientific explanation of the many petrifactions which are found in the earth. In Denmark men began to regret Steno's loss, and through the influence of Griffenfeldt he was nominated, not professor—for a Catholic could not hold that position —but *anatomicus regius* in his native city, but he remained there only two years, as he was exposed to narrow-minded treatment.

Feeling a higher call, he returned to Italy, where he received Holy orders in 1675, and two years after was consecrated a bishop. As such, he lived a most self-denying and mortified life, giving all he had to the poor. He was made vicar Apostolic for the northern missions and worked nine years as an apostle in the north of Germany. He died, worn out by his labours, at the early age of forty-eight. His remains were brought to Florence and deposited in a vault in the Basilica of St. Lawrence. He wrote several ascetic works. Of his sixteen theological works the more interesting are his "Epistola de propria conversione" (Florence, 1677), and "Defensio et plenior elucidatio epistolæ de propria conversione" (Hanover, 1680). His scientific writings were published recently by Maar, "Nicolai Stenonis opera philosophica" (2 vols., Copenhagen, 1910), a very fine work in quarto, containing his thirty-two anatomical dissertations, with introduction and notes in English. A facsimile edition of his "De solido intra solidum naturaliter contento dissertationis prodromus" appeared at Berlin in 1904.

Niels Hansen.

Stephen, Saint, one of the first deacons and the first Christian martyr; feast on 26 December. In the Acts of the Apostles the name of St. Stephen occurs for the first time on the occasion of the appointment of the first deacons (Acts, vi, 5). Dissatisfaction concerning the distribution of alms from the community's fund having arisen in the Church, seven men were selected and specially ordained by the Apostles to take care of the temporal relief of the poorer members. Of these seven, Stephen, is the first mentioned and the best known.

Stephen's life previous to this appointment remains for us almost entirely in the dark. His name is Greek and suggests he was a Hellenist, i. e., one of those Jews who had been born in some foreign land and whose native tongue was Greek; however, according to a fifth-century tradition, the name Stephanos was only a Greek equivalent for the Aramaic Kelil (Syr. *kelilâ*, crown), which may be the protomartyr's original name and was inscribed on a slab found in his tomb. It seems that Stephen was not a proselyte, for the fact that Nicolas is the only one of the seven designated as such makes it almost certain that the others were Jews by birth. That Stephen was a pupil of Gamaliel is sometimes inferred from his able defence before the Sanhedrin; but this has not been proved. Neither do we know when and in what circumstances he became a Christian; it is doubtful whether the statement of St. Epiphanius (Hær., xx, 4) numbering Stephen among the seventy disciples is deserving of any credence. His ministry as deacon appears to have been mostly among the Hellenist converts with whom the Apostles were at first less familiar; and the fact that the opposition he met with sprang up in the synagogues of the "Libertines" (probably the children of Jews taken captive to Rome by Pompey in 63 B. C. and freed—hence the name *Libertini*), and "of the Cyrenians, and of the Alexandrians, and of them that were of Cilicia and Asia" shows that he usually preached among the Hellenist Jews. That he was pre-eminently fitted for that work, his abilities and character, which the author of the Acts dwells upon so fervently, are the best indication. The Church had, by selecting him for a deacon, publicly acknowledged him as a man "of good reputation, full of the Holy Ghost and wisdom" (Acts, vi, 3). He was "a man full of faith, and of the Holy Ghost" (vi, 5), "full of grace and fortitude" (vi, 8); his uncommon oratorical powers and unimpeachable logic no one was able to resist, so much so that to his arguments replete with the Divine energy of the Scriptural authorities God added the weight of "great wonders and signs" (vi, 8). Great as was the efficacy of "the wisdom and the spirit that spoke" (vi, 10), still it could not bend the minds of the unwilling; to these the forceful preacher was fatally soon to become an enemy.

The conflict broke out when the cavillers of the synagogues "of the Libertines, and of the Cyreneans, and of the Alexandrians, and of them that were of Cilicia and Asia", who had challenged Stephen to a dispute, came out completely discomfited (vi, 9–10); wounded pride so inflamed their hatred that they suborned false witnesses to testify that "they had heard him speak words of blasphemy against Moses and against God" (vi, 11). No charge could be more apt to rouse the mob; the anger of the ancients and the scribes had been already kindled from the first reports of the preaching of the Apostles. Stephen was arrested, not without some violence it seems (the Greek word συνήρπασαν implies so much), and dragged before the Sanhedrin, where he was accused of saying that "Jesus of Nazareth shall destroy this place [the temple], and shall change the traditions which Moses delivered unto us" (vi, 12–14). No doubt Stephen had by his language given some grounds for the accusation; his accusers apparently twisted into the offensive utterance attributed to him a declaration that "the most High dwelleth not in houses made by hands" (vii, 48), some mention of Jesus foretelling the destruction of the Temple and some inveighing against the burthensome traditions fencing about the Law, or rather the asseveration so often repeated by the Apostles that "there is no salvation in any other" (cf. iv, 12)—the Law not excluded—but Jesus. However this may be, the accusation left him unperturbed and "all that sat in the council . . . saw his face as if it had been the face of an angel" (vi, 15).

St. Stephen Preaching, Beato Angelico, Vatican

Stephen's answer (Acts, vii) was a long recital of the mercies of God towards Israel during its long history and of the ungratefulness by which, throughout, Israel repaid these mercies. This discourse contained many things unpleasant to Jewish ears; but the concluding indictment for having betrayed and murdered the Just One whose coming the Prophets had foretold, provoked the rage of an audience made up not of judges, but of foes. When Stephen "looking up steadfastly to heaven, saw the glory of God, and Jesus standing on the right hand of God", and said: "Behold, I see the heavens opened, and the Son of man standing on the right hand of God" (vii, 55), they ran violently upon him (vii, 56) and cast him out of the city to stone him to death. Stephen's stoning does not appear in the narrative of the Acts as a deed of mob violence; it must have been looked upon by those who took part in it as the carrying out of the law. According to law (Lev., xxiv, 14), or at least its usual interpretation, Stephen had been taken out of the city; custom required that the person to be stoned be placed on an elevation from whence with his hands bound he was to be thrown down. It was most likely while these preparations were going on that, "falling on his knees, he cried with a loud voice, saying: Lord, lay not this sin to their charge" (vii, 59). Meanwhile the witnesses, whose hands must be first on the person condemned by their testimony (Deut., xvii, 7), were laying down their garments at the feet of Saul, that they might be more ready for the task devolved upon them (vii, 57). The praying martyr was thrown down; and while the witnesses were thrusting upon him "a stone as much as two men could carry", he was heard to utter this supreme prayer: "Lord Jesus, receive my spirit" (vii, 58). Little did all the people present, casting stones upon him, realize that the blood they shed was the first seed of a harvest that was to cover the world.

The bodies of men stoned to death were to be buried in a place appointed by the Sanhedrin. Whether in this instance the Sanhedrin insisted on its right cannot be affirmed; at any rate, "devout men"—whether Christians or Jews, we are not told—"took order for Stephen's funeral, and made great mourning over him" (viii, 2). For centuries the location of St. Stephen's tomb was lost sight of, until (415) a certain priest named Lucian learned by revelation that the sacred body was in Caphar Gamala, some distance to the north of Jerusalem. The relics were then exhumed and carried first to the church of Mount Sion, then, in 460, to the basilica erected by Eudocia outside the Damascus Gate, on the spot where, according to tradition, the stoning had taken place (the opinion that the scene of St. Stephen's martyrdom was east of Jerusalem, near the Gate called since St. Stephen's Gate, is unheard of until the twelfth century). The site of the Eudocian basilica was identified some twenty years ago, and a new edifice has been erected on the old foundations by the Dominican Fathers.

The only first-hand source of information on the life and death of St. Stephen is the Acts of the Apostles (vi, i–viii, 2). On the question of the place of St. Stephen's stoning, see Lagrange, *S. Étienne et son sanctuaire à Jérusalem* (Paris, 1894).

Charles L. Souvay.

Stephen, Saint, first King of Hungary, b. at Gran, 975; d. 15 August, 1038. He was a son of the Hungarian chief Géza and was baptized, together with his father, by Archbishop St. Adalbert of Prague in 985, on which occasion he changed his heathen name Vaik (Vojk) into Stephen. In 995 he married Gisela, a sister of Duke Henry of Bavaria, the future Emperor St. Henry II, and in 997 succeeded to the throne of Hungary. In order to make Hungary a Christian nation and to establish himself more firmly as ruler, he sent Abbot Astricus to Rome to petition Pope Sylvester II for the royal dignity and the power to establish episcopal sees. The pope acceded to his wishes and, in addition, presented him with a royal crown with which he was crowned at Gran on 17 August, 1001 (see Hungary.—*History*). He founded a monastery in Jerusalem and hospices for pilgrims at Rome, Ravenna, and Constantinople. He was a personal friend of St. Bruno of Querfurt and corresponded with Abbot St. Odilo of Cluny. The last years of his life were embittered by sickness and family troubles. When on 2 September, 1031, his only son, St. Emeric, lost his life on a bear hunt, his cherished hope of transferring the reins of government into the hands of a pious Christian prince were shattered. During his lifetime a quarrel arose among his various nephews concerning the right of succession, and some of them even took part in a conspiracy against his life. He was buried beside his son at Stuhlweissenburg, and both were canonized together in 1083. His feast is on 2 September, but in Hungary his chief festival is observed on 20 August, the day on which his relics were transferred to Buda. His incorrupt right hand is treasured as the most sacred relic in Hungary.

Three old lives are extant: *Vita major* in *Mon. Germ. Hist., Script.*, XI, 229–39, written probably before 1083; *Cronica Ungarorum* in *Mon. Pol. hist.*, I, 495–515, written about 1086; *Vita minor* in *Mon. Germ. Hist., Script.*, XI, 226–9, written about 1100. Another Life written by Hartwig shortly after the *Vita minor* in *Script. rerum Hung.*, I, 413–28, is based on the three preceding ones. Karacsonyi, *Szent Istvan kiraly elete* (Budapest, 1904); Idem, *Szent Istvan kiraly okleveley es a Szilveszter bulla* (Budapest, 1894); Horn, *St. Etienne, roi apostolique de Hongrie* (Paris, 1899); Stilting, *Vita s. Stephani regis Hungariæ* (Raab, 1747; Kaschau, 1767); Butler, *Lives of the Saints*, 2 September; Baring-Gould, *Lives of the Saints*, 2 September.

Michael Ott.

Stephen I, Saint, Pope. Although there is some doubt as to the dates connected with the pontificate of Stephen, it is generally believed that he was consecrated 12 May, 254, and that he died 2 August, 257. According to the most ancient catalogues, he was a Roman by birth, and the son of Jovius, and there is no reason to doubt the assertion of the "Liber Pontificalis" that Lucius I, when about to be martyred, made over the care of the Church to his archdeacon Stephen (254). Most of what we know regarding Pope Stephen is connected directly or indirectly with the severe teachings of the heretic Novatus. Concerning his most important work, his defence of the validity of heretical baptism against the mistaken opinion of St. Cyprian and other bishops of Africa and Asia, there is no need to speak now, as the history of this important controversy will be found under Baptism and Cyprian of Carthage, Saint. Suffice it here to call attention to certain newly discovered letters on the subject by St. Dionysius of Alexandria ("Eng. Hist. Rev.", Jan., 1910, 111 sq.), and to note, with the late Archbishop Benson of Canterbury, that Stephen "triumphed, and in him the Church of Rome triumphed, as she deserved" [E. W. Benson, "Cyprian, His Life, His Times, His Works", VIII (London), 1897, 3]. In the early part of his pontificate Stephen was frequently urged by Faustinus, Bishop of Lyons, to take action against Marcian, Bishop of Arles, who, attaching himself to doctrines of Novatus, denied communion to the penitent *lapsi*. For some reason unknown to us Stephen did not move. The bishops of Gaul accordingly turned to Cyprian, and begged him to write to the pope. This the saint did in a letter which is our sole source of information regarding this affair (Epp. lxix, lxviii). The Bishop of Carthage entreats Stephen to imitate his martyred predecessors, and to instruct the bishops of Gaul to condemn Marcian, and to elect another bishop in his stead. As no more is said by St. Cyprian on this affair, it is supposed that the pope acted in accordance with his wishes, and that Marcian was deposed. The case of the Spanish bishops Martial and Basilides also brought Stephen in connexion with St. Cyprian. As *libellatici* they had been condemned by the bishops of their province for denying the Faith. At first they acknowledged their guilt, but afterwards appealed to Rome, and, deceived by their story, Stephen exerted himself to secure their restoration. Accordingly some of their fellow bishops took their part, but the others laid the case before St. Cyprian. An assembly of African bishops which he convoked renewed the condemnation of Basilides and Martial, and exhorted the people to enter into communion with their successors. At the same time they were at pains to point out that Stephen had acted as he had done because "situated at a distance, and ignorant of the true facts of the case" he had been deceived by Basilides. Anxious to preserve the tradition of his predecessors in matters of practical charity, as well as of faith, Stephen, we are told, relieved in their necessities "all the provinces of Syria and Arabia". In his days the vestments worn by the clergy at Mass and other church services did not differ in shape or material from those ordinarily worn by the laity. Stephen, however, is said by the "Liber Pontificalis" to have ordained that the vestments which had been used for ecclesiastical purposes were not to be employed for daily wear. The same authority adds that he finished his pontificate by martyrdom; but the evidence for this is generally regarded as doubtful. He was buried in the cemetery of St. Calixtus, whence his body was transferred by Paul I to a monastery which he had founded in his honour.

Pont.*, I (Paris, 1721), 211 sq.; Jaffé, *Regesta*, I (Leipzig, 1888), 20–1; Hefele, *Conciles*, I (Paris, 1869), 97 sq.

Horace K. Mann.

Stephen II, Pope.—On the death of Zachary, a certain priest Stephen was unanimously elected to succeed him (about 23 March, 752); but on the third day after his election, whilst transacting some domestic affairs, he was struck with apoplexy, and expired on the next day. As he died before his consecration, earlier writers do not appear to have included him in the list of the popes; but, in accordance with the long standing practice of the Roman Church, he is now generally counted among them. This divergent practice has introduced confusion into the way of counting the Popes Stephen.

Ed. Duchesne, *Liber Pontificalis*, I (Paris, 1886), 440; Mann, *Lives of the Popes*, I, pt. ii (London, 1902), 290 sq.

Horace K. Mann.

Stephen (II) **III,** Pope, unanimously elected in St. Mary Major's, and consecrated on 26 March (or 3 April), 752; d. 26 April, 757. He had at once to face the Lombards who were resolved to bring all Italy under their sway. With the capture of Ravenna (751), they had put an end to the power of the Byzantine exarchs and were preparing to seize the Duchy of Rome. In vain did Stephen apply for help to Constantinople and freely spent his money to induce them to keep the peace they had made with him, and to refrain from hostilities. He accordingly devoted himself to prayer and endeavoured to obtain assistance from Pepin and the Franks. As a last resource he went himself to Gaul to plead his cause before the Frankish king. Receiving a most favourable reception, he crowned Pepin as King of the Franks, and at Kiersey was solemnly assured by him that he would defend him, and would restore the exarchate to St. Peter. Failing to make any impression on Aistulf, the Lombard king, by repeated embassies, Pepin forced the passes of the Alps, and compelled him to swear to restore Ravenna and the other cities he had taken (754). But no sooner had Pepin withdrawn from Lombardy than Aistulf roused the whole Lombard nation, appeared in arms before the walls of Rome (Jan., 756), ravaged the neighbourhood, and made a desperate attempt to capture the city. After receiving one appeal for help after another from the pope, Pepin crossed the Alps a second time (756), and again forced Aistulf to submission. This time Stephen was put in possession of the cities of the exarchate and of the Pentapolis, and became practically the first pope-king. Towards the close of this same year Aistulf died amid preparations for once more violating his engagements. On his death two rivals claimed the Lombard throne, Desiderius, Duke of Istria and Ratchis, brother of Aistulf, who in 749 had resigned the Lombard crown, and had taken the monastic habit in Monte Cassino. Desiderius at once invoked the assistance of the pope, and, on condition of his help, promised to restore to Rome certain cities in the exarchate and the Pentapolis which still remained in the hands of the Lombards, and to give the pope a large sum of money. Stephen at once sent envoys to both the rivals, and, impressing on Ratchis the duty of being true to his monastic vows, succeeded in bringing about peace.

and preventing civil war. Ratchis returned to his monastery and Desiderius was recognized as king (about March, 757). The latter, however, did not fulfil his promise to the pope in its entirety. He gave up Faenza, Ferrara, and two small towns, but retained Bologna, Imola, and other towns in the Pentapolis till his overthrow by Charlemagne. Stephen had scarcely established a system of government in the exarchate when he had to quell the rebellion of Sergius, Archbishop of Ravenna, whom he had made its governor. He, however, caused the rebel to be brought to Rome, and kept him there whilst he lived. Stephen corresponded with the Emperor Constantine on the subject of the restoration of the sacred images, and himself restored many of the ancient churches of the city. Remarkable for his love of the poor, Stephen built hospitals for them near St. Peter's, in which church he was buried.

Horace K. Mann.

Stephen (III) **IV**, Pope, b. about 720; d. 1 or 3 August, 772. Paul I was not dead when trouble began about the election of his successor. Toto of Nepi with a body of Tuscans burst into Rome, and, despite the opposition of the *primicerius* Christopher, forcibly intruded his brother Constantine, a layman, into the chair of Peter (June, 767). In the spring of 768, however, Christopher and his son Sergius contrived to escape from the city, and with the aid of the Lombards deposed the usurper. They were also able to overthrow the monk Philip, whom some of their Lombard allies had clandestinely elected pope. By their efforts Stephen, a Sicilian, the son of Olivus, was at length canonically elected and consecrated (7 August, 768). He had been a Benedictine monk, and had been ordained priest by Pope Zachary. After his consecration the antipopes were treated with the greatest cruelty which, it seems to be generally allowed, Stephen was unable to hinder. To prevent the recurrence of such an election as that of Constantine, the Lateran council forbade laymen to be elected popes or to take part in their election for the future. Only cardinals were to be chosen popes (April, 769). Through Stephen's support the archdeacon Leo was enabled to hold the See of Ravenna against a lay intruder, and in turn through the support of the brothers Charlemagne and Carloman, Kings of the Franks, Stephen was able to recover some territories from the Lombards. But their king, Desiderius, managed to strike two serious blows at Stephen. He brought about a marriage between his daughter and Charlemagne, and in some mysterious manner effected the fall of the pope's chief ministers, Christopher and Sergius. He also allied himself with Paul Afiarta, Stephen's chamberlain, who practised great cruelties when the pope lay dying. Desiderius also brought about trouble in Istria by trying to cause a schism against the Patriarch of Grado, but Stephen defended the patriarch promising him even armed support if necessary. Stephen is honoured as a saint in some Martyrologies.

For bibliography see Stephen (II) III, Pope.

Horace K. Mann.

Stephen (IV) **V**, Pope (816–17), date of birth unknown; d. 24 Jan., 817. Stephen, the son of Marinus, was of the same noble Roman family which gave two other popes to the Church. During his youth he had been patronized by Hadrian I and Leo III, the latter of whom had ordained him deacon. His virtues were celebrated, and he was elected pope and consecrated immediately after Leo's death, about 22 June, 816. He at once caused the Romans to take an oath to the Emperor Louis the Pious as their suzerain, and he sent notice of his election to him. He then went to France and crowned Louis. From that benevolent prince he received a number of splendid presents, and with him renewed the pact or agreement that had already existed for some time between the Franks and the papacy. Whilst still in Gaul he granted the pallium to Theodulf of Orleans, one of the emperor's chief advisers. When returning to Rome he visited Ravenna, there exposing the sandals of Christ to the veneration of the faithful, and he brought back with him a number of exiles whom political reasons had sent into exile during the pontificate of Leo III. He was buried in St. Peter's.

Horace K. Mann.

Stephen (V) **VI**, Pope (885–91), date of birth unknown; d. in Sept., 891. His father, Hadrian, who belonged to the Roman aristocracy, entrusted his education to his relative, Bishop Zachary, librarian of the Holy See. Stephen was created cardinal-priest of SS. Quattro Coronati by Marinus I, and his obvious holiness was the cause of his being chosen pope. He was consecrated in September, 885, without waiting for the imperial confirmation; but when Charles the Fat found with what unanimity he had been elected he let the matter rest. Stephen was called upon to face a famine caused by a drought and by locusts, and as the papal treasury was empty he had to fall back on his father's wealth to relieve the poor, to redeem captives, and to repair churches. To promote order he adopted Guido III, Count of Spoleto, "as his son" and crowned him Emperor (891). He also recognized Louis the Blind as King of Provence. As Aurelian, Archbishop of Lyons, would not consecrate Teutbold who had been canonically elected Bishop of Langres, Stephen himself consecrated him. He had also to oppose the arbitrary proceedings of the Archbishops of Bordeaux and Ravenna, and to resist the attacks which the Patriarch Photius made on the Roman See. His resistance was successful, and the Emperor Leo sent the disturber into exile. When writing against Photius, he begged the emperor to send warships and soldiers to enable him to ward off the assaults of the Saracens. Stephen, who received many English pilgrims and envoys bringing Peterspence, was buried in the portico of the basilica of that Apostle.

Hist.: Script.*, I; Frodoard in *ibid.*, XIII; Duchesne, *The Beginnings of the Temporal Sovereignty of the Popes* (London, 1907), 189, 194–5; Mann, *Lives of the Popes*, III, 367 sqq.

Horace K. Mann.

Stephen (VI) **VII**, Pope (896–7), date of birth unknown; d. about August, 897. Stephen was a Roman, and the son of John, a priest. He had been consecrated Bishop of Anagni, possibly against his will, by Formosus, and became pope about May, 896. Whether induced by evil passion or perhaps, more probably, compelled by the Emperor Lambert and his mother Ageltruda, he caused the body of Formosus to be exhumed, and in January, 897, to be placed before an unwilling synod of the Roman clergy. A deacon was appointed to answer for the deceased pontiff, who was condemned for performing the functions of a bishop when he had been deposed and for passing from the See of Porto to that of Rome. The corpse was then stripped of its sacred vestments, deprived of two fingers of its right hand, clad in the garb of a layman, and ultimately thrown into the Tiber. Fortunately it was not granted to Stephen to have time to do much else besides this atrocious deed. Before he was put to death by strangulation, he forced several of those who had been ordained by Formosus to resign their offices and he granted a few privileges to churches.

Liber Pontificalis, II, 229; privileges of Stephen in *P. L.*, CXXIX; DUMMLER, *Auxilius and Vulgarius* (Leipzig, 1866); DUCHESNE, *The Beginnings of the Temporal Sovereignty of the Popes*, 198 sqq.; MANN, *Lives of the Popes*, IV, 76 sqq.

HORACE K. MANN.

Stephen (VII) VIII, POPE (929–31), date of birth unknown; d. in Feb. or March, 931. He became pope either at the end of 928 or at the beginning of 929. Except that he was a Roman, the son of Teudemund, and sometime cardinal-priest of St. Anastasia, and that when pope he issued certain privileges for monasteries in France and Italy, and was buried in St. Peter's, nothing more is known of him.

Liber Pontificalis, II, 242; JAFFÉ, *Regesta* (Leipzig, 1888), 453–4; MANN, *Lives of the Popes*, IV, 189 sqq.

HORACE K. MANN.

Stephen (VIII) IX, POPE, 939–942, date of birth unknown; he became pope about 14 July, 939, and d. about the end of Oct., 942. Despite the contrary assertions of late writers, there is no doubt that Stephen was a Roman and cardinal-priest of SS. Silvester and Martin. He supported the declining Carlovingian dynasty, and by threat of excommunication forced the nobles to be faithful to the Frankish King Louis IV d'Outre-Mer. Throughout the whole of his pontificate he was subject to Alberic, Prince of the Romans, and so had little opportunity of distinguishing himself.

Liber Pontificalis, II, 244; privileges, *P. L.*, CXXXII; FRODOARD, *Annals;* MANN, *Lives of the Popes in the Early Middle Ages*, IV (London, 1910), 212 sq.

HORACE K. MANN.

Stephen (IX) X, POPE, b. probably about the beginning of the eleventh century; d. at Florence, 29 March, 1058. (Junian?) Frederick, destined to become Pope Stephen X, was the son of Gozelon, Duke of Lower Lorraine and of Junca, the daughter of Berengarius II, King of Italy. As he advanced in years he became as distinguished for character and learning as he was for his birth. It was seemingly whilst he was a canon of Liège that his cousin Leo IX met him and made him chancellor and librarian of the Roman Church (c. 1051). He accompanied Leo IX in his apostolic journeyings throughout Europe, and was sent by him on the famous embassy to Constantinople (1054) which terminated in the final separation of the Eastern and Western Churches. On his return from the East he was robbed by the Count of Teate, and, to avoid falling into the hands of the Emperor Henry III, the Black (who seems to have distrusted him as the brother of the rebellious Godfrey the Bearded, Duke of Lorraine), he became a monk at Monte Cassino (1055), and, after the death of the Emperor Henry, its abbot (1057). He was made cardinal-priest of St. Chrysogonus by Victor II, and, on the latter's death, he was freely chosen his successor, and consecrated on the following day (3 August, 1057). As pope, he carried on the work of reformation which had been inaugurated by St. Leo IX. To show how much he was in earnest, he at once made cardinals of both that zealous champion of reform, St. Peter Damian, and the quondam monk Humbert, his own uncompromising companion on the embassy to Constantinople. He also made no little use of Cardinal Hildebrand (afterwards St. Gregory VII), the soul of the reforming party. He sent him to Milan to effect an improvement in the morals of its clergy with instructions to proceed to Germany and to induce the regent, the empress-mother Agnes, to accept his election which had been made without any reference to her. It was further arranged that Hildebrand was then to go on to France. Stephen was preparing to reopen negotiations with the Greek Church, and to try to stop the advance of the Normans in southern Italy, when he died, exhorting the cardinals to await the return of Hildebrand before electing his successor. He was buried in the Church of St. Reparata.

ROBERT has put together all that is known of Stephen X in his *Hist. du P. Etienne X* (Brussels, 1892); MANN, *Lives of the Popes in the Middle Ages*, VI (London, 1910; 207 sq.

HORACE K. MANN.

Stephen Gobarus. See MONOPHYSITES AND MONOPHYSITISM.

Stephen Harding, SAINT, confessor, the third Abbot of Cîteaux, was born at Sherborne in Dorsetshire, England, about the middle of the eleventh century; d. 28 March, 1134. He received his early education in the monastery of Sherborne and afterwards studied in Paris and Rome. On returning from the latter city he stopped at the monastery of Molesme and, being much impressed by the holiness of St. Robert, the abbot, joined that community. Here he practised great austerities, became one of St. Robert's chief supporters and was one of the band of twenty-one monks who, by authority of Hugh, Archbishop of Lyons, retired to Cîteaux to institute a reform in the new foundation there (see CÎTEAUX, ABBEY OF). When St. Robert was recalled to Molesme (1099), Stephen became prior of Cîteaux under Alberic, the new abbot. On Alberic's death (1110) Stephen, who was absent from the monastery at the time, was elected abbot. The number of monks was now very reduced, as no new members had come to fill the places of those who had died. Stephen, however, insisted on retaining the strict observance originally instituted and, having offended the Duke of Burgundy, Cîteaux's great patron, by forbidding him or his family to enter the cloister, was even forced to beg alms from door to door. It seemed as if the foundation were doomed to die out when (1112) St. Bernard with thirty companions joined the community. This proved the beginning of extraordinary prosperity. The next year Stephen founded his first colony at La Ferté, and before his death he had established thirteen monasteries in all. His powers as an organizer were exceptional, he instituted the system of general chapters and regular visitations and, to ensure uniformity in all his foundations, drew up the famous "Charter of Charity" or collection of statutes for the government of all monasteries united to Cîteaux, which was approved by Pope Callistus II in 1119 (see CISTERCIANS). In 1133 Stephen, being now old, infirm, and almost blind, resigned the post of abbot, designating as his successor Robert de Monte, who was accordingly elected by the monks. The saint's choice, however, proved unfortunate and the new abbot only held office for two years.

Stephen was buried in the tomb of Alberic, his predecessor, in the cloister of Cîteaux. In the Roman calendar his feast is 17 April, but the Cistercians themselves keep it on 15 July, with an octave, regarding him as the true founder of the order. Besides the "Carta Caritatis" he is commonly credited with the authorship of the "Exordium Cisterciencis cenobii", which however may not be his. Two of his sermons are preserved and also two letters (Nos. 45 and 49) in the "Epp. S. Bernardi".

G. ROGER HUDLESTON.

Stephen of Autun, bishop, liturgical writer, b. at Bangé (hence surnamed Balgiacus or de Balgiaco) in Anjou; d. at the abbey of Cluny, 1139 or early in 1140. Of his younger days nothing is known except that he was the son of Gaucerannus, lord of Bangé, and the uncle of Humbert, Archbishop of Lyons. He appears in history (1112) as Bishop of Autun. As such he was present (1115) at a synod of Tournus. A letter is in existence of the year 1116, written to him from the Lateran by Pascal II in which the pope places the Diocese of Autun under his special protection and confirms to Stephen various privileges. In 1129 Stephen was among the prelates who assisted at the coronation of Philip, eldest son of Louis VI of France. He built a cathedral, beginning in 1120, which was solemnly consecrated (1131) by Pope Innocent II. He always showed a great admiration for the religious state, and in 1136 resigned his see and entered the monastery of Cluny. The abbot, Peter the Venerable, under whom he entered and died, gives great praise to his learning and piety. His "Tractatus de Sacramento Altaris", printed, together with some other documents relating to Stephen, in P. L., CLXXII, 1371, is an ascetico-liturgical treatise, consisting of twenty chapters and a preface, in which he speaks of the ordination and duties of each of the Minor and Major Orders; and of the Holy Sacrifice of the Mass and gives a literal and allegorical explanation of the Canon. He is one of the earliest writers using the term transubstantiation. This treatise, published in 1517 by Montalon, canon of Autun, was ascribed by some to Stephen II of Autun (d. 1189), but is vindicated for the earlier bishop by Mabillon, "Annales O. S. B.", VI, 270.

Francis Mershman.

Stephen of Bourbon, illustrious writer and preacher, especially noted as a historian of medieval heresies, b. at Belleville (Archdiocese of Lyons) towards the end of the twelfth century; d. in 1261. Having received his early education from the cathedral clergy of Macon, he made his higher studies in Paris, about 1220, and there shortly afterwards, as it seems, he entered the Order of Preachers. From 1230 he was very active for many years as preacher and inquisitor in the districts of Lyonnais, Burgundy, Franche-Comté, Savoy, Champagne, Lorraine, Auvergne, Languedoc, and Roussillon. In his work for preachers entitled "De septem donis Spiritus Sancti", or "Tractatus de diversis Materiis prædicabilibus", Stephen has embodied much useful matter out of the many years of his practical experience. The parts of this work more valuable at the present day were published in Paris in 1877 by A. Lecoy de la Marche under the title "Anecdotes historiques, légendes et apologues, tirés du recueil inédit d'Etienne de Bourbon dominicain du 13e siècle". Considered as a whole Stephen's work affords a clear insight into the different sects and superstitions of the age, while giving at the same time valuable information regarding the most prominent of his contemporaries. Although credulous to a marked degree, Stephen was, nevertheless, a strenuous opponent of superstition. A free use of his writings was made by a later compiler to form a "Speculum Morale", which for a long time was falsely ascribed to Vincent of Beauvais.

Echard, *Script. ord. præd.*, I, 184 sq.; Hurter, *Nomenclator*, II (Innsbruck, 1906), 375; Lecoy de la Marche, Introd. to work cited above; Haureau in *Journal des savants*, 1881, 591 sq., 739 sq.; Müller, *Die Waldenser* (Gotha, 1886), 166 sq.

Charles J. Callan.

Stephen of Muret, Saint, b. 1045; d. at Muret, 8 February, 1124, founder of the Abbey and Order of Grandmont (q. v.). Serious chronological difficulties are presented by the traditional story of his early life, which runs as follows: Stephen in his twelfth year accompanied his father, the Viscount of Thiers, to Italy where he was left to be educated by Milo, Archbishop of Benevento; after passing twelve years in this prelate's household, he became the inmate of a Benedictine monastery in Calabria, but never received the habit. He then returned to France to bid farewell to his parents, having formed the design of entering religion, but, finding them dead, returned to Italy. His patron Milo having also died, he established himself at Rome, where he studied the rules of the religious houses of the city. After a four years' sojourn he obtained a Bull from Gregory VII authorizing him to found an institute resembling that of the solitaries he had frequented in Calabria, and returned to France. He is said to have settled at Muret in 1076. This story is impossible; his father visited Italy in order to make a pilgrimage to St. Nicholas at Bari; but St. Nicholas's relics were not placed there till some years later; Milo was not Archbishop of Benevento for twelve years. These are not the only difficulties, but for a discussion of these chronological questions see Martène, "Amplissima Collectio", VI, præf., viii sq. The exact truth as to St. Stephen's life cannot now be established. He went to Italy and there saw some religious whose holy life inspired him with a desire to imitate them, but who they were, Carthusians or Benedictines, we do not know. The quarrel as to what great order could claim Grandmont as its offspring, with the consequent forgeries, has done much to involve the founder's life in obscurity. Though Stephen was certainly the founder of the Order of Grandmont, he did little for his disciples except offer them the example of his holy life, and it was not till after his death that the order was firmly established. His head is preserved in the parish Church of St. Sylvestre, Canton of Laurière (Haute Vienne). He was canonized in 1189 and his feast occurs on 8 February. His works (not authentic) may be found in Migne, P. L., CCIV, 997–1162.

Acta SS., Feb., II, 199 sq.; Martène, *Amplissima Coll.*, VI (1729); Chevalier, *Biobibliographie*, 1378.

Raymund Webster.

Stephen of Tournai, canonist, b. at Orléans, 1128; d. at Tournai, September, 1203. He entered the Order of the Canons Regular at Saint-Euverte in Orléans about 1150, then studied canon and Roman law at Bologna, returning to his monastery in 1160. He was elected abbot of Saint-Euverte in 1167 and of Sainte-Geneviève at Paris in 1177. The latter monastery he almost entirely rebuilt, establishing a monastic school in connexion with it. In 1192 he became Bishop of Tournai, but was greatly hampered in the exercise of his episcopal functions by the opposition of the people as well as by the interdict placed on France on account of the divorce proceedings of Philip II. He is the author of "Summa in decretum Gratiani" (1159), which is to a great extent based on the similar works of Paucapalea, Rufinus, and Rolandus (Alexander III). It was first edited by Schulte (Giessen, 1891). His letters, edited by Molinet (Paris, 1679), are printed in P. L., CXI, 309–625.

Michael Ott.

Stephens, Henry Robert, Belgian theologian, b. of English parentage at Liège, 5 August, 1665; d. there, 15 June, 1623. He entered the Society of Jesus, 7 Sept., 1683, and for over twenty years was attached to the episcopal seminary of Liège, first as professor of dogmatic theology and later as its superior. During this period the Jansenists were active in Belgium, both in attacking the Jesuits and in opposing the papal Decrees condemnatory of Jansenism. All of Father Stephens's published works were occasioned by these attacks. In a libellous work entitled "Specimen doctrinæ a Jesuitis in Seminario Leodiensi traditæ" the Jesuits were accused, among other things, of corrupting faith and morals by their teaching. In answer to these accusations Father Stephens published a set of theses, "Conclusiones theologicæ miscellaneæ" (Liège, 1702) and had them publicly defended by one of his pupils. In answer to another Jansenistic work known as the "Epistola Leodiensis de formula Alexandri VII", he published his "Vera defensio authoritatis Ecclesiæ" (Liège, 1707). The Jansenist, Henry Denys, thereupon defended the "Epistola" in an anonymously published work which called forth Father Stephens's "Author epistolæ Leodiensis denuo confutatus" (Liège, 1709). His other works are the "Dissertatio theologica de Condemnatione Libri Janseniani" (Liège, 1710), and the "Consilium pacis adversariis propriis inter se disputantibus" (Liège, 1710). In all these works his name appears in the latinized form of Stephani.

Edward C. Phillips.

Stephens, Thomas (also known in India as Padre Estevao or Estevam; less familiarly Padre Busten, Buston, or de Bubston), b. about 1549 at Bulstan, Wiltshire; d. in 1619 at Goa, India. He is admittedly the first Englishman in India. His father was an influential London merchant. Little is known of his boyhood and youth. Though Hakluyt ("Voyages") and Philip Anderson ("The English in Western India") believe him to have been educated at New College, Oxford, while A. F. Pollard in the "Dictionary of National Biography" identifies him with the Thomas Stephen of Bourton, Dorset, who was elected scholar of Winchester in 1564, a careful search among the registers of Oxford students gives no evidence of his ever having been at any of the colleges of Oxford. The error of counting Stephens as an Oxonian may easily have arisen from his name having been mistaken either for that of Richard Stephens his brother, who studied at New College, or for that of another Thomas Stephens who is said to have taken his degree at St. John's College, Oxford, in 1577, when the subject of this article was already a novice at Sant' Andrea's in Rome. Though not a student at Oxford, owing to his father's influential position and to his own brilliant parts, he very probably came into familiar contact with Edmund Campion and several other Catholic Oxford students whose examples may have influenced his subsequent conversion. Soon after he had finished his scholastic career Stephens attached himself to one Thomas Pounde. The perusal of the accounts of the Indian Missions seems to have engendered in them the desire of entering the Society of Jesus. Their common aspirations and a similarity of tastes brought the two friends often together during the persecutions of the English Catholics. Finally, impatient of delay in carrying out their spiritual object, they determined to set out for Rome, but Pounde, betrayed, was doomed to pass the next thirty years in prison. Stephens travelled alone to Rome and entered the Society of Jesus. Having finished his novitiate, Stephens received permission to proceed to India. He sailed from Lisbon (4 April, 1579) and reached Goa, then the principal city of the East Indies, on 24 October of the same year. From Goa he wrote a series of letters to his father, which appear to have held out "the strongest inducements which London merchants had been offered to embark on Indian speculations", coming, as they did, from one with a thorough grasp of commercial ideas. It has been undoubtedly put forth that these communications on the mercantile chances and possibilities in the East subsequently led to the formation of the East India Company; but, unfortunately, only two of the letters have been preserved. One of them (10 November, 1579), the first he wrote to his father on reaching Goa, is included in Hakluyt's "Voyages". The other (24 October, 1583), written in Latin to his brother in Paris, is preserved in part in the National Library of Brussels, and published by Dr. Gerson da Cunha in the "Instituto Vasco da Gama", II. Fr. Stephens's first five years were spent as minister of the professed house at Goa, rector of Salsette College, and temporary *socius* to the visitor. The remaining thirty-five years of his ministry were spent among the Brahmin Catholics of Salsette. His energy and zeal won the devotion of the people and his influence often protected travellers, not only his countrymen, but other Europeans as well.

In the midst of his missionary labours he found time for considerable literary work, though few of his writings remain. The suppression of the Society of Jesus in 1773 and the checkered career of the Konkani race (the descendants of the Brahmin Catholic community of Salsette) destroyed most of his works and renders the drawing up of anything like a complete list impossible. M. Pollard states that Padre Estevão was the first to make a scientific study of Canarese, that he also learned Hindustani, and that in both these languages he published manuals of piety and grammar. Yet not a single trace of these productions is extant. His greatest surviving work, "The Christian Purânna", shows that he must have acquired a complete mastery of Marâthi and Konkani and of Sanskrit, and it is possible to suppose that he must have written more works with the help of these than are preserved to us. The following list includes all the extant writings: the two letters mentioned above; a Catechism of Christian Doctrine which first appeared under the title, "Doutrina Christã em lingua Bramana-Canarin, Ordenada a maniera de dialogo para ensinar os meninos, pelo Padre Thomas Estevão, Jesuita, no Collegio de Rachol" (1622); "Arte de lingua Canarin", a grammar of the Konkani language, the first grammar of an Indian tongue by a European, chiefly of bibliographical interest (Rachol, 1640), revised and improved by Fr. Diogo Ribiero, S. J., and bearing the *imprimatur* of the *præpositus* General of the Society, Fr. Vitelleschi. Only two copies of the first edition are known to exist; a second edition was issued in 1857; "The Christian Purânna" (1616, 1649, and 1654), but no copies of any of these editions are extant. An *editio princeps*, reproduced from authenticated MS. copies by the present writer, was issued in 1907 from the Jesuit Press at Mangalore, India. "The Christian Purânna" is a Marathi-Konkani metrical composition, consisting of 10,962 strophes, divided into two parts treating of the Old and the New Testament respectively.

Joseph L. Saldanha.

Steuco (Steuchus), Agostino, exegete, b. at Gubbio, Umbria, 1496; d. at Venice, 1549. At the age of seventeen he entered the order of the Canons Regular of the Lateran at Gubbio, and in 1525 he was made director of the library of Cardinal Grimani at Venice. In 1530 he became prior of the canons of Reggio and shortly after at Gubbio. Early in 1538 he was appointed Bishop of Kisamos in Crete by Paul III, who also made him director of the Vatican Library on 27 Oct. of the same year, but in the latter capacity Steuco did not accomplish much (Pastor, "Geschichte Pauls III," Freiburg, 1909, p. 738). In 1547 Paul III sent him as legate to the Tridentine Council, which had been transferred to Bologna, and he died on his way back to Rome. He was a man of varied talents, well versed in history, philosophy, and theology, and had a fair mastery of Greek and Hebrew. His works, chiefly exegetical, were edited in three volumes by Ambrogio Morando (Paris, 1578; Venice, 1591 and 1601).

Stevens, CORNEILLE. See BELGIUM.

Stevenson, JOSEPH, archivist, b. at Berwick-on-Tweed, 27 Nov., 1806; d. in London, 8 Feb., 1895. Though his parents were Presbyterians, he was educated at Durham under the historian, James Raine, and afterwards at the University of Glasgow. Coming to London he found work, first among the Government records, then in the British Museum, 1831; later he married Mary Ann Craig, and gradually gave up Presbyterianism. The death of his eldest and much-loved son so affected him that he returned to Durham and took Anglican orders. He became librarian at the cathedral (1841-48), and was afterwards instituted rector of Leighton Buzzard (1849-63). All this time he was constantly editing ancient texts: for the Maitland Club, Glasgow, eight volumes (1833-42); for the English Historical Society, five volumes (1838-41); for the Roxburghe Club, four volumes; for the Surtees Society, seven volumes, with eight volumes of "The Church Historians of England." In 1856 the English Government was making plans for dealing with the national records on a large scale. Stevenson was one of those appointed to report on the subject, and when the Public Record Office was instituted, 1857, he was one of the first editors engaged. He now edited seven volumes for the Rolls Series, seven volumes of Calendars, Foreign Series, and two of the Scottish Series. Meantime he had been received into the Church, 24 June, 1863, and after his wife died, 1869, he entered the seminary of Oscott, and was ordained priest by Bishop Ullathorne in 1872. Next year he was in Rome searching for documents concerning English history from the Vatican archives, being employed by the British Government to begin the series of "Roman Transcripts" for the Record Office; he also wrote many reports for the Historical Manuscript Commission. In 1877 he gave up these occupations to enter the Society of Jesus, though nearly seventy-two years of age, but after his novitiate he returned again to historical research, and continued his studies until the end. His chief work of this period was the discovery and publication of Claude Nau's "Life of Mary Queen of Scotts" (Edinburgh, 1883). In 1892 he received the honorary degree of Doctor of Laws from the University of St. Andrews. Prolonged literary work, instead of stiffening the mind, left Stevenson ever fresh and elastic, the friend of children and prodigal of kindness to others.

J. H. POLLEN.

Stevin, SIMON, b. at Bruges in 1548; d. at Leyden in 1620. He was for some years book-keeper in a business house at Antwerp; later he secured employment in the administration of the Franc of Bruges. After visiting Prussia, Poland, Sweden, and Norway he took up his residence in the Netherlands, where he spent the rest of his life. The Stadtholder Maurice of Nassau esteemed him so highly that he studied under his direction mathematics, science, and engineering, rewarding him for his services by making him director of finances, inspector of dykes of the Low Countries, and quartermaster-general of the Government. His was an upright, modest, and inventive mind. His influence on the development of science was great and lasting. He began with the publication in 1582 of his "Tafelen van Interest" (Tables of Interest; Plantin, Antwerp), thus distributing through the business world an easy and valuable method of calculation, still carefully preserved by the wealthy merchants of the Low Countries. Then came successively: in 1583 the "Problematum geometricorum libri V", a very original work, somewhat imperfectly reproduced in subsequent editions of the author's works, the "Dialektike ofte bewysconst", a treatise on logic, re-edited at Rotterdam in 1621, but not found in the large editions of the author's works, and "De Thiende", a small pamphlet of thirty-six pages containing the oldest systematic and complete explanation of decimal calculus, both published by Plantin at Leyden in 1585. "De Thiende" has often caused its author to be regarded as the inventor of calculus; he was indisputably the first to bring to light its great advantages. Stevin translated the pamphlet into French and re-edited it the same year under the title "La Disme", with his Arithmetic published at Antwerp by Plantin. In 1586 appeared the most famous of his works, "De Beghinselen der Weeghconst, De Weeghdaet, De Beghinselen der Waterwichts" (Antwerp). This was the first edition of his mechanics, in which he sets forth for the first time several theorems since then definitely embodied in science; the hydrostatic paradox; equilibrium of bodies on inclined planes; the parallelogram of forces, formulated, it is true, under a different enunciation by constructing a triangle by means of two components and their results.

Stevin's "Vita politica, Het Burgherlick leven", a treatise on the duties of the citizen which is no longer printed in large editions of his works, was published by Raphelengen at Leyden in 1590. It gave rise during the nineteenth century to a long and violent controversy. From some pages of this volume the inference has been drawn that when entering the service of Maurice of Nassau Stevin apostatized from the Catholic Church, but this opinion is hardly tenable and has now been abandoned. In 1594 appeared the "Appendice Algebraïque", an eight-page pamphlet, the rarest of his works (there is a copy at the Catholic University of Louvain) and one of the most remarkable; in it he gave for the first time his famous solution of equations of the third degree by means of successive approximations. In the same year was published "De Sterctenbouwing", a treatise on fortifications, and in 1599, "Havenvinding", a treatise on navigation, instructing mariners how to find ports with the aid of the compass. From 1605 to 1608 Stevin re-edited his chief works in two folio volumes entitled "Wisconstige gedachtenissen" (Bouwenz, Leyden). A Latin translation of them, under the title "Hypomnemata mathematica", was confided to Willebrord Snellius; and an incomplete French translation, entitled "Mémoires mathématiques", was the work of Jean Tuning, secretary of the Stadtholder Maurice. These two versions were published at Leyden by Jean Paedts. The "Wisconstige gedachtenissen" and the "Hypomnemata mathematica" contain several treatises then published for the first time, notably the trigonometry, geography, cosmography, perspective, book-keeping, etc.

In 1617 Waesberghe published at Rotterdam Stevin's "Legermeting" and "Nieuwe maniere van Stercktebouw door spilsluysen", of which French translations were published by the same editor in the following year under the titles "Castramétation" and "Nouvelle manière de fortifications par écluses". These were the last publications made during his lifetime, but he left important MSS., the chief of which were published in 1649 by his son Henri, who composed the "Burgherlicke Stoffen" (political questions); the others were lost, but later recovered. Bierens de Haan edited two of them at Amsterdam in 1884: "Spiegeling der singconst" (mirror of the art of singing) and "Van de molens" (on mills). After Stevin's death Albert Girard translated several of his works and annotated others, thus forming a large folio volume published at Leyden in 1634 by the Elzevirs as "Œuvres mathématiques de Simon Stevin de Bruges". Abroad Stevin is often known only through this translation, but it does not convey an adequate idea of his works and should be supplemented by several of the original editions mentioned above. Unfortunately these have become bibliographical rarities almost unobtainable outside of Belgium and the Netherlands. M. Ferd. van der Haeghen has made them the subject of a masterly study in his "Bibliotheca Belgica" (1st series, XXIII, Ghent and The Hague, 1880–90), in which he notes most of the copies preserved in the libraries of both countries.

H. Bosmans.

Stifter, Adalbert, poet and pedagogue, b. at Oberplan in Bohemia, 23 October, 1805; d. at Linz, 28 October, 1868. His father was a linen weaver and flax dealer. In these humble surroundings the talented boy received the first intellectual stimulus from his mother and grandmother, who told him fairy-tales, stories, and legends. At school he was an apt scholar and, among other things, showed talent for music and drawing. After the sudden death of his father in 1817, his grandfather sent him to the Benedictine *gymnasium* at Kremsmünster in Upper Austria, where Father Plazidus Hall took the clever boy under his care. In 1827 Stifter went to the University of Vienna. Here, after completing the usual philosophical course, he applied himself to legal studies; but his natural bent eventually led him to attend lectures in mathematics and the natural sciences. He supported himself by giving private lessons among the leading families, and in this way formed a wide connexion among the Viennese aristocracy, his circle of acquaintances including the family of the imperial chancellor, Prince Metternich. He wished to be a teacher of natural science and passed the written examination for this with honour in 1830, without the oral examination, however. Although now thirty-two years old and still a candidate for the position of teacher, he married the penniless daughter of a retired artillery officer. It was impossible for him to find a more secure position, and he was obliged to continue earning a precarious livelihood by giving private lessons. His position, however, improved when a story, "Der Condor", published in the "Wiener Zeitschrift" in 1840, suddenly made him famous. This was soon followed by other stories, which were later collected and published under the title of "Studien".

A new era in Stifter's existence began with the year 1848. It was in that year that the revolutionary uprisings, which filled the streets of Vienna with turmoil and violence, drove him from the capital to Linz. There, after vainly trying to obtain a position as a teacher, he offered his services to the provincial government of Upper Austria, and his great pedagogical abilities were now at last recognized. Count Leo Thun, the reorganizer of the Austrian school system, appointed Stifter in 1850 a member of the school board at Linz. There was no longer any lack of honours and recognition: he received the medal for art and science and the cross of a knight of the Order of Francis Joseph, and was greatly esteemed by the Empress Elizabeth. But, in spite of all this, Stifter gradually became morose and eccentric. It became impossible for him to overcome an ever-increasing depression, the after-effect of his early disappointments. As he entered the sixties, a severe liver complaint developed which obliged him to make repeated visits to Karlsbad. In 1865 he retired with his full salary and the title of imperial councillor. He visited his home for the last time in 1867, and soon after was seized with the painful illness which, in spite of his wife's careful nursing, proved fatal. He died childless.

As a poet, Stifter belonged to the late Romantic School, like Droste-Hülshoff and Mörike. His contemplative spirit, his delicate perception of nature, the richness of his imagination, and his shrinking from the tumult of the day are all traits of true Romanticism, as is evident in his "Studien", and "Bunte Steine". As an older man, about 1850, the greater composure of his style bore a resemblance to the classicism of Goethe, as is shown in his "Nachsommer", and still more in his "Witiko". That he was also an excellent pedagogue is made evident not only in his work as a member of the school-board, but also in his writings, which bear evidence of his excellent pedagogical knowledge. His latest biographer says: "In advance of his times, he held up as the aim of the future most of the achievements which have been realized by modern pedagogy, and was thus, until death, in word and deed a model, a leader, and a discoverer of new paths for the school he loved so dearly." Several of his works were often reprinted during his lifetime. A complete edition, edited by Apprent, was issued at Pesth in 1870. A popular edition of selected works was published at Leipzig in 1887. Professor Sauer is editing a new and carefully prepared edition for the "Library of German Authors of Bohemia" ("Bibliothek deutscher Schriftsteller aus Böhmen", Prague, 1901——).

N. Scheid.

Stigmata, Mystical.—I. To describe merely the facts without deciding whether or not they may be explained by supernatural causes, history tells us that many ecstatics bear on hands, feet, side, or brow the marks of the Passion of Christ with corresponding and intense sufferings. These are called visible stigmata. Others only have the sufferings, without any outward mark, and these phenomena are called invisible stigmata. Their existence is so well established historically that, as a general thing, they are no longer disputed by unbelievers, who now seek only to explain them naturally. Thus a free-thinking physician, Dr. Dumas, professor of religious psychology at the Sorbonne, clearly admits the facts (Revue des Deux Mondes, 1 May, 1907), as does also Dr. Pierre Janet (Bulletin de l'Institut psychologique international, Paris, July, 1901).

St. Catherine of Siena at first had visible stigmata but through humility she asked that they might be made invisible, and her prayer was heard. This was also the case with St. Catherine de' Ricci, a Florentine Dominican of the sixteenth century, and with several other stigmatics. The sufferings may be considered the essential part of visible stigmata; the substance of this grace consists in pity for Christ, participation in His sufferings, sorrows, and for the same end—the expiation of the sins unceasingly committed in the world. If the sufferings were absent, the wounds would be but an empty symbol, theatrical representation, conducing to pride. If the stigmata really come from God, it would be unworthy of His wisdom to participate in such futility, and to do so by a miracle. But this trial is far from being the only one which the saints have to endure: "The life of stigmatics," says Dr. Imbert, "is but a long series of sorrows which arise from the Divine malady of the stigmata and end only in death" (op. cit. infra, II, x). It seems historically certain that ecstatics alone bear the stigmata; moreover, they have visions which correspond to their rôle of co-sufferers, beholding from time to time the blood-stained scenes of the Passion. With many stigmatics these apparitions were periodical, e. g. St. Catherine de' Ricci, whose ecstasies of the Passion began when she was twenty (1542), and the Bull of her canonization states that for twelve years they recurred with minute regularity. The ecstasy lasted exactly twenty-eight hours, from Thursday noon till Friday afternoon at four o'clock, the only interruption being for the saint to receive Holy Communion. Catherine conversed aloud, as if enacting a drama. This drama was divided into about seventeen scenes. On coming out of the ecstasy the saint's limbs were covered with wounds produced by whips, cords etc.

Dr. Imbert has attempted to count the number of stigmatics, with the following results: (1) None are known prior to the thirteenth century. The first mentioned is St. Francis of Assisi, in whom the stigmata were of a character never seen subsequently: in the wounds of feet and hands were excrescences of flesh representing nails, those on one side having round black heads, those on the other having rather long points, which bent back and grasped the skin. The saint's humility could not prevent a great many of his brethren beholding with their own eyes the existence of these wonderful wounds during his lifetime as well as after his death. The fact is attested by a number of contemporary historians, and the feast of the Stigmata of St. Francis is kept on 17 September. (2) Dr. Imbert counts 321 stigmatics in whom there is every reason to believe in a Divine action. He believes that others would be found by consulting the libraries of Germany, Spain, and Italy. (3) In this list there are 41 men. (4) There are 62 saints or blessed of both sexes, of whom the best known (numbering twenty-six) were: St. Francis of Assisi (1186–1226); St. Lutgarde (1182–1246), a Cistercian; St. Margaret of Cortona (1247–97); St. Gertrude (1256–1302), a Benedictine; St. Clare of Montefalco (1268–1308), an Augustinian; Bl. Angela of Foligno (d. 1309), Franciscan tertiary; St. Catherine of Siena (1347–80), Dominican tertiary; St. Lidwine (1380–1433); St. Frances of Rome (1384–1440); St. Colette (1380–1447), Franciscan; St. Rita of Cassia (1386–1456), Augustinian; Bl. Osanna of Mantua (1499–1505), Dominican tertiary; St. Catherine of Genoa (1447–1510), Franciscan tertiary; Bl. Baptista Varani (1458–1524), Poor Clare; Bl. Lucy of Narni (1476–1547), Dominican tertiary; Bl. Catherine of Racconigi (1486–1547), Dominican; St. John of God (1495–1550), founder of the Order of Charity; St. Catherine de' Ricci (1522–89), Dominican; St. Mary Magdalen de' Pazzi (1566–1607), Carmelite; Bl. Marie de l'Incarnation (1566–1618), Carmelite; Bl. Mary Anne of Jesus (1557–1620), Franciscan tertiary; Bl. Carlo of Sezze (d. 1670), Franciscan; Bl. Margaret Mary Alacoque (1647–90), Visitandine (who had only the crown of thorns); St. Veronica Giuliani (1600–1727), Capuchiness; St. Mary Frances of the Five Wounds (1715–91), Franciscan tertiary.

(5) There were 29 stigmatics in the nineteenth century. The most famous were: Catherine Emmerich (1774–1824), Augustinian; Elizabeth Canori Mora (1774–1825), Trinitarian tertiary; Anna Maria Taïgi (1769–1837); Maria Dominica Lazzari (1815–48); Marie de Moerl (1812–68) and Louise Lateau (1850–83), Franciscan Tertiaries. Of these, Marie de Moerl spent her life at Kaltern, Tyrol (1812–68). At the age of twenty she became an ecstatic, and ecstasy was her habitual condition for the remaining thirty-five years of her life. She emerged from it only at the command, sometimes only mental, of the Franciscan who was her director, and to attend to the affairs of her house, which sheltered a large family. Her ordinary attitude was kneeling on her bed with hands crossed on her breast, and an expression of countenance which deeply impressed spectators. At twenty-two she received the stigmata. On Thursday evening and Friday these stigmata shed very clear blood, drop by drop, becoming dry on the other days. Thousands of persons saw Marie de Moerl, among them Görres (who describes his visit in his "Mystik", II, xx), Wiseman, and Lord Shrewsbury, who wrote a defence of the ecstatic in his letters published by "The Morning Herald" and "The Tablet" (cf. Boré, op. cit. infra). Louise Lateau spent her life in the village of Bois d'Haine, Belgium (1850–83). The graces she received were disputed even by some Catholics, who as a general thing relied on incomplete or erroneous information, as has been established by Canon Thiery ("Examen de ce qui concerne Bois d'Haine", Louvain, 1907). At sixteen she devoted herself to nursing the cholera victims of her parish, who were abandoned by most of the inhabitants. Within a month she nursed ten, buried them, and in more than one instance bore them to the cemetery. At eighteen she became an ecstatic and stigmatic, which did not prevent her supporting her family by working as a seamstress. Numerous physicians witnessed her painful Friday ecstasies and established the fact that for twelve years she took no nourishment save weekly communion. For drink she was satisfied with three or four glasses of water a week. She never slept, but passed her nights in contemplation and prayer, kneeling at the foot of her bed.

II. The facts having been set forth, it remains to state the explanations that have been offered. Some physiologists, both Catholics and Free-thinkers, have maintained that the wounds might be produced in a purely natural manner by the sole action of the imagination coupled with lively emotions. The person being keenly impressed by the sufferings of the Saviour and penetrated by a great love, this preoccupation acts on her or him physically, reproducing the wounds of Christ. This would in no wise diminish his or her merit in accepting the trial, but the immediate cause of the phenomena would not be supernatural. We shall not attempt to solve this question. Physiological science does not appear to be far enough advanced to permit a definite solution, and the writer of this article adopts the intermediate position, which seems to him unassailable, that of showing that the arguments in favour of natural explanations are illusory. They are sometimes arbitrary hypotheses, being equivalent to mere assertions, sometimes arguments based on exaggerated or misinterpreted facts. But if the progress of medical sciences and psycho-physiology should present serious objections, it must be remembered that neither religion nor mysticism is dependent on the solution of these questions, and that in processes of canonization stigmata do not count as incontestable miracles.

No one has ever claimed that imagination could produce wounds in a normal subject: it is true that this faculty can act slightly on the body, as Benedict XIV said, it may accelerate or retard the nerve-currents, but there is no instance of its action on the tissues (De canoniz., III, xxxiii, n. 31). But with regard to persons in an abnormal condition, such as ecstasy or hypnosis, the question is more difficult; and, despite numerous attempts, hypnotism has not produced very clear results. At most, and in exceedingly rare cases, it has induced exudations or a sweat more or less coloured, but this is a very imperfect imitation. Moreover, no explanation has been offered of three circumstances presented by the stigmata of the saints: (1) Physicians do not succeed in curing these wounds with remedies. (2) On the other hand, unlike natural wounds of a certain duration, those of stigmatics do not give forth a fetid odour. To this there is known but one exception: St. Rita of Cassia had received on her brow a supernatural wound produced by a thorn detached from the crown of the crucifix. Though this emitted an unbearable odour, there was never any suppuration or morbid alteration of the tissues. (3) Sometimes these wounds give forth perfumes, for example those of Juana of the Cross, Franciscan prioress of Toledo, and Bl. Lucy of Narni. To sum up, there is only one means of proving scientifically that the imagination, that is auto-suggestion, may produce stigmata: instead of hypotheses, analogous facts in the natural order must be produced, namely wounds produced apart from a religious idea. This has not been done.

With regard to the flow of blood it has been objected that there have been bloody sweats, but Dr. Lefebvre, professor of medicine at Louvain, has replied that such cases as have been examined by physicians were not due to a moral cause, but to a specific malady. Moreover, it has often been proved by the microscope that the red liquid which oozes forth is not blood; its colour is due to a particular substance, and it does not proceed from a wound, but is due, like sweat, to a dilatation of the pores of the skin. But it may be objected that we unduly minimize the power of the imagination, since, joined to an emotion, it can produce sweat; and as the mere idea of having an acid bon-bon in the mouth produces abundant saliva, so, too, the nerves acted upon by the imagination might produce the emission of a liquid, and this liquid might be blood. The answer is that in the instances mentioned there are glands (sudoriparous and salivary) which in the normal state emit a special liquid, and it is easy to understand that the imagination may bring about this secretion; but the nerves adjacent to the skin do not terminate in a gland emitting blood, and without such an organ they are powerless to produce the effects in question. What has been said of the stigmatic wounds applies also to the sufferings. There is not a single experimental proof that imagination could produce them, especially in violent forms.

Another explanation of these phenomena is that the patients produce the wounds either fraudulently or during attacks of somnambulism, unconsciously. But physicians have always taken measures to avoid these sources of error, proceeding with great strictness, particularly in modern times. Sometimes the patient has been watched night and day, sometimes the limbs have been enveloped in sealed bandages. M. Pierre Janet placed on one foot of a stigmatic a copper shoe with a window in it through which the development of the wound might be watched, while it was impossible for anyone to touch it (op. cit. supra).

AUG. POULAIN.

Stipend [Lat. *stipendium*, a tax, import, tribute; in military use, pay, salary; contraction for *stipipendium*, from *stips*, a gift, donation, alms (given in small coin), and *pendere*, to weigh out], a fixed pay, salary; retribution for work done; the income of an ecclesiastical living. In canon law stipend is a general designation of means of support (*sustentatio congrua* or *congrua*) provided for the clergy. In the early ages of the Church no special provision was made for the maintenance of the clergy. St. Paul, the tent-maker, set the example (I Cor., iv, 12) of earning his own livelihood. In imitation of him many clerics worked at some craft or followed some profession, living by the labour of their own hands. Even in the fifth and sixth centuries there were bishops, priests, and deacons, who in keeping with the advice of the Fourth Council of Carthage (a. 398, cann. 52, 53) supported themselves by their own labour. Early legislation (Canon. Apost., can. 6), which forbade the clergy to take up certain occupations and professions, is an indication that clerics sought to maintain themselves. Many of the laity, however, even from the beginning, were quick to follow the instructions of Christ and his Apostles (Matt., x, 10; Luke, x, 7; I Cor., ix, 13; I Tim., v, 17-18), founded on the practice in vogue among the Jews (Lev., xxvii, 30 sq.; Num., xviii, 23 sq.; etc.), who gave tithes of all their goods and produce for the sustenance of priests and levites. Thus did the laity provide for the bodily welfare of the clergy in return for the spiritual gifts received through their ministry. Later the payment of tithes was frequently insisted on by St. Ambrose, St. Augustine, and others (Thomassin, "Vet. et nov. eccl. disc.," III, II, xii, xiv). The Synods of Tours (560) and Mâcon (586) strenuously exhorted the faithful to pay the tithes ordained by God. Charlemagne made their payment obligatory on his subjects by a royal ordinance of 779, the requirements of which he himself faithfully observed. The obligation of giving tithes has long since ceased almost universally, but the faithful, of course, must contribute to the proper support of sacred ministers.

The voluntary offerings of the people made on Sundays and other occasions were also intended in part for the maintenance of clerics, that they might not be compelled to engage in pursuits which might ill become the ecclesiastical state or withdraw the clergy from their spiritual work. In most countries the offerings of the laity still constitute the chief support of the clergy. A quasi-contract obtains between the parish on the one hand and the clergy who minister to its wants on the other. Pastor and assistants are engaged in the work of the parish and receive in return a definite salary from the income or revenues of the parish. These revenues are derived from pew-rental, offerings, collections, subscriptions, and whatever other sources of income the parish may possess. Clerics engaged in teaching or other work not parochial are supported in much the same way, obtaining a salary from the institution by which they are employed. The salary (*congrua*) of pastors and assistants should be a fixed sum, such as will suffice for their necessities. The amount paid will depend on various circumstances of time, place, persons, income of the parish, and duties of the incumbent. The Council of Trent (Sess. XXIV, c. 13, de ref.) directs bishops to arrange the *congrua* in the most convenient way. Salaries of pastors in the United States are determined in diocesan synods or otherwise with the advice of the diocesan consultors (Conc. Plen. Balt. III, n. 273). Stole fees (jura stolæ), or perquisites received on the occasion of the administration of the sacraments or sacramentals, are not in the nature of stipends. At times, nevertheless, by diocesan regulations, they form a portion of the salary of pastor and assistants.

In regard to so-called state aid of the clergy, the State began indirectly to help the clergy in the time of Constantine, who gave a legal existence to churches as corporate bodies, permitting them to receive donations and legacies and to hold the same in perpetuity (Cod. Theod., XVI, 2, 4). He ordered contributions of grain to be given annually to the clergy out of the public granaries. He contributed large sums from his own resources for the support of the clergy in Africa, and exempted the Church from imposts in an edict imposing a general tax (Cod. Theod., XI, i, 1). Direct support of the clergy by the State is of comparatively modern origin, having developed since the Reformation. It obtains particularly in Catholic countries that have entered into a concordat, or treaty, with the Holy See for the support of the clergy. This support is in recompense, far inadequate indeed, for the sequestration of ecclesiastical funds and property. Austria, Spain, Italy, and certain countries of Central and South America thus directly support the clergy, paying salaries to bishops, vicars-general, pastors, and assistants. France and Portugal, as well as Cuba, Porto Rico, and the Philippines, when under Spanish rule, did the same.

Since the time of Constantine the right of the Church to possess temporal goods has been universally acknowledged and protected by civil governments with some exceptions. These exceptions refer chiefly to bequests and legacies. The possession by the Church of temporal goods and the surrendering of the same to the clergy for their sustenance gave rise to benefices, the fruits or income of which constitute the chief provision for the maintenance of the clergy possessing them. The fruits of a benefice will maintain the incumbent, even though he have private means of support. He should have not only what is necessary for sustenance, but sufficient for fitting recreation and hospitality, and a modest portion for future contingencies: he may also assist near relatives to some extent. If anything remain, it is to be used in charitable works. Ecclesiastical goods are not to be bequeathed in any considerable quantity to profane purposes. There are other methods in vogue for the support of the clergy akin to, or divisions of, those mentioned: voluntary offerings, tithes, quasi-contracts, state aid, and benefices. Stipends for the application of Masses were originally intended for the daily maintenance of the celebrant. (For treatment of the Mass-stipend see MASS, SACRIFICE OF THE.) It is in this latter sense that the word is mostly used at present, though it occasionally designates certain allowances made from ecclesiastical foundations in favour of students seeking a more special or more profound training in the arts or sciences. (See BENEFICE; ENDOWMENT; TITHES.)

ANDREW B. MEEHAN.

Stockholm, the capital of the Kingdom of Sweden, is situated on Lake Maelar at the spot where it opens into the Saltsjö, a rocky bay of the Baltic 59° 20′ N. lat. The city, through which flows the short but fine river the Norrström, is built partly on islands, partly on heights, on both banks of the river, from which there is a view over Maelar and the Saltsjö. It is claimed that Stockholm was founded by Birger Jarl (d. 1266), and the coat of arms of the city still bears the picture of King St. Eric (d. 1160). The city has a population of 341,986 and is the court residence of the king and the seat of the government, of the diplomatic corps, and of the vicar Apostolic. The entrance to Stockholm is defended by the fortresses Oscar Fredriks Borg and Waxholm. It is the seat of the chief military authorities of the fourth and fifth military districts, including artillery, cavalry, infantry, and transport, and is a station of the fleet. As the capital it is the seat of the central administration of the kingdom, and contains the supreme court, the Svea upper court, the national royal bank, the mint, and exchange. As regards administration the city of Stockholm forms a separate district, which is ruled by a governor and is distinct from the Province of Stockholm (Stockholms län). The city has burgomasters, magistrates, and a common council of one hundred members. The importance of the city in regard to commerce, manufactures, and shipping is shown by the following statistics of the year 1908: value of imports, 157,966,681 kronen; value of exports, 45,934,890 kronen; factories, 732, with 29,948 workmen and an output of the value of 166,540,075 kronen. The shipping trade of the city is carried on by 249 ships of 124,037 tons. The vessels over ten tons which call at the port of Stockholm number 36,338.

Schools of higher learning in Stockholm are the Högskola, a free college founded in 1878, the Caroline medico-surgical institute, founded in 1815, the military academy, the academy for the artillery and engineering corps, the academy for music (1771), the academy of fine arts (1773), the technical high school, and the commercial high school. The learned societies are the Swedish Academy, with eighteen members, founded by Gustavus III in 1786; the Academy of Sciences, founded in 1739; the Nobel Institute, which has an endowment of over thirty million kronen; the Royal Library, containing over 300,000 volumes; and the observatory. The most important public buildings are the royal castle, built in the Renaissance style, one of the finest works of the celebrated Swedish architect Count Nicodemus Tessin the Younger (d. 1728); the Parliament building; the House of the Swedish Nobility, where the council of nobles formerly met, built in the Renaissance style of 1661; the royal opera house and royal theatre; the national museum, with picture and sculpture galleries; the Northern Museum, with collections to illustrate the ethnography and development in civilization of the Scandinavian peoples; the Skansen, a large open-air museum and zoölogical garden. The Northern Museum and the Skansen were founded by Dr. A. Hazelius (d. 1901). The chief public statues are those of Birger Jarl, Gustavus Vasa, Gustavus II Adolphus, Charles XII, and Charles XIII, both of these last mentioned statues being in the "Kungsträdgärden", Gustavus III, Charles XIV, a statue of Linnæus in a park bearing his name, and one of Berzelius.

Stockholm has very few buildings belonging to the Middle Ages, as the finest of this era, the monasteries and churches, were either disfigured or torn down at the introduction of the Reformation. Thus, for example, Gustavus Vasa had the churches of St. Mary Magdalen, St. Clara, and St. Jacob torn down; after his death they were rebuilt in the style of a later period. This king also caused the choir of the Church of St. Nicholas (Storkyrkan) to be shortened. This church, founded about 1260, is one of the finest monuments still in existence of the Catholic period of Stockholm. The Riddarholm church, originally the church of a Franciscan monastery, is the burial place of the Swedish kings. The Protestant church buildings of Stockholm belong to a large number of different Protestant denominations. The State Church is Lutheran; among the other denominations represented are: the followers of Waldenström, Baptists, Methodists, Irvingites, Adventists, the Salvation Army, Mormons, etc. Many of the adherents of these sects have not withdrawn officially from the State Church.

There are in Stockholm about 1800 Catholics, for whom there are two Catholic churches, that of St. Eugenia, in Norra Smedjegatan, and that of St. Eric, in Götgatan. The Catholic cemetery has a chapel called St. Joseph's. The vicar Apostolic for Sweden lives at St. Eric's; the present vicar Apostolic is Dr. A. Bitter, titular Bishop of Doliche. Catholic elementary schools are connected with both churches. A higher school for girls is under the care of the French Sisters of St. Joseph. The Sisters of St. Elizabeth devote themselves to the care of the sick and have also charge of two asylums, Oscars Minne and Jozefinahemet. It was not until recent times that the two Catholic churches of Stockholm were built, St. Eugenia in 1837 and St. Eric in 1892, and schools established. From the introduction of the Reformation to the edict of toleration issued by Gustavus III in 1781 public Catholic worship was forbidden. Mass could be said only in the private chapels of the foreign ambassadors at Stockholm, and attendance at these services was forbidden to Lutherans under severe penalties. Conversion was punished by expulsion from the country and confiscation of goods. As late as 1858 six women who had returned to the Catholic Church were expelled from the country. It was not until 1860 that a restricted religious liberty was granted in Sweden. Thus, for example, institutions and foundations of denominations not belonging to the State Church cannot hold real estate in the country without royal permission. Monasteries are forbidden. By the royal edict of 1910 the names of Catholics are to be entered in the Lutheran Church books by the Lutheran pastors of the State Church, and Catholics must apply to these pastors for their marriage certificates.

G. ARMFELT.

Stöckl, ALBERT, neo-Scholastic philosopher and theologian, b. at Möhren, near Freuchtlingen, in Middle Franconia, Bavaria, 15 March, 1823; d. at Eichstädt, 15 November, 1895. He received his classical education at the *gymnasium* at Eichstädt, studied philosophy and theology at the episcopal lyceum in the same city (1843-48), and was ordained priest 22 April, 1848. His first position was that of curate at the pilgrimage church at Wemding. In 1850, he was made instructor of philosophy at the episcopal lyceum at Eichstädt, and two years later was appointed professor of theoretical philosophy in the same institution. He received the Degree of Doctor of Philosophy (1855) from the University of Würzburg; and was transferred (1857) to the theological section of the lyceum as professor of exegesis and Hebrew. In the autumn of 1862 he accepted a call as professor of philosophy at the academy of Münster in Westphalia. The disagreeable divisions and discord which arose in this institution at the time of the Vatican Council led Stöckl, in the summer of 1871, to resign his professorship and return to the Diocese of Eichstädt as parish priest at Gimpertshausen. On 7 March, 1872, he was installed as a cathedral canon at Eichstädt. At the same time he again became professor of practical philosophy, philosophy of religion, and pedagogy in the lyceum. In addition to his labours as a scholar Stöckl also took an active part in political life. From 1878 to 1881 he was a member of the lower house of the Reichstag. During the many years of his life spent in teaching, Stöckl wrote a large number of text-books covering the entire field of philosophy which had a large circulation not only in Germany but also in other countries, including the United States of America. As one of its most distinguished representatives, he had an important share in the revival of Thomistic philosophy. Both as teacher and as author he was noted for simplicity, logical acumen, and lucidity.

Among his numerous writings the following should be mentioned particularly: "Liturgie und dogmatische Bedeutung der alttestamentlichen Opfer" (Ratisbon, 1848); "Die speculative Lehre vom Menschen und ihre Geschichte" (Würzburg, 2 vols., 1858–59); "Die Lehre der vornicänischen Kirchenväter von der göttlichen Trinität" (Eichstädt, 1861, in the "Programm" of the lyceum); "Das Opfer nach seinem Wesen und nach seiner Geschichte" (Mainz, 1861); "Geschichte der Philosophie des Mittelalters" (3 vols., Mainz, 1864–66); "Lehrbuch der Philosophie" (Mainz, 1868; 7th ed., 3 vols., 1892; 8th ed., revised by G. Wohlmuth, 1905—); "Lehrbuch der Geschichte der Philosophie" (Mainz, 1870; 3rd ed., 2 vols., 1888; tr. "Handbook of the History of Philosophy", by T. A. Finlay, S.J., Dublin, 1887); "Die Infallibilität des Oberhauptes der Kirche und die Zustimmungsadressen an Herrn von Döllinger" (Münster, 1870; 2nd ed., 1870); "Grundriss der Aesthetik" (Mainz, 1871; 3rd ed., 1889, under the title, "Lehrbuch der Aesthetik"); "Grundriss der Religionsphilosophie" (Mainz, 1872; 2nd ed., 1878); "Lehrbuch der Pädagogik" (Mainz, 1873; 2nd ed., 1880); "Lehrbuch der Geschichte der Pädagogik" (Mainz, 1876); "Der Materialismus geprüft in seinen Lehrsätzen und deren Consequenzen" (Mainz, 1877); "Das Christenthum und die grossen Fragen der Gegenwart auf dem Gebiete des geistigen, sittlichen und socialen Lebens. Apologetisch-philosophische und socialpolitische Studien" (3 vols., Mainz, 1879-80); "Geschichte der neueren Philosophie von Baco und Cartesius bis zur Gegenwart" (2 vols., Mainz, 1883); "Das Christenthum und die modernen Irrthümer. Apologetisch-philosophische Meditationen" (Mainz, 1886); "Geschichte der christlichen Philosophie zur Zeit der Kirchenväter" (Mainz, 1891); "Grundzüge der Philosophie" (Mainz, 1892; 2nd ed., edited by Ehrenfried, 1910); "Grundriss der Geschichte der Philosophie" (Mainz, 1894); "Lehrbuch der Apologetik" (2 pts., Mainz, 1895). Stöckl contributed numerous papers on apologetic, philosophico-historical, and pedagogical subjects to the periodical press, especially to "Der Katholik". He also wrote a large number of articles for the second edition of the "Kirchenlexikon", and several of the longer articles for the "Staatslexikon der Görres-Gesellschaft".

FRIEDRICH LAUCHERT.

Stoddard, CHARLES WARREN, American author, b. 7 August, 1843, at Rochester, N. Y.; d. 23 April, 1909, at Monterey, California. He was descended in a direct line from Anthony Stoddard of England, who settled at Boston, Mass., in 1639. While he was still a child his parents moved to New York City, where they lived till 1855, when they migrated to San Francisco, California. In 1857 he returned alone to New York, lived with his grandparents for two years, and then rejoined his family in San Francisco. In a short time he began writing verses, which he sent anonymously to a local newspaper. They met with great success and were later published with the modest title "Poems by Charles Warren Stoddard". Poor health compelled him to give up his plans for a college education. He tried the stage, but soon realized that such a life was not his calling. In 1864 he visited the South Sea Islands and from there wrote his "Idyls" —letters which he sent to a friend who had them published in book form. "They are," as Mr. Howells says, "the lightest, sweetest, wildest, freshest things that were ever written about the life of that summer ocean." He made four other trips to the South Sea Islands, and gave his impressions in "Lazy Letters from Low Latitudes" and "The Island of Tranquil Delights". Several times he visited Molokai, and became well acquainted with Father Damien, the Apostle to the Lepers, and wrote his interesting little book, "The Lepers of Molokai", which, with Stevenson's famous letter, did much to establish Father Damien's true position in public esteem. In 1867, soon after his first visit to the South Sea Islands, he was received into the Catholic Church, for which he had a most tender devotion. The story of his conversion he has told in a small book interestingly written: "A Troubled Heart and How it was Comforted". Of this book he has said: "Here you have my inner life all laid bare." To this change in his religious belief are due in great measure those genial optimistic qualities that endeared him to all who knew him.

In 1873 he started on a long tour as special correspondent of the "San Francisco Chronicle". His commission was a roving one, without restrictions of any kind. He was absent for five years, during which he travelled over Europe and went as far east as Palestine and Egypt. He sent considerable matter to his newspaper, much of which was never reprinted, though some of it was among his best work. In 1885, having decided to settle down, he accepted the chair of English literature in the University of Notre Dame, Indiana; but owing to ill-health he soon resigned. The same reason caused him to resign a corresponding position which he held in the Catholic University, Washington, D. C., from 1889 to 1902. In a short time he moved to Cambridge, Mass., intending to devote himself exclusively to literary work. A serious and almost fatal illness interfered with his plans, yet he was not idle. He put forth his "Exits and Entrances", a book of essays and sketches which he called his favourite work, probably because it told of his intimate friend Stevenson and of others among his host of literary acquaintances. At this time he also wrote his only novel, "For the Pleasure of His Company", of which he said, "Here you have my Confessions." So strictly biographical are most of his writings that Stoddard hoped by supplying a few missing links to enable the reader to trace out the whole story of his life. In 1905 he returned to California and settled in Monterey with a hope of recovering his health. He lingered on till 1909, when he died in his sixty-sixth year. To superficial observers he was a man of contradictions. He was essentially Bohemian, but of the higher type, a man who could not resist the call of the far-away land, his home, as he himself said, being always under his hat. And yet he was a mystic and a recluse even in his travels. "Imaginative and impressionable", two epithets which he applied to his South Sea friends, are particularly appropriate to Stoddard himself.

That charm of his traits which may be described as "sweetness, peacefulness, tenderness, gentleness" he imparted to his writings. Noted English authors have given the highest praise to some of his work, and have taken to task the American public for their lack of appreciation of him. Besides the books already mentioned he wrote: "Summer Cruising in the South Seas" (1874); "Marshallah, a Flight into Egypt" (1885); "A Trip to Hawaii" (1885); "In the Footprints of the Padres" (1892); "Hawaiian Life" (1894); "The Wonder Worker of Padua" (1896); "A Cruise under the Crescent" (1898); "Over the Rocky Mountains to Alaska" (1899); "Father Damien, a Sketch" (1903); "With Staff and Scrip" (1904); "Hither and Yon"; "The Confessions of a Reformed Poet" (1907); "The Dream Lady" (1907).

M. J. Flaherty.

Stoics and Stoic Philosophy.—The Stoic School was founded in 322 B. C. by Zeno of Cittium and existed till the closing of the Athenian schools (A. D. 429). (It took its name from the Στοὰ ποικίλη, the painted hall or colonnade in which the lectures were held.) Its history may be divided into three parts: (1) *Ancient Stoicism;* (2) *Middle Stoicism;* (3) *New Stoicism.* (1) *Ancient Stoicism* (*322–204*).—Zeno of Cittium (b. 366; d. in 280) was the disciple of Crates the Cynic and the Academicians Stilpo, Xenocrates, and Polemon. After his death (264), Cleanthes of Assium (b. 331; d. 232) became head of the School; Chrysippus of Soli (b. 280) succeeded and was scholarch till 204. These philosophers, all of Oriental origin, lived at Athens, where Zeno played a part in politics and were in communication with the principal men of their day. The Stoic doctrine, of which Zeno laid the foundations, was developed by Chrysippus in 705 treatises, of which only some fragments have been preserved. In addition to the principles accepted by all the thinkers of their age (the perception of the true, if it exist, can only be immediate; bodies alone exist; the wise man is self-sufficient; the political constitution is indifferent), derived from the Sophists and the Cynics, they base the entire moral attitude of the wise man (conformity to oneself and nature, indifference to external things on a comprehensive concept of nature, in part derived from Heraclitus, but inspired by an entirely new spirit. It is a belief in a universal nature which is at one and the same time Fate infallibly regulating the course of events (*εἱμαρμένη, logos*); Zeus, or providence, the external principle of finality adapting all other things to the needs of rational beings; the law determining the natural rules that govern the society of men and of the gods; the artistic fire, the expression of the active force which produced the world, one, perfect, and complete from the beginning, with which it will be reunited through the universal conflagration, following a regular and ever recurring cycle. The popular gods are different forms of this force, described allegorically in the myths. This view of nature is the basis of the optimism of the Stoic moral system: confidence in the instinctive faculties, which, in the absence of a perfect knowledge of the world, ought to guide man's actions; and again, the infallible wisdom of the sage, which Chrysippus tries to establish by means of a dialectic derived from Aristotle and the Cynics. But this optimism requires them to solve the following problems: the origin of the passions and the vices; the conciliation of fate and liberty; the origin of evil in the world. On the last two subjects they propounded all the arguments, that were advanced later up to the time of Leibniz.

(2) *Middle Stoicism* (*second and first centuries* B. C.).—Stoicism during this period was no longer a Greek School; it has penetrated into the Roman world, and became, under the influence of Scipio's friend, Panætius (185–112), who lived at Rome, and of Posidonius (135–40), who transferred the School to Rhodes, the quasi-official philosophy of Roman imperialism. Its doctrines were considerably modified, becoming less dogmatic in consequence of the criticism of the new Academician, Carneades (215–129). In Stoic morality Panætius develops the idea of humanity. Posidonius is at once a savant, historian, geographer, mathematician, astronomer, and a mystic who, commenting on Plato's works, revives his theories on the nature and destiny of the soul.

(3) *New Stoicism* (to A. D. 429).—The new Stoicism is more ethical and didactic. Science is no longer the knowledge of nature, but a kind of theological *summa* of moral and religious sentiments. Very little has been preserved of the short popular treatises and discourses, wherein, with a vivid style introduced under the influence of the Cynic diatribe, the philosopher endeavoured to render his ethical principles practical. The letters of Seneca (2–68) to Lucilius, the conversations of Musonius (time of Nero), and of Epictetus (age of Domitian), the fragments of Hierocles (time of Hadrian), the memoirs of Marcus Aurelius (d. 180), give but an incomplete idea. Stoicism, which gradually disappeared as the official School, was the most important of the Hellenic elements in the semi-oriental religions of vanishing paganism.

Emile Bréhier.

Stolberg, Friedrich Leopold, Count zu, b. at Brammstedt in Holstein (then a part of Denmark), 7 November, 1750; d. at Sondermühlen near Osnabrück, 5 December, 1819. He belonged to the younger branch of the Stolberg family and was the son of a Danish magistrate and owner of a manorial estate. A few years after his birth the family moved to Copenhagen and soon formed friendships with distinguished literary men, especially Klopstock. Klopstock was then at the height of his fame and the fundamental principles which he held, devotion to God and country, made a deep impression on the young Stolberg. Stolberg's religious ideas, it must be acknowledged, remained at first somewhat misty and confused, as his parents held to an eclectic form of Christianity and read for their own edification the most heterogeneous authors, as Augustine and Luther, Fénelon and Saurin, Zinzendorf and Young. Together with his brother Christian, Friedrich Leopold went to the University of Halle in 1770, in order to study law. His other studies embraced the classics and various historical courses. Two years later the two brothers went to Göttingen, where they joined the little company called the "Hainbund", a society of young men who had high aspirations for the freedom of the country, and who cultivated German poetry. Some of the poetry by the members of the "Bund", has a permanent value. However, besides Bürger, Hölty, and Voss, of all the members of the "Bund" only Stolberg has, in reality, not been forgotten, and his name continues to live less on account of his literary productions than because of his conversion to Catholicism.

After completing his studies at the university Stolberg made a journey in Switzerland with Goethe and Count von Haugwitz in 1775. Here, besides meeting other distinguished persons, he became acquainted with Lavater, with whom he formed a lasting friendship. In 1777 he entered the service of the Protestant Prince-Bishop of Lübeck, and was for a while the bishop's envoy at the Danish Court. Somewhat later, in 1781, he was chief administrator at Eutin and in 1785 magistrate at Neuenburg in the Duchy of Oldenburg. Four years after this he was the Danish ambassador at Berlin. In 1791 he was appointed president of the board of ecclesiastical administration of the Prince-Bishop of Lübeck, and in 1797 he was sent as ambassador to Russia. On 1 June, 1800, he joined the Catholic Church in the private chapel of the Princess Gallitzin at Osnabrück, and on 22 August he resigned his various positions. After this he lived first at Münster in Westphalia, then from 1812 at Tatenhausen near Bielefeld, and finally from 1816 at Sondermühle near Osnabrück, where he died after a short illness. He was buried in the cemetery at Stockkempen. Stolberg was twice married. His first wife, Agnes von Witzleben, died on 11 November, 1788, after six years of happy married life, leaving two sons and two daughters. Two years later Stolberg married Countess Sophie von Redern. After their marriage he and his wife took a long journey through Germany, Switzerland, and Italy. This tour was of great importance for his religious development, as he then made the acquaintance of the devout Catholic Freiherr von Droste-Vischering, as well as of Droste-Vischering's resident tutor, the distinguished theologian Katerkamp. By his second marriage Stolberg had a large family, and all, with the exception of the oldest daughter, followed the father's example and joined the Catholic Church in 1801. The oldest daughter, Agnes, was betrothed to the Lutheran Count Ferdinand of Stolberg-Wernigerode, but her son in 1854 became a Catholic. Four sons and two sons-in-law took part in the campaign against France in 1814; one of these sons was killed at Ligny (1815).

Stolberg's change of religion attracted great attention. Many of his numerous friends deserted and some abused him, such as Gleim, Jacobi, and others, or attacked him with bitter hatred as Voss in his pamphlet "Wie ward Fritz Stolberg ein Unfreier?" He was charged, and this charge is even now repeated, with having been a Catholic for years before he publicly left the Protestant Church. Men who judged of the facts as they were, as Freiherr von Stein, Goethe, and especially Lavater, looked on his conversion in a kindly spirit and imputed no ignoble motives to him. They were entirely justified in so doing, for even after his conversion and notwithstanding his genuine piety Stolberg was never able to rid himself altogether of the syncretism of the paternal home. Both in days of good and ill health he sought edification, after his conversion as before, from Protestant hymns and sermons. Even when dying, besides the prayers and hymns of the Church, he had read aloud to him Klopstock's poems and passages from the writings of the "Wandsbecker Boten", the well-known freemason, Claudius. He was also a warm friend of the later Bishop Sailer. Sailer's orthodoxy was doubted in his own day, but without reason; whatever be thought of his peculiar mysticism, he was a strong believer in the primacy of the pope, and a defender of the Church against State encroachments.

As regards Stolberg's literary works, there is no doubt that the quantity exceeded the quality. They may be divided thus: translations, as "Homer" (1778) "Plato" (1796); "Æschylus" (1802); poetry, as "Ballads" (1779), "Iambics" (1784), "Plays" (1787); "Travels" (1791); novels, as "The Island" (1788). After his conversion he devoted himself chiefly to the preparation of a "Geschichte der Religion Jesu Christi" (1806—), which is marked by a warmth of tone, although not without errors in investigation. He also wrote a history of Alfred the Great (1816); a life of St. Vincent de Paul; translated passages from the works of St. Augustine, and also wrote meditations on the Holy Scriptures, which, however, together with the "Büchlein der Liebe", and the polemical pamphlet "Kurze Abfertigung des langen Schmähschrifts des Hofrats Voss", did not appear until after his death. At first Stolberg's muse was entirely influenced by the ideas of Klopstock. However, the poet soon abandoned the antique poetic measures and successfully adopted German rhyme. Most of his poetry is now out of date and scarcely half-a-dozen of his "Lieder" are known to the present generation. In his own day his translations from the classics were considered well done. At times credulity and lack of critical discernment mar his descriptions of travel and historical writings. Probably his best work is contained in his devotional writings, but even these are not entirely satisfactory, especially the translation of the numerous passages from the Bible, which at times are not very correct.

See the histories of German literature, both the earlier histories and the more modern ones; of the modern ones, in particular the works of ENGEL and BARTELS; of the earlier histories: MENZEL, *Deutsche Dichtung*, III (Stuttgart, 1824), 175 sqq.; BRÜHL, *Gesch. der kath. Lit. Deutschlands vom XVII. Jahrhundert bis zur Gegenwart* (Leipzig, 1854), 73–128. Of other works: MENZEL, *Neuere Geschichte der Deutschen*, XII, pt. Voss* (Münster, 1891); ROSENTHAL, *Convertitenbilder*, I (Ratisbon, 1889), 1–49.

PIUS WITTMANN.

JOSEPH, son of the poet Friedrich Leopold, b. 12 August, 1804; d. 5 April, 1859. In 1849 he was president of the general assembly of Catholic Associations held at Ratisbon (2–5 October). At this congress the St. Boniface Association was founded, and Stolberg was elected its first president. In the winter of 1849–50 he made a laborious journey to all the episcopal sees of Germany, and until his death was constantly active in the interests of the association. Since 1904 his son Hermann (b. at Westheim in Westphalia, 28 February, 1854) has been president of the St. Boniface Association.

KATHARINA, sister of Friedrich Leopold, b. at Bramstedt, 5 December, 1751; d. at Peterswaldau, 22 February, 1832. Gifted with a highly poetical nature, she was one of the most learned women of her age. As she was most devotedly attached to her brother and lived with him after the death of his wife, his conversion aroused in her an intense struggle between her love for him and her Evangelical belief. In 1802 she also joined the Catholic Church; however, new mental struggles followed, and finally she returned to Protestantism.

Klemens Löffler.

Stole, a liturgical vestment composed of a strip of material from two to four inches wide and about eighty inches long. It has either a uniform width throughout, or is somewhat narrower towards the middle, widening at the ends in the shape of a trapezium or spade. A small cross is generally sewed or embroidered on the stole at both ends and in the middle; the cross, however, is prescribed only for the middle, where the priest kisses the stole before putting it on. There are no express precepts concerning the material of the stole, but silk, or at least a half-silk fabric, is most appropriate. Stoles for festivals are generally ornamented with embroidery, especially what are called "vesper stoles".

Stole Found in St. Cuthbert's Tomb

Present Use.—The stole is worn only by deacons, priests, and bishops. For deacons and priests it is the specific mark of office, being the badge of the diaconal and priestly orders. The wrongful use of the stole by subdeacons, therefore, would imply the usurpation of a higher order, and would constitute an irregularity. Deacons wear the stole like a sash, the vestment resting on the left shoulder and thence passing across the breast and back to the right side. The stole of the priest extends from the back of the neck across the shoulders to the breast, where the two halves either cross each other or fall down straight according as the stole is worn over the alb or the surplice. The stole is worn by a bishop in the same manner as a priest, except that it is never crossed on the breast, as a bishop wears the pectoral cross. As a mark of order the stole is used in a special ceremony, at the ordination of deacons and priests. At the ordination of deacons the bishop places it on the left shoulder of the candidate, saying: "Receive from the hand of God the white garment and fulfil thy duty, for God is mighty enough to give thee His grace in rich measure." At the ordination of priests the bishop draws the part of the stole that rests at the back of the candidate's neck forward over the breast and lays the two ends crosswise, saying: "Receive the yoke of the Lord, for His yoke is sweet and His burden is light." The Sacred Congregation of Rites has given a large number of decisions concerning the use of the stole. As a general rule it may be stated: the stole is only used, and must be used, at a function peculiar to the deacon, priest, and bishop, a function that presupposes the order (e. g., at the celebration of Mass, when the Blessed Sacrament is touched, when the sacraments are administered), but not for example, in processions or at Vespers. The wearing of the stole by the bishop at Solemn Vespers is an exception; its use by a priest while preaching depends on local custom. The stole is not a specific mark of parochial jurisdiction.

The use of the stole is also customary in the Oriental rites, in which, as in the West, it is one of the chief liturgical vestments (Greek, ὠράριον, the deacon's stole, and ἐπιτραχήλιον, the priest's stole; Armenian, *urar;* Syrian and Chaldaic, *uroro;* Coptic, *batrashil*). According to present Oriental custom the stole is a strip of silk about seven or eight inches wide, having at the upper end a hole through which the head is inserted; it is either undivided (Syrian, Coptic, and Armenian custom) or opens down the front from the opening for the head (Greek custom). Among the Chaldeans (Nestorians) the stole of the priest resembles that used in the West, and is, like this, crossed over the breast. The deacon's stole generally hangs down straight from the left shoulder both in front and at the back, but in certain rites is first wound like a sash around the breast and back. Among the Syrians and Chaldeans the subdeacon also uses the stole, but he first twists it like a scarf around the neck, the ends being then let hang from the left shoulder in front and behind.

History.—We possess few references to the stole anterior to the ninth century. In the East, however, it is mentioned very early, the deacon's stole being frequently referred to even in the fourth and fifth centuries. The priest's stole is not mentioned in the East until the eighth century. The stole is first mentioned in the West in the sixth and seventh centuries (Synod of Braga, 563; Fourth Council of Toledo, 633; Gallican explanation of the Mass), but then as a thing which had long been in use. The earliest evidences of the use of the stole at Rome date from the second half of the eighth century and the beginning of the ninth. But in the ninth century, subdeacons and acolytes still wore both the planeta and the stole, although, to distinguish them from the deacons, priests, and bishops, there were definite limitations to their use of the latter vestment. After the ninth century the stole is very frequently mentioned, and even then the manner of its use was essentially the same as to-day. In the ninth and tenth centuries in the Frankish Empire the priests were commanded to wear the stole constantly as a badge of their calling, especially when on a journey. In Spain and Gaul in the pre-Carlovingian period, the deacons wore the stole over the tunic like the Greeks; in Southern Italy this practice was continued until at least the thirteenth century; at Milan the stole is still worn over the dalmatic. The custom for the priests to wear the stole crossed in front of the breast at Mass was known as early as the Synod of Braga (675), but did not become general until the late Middle Ages.

Development.—Very little is known concerning the nature of the stole in the pre-Carlovingian period. Originally it was probably a cloth folded into the form of a band, and gradually developed into a simple band. In the eleventh and twelfth centuries the stole was very long, and at the same time extremely narrow. It was customary, even in the ninth century, to ornament the ends with fringe, tassels, or little bells. Towards the thirteenth century the ends came to be trapezium-shaped; in the fourteenth century this shape disappeared, and until the sixteenth century the stole was a strip of material of uniform width, and only ornamented with fringe at the ends. During the course of the sixteenth century it began again to be customary to broaden the ends of the stole; the eighteenth century produced the ugly stoles, in which the ends seemed to spread out into huge spades; these were also called "pocket stoles". It was not until the sixteenth century that it became customary to place a cross in the centre and at the ends of the stole; in the Middle Ages this practice was unusual.

ORIGIN.—Various hypotheses have been suggested concerning the origin of the stole. The theory formerly universally held, but quite wrong, that it originated in the ornamental trimming of a garment called "stole", which in the course of time disappeared leaving behind only this trimming, has been abandoned. The theory that traced the stole to the Jewish praying mantle has also been given up. At the present time the stole is either traced back to a liturgical napkin, which deacons are said to have carried, or to a neckcloth formerly peculiar to priests, or it is regarded as a liturgical badge (introduced at the latest in the fourth century) which first came into use in the East, and then in the West. It was also brought, as it would seem, to Rome, where it was not at first adopted as a badge of the higher orders of the clergy, but as a distinctive mark of the Roman clergy in general. The giving of the stole to the candidate at ordination in Rome was intended to convey a double symbolism; first, that the elevation to the clergy of the Roman Church occurred *de benedictione S. Petri,* and secondly that by ordination the candidate entered the service of St. Peter, that is of the Roman Church. It was also customary before the ordination to lay the *oraria* upon the *Confessio* of St. Peter. This liturgical badge was called *orarium* on account of its similarity to the secular *orarium* both in shape and material, and in the way it was worn. (For further details as to the various hypotheses concerning the origin of the name, cf. J. Braun, "Die liturgische Gewandung", 608–20.) The name "stole", as the designation of the *orarium,* is of Gallic origin, not Roman. As early as the ninth century the expression "stole" prevailed in the Frankish Empire; it made its entrance into Italy about the tenth century, and here also came rapidly into general use. From the thirteenth century the name *orarium* appears only in isolated instances.

JOSEPH BRAUN.

Stolz, ALBAN ISIDOR, Catholic theologian and popular author, b. at Bühl, Baden, 3 Feb., 1808; d. at Freiburg, 16 Oct., 1883. He first studied at the gymnasium at Rastatt (1818-27), and then proceeded to the University of Freiburg, where, after attending lectures in jurisprudence for a brief period, he devoted himself to the study of theology (1827-30). Owing to the unfortunate condition of the theological faculty of Freiburg, he fell into scepticism, and could not bring himself to enter the clerical seminary; but after studying philology at Heidelberg from 1830 to 1832 he regained his former faith. Having determined to embrace the clerical state, he entered the ecclesiastical seminary at Freiburg in the autumn of 1832, and in August, 1833, was ordained to the priesthood. During the following eight years he was engaged in parochial work, being curate first at Rothenfels in the Murgthal, and from June, 1835, at Neusatz, in the District of Bühl. In the autumn of 1841 he was appointed instructor in religion at the gymnasium of Bruchsal, and on 1 March, 1843, teacher of moral and pastoral theology at the theological college of Freiburg. From May, 1845 he was temporary director of this institution, but his appointment as permanent director was prevented by opponents holding Liberalistic views. In 1845 he became doctor of theology, and in the autumn of 1847, despite the opposition to his appointment, was made professor of pastoral theology and pedagogics at the university. On 13 October, 1848, he was named ordinary professor, and during 1859-60 he was rector of the university. He was made honorary doctor of the theological faculty of the University of Vienna in 1865, and in 1868 archiepiscopal spiritual counsellor. In both the charitable and social fields Stolz displayed a great and successful activity; in 1851 he founded at Freiburg the Catholic Journeymen's Association after the model of Kolping's, and conducted it as director and later as diocesan president. He likewise introduced into Freiburg the Society of St. Vincent de Paul, of which he remained director until his death. He devoted all the receipts from his writings to the assistance of the poor and charitable institutions, to the needs of the Church, and to home and foreign missions.

As a theologian Stolz was too self-opinionated, his theological teachers having failed to give him any fundamental training, and he lacked the exact knowledge of the achievements of earlier theology. Hirscher's writings, for which he had an unbounded veneration, were his chief authority. For the teaching of practical subjects, however, he was admirably qualified, and numerous theological students from foreign parts, especially Switzerland, came to Freiburg to attend his scholarly and suggestive lectures. Of his writings in the theological domain we may mention: "Katechetische Auslegung des Freiburger Diöcesan-Katechismus (Hirscher's Katechismus) für Geistliche, Lehrer und Eltern" (3 vols., Freiburg, 1844-47); "Ueber die Vererbung sittlicher Anlagen" (University Report, Freiburg, 1859); "Erziehungskunst" (Freiburg, 1873; 7th ed. by Julius Mayer, 1910); "Homiletik als Anweisung den Armen das Evangelium zu predigen", published by Jakob Schmitt after the author's death (Freiburg, 1885; 2nd ed., 1899).

In the domain of popular religious literature, Stolz acquired imperishable fame. Gifted and original, a keen observer of human nature, a master of language with every shade of expression at command, he united a broad sense of humour and an effective satire with a deep sincerity of religious feeling, a delicacy in the portrayal of conditions of the soul, and a poetical force and beauty in his descriptions of nature. Among his works, which, besides being published in Germany, have been translated into French, English, Italian, and other languages, his "Kalender für Zeit und Ewigkeit", written for the years 1843-47, 1858-59, 1864, 1873-81, and 1884, has been most widely read, these discourses were collected and issued in four volumes under the titles "Kompass für Leben und Sterben" (1861 and frequently); "Das Vaterunser und der unendliche Gruss" (1861); "Wachholder-Geist gegen die Grundübel der Welt: Dummheit, Sünde und Elend" (1879); "Die Nachtigall Gottes" (1888). Very popular also is his "Legende oder der christliche Sternhimmel" (in parts, 1851-60; 12th ed. in 1 quarto vol., 1904; 10th ed. in 4 octavo vols., 1894). With this must be associated another ascetico-religious work, "Die heilige Elisabeth" (1865; 16th ed., 1909), which many consider the ripest work of Stolz. As the fruits of his travels in Spain in 1850 he published (1853) the brilliant and highly humorous work "Spanisches für die gebildete Welt" (12th ed., 1908); his pilgrimage to the Holy Land in 1855 resulted in "Besuch bei Sem, Cham und Japhet, oder Reise in das Heilige Land" (1857; 10th ed., 1909). The works "Witterungen der Seele" (1867; 7th ed., 1910), "Wilder Honig" (1870;

4th ed., 1908), and "Dürre Kräuter" (1877; 4th ed., 1908), consist of excerpts from his diaries.

Stolz also wrote a number of pamphlets and brochures, some of polemical and some of moral and ascetical contents, collected under the title of "Kleinigkeiten" (2 collections, 1868 and 1887; 4th ed., 1909). His works were issued in nineteen volumes in Freiburg (1871-95), exclusive of the "Legende" and the explanation of the catechism; a popular edition of his works has appeared in twelve volumes (1898-1909). From his papers were edited an autobiography, "Nachtgebet meines Lebens. Nach dem Tode des Verfassers herausgegeben und durch Erinnerungen an Alban Stolz ergänzt von Jakob Schmitt" (Freiburg, 1885; 2nd ed., 1908), and "Predigten" (ed. Julius Mayer, Freiburg, 1908). Another valuable contribution is the correspondence of Stolz with the convert, Julie Meineke, edited by Mayer under the title "Fügung und Führung" (Freiburg, 1909). Extracts from the writings of Stolz are given in the works "Edelsteine aus reicher Schatzkammer. Eine Sammlung schöner Stellen aus den Schriften von Alban Stolz. Ausgewählt von Heinrich Wagner" (Freiburg, 1905; 3rd ed., 1910), and "Bilder zur christkatholischen Glaubens- und Sittenlehre, aus den Schriften von Alban Stolz. Geistlichen und Lehrern sowie dem christlichen Volke gewidmet von Karl Telch" (Freiburg, 1909).

FRIEDRICH LAUCHERT.

Stone, CORNER OR FOUNDATION.—A rite entitled "De benedictione et impositione Primarii Lapidis pro ecclesia ædificanda" (Of the blessing and laying of the Foundation Stone for the building of a church) is provided in the Roman Pontifical. As it appears in the same form in the "Giunta Pontificale" of 1520, it is probably at least as old as the time of Patricius Piccolomini (fifteenth century), and it may in substance go back two centuries farther to the time of Durandus of Mende (see Catalani, "Pont. Rom.", II, 31). The rite itself is simple enough. Before the work of building a church is set about the rubric directs that adequate provision should be made for its maintenance, also the foundations are to be marked out subject to the approval of the bishop or his delegate, and a wooden cross set up to indicate the place where the altar is to stand. In the function which ensues the bishop first blesses holy water with the ordinary forms, then sprinkles the place where the cross stands and afterwards the foundation stone. Upon the stone itself he is directed to engrave crosses on each side with a knife, and then he pronounces the following prayer: "Bless, O Lord, this creature of stone [*creaturam istam lapidis*] and grant by the invocation of Thy holy name that all who with a pure mind shall lend aid to the building of this church may obtain soundness of body and the healing of their souls. Through Christ Our Lord, Amen." After the Litany of the Saints, followed by an appropriate antiphon and Psalm cxxvi, "Unless the Lord build the house" etc., the stone is lowered into its place with another prayer and again sprinkled with holy water. More antiphons and psalms follow, while the bishop once more visits and sprinkles the other foundations, dividing them into three sections and ending each little tour with a special prayer. Finally the "Veni Creator Spiritus" is sung, and two short prayers. Then the bishop, if he deems it opportune, sits down and exhorts the people to contribute to the fabric, after which he dismisses them with his blessing and the proclamation of an indulgence.

In the Middle Ages this or some analogous rite was not unknown, but the number of Pontificals which contain anything of the sort is comparatively small (Martène, for example, in his "De ritibus" gives no specimen of the forms used in any such function.) One of the few that provide such a rite is Archbishop Chichele's Pontifical, representing, no doubt, the use of Sarum in the early fifteenth century. The function in its details differs considerably from that just described. The only feature that is quite identical is the prayer above quoted, "Benedic, Domine, creaturam istam lapidis", for blessing the stone, but it is supplemented in the English rite by another and much longer prayer, containing many Scriptural allusions, among the rest, one to the "stone rejected by the builders". Moreover, in England the stone is anointed with chrism while a prayer is said which has reference to this ceremony. Of all this there is no trace in the Roman type of service.

It is not easy to assign a date to the beginning of this practice of blessing the foundation stone. An interesting fragment of evidence is, however, furnished by what is apparently the inscribed foundation stone of the first church of St. Mark at Venice. (See the paper of F. Douce in "Archæologia", xxvi, 217 sq.) As it is roughly circular in form, between six and seven inches in diameter, and only half an inch thick, we have probably to do with a tablet let into the foundation stone proper. It bears a rudely scratched head (of St. Mark?) and the inscription in ninth-century characters: ECCL. S. MARCI PRIMAM PETRAM POSVIT DUX IO. PARTICI [aco]; the rest is broken off. The Doge, John Particiaco, dedicated the first Church of St. Mark in A. D. 828. Of course this inscription does not make reference to any religious ceremony, but, as forms for the dedication of a church were employed much before this date, it seems unlikely that such a function should not have been accompanied by at least some simple form of ecclesiastical blessing. Moreover, the English liturgist Belethus in the twelfth century was evidently familiar with a rite of this kind. "When the foundations have been dug", he says, "it is necessary that the bishop sprinkle the place with holy water and that he himself, or some priest at his bidding, should lay the first stone of the foundation, which ought to have a cross engraved upon it. And it is absolutely necessary that the church should be built towards the east" (Belethus, ii; P. L., CCII, 10). Similar language is used by Sicardus (P. L., CCXIII, 17 and 20) and Durandus (Rationale, II, 7) less than a century later.

A question arises connected with the practice (1) of laying money upon the stone as a contribution to the fabric of the church and (2) of enclosing coins within or beneath it as evidence of the date. The former custom might not improbably be traced to the terms of the prayer quoted above, which, in blessing the foundation stone, in particular invokes special favours upon all "who with pure mind lend their aid to the building of this church". It is curious, however, that in the one detailed description which we possess of a pagan ceremony of the same sort, viz., that which preceded the restoration of the Roman Temple of Jupiter upon the Capitol in the time of Vespasian (Tacitus, "Hist.", IV, 53), we find not only that the foundations were washed with lustral water, but that attention was especially centred upon the great stone (*ingens saxum*) which was dragged into its place by magistrates and people together. Moreover, gold and silver in an unwrought and virgin state were scattered upon the foundations. Stranger still, a similar ceremony seems to have prevailed in ancient Assyria, where an inscription of Nabopolassar (604 B. C.) describes how that monarch, in building a temple to Merodach, cast gold and silver upon the foundations (Schrader, "Keilinschriftliche Bibliothek", III, ii, 5). Further, the ceremonial rite of laying a foundation stone seems to reach back to the time of Sargon, c. 3800 B. C. (ibid., pp. 85–93). The custom of placing coins in or under the foundation stone, now very general, needs further elucidation. The earliest definite instance at the moment discoverable is an entry in an account-book at Bruges, which records that, when the palace of the magistrates of the Franc was rebuilt in 1519, an angel (coin) was paid out to be placed under the foundation stone (W. H. J. Weale in "Notes and Queries", 27 Aug., 1870, p. 184). It is just conceivable that this burial of gold and silver may represent a more primitive form of sacrifice in which a human victim was immolated and buried under the masonry; but the evidence of any widespread custom of this barbarous kind is by no means so conclusive as is maintained by such writers as Tylor (Primitive Culture, 1903, I, p. 104 sq.) and Trumbull (The Threshold Covenant, pp. 45–57).

For the ecclesiastical function see CATALANI, *Commentary on the Pontificale Romanum*, II (Rome, 1739), 1–32; SAUER, *Symbolik* (Ratisbon, 1902), 114 sq. Cf. also DOUCE in *Archæologia*, XXVI (London, 1836), 217 sq.; TRUMBULL, *The Threshold Covenant* (Edinburgh, 1896), 45–57.

HERBERT THURSTON.

Stone, MARY JEAN, b. at Brighton, Sussex, in 1853; d. at Battle, Sussex, 3 May, 1908. She was educated at a Calvinist school in Paris and at Aschaffenburg in Germany, where she acquired an intimate knowledge of French, German, and Italian. In Germany Miss Stone was brought into touch with the Catholic religion, and exchanged Protestantism for the "free atmosphere", as she expressed it, of the Catholic Church. She was received into the Church by Monsignor Ketteler, then Bishop of Mainz. Her historical studies, for which, perhaps, she is best known to the public, were, on her return to England, encouraged by the fathers of the Society of Jesus. Her talent and painstaking method of research earned for her a speedy recognition in her "Mary the First, Queen of England" (1901). This is a study of the unhappy queen which takes first rank amongst historical monographs. Miss Stone also wrote "Faithful unto Death", a study of the martyrs of the Order of St. Francis during the Reformation period (1892); "Eleanor Leslie", a memoir of a notable Scottish convert to the Church (1898); "Reformation and Renaissance", a group of studies on the periods indicated (1904); "Studies from Court and Cloister", reprinted essays, of which perhaps the most interesting are those on "Margaret Tudor", "Sir Henry Bedingfeld", and a "Missing Page from the Idylls of the King" (1905); "The Church in English History", a higher textbook for teachers of history (1907). Her "Cardinal Pole", begun for the St. Nicholas Series, was interrupted by her death. She was a frequent contributor to the greater periodicals, the "Dublin Review", "Month", "Blackwood's", "Cornhill", etc., and contributed several articles to THE CATHOLIC ENCYCLOPEDIA.

G. FLADGATE.

Stone, MARMADUKE, Jesuit, b. at Draycot, 28 Nov., 1748; d. at St. Helens, 21 Aug., 1834. He was educated at St. Omers, shared in its historic exodus to Bruges, 10–17 August, 1762 (see SAINT OMER, COLLEGE OF), entered the Society of Jesus in 1767, later became a master at the Liège Academy. In 1790 he succeeded as president to Father William Strickland, who then became procurator at London; with his assistance Father Stone succeeded in peacefully guiding the English ex-Jesuits through more than a score of tempestuous years (see MILNER, JOHN; POYNTER, WILLIAM). Father Stone's confrères, though held together by a common vocation and their still uncancelled vows, were not allowed by the brief of suppression to reunite for purposes of government. He could therefore only rule by appealing to conscience; no easy task when one remembers the exterior difficulties, the adventuresome ardour that animated the young men of his college staff, and the peculiar ways into which the middle-aged missionaries were prone to subside. When dealing with the bishops, he could claim no rights, not even those essential to religious bodies. Fortunately, they were not hostile, though their views on Jesuit property and privileges caused Father Stone much trouble.

On 14 July, 1794, the College at Liège was transferred to Stonyhurst (q. v.). In spite of the magnitude of the task, it was accomplished in good order; and schools reopened 22 October following. A rescript from Propaganda (14 Feb., 1796) confirmed Stonyhurst in all the privileges of Liège. Though it was impossible to hope for a restoration of the Society during the Revolutionary and Napoleonic wars, it was not impracticable to work for a reunion with the Russian Jesuits, whose corporate existence had lately been recognized at Rome. In this Father Stone was successful. On 19 May, 1803, having made his profession, he was declared provincial, and admitted others to their vows, for England, Ireland, and Maryland; on 29 September a novitiate was opened at Hodder. Rome, however, gave no public recognition of the restored order, though the pope privately expressed his pleasure. When the Bull of Restoration finally came (7 August, 1814), the interpretation was added (2 Dec., 1816), that it was to apply only where the secular government wished: in England, therefore, the Jesuits were to be regarded as still in their old position (see SOCIETY OF JESUS). The college had grown enormously since its transfer to England and the Jesuit missions had prospered steadily. Father Stone, notwithstanding his years, continued to act as college minister till 1827, when he finally retired to St. Helens. Here the good news reached him (1829) that the English Jesuits had at last been formally recognized. Though he might not look an ideal leader, Father Stone was wonderfully adapted to his circumstances; his unfailing kindness, simplicity, sincerity, patience, and self-devotion were irresistible. If he acted slowly, he made no mistakes; he was capable of undertaking great enterprises, and of carrying them through with strong tenacity of purpose.

Correspondence at Stonyhurst and elsewhere; GERARD, *Stonyhurst College* (1894); FOLEY, *Records S.J.*, vii, 741; WARD, *The Dawn of the Catholic Revival* (London, 1909); IDEM, *The Eve of Catholic Emancipation* (London, 1912).

J. H. POLLEN.

Stones, PRECIOUS, IN BIBLE.—Precious stones are stones remarkable for their colour, brilliancy, or rarity. Such stones have at all times been held in high esteem everywhere, particularly in the East. We gather from various passages of Sacred Scripture that very early the Orientals appropriated them for divers ornamental uses: rings, bracelets, collars, necklaces; the crowns of kings as also their garments and those of their officers and of the priests were set with precious stones. The Hebrews obtained their precious stones from Arabia, India, and Egypt. At the time of the Exodus Egypt was flooded with riches, and we know how the Israelites on leaving the land possessed themselves of many precious stones, according to the commandment of God (Ex., iii, 22; xii, 35–36). Later when they were settled in Palestine they could easily obtain stones from the merchant caravans travelling from Babylonia or Persia to Egypt and those from Saba and Reema to Tyre (Ezech., xxvii, 22) Solomon even equipped a fleet which returned from Ophir laden with precious stones (III Kings, x, 11).

The precious stones of the Bible are chiefly of interest in connexion with the breastplate of the high-priest (Ex., xxviii, 17–20; xxxix, 10–13), the treasure of the King of Tyre (Ezech., xxviii, 13), and the foundations of the New Jerusalem (Tob., xiii, 16–17, in the Greek text, and more fully, Apoc., xxi, 18–21). The twelve stones of the breastplate and the two stones of the shoulder-ornaments seem to have been considered by the Jews as the most precious; they undoubtedly serve as the standard of whatever is beautiful and rich beyond measure; both Ezech., xxviii, 13, and Apoc., xxi, 18–21, are patterned after the model of the rational; no wonder therefore that the stones entering its composition should have been the objects of a considerable amount of literature from the fourth century. That such a literature should have arisen is of itself convincing proof that the identification of the stones was no easy problem to solve. It must be remembered too that at the time of the Septuagint translation the stones to which the Hebrew names apply could no longer be identified, and the translators rendered the same Hebrew name by different Greek words. So also did Josephus who, however, claimed he had seen the actual stones. This, coupled with the fact that the late Biblical lists, although visibly depending on that of Exodus, exhibit here and there notable changes, makes the task of identifying the stones a very arduous one. It should be noticed that the ancients did not classify their precious stones by analyzing their composition and crystalline forms: names were given them from their colour, their use, or the country from which they came. Thus it happens that stones of the same or nearly the same colour, but of different composition or crystalline form, bear identical names. Another difficulty is due to the names having changed in the course of time: thus the ancient chrysolite is our topaz, the sapphire is our lazuli, etc. However, we know most of the stones accounted precious in Egypt, Assyria, and Babylonia. Owing to the neighbourhood and to the influence of these countries on Palestine, it is highly probable that the score of substances called in the Bible "desirable stones" (Is., liv, 12) must be contained in the fairly long list of the precious and ornamental stones of the Assyro-Babylonians and the Egyptians.

This is not the place to enter upon a critical and exegetical discussion of the Biblical passages above referred to, where lists of precious stones are given. It will be sufficient to treat briefly of these stones according to the alphabetical order of the English names.

Agate, Heb. שׁבו; Sept. ἀχάτης; Vulg. *achates* (Ex., xxviii, 19; xxxix, 12, in Heb. and Vulg.; also Ezech., xxviii, 13, in Sept.).—This is the second stone of the third row of the rational, where it very probably represented the tribe of Aser. The derivation of the Hebrew word is doubtful, but the stone has generally been acknowledged to be the agate. Fürst (Hebr. u. Chald. Wörterb.) derives שׁבו from שׁבב, "to flame"; it may also be related to Saba (שׁבא), whence caravans brought the stone to Palestine. The Greek and Latin names are taken from the river Achates, the modern Dirillo, in Sicily, where this stone was first found (Theophrastus, "De lapid.", 38; Pliny, "Hist. nat.", XXXVII, liv). The stone belongs to the silex family (chalcedony species) and is formed by deposits of siliceous beds in hollows of rocks. To this mode of formation are due the bands of various colours which it contains. Its conchoidal clevage is susceptible of a high polish. To this stone various medicinal powers were attributed until far into the Middle Ages. It was supposed to render the action of all poisons void, to counteract the infection of contagious diseases; if held in the hand or in the mouth it was believed to alleviate fever. The eagle, it was said, placed an agate in its nest to guard its young against the bite of venomous animals. The red agate was credited with the power of sharpening the vision. At present agate and onyx differ only in the manner in which the stone is cut; if it is so cut as to show the layers of colour, it is called agate; if cut parallel to the lines, onyx. Formerly an agate that was banded with well-defined colours was the onyx. The banded agate is used for the manufacture of cameos.

Amethyst, Heb. אחלמה; Sept. ἀμέθυστος, also Apoc., xxi, 20, where it is the twelfth and last stone of the foundation of the New Jerusalem. It is the third stone in the third row of the rational, representing the tribe of Issachar (Ex., xxviii, 19; xxxix, 12); the Septuagint enumerates it among the riches of the King of Tyre (Ezech., xxviii, 13). The Greek name alludes to the popular belief that the amethyst was a preventive of intoxication; hence beakers were made of amethyst for carousals, and inveterate drinkers wore amulets made of it to counteract the action of wine. Abenesra and Kimchi explain the Hebrew אחלמה in an analogous manner, deriving it from חלם, to dream; חלם in its first meaning signifies "to be hard" (Fürst, Hebr. Handwörterbuch). We have no reason to doubt the accuracy of the translation since we find a general agreement among the various versions; Josephus (Ant. Jud., III, vii, 6) also has "amethyst"; the Targum of Onkelos and the Syriac Version have "calf's eye", indicating the colour. The amethyst is a brilliant transparent stone of a purple colour resembling that of diluted wine and varying in shade from the violet purple to rose. There are two kinds of amethysts: the oriental amethyst, a species of sapphire, is very hard (cf. Heb., חלם), and when colourless can hardly be distinguished from the diamond; the occidental amethyst is of the silex family, hence different in composition from the oriental stone. But the identity of names is accounted for by the identity of colour. The occidental amethyst is easily engraved. It is found of various sizes. Its shape is different from the round pebble to the hexagonal, pyramid-capped crystal.

Beryl, Heb. יהלם; Sept. βήρυλλος; Vulg. *beryllus*.—In the breastplate this stone occupied the third place of the second row and was understood to represent Nephtali (Ex., xxviii, 19; xxxix, 13); according to the Septuagint it is the second of the fourth row, and third of the fourth according to the Vulgate; Ezech., xxviii, 13, mentions it in the third place; it is cited also in the Greek text of Tob., xiii, 17, but is wanting in the Vulgate; Apoc., xxi, 20, gives it as the eighth stone of the foundation of the New Jerusalem. There is great difference of opinion as to the exact Hebrew correlative of this word. The best supported is יהלם, though שׁהם also does not lack probability. ישׁפה has likewise been suggested, but without sufficient reason, it seems, for to this Hebrew ישׁפה must correspond jasper, Gr. ἴασπις, Lat. *jaspis*. This mistaken idea most probably arose from the supposition that the translated words must have occupied the same position as in the original. This is not the case, as a comparison of the the Greek and Latin translations shows; in the Vulgate, indeed, we find jasper in the same position as ישׁפה, whereas the Greek βήρυλλος does not correspond to the Latin *beryllus;* the same may have happened as regards the translation of the Hebrew into Greek, especially as in the old manner of writing the two words יהלם and ישׁפה might be easily confused. The authority of Josephus is here of little weight, for he most likely quoted from memory, the position of the words being at variance even in his two lists (Bell. Jud., V, v, 7; Ant. Jud., III, vii). Our choice, therefore, is limited to the two words יהלם and שׁהם. By comparing various texts of the Vulgate—the Greek is very inconsistent—we find that שׁהם is always translated by onyx: this alone seems sufficient to render fairly probable the opinion that beryl corresponds to Heb. יהלם. That the beryl was among the stones of the rational appears beyond doubt since all translations mention it. The etymology giving us no special help, by elimination we come to the generally accepted conclusion that beryl and יהלם stand for each other. The beryl is a stone composed of silica, alumina, and glucina. The beryl and the emerald are of the same species. The difference between the beryl, the aqua marine, and the emerald is determined by the colouring matter and the peculiar shade of each. The beryl, though sometimes white, is usually of a light blue verging into a yellowish green; the emerald is more transparent and of a finer hue than the beryl; as a gem, it is more beautiful, and hence more costly; the aqua marine is a beautiful sea-green variety. The emerald derives its colour from a small quantity of oxide of chromium; the beryl and aqua marine from a small quantity of oxide of iron. The beryl occurs in the shape either of a pebble or of an hexagonal prism. It is found in metamorphic limestone, slate, mica-schist, gneiss, and granite. In ancient times it was obtained from Upper Egypt and is still found in the mica slate of Mt. Zaborah, The largest beryls known have been found in Acworth and Grafton, New Hampshire, and in Royalston, Massachusetts, United States of America; one weighs 2900 lb., measures 51 inches in length, 32 inches through in one direction and 22 in another transverse. The beryl has been employed for cabalistic uses (Aubrey, "Miscellanies").

CARBUNCLE, Heb., נֹפֶךְ; Sept. *ἄνθραξ* (Ex., xxviii, 18; xxxix, 11; Ezech., xxviii, 13; omitted in Ezech., xxvii, 16); Vulg., *carbunculus* (Ex., xxviii, 18; xxxix, 11; Ezech., xxviii, 13), *gemma* (Ezech., xxvii, 16), the first stone of the second row of the rational; it represented Juda, and is also the eighth stone mentioned of the riches of the King of Tyre (Ezech., xxviii, 13), being, not a native product, but an object of importation (Ezech., xxvii, 16); it is perhaps the third stone of the foundation of the celestial city (Apoc., xxi, 19). The ancient authors are far from agreeing on the precise nature of this stone. It very probably corresponds to the *ἄνθραξ* of Theophrastus (De lap., 18), the *carbunculus* of Pliny (Hist. nat., XXXVII, xxv), the *charchedonius* of Petronius, and the *ardjouani* of the Arabs. If so it is a red glittering stone, probably the Oriental ruby, though the appellation may have been applied to various red gems. Theophrastus says of it: "Its colour is red and of such a kind that when it is held against the sun it resembles a burning coal." This description tallies fairly well with that of the Oriental ruby. He relates also that the most perfect carbuncles were brought from Carthage, Marseilles, Egypt, and the neighbourhood of Siena. Carbuncles were named differently according to the places whence they came. Pliny (Hist. nat., XXXVII, xxv) cites the lithizontes, or Indian carbuncles, the amethystizontes, the colour of which approached that of the amethyst, and the sitites. Most probably, then, the name of carbuncle applied to several stones.

CARNELIAN, Heb. אֹדֶם from אָדַם, to be red, especially "red blooded"; Sept. and Apoc. *σάρδιον*; Vulg. *sardius;* the first stone of the breastplate (Ex., xxviii, 17; xxxix, 10) representing Ruben; also the first among the stones of the King of Tyre (Ezech., xxviii, 13); the sixth foundation stone of the celestial city (Apoc., xxi, 19). The word *σάρδιον* has sometimes been rendered sardonyx; this is a mistake, for the same word is equivalent to carnelian in Theophrastus (De lap., 55) and Pliny (Hist. nat., XXXVII, xxxi), who derive the name from that of the city of Sardes where, they say, it was first found. The carnelian is a siliceous stone and a species of chalcedony. Its colour is a flesh-hued red, varying from the palest flesh-colour to a deep blood-red. It is of a conchoidal structure. Usually its colour is without clouds or veins; but sometimes delicate veins of extremely light red or white are found arranged much like the rings of an agate. Carnelian is used for rings and seals. The finest carnelians are found in the East Indies.

CHALCEDONY, Apoc., xxi, 19, *χαλκηδών*; Vulg. *chalcedonius*, the third foundation stone of the celestial Jerusalem. Some claim the writing *χαλκηδών* is erroneous, and that it should be *χαρκηδών*, the carbuncle. Though this view is countenanced by but few MSS., yet it is not devoid of reason; for whilst the other eleven stones correspond to a stone in the rational it is singular that this should be the only exception. Moreover the ancients very often confounded the names of these two stones. The chalcedony is a siliceous stone. Its name is supposed to be derived from Chalcedon, in Bithynia, whence the ancients obtained the stone. It is a species of agate and bears various names according to its colour. It is usually made up of concentric circles of various colours. The most valuable of these stones are found in the East Indies. Sets for rings, seals, and, in the East, cups and beakers are made of chalcedon.

CHODCHOD, כַּדְכֹּד (Is., liv, 12; Ezech., xxvii, 16); Sept. *ἴασπις* (Is., liv, 12), *χορχόρ* (Ezech., xxvii, 16); Vulg. *jaspis* (Is., liv, 12), *chodchod* (Ezech., xvii, 16).—This word is used only twice in the Bible. The chodchod is generally identified with the Oriental ruby. The translation of the word in Is. both by the Septuagint and the Vulgate is jasper; in Ezech. the word is merely transliterated; the Greek *χορχόρ* is explained by considering how easy it is to mistake a ד for a ר. "What chodchod signifies", says St. Jerome, "I have until now not been able to find" (Comment. in Ezech., xxvii, 16, in P. L., XXV, 255). In Is. he follows the Septuagint and translates *chodchod* by *jaspis*. The word is probably derived from כִּיד, "to throw fire"; the stone was therefore brilliant and very likely red. This supposition is strengthened by the fact that the Arabic word *kadzkadzat*, evidently derived from the same stem as *chodchod*, designates a bright red. It was therefore a kind of ruby, likely the Oriental ruby, perhaps also the carbuncle (see above).

CHRYSOLITE, Heb. תַּרְשִׁישׁ (Ex., xxviii, 20; xxxix, 13; Ezech., i, 16; x, 9; xxviii, 13; Cant., v, 14; Dan., x, 6); Sept., *χρυσόλιθος* (Ex., xxviii, 20; xxxix, 13; Ezech., xxviii, 13); *θαρσίς* (Cant., v, 14: Dan., x, 6); *θαρσεὶς* (Ezech., 1, 16; x, 9); Vulg. *chrysolithus* (Ex., xxviii, 20; xxxix, 13; Ezech., x, 9; xxviii, 13; Dan., x, 6), *hyacinthus* (Cant., v, 14); *quasi visio maris* (Ezech., i, 16); Apoc., xxi, 20, *χρυσόλιθος*; Vulg. *chrysolithus*.—This is the tenth stone of the rational, representing the tribe of Zabulon; it stands fourth in the enumeration of Ezech., xxviii, 13, and is given as the seventh foundation stone of the celestial city in Apoc., xxi, 20. In none of the Hebrew texts is there any hint as to the nature of this stone; however, since the Septuagint habitually translates the Hebrew word by *χρυσόλιθος*, except where it merely transliterates it and in Ezech., x, 9, since, moreover, the Vulgate follows this translation with very few exceptions, and Aquila, Josephus, and St. Epiphanius agree in their rendering, we can safely accept the opinion that the chrysolite of the ancients, which is our topaz, was meant. The word *tharsis* very likely points to the place whence the stone was brought (Tharsis). The modern chrysolite is a green oblong hexagonal prism of unequal sides terminated by two triangular pyramids. The topaz, or ancient chrysolite, is an octangular prism of an orange-yellow colour; it is composed of alumina, silica, hydrofluoric acid, and iron. It is found in Ceylon, Arabia, and Egypt, and several species were admitted to exist (Pliny, "Hist. nat.", XXXVII, xlv). In the Middle Ages it was believed to possess the power of dispelling the fears of night and of driving away devils; it was also supposed to be an excellent cure for the diseases of the eye.

CHRYSOPRASUS, Greek *χρυσόπρασος*, the tenth foundation stone of the celestial Jerusalem (Apoc., xxi, 20). This is perhaps the agate of Ex., xxviii, 20, and xxxix, 13, since the chrysoprasus was not very well known among the ancients. It is a kind of green agate, composed mostly of silica and a small percentage of nickel.

CORAL, Heb. רָאמוֹת (Job, xxviii, 18; Prov., xxiv, 7; Ezech., xxvii, 16); Sept. *μετέωρα*, *ῥαμοθ*; Vulg. *excelsa*, *sericum*.—The Hebrew word seems to come from ראם or רום, "to be high", probably connoting a resemblance to a tree. It may be also that the name came from a strange country, as did the coral itself. It is obvious that the ancient versions have completely missed the sense; they even felt it so well that in one place they merely transliterated the Hebrew word. In Ezech., xxvii, 16, coral is mentioned as one of the articles brought by the Syrians to Tyre. The Phœnicians mounted beads of coral on collars and garments. These corals were obtained by Babylonian pearl-fishers in the Red Sea and the Indian Ocean. The Hebrews made apparently very little use of this substance, and hence it is seldom mentioned in their writings; this explains also the difficulty felt by the translators in rendering the word. Gesenius (Thesaurus, p. 1113) translates פנינים (Job, xxviii, 18; Prov., iii, 15; viii, 11; xx, 15; xxxi, 10; Lam., iv, 7) by "red coral"; but many maintain that the pearl is meant in these passages. The coral spoken of in the Bible is the precious coral (*corallum rubrum*), the formation of which is well known. It is a calcareous secretion of certain polyps, having a tree-like formation. At present coral is found in the Mediterranean, the northern coast of Africa furnishing the dark red, Sardinia the yellow or salmon-coloured, and the coast of Italy the rose-pink coral. One of the greatest coral-fisheries of the present day is Torre del Greco, near Naples.

Crystal, Heb. גביש (Job, xxviii, 18), קרח (Ezech, i, 22): both words signify a glassy substance; Sept. γαβίς; Vulg. *eminentia* (Job, xxviii, 18); κρύσταλλος, *crystallus* (Ezech., i, 22).—This was a transparent mineral resembling glass, most probably a variety of quartz. Job places it in the same category with gold, onyx, sapphire, glass, coral, topaz, etc. The Targum renders the קרח of Ezech. by "ice"; the versions translate by "crystal". We find crystal again mentioned in Apoc., iv, 6; xxi, 11; xxii, 1. In Ps. cxlvii, 17, and Ecclus., xliii, 22, there can be no question but that ice is meant. The word זכוכית, Job, xxviii, 17, which some translate by crystal, means glass.

Diamond, Heb. שמיר; Sept. ἀδαμάντινος; Vulg. *adamas, adamantinus* (Ezech., iii, 9; Zach., vii, 12; Jer., xvii, 1).—Whether or not this stone is really the diamond cannot be ascertained. Many passages in Holy Writ point indeed to the qualities of the diamond, especially its hardness (Ezech., iii, 9; Zach., vii, 12; Jer., xvii, 1). In the last Jeremias informs us of a use to which this stone was put, which agrees admirably with the use to which the diamond is put at this day: "The sin of Juda is written with a pen of iron, with the point of a diamond". But although diamond is used to engrave hard substances, yet it should be remarked that other stones may serve the same purpose. The Septuagint omits the passages of Ezech. and Zach., while the first five verses of Jer., xvii, are missing in the Cod. Vaticanus and Alexandrinus, but are found in the Complutensian edition and in the Syriac and Arabic Versions. Despite the qualities mentioned in the Bible, the stone spoken of in the places referred to may be the limpid corindon, which exhibits the same qualities, and is used in India for the same purposes as we use the diamond. The diamond was not very well known among the ancients; and if we add to this reason the similarity between the words σμίρις, the Egyptian *asmir*, "emery", a species of corindon used to polish precious stones, and שמיר, the Hebrew word supposed to mean the diamond, we may conclude with probability that the limpid corindon was intended. Aben-Esra and Abarbanel translate יהלם by "diamond"; but יהלם we have shown above to be the beryl. The diamond is made up of pure carbon, mostly of a white transparent colour, but sometimes tinted. The white diamond is the most precious, owing to its beauty and rarity. South Africa contains the largest diamond fields.

Emerald, Heb. ברקת; Sept. σμάραγδος; Vulg. *smaragdus;* the third stone of the rational (Ex., xxviii, 17; xxxix, 10), where it represents the tribe of Levi; it is the ninth stone in Ezech., xxviii, 13, and the fourth foundation stone of the celestial Jerusalem (Apoc., xxi, 19). The same precious stone is also mentioned in Tob., xiii, 16 (Vulg. 21); Jud., x, 21 (Vulg. 19); and in the Greek text of Ecclus., xxxii, 8, but there is no indication of it in the MS. B. of the Hebrew text, found in the Genizah of Cairo in 1896. That ברקת stands for "emerald" is verified by the fact that practically all versions, as well as Josephus (Ant. Jud., III, vii, 5; Bell. Jud., V, v, 7) translate it thus. The Hebrew root ברק, from which it is probably derived, signifies "to glitter", which quality agrees eminently with the emerald. The word may also come from the Sanskrit *marakata* which is certainly the emerald; the Greek form σμάραγδος is not so distant from the Hebrew that no similarity can be found between them. In Job, xiii, 21; Jud., x, 19; Ecclus., xxxii, 8; and Apoc., xxi, 19, the emerald is certainly the stone spoken of. The word נפך also has sometimes been translated by *smaragdus;* but this is a mistake, for נפך is the carbuncle. The emerald is a green variety of beryl and is composed of silicate of alumina and glucina. Its form is a hexagonal crystal; its colour is a brilliant reflecting green. The stone admits of a high polish. The emerald is found in metamorphic rocks, granites, and mica schists; the finest specimens come from Muzo, Bogotá, South America. The ancients obtained the stone from Egypt and India. It has sometimes been asserted that they knew nothing of the emerald; but this is plainly refuted by Pliny, Theophrastus, and others, though the name may have been used possibly for other stones. In the Middle Ages marvellous powers were attributed to the emerald, the most conspicuous being the power to preserve or heal the sight.

Hyacinth, Greek ὑάκινθος; Vulg. *hyacinthus* (Apoc., xxi, 20); the eleventh stone of the foundation of the heavenly city. It corresponds very probably to Heb., the ligurius of Ex., xxviii, 19; xxxix, 12 (St. Epiphan., "De duodecim gemmis" in P. G., XLIII, 300). The stone spoken of in Cant., v, 14, and called *hyacinthus* in the Vulgate is the Hebrew תרשיש, which has been shown above to be the chrysolite. The exact nature of the hyacinth cannot be determined, the name having been applied to several stones of similar colours, and most probably designating stones of the same colours as the flower hyacinth. Hyacinth is a zircon of a crimson, red, or orange hue. It is harder than quartz and its cleavage is undulating and sometimes lamellated. Its form is an oblong quadrangular prism terminated on both ends by a quadrangular pyramid. It was supposed to be a talisman against tempests.

Jasper, Heb. ישפה; Sept. ἴασπις; Vulg. *jaspis*; the twelfth stone of the breastplate (Ex., xxviii, 18; xxxix, 11), representing Benjamin. In the Greek and Latin texts it comes sixth, and so also in Ezech., xxviii, 13; in the Apocalypse it is the first (xxi, 19). Despite this difference of position *jaspis* is undoubtedly the ישפה of the Hebrew text. The jasper is an anhydrate quartz composed of silica, alumina, and iron. There are jaspers of nearly every colour. It is a completely opaque stone of a conchoidal cleavage. It seems to have been obtained by the Jews from India and Egypt.

Ligurus, Heb. לשם; Sept. λιγύριον; Vulg. *ligurius;* the first stone of the third row of the rational (Ex., xxviii, 19; xxxix, 12), representing Gad. It is missing in the Hebrew of Ezech., xxviii, 13, but present in the Greek. This stone is probably the same as the hyacinth (St. Epiphan., loc. cit.). This identification, admitted by tradition, rests on the remark that the twelve foundation stones of the celestial city in Apoc., xxi, 19–20, correspond to the twelve stones of the rational, from which it would appear that the ligurus is the same as the hyacinth. Some have identified it with the turmaline, a view rejected by most scholars.

Onyx, Heb. שהם; Sept. ὀνύχιον; Vulg. *lapis onychinus;* the eleventh stone of the breastplate in the Hebrew and the Vulgate (Ex., xxviii, 20; xxxix, 13), representing the tribe of Joseph; in the Sept. it is the twelfth stone; it is the fifth in Ezech., xxviii, 13, in the Heb., but the twelfth in the Greek; it is called sardonyx and comes in the fifth place in Apoc., xxi, 20. The exact nature of this stone is disputed. Many think, because the Greek word *βηρύλλος* occurs instead of the Hebrew שֹׁהַם that the beryl is meant; but this is not so (see Beryl above). The Vulgate indeed gives onyx as the equivalent of the Hebrew שֹׁהַם. True, this alone would be a very weak argument; but we have other and stronger evidences in the fact that the Hebrew word occurs frequently in Holy Writ (Gen., ii, 12; Ex., xxv, 7; xxv, 9, 27; I Par., xxxix, 2; etc.) and on each occasion, save Job, xxviii, 16, it is translated in the Vulgate by *lapis onychinus* (*lapis sardonychus* in Job, xxviii, 16). The Greek is very inconsistent in its translation, rendering שֹׁהַם differently in various texts; thus in Gen., ii, 12, it is *λίθος πράσινος*, *σάρδιος* in Ex. xxv, 7; xxxv, 9; *σμάραγδος* in Ex., xxviii, 9; xxxv, 27; xxxix, 6; *σοάμ*, a mere transcription of the Hebrew word in I Par., xxix, 2; and *ὄνυξ* in Job, xxviii, 16. The other Greek translators are more uniform: Aquila has *σαρδόνυξ*; Symmachus and Theodotion have *ὄνυξ*; the paraphrase of Onkelos had *būrla*, the Syriac *berūla*, both of which evidently are the Greek *βηρύλλος*, "beryl". Since the translations do not observe the same order as the Hebrew in enumerating the stones of the rational (see Beryl above), we are in no way bound to accept the Greek *βήρυλλος* as the translation of שֹׁהַם, and relying on the testimony of the various versions we may safely hold the onyx is the stone signified by שֹׁהַם. The onyx is a variety of quartz analogous to the agate and other crypto-crystalline species. It is composed of different layers of variously coloured carnelian much like banded agate in structure, but the layers are in even or parallel planes. Hence it is well adapted for the cutting of cameos and was much used for that purpose by the ancients. The colours of the best are perfectly well defined, and are either white and black, or white, brown, and black. The best specimens are brought from India. Sardonyx has a structure like onyx, but is composed usually of alternate layers of white chalcedony and carnelian, although the carnelian may be associated with layers of white, brown, and black chalcedony. The ancients obtained the onyx from Arabia, Egypt, and India.

Pearl.—The pearl can hardly be termed a stone; we may nevertheless, by giving the word "stone" a broad meaning, treat here of the pearl, as we have treated above of coral. It is comparatively certain that the pearl (Greek *μαργαρίτη*, Vulg. *margarita*) was known among the Jews, at least after the time of Solomon, as it was among the Phœnicians. What word designated it is uncertain. The following have been suggested: גָּבִישׁ, which, however, signified "crystal" (see above; also Furst, "Hebr. u. Chald. Wörterb."); פְּנִינִים, which Gesenius renders by "red coral"; דַּר, Esth.. i, 6, which is translated in the Vulg. by *lapis parius*, "marble"; the Arabic *dar*, however, means "pearl", and thus also Furst renders the Hebrew word. In the New Testament we find the pearl mentioned in Matt., xiii, 45, 46; I Tim., ii, 9; etc. The pearl is a concretion consisting chiefly of carbonate of lime found in several bivalve mollusks, but especially in the *avicula margaritifera*. It is generally of a whitish blue, sometimes showing a tinge of pink; there are also yellow pearls. This gem was considered the most precious of all among the ancients, and was obtained from the Red Sea, the Indian Ocean, and the Persian Gulf.

Ruby.—This may have been either the carbuncle or the chodchod (see above). There is, however, a choice between the oriental ruby and the spinel ruby; but the words may have been used indiscriminately for both. The former is extremely hard, almost as hard [illegible] the diamond, and is obtained from Ceylon, India, and China. It is considered a most precious gem.

Sapphire, Heb. סַפִּיר; Septuag. *σάπφειρον*; Vulg. *sapphirus*.—The sapphire was the fifth stone of the rational (Ex., xxviii, 19; xxxix, 13), and represented the tribe of Dan. It is the seventh stone in Ezech., xxviii, 14 (in the Hebrew text, for it occurs fifth in the Greek text); it is also the second foundation stone of the celestial Jerusalem (Apoc., xxi, 19). The genuine sapphire is a hyaline corindon of a beautiful blue colour; it is composed of nearly pure alumina, its colour being due to the presence of oxide of iron. The ancients gave the name of sapphire also to our lapis-lazuli, which is likewise a blue stone, often speckled with shining pyrites which give it the appearance of being sprinkled with gold dust. It is composed of silica, alumina, and alkali; it is an opaque substance easily engraved. Which of these two is referred to in the Bible? Both may be meant, but the lapis-lazuli seems more probable, for as often as its qualities are described, it is spoken of as being easily engraved (Lam., iv, 7; Ex., xxviii, 17; xxxix, 13). The sapphire was obtained from India.

Sardonyx; Sard.—These two words are often confounded by interpreters. The sard is the carnelian, while the sardonyx is a species of onyx.

Topaz, Heb. פִּטְדָה; Sept. *τοπάζιον*; Vulg. *topazius*, the second stone of the rational (Ex., xxviii, 17; xxxix, 19), representing Simeon; also the second stone in Ezech., xxviii, 13; the ninth foundation stone of the celestial Jerusalem (Apoc., xxi, 20); also mentioned in Job, xxviii, 19. This topaz is generally believed to have been the chrysolite rather than our topaz. The oriental topaz is composed of nearly pure alumina, silica, and fluoric acid; its shape is an orthorhombic prism with a cleavage transverse to its long axis. It is extremely hard and has a double refraction. When rubbed or heated it becomes highly electric. It varies in colour according to the country from which it comes. The Australian topaz is green or yellow; the Tasmanian clear, bright, and transparent; the Saxon pale violet; the Bohemian sea-green and the Brazilian red, varying from a pale red to a deep carmine. The ancients very probably obtained it from the East.

Charles L. Souvay.

Stoning in Scripture.—Palestine being a very rocky country, the abundance of stones made it natural to use them as missiles. Stone throwing might be merely a mark of hatred and contempt (II Kings, xvi, 6–13), or the means of carrying out murderous intentions against which provision had to be made in the Law (Ex., xxi, 18; Num., xxxv, 17). Stoning to death which was at first an expression of popular fury analogous to "lynching", later came to be a natural and legally recognized method of execution. It was thus regulated by law as an appointed means of capital punishment (Deut., xvii, 5–7; Acts, vii, 58). Death by stoning is prescribed in the Pentateuch as the penalty for eighteen different crimes including Sabbath-breaking, but for one crime only—murder—is it the penalty prescribed in all the codes. The execution of the criminal usually took place outside the city walls, and according to Deut., xvii, 7, the witnesses in the case were to cast the first stone: "Thou shalt bring forth the man or the woman, who have committed that most wicked thing, to the gates of thy city, and they shall be stoned. By the mouth of two or three witnesses shall he die who is to be slain. . . . The hands of the witnesses shall be first upon him to kill him, and

afterwards the hands of the rest of the people". (Deut., xvii, 5–7). Stoning is also mentioned in Acts, vii 57–58, as the means by which Stephen the first Christian martyr was put to death: "And casting him forth without the city, they stoned him."

James F. Driscoll.

Stonnes, James, English priest, b. 1513; d. after 1585. He was ordained at Durham by Bishop Tunstall in 1539. After Elizabeth's accession he never entered a church, but wandered about Durham and Yorkshire, with occasional visits to Lancashire, where he was known as Uncle James, saying Mass as often as the opportunity of time, place, and company gave leave. He was eventually arrested by the Earl of Derby about midnight 19 Nov., 1585, at the house of a very poor man, a victualler, and an under-tenant, living eight miles from the earl's seat, Newpark, in the Parish of Ormskirk, Lancashire. As he would not commit himself to the royal supremacy, though he acknowledged the queen as temporal sovereign, and wished she might have Nestor's years, and as he confessed that he regarded her ecclesiastical policy as contrary to God's law and refused to give up saying Mass, he was committed to the New Fleet, Manchester, where, as he was then aged 72, it is probable he died. At the time of his arrest he had with him, an alb, a surplice or amice, a thread girdle, a vestment, a stole, a fannel, "a Corpus and a Corpus Case", a super-altar, a tin chalice with a cover, three little pewter boxes in a leather case for oil and chrism, a crewet, two little pewter bottles for wine, three crucifixes, an Agnus Dei, "a porthouse with the pope's name in the Callender in many places", a piece of an old primer in parchment, a piece of an old book of sermons, and an old Mass-book.

John B. Wainewright.

Stonyhurst College.—The history of Stonyhurst as a school dates back to a period considerably prior to its foundation on English soil in 1794. Stonyhurst is the lineal descendant of the college founded by Father Robert Persons in 1592, at St. Omer in Artois, for English boys, compelled by the penal laws of Elizabethan times to seek on the continent that religious education which was denied them at home. Driven from St. Omer in 1762 by the hostility of the *Parlement* of Paris, the college was transferred to Bruges, where it remained under the protection of the Empress Maria Theresa till dispersed by the suppression of the Society in 1773. Within the same year, however, the staff and students had reassembled and continued their collegiate life at Liège under the patronage of the prince bishop of that city. The approach of the French revolutionary armies in 1794 again compelled the college to seek a new home, and this time it found one in its native land at the mansion of Stonyhurst Hall in Lancashire, which had been placed at the disposal of the community by Mr. Thomas Weld of Lulworth, heir of the Shireburns of Stonyhurst and himself a past student of the college at Bruges. By a strange coincidence Stonyhurst Hall had been rebuilt by Sir Richard Shireburn in 1592, the very year of the foundation of St. Omer; so that the scholastic life of the college, which has now been established at Stonyhurst for 117 years, but reaches back more than 200 years before that final settlement, is coeval with that of its present domicile.

The character of the education given at Stonyhurst has, needless to say, varied with the requirements of the time. The predominant position occupied by classical educational ideals in the earlier half of the nineteenth century—a predominance so congenial to the Ratio Studiorum of the Jesuits—has gradually been modified to meet the development of the study of modern languages and of science, and the demands of public examinations. Hence the curriculum of Stonyhurst at the present day differs in no essential particular from that of the leading public schools in England. It includes classical literature and the chief European languages, history, geography, mathematics, physics, chemistry, astronomy, philosophy, and law. At the Stonyhurst training college more advanced courses in these subjects are followed by students of the Society, who are engaged in such additional subjects as pedagogy, biology, anthropology, etc. The "Philosophers", numbering usually about thirty, possess the status of university students. They have private rooms and sundry privileges, and are quite separate from the rest of the school, though they may join the "Higher Line" in games. Their studies include courses of philosophy, law, and political economy, in addition to the usual literary and science classes. The rector of Stonyhurst is one of a limited number of headmasters to whom the War Office has granted the power of giving direct nominations to the Royal Military College, Sandhurst. This privilege is reserved for those schools where the officers' training corps—of which Stonyhurst has three full companies—attains a certain standard of strength. The college has also been inspected and approved by the Royal College of Physicians (London) and the Royal College of Surgeons (England) as a school for preparing candidates for medical diplomas and exempting them from part of their professional course.

The influence exerted in the course of its history on Church, State, science and art, by a college which has for so long held a prominent place in the education of English Catholics, may best be gauged by the number of distinguished *alumni* who have risen to eminence in these departments. Among the early sons of Stonyhurst, when the establishment was still at St. Omers, are eighteen martyrs now bearing the title of Venerable—fourteen Jesuits, three Franciscans, and one secular priest—besides three who died in prison for the Faith. Father Emmanuel Lobb, who received into the Church the Duke of York, afterwards James II, and Father Edward Petre, the confessor of the same king, were St. Omer men. The unspeakable Titus Oates also spent some time there as a kind of "parlour-boarder", and contemporary letters make it clear that he was intensely unpopular with the boys. The peculiar dress worn at that date by the boys of St. Omers is referred to by Massinger in his play "The Fatal Dowry". Conspicuous among the St. Omer men of a later date are the first two archbishops of Baltimore, John Carroll and Leonard Neale. In more modern times Stonyhurst counts among its pupils Cardinal Weld, Bishop Riddell (Vicar Apostolic of the Northern District), Cardinal Vaughan, Bishop William Vaughan of Plymouth, Bishop Clifford of Clifton, Archbishop Porter of Bombay, Archbishop Gillow of Puebla (Mexico), and Archbishop Maguire of Glasgow. Among distinguished laymen who received their education here may be mentioned Charles Waterton, the famous naturalist (the "W" of Thackeray's "Newcomes"); Richard Lalor Sheil, the great parliamentary orator; Sir Thomas Wyse, a well-known and successful diplomat of the last century; Chief Baron Woulfe of the Irish Court of Exchequer, the first Catholic to be elevated to the Irish Bench, and Judge Nicholas Ball, the second Catholic to enjoy that dignity; the Hon. Charles Langdale, one of the foremost Catholic leaders of Emancipation days; Dr. George Oliver, the antiquary and Church annalist; Sir Frederick Weld, successively Premier of New Zealand, Governor of Tasmania, and Governor of the Straits Settlements, in which last-named colony another Stonyhurst man, Sir Thomas Sidgreaves, was Chief Justice; Sir William Hackett, Chief Justice of the Supreme Court, Ceylon; the Rt. Hon. Sir Nicholas O'Conor, British Ambassador at St. Petersburg and at Constantinople; General Sir Montague Gerard, *doyen* of the foreign military attachés with the Russian army during the Russo-Japanese War; General Sir Charles Chichester, brigadier-general under General De Lacy Evans in the British Auxiliary Legion in Spain in 1835; Admiral Arthur Jerningham, who was attached to the personal guard of Queen Victoria during the alarms of the Chartist disturbance; the late Mr. Justice Walton; Edward de Romaña, a former president of Peru; Thomas Francis Meagher, the orator of the Young Ireland movement and subsequently a general on the Federal side during the American Civil War. To this selection may be added in the domains of literature and art Mr. Percy Fitz-Gerald, F.S.A., a personal friend of Charles Dickens, and author of many literary works; Father John Gerard, S.J., the widely known writer on scientific, historical, and controversial subjects; Bernard Partridge, the "Punch" cartoonist; Alfred Austin, the Poet Laureate.

The fame of the Stonyhurst Observatory, built in 1838, has been kept alive in scientific circles by a succession of distinguished astronomers, several of whom have been at various times selected by the British Government to take charge of important astronomical expeditions. The latest of these was the British Solar Eclipse Expedition to the Tonga Islands in 1911, which was placed under the charge of Father Cortie, one of the directors of the Stonyhurst Observatory. Perhaps the best known of the Stonyhurst astronomers is Father Stephen Perry, F. R. S., Francis Thompson's "starry amorist", who met his death in 1889 while engaged on solar observations for the Government in the West Indies. Among the contributions to Catholic literature the best known are the Stonyhurst Series of Philosophical Textbooks, written by members of the professorial staff: Father Harper's profound work, "The Metaphysics of the School"; and Father Gerard's various writings on natural science and evolution, the Gunpowder Plot, and his remarkably successful reply to Haeckel's "Riddle of the Universe": the works of Father Joseph Rickaby on philosophic and ascetical subjects and the liturgical and historical writings of Father Thurston.

Stonyhurst, which is to-day the largest of the Catholic colleges in England, is the parent of a number of other flourishing schools in Great Britain and Ireland, of which the following is a list together with the approximate number of boys in each: Beaumont College near Windsor, and Mount St. Mary's College in Derbyshire, with more than 200 boarders each; St. Francis Xavier's College, Liverpool, a day-school with nearly 400 boys; St Aloysius' College, Glasgow, with over 300 day scholars; Wimbledon College with some 150 scholars; St Ignatius' Day College, Stamford Hill, London, with about 250 boys; the day colleges at Preston and Leeds with about 150 boys each; and Clongowes Wood College, in Ireland, with 250 boarders. Including the Philosophers and the younger boys at the preparatory school, the total number of boarders at Stonyhurst to-day is 345, with a professorial staff of 40. At the training college the students number about 70, with 8 professors. The college buildings, which are very extensive, are furnished with libraries and museums, numerous lecture rooms, physical and chemical laboratories, observatories, recreation and music rooms, a theatre, swimming bath, carpenter's shops and covered drill-hall. In the large library, which contains over 40,000 volumes, there is a very valuable collection of incunabula, numbering 250, of which some are unique; a First Folio Shakespeare; some priceless manuscripts; and very complete geological, entomological, and other scientific collections. In the museums and other parts of the building are a large number of valuable engravings by Rembrandt and Dürer, together with art treasures in ivory, alabaster, and precious metals; relics of the days of persecution; paintings by some of the Old Masters; and vestments of great intrinsic and historical worth.

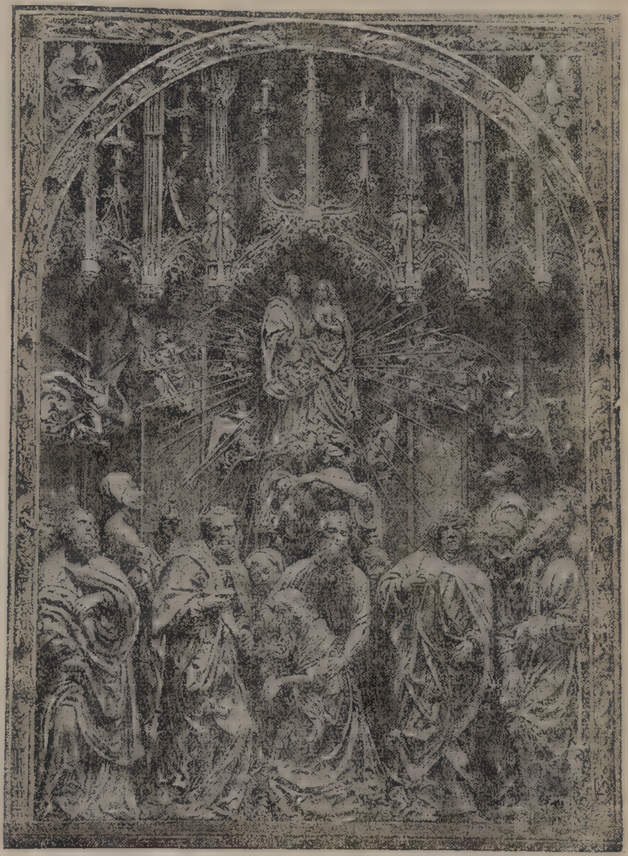
FRANCIS IRWIN.

Stork, AMBROSE. See PELARGUS, AMBROSE.

Stoss, VEIT, sculptor, b. at Nuremberg in 1438; d there in 1533. In 1477 he established a large workshop at Cracow, Poland, but in 1496 he returned to Nuremberg. With Adam Kraft and Peter Vischer, he is considered the most important representative of the late Gothic sculpture in Germany. A quick, skilful workman, of great technical ability, in his youth he carried naturalism to the extreme, while often there was a lack of spirituality. Perhaps this may be traced to a trait of his own character as in the documents of the same era he is spoken of as a "restless, unquiet citizen". A certain lack of repose is evident, especially in his treatment of the drapery, while in his entire handling of the figure he is very independent of the Gothic style and carries out his designs in his own manner throughout. His later works, however, show an undoubted depth of feeling. Moreover, the question as to the number of his productions is not yet satisfactorily settled; the latest investigation regards him as the creator of most of the works of the celebrated Vischer, whom it represents as merely the bronze-founder who carried out Stoss's designs. His earliest work (1477) is the celebrated altar of the Blessed Virgin in the Church of Our Lady at Cracow, which is made in three parts, as an altar with wings. In the centre is seen the almost life-size figure of the



DEATH AND ASSUMPTION OF THE BLESSED VIRGIN
Veit Stoss, Church of Our Lady, Cracow, 1477–84

Mother of God as she sinks dying into the arms of an Apostle. Another altar of his in this church has reliefs depicting six scenes in the life of St. Stanislaus. The fine qualities of this work, especially the animation of the portrayal and the effective composition, obtained for him in 1492 the commission of making the tomb of King Casimir IV in the Cathedral of Cracow. Probably, however, he only prepared the design of the marble sarcophagus; the king is represented in his coronation robes, while statuettes showing the people as mourners are placed on the sides. For unknown reasons Stoss returned to Nuremberg, where he accomplished a large amount of work; however, only a few of the works attributed to him are authentic, as in former times nearly every important piece of carving in southern Germany was ascribed to him. Perhaps his best work is the "Salutation of the Angel" in the Church of St. Laurence at Nuremberg (1518): the archangel, a finely conceived figure, and Mary, are surrounded by a huge wreath of roses in which are inwoven the Seven Joys of Mary; the figure of the Blessed Virgin is however somewhat commonplace. Other excellent but less celebrated productions are the memorial tablet of Konrad Imhoff, now in the national museum at Munich, and the reliefs of the Carrying of the Cross and the Burial of Christ in the Church of Our Lady at Nuremberg. Of the altars which he carved, mention should be made of those at Schwabach, Bamberg, and of that in the Church of St. Ægidius at Nuremberg.

BEDA KLEINSCHMIDT.

Stradivari, ANTONIO, the famous Cremonese violin-maker, b. in 1649 or 1650; d. at Cremona, 18 or 19 Dec., 1737. He was the son of Alessandro Stradivari and Anna Moroni. As there is no evidence of his birth and baptism in any of the parish registers of Cremona, it is supposed that he was born in some village near that town. In 1667 he began to make stringed instruments. Some violins, dated in the seventies, and signed by him, are supposed to exist, but evidences of Stradivari's workmanship are to be found in many violins of this date which are signed by Nicholas Amati. It is probable that during the years 1667–79 he worked as a pupil in Amati's workshop.

In 1680 Stradivari set up for himself in the Piazza San Domenico, and his fame as a violin-maker was soon established. He now began to show his originality, and to make alterations in Amati's model. The arching was improved, the various degrees of thickness in the wood were more exactly determined, the formation of the scroll altered, and the varnish more highly coloured. From 1698 to 1725 Stradivari produced his finest instruments, and carried his manufacture to the highest possible finish, the outlines are designed with taste and purity, the wood is rich and carefully selected, the arching falls off in gentle and regular curves, the scroll is carved with great perfection, and the varnish is fine and supple. The interior workmanship is no less perfect, the degrees of thickness are carefully adjusted, and are remarkable for a precision which could only have been attained by much study and experiment. Everything has been foreseen, calculated, and determined with certainty. The instruments produced from 1725–30 are not so fine. After 1730 many are signed "sub disciplina Stradivarii", and were probably made by his sons, Omobono and Francesco.

Stradivari fixed the exact shape and position of the sound-holes, and his model has been copied by most makers since his time. He definitively settled the shape and details of the bridge, which cannot be altered in the slightest degree without in some way injuring the tone of the instrument. The only essential part of the violin which has had to be changed since Stradivari's time is the bass-bar. On account of the gradual rise in pitch the increased pressure of the strings demands an increased power of resistance in the bar underneath the bridge, hence it has been found necessary to re-bar all the old violins and violoncellos. Stradivari was buried in the Basilica of San Domenico.

ELIZABETH LORKIN.

STRADIVARI FAMILY, THE.—The name Stradivari goes back to the Middle Ages; we find it spelt in various ways, Stradivare, Stradiverto, Stradivertus. Fétis professes to find it in the municipal archives of Cremona for the years 1127 and 1186. The name was certainly borne by more or less distinguished citizens of Cremona during the twelfth and thirteenth centuries. Signor Mandelli gives, as the earliest known mention of it, a document dated May 1188, in which it is recorded that certain pieces of land were leased by the canon and chief warden of the cathedral of Cremona to one Giovanni Stradiverto and his heirs. Arisi, the Cremonese monk, who wrote concerning Antonio Stradivari in 1720, mentions: Galiero Stradivari, a learned Orientalist, who lived in the thirteenth century; Alessandro Stradivari, another Orientalist, about the end of the thirteenth century; Costanzo Stradivari, of about the same period, a monk, who wrote a treatise on the natural philosophy of Aristotle. Fétis also mentions: Guglielmus Stradivertus, an excellent lawyer, who died in 1439. It is certain that the name was a common one in Cremona, but we have no exact evidence to prove that Stradivari, the violin-maker, was directly connected with the above-mentioned persons. The earliest documentary record of his ancestry is to be found in the marriage register of the cathedral of Cremona, where there is an entry, dated April, 1600, of the marriage of Giulio Cesare Stradivari, of the parish of S. Michele Vecchio, to Doralice Milani, of the parish of the cathedral. They had a son, Alessandro, christened in the church of S. Michele in January, 1602; and in the register of the parish of S. Prospero, is the entry of the marriage of this Alessandro Stradivari and Anna Moroni—the father and mother of Antonio.

Francesco Stradivari, son of Antonio, b. 1 Feb. 1671; d. 11 May, 1743. He followed his father's calling, and was the only one of Stradivari's sons to inherit any of the father's skill in making stringed instruments. He made very good violins; some are signed by himself, and others, made with the help of his brother Omobono, are signed "sotto la disciplina d'Antonio Stradivari". His work is quite distinct in character from Antonio's. Both Francesco and Omobono were overshadowed by the genius of their father; they produced good work, if not work of the highest quality.

Omobono Stradivari, son of Antonio, b. 14 Nov., 1679; d. 8 June, 1742. He also followed his father's trade, and made some violins in conjunction with his brother Francesco. His work was chiefly confined to the repair and fitting up of instruments; possibly he made bows, instrument-cases—which were specially designed for wealthy patrons, and often things of great value and beauty—and various fittings, such as bridges, pegs, tail-pieces, etc.

Paolo Stradivari, the youngest son of Antonio by a second marriage, b. 26 Jan., 1708; d. 14 Oct., 1776. He was a cloth merchant, and the only son of the great Stradivari who married. On the death of Francesco, Paolo received the collection of tools, moulds, patterns, drawings, correspondence, and memoranda left by their father, and also several instruments, including the famous "Alard" Strad of 1715, and the unrivalled "Messie" violin of 1716. In 1775 this collection of relics was sold by Paolo to the Count Cozio de Salabue, and afterwards passed into the hands of the late Marquis Alessandro Dalla Valle. Cesare

Stradivari, a grandson of Paolo, b. in 1789, was celebrated as a physician.

Strahov, Abbey of, a Premonstratensian abbey at Prague, Bohemia, founded in 1140 by Bishop Henry Zdik of Olmütz, Bishop John of Prague, and Prince Ladislaus II. A colony of monks from Steinfeld, near Cologne, was brought here, and Gero, a canon of Cologne, became its first abbot. This new abbey in a very short time flourished to such an extent that some of its members were soon appointed bishops of Prague.

St. Mark writing his Gospel
From the Strahov Manuscript

During the twelfth, thirteenth, and fourteenth centuries the abbots of Strahov took keen interest in the public affairs of the kingdom, and their names are often mentioned in public documents and grants of special privileges.

On 19 Oct., 1259, the abbey was destroyed by fire, but Abbot John I (1250–66) built a new and magnificent church. The monastery suffered greatly during the plundering reign of the king's regent, Otto of Brandenburg and that of Henry of Carinthia. It, however, again flourished under Charles IV. On 8 May, 1420, the Hussites set fire to the buildings, and looted and destroyed everything. The main cause of anger of the fanatics against the abbey was that John Zelezný, Bishop of Leitomischl, a Premonstratensian, was one of the accusers of Hus at the Council of Constance.

From this time onward Strahov continued to decline, and its lands were gradually stolen and sold, until in 1577 and 1578 not one of its members remained, and the meagre income was turned over to the chaplain of the Emperor Ferdinand I. Later a Premonstratensian, John Lohelius, who subsequently became Archbishop of Prague, gathered monks from various monasteries, colonized Strahov anew, infusing into it new physical as well as spiritual life. Lohelius rebuilt the church and a greater part of the monastery, and Abbot Caspar of Questenberg (1620–40) completed the work. During the bombardment of Prague in 1842 Strahov suffered greatly; the damage, however, was soon repaired. When the Emperor Joseph II suppressed 58 abbeys in Bohemia, Strahov was saved from a similar fate by Abbot Wenceslaus Mayer (d. 1800), who had won favour even at the hostile Court by the interest that he took in fostering schools and education. Abbot Zikmund Starý (1879–1905) built the new church and improved the old church. The present abbot, Method Zavoral, is a man of great ability as a preacher.

The monastic Church of the Assumption, built in 1601–1605 by Abbot Lohelius, is beautifully decorated by numerous frescos; the pictures on the arched ceiling symbolize some of the invocations contained in the Litany of the Blessed Virgin, and on the side walls are scenes from the life of St. Norbert. These beautiful frescos are the work of the Prague artist Georg Wilhelm Neuherz (d. 1743). The Chapel of St. Norbert has the saint's relics in a casket of copper and bronze, richly gilded. The organ is the work of the Strahov monk Lohel Oehlschlägel (d. 1774).

The monastic library contains upwards of 110,000 volumes, of which 1200 are *incunabula*. Of these there are about sixty unique volumes. Of the many rare manuscripts the most precious is the "Evangelistarium" of the sixth century, written in uncial letters and still well-preserved. Among others may be mentioned: "Gerlaci Chronicon", Codex Strahoviensis from 1220; the "Pontificale" of Bishop Albert of Sternberg, made in 1376; the "Missale" of the Premonstratensian Abbey of Louky of 1480; the miniature manuscript of the Bible of the thirteenth century, written by a nun of the cloister of Doksany; "Sich's Graduale" of 1610, weighing fifty pounds. The art gallery has the original painting of Dürer's "Blessed Virgin of the Rosary", of 1506, with the master's own portrait; and paintings by Correggio, Van Dyck, Holbein, van Aachen, Reiner, Skréta, Brandl, etc.

Strain, John, Archbishop of St. Andrews and Edinburgh, b. at Edinburgh, 8 December, 1810; d. there, 2 July, 1883. Educated at Edinburgh High School, at Aquhorties Seminary, and at the Scots College, Rome, he was ordained priest in 1833 and, after work in Edinburgh and Dumfries, was appointed to the mission of Dalbeattie, where he laboured for twenty-three years. Transferred to Dumfries in 1857, he was appointed in the following year president of Blairs College, Aberdeen; and on the death of Bishop Gillis in 1864 he was nominated to succeed him as vicar Apostolic of the eastern district, named Bishop of Abila, and consecrated by Pius IX at the Vatican on 25 September. During his nineteen years' episcopate he saw the number of clergy and missions largely increased in his district; many new schools were opened, and several religious communities, both of men and women, introduced. The bishop laboured long and strenuously for the restoration of the regular hierarchy to Scotland; and it was greatly due to his effects that the restoration took place, under Leo XIII, in 1878. He became himself the first Archbishop of St. Andrews and Edinburgh, and held his first diocesan synod in 1881. His death occurred whilst Catholic Scotland was preparing to celebrate with befitting honour the golden jubilee of his ordination.

Catholic Directory for Scotland (1884), 169–80; *The Tablet*, LXI (7 July, 1883), 26.

Stransham, Edward, Venerable, English martyr, b. at Oxford about 1554; suffered at Tyburn, 21 January, 1586. He was educated at St. John's College, Oxford, becoming B. A. in 1575–6; arrived at Douai in 1577, and went with the college to Reims in 1578, whence he came back to England owing to illness. In 1579, however, he returned to Reims, and was ordained priest at Soissons in Dec., 1580. He left for England, 30 June, 1581, with his fellow-martyr, Nicholas Woodfen, of London Diocese, ordained priest at Reims, 25 March, 1581. In 1583 Stransham came back to Reims with twelve Oxford converts. After five months there he went to Paris, where he remained about eighteen months at death's door from consumption. He was arrested in Bishopgate Street Without, London, 17 July, 1585, while saying Mass, and was condemned at the next assizes for being a priest. Details of his career will be found in the article mentioned below.

Wainewright in *Downside Review* (1911) s. v., and the authorities there cited.

John B. Wainewright.

Strasburg, Diocese of (Argentinensis), a German diocese immediately dependent on the Papal See. According to legend the Diocese of Strasburg was founded in the third or fourth century. St. Arbogast and Florentius were distinguished bishops of the sixth or seventh century. The first bishop known to history is Ansoald, one of the signers of the Acts of the Council of Paris of 614. His successor Eddo or Heddo, of the ducal family of Ettichos, organized his ecclesiastical diocese in conjunction with St. Boniface, aided by the Carolovingians. The boundaries then given remained essentially the same throughout the Middle Ages. On the left bank of the Rhine the diocese extended over the present Province of Alsace with exception of the south-eastern part between the Ill, Blind, and Rhine; on the right bank it extended from the Rhine to the crest of the Black Forest, and southward from the mouth of the Murg to the Elz. This territory was divided into seven archdiaconates, of which one included Strasburg, and one the region on the right bank of the Rhine. This subdivision remained substantially the same from the eleventh century to the French Revolution.

Charlemagne granted Bishop Heddo unlimited jurisdiction in the valley of the Breusch, and in 775 the bishop received freedom from customs duty throughout the empire for himself and his vassals (*homines ecclesiæ*). By the Treaty of Verdun (843) the Diocese of Strasburg fell to the empire of Lothair; in 870 it became part of the east Frankish kingdom, later the Holy Roman Empire, so that the German character of the diocese was preserved. Both Lothair and Louis the German confirmed the privileges that their forefathers had granted to the Church of Strasburg. Bishops Udo (950–65) and Erchanbald (965–91) restored Church discipline which had fallen into decay at the beginning of the tenth century. Emperor Otto I granted Udo the ownership of the royal mint at Strasburg; Otto II (974) confirmed this gift and gave the bishop the right to establish a mint in any town of the diocese he desired. In 982 Otto II granted Erchanbald absolute jurisdiction over the city of Strasburg and its environs, thus forming the main foundation of the secular supremacy of the bishop. Werner I of Habsburg (1001–29) received from emperors Henry II and Conrad II a large number of grants, including the old Abbey of St. Stephen with all its rights. A new cathedral, to replace the one destroyed in 1002 by Hermann of Swabia, was begun by Werner I in 1015 and dedicated in 1031. The bishop gave to the library of the minster numerous manuscripts which he had collected in Italy. During the conflict of investitures the bishops generally sided with the imperial party: Werner II (1065–79); Theobald (1079–82), who took part in the election of the anti-pope Clement II; and Otto of Hohenstaufen (1082–1100), who accompanied Godfrey of Bouillon on the First Crusade. Gebhard I (1131–41) and Burkhard I (1141–62) were zealous promoters of Church reform; during the episcopate of Berthold I of Teck (1223–44), about 1230, the new orders of Franciscans and Dominicans settled at Strasburg.

The city of Strasburg developed under episcopal administration, and in the twelfth century it prospered greatly. Its efforts to abolish episcopal suzerainty and to obtain new privileges were especially successful during the Conflict of Investitures. The town-council acquired great independence and the right of co-optation, although the right of the bishop to appoint the council had been reconfirmed in 1214 by charter of Emperor Frederick II. At the beginning of his episcopate Walter of Geroldseck (1260–63) wished to enforce this right, to dispose of communal property, and to regulate the taxes. The populace, siding with the council and the patricians, defeated the episcopal forces at Hausberger, 8 March, 1262, thus practically establishing the independence of the city. The succeeding bishop, Henry of Geroldseck (1263–73), made a treaty in 1263 by which at the close of the official year the council elected its own successors, and the citizens themselves had the right to settle all questions regarding communal property. The bishop retained only the right to appoint the town magistrate, the castellan of the castle, the official in charge of the collection of the customs, and the superintendent of the mint. These offices, except that of magistrate, gradually sank in importance, and the bishop no longer appointed the officials. Conrad of Lichtenberg (1273–99) completed the rebuilding in Gothic style of the nave of the minster, and began the construction of the beautiful west façade. Bishops Johannes of Dirpheim (1306–28), chancellor of King Albert II, and Berthold II of Bucheck (1328–53) were both capable administrators, appointed by the pope. Notwithstanding their share in imperial politics, these bishops found time to hold synods and labour effectually for church discipline in the diocese.

In 1359 John II of Lichtenberg (1353–65) obtained the Landgraviate of Lower Alsace from the Counts of Oettingen. A land-register, that gave exact information concerning the secular possessions of the diocese, was drawn up during his administration. The diocese included: in Lower Alsace the districts of Benfield, Markolsheim, Schirmeck, Dachstein, Kochersberg, Wanzemau, and Zabern; in Upper Alsace the stewardship of Rufach; in the present Duchy of Baden the districts of Oberjirch and Ettenheim. The episcopal possessions in Alsace were only exceeded in area by those of Hamburg. With shrewd policy the bishops had opportunely broken the power of the local governors, and had successfully opposed the restoration of imperial administrative suzerainty over diocesan territories. Under John's successors began the decline of the diocese, promoted by unhappy political conditions and by the Great Schism. This decay was especially rapid during the episcopate of William of Diest (1394–1439), who, to carry on innumerable private and public wars, frequently mortgaged and squandered the episcopal lands. His successors, who, with the aid of the cathedral chapter, finally paid off his debts, were: Rupert of the Pfalz (1440–78), who called the celebrated preacher Geiler von Kaysersberg (q. v.) to the pulpit of the minster; Albert of the Pfalz (1478–1506); and William III of Honstein (1507–41).

Soon after 1520 the Reformation gained many adherents in the city of Strasburg, owing to the labours of Luther's friends, Wolfgang Capito and Martin Bucer, the efforts of the preacher Matthias Zell and of the Humanists Sturm and Hedio. In 1529 the council abolished the Mass; in 1531 the city joined the Smalkaldic League, whereupon the bishop transferred his see to Zabern. Despite the vigorous opposition of William of Honstein and Erasmus of Limburg (1541–68), all the secular lordships of the diocese in Lower Alsace adopted the new doctrine, except the landgraviate; even part of the cathedral chapter became Protestant. John IV of Manderscheid-Blankenheim (1569–92) summoned the Jesuits to Molsheim to check the apostasy, and encouraged the Counter-Reformation. After his death there was a double election: the Protestant cathedral canons chose John George of Brandenburg as administrator; the Catholic canons, Cardinal Charles of Lorraine. The struggle between the two candidates, called the Bishops' War of Strasburg (1592–1604), caused the diocese great misery. Charles of Lorraine was victor. Catholic ownership was further secured in the successive election of two Austrian archdukes as bishop: Leopold (1607–25), a brother of Emperor Ferdinand II, and Leopold William (1625–62), one of Ferdinand's sons. During the Thirty Years' War the territory was so ravaged by Ernst of Mansfeld, the Swedes, and the French, that the population decreased 75 per cent. In 1680, during the episcopate of Charles Egon of Fürstenberg (1663–82), whose sympathies were French, Louis XIV seized all the territory of the diocese on the left bank of the Rhine under pretence of "reunion"; the city of Strasburg became a French possession in 1681. The bishop retained the internal administration of his possessions in Alsace and the title of landgrave. The districts on the right bank of the Rhine remained within the German Empire, and the bishop was still their ruler as prince of the empire. The occupation of Strasburg by the French brought the minster once more into the hands of the Catholics. William Egon of Fürstenberg (1682–1704) established the seminary for priests at Strasburg and placed the Jesuits in charge of it. The succeeding four bishops belonged to the French princely family of de Rohan; the last of these, Louis René de Rohan (1779–1802), was involved in the notorious affair of the diamond necklace. In 1790 the Constituent National Assembly secularized the Alsatian possessions of the diocese and Rohan transferred his see to the German portion of his bishopric. In Strasburg Brendel, a constitutional bishop, was elected; Eulogius Schneider, whom he appointed vicar-general, persecuted Catholic priests who refused to take the oath, until the overthrow of the Reign of Terror in Paris put an end to this injustice.

By the Concordat of 1801 the Diocese of Strasburg received new boundaries, extending the jurisdiction of the bishop over and beyond Alsace to the Lake of Bienne in Switzerland, and south-westerly as far [illegible] Montbéliard. Rohan having resigned at the request of the pope, Peter Saurine (1802–13), former constitutional bishop, became Bishop of Strasburg. The districts on the right bank of the Rhine fell to Baden on account of the secularization of the German Church in 1803. The diocese, which had been a suffragan of Mainz until 1802, became (1822) a suffragan of Besançon; it was reduced in size towards the south and south-west. Bishop Andreas Räss (1842–87) endeavoured to revive Catholicism in Germany, to promote the education of the clergy, and to establish religious associations. When Alsace became a German possession in 1871, the diocese received its present extent and was declared directly dependent on the Holy See by Decrees of 10 and 14 July, 1874, and by the Treaty of Paris of 7 October, 1874. Räss was succeeded by Peter Paul Stumpf (1887–90), and the present bishop, Adolf Fritzen, consecrated on 21 July, 1891. Bishop Fritzen has especially encouraged Catholic associations, the Catholic press, Church liturgy and psalmody. In 1902 he established a theological faculty at the University of Strasburg.

View of the Cathedral, Strasburg

Statistics.—The Diocese of Strasburg includes the departments of Upper and Lower Alsace in the German Crown-Province of Alsace-Lorraine. In 1911 it contained 57 deaneries, 710 parishes, 283 curacies, 710 parish priests, 454 curates and ecclesiastics in other positions, 92 priests retired or on leave elsewhere, 106 regulars, and 846,100 Catholics, while 350,000 of the population belonged to other faiths. The bishop is appointed by the pope in agreement with the German Emperor, and the cathedral chapter is appointed by the bishop. In regard to educational and charitable institutions and religious houses of the diocese, see Alsace-Lorraine. The most important church is the minster at Strasburg, the oldest parts of which belong to the eleventh century. The crypt is Romanesque, the upper part of the choir and the transepts belong to the Transition period, the nave is Gothic. The famous façade is the chief work of Erwin of Steinbach (1284–1318). The north tower, about 465 feet high, was completed in 1429–39 by Johann Hültz of Cologne. The minster is rich in stained glass of the period from the twelfth to the fifteenth century. Other churches are: St. Martin at Colmar, St. George at Schlettstadt, St. Theobald at Thann, St. Nicholas at Hagenau, St. Leodegar and the Church of Our Lady at Gebweiler, Old and New St. Peter at Strasburg, etc. Much frequented places of pilgrimage are: Drei Aehren near Colmar, St. Odilien near Barr, Dusenbach near Rappoltsweiler, St. Morand near Altkirch, etc.

Strasburg, Gottfried of. See Gottfried von Strassburg.

Stratonicea, a titular see in Caria (Asia Minor) suffragan of Stauropolis. Stratoniceia or Stratonicea was founded perhaps on the site of the more ancient Idrias, in the interior of Caria, south-east of Mylassa, and south of the Marsyas, by Antiochus Soter, who named it after his wife Stratonice. His successors embellished it with magnificent monuments, and it became one of the chief towns of Caria. Later it was ceded to the Rhodians. Mithridates lived in it some time, and while there married the daughter of one of the principal citizens. Later it sustained a vigorous siege by Labienus. It is mentioned as a free town by Pliny. Some of its coins have been found. Near the city was a temple of Zeus Chrysaoreus, where the confederated Carian towns held their assemblies. To-day it is the small town of Eski Hissar, in the caza of Moughla, vilayet of Smyrna. It has extensive ruins, a theatre, tomb, columns, etc. The "Notitiæ episcopatuum" mention the see till the thirteenth century among the suffragans of Stauropolis. Only three of its bishops are known, by their signatures at councils: Eupeithus, at Chalcedon, 451; Theopemptus, at Constantinople, 692; Gregory, at Nicæa, 787.

Streber, Franz Ignaz von, numismatist and theologian, b. at Reisbach, Lower Bavaria, 11 Feb., 1758; d. at Munich, 26 April, 1841. In 1783 he was made court chaplain, in 1821 auxiliary bishop, in 1822 cathedral provost of Munich. In 1782 he was appointed curator of the cabinet of coins of the elector. His work was to unite the Mannheim or Palatinal collection with the Munich or Bavarian collection of the Wittelsbach line, which had been in disorder since the Thirty Years' War, and to arrange the combined collection in scientific order. On account of the disturbances caused by war he was obliged to carry off and conceal the cabinet of coins five times, each time re-arranging it anew. He wrote a history of the royal Bavarian cabinet of coins, and several treatises on Bavarian and Greek numismatics, most of which appeared in the transactions of the Academy of Munich.

Streber, *Rede zum Andenken an Ignaz von Streber*, read at the public session of the Academy, 28 March, 1843.

Aug. v. Loehr.

Streber, Franz Seraph, numismatist and nephew of the above, b. at Deutenkofen, Lower Bavaria, 26 Feb., 1805; d. at Munich, 21 Nov. 1864. He first studied theology and philosophy, then archæology and numismatics, and wrote in 1830 as his dissertation for obtaining the degree of Doctor of Philosophy at Erlangen a paper on the genealogy of the Burgraves of Nuremberg. In 1854 he became a member of the Academy of Munich. In 1835 he was made professor of archæology at the University of Munich, of which he was twice rector. In 1827 he was made clerk, in 1830 assistant, and in 1841 curator of the royal cabinet of coins. He also worked on the numismatic collection of Vienna and prepared a critical catalogue of 18,000 Greek coins and a numismatico-iconographic lexicon with drawings of about 6000 Greek coins belonging to the Viennese and Munich collections. In 1834 he published the work "Numismata nonnulla græca", which corrected false and inexact designations of coins; this was crowned with a prize by the Academy of Paris as was also his important investigation concerning what are called the rainbow patina, which he was the first to recognize as Celtic (vol. IX of the papers of the Munich Academy). Further papers on Celtic, Greek, and medieval coins, also on archæology, mythology, and the history of art, appeared chiefly in the publications of the Munich Academy. He also drew up a "Promemoria" that is preserved among the records of the royal cabinet of coins, as to the expenses and the plan of a monumental work covering the entire field of Greek numismatics that was to take the place of the old work by Eckhel and be about one-half larger. Streber was also prominent in politics as a strong supporter of the ecclesiastico-conservative party. He founded the association for a constitutional monarchy and religious freedom, and wrote many political memorials at its request.

Transactions of the Academy of Munich, I (1865), 2661 sq.; *Histor.-politische Blätter*, LV (1865), 85 sq.

Aug. v. Loehr.

Streber, Hermann, son of Franz Seraph Streber, b. at Munich, 27 Sept., 1839; d. at Tölz, 9 Aug., 1896. He entered the Ludwigsgymnasium in 1850, but a nervous fever prevented him from qualifying for the university through the usual final school examination. From this ailment he never completely recovered. Entering the university by a private examination in 1858, he devoted over two years to the study of philosophy and theology, attending besides historical lectures. During this period he compiled a description and catalogue of the ancient coins in the Royal Cabinet of Medals. In 1861 he entered the archiepiscopal seminary at Freising, and in 1864 was ordained priest. Owing to the death of his father he was unable to pursue his original intention of studying numismatics. In 1867 he was appointed religious teacher at the Wihelmsgymnasium. Having received six months' leave of absence in 1868, he won the doctorate in theology in Rome (Jan., 1869). He then resumed his duties as religious teacher until June, 1870, when he was dismissed for alleged "intriguing in favour of the dogma of infallibility". He was then named pastor of Wolfersdorf, near Freising. Invited by Professor Hergenröther to assist him in editing the new edition of the "Kirchenlexikon", Streber resigned his parish, and settled in Würzburg. When Hergenröther was summoned as cardinal to Rome, Streber moved to Bonn to be near Kaulen, the new editor, and performed notable services in perfecting the "Nomenclator". He wrote many articles for the "Kirchenlexikon", the direction of which was for a time entirely in his hands. In 1892 illness forced him to withdraw to his brother's house at Tölz, where he lived in retirement until death.

Strossmayer, JOSEPH GEORG (JOSIP JURAJ), Bishop of Diakovár, b. at Essegg in Croatia-Slavonia, 4 February, 1815; d. 8 April, 1905. He came from a family of German peasants who had immigrated into Croatia. After attending the *gymnasium* of his native town, he studied theology in the seminary at Diakovár and the higher seminary at Budapest, where he obtained the degree of Doctor of Philosophy when only twenty years of age. In 1838 he was ordained priest and was for two years vicar at Peterwardein. In 1840 he went to the Augustineum at Vienna; in 1842 obtained the degree of Doctor of Theology, and was then made professor at Diakovár. In 1847 he became court chaplain, prefect in the Augustineum and professor of canon law at the University of Vienna. On 18 November, 1849, he was appointed Bishop of Diakovár, and was consecrated on 8 September, 1850. At the same time he was Apostolic Administrator of Belgrade-Semendria in Servia. In 1898 the pope conferred the pallium upon him. At the Vatican Council he was one of the most notable opponents of papal infallibility, and distinguished himself as a speaker. The pope praised Strossmayer's "remarkably good Latin". A speech in which he defended Protestantism made a great sensation. Afterwards another speech, delivered apparently on 2 June, 1870, was imputed to him. It is full of heresies and denies not only infallibility but also the primacy of the pope. The forger is said to have been a former Augustinian, a Mexican named Dr. José Agustín de Escudero. After the council Strossmayer maintained his opposition longer than all the other bishops and kept up a connexion with Döllinger and Reinkens until October, 1871. Then he notified them that he intended to yield "at least outwardly". Finally, on 26 December, 1872, he published the decrees of the council in his official paper. At a later date he repeatedly proclaimed his submission to the pope, as in his pastoral letter of 28 February, 1881, on Sts. Cyril and Methodius, expressing his devotion to the papal see at times in extravagant language.

In politics he was an active supporter of the Croatian national party and Panslavism. He exerted himself to advance his people in civilization, yet he strengthened national hatreds by his political agitation. He used the large revenues of his diocese to found primary schools, a seminary, the academy for southern Slavs at Agram (1867), the university (1874), and a picture gallery also at Agram. Under his direction Augustín Theiner edited the "Vetera monumenta Slavorum meridionalium" (1863). During 1866–82 he built a fine and splendidly ornamented cathedral. He sought to win the Servians who were not Uniats for Rome by the use of the Old Slavonic liturgy.

KLEMENS LÖFFLER.

HENRY BENEDICT STUART
Cardinal of York, Titular King of Great Britain and Ireland

Stuart, HENRY BENEDICT MARIA CLEMENT, cardinal, Duke of York, known by the Jacobites as HENRY IX, KING OF GREAT BRITAIN, FRANCE, AND IRELAND; b. at Rome, 11 March, 1725; d. at Frascati, 13 July, 1807. He was the second son of James Francis Edward Stuart, the Chevalier de St. George, and Clementina, daughter of Prince James Sobieski. In 1745, when hopes of a Stuart restoration ran high, he visited France, hoping to embark with French troops to the assistance of his brother Charles Edward. Having spent several months at Dunkirk without effect, he returned to Rome with the intention of entering the ecclesiastical state. In 1747, at the age of twenty-two, he was created cardinal, and during the following year he received Holy orders, being ordained priest on 1 September. He was immediately made archpriest of the Vatican Basilica, and shortly afterwards cardinal camerlengo. In Nov., 1759, he was consecrated titular Archbishop of Corinth, and on 13 July, 1761, became Cardinal-Bishop of Frascati. Being sincerely pious and earnest, he proved a zealous administrator of his see, reforming the clergy, and founding a seminary which he endowed with a magnificent library. At the French Revolution he lost his French benefices, sacrificed many other resources to assist the pope, and finally was reduced to poverty by the seizure of his Frascati property by the French. Old and infirm, he fled to Padua and thence to Venice. King George III then came to his assistance, aiding him with a life-annuity till he was able to return to Frascati in 1800. In return for this kindness the cardinal bequeathed to the Prince of Wales, afterwards George IV, the crown jewels of James II. In September, 1803, he became Bishop of Ostia and Velletri, and Dean of the Sacred College, though he still resided at Frascati. At his death the Stuart papers in his possession were bought by George IV for the Royal Library, and others are now in the British Museum. There are three pictures of him in the National Portrait Gallery, London, and one at Blairs College, Aberdeen. The cardinal lies buried in St. Peter's at Rome, where Canova's monument preserves his memory.

Stuart, MARY. See MARY QUEEN OF SCOTS.

Studion (STUDIUM), the most important monastery at Constantinople, situated not far from the Propontis in the section of the city called Psamathia. It was founded in 462 or 463 by the consul Studios (Studius), a Roman who had settled in Constantinople, and was dedicated to St. John the Baptist. Its monks came from the monastery of Acœmetæ. At a later date the laws and customs of Studion were taken as models by the monks of Mount Athos and of many other monasteries of the Byzantine Empire; even to-day they have influence. The Studites gave the first proof of their devotion to the Faith and the Church during the schism of Acacius (484–519); they also remained loyal during the storms of Iconoclastic dispute in the eighth and ninth centuries. They were driven from the monastery of Studion and the city by Emperor Constantine Copronymus; after his death (775), however, some of them returned. Abbot Sabbas zealously defended the Catholic doctrine against the Iconoclasts at the Seventh Œcumenical Council of Nicæa (787). His successor was St. Theodore of Studion to whom the monastery owes the most of its fame, and who especially fostered study. During St. Theodore's administration also the monks were harassed and driven away several times, some of them being put to death. Theodore's pupil Naucratius re-established discipline after the Iconoclastic dispute had come to an end. Abbot Nicholas (848–51 and 855–58) refused to recognize the Patriarch Photius and was on this account imprisoned in the Studion. He was succeeded by five abbots who recognized the patriarch. The brilliant period of the Studion came to an end at this time. In the middle of the eleventh century. during the administration of Abbot Simeon, a monk named Nicetas Pectoratus (Stethatos) made a violent attack on the Latins in a book which he wrote on unleavened bread, the Sabbath, and the marriage of priests. In 1054 he was obliged to recant in the presence of the emperor and of the papal legates and to throw his book into the fire, but he began the dispute again later. As regards the intellectual life of the monastery in other directions it is especially celebrated for its famous school of caligraphy which was established by St. Theodore. In the eighth and eleventh centuries the monastery was the centre of Byzantine religious poetry; a number of the hymns are still used in the Greek Church. Besides St. Theodore and Nicetas, a number of other theological writers are known. In 1204 the monastery was destroyed by the Crusaders and was not rebuilt until 1290; the greater part of it was again destroyed when the Turks captured Constantinople (1453). The only part now in existence is the Church of St. John Baptist, probably the oldest remaining church in Constantinople, a basilica which still preserves from the early period two stories of columns on the sides and a wooden ceiling, and which is now the mosque Imrachor-Dschamissi.

Klemens Löffler.

Stuhlweissenburg (Székes-Fehérvàr) Diocese of (Albæ regalensis), in Hungary, and Suffragan of Gran. It was formed in 1777 from the Dioceses of Gyor and Veszprem. In earlier times there was here a collegiate chapter of the Diocese of Veszprem, founded in 1006 by King St. Stephen; it was under a provost and was endowed with great privileges, the provost being chosen by the chapter, and the members of the chapter by the provost. Provost, chapter, and church were exempt from the jurisdiction of the bishop and directly subject to the pope. The chapter members were recruited from the chief families, and were once about forty, but in 1543, during the invasions of the Turks, the chapter became extinct, though the provosts and canons were yet nominated. The Provost of Stuhlweissenburg, according to the laws of the thirteenth century, was royal chancellor. The archives of the chapter were the most important in Hungary, and preserved a copy of the Golden Bull of 1222, the Magna Charta of Hungary. During the invasion of the Turks these archives were destroyed. The cathedral, in which the royal insignia were preserved, was later enlarged by the kings of Hungary and richly decorated. In 1601 it was destroyed by the Turks. From 1380 to 1527 Stuhlweissenburg was both coronation and burial place for the Hungarian kings. The diocese includes the entire County of Fejér and a part of the ancient County of Pilis, also the Island of Csepel in the Danube. Budapest, the capital of Hungary, though territorially within this diocese, is subject to the Archbishop of Gran.

The first Bishop of Stuhlweissenburg was Ignatius Nagy (1777–1789). Among his successors are Joseph Kopácsy (1821–1825), afterwards Archbishop of Gran; Vincent Jekelfalussy (1866–1874), the first Hungarian bishop to promulgate the dogma of the infallibility without previously asking the royal consent (*placet regium*), and for which he was rebuked. In 1901 Bishop Julius Városy was appointed Archbishop of Kalocsa. At present the see is ruled by Ottokar Prohaszka, a famous preacher and leader of the Hungarian Catholic movement. The diocese is divided into arch-deaconries; the parish priests number 92, and the clergy 152. In the diocese are 8 abbeys and 5 provostships, 4 monasteries for men and 12 for women, in all 109 members. Right of patronage belongs to 46 persons. Since 1841 the cathedral chapter, at the head of which is a chief provost, consists of 8 canons; the Catholic faithful are 230,305.

A. Áldásy.

Stylites (Pillar Saints) were solitaries who, taking up their abode upon the top of a pillar (στῦλος), chose to spend their days amid the restraints thus entailed and in the exercise of other forms of asceticism. This practice may be regarded as the climax of a tendency which became very pronounced in Eastern lands in the latter part of the fourth century. The duration and severity of the fasts then practised almost pass belief, but the evidence is overwhelming (Butler; Palladius, I, 188, 240–1), and the general correctness of the accounts preserved to us is now hardly disputed. Besides the mortification of the appetite, submission to restraints of all kinds became at this period an end in itself. Palladius tells us (ch. xlviii) of a hermit in Palestine who dwelt in a cave on the top of a mountain and who for the space of twenty-five years never turned his face to the West. St. Gregory of Nazianzus (P. G., XXXVII, 1456) speaks of a solitary who stood upright for many years together, absorbed in contemplation, without ever lying down. Theodoret assures us that he had seen a hermit who had passed ten years in a tub suspended in mid air from poles (Philotheus, ch. xxviii).

There seems no reason to doubt that it was the ascetical spirit manifested in such examples as these which spurred men on to devise new and more ingenious forms of self-crucifixion and which in 423 led Simeon Stylites the Elder (q. v.) first of all to take up his abode upon the top of a pillar. Critics, it is true, have recalled a passage in Lucian (De Syria Dea, cc. xxviii–xxix) which speaks of a high column at Hierapolis to the top of which a man ascended twice a year and spent a week in converse with the gods, but even such an authority as Nöldeke thinks it unlikely that Simeon had derived any suggestion from this pagan custom, which certainly had died out before his time. In any case Simeon had a continuous series of imitators, more particularly in Syria and Palestine. St. Daniel Stylites may have been the first of these, for he had been a disciple of St. Simeon and began his rigorous way of life shortly after his master died. Daniel was a Syrian by birth but he established himself near Constantinople, where he was visited by both the Emperor Leo and the Emperor Zeno. Simeon the Younger (q. v.), like his namesake, lived near Antioch; he died in 596, and had for a contemporary a hardly less famous Stylites in St. Alypius, whose pillar had been erected near Adrianople in Paphlagonia.

Saint Alypius after standing upright for fifty-three years found his feet no longer able to support him, but instead of descending from his pillar lay down on his side and spent the remaining fourteen years of his life in that position.

St. Luke the Younger, another famous pillar hermit, whose life has recently been printed for the first time in the "Analecta bollandiana" (1909, pp. 5–56), lived in the tenth century on Mount Olympus, but he also seems to have been of Asiatic parentage. There were many others besides these who were not so famous and even women Stylites were also known. One or two isolated attempts seem to have been made to introduce this form of asceticism into the West but it met with little favour. In the East cases were found down to the twelfth century; in the Orthodox Russian Church it lasted until 1461, and among the Ruthenians even later. There can be no doubt that for the majority of the pillar hermits the extreme austerity of which we read in the lives of the Simeons and of Alypius was somewhat mitigated. Upon the summit of some of the columns for example a tiny hut was erected as a shelter against sun and rain, and we hear of other hermits of the same class among the Monophysites, who lived inside a hollow pillar rather than upon it; but the life in any case must have been one of extraordinary endurance and privation. Probably the best justification of these excesses of austerity is to be found in the fact that, like the great renunciation of St. Melania the Younger (see Cardinal Rampolla's "Sta Melania Giuniore"), they did, in an age of terrible corruption and social decadence, impress the need of penance more than anything else could have done upon the minds and imagination of Oriental Christians.

HERBERT THURSTON.

Styria (GER. STEIERMARK), a duchy and Austrian crownland, divided by the River Mur into Upper and Lower Styria. The province is rich in minerals, as iron ore, brown coal, etc. Its area is 8980 sq. miles, and in 1910 it had 1,441,604 inhabitants. Of the population 68 per cent are Germans, and 32 per cent Slovenes. The Slovenes, who are a branch of the Slavonic race, live chiefly in the southern and south-eastern portions of the province, in Lower Styria. Ninety-eight per cent of the population is Catholic; one per cent Protestant; the rest are Jews or belong to the Orthodox Greek Church. The capital of the province is Graz (152,000 inhabitants); it is the residence of the governor and the seat of the administration of the province. In the Roman era Styria was a part of Noricum. During the great migrations various German tribes traversed the region, and about A. D. 600 the Slavs took possession of it. Styria came under the supremacy of Charlemagne as a part of Karantania (Carinthia). Large numbers of Germans, especially Bavarians, came into the country, settled in colonies in it, and made it Christian. The work of conversion was carried on mainly from Salzburg; Bishop Virgilius of Salzburg (745–84), an Irishman, was largely instrumental in converting the country to Christianity, and gained for himself the name of "Apostle of Karantania". The Patriarchs of Aquileia also shared in the work. In 811 Charlemagne made the Drave River the boundary of the Dioceses of Salzburg and Aquileia. In the tenth century a part of Styria was separated from Carinthia under the name of the Carinthian Mark; it was also named the Windic March. The margaves ruling the mark took from the name of the fortified castle of Steier the title of Margraves of Steiermark, and the country received in German the name of Steiermark. During the reign of Margrave Ottokar II (1164–92) Styria was raised to a duchy by the Emperor Frederick Barbarossa in 1180. With the death of Ottokar the first line of rulers of Styria became extinct; the region fell to the Babenberg family who then ruled in Austria. In a short time this family became extinct also, and Styria then passed under the control of Hungary (1254–60), and of King Ottokar of Bohemia; finally in 1276 it came into the possession of the Habsburgs, whose property it still remains. During the years 1379–1439 and 1564–1619 it was ruled by princes of its own from a branch of the Habsburgs. At the time of the Turkish invasions in the sixteenth and seventeenth centuries the land suffered severely. The Turks made incursions into Styria nearly twenty times; churches, monasteries, cities, and villages were destroyed and plundered, while the population was either killed or carried away into slavery.

CITY HALL, GRAZ

The Reformation made its way into the country about 1530. During 1564–90 the country was ruled by Duke Karl, whose wife was the Duchess Maria of Bavaria, a courageous champion of Catholicism. He introduced the Counter-Reformation into the country on the basis of the Religious Peace of Augsburg of 1555. In 1573 he summoned the Jesuits and in 1586 he founded the University of Graz. In 1598 his son and successor, Ferdinand, suppressed all Protestant schools and expelled the foreign teachers and preachers. The common people again accepted with but slight opposition the Catholic faith. The Protestant doctrines were maintained only in a few isolated mountain valleys, as in the valley of the Inn and the valley of the Mur. The nobility were not forced to return to the Church; each could have Protestant services in his own house. After Ferdinand had become Emperor of Germany (1619) and had defeated his Protestant opponents in the battle of the White Mountain near Prague (1620), he forbade in 1625 all Protestant church services. In 1628 he commanded the nobility also to return to the Catholic faith. A large number of noble families, consequently, emigrated from the country; but most of them either returned, or their descendants did so, becoming Catholics and recovering their possessions. In the second half of the seventeenth century the Protestant spirit broke out again, especially in the distant valleys in the mountains, owing to events in the Duchy of Salzburg. The agitators from the Protestant districts of Germany were expelled, and the peasants who would not give up Protestantism were condemned to compulsory emigration to Transylvania. It should be remembered that the harsh laws issued by the Catholic rulers of Styria and Austria were the application of the axiom then current in European national law: *cujus regio ejus religio*, and that the Protestant princes suppressed and persecuted Catholicism and its adherents much more severely in their territories. The

Edict of Toleration issued by the Emperor Joseph II in 1781 put an end to the religious contest of more than two hundred years. The Protestants then received the right to found parish communities and to exercise their religion there undisturbed. On account of the constitutions gained by the German people in 1848 all the provinces of the Austrian Empire received complete liberty of religion and of conscience, parity of religions, and the right to the public exercise of religion. As regards the present relation between Church and State, the Church and the schools, conditions are the same as in the other sections of Austria.

Ecclesiastically the province is divided into two prince-bishoprics, Seckau and Lavant. Ever since the time of their foundation both have been suffragans of the Archdiocese of Salzburg. The Prince-Bishopric of Sekau was established in 1218; since 1786 the see of the prince-bishop has been Graz. The Prince-Bishopric of Lavant was founded as a bishopric in 1228, and raised to a prince-bishopric in 1446; since 1847 Marburg on the Drave has been the see of the prince-bishop. There are in the entire Duchy of Styria 96 deaneries and 551 parishes, altogether 1163 parochial districts, each district containing on an average 1151 Catholics. Styria contains many old and celebrated houses of the orders, as: the collegiate foundation of the Reformed Augustinian Canons of Vorau (founded 1163); the Benedictine abbeys at Admont (1074); at St. Lambrecht (1066); at Seckau (founded as a house of the Augustinian Canons in 1140, suppressed in 1782, from 1883 a monastery, since 1887 abbey of the Beuronese Benedictines); the Cistercian abbey at Rein (1120); the Franciscan monastery at Graz (since 1515; founded in 1230 as a monastery of the Minorites), at Maria-Lankowitz (1456), at Maria-Nazareth (1632); the Minorite monasteries at Graz (1526), and of St. Peter and Paul at Pettau (1239); the Capuchin monasteries at Cilli (1611), Leibnitz (1634), Hartberg (1654), and Schwanberg (1706); the collegiate foundations of the Redemptorists at Mautern (dating from 1826; founded in 1670 as a Franciscan monastery), and at Leoben (1844); the Trappist Abbey of Maria-Erlösung at Reichenberg (1881; abbey since 1891), etc. There are also many houses of female orders and congregations. The Catholic societies and confraternities are large and numerous.

Hermann Sacher.

Suárez, Francisco, Doctor Eximius, a pious and eminent theologian, as Paul V called him, b. at Granada, 5 Jan., 1548; d. at Lisbon, 25 Sept., 1617. He entered the Society of Jesus at Salamanca, 16 June, 1564; in that city he studied philosophy and theology from 1565 to 1570, and was ordained in 1572. He taught philosophy at Avila and at Segovia (1571), and later, theology at Avila and Segovia (1575), Valladolid (1576), Rome (1580–85), Alcalá (1585–92), Salamanca (1592–97), and Coimbra (1597–1616). All his biographers say that he was an excellent religious, practicing mortification, laborious, modest, and given to prayer. He enjoyed such fame for wisdom that Gregory XIII attended his first lecture in Rome; Paul V invited him to refute the errors of King James of England, and wished to retain him near his person, to profit by his knowledge; Philip II sent him to the University of Coimbra to give prestige to that institution, and when Suárez visited the University of Barcelona, the doctors of the university went out to meet him, with the insignia of their faculties. His writings are characterized by depth, penetration and clearness of expression, and they bear witness to their author's exceptional knowledge of the Fathers, and of heretical as well as of ecclesiastical writers. Bossuet said that the writings of Suárez contained the whole of Scholastic philosophy; Werner (Franz Suárez, p. 90) affirms that if Suárez be not the first theologian of his age, he is, beyond all doubt, among the first; Grotius (Ep. 154, J. Cordesio) recognizes in him one of the greatest of theologians and a profound philosopher, and Mackintosh considers him one of the founders of international law.

In Scholasticism, he founded a school of his own, "Suarism", the chief characteristic principles of which are: (1) the principle of individuation by the proper concrete entity of beings; (2) the pure potentiality of matter; (3) the singular as the object of direct intellectual cognition; (4) a conceptual distinction between the essence and the existence of created beings; (5) the possibility of spiritual substances only numerically distinct from one another; (6) ambition for the hypostatic union as the sin of the fallen angels; (7) the Incarnation of the Word, even if Adam had not sinned; (8) the solemnity of the vow only in ecclesiastical law; (9) the system of Congruism that modifies Molinism by the introduction of subjective circumstances, as well as of place and of time, propitious to the action of efficacious grace, and with predestination *ante prævisa merita;* (10) possibility of holding one and the same truth by both science and faith; (11) belief in Divine authority contained in an act of faith; (12) production of the body and blood of Christ by transubstantiation as constituting the Eucharistic sacrifice; (13) the final grace of the Blessed Virgin Mary superior to that of the angels and saints combined.

Francisco Suárez
From Desrochers' "Recueil de Portraits"
1773

"Suárez classes" were established in several universities—Valladolid, Salamanca (1720), Alcalá (1734)—and various Scholastic authors wrote their works *ad mentem Suarezii.* Charles III suppressed those classes throughout his dominions by a royal decree of 12 August, 1768, and prohibited the use of Jesuit authors, and therefore of Suárez, in teaching. It is obvious, says Cardinal Gonzalez, that, in so many volumes written by Suárez, there are to be found some matters of little utility, or the practical or scientific importance of which are not in proportion to the time and space that Suárez devotes to them. He is also charged with being somewhat diffuse. His book "De Defensione Fidei" was burned at London by royal command, and was prohibited by the Parliament of Paris (1614) on the ground that it contained doctrines that were contrary to the power of sovereigns.

Works.—Suárez published his first work, "De Deo Incarnato", at Alcalá, in 1590; he published twelve other volumes, the last of which, "De Defensio Fidei," written against the King of England, was published at Coimbra, in 1613. After his death the Jesuits of Portugal published ten other volumes of his works, between 1619 and 1655. Of all of these works, two different editions were made; the first, at Venice, 23 volumes in folio (1740–1757); and the second in Paris (Vives), 28 volumes (1856–1861). In 1859 Mgr Manlou published another volume in folio, containing six short treatises that had not been previously published. Father De Scorraille (Etudes, Vol. LXIV, pp. 151–175) gave an account of the manuscripts of Suárez, noting the fact that they were numerous and that he himself possessed seventy-five of them. Many of these and others besides were found by Father Rivière. The works of Suárez were held in the highest esteem in his day, as is shown by the numerous partial editions that were made of them (Lyons, Salamanca, Madrid, Coimbra, Mayence, Cologne, Paris, Evora, Genoa), as also by the fact, related by his biographers, that one of the wings of the old college of the Jesuits at Salamanca was restored with the product of the sale of his metaphysical works. A compendium of the theology of Suárez was published by Father Noel, S.J. (Madrid, 1732); a short epitome of his theological disputes, by the Portuguese Father Francis Soárez, S.J. (Lisbon, 1626), and a compendium of the metaphysics, by Father Gregorio Iturria, S.J. (Madrid, 1901).

A. Pérez Goyena.

Subcinctorium. See Maniple.

Subdeacon.—The subdiaconate is the lowest of the sacred or major orders in the Latin Church. It is defined as the power by which one ordained as a subdeacon may carry the chalice with wine to the altar, prepare the necessaries for the Eucharist, and read the Epistles before the people (Ferraris, op. cit. *infra*, No. 40). According to the common opinion of theologians at present, the subdeaconship was not instituted by Christ, nor are there any sufficient grounds for maintaining that it had an Apostolic origin. There is no mention of the subdiaconate in Holy Scripture or in the authentic writings of the Apostolic Fathers. These authorities make reference only to bishops, priests, and deacons. At the Council of Benevento (A. D. 1091), Urban II says: "We call sacred orders the deaconship and priesthood, for we read that the primitive Church had only those orders" (Can. I). Gratian (Dist. 21) says: "In the course of time, the Church herself instituted subdeacons and acolytes". It is true that the Council of Trent (Sess. XXIII, cap. 17, de ref.) says that "the functions of Holy orders from the deaconship to the ostiariate were laudably sanctioned in the Church from the times of the Apostles"; but these words simply indicate that the "functions" were so exercised (that is as part of the diaconate); it was only in the course of time that they were separated from the office of deacon and committed to inferior ministers. This explains why some theologians (e. g. Thomassinus, p. I, lib. II, cap. xl) speak of the subdeaconate as of Divine institution, that is they look on it as made up of functions proper to deacons. Gasparri (op. cit. *infra*, I, No. 35) says: "The Church, in the institution [of the subdeaconship] proceeded thus. She wished to commit to others the inferior functions of the order of diaconate, both because the deacons, with the increase of the faithful, could not suffice for their many and grave duties, and because she wished that others, received among the clergy and marked with the clerical tonsure, should ascend through minor orders, only after trial, to major orders. Imitating the Divine Law of the first three grades (bishop, priest and deacon), she decreed that the power of performing these functions should be conferred by external rites similar to those by which major orders were bestowed."

The subdiaconate is most probably, some say certainly, not a true sacrament, but a sacramental instituted by the Church. If it can not be repeated, this is because the Church has so wished, for she could institute a sacramental similar to a sacrament externally without thereby obliging us to hold that it imprints an indelible character on the soul of the recipient. Wernz (op. cit. *infra*, No. 158) says: "Since ordinations below the deaconship are most probably not true sacraments, but rather sacramentals, they do not imprint the true sacramental character, hence, if they are conferred validly, they give a power of order instituted solely by human law and circumscribed by its limits."

Historically, the earliest mention of the subdiaconate seems to be found in the letter of Pope Cornelius (A. D. 255) to Fabius of Antioch, in which he states that there are among the Roman clergy forty-six priests, seven deacons, and seven subdeacons. There is nothing to indicate, however, that the subdiaconate is not older than the third century. That there were subdeacons in the African Church in the same century is evident from the letters of St. Cyprian (e. g. ep. 8). The fourth Council of Carthage also mentions them in 398. The Synod of Elvira (305) in Spain does the same (c. 30). Their existence in the Oriental Church is testified to by St. Athanasius in 330 (ep. 2) and by the Council of Laodicea (can. 21) in 361. At present, among the Greeks and other orientals, as also formerly in the Western Church, subdeaconship is only a minor order. It has been counted among the major orders in the Latin Church, however, for nearly seven centuries. It seems to have been elevated to the rank of a sacred order in the thirteenth century, but it is impossible to fix the precise date. Urban II, at the close of the eleventh century, expressly limited the sacred orders to priesthood and diaconate, and in the middle of the twelfth century, Hugh of St.Victor still calls the subdeaconship a minor order. But at the end of the twelfth century, Peter Cantor (De verbo mirifico) says that the subdiaconate had lately been made a sacred order. Early in the thirteenth century, Innocent III authoritatively declared that the subdeaconship was to be enumerated among the major orders and that subdeacons could be chosen to a bishopric without special dispensation (Cap. 9. x, de æt., l, 14). The reason for this change of discipline was probably not because subdeacons were bound to celibacy, for this obligation began to be imposed upon them in the Latin Church in the fifth and sixth centuries [thus Leo I in 446 (in c. 1, dist. 32) and the Council of Orleans in 538], but more likely because their functions brought them so closely into the service of the altar.

Subdeaconship is conferred when the bishop gives the empty chalice and paten to the candidate to be touched, saying: "See what kind of ministry is given to you, etc." Two ceremonies following, the presentation of the cruets by the archdeacon and the imposition of the vestments, are not essential and need not be supplied if omitted (S. R. C., 11, March, 1820). Then the bishop gives the candidate the Book of Epistles to be touched, saying: "Take the Book of Epistles and receive power to read them in the holy Church of God for the living and the dead in the name of the Lord." In case of omission, this rite must be supplied and is probably an essential part of the ordination (S. C. C., 11 Jan., 1711). In the Greek Church, there is a laying on of hands and a suitable prayer, but there is no imposition of hands in the Latin Church. It is true that a letter of Innocent III to the Bishop of Ely in England (A. D. 1204) is cited as requiring that if the laying on of hands in the subdeaconship be omitted, it must be afterwards supplied (cap. 1, x, de sacr. non interand, 1. 6), but there seems no doubt that the word "deaconship" was in the original text (Correct. Rom. ad cit. cap. 1).

The duties of a subdeacon are to serve the deacon at Mass; to prepare the bread and wine and sacred vessels for the Holy Sacrifice; to present the chalice and paten at the Offertory and pour water into the wine for the Eucharist; to chant the Epistles solemnly; to wash the sacred linen. In the Greek Church, subdeacons prepare the chalice at the Prothesis and guard the gates of the sanctuary during the Holy Sacrifice. In the ancient Roman Church, the subdeacons administered in great part the temporal goods of the Holy See and were often employed on important missions by the popes. A candidate for the subdiaconate must have been confirmed and have received minor orders. He must have the knowledge befitting his grade in the Church and have entered on his twenty-second year. He must also have acquired a title to orders. After ordination, he is bound to celibacy and to the recitation of the Divine Office.

William H. W. Fanning.

Subiaco (Sublacum, Sublaceum, Sublaquem), a city in the Province of Rome, twenty-five miles from Tivoli, received its name from the artificial lakes of the villa of Nero and is renowned for its sacred grotto (*Sagro Speco*), the Abbey of St. Scholastica, and the archiepiscopal residence and Church of St. Andrew, which crowns the hill. When St. Benedict, at the age of fourteen, retired from the world he lived for three years in a cave above the River Anio, supplied with the necessaries of life by a monk, St. Roman. The grotto became the cradle of the Benedictine Order. St. Benedict was able to build twelve monasteries and to place twelve monks in each. The one at the grotto seems to have had but a short existence; in 854 we find a record of its renovation. In this year Leo IV is said to have consecrated an altar to Sts. Benedict and Scholastica and another to St. Sylvester. Another renovation took place in 1053 under Abbot Humbert of St. Scholastica. Abbot John V, created cardinal by Gregory VII, made the grotto the terminus of a yearly procession, built a new road, and had the altars reconsecrated. Shortly before 1200 there existed a community of twelve, which Innocent III made a priory; John XXII in 1312 appointed a special abbot. A new road was built by the city in 1688. The sacred grotto is still a favourite pilgrimage, and on 27 October, 1909, Pius X granted a daily plenary indulgence to those who receive Holy Communion there and pray according to the intention of the Holy Father (Acta Ap. Sedis, II, 405). A short description of the grotto, the church, and chapels, is given by Chandlery, "Pilgrim Walks in Rome" (New York, 1908), p. 469. The Abbey of St. Scholastica, about a mile and a half below the grotto, was built by St. Benedict himself (about 520), and endowed by the Roman patricians, Tertullus and Æquitius. The second abbot, St. Honoratus, changed the old monastery into a chapter room and built a new one, dedicating it to Sts. Cosmas and Damian. It was destroyed by the Lombards in 601 and abandoned for a century. By order of John VII it was rebuilt by Abbot Stephen and consecrated to Sts. Benedict and Scholastica. Demolished in 840 by the Saracens and again in 981 by the Hungarians, it rose from its ruins. Benedict VII consecrated the new church, and henceforth the abbey was known by the name St. Scholastica. In 1052 Leo IX came to Subiaco to settle various disputes and to correct abuses; a similar visit was made by Gregory VII. Special favour was shown by Pascal II, who took the abbey from the jurisdiction of the Bishop of Tivoli and made it an abbacy *nullius*. Its temporal welfare was also a care of the popes. Thus, among others, Innocent III, at his visit in 1203, increased the revenues of the abbey. With the decline of religious fervour, strifes and dissensions arose to such an extent that Abbot Bartholomew in 1364, by command of the pope, had to dismiss some of the incorrigible monks and fill their places with religious from other monasteries. Numbers were brought in from Germany, and for many decades Subiaco was a centre of German thrift, science, and art. Still, it seems the discipline was not satisfactory, for Urban VI (1378-89) abolished the abbots for life, took away from the monks the right of election, and gave the administration and revenues to a member of the Curia. Callistus III, in 1455, gave the abbey *in commendam* to a cardinal. The first of these was the Spanish Cardinal Torquemada and the second Roderigo Borgia (later Alexander VI), who remodelled the Castrum Sublacence, once the summer resort of the popes, and made it the residence of the commendatory abbot.

Many of these abbots cared but little for the religious life of the monks and looked only for the revenues. As an example, Pompeo Colonna, Bishop of Rieti, commendatory abbot since 1506, squandered the goods of the abbey and gave the income to unworthy subjects. On complaint of the community, in 1510, Julius II readjusted matters and restored the monastic possessions. For spiritual benefit a union had been made between Subiaco and the Abbey of Farfa, but it lasted only a short time. In 1514 Subiaco joined the Congregation of St. Justina, whose abbot-general was titular of St. Scholastica, while a cardinal remained commendatory abbot. Even after this union there were continual quarrels between Subiaco and Farfa, Subiaco and Monte Cassino, the Germans and the Italians. After this but little is known about the abbey until the middle of the nineteenth century. In 1851 some of the monasteries of Italy, with consent of the Holy See, formed a separate province, though still belonging to the Congregation of St. Justina. Soon other monasteries in various parts of the world wished to join this union, and Pius IX, by Decree of 9 March, 1872, established the Cassinese Congregation of primitive observance. This congregation, known also as the Congregatio Sublacensis, has had a marvellous growth for, according to the "Familiæ Confœderatæ" of 1910, it embraces 35 monasteries in 5 provinces, with a total of 1050 religious. The troubles of Subiaco did not cease for by order of 19 June, 1873, the property was sequestrated by the Italian Government, the abbey declared a national monument, and the religious tolerated as custodians of the same. At first but few monks remained, but in 1897 there was again a community of 25 and the "Familiæ Confœderatæ" of

1910 notes 21 priests, 10 clerics, 8 lay brothers, and 3 novices. On 7 January, 1909, Pius X restored to the monks the right of electing their own abbot. On the 28th they elected Lawrence Salvi. The pope conferred on him the right of wearing the *cappa magna* on 17 Feb., and four days later Salvi received the abbatial benediction. In 1904 Luigi Cardinal Macchi resigned his office as commendatory abbot, and Pius X retained the position for himself, ordering the Acts of the Curia to bear the heading: "Pius X Abbas Sublacensis". The abbacy *nullius* comprises 24 parishes, 91 priests (Benedictines, Franciscans, Capuchins, and secular), and 23,000 inhabitants [Annuaire Pont. Ecclés. (1911), 339]. The episcopal functions are performed by Victor M. Corvaia, O.S.B., titular Bishop of Tripolis. The library and archives were once of great value. In Subiaco the German printers, Sweinheim and Pannartz, found a home and printed "Donatus pro parvulis", "Lactantius" (1465), and "De Civitate Dei" (1467). To-day the printing press is doing valuable work; in 1908 appeared "Petri Boherii in Regulam S. Benedicti Commentarium nunc primum editum cura et studio P. Allodi".

Francis Mershman.

Subreption (Lat. *subreptio*), in canon law the concealment or suppression of statements or facts that according to law or usage should be expressed in an application or petition for a rescript. In its effects subreption is equivalent to obreption (q. v.), which consists in a positive allegation of what is false. Subreption may be intentional and malicious, or attributable solely to ignorance or inadvertence. It may affect the primary, substantial reason or motive of the grant, or constitute merely a secondary or impellent cause of the concession. For the effect of subreption on the validity of grants see Rescripts.

Decretalia, I, 3, c. 20, *De Rescriptis*, and canonists generally.

A. B. Meehan.

Subsidies, Episcopal (Lat. *subsidia*, tribute, pecuniary aid, subvention); since the faithful are obliged to contribute to the support of religion, especially in their own diocese, a bishop may ask contributions for diocesan needs from his own subjects, and particularly from the clergy. These offerings as far as possible should be voluntary, rather than taxes or assessments strictly so called. Of the contributions given to bishops, some are ordinary, made annually or at stated times; others are extraordinary, given as special circumstances demand. Under ordinary subsidies are classed the *cathedraticum*, a fixed sum given annually to the bishop from the income of the churches of the diocese, and which in the United States constitutes the chief revenue of bishops; *census*, or pensions, which a bishop may impose at times in accordance with the law; hospitality or procuration (*procuratio, comestio, circada, albergaria*) extended to the bishop and his assistants canonically visiting the diocese; contributions (*seminaristicum, alumnaticum*) for the support of diocesan seminaries, or for the education of ecclesiastical students; fees of the chancery office (*jus sigilli:* see Taxa Innocentiana). In regard to the maintenance of students for the priesthood, in some dioceses of the United States an annual collection is made of the voluntary offerings of the people; in others an assessment is imposed on each parish. Chancery fees go to meet the expenses of the office; the surplus, if any, is employed in charitable works, and not for the bishop personally. Formerly there too was a share falling to the bishop from legacies, bequests, etc. (*quarta mortuaria, quarta funerum, quarta episcopalis, portio canonica*), and likewise a portion of the tithes (*quarta decimarum, quarta decimatio*), which accrued to the churches of the diocese.

The chief extraordinary tax, which a bishop may levy, is a charitable subsidy (*subsidium caritativum*). This may be asked from all churches and benefices, secular or regular not exempt, and from clerics possessing benefices, but not from lay persons. The following conditions must be observed. There must be a reasonable and evident cause for the subsidy, as, for example, to meet the necessary expenses of the bishop's consecration, his visit *ad limina*, attendance at a general council, prosecuting the rights of the diocese, or for the general good of the diocese; this extraordinary tax, however, is permissible only when other means are wanting (S. C. C., 17 Feb., 1663); the exaction, though varying according to the need in question, must be moderate, the amount being determined chiefly by custom; the advice of the cathedral chapter or the diocesan consultors must be obtained; the poor are not to be taxed. In Italy it is only when taking formal possession of his see that a bishop is free to exact this tribute (Taxa Innocentiana, 8 Oct. 1678); on other occasions the consent of the Holy See is required. Although the subvention is asked in the name of charity, it is binding, and delinquents may be compelled by ecclesiastical punishments to meet this obligation. Such a tax, if imposed for the benefit of the pope, is called Peter's pence. Patriarchs, primates, or metropolitans are not allowed such tribute from the dioceses of their suffragan bishops. Abbots and religious superiors, through privilege or custom, may exact a similar subsidy from their monasteries or communities for the evident good of their orders. The Third Plenary Council of Baltimore (n. 20) declares that a bishop, having consulted his diocesan advisers, must have recourse to Rome, if a new tax is to be imposed for the bishop beyond what is allowed in common law.

A. B. Meehan.

Substance (Lat. *sub-stare, substantia*), the first of Aristotle's categories, signifies being as existing in and by itself, and serving as a subject or basis for accidents and accidental changes.

I.—Substance, being a *genus supremum*, cannot strictly be defined by an analysis into genus and specific difference; yet a survey of the universe at large will enable us to form without difficulty an accurate idea of substance. Nothing is more evident than that things change. It is impossible for anything to be twice in absolutely the same state; on the other hand all the changes are not equally profound. Some appear to be purely external: a piece of wood may be hot or cold, lying flat or upright, yet it is still wood; but if it be completely burnt so as to be transformed into ashes and gases, it is no longer wood; the specific, radical characteristics by which we describe wood have totally disappeared. Thus there are two kinds of changes: one affects the radical characteristics of things, and consequently determines the existence or non-existence of these things; the other in no way destroys these characteristics, and so, while modifying the thing, does not affect it fundamentally. It is necessary, therefore, to recognize in each thing certain secondary realities (see Accident) and also a permanent *fundamentum* which continues to exist notwithstanding the superficial changes, which serves as a basis or support for the secondary realities—what, in a word, we term the substance. Its fundamental characteristic is to be in itself and by itself, and not in another subject as accidents are.

The Scholastics, who accepted Aristotle's definition, also distinguished primary substance (*substantia prima*) from secondary substance (*substantia secunda*):

CHURCH OF ST. SCHOLASTICA
BERNINI'S STATUE OF ST. BENEDICT

SUBIACO

MONASTERY OF ST. BENEDICT
THE SACRED GROTTO

the former is the individual thing—substance properly so called; the latter designates the universal essence or nature as contained in genus and species. And, again, substance is either complete, e. g. man, or incomplete, e. g. the soul, which, though possessing existence in itself, is united with the body to form the specifically complete human being. The principal division, however, is that between material substance (all corporeal things) and spiritual substance, i. e. the soul and the angelic spirits. The latter are often called *substantiæ separatæ*, to signify that they are separate from matter, i. e. neither actually conjoined with a material organism nor requiring such union as the natural complement of their being (St. Thomas, "Contra Gentes", II, 91 sqq.). St. Thomas further teaches that the name *substance* cannot properly be applied to God, not only because He is not the subject of any accidents, but also because in Him essence and existence are identical, and consequently He is not included in any genus whatever. For the same reason, it is impossible that God should be the formal being of all things (*esse formale omnium*), or, in other words, that one and the same existence should be common to Him and them (op. cit., I, 25, 26).

In the visible world there is a multitude of substances numerically distinct. Each, moreover, has a specific nature which determines the mode of its activity and at the same time, through its activity, becomes, in some degree, manifest to us. Our thinking does not constitute the substance; this exists independently of us, and our thought at most acquires a knowledge of each substance by considering its manifestations. In this way we come to know both the nature of material things and the nature of the spiritual substance within us, i. e. the soul. In both cases our knowledge may be imperfect, but we are not thereby justified in concluding that only the superficial appearances or phenomena are accessible to us, and that the inner substantial being, of matter or of mind, is unknowable.

Since the close of the Scholastic period, the idea of substance and the doctrines centring about it have undergone profound modifications which in turn have led to a complete reversal of the Scholastic teaching on vital questions in philosophy. Apart from the traditional concept formulated above, we must note especially Descartes' definition that substance is "a being that so exists as to require nothing else for its existence". This formula is unfortunate: it is false, for the idea of substance determines an essence which, if it exists, has its own existence not borrowed from an ulterior basis, and which is not a modification of some being that supports it. But this idea in no way determines either the manner in which actual existence has been given to this essence or the way in which it is preserved. The Cartesian definition, moreover, is dangerous; for it suggests that substance admits of no efficient cause, but exists in virtue of its own essence. Thus Spinoza, following in the footsteps of Descartes, declared that "substance is that which is conceived in itself and by itself", and thence deduced his pantheistic system according to which there is but one substance—i. e. God—all things else being only the modes or attributes of the Divine substance (see PANTHEISM). Leibniz's definition is also worthy of note. He considers substance as "a being gifted with the power of action". Substance certainly can act, since action follows being, and substance is being *par excellence*. But this property does not go to the basis of reality. In every finite substance the power to act is distinct from the substantial essence; it is but a property of substance which can be defined only by its mode of existence.

II.—The most important question concerning substance is that of its reality. In ancient days Heraclitus, in modern times Hume, Locke, Mill, and Taine, and in our day Wundt, Mach, Paulsen, Ostwald, Ribot, Jodl, Höffding, Eisler, and several others deny the reality of substance and consider the existence of substance as an illusory postulate of naïve minds. The basis of this radical negation is an erroneous idea of substance and accident. They hold that, apart from the accidents, substance is nothing, a being without qualities, operations, or end. This is quite erroneous. The accidents cannot be separated thus from the substance; they have their being only in the substance; they are not the substance, but are by their very nature modifications of the substance. The operations which these writers would thus attribute to the accidents are really the operations of the substance, which exercises them through the accidents. Finally, in attributing an independent existence to the accidents, they simply transform them into substance, thus establishing just what they intend to deny. It can be said that whatever exists is either a substance or in a substance.

The tendency of modern philosophy has been to regard substance simply as an idea which the mind indeed is constrained to form, but which either does not exist objectively or, if it does so exist, cannot be known. According to Locke (Essay ii, 23), "Not imagining how simple ideas can subsist by themselves, we accustom ourselves to suppose some substratum wherein they do subsist and from which they do result; which therefore we call substance; so that if any one will examine himself concerning his notion of pure substance in general, he will find he has no other idea of it at all, but only a supposition of he knows not what support of such qualities, which are capable of producing simple ideas in us; which qualities are commonly called accidents." He protests, however, that this statement refers only to the idea of substance, not to its being; and he claims that "we have as clear a notion of the substance of spirit as we have of body" (ibid.). Hume held that the idea of substance "is nothing but a collection of simple ideas that are united by the imagination and have a particular name assigned to them, by which we are able to recall, either to ourselves or others, that collection" (Treatise, bk. I, pt. IV); and that the soul is "a bundle of conceptions in a perpetual flux and movement".

For Kant substance is a category of thought which applies only to phenomena, i. e. it is the idea of something that persists amid all changes. The substantiality and immortality of the soul cannot be proved by the pure reason, but are postulated by the moral law which pertains to the practical reason. J. S. Mill, after stating that "we may make propositions also respecting those hidden causes of phenomena which are named substances and attributes", goes on to say: "No assertion can be made, at least with a meaning, concerning those unknown and unknowable entities, except in virtue of the phenomena by which alone they manifest themselves to our faculties" (Logic, bk. i, I, c. v): in other words, substance manifests itself through phenomena and yet is unknowable. Mill defines matter as "a permanent possibility of sensation", so that no substantial bond is required for material objects; but for conscious states a tie is needed in which there is something "real as the sensations themselves and not a mere product of the laws of thought" ("Examination", c. xi; cf. Appendix). Wundt, on the contrary, declares that the idea (hypothetical) of substance is necessary to connect the phenomena presented in outer experience, but that it is not applicable to our inner experience except for the psycho-physical processes (Logik, I, 484 sqq.). This is the basis of Actualism, which reduces the soul to a series of conscious states. Herbert Spencer's view is thus expressed: "Existence means nothing more than persistence; and hence, in mind, that which persists in spite of all changes, and maintains the unity of the aggregate in defiance of all attempts to divide it, is that of which existence in the full sense of the word must be predicated—that which we must postulate as the substance of mind in contradistinction to the varying forms it assumes. But, if so, the impossibility of knowing the substance of mind is manifest" (Princ. of Psychol., Pt. II, c. i). Elsewhere he declares that it is the same Unknowable Power which manifests itself alike in the physical world and in consciousness—a statement wherein modern Agnosticism returns to the Pantheism of Spinoza.

This development of the concept of substance is instructive; it shows to what extremes subjectivism leads, and what inconsistencies it brings into the investigation of the most important problems of philosophy. While the inquiry has been pursued in the name of criticism, its results, so far as the soul is concerned, are distinctly in favour of Materialism; and while the aim was supposed to be a surer knowledge on a firmer basis, the outcome is Agnosticism either open or disguised. It is perhaps as a reaction against such confusion in the field of metaphysics that an attempt has recently been made by representatives of physical science to reconstruct the idea of substance by making it equivalent to "energy". The attempt so far has led to the conclusion that energy is the most universal substance and the most universal accident (Ostwald, "Vorlesungen über Naturphilosophie", 2nd ed., Leipzig, 1902, p. 146).

For the theological significance of substance see EUCHARIST. See also ACCIDENT; SOUL; SPIRITUALISM.

Suburbicarian Dioceses, a name applied to the dioceses nearest Rome, viz. Albano, Frascati (Tusculum), Palestrina, Sabina, Ostia and Velletri, Porto and S. Rufina, the bishops of which form the order of cardinal bishops (see CARDINAL). The See of Albano (*Albanensis*) has its cathedral, on the site of a basilica built by Constantine, on the Appian Way, about ten miles from Rome. The name corresponds to the Latin *ager Albanus* which commemorated the ancient city of Alba Longa, famous in Roman history. The diocese now comprises twelve parishes, and has a population of 41,000. Frascati, the ancient Tusculum, is in the Alban Hills, twelve miles from Rome. The diocese (*Tusculana*) contains eight parishes and has a population of 16,000; within its limits is the famous Basilian Abbey of Grottaferrata (q. v.). The capital of the Diocese of Palestrina (*Prænestinensis*) is the ancient Præneste, on the Via Labicana. The diocese, divided into twenty-four parishes, has a population of 45,700. The Diocese of Sabina (*Sabinensis*) was formed out of three oldest dioceses: S. Maria in Vescovio, Corese, and Mentana. Corese is the ancient Cures, which was, in remote ages, the Sabina capital; hence, obviously, the name *Sabina*. This, the largest of the suburbicarian dioceses, contains some 55,000 inhabitants, in thirty-five parishes. Ostia and Velletri (*Ostiensis et Veliternensis*) was formed in the twelfth century by the union of the Diocese of Velletri (the ancient Velitræ of the Volscians) with that of Ostia. The latter place was the seaport of ancient Rome. This diocese has sixteen parishes with 34,000 inhabitants. Porto, opposite Ostia at the mouth of the Tiber, was the Roman port (*portus*) constructed by the Emperor Claudius. The Basilica of Sts. Rufina and Secundus, about fourteen miles from Rome, on the Via Aureliana, having become the see of a bishop in the fifth century, this see was eventually united with that of Ostia. The diocese (*Portuensis et S. Rufinæ*) has eighteen parishes with a population of about 5000.

The term *suburbicarius* is taken from Roman public law, the expression *regiones* or *provinciæ suburbicariæ* meaning the districts adjacent to Rome. The term *ecclesiæ suburbicariæ* occurs first in Rufinus [Hist. eccl., I (x), 6], where he refers to the sixth canon of Nicæa treating of the extension of the patriarchal power of Rome. Rufinus certainly uses the words in the sense of "all the Churches *de facto* subject to the *episcopus urbicus*, that is, of Rome", meaning all the Churches of the West. The so-called Old (*prisca*) Version of the Nicene canons says that the jurisdiction of Rome extends over "suburbicaria loca et omnem provinciam suam", where *suburbicarius* is certainly more restricted in meaning than in the passage from Rufinus, and so must have been employed as it was used in Roman public law. In fairly recent times the expression was used synonymously with *suburbanus*, that is "in the immediate vicinity of Rome", to signify the above-mentioned dioceses.

Naturally these dioceses had a certain importance in the Church of Rome. Some authorities have suggested that the bishops were merely auxiliaries of the pope with jurisdiction, subject, however, to his. Certainly they had some prerogatives. For instance, the Bishop of Ostia, in the fourth century and probably in the third, consecrated the pope; in the sixth century the Bishop of Albano recited the second prayer in the consecration ceremony, and the Bishop of Porto the third. In the eighth century we read (Vita Stephani, III) of the most ancient custom in virtue of which seven of these bishops, called *hebdomadarii*, celebrated Mass in turn in place of the pope and were called *episcopi cardinales*, from being permanently attached to the *cardo*, that is the cathedral church of Rome; but we are not told who they were. In the eleventh century there were seven (six after the union of Porto and Silva Candida). Besides the titles *episcopi hebdomadarii* (twelfth century) and *cardinales Romanæ Sedis* they were also known as *Vicarii* and *Cooperatores papæ* and *episcopi romani*. The last title must have had a wider signification, as it was used of other bishops besides the seven, like the bishops of Tivoli, Gabii (united later with Palestrina), Lavicum (united with Tusculum), Villetri, Nepi, and Segni. In addition to the districts already mentioned these bishops had others. For instance the Bishop of Porto had ordinary delegated jurisdiction in Trastevere, and the Bishop of Silva Candida in the Leonine city and also in the Basilica of St. Peter. Both had residence on the Tiber island, and the Bishop of Albano had an episcopal residence near the Lateran. Probably as early as the eleventh century these bishops had the right of participating in the election of the pope; the Constitution of Nicholas II (1059), which fixed the right of electing the pope as belonging exclusively to the bishops and cardinal clerics of Rome, supposes that the former already enjoyed the right.

As the cardinal-bishops are largely absorbed in the business of the Curia, some of them, in particular the Bishops of Sabina and Velletri, have for centuries had auxiliary bishops. Pius X, in his Constitution "Apostolicæ Romanorum" (1910), ordained that there should be suffragan bishops for all the suburbicarian dioceses. The Constitution decrees that : (1) the cardinal-bishop is always the true bishop of the suburbicarian see; (2) each cardinal-bishop shall in future have a titular bishop as suffragan, (3) who shall be nominated by the pope; to take possession of his office the nominee must present to the cardinal the document containing his nomination; (4) in virtue of the present Constitution it is presumed that the cardinal-bishop has given his suffragan all the faculties necessary for the government of his diocese, such as other resident bishops have, with the following restrictions: (5) the auxiliary governs the diocese in the name and place of the cardinal; (6) with the death or transfer of the latter the jurisdiction of the auxiliary does not cease, he continues to rule the diocese as administrator Apostolic; (7) he must make an annual report to the cardinal on the moral and economic condition of the diocese; (8) where possible, a part of the episcopal palace shall be set aside for the suffragan and the Curia; (9) the blessing of the holy oils, the pontifical celebrations on the greater feasts of the year in accordance with the "Cæremoniale" of the bishops, is reserved to the cardinal, who may, however, delegate the auxiliary; (10) the obligation of celebrating Mass for the people is imposed on the cardinal, who (11) has the right of having his coat-of-arms on the palace, the cathedral, and other customary places; (12) the episcopal throne is reserved to the cardinal whose name alone is mentioned in the canon; (13) the cardinal, even when absent from the diocese, can grant an indulgence of 200 days; (14) if the cardinal is in the diocese he alone may officiate, or grant permission to officiate, pontifically; (15) the auxiliary may not grant benefices in the chapter and parishes not reserved to the Holy See without the consent of the cardinal; (16) the cardinal may personally supervise and visit the diocese; (17) the cardinal retains the right of assisting at marriages and of administering the other sacraments. The auxiliary is charged specially with examining candidates for tonsure and the other orders; but he may not confer or authorize the conferring of orders without the permission of the cardinal; (18) the diocesan synod is to be held with the consent and in the name of the cardinal, who alone has the right of approving and promulgating its decrees; (19) uniting or dividing benefices, even parochial, requires the consent of the cardinal, who (20) is to be consulted on appointments to offices and chairs in the seminary; (21) after the death or transfer of the suffragan, the cardinal through his vicar general shall provide for the government of the diocese till the appointment of a new suffragan; (22) when a cardinal-bishop dies the same ceremonies shall take place as are customary on the deaths of resident cardinal-bishops.

Succession, APOSTOLIC. See APOSTOLIC SUCCESSION.

Sudan, VICARIATE APOSTOLIC OF.—The Vicariate of Sudan or Central-Africa (SUDANENSIS SEU AFRICÆ CENTRALIS), in North-Eastern Africa, includes the whole Anglo-Egyptian Sudan, the part of Egypt south of Assuan, the French territory from Fezzan to 10° N. lat., parts of Adamaua and Sokoto on Lake Tchad, and the Nile Province of Uganda Protectorate. It was erected on 3 April, 1846, by Gregory XVI. In 1851 the Emperor Francis Joseph I of Austria took the mission under his protection. From 1883 to 1898 the Sudan (then an Egyptian province) was closed by the insurrection of the Mahdi Mohammed Ahmed and his successor Khalifa Abdullahi, and the missionaries were compelled to work outside the circuit of their jurisdiction in Egypt. On 2 Sept., 1898, the Anglo-Egyptian army, which in 1896 had begun operations for the recovery of the lost provinces, completed the overthrow of the Khalifa, although he was not slain until November of the following year. The country still suffers from the effects of the Dervish oppression, during which it was largely depopulated, wide tracts having gone out of cultivation and trade having been abandoned. In 1899 mission work was recommenced. The two religious congregations, the Sons of the Sacred Heart and the Pious Mothers of Nigritia furnish missionaries and sisters to the vicariate, and the two periodical papers "La Nigrizia" (Verona) and "Stern der Neger" (Brixen) print articles about this mission. The number of inhabitants is uncertain, perhaps about eight millions. Missionary work is limited to the southern and heathen part with the Shillouki Dinka, Nuer, Jur, Golo, Nyam-Nyam, and other negro tribes. In the northern and Mohammedan part are some European and Oriental Catholic immigrants. Statistics:—stations at Assuan, Omdurman, Khartoum (central station); Lul and Atigo (White Nile); Wau, Kayango, and Cleveland (Bahrel-Ghazal); Omach and Gulu (Uganda); besides twenty-five localities provided *excurrendo*. Catholics, 3000; catechumens, 1030; priests, 35; brothers, 28; sisters, 45. Vicar Apostolic, Francis Xavier Geyer, Bishop of Trocmade.

FRANCIS XAVIER GEYER.

Sufetula, a titular see of North Africa. Sufetula seems to be Suthul where Jugurtha had deposited his treasures (Sallust, xxxvi). The Latin name is a diminutive of Sufes (Shiba), the name of a small town 25 miles further north, from which many roads branched out to neighbouring towns. It became a Roman colony. In 647 it was the capital of the Byzantine patrician, Gregory, who had declared himself independent and was killed in a great battle with the Arabs fought near the town, which was stormed, pillaged, and cruelly laid waste. The "Roman Martyrology" mentions on 30 August the martyrs of Sufetula, who seem to belong rather to Sufes (St. Augustine, "Letters", 50). At an unknown date a council was held at Sufetula, one of its canons being still preserved (Hardouin, I, 1512). Only three bishops of this see are known: Privatian, present at the Council of Carthage, 255; Jucundus, at the Councils of Carthage, 411 and 419; St. Præsidius, exiled in 484 by Huneric after having been scourged, mentioned in the "Roman Martyrology" on 6 September. Sufetula is called *Sbeitha* in Arabic; it is a village on the road from Tebessa to Kairwan about 70 miles east of Tebessa (Tunisia). It has important Roman ruins: three temples, a triumphal arch, a theatre, and an amphitheatre, etc.; worthy of note are the ruins of four three-naved churches, Byzantine fortifications, and numerous fragments of Christian sculpture.

S. PÉTRIDÈS.

Suffragan. See ARCHBISHOP.

Sugar (SUKER), JOHN, VENERABLE, b. at Wombourn, Staffordshire, 1558; suffered at Warwick, 16 July, 1604. He matriculated at Oxford from St. Mary Hall, 30 October, 1584, and is described as *clerici filius*. He left without taking a degree, it is said because he disliked the Oath of Supremacy; but it appears that he acted as a Protestant minister at Cannock, Staffordshire, for some time. He was ordained priest from the English College, Douai (1601), and sent on the mission the same year. He was arrested 8 July, 1603, at Rowington, Warwickshire, with Venerable Robert Greswold (Grissold), a native of Rowington (in the service of Mr. Sheldon of Broadway, Worcestershire), who was in attendance on him. After a year's imprisonment at Warwick they were condemned there 14 July, Sugar for being a priest, and Greswold for assisting him. Sugar was cut down before he was fully dead. Greswold was offered his life if he would promise to conform.

JOHN B. WAINEWRIGHT.

Suger, Abbot of St-Denis, statesman and historian, b. probably at or near St-Denis, about 1081; d. there, 13 Jan., 1151. Towards 1091 he was offered to the monastery of St-Denis where he became a fellow-student of King Louis VI. From 1104 to 1106 he attended another monastic school, perhaps that of St-Benoît-sur-Loire near Orléans. He became secretary to Abbot Adam of St-Denis in 1106, was named provost of Berneval in Normandy towards 1107 and of Toury in Beauce in 1109. Louis VI sent him (1118) to the Court of Gelasius II at Maguelonne in Southern France, and later to that of Callistus II at Rome. During his stay at Rome (1121–22) he was elected Abbot of St-Denis, and ordained to the priesthood on his return. He attended the First General Council of the Lateran in 1123, and so favourably impressed Callistus II that eighteen months after his return to France this pope, desirous of conferring new honours (probably the cardinalate) upon him, invited him to Rome. Suger proceeded as far as Lucca, but retraced his steps upon receipt of the news of the pope's death. Henceforth most of his time was spent at Court until 1127, when he initiated, and subsequently successfully accomplished, the reform of his monastery. He continued to remain, however, the constant adviser of Louis VI and of his successor Louis VII. During the latter's absence on the Second Crusade he was appointed regent of the kingdom (1147–49). He had opposed the king's departure on the ground that the powerful and turbulent vassals were a danger to the royal power, but so successful was his administration that the king, upon his return, bestowed upon him the title of "Father of the Country". Although the crusade ended in failure, Suger equipped an army and was about to depart for the Holy Land when he died. As a statesman he sought to strengthen the royal power, to improve agriculture, commerce, and trade, and to reform the administration of justice. As abbot he not only introduced thorough-going reforms, but also completed in 1144 the new monastic church. He has left an account of the consecration of this edifice, "Libellus de consecratione eccl. S. Dionysii", and a memoir on his own abbatical administration, "Liber de rebus in administratione sua gestis". Of greater importance for the knowledge of the period are his "Vita Ludovici Grossi regis", a eulogistic but reliable life of Louis the Fat, and "Historia Ludovici VII", a history of Louis VII, which in its present form is the work of a Burgundian monk of St-Germain-des-Prés. We also possess of him some letters, official documents, and a will of the year 1137.

From Desrochers' "Hommes Illustres", Paris, 1760

The complete works of Suger were published by de la Marche, *Œuvres complètes de Suger* (Paris, 1867); they are also in *P. L.*, CLXXXVI, 1211–1468; Huguenin, *Etude sur l'abbé Suger* (Paris, 1855); Cartellieri, *Abt Suger von Saint-Denis* (Berlin, 1898); Masson, *Early Chroniclers of Europe: France* (London, s. d.), 56–59; Molinier, *Les Sources de l'hist. de France*, I, ii, nos. 1845–50.

Suggestion. See Psychotherapy.

Suicide.—This article will treat the subject under the following three heads:—I. The notions and divisions of suicide; II. The principles according to which its morality must be judged; III. Statistics and explanations of its frequency.

I. Notion.—Suicide is the act of one who causes his own death, either by positively destroying his own life, as by inflicting on himself a mortal wound or injury, or by omitting to do what is necessary to escape death, as by refusing to leave a burning house. From a moral standpoint we must treat therefore not only the prohibition of positive suicide, but also the obligation incumbent on man to preserve his life. Suicide is direct when a man has the intention of causing his own death, whether as an end to be attained, or as a means to another end, as when a man kills himself to escape condemnation, disgrace, ruin etc. It is indirect, and not usually called by this name when a man does not desire it, either as an end or as a means, but when he nevertheless commits an act which in effect involves death, as when he devotes himself to the care of the plague-stricken knowing that he will succumb under the task.

II. Morality.—The teaching of the Catholic Church concerning the morality of suicide may be summarized as follows:—

A. *Positive and Direct Suicide* perpetrated without God's consent always constitutes a grave injustice towards Him. To destroy a thing is to dispose of it as an absolute master and to act as one having full and independent dominion over it; but man does not possess this full and independent dominion over his life, since to be an owner one must be superior to his property. God has reserved to himself direct dominion over life; He is the owner of its substance and He has given man only the serviceable dominion, the right of use, with the charge of protecting and preserving the substance, that is, life itself. Consequently suicide is an attempt against the dominion and right of ownership of the Creator. To this injustice is added a serious offence against the charity which man owes to himself, since by his act he deprives himself of the greatest good in his possession and the possibility of attaining his final end. Moreover, the sin may be aggravated by circumstances, such as failure in conjugal, paternal, or filial piety, failure in justice or charity, if by taking his life one eludes existing obligations of justice or acts of charity which he could and should perform. That suicide is unlawful is the teaching of Holy Scripture and of the Church, which condemns the act as a most atrocious crime and, in hatred of the sin and to arouse the horror of its children, denies the suicide Christian burial. Moreover, suicide is directly opposed to the most powerful and invincible tendency of every creature and especially of man, the preservation of life. Finally, for a sane man deliberately to take his own life he must, as a general rule, first have annihilated in himself all that he possessed of spiritual life, since suicide is in absolute contradiction to everything that the Christian religion teaches us as to the end and object of life and, except in cases of insanity, is usually the natural termination of a life of disorder, weakness, and cowardice.

The reason we have advanced to prove the malice of suicide, namely, God's right and dominion, likewise justifies the modification of the general principle: God being the master of our life He may with His own consent remove from suicide whatever constitutes its disorder. Thus do some authorities justify the conduct of certain saints, who, impelled by the desire of martyrdom and especially to protect their chastity, did not wait for their executioners to put them to death, but sought it in one manner or other themselves; nevertheless, the Divine will should be certain and clearly manifested in each particular case. The question is asked: Can one who is condemned to death kill himself if ordered to do so by the judge? Some authors answer this question in the affirmative, basing their argument on the right which society possesses to punish certain malefactors with death and to commission any executioner, hence also the malefactor himself, to carry out the sentence. We share the most widely accepted opinion, that this practice, prevalent in certain countries of the East, is not lawful. Vindictive, and for that matter all, justice requires a distinction between the subject of a right and that of a duty, hence in the present case between the one who punishes and the one who is punished. Finally, the same principle which forbids anyone to personally compass his own death also forbids him to advise, direct, or command, with the direct intention of suicide, that another should slay him.

B. *Positive but Indirect Suicide* committed without Divine consent is also unlawful unless, everything considered, there is sufficient reason for doing what will cause death to follow. Thus, it is not a sin, but an act of exalted virtue, to go into savage lands to preach the Gospel, or to the bedside of the plague-stricken, to minister to them, although they who do so have before them the prospect of inevitable and speedy death; nor is it a sin for workmen in the discharge of duties to climb on roofs and buildings, thus exposing themselves to danger of death, etc. All this is lawful precisely because the act itself is good and upright, for in theory the persons in question have not in view either as end or means the evil result, that is, death, that will follow, and, moreover, if there be an evil result it is largely compensated for by the good and useful result which they seek. On the other hand there is sin in exposing oneself to danger of death to display courage, to win a wager, etc., because in all these cases the end does not in any way compensate for the danger of death that is run. To judge whether or not there is sufficient reason for an act which will apparently be followed by death, all the circumstances must be weighed, namely, the importance of the good result, the greater or less certainty of its being attained, the greater or less danger of death, etc., all questions which may in a specific case be very difficult to solve.

C. *Negative and Direct Suicide* without the consent of God constitutes the same sin as positive suicide. In fact man has over his life only the right of use with corresponding obligations to preserve the object of God's dominion, the substance of his life. Hence, it follows obviously that he fails in this obligation of usufructuary who neglects the necessary means for the preservation of life, and this with the intention of destroying the latter, and consequently violates the rights of God.

D. *Indirect and Negative Suicide* without the consent of God is also an attempt against the rights of the Creator and an injustice towards Him whenever without sufficient cause a man neglects all the means of preservation of which he should make use. If a man as usufructuary is obliged in justice to preserve his life, it follows that he is equally bound to make use of all the ordinary means which are indicated in the usual course of things, viz.: (1) he should employ all the ordinary means which nature itself provides, such as to eat, drink, sleep, and so on; (2) moreover, he should avoid all dangers which he may easily avoid, e. g. to flee from a burning house, to escape from an infuriated animal when it may be done without difficulty. In fact to neglect the ordinary means for preserving life is equivalent to killing one's self, but the same is not true with regard to extraordinary means. Thus theologians teach that one is not bound in order to preserve life to employ remedies which, considering one's condition, are regarded as extraordinary and involving extraordinary expenditure; one is not obliged to undergo a very painful surgical operation, nor a considerable amputation, not to go into exile in order to seek a more beneficial climate, etc. To use a comparison, the lessee of a house is bound to take care of it as becomes a good father of a family, to make use of the ordinary means for the preservation of the property, for instance, to extinguish a fire which he may easily extinguish, etc., but he is not bound to employ means considered extraordinary, such as to procure the latest novelties invented by science to prevent or extinguish fire.

The principles which have been outlined in the four propositions or divisions above given should serve for the solution of particular cases; however, the application may not always be equally easy, and thus a person may by an objectively unlawful act take his life and nevertheless consider it permissible and even an act of exalted virtue. It may be asked whether by performing or omitting a certain act a person may injure his health and shorten his life. To apply the foregoing principles: it is first of all clear (1st and 3rd propositions, A and C) that one may not have in view this hastening of death, but, this hypothesis aside, it may be said on the one hand that to expose oneself without sufficient reason to a considerable shortening of life constitutes a serious injury to the rights of the Creator; but on the other hand if the danger of death be not imminent, although it is to be feared that life may be shortened even by several years, it is not a grave but only a venial sin. This is the case with the drunkard who by his intemperance causes his premature death. Again it must be borne in mind that with the addition of a reasonable motive the thing may be entirely lawful and even an act of virtue; thus the workman does not sin by devoting himself to the rough labour of the mines, glass-works, etc., and the saints performed a very meritorious and highly virtuous act when in order to overcome their passions they lacerated and tortured their flesh by penance and fasting and were thus the cause of their earlier death.

III. FREQUENCY OF SUICIDE; CHIEF CAUSES.—The plague of suicide belongs especially to the period of decadence of the civilized peoples of antiquity, Greeks, Romans, and Egyptians. The Christian Middle Ages were unacquainted with this morbid tendency, but it has reappeared at a more recent period, has developed constantly since the Renaissance, and at present has reached such an intensity among all civilized nations that it may be considered the special evil of our time. At present the increase in the tendency to suicide is, with that to mental alienation, the saddest and thereby the most important characteristic fact of our era (Masaryk, 140). The officially established number of suicides during the nineteenth century was a million and a half, of which 1,300,000 were in Europe. Again Father Krose estimates the real number for Europe alone at two millions. During the last ten years of the nineteenth century there were 400,000 suicides, of which France and Germany alone furnished half. The following details are given by Nieuwbarn and Jacquart. Taking the countries in the order of the frequency of the rate of suicides, and taking as a scale the number of the latter to the million of inhabitants, we have the following results for the last ten years of the nineteenth century: France, 239; Denmark, 234; Switzerland, 232; Germany, 206 (in Saxony especially the sinister rate was 308, which figure rose to 325 for 1901–05); Austria, 158; Sweden, 147; Hungary, 145; Belgium, 124; England, 84; Norway, 63; Italy, 60; Scotland, 59; Low Countries, 56; Russia, 32; Ireland, 26; Spain, 21. But, as is shown by the indications furnished by Jacquart for this period of 1901–05 (64 sqq.), this figure has risen in recent years to an alarming extent. For instance, England in 1905 had risen to 103 to the million inhabitants; Switzerland to 232; the Low Countries to 64; and Ireland to 33. In the United States the annual average of suicides from 1901–5 was 4548 or 107 per million of population; in 1908, the latest available statistics, the number of suicides was 8332, or 116 per million of population.

In this number must obviously be included the suicides attributable to madness, but we cannot accept the opinion of a large number of physicians, moralists, and jurists who, led into error by a false philosophy, lay it down as a general rule that suicide is always due to dementia, so great is the horror which this act inspires in every man of sane mind. The Church rejects this theory and, while admitting exceptions, considers that those unfortunates who, impelled by despair or anger, attempt their life often act through malice or culpable cowardice. In fact, despair and anger are not as a general thing movements of the soul which it is impossible to resist, especially if one does not neglect the helps offered by religion, confidence in God, belief in the immortality of the soul and in a future life of rewards and punishments. Widely different reasons have been advanced to explain this frequency of suicide, but it is more correct to say that it does not depend on any one particular cause, but rather on an assemblage of factors, such as the social and economic situation, the misery of a great number, a more feverish pursuit of what is considered happiness, often ending in cruel deceptions, the ever more refined search for pleasure, a more precocious and intense stimulation of sexual life, intellectual overwork, the influence of the Press and the sensational news with which it daily provides its readers, the influences of heredity, the ravages of alcoholism, etc. But it is undeniable that the religious factor is by far the most important, as statistics prove (cf. the detailed investigations of Jacquart); the proportion of suicides in Protestant countries being as a general rule greater than that in Catholic countries, and the increase in suicides keeping step with the de-Christianization of a country. France presents a painful example parallel to the systematic de-Christianization; the number of suicides for each 100,000 of population has increased from 8.32 in 1852 to 29 in 1900. The reason is obvious. Religion alone, and especially the Catholic religion, instructs us with regard to the true destiny of life and the importance of death; it alone furnishes a solution of the enigma of suffering, inasmuch as it shows man living in a land of exile and suffering as a means of acquiring the glory and happiness of a future life. By its doctrines of the efficacy of repentance and the practice of confession it relieves the moral suffering of man; it forbids and prevents to a large extent the disorders of life; in a word it is of a nature to prevent the causes which are calculated to impel a man to the extreme act.

General works of moral theology as also of moral philosophy, especially in reference to the principles as well as the frequency and causes of suicide: Walter in *Staatslexikon* (2nd ed., Freiburg, 1903), s. v. *Selbstmord;* Masaryk, *Der Selbstmord als sociale Massenerscheinung der modernen Civilisation* (Vienna, 1881); Morselli, *Suicide, International Scientific Series* (New York, 1882); Bailey, *Modern Social Conditions* (New York, 1906); Schnapper-Arndt, *Socialstatistik* (Leipzig, 1906); Krose, *Des Selbstmord im 19^{en} Jahrhundert* (Freiburg, 1906); Nieuwbarn, *Beknopt kerkelyk Handwoordenboek* (Tilburg, 1910); Jacquart, *Essais de statistique morale:* I, *Le Suicide* (Brussels, 1908).

A. Vander Heeren.

Suidas (*Σουΐδας, Σούδας*), author of, perhaps, the most important Greek lexicon or encyclopedia. Nothing is known of Suidas himself except that he lived about the middle of the tenth century, apparently at Constantinople, and that he was probably an ecclesiastical person devoted to literary studies. But his lexicon is one of the most valuable documents of Greek philology, grammar, and literary history. He uses material from the classical period down to his own time; a long chain of later authors, from Eustathius of Thessalonica (c. 1192), quote from him. Suidas's lexicon is something between a grammatical dictionary and an encyclopedia in the modern sense. He explains the source, derivation, and meaning of words according to the philology of his period, using such earlier authorities as Harpokration and Hellados. There is nothing specially important about this part of his work. It is the articles on literary history that are valuable. In these he gives a supply of details, and to some extent quotations, from authors whose works are otherwise lost. He uses older *scholia* to the classics (Homer, Thucydides, Sophocles, etc.), and for later writers, Polybius, Josephus, the "Chronicon Paschale", George Syncellus, George Hamartolus, and so on.

So his lexicon represents a convenient work of reference for persons who played a part in political, ecclesiastical, and literary history in the East down to the tenth century. His chief source for this is the encyclopedia of Constantine VII Porphyrogenitus (912-59), and for Roman history the excerpts of John of Antioch (seventh century). Krumbacher (op. cit., 566) counts two main sources of his work: Constantine VII for ancient history, Hamartolus (Georgios Monarchos) for the Byzantine age. The lexicon is arranged, not quite alphabetically, but according to a system (formerly common in many languages) called *antistoichia* (ἀντιστοιχία); namely the letters follow phonetically, in order of sound (of course in the pronunciation of Suidas's time, which is the same as modern Greek). So for instance αι comes after ε; ει, ηι come together after ζ, ω after ο, and so on. The system is not difficult to learn and remember, but in some modern editions (Bekker) the work is rearranged alphabetically. Suidas contains much material for church history among his biographical articles. But there is very little of this kind that is not also known from other sources. His lexicon still may fulfil its original purpose as a convenient work of reference.

Demetrios Chalkondyles published the *editio princeps* at Milan in 1499. Gaisford, *Suidæ lexicon* (3 vols., Oxford, 1834); Bernhardy, *Suidæ lexicon* (2 vols., Halle and Brunswick); Bekker, *Suidæ lexicon* (Berlin, 1854); Fabricius-Harles, *Bibliotheca græca* (Hamburg, 1790–1809); VI, 389–595; *P. G.*, CXVII, 1193–1424; Volkmann, *De Suidæ biographicis quæstiones selectæ* (Bonn, 1861). Krumbacher, *Byzantinische Litteratur* (Munich, 1897), 562–70.

Adrian Fortescue.

Suitbert (Suidbert), Saint, Apostle of the Frisians, b. in England in the seventh century; d. at Suitberts-Insel, now Kaiserswerth, near Düsseldorf, 1 March, 713. He studied in Ireland, at Rathmelsigi, Connacht, along with St. Egbert (q. v.). The latter, filled with zeal for the conversion of the Germans, had sent St. Wihtberht, or Wigbert, to evangelize the Frisians, but owing to the opposition of the pagan ruler, Rathbod, Wihtberht was unsuccessful and returned to England. Egbert then sent St. Willibrord and his twelve companions, among whom was St. Suitbert. They landed near the mouth of the Rhine and journeyed to Utrecht, which became their headquarters. The new missionaries worked with great success under the protection of Pepin of Heristal, who, having recently conquered a portion of Frisia, compelled Rathbod to cease harassing the Christians. Suitbert laboured chiefly in North Brabant, Guelderland, and Cleves. After some years he went back to England, and in 693 was consecrated in Mercia as a missionary bishop by St. Wilfrid of York. He returned to Frisia and fixed his see at Wijkbij Duurstede on a branch of the Rhine. A little later, entrusting his flock of converts to St. Willibrord, he proceeded north of the Rhine and the Lippe, among the Bructeri, or Boructuari, in the district of Berg, Westphalia. This mission bore great fruit at first, but was eventually a failure owing to the inroads of the pagan Saxons; when the latter had conquered the territory, Suitbert withdrew to a small island in the Rhine, six miles from Düsseldorf, granted to him by Pepin of Heristal, where he built a monastery and ended his days in peace. His relics were rediscovered in 1626 at Kaiserswerth and are still venerated there. St. Suitbert of

Kaiserwerdt is to be distinguished from a holy abbot, Suitbert, who lived in a monastery near the River Dacore, Cumberland, England, about forty years later, and is mentioned by Venerable Bede.

A. A. MacErlean.

Sullivan, Alexander Martin, Irish politician, lawyer, and journalist, b. at Bantry in 1830; d. at Darty Lodge, Rathmines, Dublin, 17 Oct., 1884. He received his early education in his native town. Drifting into journalism in 1850, he became assistant-editor of the "Nation" in 1855, and was subsequently editor and proprietor. In 1861 he married Frances, daughter of John Donovan of New Orleans. From 1861 to 1884, in conjunction with his elder brother, T. D. Sullivan (still living), he made the "Nation" one of the most potent factors in the cause of true nationality, and also issued the "Weekly News" and "Zozimus". In 1874 he was elected M. P. for Louth, and was afterwards M. P. for Meath. Called to the Irish Bar in 1876, he was made Q. C. in 1881. As a member of the Dublin Corporation he secured a magnificent site for the Grattan Monument, towards which he generously gave £400, the amount of a subscription by his admirers while he was undergoing imprisonment for a political offence in 1868. This monument was formally unveiled, January, 1876. Between the years 1878 and 1882 he was engaged in many notable trials. His last great case was on 30 November, 1883, when he was the colleague of Lord Russell of Killowen in the defence of Patrick O'Donnell for the murder of James Carey, the Irish Informer. He was buried at Glasnevin. In addition to his labours Alexander Sullivan was a great temperance reformer. He also wrote two notable books, the "Story of Ireland" and "New Ireland", and contributed many sketches (including some verse) to "Irish Penny Readings" (1879–85).

Sullivan, Peter John, soldier, lawyer, b. at Cork, Ireland, 15 March, 1821; d. at Cincinnati, Ohio, 2 March, 1883. His parents brought him to Philadelphia when he was two years old, and he received his education at the University of Pennsylvania. He served in the Mexican War, receiving the commission of major for meritorious services. After retiring to civil life he became one of the official stenographers of the U. S. Senate and in 1848 went to live in Cincinnati, where he was admitted to the Bar. He was prominent there as an opponent of the Know-nothing movement. During the Civil War he took a very active part in organizing several volunteer regiments and went to the scene of action as colonel of the 48th Ohio regiment. On 13 March, 1865, he was brevetted Brigader-General of Volunteers. Soon after he was appointed U. S. Minister to Colombia and held that office until 1869. He then returned to the practice of the law.

Thomas F. Meehan.

Sully, Maurice de, Bishop of Paris, b. of humble parents at Sully-sur-Loire (Soliacum), near Orléans, at the beginning of the twelfth century; d. at Paris, 11 Sept., 1196. He came to Paris towards 1140 and studied for the ecclesiastical state. He soon became known as an able professor of theology and an eloquent preacher. It has been frequently asserted, but without sufficient proof, that he was canon of Bourges. In 1159 he appears as Archdeacon of Paris and on 12 Oct., 1160, largely through the influence of Louis VII, he was elected to succeed Peter Lombard in the episcopal see of that city. The present Cathedral of Notre-Dame stands as a monument to his episcopal administration. Its construction was begun and almost entirely completed under him. Alexander III, in 1163, laid the cornerstone of the magnificent edifice, and in 1185 the Patriarch of Jerusalem, Heraclius, officiated in the completed sanctuary. Maurice de Sully also rebuilt the episcopal palace in which the nobility and clergy met in 1179 at the coronation of Philip Augustus as joint ruler with his father Louis VII. He enjoyed in a high degree the confidence of both rulers, accompanied Louis to his meeting with Frederick Barbarossa at Saint-Jean-de-Losne in 1162, and was one of the guardians of the royal treasury during the crusade (1190).

In the controversy between St. Thomas Becket and King Henry II he energetically defended the former and, in three letters still extant, pleaded his cause with Alexander III. He forbade the celebration of the feast of the Immaculate Conception in his diocese, but is said to have strongly supported by appeals to Holy Writ (Job, xix, 25–27) the doctrine of the resurrection of bodies, against some sceptical noblemen. Although he retained the administration of his diocese, he retired, late in life, to the monastery of Saint-Victor, where he died. Maurice de Sully is the author of a treatise on the Canon of the Mass, preserved in manuscript at Bourges. Numerous sermons, some in Latin, others in vernacular, are also attributed to him. Those written in the Latin tongue were not directly destined for the people, but rather for the use and study of the clergy. The French sermons do not seem to be in their present form the original work of Maurice de Sully; they are more commonly considered as reproductions made by ecclesiastics from his Latin collection. No critical edition of these sermons has yet been published; his three letters to Alexander III are printed in P. L., CC, 1419–22, as are also some of his official documents (CCV, 897–914).

Baunard, *Maurice de Sully* (Orleans, 1862); Mortet, *Maurice de Sully, évêque de Paris, 1160–96* (Paris, 1890); Meyer, *Les manuscrits des sermons français de Maurice de Sully* in *Romania*, XXIII (1894); Hiatt, *Notre-Dame de Paris* (London, 1902).

Sulpicians in the United States.—The Sulpicians came to the United States at the very rise of the American Hierarchy. When the French Revolution was threatening to involve them in the impending ruin of the Church the superior-general, Father Emery, looking for a place of refuge abroad, was meditating an establishment at Gallipolis, a French settlement on the Ohio; but the papal nuncio at Paris, Cardinal Dugnani, made the happier suggestion of Baltimore, which had just been erected into the first American see. An interview in London between Bishop Carroll, who had come to England (1790) for episcopal consecration, and Father Nagot resulted in the bishop gladly accepting the offer of Father Emery to found a theological seminary at Baltimore. On 10 July, 1791, four Sulpicians landed at Baltimore: Francis Charles Nagot, Superior, Anthony Garnier, Michael Levadoux, and John Tessier. They purchased the One Mile Tavern on the edge of the city, dedicated the house to the Blessed Virgin, and in October opened classes with five students whom they had brought from France. This was the beginning of St. Mary's, the first American seminary, which still stands on the same spot. The number of Sulpicians was augmented the following year by the arrival of Flaget, David, Chicoisneau, Maréchal, Richard, and Ciquard, and in 1795 by the accession of Dubourg, nearly all of whom were destined to become important figures in the history of the American Church. These ten or eleven new workers were a large accession to the small body of American priests, then only about thirty-five, who were endeavouring to serve a diocese extending from the Atlantic to the Mississippi Valley. The Church was in its infancy; there was no organized community of priests (since the suppression of the Jesuits), no teaching sisterhood, no Catholic schools. An academy for boys was about to open at Georgetown. Non-Catholic education in Maryland was almost as backward as the Catholic. In these conditions Bishop Carroll's greatest need and most difficult task, as he had long recognized, was to recruit a sufficiently numerous and fit clergy, if possible native, which he could hope for only from a seminary. Naturally, he welcomed the coming of the Sulpicians as "a great and auspicious event" for his diocese.

But the time was not ripe for a seminary as there were no students prepared to enter it. Georgetown Academy, founded chiefly to develop priestly vocations, instead of being an aid to the seminary drew on St. Mary's few students to recruit its teaching staff. The natural remedy of opening a preparatory seminary at Baltimore was forbidden (see below). The almost hopeless condition may be judged from the fact that during each of the first three years there were only five students and in the next year, 1794, only two, nearly all of whom were from Europe; from 1795 to 1797 there were none at all. So with little or no opportunity of cultivating their own field, the Sulpicians offered themselves to the bishop for any work at hand. Flaget, David, Maréchal, and Dubourg taught at the Georgetown Academy; Dubourg, an enterprising and energetic man, being made president (1796–99), greatly increased its numbers and prestige. Ciquard worked among the Indians of Maine; Levadoux, Dilhet, and Richard among the French and the Indians of Illinois and Michigan. Richard, still well remembered at Detroit, which some years ago placed his statue on the city hall, deserves special mention. He restored religion, established Catholic schools, founded a young ladies' academy and a preparatory seminary for young clerics, set up the first printing press in the West, published the first newspaper in Michigan and the first Catholic paper in the United States; was a founder, vice-president, and professor of the University of Michigan and the only Catholic priest ever elected to Congress. Gallitzin, a pioneer priest in Western Pennsylvania, converted six thousand non-Catholics. The Sulpicians at Baltimore ministered in the churches of the city and the missions of the country. They were considered as clergy of the cathedral and are credited with having introduced into the United States some of the dignity and splendour of old-world Catholic worship.

St. Mary's Seminary.—After a trial of ten or eleven years the seminary at Baltimore had no prospects of success; an academy which Dubourg had opened for foreign boys was not allowed to receive Americans (see below); the Sulpicians there had no means of support. Meanwhile, the Revolution in France had passed, religion was restored by Napoleon, and the seminaries were being reopened. In these circumstances of 1802 only one course seemed possible to the superior-general in Paris: to recall his subjects to France gradually. Bishop Carroll, who had the highest esteem for the Sulpicians and regarded them as the hope of his diocese, was very deeply afflicted by this resolution, and in many letters begged Father Emery not to carry it out. "If it be necessary for me", he wrote, "to bear the terrible trial of seeing the greater number of them depart, I implore you to leave here at least a germ which may produce fruit in the season decreed by the Lord." Nevertheless, Garnier (who afterwards became superior-general), Maréchal, and Levadoux departed for France in 1803, though with the greatest reluctance; Nagot was detained from going by ill-health. The seminary seemed doomed. It was saved by Pius VII, whom Father Emery, moved by the bishop's appeals, consulted at Paris in 1804. "My son," said the pope, "let it stand, let that seminary stand. It will bear fruit in its own time." Father Emery accepted these words as the voice of God, and the Sulpicians remained. But progress was slow; St. Mary's College, Baltimore, and Mt. St. Mary's, Emmitsburg, both founded by the Sulpicians (see below), furnished few students to the seminary. Still, Bishop Carroll had the consolation of seeing thirty priests ordained from there before his death in 1815.

Under the second superior, Father Tessier (1810–29), the seminary became solidly established, although the number of ordinations averaged only two or three a year. His chief support up to 1817 was Father Ambrose Maréchal, whose abilities raised him in that year to the Archbishopric of Baltimore. In 1822 St. Mary's Seminary was endowed by Pius VII with all the privileges of a Catholic university. The third superior, Father Louis Regis Deluol (1829–49), a man of exceptional ability and character, exerted a strong influence not only on the seminary and college over which he presided, but on the general affairs of the Church in America. St. Charles' College was founded during his administration. St. Mary's College was suppressed under his successor, Father Francis L'Homme (1849–60). The Irish immigration, the spread of Catholicism, and the foundation of St. Charles' College, contributed to render the seminary as fruitful in vocation in the one decade of Father L'Homme's administration as it had been in the preceding sixty years. Two directors at St. Mary's, Fathers Alphonse Flammant (1856–64) and Francis Paulinus Dissez (1857–1907), deserve mention here as saintly men who deeply influenced Cardinal Gibbons, the first Archbishop Keane of Dubuque, and other leaders of the American Church. A half-century of teaching at St. Mary's made Father Dissez one of the best known and most venerated priests of America.

St. Mary's prospered and grew under the fourth superior, Father Joseph Paul Dubreul (1860–78), and still more under his successor, Father Alphonse Magnien (1878–1902), who saw an enrolment of over three hundred students. Father Dubreul built the central portion of the present seminary in 1878: the building was completed by Father Magnien. All that remains from the old days is the sisters' house, in which Mother Seton began her work as a Sister of Charity, and the seminary chapel, built in 1806, which long served as a parish church and was regarded in those days as a gem of architecture. Both Dubreul and Magnien were marked types of the true ecclesiastic, and moulded the character of hundreds of priests now living. Probably no priest in our day was better known or better loved by priests than the good and genial "Abbé" Magnien. He was the close friend and trusted adviser of Cardinal Gibbons, who said of him some time after his death: "I had been so much accustomed to consult the venerable Abbé on important questions, and to lean upon him in every emergency, that . . . I feel as if I had lost my right arm. He was indeed *dimidium animæ meæ.*" The present superior, Father Edward Randall Dyer, D.D., was appointed in Aug., 1902, after Father Magnien's health had failed. St. Mary's Seminary has given over thirty bishops and eighteen hundred priests to the Church of America, of whom more than fourteen hundred are still living. The largest of our American seminaries, and national in its scope, it draws its students from every quarter of the country. It has always taken a leading part in the seminary conferences of the Catholic Educational Association. It was the scene of the Third Plenary Council and of many notable ecclesiastical gatherings. Its archives and library are rich in materials of early American Church History.

St. Mary's College, Baltimore.—The impossibility of getting students for the seminary led the fathers to teach Latin to a few boys in 1793–94, in the hope of recruiting vocations; but this was discontinued through fear of injuring the Georgetown Academy. Father Dubourg resigned the presidency of Georgetown in 1799 in order to found a college at Havana. Unsuccessful in the attempt, he returned to Baltimore in Aug., 1799, with three young Spaniards; these, with a few French boys, he lodged and instructed at the seminary. In the following year a building was erected for them alongside the seminary, and the institution was named St. Mary's College. In deference to the wishes of the bishop, no American boys were admitted, but many students came from Cuba, San Domingo, Jamaica, and Porto Rico, besides French boys from the United States. In 1803 the doors were opened to American students, without distinction of creed; and in 1805 the college was raised to the rank of a university by an act of the legislature. The students numbered then, or in the following year, 106, which was considered a remarkable success; for the history of all higher education in Maryland up to that time had been, almost without exception, a record of failures. It drew students from the whole country, but chiefly from Maryland and the neighbouring states, north and south. Many were non-Catholics. Some continued to come from the West Indies and from Central America. The college had vicissitudes, chiefly financial, but it maintained a high standard and enjoyed a high reputation, for it was conducted by able men who brought the culture of France to a country where education was still in a very crude condition. Its student roll rose at times to two hundred or over. Among its eleven presidents are numbered Archbishops Dubourg and Eccleston, and Bishops David, Bruté, and Chance; and the names of many bishops and notable priests and citizens are found on the list of its professors and students.

Despite its half-century of useful and distinguished work, it did not adequately fulfil the main purpose of its foundation; a college, frequented by sons of rich parents, and containing many non-Catholics, was found unfavourable to the fostering, and even to the preservation, of priestly vocations. Accordingly it was resolved in 1848, on the occasion of the official visit of Father Faillon from Paris, to suppress St. Mary's College and start an ecclesiastical college. In the autumn of that year, St. Charles' College was opened (see below); and in 1852 St. Mary's College by order of the superior-general, Father de Courson, was closed at the height of its prosperity. By an understanding with the Jesuits, Loyola College supplied its place.

Mount St. Mary's, Emmitsburg.—The necessity of a strictly clerical school had forced itself upon the mind of Father Nagot in the first years of St. Mary's College. In 1806 this saintly old man of over seventy gathered about a dozen boys around him at Pigeon Hill, Adams Co., Pennsylvania, in a Catholic region that had long been ministered to by the Jesuits. After two years of instruction, they were transferred to the care of the Rev. John Dubois (q. v.), pastor of Emmitsburg, Maryland, who himself was already instructing a few boys. In 1808 Father Dubois, who had become a Sulpician, acquired land and built Mount St. Mary's College, in the name of the Society of St.-Sulpice. He did heroic work, single-handed, as teacher and as pastor. In 1812 he was joined by Father Bruté. Together they were the main factors in creating a flourishing college where the spirit of Catholic piety reigned and was very fruitful in vocations. Mount St. Mary's, founded to supply vocations to St. Mary's Seminary, became a rival by force of circumstances, for it could obtain teachers only by retaining the graduates of the college who taught the younger boys at the same time they pursued their clerical studies. It also became a rival of St. Mary's College when it began to admit boys who did not aspire to the priesthood, and even non-Catholics. For these, and also for financial reasons, the Society of St.-Sulpice in 1826 made an amicable separation from Mount St. Mary's, which has continued the noble spirit of Bruté and Dubois and done invaluable services to the Church of America.

St. Charles' College, Ellicott City.—Persisting in the effort to establish a purely clerical college, according to the spirit of their vocation and the mind of the Church, the Sulpicians, in 1831, laid the cornerstone of St. Charles' College, near Ellicott City, Maryland. The ground, together with a small sum of money, had been donated by Charles Carroll of Carrollton, who survived to witness the cornerstone laying. Lack of funds long delayed the completion of the college. It was opened in 1848 with four students by the Rev. Oliver Jenkins, who became its first president. In ten or twelve years the students numbered over a hundred. Here, at last, was a strictly clerical college, firmly established, giving a solid classical education and maintaining the purest traditions of clerical discipline and spirit. St. Charles' became well known throughout the country, no section of which has not been well represented among its student body. The enrolment for years has been about two hundred. It has trained over fourteen hundred priests for the American Church and pointed the way to the clerical colleges now becoming numerous and most helpful. Father Jenkins remained president till 1869, though he had been temporarily replaced by the Revs. G. Raymond (1849–51) and S. Ferté, D.D. (1851–52). His successors have been Father Ferté (1869–76), Revs. P. P. Denis (1876–86), F. M. L. Dumont (1886–94), Charles B. Rex (1894–97), Charles B. Schrantz (1897–1906), and F. X. McKenny. To the older generations of students the best remembered of the professors is Father J. B. Menu, who for forty years (1849–88) "hammered Latin and Greek into the most stubborn heads". The best known to the outside world is Father John B. Tabb, a true poet, whose exquisite lyrics have won him a secure place in English literature. The spacious building, with its beautiful chapel, its libraries, and valuable documents, was destroyed by fire on 16 March, 1911. Classes were resumed in a few weeks in temporary quarters at Cloud Gap, near Baltimore. On that spot the fathers have now begun (1912) the construction of a new and greater St. Charles.

St. John's Seminary, Brighton, was opened in 1884 and entrusted by the Most Rev. John J. Williams, Archbishop of Boston, to the care of the Sulpicians, whose pupil he had been at Montreal and Paris. Its presidents have been the Very Revs. John Hogan (1884–89, 1894–1901), Charles B. Rex (1889–94), Daniel E. Maher (1901–06), and Francis P. Havey (1906–11). In June, 1911, at the request of the Most Rev. William H. O'Connell, Archbishop of Boston, the Sulpicians withdrew from the seminary.

St. Joseph's Seminary, Yonkers. — Archbishop Hughes, who had been their pupil at Mount St. Mary's, had desired the Sulpicians, in 1862, to assume charge of the seminary about to be opened at Troy, New York. This wish was carried out only in 1896, under Archbishop Corrigan, when St. Joseph's Seminary was transferred to Dunwoodie, Yonkers, New York. The first rector was the Very Rev. E. R. Dyer, 1896–1902. Called to the presidency of St. Mary's Seminary, Baltimore, he was succeeded by the Very Rev. James F. Driscoll. In January, 1906, Father Driscoll and four of his associates withdrew from the Society of St-Sulpice, and were accepted by Archbishop Farley into his diocese, continuing their work in the seminary, which thus passed from the charge of the Sulpicians.

St. Patrick's Seminary, Menlo Park.—The Sulpicians, whose houses had hitherto been located in the Atlantic states, accepted a call to the Far West in 1898. Most of the students for the San Francisco archdiocese had for many years been sent to St. Mary's Seminary, Baltimore. A long-cherished desire of Archbishop Riordan was realized when St. Patrick's Seminary was opened 20 Sept., 1898, under the care of the Sulpicians. The institution was to comprise a preparatory seminary or college and a seminary proper, of philosophy and theology. It began with only three classes of the college department, the succeeding classes in the college and seminary being added according as the students were prepared. Very Rev. A. J. B. Vuibert was the first president of the college department,and had under him, at the beginning, seven professors, four of whom were Sulpicians, and twenty-eight students. He was succeeded in 1911 by Rev. John J. Doran, S.S. The theological department was opened in 1904, when Very Rev. Henry A. Ayrinhac, S.S., D.D., became president of the seminary. The magnificent structure was greatly damaged in the earthquake of 1906, but was soon restored, thanks to the characteristic energy of Archbishop Riordan. There are at present over one hundred students in this flourishing and hopeful young seminary.

Catholic University. — Leo XIII, in granting a constitution to the Catholic University of America, laid upon the Sulpicians the duty of caring for the discipline and spiritual direction of the ecclesiastical students and of assisting them in the choice and pursuit of their studies. Divinity College was opened in October, 1889, under Very Rev. John B. Hogan, who remained president till 1894. His successors have been Very Revs. F. M. L. Dumont (1894–1911), and John F. Fenlon.

St. Austin's College.—The aspirants to the Society of St-Sulpice pursue their studies in the seminary, undistinguished from the other students; until recently, the American aspirants generally were sent to Rome or Paris for post-graduate studies after ordination and to the Solitude at Issy, near Paris, for their novitiate. In Oct., 1901, the American scholasticate of the Sulpicians, known as St. Austin's College, was opened near the Catholic University, Washington. The students, who are received only after having completed their seminary studies, follow courses at the university in philosophy, theology, science, or letters, to prepare themselves for work in college or seminary. It has been presided over by Very Revs. James F. Driscoll (1901–02), Daniel P. Duffy (1902–04), John F. Fenlon (1904–11), and Francis P. Havey. In 1911 the first American novitiate of the Sulpicians, known as the Solitude, was begun in this house under Father Havey as director.

The government of the Sulpician houses in the United States was, until recent years, dependent directly upon the superior-general in Paris. In 1903 the President of St. Mary's Seminary, Father Dyer, was appointed vicar-general of the Superior of St-Sulpice, an office resembling that of provincial in a religious order. He governs ordinary Sulpician affairs in the United States with the advice and assistance of his council. In the early days of the American hierarchy several Sulpicians were among its members: Maréchal (1817–28), and Eccleston (1834–51), Archbishops of Baltimore; Flaget, first Bishop of Bardstown (1810–50), with David (1819–41), and Chabrat (1834–47), as coadjutors; Dubourg, Bishop of New Orleans (1815–26), died Archbishop of Besançon in 1833; Dubois of New York (1826–42); Bruté, first Bishop of Vincennes (1834–39), who, with Flaget and David, is well remembered for great sanctity of life; Chance, first Bishop of Natchez (1841–52); Vérot, Bishop of Savannah (1859–70); afterwards first Bishop of St. Augustine (1870–76), of which he had been vicar Apostolic in 1858; and O'Farrell, Bishop of Trenton (1881–94). More than twenty American archbishops, past and present, and more than sixty bishops have received their clerical formation, at least in part, in Sulpician houses at home or abroad. All the rectors of the Catholic University have been their pupils. Father David, sent by Father Emery with Bishop Flaget to establish a seminary, founded St. Thomas's Seminary at Bardstown, and taught its students almost single-handed for many years. The diocese had only three priests when he arrived in 1810; he trained up forty-seven, mostly natives, of whom the most illustrious is Martin J. Spalding. To this little-known seminary is attributed the greatest part in the preservation and spread of Catholicism in Kentucky.

Six seminaries in all, Baltimore, Bardstown, Brighton, Emmitsburg, Dunwoodie, and Menlo Park, were founded or directed by Sulpicians, and their traditions and spirit have been carried into many new institutions by their *alumni*. Largely through their efforts, the Propagation of the Faith was established in this country and for a long time developed. The Sisters of Charity at Emmitsburg were established by their direction and co-operation, and united, through Father Deluol, to the foundation of St. Vincent de Paul at Paris. Father Joubert founded the coloured sisterhood of the Oblates at Baltimore, and Father David the Sisters of Nazareth, in Kentucky. Bishop Dubourg introduced the Vincentians into the United States, also the Religious of the Sacred Heart. He was the founder of St. Louis Latin Academy which developed, under the Jesuits, into the St. Louis University. On Flaget's invitation the Good Shepherd Sisters came to this country. In the early days the Sulpicians ministered to the coloured Catholics of Baltimore, and since the foundation of St. Joseph's Seminary for work among the negroes, its students have made their seminary studies at St. Mary's. The secretarial work of the Negro and Indian Commission has always been carried on in connexion with St. Mary's Seminary. The fathers of the seminary have acted as secretaries or theologians in the synods and in the provincial and plenary councils of Baltimore. The literary productions of the Sulpicians have, almost without exception, grown directly out of their work as educators; they have written books on Latin grammar, history, ancient and modern, English literature, liturgy, rubrics, dogmatic and moral theology, Holy Scripture, devotion, etc. They have translated many standard French works into English, and English into French. Their best-known writers are Father Hogan, whose "Clerical Studies" is the classic of its subject, and Father Adolphe Tanquerey, whose text-books on dogmatic and moral theology are used in numerous seminaries throughout the world.

JOHN FRANCIS FENLON.

Sulpicius Severus, an ecclesiastical writer, b. of noble parents in Aquitaine c. 360; d. about 420–25. The scanty information which we possess concerning his life is derived mainly from the writings of his friend Paulinus of Nola and Gennadius. He enjoyed excellent educational advantages, studied jurisprudence, and was renowned as an eloquent lawyer. His marriage with the daughter of a wealthy consular family seemed to seal his earthly happiness. His wife, however, was snatched away by a premature death and shortly after 390 Severus renounced his brilliant career and followed his friend Paulinus into monastic retirement. Through this sudden change of life he incurred his father's displeasure, but was encouraged in his determination by his mother-in-law. He became a personal friend and enthusiastic disciple of St. Martin and lived near Eauze, at Toulouse and Luz in Southern France. His ordination to the priesthood is vouched for by Gennadius, but no details of his priestly activity have reached us. According to the same Gennadius he was caught in the toils of Pelagianism towards the close of his life and, upon discovering his error, subjected himself to lifelong silence in expiation of his imprudence in speech.

The following works are undoubtedly genuine: (1) "The Chronicle"; (2) "Life of St. Martin"; (3) two dialogues, formerly divided into three; (4) three letters. "The Chronicle" ("Chronicorum Libri duo" or "Historia sacra") extends from the creation of the world to A. D. 400, but omits the historical events recorded in the New-Testament writings. It was published in or after 403 and has been preserved in a single eleventh-century manuscript. It is a source of primary importance for the history of Priscillianism and contains considerable information respecting the Arian controversy. More popular during the Middle Ages was his "Life of St. Martin", as were also the dialogues and letters which relate to the same subject. The biography was written during the lifetime of the saint, but was published only after his death. Like the dialogues, it abounds in miraculous events. Beside the above-mentioned three letters, seven others have been attributed to Severus. These are rejected as spurious by some critics, whilst the genuineness of the first two is admitted, rightly it would seem, by others. The "World Chronicle" of the so-called Sulpicius Severus has nothing to do with the subject of this biography; it was written in Spain in the sixth century. Sulpicius Severus has been rightly styled the Christian Sallust; his diction, notably in the "Chronicle", is elegant and reminds the reader of the classical age.

His works are to be found in *P. L.*, XX, 95–248; later edition by HALM in *Corpus script. eccl. lat.*, I (Vienna, 1866); BERNAYS, *Über die Chronik des Sulpicius Severus* (Berlin, 1861); BARDENHEWER, tr. SHAHAN, *Patrology* (St. Louis, 1908), 451–53; BENNETT in *Dict. Christ. Biog.*, s. v. *Severus (18)*. N. A. WEBER.

Sulpitius.—Two bishops of Bourges bore this name. (1) The first, St. Sulpitius the Severe, wrongly identified with Sulpicius Severus, the historian of St. Martin, was raised to the see in 584. He was, says St. Gregory of Tours, a man of high birth, one of the first senators of Gaul, of great oratorical talent, and expert in the art of poetical rhythms. The See of Bourges having become vacant with the death of Remigius, several candidates offered gifts to King Gontran to secure the assistance of his favour. But the latter rejected all these simoniacal gifts to favour the election of Sulpitius. He was elected, given Holy orders, and consecrated bishop. Shortly afterwards he held a council in Auvergne, to adjust the dispute which had arisen between two of his suffragans, Innocentius, Bishop of Rodez, and Ursicinus, Bishop of Cahors, with regard to parishes for which they contended. The council decided that the Bishop of Cahors should retain the contested parishes, which the Bishop of Rodez had not proved that he or his predecessors had long possessed. Sulpitius assisted at a Council of Mâcon in 585; he died in 591, his feast being inserted in the Roman Martyrology on 29 January.

(2) Sulpitius the Pious (or the Débonnaire), b. at Vatan (Diocese of Bourges), of noble parents, before the end of the sixth century, devoted himself from his youth to good works and the study of Holy Scripture. Austregisilus, Bishop of Bourges, ordained him cleric of his church, then deacon, and finally made him director of his episcopal school. Clotaire II, King of the Franks, who had heard his merits spoken of, summoned him and made him chaplain of his armies. But at the death of Bishop Austregisilus (c. 624) he was recalled to Bourges to take his place. Sulpitius thenceforth laboured with much zeal and success to re-establish ecclesiastical discipline, for the relief of the poor and the conversion of the Jews. In 626 he assisted at the Council of Clichy and held several others with the bishops of his province, but nothing of them remains. He intervened with King Dagobert in behalf of his flock, of whom a too heavy tax was exacted. At the request of the same king he consecrated to the See of Cahors his treasurer St. Didier, who was his personal friend, and there are extant three letters which he addressed to him. Towards the end of his life Sulpitius took a coadjutor, Vulfolnde, and retired to a monastery which he had founded near Bourges. There he died 17 Jan., 646, which day several MSS. of the Hieronymian Martyrology indicate as his feast. In his honour the church bearing his name was built in Paris, from which the Society of St. Sulpice derives its own.

Sumatra, PREFECTURE APOSTOLIC OF, erected by a Decree of 30 June, 1911, and entrusted to the Dutch Capuchins. Previously it formed part of the Vicariate Apostolic of Batavia (q. v.), which is under the care of the Jesuits of Holland. The new prefecture comprises Sumatra and the surrounding islands, including Bangka (area, 4888 sq. miles; population, 78,000). The Island of Sumatra, referred to as Jabadin by Ptolemy, and visited by Marco Polo in 1292, was discovered by the Portuguese navigator Siqueira in 1508, and occupied by the Dutch in 1599. It extends from 95° 16′ to 106° 3′ E. long., and from 5° 40′ N. to 5° 59′ S. lat., and has an area of about 181,000 square miles. The natives, of Malayan race, number about 5,500,000, exclusive of the little known inland tribes. They are indolent and cruel; their religion is a mixture of fetishism and Mahommedanism. At the beginning of 1911 the Jesuits had four chief mission centres in Sumatra,—at Medan, Padang, Koata Radja, and Tandjeong-Sakti,—and sixteen minor stations. The Sisters of Charity of Tilburg (Holland) were established at Padang. There were two mission schools, and 4600 Catholics of whom 3200 were Europeans.

Summæ (SUMMULÆ), compendiums of theology, philosophy, and canon law which were used both as textbooks in the schools and as books of reference during the Middle Ages. Some historians of theology cite Origen's *περὶ ἀρχῶν* as the first summary of Catholic theology. Others consider that the first in point of time is "De Trinitate" by St. Hilary of Poitiers. Quite recently the distinction has been accorded to Radulfus Ardens, an eleventh-century theologian and preacher, a native of Beaulieu, author of a comprehensive "Speculum Universale", still in MS. In this wide sense of the word, however, the encyclopedic treatises of St. Isidore, Rabanus, Maurus etc., entitled "De Etymologiis" or "De Universo" might also be considered to be summaries of theology and philosophy. In the stricter sense of the word, "Summa" is applied to the more technical systematic compendiums which began to appear in the twelfth century. An alternative title is "Sentences" (*Libri Sententiarum*), the diminutive, "Summulæ", being of later origin. What is peculiar to these "summists" or "sententiaries", as the authors of these works are called, is the adoption of the method first suggested by Gerbert in his "De Rationali et Ratione Uti", and used by Abelard in his "Sic et Non". This consisted in an exposition of contradictory views, the affirmative and negative; and progress towards the final form of the thirteenth-century "Summæ" is marked by the greater care which was taken, as time went on, to explain in a systematic manner the apparent contradiction among the conflicting opinions presented. Besides this method of exposition, the twelfth-century summists adopted dialectic definitely as a means of elucidating, not only philosophical, but also theological truth. Finally the summists adopted more or less unanimously a fixed division of the field of theology and philosophy, and adhered more or less closely to a definite order of topics. Here, of course, there was room for individual preferences in the matter of arrangement and sequence of problems, as we see when we compare with one another the "Summæ" even of the latest period of Scholasticism.

The first great summist was Peter Lombard (died 1160), author of the "Books of Sentences" and surnamed "Master of Sentences". The order of topics in the "Books of Sentences" is as follows: In the first place, the topics are divided into *res* and *signa*, or things and signs. "Things" are subdivided into I. The object of our happiness, God—to this topic Peter devotes the first book; II. Means of attaining this object, viz., creatures—the topic treated in the second book; III. Virtues, men, and angels, that is, special means of happiness and subjects of happiness—the topic of the third book. The fourth book is devoted to *signs*, namely, the sacraments. How far Peter Lombard was influenced by earlier summists, such as Robert Pullen, Hugh of St. Victor, and the author of the "Summa Sententiarum" which was immediately inspired by Abelard's work, historians have not determined. It is generally admitted that the Lombard was not entirely original. He deserves his renown as the first great summist chiefly because, in spite of the opposition which his work met during his lifetime, its influence grew greater in time, until in the thirteenth century it was universally adopted as a text. Notwithstanding all that hostile critics of Scholasticism have said about the dryness and unattractiveness of the medieval "Summæ", these works have many merits from the point of view of pedagogy, and a philosophical school which supplements, as Scholasticism did, the compendious treatment of the "Summæ" with the looser form of treatment of the "Quæstiones Disputatæ" and the "Opuscula", unites in its method of writing the advantages which modern philosophy derives from the combination of textbook and doctor's dissertation. For a description of the "Summa Theologica" of St. Thomas, the most perfect specimen of this kind of literature, see THOMAS AQUINAS, SAINT. The term "Summulæ" was used, for the most part, to designate the logical compendiums which came to be adopted as texts in the schools during the thirteenth century. The best known of these is the "Summulæ Logicales" of Peter Hispanus, afterwards Pope John XXI.

Summer Schools, CATHOLIC.—A Catholic summer school is an assembly of Catholic clergy and laity held during the summer months to foster intellectual culture in harmony with Christian faith by means of lectures and special courses along university extension lines. It first took form in the Champlain Summer School which was founded at New London, Connecticut, 1892, and located permanently in 1893 at Cliff Haven, N. Y. The Columbian Summer School was established at Madison, Wisconsin, 1895, and is now permanently located at Milwaukee; the Winter school of New Orleans was founded in 1896, and the Maryland Summer School in 1900. This interesting feature of Catholic intellectual and sociological work in the United States is the natural development and coalescence of various tendencies previously existing in the Church, viz., reading circles, university extension, summer institutes.

(a) The reading circle has its germ in the Christian family. St. Philip Neri strongly urged the advantage of reading circles for people in the world. As a student at the Sorbonne, Frederick Ozanam organized a circle of this nature which was the origin of the Conference of St. Vincent de Paul. In the United States the reading circle appeared during the early part of the last century in the young men's lyceums where courses of lectures and literary exercises were held. In 1864 Very Rev. Isaac Hecker founded a library in connexion with the Sunday-school of St. Paul's Church, New York City, and prescribed that the reading and discussion of a book should form part of the Sunday-school class. Thus each class became a reading circle. The graduates of this Sunday-school formed in 1886 a reading circle, in the special sense of the term, called The Ozanam; its members meet weekly. In 1885 the Young Ladies' Sodality of Youngstown, Ohio, established a reading circle. In Dec., 1888, Miss Julia Perkins of Milwaukee strongly advocated through the "Catholic World" the establishment of these circles in every parish. Warren Mosher took up the work, and in April, 1889, organized the Catholic Educational Union. In June, 1889, the Paulists founded the Columbian Reading Union with Rev. Thomas McMillan as president. These unions have for their aim the propagation and unification of reading circles. The movement spread, and in Jan., 1891, the "Catholic Reading Circle Review" was established by Mr. Mosher as the organ of reading circles; it afterwards became the organ of the summer school. The Catholic Educational Union, the Columbian Reading Union, and the "Reading Circle Review" were strong advocates of a summer assembly. Thus, in germ, the Cliff Haven Summer School was an annual convention of the members of reading circles.

(b) The purpose of university extension is to bring the university into touch with the people and make its influence of wider scope. This is attained through a body of organized teachers formed from graduates of the university, who travel through the country and give series of lectures; attendance at these lectures with examination may entitle to a university degree. Thus the university is brought to people who otherwise could not have access to it. The phrase itself became current through discussion on university reform in England, begun in 1850, and resulting in the new statutes of 1880. The movement spread to America and became a part of American university life. Thus the Cliff Haven Summer School received from the Regents of the University of the State of New York, 9 Feb., 1893, a charter by virtue of which it received legal existence as a corporation under the laws of the State of New York, and was classified within the system of public instruction devoted to university extension. Under university extension should be included the Association Catholique de la Jeunesse Française organized in 1886, the School of Social Science of Munchen-Gladbach founded in 1893 under the auspices of the Catholic Volksverein, and the Institute of Social Science established by Archbishop Farley at New York in 1911.

(c) The idea of summer institutes is not new to Catholic education. It has long been a recognized feature in the religious educational bodies of the Catholic Church, each teaching congregation holding summer institutes of its own members. In more recent years these teachers' institutes became diocesan in form, e. g., in Rochester, Los Angeles, and the Archdiocese of Oregon. In 1911 the Catholic University at Washington opened a summer institute which was attended by 284 teachers from 23 religious bodies, representing 56 dioceses and 31 states with 9 from Canada and 1 from England. The same year the De Paul University of Chicago opened a summer institute for teachers with an attendance of 125.

The coalescence of these three elements in the Cliff Haven Summer School has made it a characteristic and powerful factor of intellectual and social American Catholic life. The Young Men's National Union, organized in 1875, and the first Catholic National Congress of Baltimore, in 1889, had created the desire for lay Catholic national unity. At suggestion of Mr. Mosher, Mgr. James Loughlin, President of the Y. M. N. U., published, 17 Jan., 1892, in the "Catholic Review" of New York City, a letter urging the establishment of a summer assembly. Clergy, laity, and the press endorsed the project with enthusiasm. A meeting was held at the Catholic Club, New York City, 12 May, 1892, under the auspices of Archbishop Corrigan and plans were laid for an opening session at New London, Conn., 15 July to 5 August, 1892. One thousand persons representing twenty states were in attendance. Among the promoters were Mgr. James Loughlin, Mgr. M. J. Lavelle, Mgr. D. J. McMahon, Bishop Conaty, Mgr. John Walsh, Mgr. Henry Brann, Rev. Morgan Sheedy, Rev. John F. Mullany, Rev. F. P. Siegfried, Rev. Joseph H. McMahon, Rev. P. A. Halpin, Rev. John Talbot Smith, Rev. Thomas McMillan, C.S.P., Rev. Denis O'Sullivan, S.J., Very Rev. James P. Kiernan, Rev. Thomas P. Joynt, Rev. A. P. Doyle, C.S.P., Rev. Thomas Hughes, S.J., Rev. Walter P. Gough, Brother Azarias, Charles G. Herbermann, George Parsons Lathrop, Richard Malcom Johnson, Maurice Francis Egan, Mary Elizabeth Blake, Katherine E. Conway, John A. Mooney, Richard D. Clark, Thomas B. Fitzpatrick, John D. Crimmins, Hon. John B. Riley, John A. Haaran, George E. Hardy, John P. Brophy, Wm. R. Claxton, Jacques M. Mertens, Wm. J. Moran. Permanent organization followed with president, vice-president, secretary, treasurer, and a board of twenty-four trustees.

The following year an offer, made by the Delaware and Hudson Company through its agent, of 450 acres of land on the shore of Lake Champlain, three miles south of Plattsburg, N. Y., was accepted. The sessions of 1893, 1894, and 1895, were held in Plattsburg. In 1896 the session was held on the assembly grounds, named Cliff Haven. With the approbation of Leo XIII and Pius X, of the Apostolic delegates, Cardinal Satolli, Cardinal Martinelli, and Cardinal Archbishop Falconio, and of the hierarchy of the United States, the movement has grown with each year until it now has property valued at $500,000, courses of lectures covering eleven weeks, and an attendance of about 10,000. With a daily program of lectures, concerts, dramatic recitals, and social gatherings, it brings together in social intercourse Catholics from all parts of the country and offers a stimulus and an opportunity for study along lines of advanced thought. Its main purpose is: to give from the most authoritative sources among our Catholic writers and thinkers, the Catholic point of view on all the issues of the day in history, literature, philosophy, art, political science, upon economic and social problems that are agitating the world, upon the relations between science and religion; to state in the clearest possible terms the underlying truth in each and all of these subjects; to remove false assumptions; and to correct false statements. It thus meets a recognized want of clergy and laity, is an important popular educational centre in America, and has contributed much to organize Catholic intellectual forces and to solve the problems of American life.

Summons. See Citation.

Sunday (Day of the Sun), as the name of the first day of the week, is derived from Egyptian astrology. The seven planets, known to us as Saturn, Jupiter, Mars, the Sun, Venus, Mercury, and the Moon, each had an hour of the day assigned to them, and the planet which was regent during the first hour of any day of the week gave its name to that day (see Calendar). During the first and second century the week of seven days was introduced into Rome from Egypt, and the Roman names of the planets were given to each successive day. The Teutonic nations seem to have adopted the week as a division of time from the Romans, but they changed the Roman names into those of corresponding Teutonic deities. Hence the *dies Solis* became Sunday (German, *Sonntag*). Sunday was the first day of the week according to the Jewish method of reckoning, but for Christians it began to take the place of the Jewish Sabbath in Apostolic times as the day set apart for the public and solemn worship of God. The practice of meeting together on the first day of the week for the celebration of the Eucharistic Sacrifice is indicated in Acts, xx, 7; I Cor., xvi, 2; in Apoc., i, 10, it is called the Lord's day. In the Didache (xiv) the injunction is given: "On the Lord's Day come together and break bread. And give thanks [offer the Eucharist], after confessing your sins that your sacrifice may be pure". St. Ignatius (Ep. ad Magnes, ix) speaks of Christians as "no longer observing the Sabbath, but living in the observance of the Lord's Day, on which also Our Life rose again". In the Epistle of Barnabas (xv) we read: "Wherefore, also, we keep the eighth day (i. e. the first of the week) with joyfulness, the day also on which Jesus rose again from the dead".

St. Justin is the first Christian writer to call the day Sunday (I Apol., lxvii) in the celebrated passage in which he describes the worship offered by the early Christians on that day to God. The fact that they met together and offered public worship on Sunday necessitated a certain rest from work on that day. However, Tertullian (202) is the first writer who expressly mentions the Sunday rest: "We, however (just as tradition has taught us), on the day of the Lord's Resurrection ought to guard not only against kneeling, but every posture and office of solicitude; deferring even our businesses lest we give any place to the devil" ("De orat.", xxiii; cf. "Ad nation.", I, xiii; "Apolog.", xvi).

These and similar indications show that during the first three centuries practice and tradition had consecrated the Sunday to the public worship of God by the hearing of Mass and resting from work. With the opening of the fourth century positive legislation, both ecclesiastical and civil, began to make these duties more definite. The Council of Elvira (300) decreed: "If anyone in the city neglects to come to church for three Sundays, let him be excommunicated for a short time so that he may be corrected" (xxi). In the Apostolic Constitutions, which belong to the end of the fourth century, both the hearing of Mass and rest from work are prescribed, and the precept is attributed to the Apostles. The express teaching of Christ and St. Paul prevented the early Christians from falling into the excesses of Jewish Sabbatarianism in the observance of the Sunday, and yet we find St. Cæsarius of Arles in the sixth century teaching that the holy Doctors of the Church had decreed that the whole glory of the Jewish Sabbath had been transferred to the Sunday, and that Christians must keep the Sunday holy in the same way as the Jews had been commanded to keep holy the Sabbath Day. He especially insisted on the people hearing the whole of the Mass and not leaving the church after the Epistle and Gospel had been read. He taught them that they should come to Vespers and spend the rest of the day in pious reading and prayer. As with the Jewish Sabbath, the observance of the Christian Sunday began with sundown on Saturday and lasted till the same time on Sunday. Until quite recent times some theologians taught that there was an obligation under pain of venial sin of assisting at Vespers as well as of hearing Mass, but the opinion rests on no certain foundation and is now commonly abandoned. The common opinion maintains that, while it is highly becoming to be present at Vespers on Sunday, there is no strict obligation to be present. The method of reckoning the Sunday from sunset to sunset continued in some places down to the seventeenth century, but in general since the Middle Ages the reckoning from midnight to midnight has been followed. When the parochial system was introduced, the laity were taught that they must hear Mass and the preaching of the Word of God on Sundays in their parish church. However, toward the end of the thirteenth century, the friars began to teach that the precept of hearing Mass might be fulfilled by hearing it in their churches, and after long and severe struggles this was expressly allowed by the Holy See. Nowadays, the precept may be fulfilled by hearing Mass in any place except a strictly private oratory, and provided Mass is not celebrated on a portable altar by a privilege which is merely personal.

The obligation of rest from work on Sunday remained somewhat indefinite for several centuries. A Council of Laodicea, held toward the end of the fourth century, was content to prescribe that on the Lord's Day the faithful were to abstain from work as far as possible. At the beginning of the sixth century St. Cæsarius, as we have seen, and others showed an inclination to apply the law of the Jewish Sabbath to the observance of the Christian Sunday. The Council held at Orleans in 538 reprobated this tendency as Jewish and non-Christian. From the eighth century the law began to be formulated as it exists at the present day, and the local councils forbade servile work, public buying and selling, pleading in the law courts, and the public and solemn taking of oaths. There is a large body of civil legislation on the Sunday rest side by side with the ecclesiastical. It begins with an Edict of Constantine, the first Christian emperor, who forbade judges to sit and townspeople to work on Sunday. He made an exception in favour of agriculture. The breaking of the law of Sunday rest was punished by the Anglo-Saxon legislation in England like other crimes and misdemeanours. After the Reformation, under Puritan influence, many laws were passed in England whose effect is still visible in the stringency of the English Sabbath. Still more is this the case in Scotland. There is no federal legislation in the United States on the observance of the Sunday, but nearly all the states of the Union have statutes tending to repress unnecessary labour and to restrain the liquor traffic. In other respects the legislation of the different states on this matter exhibits considerable variety. On the continent of Europe in recent years there have been several laws passed in the direction of enforcing the observance of Sunday rest for the benefit of workmen.

Supererogation, WORKS OF. See WORKS, GOOD.

Superior, DIOCESE OF (SUPERIORENSIS), situated in the northern part of Wisconsin, comprises the following counties: Ashland, Barron, Bayfield, Burnett, Douglas, Iron, Lincoln, Oneida, Polk, Price, Rusk, Sawyer, St. Croix, Taylor, Vilas, and Washburn. In area it covers 15,715 square miles, and has its episcopal residence in the city of Superior. On 3 May, 1905, the diocese was established, being formed from the northern part of the Diocese of La Crosse (see LA CROSSE, DIOCESE OF) and the northwestern part of the Diocese of Green Bay (see GREEN BAY, DIOCESE OF).

When Superior, which is one of the suffragans of Milwaukee, was formed, there were 39 secular and 17 regular priests attending to the needs of the people in 93 churches and 33 stations. The Catholic population at the time was about 38,000. Besides the English-speaking congregations there were then as there are at present churches in which the spiritual wants of Germans, Poles, French, Italians, Slovaks and Bohemians were looked after. The spiritual and other needs of the Indians of the district have been well taken care of. There are flourishing industrial schools at Odonah, Bayfield, and other places, that are under the charge of the Sisters of St. Francis and are attended by the Franciscan Fathers. The bishop, ably seconded by his clergy, has started throughout the diocese wherever it was possible parochial schools for the Christian education of the young. In consequence the various cities and towns have one or more such bringing excellent results, considering the meagre resources available. At Superior and Ashland especially the schools are well attended.

The first bishop of the diocese, still in office, is the Rt. Rev. Augustin Francis Schinner, D. D. He was consecrated 25 July, 1905, and appointed to the see of Superior 13 May of the same year. He came to Superior from Milwaukee, where he had held the position of administrator of the archdiocese after the death of Archbishop Katzer. Bishop Schinner was born in Milwaukee 1 May, 1863. He entered the seminary at St. Francis, Wis., and at the age of twenty-two on 7 March, 1886, was ordained priest by Archbishop Heiss of Milwaukee. For about a year he was pastor of the Church at Richfield, Wis., and was then made a professor at St. Francis Seminary, Milwaukee. In 1891 Archbishop Katzer selected him as his secretary, and in 1895 he was made vicar-general of the archdiocese, holding the same position under Archbishop Messmer, until his appointment as Bishop of Superior.

There are now in the diocese the following religious communities of men: Franciscans, Jesuits, Servites; and of women: Fransciscan Sisters of the Perpetual Adoration, Sisters of St. Agnes, Sisters of St. Dominic, Poor Handmaids of Jesus Christ, Sisters of St. Francis, School-Sisters of St. Francis, Franciscan Sisters of Charity, School-Sisters of Notre Dame, Sisters of the Sorrowful Mother, Sisters of the Divine Saviour, Sisters of St. Joseph. There are (1911): secular priests, 56; priests of religious orders, 23; churches with resident priests, 55; missions with churches, 65; chapels, 8; stations, 23; high school, 1; parish schools, 23; pupils of parochial schools, 4869; industrial schools, 2; inmates, 225; orphans, 45; total number of young people under Catholic care, 5094; hospitals, 5; Catholic population (Census of 1910): White, 48,028; Indians, 3015.

JOHN J. DRISCOLL.

Supernatural Order, the ensemble of effects exceeding the powers of the created universe and gratuitously produced by God for the purpose of raising the rational creature above its native sphere to a God-like life and destiny. The meaning of the phrase fluctuates with that of its antithesis, the natural order. Those who conceive the latter as the world of material beings to the exclusion of immaterial entities, or as the necessary mechanism of cause and effect to the exclusion of the free agency of the will, or again as the inherent forces of the universe to the exclusion of the extrinsic concurrence of God, quite consistently call supernatural all spiritual facts or voluntary determinations or Divine operations. There is no objection to that way of speaking provided the assertion of the supernatural so understood be not made, by a fallacious transference of meaning, to screen the negation of the supernatural as defined above. Catholic theologians sometimes call supernatural the miraculous way in which certain effects, in themselves natural, are produced, or certain endowments (like man's immunity from death, suffering, passion, and ignorance) that bring the lower class up to the higher though always within the limits of the created, but they are careful in qualifying the former as accidentally supernatural (*supernaturale per accidens*) and the latter as relatively supernatural (*prœternaturale*). For a concept of the substantially and absolutely supernatural, they start from a comprehensive view of the natural order taken, in its amplest acceptation, for the aggregate of all created entities and powers, including the highest natural endowments of which the rational creature is capable, and even such Divine operations as are demanded by the effective carrying out of the cosmic order. The supernatural order is then more than a miraculous way of producing natural effects, or a notion of relative superiority within the created world, or the necessary concurrence of God in the universe; it is an effect or series of effects substantially and absolutely above all nature and, as such, calls for an exceptional intervention and gratuitous bestowal of God and rises in a manner to the Divine order, the only one that transcends the whole created world. Although some theologians do not consider impossible the elevation of the irrational creature to the Divine order, v. g., by way of personal union, nevertheless it stands to reason that such an exalted privilege should be reserved for the rational creature capable of knowledge and love. It is obvious also that this uplifting of the rational creature to the supernatural order cannot be by way of absorption of the created into the Divine or of fusion of both into a sort of monistic identity, but only by way of union or participation, the two terms remaining perfectly distinct.

Not being an a priori conception but a positive fact, the supernatural order can only be known through Divine revelation properly supported by such Divine evidences as miracle, prophecy, etc. Revelation and its evidences are called extrinsic and auxiliary supernatural, the elevation itself retaining the name of intrinsic or, according to some, theological supernatural. There are three principal instances of such elevation: the hypostatic union or the assumption of the Sacred Humanity of Christ into the personal dignity of the Son of God; the calling of the faithful angels to the beatific vision whereby they see always the face of the Father who is in heaven (Matt., xviii, 10), and the elevation of man to the state of grace here and glory hereafter. The hypostatic union and the angelic supernatural are both closely connected with our own elevation. From St. John (i, 12-14) we know that the hypostatic union is the ideal and instrument of it, and St. Paul declares that the angels are "all ministering spirits, sent to minister for them, who shall receive the inheritance of salvation" (Heb., i, 14). Leaving for separate treatment the auxiliary supernatural (see REVELATION; MIRACLE; PROPHECY), the hypostatic union (see INCARNATION), and the angels' elevation (see ANGELS), this article deals with the supernatural order in man both in its history and analysis.

Briefly, the history is this: From the beginning, man was raised, far above the claims of his nature, to a life which made him, even here below, the adopted child of God, and to a destiny which entitled him to the beatific vision and love of God in heaven. To these strictly supernatural gifts by which man was truly made partaker of the Divine nature (II Pet., i, 4) were added preternatural endowments, that is immunity from ignorance, passion, suffering and death, which left him "little lower than the angels" (Ps. viii, 6; Hebr., ii 7). Through their own fault, our first parents forfeited for themselves and their race both the God-like life and destiny and the angel-like endowments. In His mercy God promised a Redeemer who, heralded by ages of prophecy, came in the fulness of time in the person of Jesus Christ, the incarnate Son of God. By His Incarnation, labours, passion, and death, Jesus Christ restored mankind to its former Divine sonship and heavenly inheritance, if not to its quasi-angelic prerogatives, the virtue of Redemption being applied to us through the joint ministrations of the inner Spirit and of the visible Church, in the form of actual helps, habitual sanctity, and the power of meriting Heaven.

An analysis of the supernatural order, barely inaugurated by the Fathers, but brought to a point of great perfection by the Schoolmen and post-Tridentine theologians, discloses the various elements that make up order, that is an end, means, and laws The end is man's destination to see God face to face and to love Him correspondingly. If, as will be shown, the intuitive vision of God is our true destiny and moreover transcends our highest natural powers, then we must be given means capable of attaining that end, that is supernatural. Those means can be no other than our own actions, but invested with a higher power that makes them meritorious of Heaven. Grace, both actual and habitual, is the source of that meriting power: while habitual grace, with its train of infused virtues or faculties raises our mode of being and operating to a sphere which is God's own, actual grace spurs us on to justification and, once we stand justified, sets in motion our supernatural powers causing them to yield good and meritorious works. In the supernatural order, as in all others, there are also specific laws. The work of man's sanctification depends in a manner on the general laws of the universe and most certainly upon the carrying out of all the moral precepts written in our hearts. Besides these laws, which Christ came not to abolish, there are positive or freely established enactments ranging all the way from the Divinely appointed conditions of salvation to the revealed obligations and even the rules governing our growth in holiness. Glory and grace, being the central features of the supernatural order, special reference will be made to them both in the exposition of errors and the establishment of the Catholic doctrine.

I. ERRORS.—The theories denying or belittling the supernatural order may be classified from the standpoint of both their historical appearance and logical sequence, into three groups according as they view the supernatural (1) in our present *de facto* condition, (2) in the original status of man, (3) in its possibility and evidences.

To the first group belong Pelagianism and Semipelagianism. Influenced, no doubt, by the Stoic ideal and their own ascetic performances, the Pelagians of the fifth century so magnified the capacity of human nature as to pronounce natural to it both the beatific vision and the human acts by which it is merited. They were condemned by the Councils of Mileve and Carthage, 418. Less daring, the Semipelagians, censured by the Council of Orange (529), subtracted from the supernatural only certain phases of man's life as the beginning of faith and final perseverance. To this group belong also, in a manner, the false mystics of the fourteenth century, the Beghards condemned by the Council of Vienne (1312), for claiming that the rational creature possesses beatitude in itself without the help of the *lumen gloriæ* and Eckhart, whose identification of the Creator and the creature in the act of contemplation was censured by John XXII in 1329.

To the second group belong the early Reformers and the Jansenist School, though in different degrees. Misinterpreting the still imperfect terminology of the Fathers who called natural, in the sense of original, the elevation of our first parents, the early Reformers held that, according to Patristic teaching and contrarily to the Schoolmen, that elevation was not supernatural. Their error, rejected by the Council of Trent (Sess. V, decretum de peccato originali, can. 1), was taken up again, but in a more refined form, by Baius who, indeed, designated as supernatural man's original condition but nullified the meaning of the word by stating that our first parent's elevation was demanded by and due to the normal condition of humanity. In spite of his condemnation by Pius V (Denzinger, 9th ed., nn. 901, 903, 906, 922) he was followed by the Jansenist Quesnel and the pseudo-Synod of Pistoia, the former censured by Clement XI (Denzinger, nn. 1249, 1250) and the latter by Pius VI (Denzinger, nn. 1379, 1380, 1383). A confusion between the moral and the supernatural order, frequently found in the Baianist and Jansenist writings, was reproduced more or less consciously by some German theologians like Stattler, Hermes, Günther, Hirsh, Kuhn, etc., who admitted the supernatural character of the other gifts but contended that the adoption to eternal life and the partaking of the Divine nature, being a moral necessity, could not be supernatural. That revival of an old error found a strong and successful opponent in Kleutgen in the second volume of his theology on the supernatural.

To the third group belongs the Rationalist School from Socinus to the present Modernists. While the foregoing errors proceeded less from a direct denial than from a confusion of the supernatural with the natural order, the Rationalist error rejects it in its entirety, on the plea of philosophical impossibility or critical non-existence. The Syllabus of Pius IX and the Vatican Constitution "De fide catholica" (Denzinger, n. 1655) checked for a while that radical Naturalism which, however, has reappeared lately in a still more virulent form with Modernism. While there is nothing common between Rosmini and the present Modernists, he may, all unwittingly, have paved the way for them in the following vaguely Subjectivist proposition: "The supernatural order consists in the manifestation of Being in the plenitude of its reality, and the effect of that manifestation is a God-like sentiment, inchoate in this life through the light of faith and grace, consummate in the next through the light of glory" (36th Rosminian proposition condemned by the Holy Office, 14 Dec., 1887). Preserving the dogmatic formulæ while voiding them of their contents, the Modernists constantly speak of the supernatural, but they understand thereby the advanced stages of an evolutive process of the religious sentiment There is no room in their system for the objective and revealed supernatural: their Agnosticism declares it unknowable, their Immanentism derives it from our own vitality, their symbolism explains it in term of subjective experience and their criticism declares non-authentic the documents used to prove it. "There is no question now," says Pius X, in his Encyclical "Pascendi" of 8 Sept., 1907, "of the old error by which a sort of right to the supernatural was claimed for human nature. We have gone far beyond that. We have reached the point where it is affirmed that our most holy religion, in the man Christ as in us, emanated from nature spontaneously and entirely. Than this, there is surely nothing more destructive of the whole supernatural order."

II. CATHOLIC DOCTRINE.—From the above documents, it may be summarized in three points: (1) The fact of man's elevation to grace and glory as against the Pelagian error; (2) the supernatural character of that elevation as against the Protestant and Jansenist theory; and (3) as against Rationalism, its possibility and the validity of its credentials.

(1) The fact of man's elevation, probably alluded to in the likeness of God imprinted in Adam (Gen., i, 26), in the tree of life from which he was barred in consequence of his sin (Gen., iii, 22), and in the intimate union of man with God, as described in the Sapiential and Prophetic books, has its full expression in the discourses of Jesus Christ (John, vi and xiv-xvii), in the prologue of the Fourth Gospel compared with John, ii and iii, and in the introduction to several Epistles like I Cor., Eph., and I Pet. The direct and face-to-face vision of God is our future destiny (I Cor., xiii, 12; I John, iii, 2). In this world we are not in name only but in very fact the sons of God (I John, iii, 1), being born anew (I John, iii, 7) and having the charity of God infused in our hearts by the Holy Ghost who is given to us (Rom., v, 5). The emphasis laid by the early Fathers on man's deification has been shown elsewhere (see ADOPTION). In view of all this it is not true that the Fathers had not even a name to designate the supernatural, as is often asserted by modern critics. De Broglie (Le surnaturel, p. 45) shows that there were at least four different phrases to express the supernatural gifts: ὑπέρ φύσιν (above nature), adscititia (superadded), ἔξωθεν τῆς οὐσίας (foreign to the essence), χάρις, χαρίσματα (gratuitous).

(2) The gratuitous or supernatural character of the beatific vision was placed in bold relief by St. Paul (I Tim., vi, 15) and St. John (i, 18 and vi, 46). St. Irenæus merely paraphrases their teaching in the famous sentence: "Homo a se non videt Deum; ille autem volens videtur hominibus quibus vult, quando vult, quemadmodum vult; potens est enim in omnibus Deus" (Contra hæres., v, 20). Neither can one read such passages as Eph., i, 16-19 and iii, 14-21; Col., i, 10 sq.; II Pet., i, 4; etc., without realizing that the supernatural character of the intuitive vision applies likewise to present charity "which surpasses all knowledge". The transcendence of the supernatural order, not only above our present *de facto* condition, but also above our native constitution viewed philosophically in the elements and properties and exigencies of human nature, is not emphasized in early Christian literature, which deals not with abstractions. St. Paul, however, describing the rôle of the Redeemer which is to renovate, repair, and restore, comes very near the point by hinting that our present, clearly supernatural elevation is but a return to the no less supernatural condition of the "old Adam"; and while the point is not fully discussed by the Fathers before the Pelagian controversies concerning original sin, yet some passing remarks by St. Irenæus (Contra hæres., III, xviii, 1, 2) and St. John Chrysostom (X Homily on St. John, 2) show that there is no chasm between the early Fathers, St. Augustine, who presented a bold, if not finished, delineation of the supernatural as such, and the Schoolmen and post-Tridentine theologians (as Soto, "De natura et gratia"; Ripalda, "De ente supernaturali"; Suarez, "De variis statibus") who carefully distinguished the various states of human nature. Ripalda's opinion to the effect that the beatific vision which is *de facto* supernatural

to the whole actual creation might become natural to some possible higher creature, has never been formally condemned by the Church; it is however unanimously rejected by theologians, as it seems less conformable to Scriptural sayings and tends to destroy the absolute transcendence of the supernatural order.

(3) The philosophical possibility and the critical ascertainment of the supernatural order are the central point of Christian apologetics. Against the prejudicial views of the Rationalists who pronounce it inexistent, or unnecessary, or mischievous, or even impossible, Christian apologists urge, and to good purpose, the critical value of the records on which it rests, its quasi-necessity for the correct conduct of life, the profits it brings to its recipients, and the utter want of foundation of its so-called antinomies. Having thus cleared the ground, they proceed to collect and interpret and organize the various data of Revelation, the result being a harmonious and truly grandiose system of overlife. From the commonly received axiom that "grace does not destroy but only perfects nature" they establish between the two orders a parallelism that is not mutual confusion or reciprocal exclusion, but distinction and subordination. The Schoolmen spoke freely of nature's possibilities (*potentia obedientialis*) and even conations (*appetitus naturalis*) towards the supernatural. To those traditional methods and views some Christian writers have, of late, endeavoured to add and even substitute another theory which, they claim, will bring the supernatural home to the modern mind and give it unquestionable credentials. The novel theory consists in making nature postulate the supernatural. Whatever be the legitimity of the purpose, the method is ambiguous and full of pitfalls. Between the Schoolmen's *potentia obedientialis* and *appetitus moralis* and the Modernist tenet according to which the supernatural "emanates from nature spontaneously and entirely" there is space and distance; at the same time, the Catholic apologist who would attempt to fill some of the space and cover some of the distance should keep in mind the admonition of Pius X to those "Catholics who, while rejecting immanence as a doctrine, employ it as a method of apologetics, and who do this so imprudently that they seem to admit that there is in human nature a true and rigorous necessity with regard to the supernatural order and not merely a capacity and suitability for the supernatural such as has at all times been emphasized by Catholic apologists" (Encyclical "Pascendi").

Superstition [from *supersisto*, "to stand in terror of the deity" (Cicero, "De Nat. deorum", I, xlii, 117); or from *superstes*, "surviving": "Qui totos dies precabantur et immolabant, ut sibi sui liberi superstites essent, superstitiosi sunt appellati", i. e. "Those who for whole days prayed and offered sacrifice that their children might survive them, were called superstitious" (Cicero, ibid., II, xxviii, 72). Cicero also drew the distinction: "Superstitio est in qua timor inanis deorum, religio quæ deorum cultu pio continetur", i. e. "Superstition is the baseless fear of the gods, religion the pious worship." According to Isidore of Seville (Etymolog., l. 8, c. iii, sent.), the word comes from *superstatuo* or *superinstituo*: "Superstitio est superflua observantia in cultu super statuta seu instituta superiorum", i. e. "observances added on to prescribed or established worship"] is defined by St. Thomas (II-II, Q. xcii, a. 1) as "a vice opposed to religion by way of excess; not because in the worship of God it does more than true religion, but because it offers Divine worship to beings other than God or offers worship to God in an improper manner". Superstition sins by excess of religion, and this differs from the vice of irreligion, which sins by defect. The theological virtue of religion stands midway between the two. (II-II, Q. xcii, a. 1.)

DIVISION.—There are four species of superstitions: (1) improper worship of the true God (*indebitus veri Dei cultus*); (2) idolatry; (3) divination; (4) vain observances, which include magic and occult arts. This division is based upon the various ways in which religion may be vitiated by excess. Worship becomes *indebitus cultus* when incongruous, meaningless, improper elements are added to the proper and approved performance; it becomes idolatrous when it is offered to creatures set up as divinities or endowed with divine attributes. Divination (q. v.) consists in the attempt to extract from creatures, by means of religious rites, a knowledge of future events or of things known to God alone. Under the head of vain observances come all those beliefs and practices which, at least by implication, attribute supernatural or preternatural powers for good or for evil to causes evidently incapable of producing the expected effects. The number and variety of superstitions appear from the following list of those most in vogue at different periods of history: astrology, the reading of the future and of man's destiny from the stars; aeromancy, divinations by means of the air and winds; amulets, things worn as a remedy or preservative against evils or mischief, such as diseases or witchcraft; chiromancy, or palmistry, divination by the lines of the hand; capnomancy, by the ascent or motion of smoke; catroptomancy, by mirrors; alomancy, by salt; cartomancy, by playing cards; anthropomancy, by inspection of human viscera; belomancy, by the shuffling of arrows (Ezechiel, xxi, 21); geomancy, by points, lines, or figures traced on the ground; hydromancy, by water; idolatry, the worship of idols; Sabianism, the worship of the sun, moon, and stars; Zoolatry, Anthropolatry, and Fetishism, the worship of animals, man, and things without sense; Devil-worship; the worship of abstract notions personified, e. g. Victory, Peace, Fame, Concord, which had temples and a priesthood for the performance of their cult; necromancy, the evocation of the dead, as old as history and perpetuated in contemporary Spiritism; oneiromancy, the interpretation of dreams; philtres, potions, or charms intended to excite love; omens or prognostics of future events; witchcraft and magic in all their ramifications; lucky and unlucky days, numbers, persons, things, actions; the evil eye, spells, incantations, ordeals, etc.

ORIGIN.—The source of superstition is, in the first place, subjective. Ignorance of natural causes leads to the belief that certain striking phenomena express the will or the anger of some invisible overruling power, and the objects in which such phenomena appear are forthwith deified, as, e. g. in Nature-worship. Conversely, many superstitious practices are due to an exaggerated notion or a false interpretation of natural events, so that effects are sought which are beyond the efficiency of physical causes. Curiosity also with regard to things that are hidden or are still in the future plays a considerable part, e. g. in the various kinds of divination. But the chief source of superstition is pointed out in Scripture: "All men are vain, in whom there is not the knowledge of God: and who by these good things that are seen, could not understand him that is, neither by attending to the works have acknowledged who was the workman: but have imagined either the fire, or the wind, or the swift air, or the circle of the stars, or the great water, or the sun and moon, to be the gods that rule the world" (Wisdom, xiii, 1–2). It is to this ignorance of the true God, coupled with an inordinate veneration for human excellence and the love of artistic representations appealing to the senses, that St. Thomas ascribes the origin of idolatry. While these are dispositive causes, the consummative cause, he adds, was the influence of demons who offered themselves as objects of worship to erring men, giving answers through idols and doing things which to men seemed marvellous (II–II, Q. xciv, a. 4).

These causes explain the origin and spread of superstition in the pagan world. They were to a large extent eliminated by the preaching of Christianity; but so deep-rooted was the tendency to which they gave rise that many of the ancient practices survived, especially among peoples just emerging from barbarism. It was only by degrees, through the legislation of the Church and the advance of scientific knowledge, that the earlier forms of superstition were eradicated. But the tendency itself has not wholly disappeared. Side by side with the Rationalistic philosophy and the rigorous scientific methods which are characteristic of modern thought, there are still to be found various sorts of superstition. So far as this includes the worship of things other than God, it is not only an essential part, but the foundation also of the Positivistic system (Comte), which sets up humanity as the object of religious worship (see POSITIVISM). Nor can Pantheism (q. v.), which identifies God and the world, lead consistently to any but superstitious practices, however it may in theory disclaim such a purpose. The human mind, by a natural impulse, tends to worship something, and if it is convinced that Agnosticism is true and that God is unknowable, it will, sooner or later, devise other objects of worship. It is also significant that just when many scientists supposed that belief in a future life had been finally proved an illusion, Spiritism (q. v.), with its doctrines and practices, should have gained such a strong hold not only on the ignorant, but also, and in a much more serious sense, on leading representatives of science itself. This may indeed be interpreted as a reaction against Materialism; but it is none the less, at bottom, an evidence of man's restless desire to penetrate, by any and every means, the mystery that lies beyond death. While it is easy to condemn Spiritism as superstitious and vain, the condemnation does not do away with the fact that Spiritism has become widespread in this age of enlightenment. Now as in the past the rejection of Divine truth in the name of reason often opens the way to beliefs and practices which are at once unworthy of reason and dangerous to morality.

SINFULNESS OF SUPERSTITION IN GENERAL.—Superstition of any description is a transgression of the First Commandment: "I am the Lord thy God,—thou shalt not have strange gods before me. Thou shalt not make to thyself a graven thing, nor the likeness of anything that is in heaven above, or in the earth beneath . . . thou shalt not adore them nor serve them" (Exod., xx, 2–5). It is also against the positive law of the Church, which visits the worst kinds of superstition with severe punishments, and against the natural law inasmuch as it runs counter to the dictates of reason in the matter of man's relations to God. Such objective sinfulness is inherent in all superstitious practices from idolatry down to the vainest of vain observances, of course in very different degrees of gravity. With regard to the subjective guilt attaching to them it must be borne in mind that no sin is mortal unless committed with full knowledge of its grievous wickedness and with full deliberation and consent. Of these essential factors the first is often wanting entirely, and the second is only imperfectly present. The numerous cases in which the event seemed to justify the superstitious practice, and the universality of such incongruous beliefs and performances, though they may not always induce inculpable ignorance, may possibly obscure the knowledge and weaken the will to a point incompatible with mortal sin. As a matter of fact, many superstitions of our own day have been acts of genuine piety at other times, and may be so still in the hearts of simple folk.

SPECIAL SUPERSTITIONS.—The principal species of superstition, viz., idolatry, divination, occult arts, have received adequate treatment in other articles. Something remains to be said on (1) *cultus indebitus*, or the pious vagaries which people intermingle with Catholic religion; (2) vain observances in daily life.

(1) Improper worship (*cultus indebitus*) consists in introducing *false* or superfluous elements into the practice of true religion. Such false elements, be their origin culpable deceit or inculpable credulity, vitiate the virtue of religion by substituting error for truth in the service of God. A layman performing priestly functions, a pardoner selling spurious indulgences, a fanatic devotee inventing false miracles and answers to prayers in order to introduce or spread his own favourite devotion, wholesale believers in supernatural apparitions, visions, revelations, which serve no good purpose—all these are guilty of superstition, at least material. As regards formal guilt, this is often reduced to the vanishing point by the prevailing credulity and common practice of the period. The worship of imaginary saints or relics, devotion based upon false revelations, apparitions, supposed miracles, or false notions generally, is usually excusable in the worshipper on the ground of ignorance and good faith; but there is no excuse for those who use similar means to exploit popular credulity for their own pecuniary profit. The originators of such falsehoods are liars, deceivers, and not rarely thieves; but a milder judgment should be pronounced on those who, after discovering the imposture, tolerate the improper cultus. For it is no easy matter, even for the highest authorities, to eradicate beliefs or to check the growth of devotions which have taken a strong hold on the popular mind: the long struggle of the Inquisition with the Spiritual Franciscans, who, on the assumption that the rule of St. Francis was a direct revelation from heaven, attributed to the practice of poverty an exaggerated importance, and cheerfully went to the stake rather than relinquish their ways, is but one example among scores that could be cited. There is always the fear of uprooting the wheat with the tares, and the hope of seeing the improper worship die a natural death; for devotions also have their changing seasons. The pope and the bishops are the proper authorities to act in these matters, for to them belongs the regulation of worship, both public and private, and it is the duty of every Catholic to abide by their decision.

The same reflections apply to another kind of improper worship, the *cultus superfluus* which consists in expecting from certain pre-arranged circumstances a greater efficacy of the religious performance; e. g. to expect a greater benefit from Masses said before sunrise with a certain number of candles disposed in a certain order, by a priest bearing a special saint's name or being of the supposed stature of Christ. Triduums, novenas, First Friday Communions, nine consecutive First Friday Communions, Saturday fasting, though they seem to attach special importance to number and dates, are approved by the Church, because these dates and numbers are convenient for shaping and regulating certain excellent devotions. The Catholic devotions which are connected with holy places, holy shrines, holy wells, famous relics, etc. are commonly treated as superstitious by non-Catholics who either reject all worship of saints and relics or assume pious frauds on the part of the priests who benefit by the

THE LAST SUPPER

PAINTING BY E. VON GEBHARDT, BERLIN

worship. It must be admitted that these hallowed spots and things have occasioned many legends; that popular credulity was in some cases the principal cause of their celebrity; that here and there instances of fraud can be adduced; yet, for all that, the principles which guide the worshipper, and his good intentions, are not impaired by an undercurrent of error as to facts. If superstition there be, it is only material. Moreover, the Church is always careful to remove any fraud or error inconsistent with true devotion, although she is tolerant of "pious beliefs" which have helped to further Christian piety. Thus, alleged saints and relics are suppressed as soon as discovered, but belief in the private revelations to which the feast of Corpus Christi, the Rosary, the Sacred Heart and many other devotions owe their origin is neither commanded nor prohibited; here each man is his own judge.

(2) Turning now to vain observances in daily life, properly so called, we first meet with the superstitions observed in the administration of justice during many centuries of the Middle Ages, and known as ordeals or "judgments of God". Among the early Germans a man accused of a crime had to prove his innocence, no proof of his guilt being incumbent on his accusers. The oath of a free man, strengthened by the oaths of friends, sufficed to establish his innocence, but when the oath was refused or the required number of "compurgators" failed, the defendant, if he was a free man, had to fight his accuser in single combat; bondmen and women had either to find a champion to fight for them or to undergo some other form of ordeal as fixed by law, arranged by the judge, or chosen by one of the parties. Besides the judicial combat the early German laws recognized as legitimate means to discriminate between guilt and innocence the casting or drawing of lots, trial by fire in several forms—holding one's hand in fire for a determined length of time; passing between two piles of burning wood with no covering for the body except a shirt impregnated with wax; carrying with the naked hand a red-hot iron weighing from one to three pounds a distance of from nine to twelve paces; walking barefoot over nine red-hot ploughshares disposed in a line nine steps long. At the root of these and many analogous practices (see ORDEALS) lay the firm belief that God would work a miracle rather than allow the innocent to perish or the wicked to prevail. These "judgments of God" gave rise to new superstitions. Whether guilty or not, persons subjected to the trials would often put more confidence in charms, magic formulas, and ointments than in the intervention of Providence. The ordeals gradually gave way before the rationalistic temper of modern times; trials by torture, which survived the ordeals, seem to have been inspired by the same idea, that God will protect the innocent and give them superhuman endurance.

The power of the evil eye (*fascinatio*) has been believed in for a long time, and is still dreaded in many countries. The number thirteen continues to strike terror into the breasts of men who profess not to fear God. The apparent success which so often attends a superstition can mostly be accounted for by natural causes, although it would be rash to deny all supernatural intervention (e. g. in the phenomena of Spiritism). When the object is to ascertain, or to effect in a general way, one of two possible events, the law of probabilities gives an equal chance to success and failure, and success does more to support than failure would do to destroy superstition, for, on its side, there are arrayed the religious instinct, sympathy and apathy, confidence and distrust, encouragement and discouragement, self-suggestion and—perhaps strongest of all—the healing power of nature.

J. WILHELM.

Supper, THE LAST, the meal held by Christ and His disciples on the eve of His Passion at which He instituted the Holy Eucharist.

TIME.—The Evangelists and critics generally agree that the Last Supper was on a Thursday, that Christ suffered and died on Friday, and that He arose from the dead on Sunday. As to the day of the month there seems a difference between the record of the synoptic Gospels and that of St. John. In consequence some critics have rejected the authenticity of either account or of both. Since Christians, accepting the inspiration of the Scriptures, cannot admit contradictions in the sacred writers, various attempts have been made to reconcile the statements. Matt., xxvi, 17, says, "And on the first day of the Azymes"; Mark, xiv, 12, "Now on the first day of the unleavened bread, when they sacrificed the pasch"; Luke, xxii, 7, "And the day of the unleavened bread came, on which it was necessary that the pasch should be killed". From these passages it seems to follow that Jesus and his disciples conformed to the ordinary custom, that the Last Supper took place on the 14th of Nisan, and that the Crucifixion was on the 15th, the great festival of the Jews. This opinion, held by Tolet, Cornelius a Lapide, Patrizi, Corluy, Hengstenberg, Ohlshausen, and Tholuck, is confirmed by the custom of the early Eastern Church, which, looking to the day of the month, celebrated the commemoration of the Lord's Last Supper on the 14th of Nisan, without paying any attention to the day of the week. This was done in conformity with the teaching of St. John the Evangelist. But in his Gospel, St. John seems to indicate that Friday was the 14th of Nisan, for (xviii, 28) on the morning of this day the Jews "went not into the hall, that they might not be defiled, but that they might eat the pasch". Various things were done on this Friday which could not be done on a feast, viz., Christ is arrested, tried, crucified; His body is taken down "(because it was the parasceve) that the bodies might not remain upon the cross on the sabbath day (for that was a great sabbath day)"; the shroud and ointments are bought, and so on.

The defenders of this opinion claim that there is only an apparent contradiction and that the differing statements may be reconciled. For the Jews calculated their festivals and Sabbaths from sunset to sunset: thus the Sabbath began after sunset on Friday and ended at sunset on Saturday. This style is employed by the synoptic Gospels, while St. John, writing about twenty-six years after the destruction of Jerusalem, when Jewish laws and customs no longer prevailed, may well have used the Roman method of computing time: from midnight to midnight. The word *pasch* does not exclusively apply to the paschal lamb on the eve of the feast, but is used in the Scriptures and in the Talmud in a wider sense for the entire festivity, including the *chagigah;* any legal defilement could have been removed by the evening ablutions; trials, and even executions and many servile works, though forbidden on the Sabbath, were not forbidden on feasts (Num., xxviii, 16; Deut., xvi, 23). The word *parasceve* may denote the preparation for any Sabbath and may be the common designation for any Friday, and its connexion with pasch need not mean preparation for the Passover but Friday of the Passover season, and hence this Sabbath was a great Sabbath. Moreover it seems quite certain that if St. John intended to give a different date from that given by the Synoptics and sanctioned by the custom of his own

Church at Ephesus, he would have said so expressly. Others accept the apparent statement of St. John that the Last Supper was on the 13th of Nisan and try to reconcile the account of the Synoptics. To this class belong Paul of Burgos, Maldonatus, Petau, Hardouin, Tillemont, and others. Peter of Alexandria (P. G., XCII, 78) says: "In previous years Jesus had kept the Passover and eaten the paschal lamb, but on the day before He suffered as the true Paschal Lamb He taught His disciples the mystery of the type." Others say: Since the Pasch, falling that year on a Friday, was reckoned as a Sabbath, the Jews, to avoid the inconvenience of two successive Sabbaths, had postponed the Passover for a day, and Jesus adhered to the day fixed by law; others think that Jesus anticipated the celebration, knowing that at the proper time He would be in the grave.

INTERIOR OF THE CHURCH OF SION, NOW A MOSQUE
Occupying the Traditional Site of the House in Jerusalem in which the Last Supper was held

PLACE.—The owner of the house in which was the upper room of the Last Supper is not mentioned in Scripture; but he must have been one of the disciples, since Christ bids Peter and John say, "The Master says". Some say it was Nicodemus, or Joseph of Arimathea, or the mother of John Mark. The hall was large and furnished as a dining-room. In it Christ showed Himself after His Resurrection; here took place the election of Matthias to the Apostolate and the sending of the Holy Ghost; here the first Christians assembled for the breaking of bread; hither Peter and John came when they had given testimony after the cure of the man born lame, and Peter after his liberation from prison; here perhaps was the council of the Apostles held. It was for a while the only church in Jerusalem, the mother of all churches, known as the Church of the Apostles, or of Sion. It was visited in 404 by St. Paula of Rome. In the eleventh century it was destroyed by the Saracens, later rebuilt and given to the care of the Augustinians. Restored after a second destruction, it was placed in charge of the Franciscans, who were driven out in 1561. At present it is a Mohammedan mosque.

SEQUENCE OF EVENTS.—Some critics give the following harmonized order: washing of the feet of the Apostles, prediction of the betrayal and departure of Judas, institution of the Holy Eucharist. Others, believing that Judas made a sacrilegious communion, place the institution of the sacrament before the departure of Judas.

IN ART.—The Last Supper has been a favourite subject. In the catacombs we find representations of meals giving at least an idea of the surroundings of an ancient dining hall. Of the sixth century we have a bas-relief in the church at Monza in Italy, a picture in a Syrian codex of the Laurentian Library at Florence, and a mosaic in S. Apollinare Nuovo at Ravenna. One of the most popular pictures is that of Leonardo da Vinci in Santa Maria delle Grazie, Milan. Among the modern school of German artists, the Last Supper of Gebhardt is regarded as a masterpiece.

Supremacy, ACT OF. See ENGLAND; OATHS, ENGLISH POST-REFORMATION.

Supremi disciplinæ, Motu Proprio of Pius X, promulgated 2 July, 1911, relating to Holy Days of obligation. On Holy Days of precept a twofold duty is incumbent on the faithful, of hearing Mass and of abstaining from servile work. Owing particularly to the high cost of living and to the necessity of caring in due season for crops, fruits, etc., the discipline of the Church has tended to lessen the number of Holy Days in certain countries. Pius X deemed it advisable to extend this policy to the Universal Church, thus effecting greater uniformity. Aside, then, from all Sundays, the obligation of hearing Mass and abstaining from servile work is now confined to eight days: Christmas, New Year's Day or the feast of the Circumcision, Epiphany (6 Jan.), the Ascension of Our Lord, the Immaculate Conception (8 Dec.), the Assumption of the Blessed Virgin (15 Aug.), the feast of Sts. Peter and Paul (29 June), and, finally, the feast of All Saints (1 Nov.). Where, however, any of the above feasts has been abolished or transferred, the new legislation is not effective. In the United States consequently the Epiphany and the feast of Sts. Peter and Paul are not days of precept (see Third Plenary Council of Baltimore, tit. III, c. ii and p. cv). Feasts of patrons are no longer Holy Days of obligation. Bishops may, if they choose, transfer the celebration of these patronal feasts to the following Sunday in accordance with liturgical laws. If it is desired in certain countries or dioceses to retain as days of precept one or other feast abrogated by the Constitution "Supremi disciplinæ", permission must be obtained from the Holy See.

There is no longer any obligation, as formerly in many countries, of assisting at the Holy Sacrifice or abstaining from servile work on the feast of St. Joseph (19 March), the Nativity of St. John the Baptist (24 June), or Corpus Christi. According to the present Motu Proprio the feast of St. Joseph, with an octave, is to be celebrated on the Sunday following 19 March, unless that date fall on Sunday; the Nativity of St. John the Baptist on the Sunday preceding the feast of Sts. Peter and Paul (29 June); Corpus Christi on the first Sunday after Trinity Sunday. Scarcely, however, was the "Supremi disciplinæ" promulgated, when (S. R. C., 24 July) it was modified as follows: The solemn commemoration of St. Joseph without an octave remains on 19 March. The feast of the Patronage of St. Joseph, however, on the third Sunday after Easter is raised to a double of the first class, a primary feast with an octave. Likewise the feast of Corpus Christi with its privileged octave is observed as formerly on the Thursday after Trinity Sunday, but the solemnity of the feast is transferred to the following Sunday. Liturgical questions, to which the above changes gave rise, were settled by a Decree of the Sacred Congregation of Rites, 28 July, 1911.

The present Motu Proprio institutes another important change in legislation. As feasting and fasting are incompatible Pius X has abolished the obligation of fasting as well as that of abstinence for the Universal Church, should such obligation coincide with any of the eight feasts, as above. According to the "Nouvelle Revue Theologique", November, 1911, by decree of the S. Cong. of the Council, 28 August, 1911, this dispensation is not for feasts already suppressed, like the Epiphany in the United States. The same general dispensation from the laws of abstinence and fasting is granted by the Holy Father on patronal feasts, abolished by the present Constitution, should they be celebrated solemnly and with a large concourse of the faithful.

Andrew B. Meehan.

Sura, titular see in Augusta Euphratensis, suffragan of Hierapolis. Sura, situated on the banks of the Euphrates, at the intersection of the roads from Palmyra and Beroea or Chalcis, was a military station, and at the beginning of the fifth century was the residence of the prefect of the *legio XVI Flavia Firma*. In his second Syrian campaign Chosroes assaulted the town; the Armenian, Arsaces, the *magister militum*, directed the defence; when he fell the inhabitants sent their bishop to Chosroes as an envoy; but the latter, incensed by the resistance he had met with, ordered the destruction of the town, which had held out only half an hour. Justinian erected powerful fortifications there. Its ruins, of little importance, are near the present military post of El Hamman, not far from Rekka in the vilayet of Aleppo. Le Quien, "Oriens christianus", II, 949, mentions three bishops of Sura: Uranius, represented by his metropolitan at Chalcedon, 451; Marion, exiled as a Monophysite in 518; and the one who was envoy to Chosroes, whose name is unknown. The see is mentioned in the "Notitiæ episcopatuum" of the Patriarchate of Antioch in the sixth and tenth centuries.

S. Pétridès.

Surin, Jean-Joseph, b. 1600; d. at Bordeaux, 1665. He belonged to the Society of Jesus, and enjoyed great celebrity for his admirable virtues, his trials, and his talents as a spiritual director. Bossuet declared him "consumed with spirituality". At the suggestion of the Fathers of the Province of Aquitaine, assembled in provincial congregation (1755), the father general ordered his name inscribed in the "Ménologe de l'assistance de France". At the age of eight he took a vow of chastity, at ten he was taught to meditate by a Carmelite. Having been sent to Loudun to exorcize certain Ursulines tormented by the evil one, he was so horrified at the terrible sacrileges intended for three desecrated hosts that he immediately made an offering of his own spirit to be possessed by demons in expiation for this frightful crime. His prayer was granted, and for more than twenty years he was harassed by evil spirits, plunged in the depths of despair over his eternal damnation. At times he was unable to use his hands, his feet, his eyes, his tongue, or was impelled to commit a thousand extravagances, which even the most charitably inclined deemed foolish. The wrong impression under which he laboured at such times caused him the greatest joy. At no time, however, did this state of obsession prevent his devoting himself to preaching. It is true he was unable to prepare himself for this by any reading or study, but on entering the pulpit and making the sign of the cross a wonderful transformation was manifest. His vigorous mind instantly gained the ascendancy; his powerful voice and facile oratory won universal attention and admiration. His physician declared it miraculous. Even in writing or dictating his works he seemed gifted with Divine inspiration. He was healed eight years before his death and was thenceforth absorbed in the abundance of Divine communications. His principal works are: "Catéchisme spirituel" (Paris, 1659), published by the Prince de Conti, anonymously; "Fondements de la vie spirituelle" (Paris, 1667); "Cantiques spirituels" (Paris, 1660); "Dialogues spirituels" (Paris, 1704); "Lettres spirituelles" (Paris, 1695). His "Catéchisme spirituel" is on the Index, but with certain modifications soon to be made, it will be taken from the list.

A. Poulain.

Surius, Laurentius, hagiologist, b. at the Hanseatic city of Lübeck, 1522; d. at Cologne, 23 May, 1578. It is not certain whether his parents were Catholics or Lutherans. According to a remark made by Peter Canisius ("Epistolæ", ed. Braunsberger, I, 36), he was born a heretic and was brought into the Church by Canisius. Surius studied at the universities of Frankfort-on-the-Oder and Cologne. In the latter university Peter Canisius was a fellow-student. Surius also met there Johannes Justus Lansperger, who induced him to enter the Carthusian monastery at Cologne, in 1542. The greater part of his life after this was spent in his monastery, where he was a model of piety, of rigid observance of the rules of the order, and of earnest work as a scholar; for these reasons he was held in high esteem by St. Pius V. He devoted himself chiefly to the domains of church history and hagiography, and wrote a large number of works on these subjects. He also translated into Latin many works, mainly ascetical and theological. Among these translations should be mentioned writings by Tauler, Heinrich Seuse, Ruysbroeck, Gropper's work on the reality of Christ's Flesh and Blood, the sermons of Michael Sidonius, the apologies of Friedrich Staphylus, and an oration by Martin Eisengrein. He completed the "Institutiones" of Florentius of Haarlem, prior of the Carthusians of Louvain, and edited a new edition of the "Homiliarium" of Charlemagne. He wrote against Sleidanus his "Commentarius brevis rerum in orbe gestarum ab a. 1500 ad a. 1564" (Cologne, 1566), which was continued by others. He was also the author of a collection of the Acts of the councils: "Concilia omnia tum generalia tum provincialia" (4 vols., Cologne, 1567).

His most important and still valuable work is his collection of the lives of the saints, "De probatis Sanctorum historiis ab Al. Lipomano olim conscriptis nunc primum a Laur. Surio emendatis et auctis", the first edition of which appeared in six volumes at Cologne in 1570–77. He began a second edition which was finished after his death by his colleague in the monastery, Mosander, who added a seventh volume (Cologne, 1582). A third edition with an improved text appeared at Cologne in 1618; a new and revised edition was published (1875–80) at Turin in thirteen volumes. Notwithstanding the liberties taken by Surius with the text of the manuscripts he used, his work has rendered great service and has furnished many narratives concerning the lives of the saints that have been published in various languages.

J. P. Kirsch.

Surplice, a large-sleeved tunic of half length, made of fine linen or cotton, and worn by all the clergy. The wide sleeves distinguish it from the rochet and the alb; it differs further from the alb inasmuch as it is shorter and is never girded. It is ornamented at the hem and the sleeves either with embroidery, with lace-like insertions, or with lace. The lace should never be more than fifteen inches wide, as otherwise the real vestment is necessarily too much shortened by this merely ornamental addition. The surplice belongs to the liturgical vestment in the strict sense, and is the vestment most used. It is the choir dress, the vestment for processions, the official priestly dress of the lower clergy, the vestment worn by the priest in administering the sacraments, when giving blessings, at Benediction of the Blessed Sacrament, etc.; in the last-mentioned cases it is the substitute for the alb, which, according to present custom, is worn only at Mass and a few other functions. The blessing of the surplice by the bishop or by authorized priest is proper, but not strictly prescribed. As the distinctive sacerdotal dress of the lower clergy the bishop, after giving the tonsure, places it on the candidate for orders with these words: "May the Lord clothe thee with the new man, who is created in righteousness and true holiness after the image of God."

History.—The time of the introduction of the surplice cannot be exactly determined. Without doubt it was originally merely a choir vestment and a garment to be worn at processions, burials, and on similar occasions. As a liturgical dress in this sense it is met outside of Italy (in England and France) as early as the eleventh century, but is not found in Italy until the twelfth century. The surplice may have been used in isolated cases during the twelfth century instead of the alb in administering the sacraments and at blessings, but this use did not become general until the thirteenth century; it appeared latest probably in Italy and especially at Rome, where it was hardly customary at these functions before the end of the thirteenth century. Towards the close of the twelfth century the surplice was already the distinctive dress of the lower clergy, even though this was not the case everywhere. However, the placing of the surplice on the clerics after the giving of the tonsure (cf. above), is first testified by the Pontificals of the fourteenth and fifteenth centuries.

The name of the surplice arises from the fact that it was worn by the clergy, especially in northern Europe, over (*super*) the universally customary fur clothing (*pelliceæ*). This is stated by Durandus and by the English grammarian Gerlandus, both of whom lived to the thirteenth century. The fur clothing not only led to the name of the surplice, but was probably also the cause of its appearance. For it is evident that a large-sleeved, ungirdled tunic was better suited to go over heavy fur coats than a narrow-sleeved, girded alb. It seems most probable that the surplice first appeared in France or England, whence its use gradually spread to Italy. It is possible that there is a connexion between the surplice and the Gallican alb, an ungirdled liturgical tunic of the old Gallican Rite, which was superseded during the Carlovingian era by the Roman Rite. The founding of the Augustinian Canons in the second half of the eleventh century may have had a special influence upon the spread of the surplice. Among the Augustinian Canons the surplice was not only the choir vestment, but also a part of the habit of the order. In addition to the surplice we find frequent early mention of a "cotta". It is possible that between the *superpelliceum* and the *cotta* there may have been some small difference (perhaps in length or width), but most probably these terms were only different names for the same liturgical vestment (cf. Braun, op. cit. in bibliography, p. 142).

Originally the surplice was a full-length tunic —that is, it reached to the feet. In the thirteenth century it began to be shortened, although in the fifteenth century it still reached halfway between the knee and ankle. In the sixteenth and seventeenth centuries it became steadily shorter until it fell a little above the knee; in the eighteenth century, however, it was so short that it frequently reached only just below the hips. As the length of the surplice was lessened, the length and breadth of the sleeves were naturally reduced, so that in this respect also there is a great difference between the original surplice and that of the eighteenth century. More striking than these mere alterations of size were other changes made in the surplice, some of which appeared as early as the thirteenth century, and by which its entire shape and appearance was more or less altered, various forms of the surplice being produced. Thus, surplices appeared with slit-up sleeves (thus with wings of materials rather than sleeves); then surplices which, besides being slit up on the under side of the sleeve, were also open at the sides, the surplices being thus like scapulars in form. Also surplices without sleeves, having mere slits for the arms; finally surplices resembling the medieval bell-shaped chasuble with only an opening in the middle for the head—this shape was customary in the sixteenth and seventeenth centuries, especially in Venetian territory. These variations met with the disapproval of provincial and diocesan synods, but their prohibitions had no permanent effect. The scapular-like band that took the place of the surplice among Augustinian Canons on non-liturgical occasions is not a curtailment of the surplice, but a substitute for it.

Ornamentation.—In the Middle Ages the surplice apparently seldom received a rich ornamentation. In pictures and sculpture it appears as a garment hanging in many folds, but otherwise plain throughout. There is a surplice at Neustift near Brixen in the Tyrol that dates back to the twelfth (or, at least, to the thirteenth) century; it is the only medieval surplice that we possess. This surplice shows geometrical ornaments in white linen embroidery on the shoulders, breast, back, and below the shoulders, where, as in the albs of the same date, large full gores have been inserted in the body of the garment. After the lace industry developed in the sixteenth century the hem and sleeves of the surplice were often trimmed with lace—at a later period, unfortunately, too often at the expense of the vestment itself. It apparently did not become customary to lay the surplice in folds until the close of the Middle Ages. This custom had vogue especially in Italy, but it frequently degenerated into undignified straining after effect and effeminate display.

Joseph Braun.

Susa (Heb. שׁוּשַׁן; Gr. Σοῦσαν, Σοῦσα), the capital of the Kingdom of Elam, and from the time of Cyrus, or more probably of Darius I, the winter residence of the kings of Persia. It was situated on the River Ulai or Eulæus (Dan., viii, 2, 16; Pliny, "Hist. Nat.", VI, 27), which was probably a branch of the Choaspes, now the Kerkha, formerly connected with the Pasitigris, now the Karun. After an existence of more than fifteen centuries the city was destroyed by Assurbanipal about 647 b. c., but it rose from its ruins, and under Persian rule enjoyed great prosperity. It began to decay under the Seleucids, and after the destruction of the Sassanid monarchy by the Arabs it was gradually abandoned. The "castle" (II Esd., i, 1; Dan., viii, 2), or acropolis, was distinct and separated from the city, though in the Book of Esther the Vulgate neglects the distinction (in i, 2, 5; ii, 3, 5, 8.; iii, 15; viii, 14; ix, 6, 11, 12, the "castle", and not the city, is meant). Here Darius I built a vast palace, in which under his successor occurred the events narrated in the Book of Esther. The ruins of the acropolis, covering about 300 acres, have been explored by Williams and Loftus, and more thoroughly by Dieulafoy and de Morgan. The excavations have yielded some important finds, among others the code of Hammurabi.

F. Bechtel.

Susa (Segusin), Diocese of (Segusiensis), in the Province of Turin, Piedmont, Northern Italy. The city is situated at an elevation of about 1600 feet above sea-level, in a wide valley to the right of the Dora Riparia; near by are some valuable marble quarries (*verde di Susa*). The cathedral, dedicated to St. Justus and founded by Ulderico Manfredi, (1029) contains much of interest: specimens of very fine inlaid work in the choir stalls; the baptismal font and the bronze group of the "Madonna del Roccia Melone" (Madonna with the Child, St. George transfixing the dragon, and a knight on bended knee); in a chapel may be seen the tomb of the Countess Adelaide, with her statue in wood, an excellent example of eleventh-century work. In ancient times the city was called Segusio, and in the days of Augustus it still had a king, who held sway over fourteen other towns. This king submitted voluntarily to the Romans and erected, in honour of Augustus, a triumphal arch, which still exists. Under Nero the kingdom was abolished and became a municipium. In addition to the arch, there still exist the ruins of the Thermæ Gratianæ constructed by Valentinian I. Susa being situated near one of the principal Alpine valleys was always a place of great strategic importance. Constantine destroyed it while advancing against Maxentius; after the Langobard invasion, the Byzantine garrison remained there till 593. Later it came into possession of the Franks. It was captured twice by Pepin and once by Charlemagne (774), who by a skilful manœuvre compelled the Lombards to fall back on Pavia. From that time it formed part of the Kingdom of Italy. In 942 it became the residence of Ardoino Glabrio, Count of Susa and later Marquis of Turin, who was succeeded by Manfredo (975), Olderico (1001), and Adelaide (1034). The latter having married Odo of Savoy in her third marriage, Susa passed into the power of Savoy. In the twelfth century it acquired communal liberty; though destroyed (1174) by Barbarossa, it soon rose again, and in 1197 had already adopted new statutes. In the wars of the thirteenth century it sided with the Guelphs, and was a subject of dispute between the marquises of Saluzzo and the counts of Savoy; it was definitely given to the latter in 1295. Later during the wars of the sixteenth and eighteenth centuries it fell on five occasions into the hands of the French (1536–62; 1628–31; 1639–42; 1704–7; 1798–1814); in 1798 the fortifications constructed by the dukes of Savoy were dismantled.

Campanile of the Cathedral, Susa

In early days, Susa seems to have belonged to the Diocese of Maurienne. The Abbey of St. Justus having been erected in 1029, the abbot had quasi-episcopal jurisdiction. The Benedictines succeeded the Canons Regular, and under Benedict XIV were replaced by secular canons. In 1772 this prelacy *nullius* became a diocese, and the territory of the famous Abbey of Novalesa was added to that of Susa. The first bishop was Francesco M. Ferraris. Napoleon suppressed the see in 1803, but it was restored in 1817, and its territory increased by the inclusion of the Abbey S. Michele della Chiusa. The diocese, suffragan of Turin, contains 61 parishes with 75,000 inhabitants, and 130 secular and regular priests; 5 religious houses of men and 7 of women; 3 institutes for boys and 3 for girls.

Suso, Henry. See Henry Suso, Blessed.

Suspension, in canon law, is usually defined as a censure by which a cleric is deprived, entirely or partially, of the use of the power of orders, office, or benefice. Although ordinarily called a censure because it is generally a medicinal punishment inflicted after admonitions and intended to amend the delinquent, yet it is not necessarily so for it is occasionally employed as a chastisement for past offences. As early as the time of St. Cyprian (d. 258), we read of clerics deprived of the income of their charges and also of suspension from the determined functions for which one had been ordained. We know also that clerics were sometimes temporarily deprived of Communion (Can. Apost., 45; Conc. Illib., c. 21). The Council of Neocæsarea (Can. 1) in 315 decrees perpetual suspension from all functions for certain misdemeanours, while the Fourth Council of Carthage (can. 68), by forbidding a delinquent bishop to ordain, gives an example of partial suspension. Again, the Third Council of Orléans (can. 19) in 538 decrees suspension from orders but not from stipend, and the Council of Narbonne (can. 11) suspends certain clerics from receiving the fruits of their benefices.

When a suspension is total, a cleric is deprived of the exercise of every function and of every ecclesiastical right. When it is partial, it may be only from the exercise of one's sacred orders, or from his office which includes deprivation of the use of orders and jurisdiction, or from his benefice which deprives him of both administration and income. When a suspension is decreed absolutely and without limitation, it is understood to be a total suspension. A partial suspension deprives a cleric of the use of that power only which is expressed in the sentence. A cleric does not incur an irregularity when he violates a suspension imposed for a former transgression, because then there is no violation of a censure. The same holds good if he has been suspended for some defect of mind or body not blameworthy. Irregularity is contracted when a cleric performs a solemn act of sacred orders, from the use of which he had been suspended. Thus, if a bishop forbidden to celebrate Mass pontifically were to perform such a function, he would not incur irregularity because he does not thereby exercise any substantial act of episcopal orders. As the Church can not deprive a suspended cleric of the power of sacred orders, but only forbids their use, it follows that acts of sacred orders remain valid after suspension. On the other hand, acts of jurisdiction become null and void after a suspended cleric has been denounced by name, because the Church has power to deprive one totally of jurisdiction. Suspension *ex informata conscientia* has the same effect as a formal suspension, but it is not inflicted by judicial sentence, but as an extraordinary remedy, without the canonical monitions being necessary, and it is imposed for occult but grave crimes.

When a cleric has been suspended from the income of his benefice, it is not the Church's desire that he be reduced to actual want. Consequently sufficient support is to be given to him, provided he have no means of his own and be willing to amend. Even when he does not turn from his evil ways, the clerical dignity requires that he be not suffered to fall into extreme want or danger of starvation. The principal grounds on which suspension is incurred *ipso facto* in the present discipline of the Church are found in the Decrees of the Council of Trent and in the Constitution "Apostolicæ Sedis Moderationi", though a few others have been added. A cleric is relieved of suspension, if it was a censure, by the absolution of him to whom it was reserved in case of reservation. When it was inflicted for a definite time or under a certain condition, it ceases of itself when the limitation is fulfilled. If the suspension was perpetual and decreed on account of a former crime, it may be removed by mere dispensation of the proper authority.

Sutton, Robert, Venerable, priest, martyr, b. at Burton-on-Trent; quartered at Stafford, 27 July, 1587. He is not to be confused with the Venerable Robert Sutton, who was a companion of the Venerable William Hartley (q. v.). He took the degree of M. A. from Christ Church, Oxford, 9 July, 1567, and became Rector of Lutterworth, Leicestershire, in 1571, but was converted by his younger brother William, afterwards S.J. With his younger brother Abraham, who matriculated from Hart Hall in 1576, aged 25, he arrived at Douai, 23 March, 1575 (1576). They were both ordained subdeacons at Cambrai in September, deacons in December, and priests in the following February; having said their first Masses, 7 March, they left for England, 19 March, 1577 (1578). Robert was arrested at Stafford, and condemned merely for being a priest. He was cut down alive. After the lapse of a year Catholics managed to secure one of his quarters, when the thumb and index-finger were found to be intact. Abraham Sutton gave Father John Gerard the thumb, which is now at Stonyhurst College.

John B. Wainewright.

Sutton, Sir Richard, co-founder of Brasenose College, Oxford, date of birth unknown; d. September or October, 1524. He was the younger son of Sir William Sutton, of Sutton, Leicestershire. It is not known where he was educated, but he devoted himself to the legal profession, became a member of the Inner Temple, and achieved considerable success. In 1498 he was a privy councillor and held the valuable position of steward of the monastery of Sion, near London, to which house he gave benefactions of land. The chief work of his life was the building and endowment of Brasenose College, which he carried out in conjunction with Bishop Smyth of Lincoln. Their plans were laid in 1508, and during the following years Sutton bought for its endowment estates in Middlesex, Leicestershire, Oxfordshire, and Essex. These he formally made over to Brasenose in 1519, and in May, 1523, Brasenose Hall and Little University Hall, which he had leased from the university, were conveyed to the new college. His other benefactions during life or at death included the foundation of a chantry at Macclesfield or Sutton, the making of a highway at St. Giles-in-the-Fields, London, and donations or legacies to Corpus Christi College, Oxford, the Temple (wherein he held high office) and Clement's Inn, London, the monastery of Sion, and Macclesfield Grammar School. He was knighted by Henry VIII between May, 1522, and March, 1524. From his will it would seem that in earlier life he had been of strong Yorkist sympathies.

Sir Richard Sutton

Edwin Burton.

Swan, Order of the, a pious confraternity, indulgenced by the pope, which arose in 1440 in the Electorate of Brandenburg, originally comprising, with the Elector Frederick at their head, thirty gentlemen and seven ladies united to pay special honour to the Blessed Virgin. It spread rapidly, numbering in 1464 about 330 members, as well as branches established in the Margraviate of Anspach (1465) and in the possessions of the Teutonic Order in Prussia. But Protestantism, by suppressing devotion to Mary, abolished the confraternity's *raison d'etre*. In 1843 King Frederick William IV of Prussia, in his infatuation for the Middle Ages, thought of re-establishing this order, but this was never more than a project. The name is due to the fact that the members wore a medal of the Blessed Virgin to which was attached a swan, the symbolic meaning being variously interpreted.

Swastika. See CROSS AND CRUCIFIX, THE.

Sweden, the largest of the three Scandinavian countries and the eastern half of the Scandinavian peninsula, lies between 55° and 68° north latitude and 12° and 24° east longitude. It is bounded on the west by Norway, the Skager Rack, and the Cattegat, on the east by Russian Finland and the Baltic. (For map see DENMARK.) Including the Islands of Gotland and Öland, Sweden has an area of 172,876 square miles, of which 73,040 are forest land; 15,000, water; over 20,000, farming and grass land, while what is left consists of barren land, moorland, and pasture land. Although the elevation of the land is on the whole considerably higher than that of Denmark, still the country lacks the mountainous districts of Norway; it is only in the northern part that there are found some mountain peaks, as Suliteluma, which rises to a height of 6150 ft. and glaciers such as Sylfjell. The ground consists chiefly of primitive rock, granite, and gneiss, the disintegrated parts of which form the soil. In Gotland and Öland chalk also appears, and in Skåne coal is found. No country in Europe, with exception of Russia, has larger lakes than Sweden. The largest is Lake Wenern (2200 square miles), the most beautiful is the Wettern (733 square miles), the one containing the greatest number of islands and most frequented is Lake Mälar. Stockholm, the beautiful capital of Sweden, is situated on the outlet that connects Lake Mälar with the sea. The country's many, and generally swift, rivers not only form beautiful waterfalls, as Trollhættan, Tænnforsen etc., but also contain in their great abundance of water about 5,000,000 horsepower. Lakes and rivers are frequently connected with one another and with the sea by canals; one of the most important is the Göta Canal. The climate is relatively mild, especially in the southern provinces and Gotland. The rainfall is fairly regular. In summer the days are not only long and bright, but also very warm. In the northern part of Sweden the sun does not set from the end of May until the middle of July. Naturally the winter is a complete contrast to this: for months the land is covered with heavy snow, and the water has a thick covering of ice.

Sweden is very heavily wooded; in the south the forests consist chiefly of beeches and oaks; in the higher latitudes conifers take the place of these; birches are found below 69° N. lat. The forests and open country give shelter and food to large numbers of wild animals; besides hares and deer there are also reindeer and squirrels. Formerly wolves and bears were numerous, but now they are only found in the most unfrequented parts of the northern provinces and will before long disappear. In Southern and Central Sweden the same varieties of grain and vegetables are cultivated as are grown in Germany, Denmark, and Northern France. In sheltered places grapes are grown as high as 60° N. lat. and at times are sweet in this latitude, but are not suitable for wine. Much attention is given to the breeding of cattle and the making of butter and cheese. The mines, especially at Gellivare, yield a large quantity of fine iron ore. The river and high-sea fishing (salmon, cod, herring) has attained large proportions. The Scandinavian exhibition held in 1897 showed the extraordinary development of manufacture during the last hundred years. The most valuable exports are wood, either in the rough or worked, and iron in the ore or in bars; the annual value of the export of the first is 200,000,000 kronen and of the second 100,000,000 kronen. Butter and cheese to the value of about 40,000,000 kronen are exported annually; live-stock, hides, and fish, 20,000,000 kronen. The value of the most important imports is as follows: coal, 66,000,000 kronen; all kinds of groceries and manufactures, 50,000,000 kronen; grain, 52,000,000 kronen. Traffic and commerce are promoted by the numerous canals and the excellent roads; by a large number of railways, having a length altogether of 8694 miles and owned partly by the State and partly by private citizens; by an excellent postal, telegraph, and telephone system. In 1909 the Swedish merchant marine included 1800 sailing vessels with 200,000 tons, and 1200 steamships with 583,000 tons. In 1908 more than 35,000 ships entered or left Swedish ports. The unit of coinage is the krone, which equals 100 öre or 1·12 marks of the German coinage, and equals 27 cents in U. S. money. Weights and measures follow the metric system.

The great majority of the population of 5,500,000 persons consist of Swedes (*Svear* and *Götar*), and of people of Danish descent settled in the southern provinces who are now Swedish in speech and thought. In the north Finns and Lapps are found who, although they understand Swedish, still hold to their own customs and languages. Officially nearly the entire population belongs to the Lutheran State Church. Nevertheless, large numbers are indifferent or have no belief; the sects are steadily multiplying. The few thousand Catholics are scattered through the entire country and regularly organized parishes exist only at Stockholm, Gothenburg, Malmö, Norrköping, and Gefle. The number of marriages (33,000) is increasing, while the annual birth-rate changes but little. Divorce has become quite frequent. Emigration, however, has declined. As regards education and training, there are five schools of high rank, including the two well-endowed universities Upsala and Lund; a large number of technical schools, *gymnasia*, primary and itinerant schools. The national wealth is estimated at four milliards; the national debt in 1910 amounted to 527,000,000 kronen.

Sweden is a constitutional monarchy; the crown is hereditary in accordance with the law of primogeniture. The Parliament consists of two houses, and the king has the right of veto. Administration and justice in Sweden, like the same departments of government in England, have retained many German peculiarities. For administration the kingdom is divided into twenty-five districts, called *læns*, each of which is governed by a *landshoefding*. Justice is administered by district and upper courts. For ecclesiastical purposes Sweden is divided into twelve dioceses, each containing a large number of parishes; at the head of each diocese is a bishop. The primate of Sweden is the Archbishop of Upsala; the king is the *summus episcopus*. In Sweden liability to military service lasts twenty years; twelve years are spent in the first levy (Beværing), eight years in the reserve. The time of actual service is short, being barely one year in most instances. Naturally the officers receive a thorough military training. In times of peace the army numbers 66,000 men, of whom 6000 serve in the cavalry, 7000 in the artillery, 2000 in the engineer corps. In war time the army can easily be doubled. The Swedish navy is small but good; it is only used for coast defence. Its equipment consists of 1000 officers and non-commissioned officers and 4000 marines and sailors. The national colours are yellow and blue. The battleflag is blue with a yellow horizontal cross that runs out into a tongue; the two blue sections of the flag likewise end in tongues. The flag of the merchant marine is square, blue in colour with a yellow horizontal cross. There are several decorations of honour, the highest being the Order of the Seraphim. The Order of Charles XIII is only intended for Freemasons. The present King of Sweden is Gustavus V, who was born 16 July, 1858, and is a member of the Bernadotte family; in 1887 he married Princess Victoria of Baden.

ECCLESIASTICAL HISTORY.—Nothing positive is known as to the religious ideas of the prehistoric inhabitants of Sweden during the Stone and Bronze Ages. It is hardly possible, however, to doubt that they believed in a life after death, as they were accustomed to offer sacrifices at the graves of their dead, and to place in these graves the weapons, tools, utensils, and ornaments of those there buried. Their religion was an ancestral worship. Light or its chief repesentative, the sun, appears to have received as Ty-deus, equivalent perhaps to Zeus, the veneration of a divinity. This is shown by two symbols derived from the Stone Age, the wheel and the axe. Subordinate to this may have been a form of worship paid to individual trees, springs, rivers, and lakes, as striking natural phenomena, which is not entirely extinct even yet. For example, sacrifices are offered in "fairy-mills" (*älfkvarnar*), and despite attempts to dispel superstitions by the schools the belief in house spirits and forest spirits is still to be found here and there. Great fires are still kindled about Easter time, just as was customary thousands of years ago. At a later date than that above-mentioned the sun-god was regarded from varying points of view and received various names. This led gradually to a number of gods: Thor, Odin, and Frey, or Freyr. However, Thor, not Odin, always remained the chief god; he was the god of lightning and of strength. It is indeed asserted that the worship of Odin came from the South; this, however, is contradicted by the fact that his greatest temple stood in Upsala, and that the Scandinavians were the chief worshippers of this god. Among the Germans Wodan, as he was called by them, was treated with but little respect; this is especially true of the tribes of Southern Germany. Moreover, the Scandinavian mythology, as it has come down in the two Eddas, is totally lacking in unity and is in part influenced by Christian ideas. Bloody sacrifices, generally animals, as horses or dogs, were offered to the gods to conciliate them or to gain gifts from them. At times human beings were sacrificed, as bondsmen, freemen, and even kings, who in the literal sense of the word were killed with the sword. Those dedicated to Odin were hung in his groves. Once in nine years the feast of the equinoxes was celebrated with special and horrible pomp. On each of the nine days of sacrifice at least one human being was killed, besides large numbers of animals. Dozens of bodies often hung from the trees. A distinct sacerdotal order seems to have been unknown, and the chiefs of the tribes offered the sacrifices themselves.

The first contact with Christianity arose from the expeditions of the Vikings. In this way the Scandinavians became acquainted with, and learned to appreciate, the higher civilization of the southern races; some of the northern warriors were baptized. Thus gradually the ground was prepared for the seed of the Gospel. The first effort to convert the country to Christianity was made by the Frank, Ansgar. At the request of Swedish nobles he was commissioned by the Emperor Louis the Pious to go to Sweden and reached the commercial town of Birka in Maelarsee in 630, after a hard and dangerous journey. Here with the consent of King Björn he preached zealously for more than a year. Twenty-three years later Ansgar, who had in the meantime become Archbishop of Hamburg-Bremen, returned to Sweden, and by his shrewdness and gentleness overcame the hostile efforts of the worshippers of the heathen gods. His successor as archbishop, Rimbert, also sought to carry on the work of converting the Scandinavians. However, internal turmoils and wars soon destroyed what the two pious men had built up. It was not until the beginning of the eleventh century that the Church resumed the work. German and English missionaries competed with one another in preaching the Word, and not without results. In 1008 Olaf Skötkonung was baptized by Siegfried at Husaby in Western Gotland. But the Church made very slow progress. In the reign of King Stenkil a diocese was founded at Skara. In the reign of Ynge the Old, the new faith gained the mastery. The English missionaries David and Eskil, the German missionary Stephen, and the Swede Botvid preached chiefly in Södermanland, Vestmanland, and Norrland. The first-mentioned died a natural death, the others gained the crown of martyrdom. Still heathenism maintained itself for a long time in isolated spots in the valleys among the mountains.

Naturally the leaven of the Gospel penetrated the hearts of the battle-loving warriors very slowly, and the majority of the baptized were only half Christians. Their knowledge of religion must have remained very limited on account of the lack of printing and of schools. The secular clergy, and later the monks especially, sought with praiseworthy zeal to raise the neophytes to a higher spiritual and moral level. They opposed with growing success drunkenness, violence, polygamy, and the exposure of children. A second diocese was established at Linköping in the reign of Sverker the Old. Both here and in the monasteries (Alvastra, Nydala, Varnhem, etc.) promising youths were instructed in religion as well as in secular knowledge The lack of the written word was supplied by zealous preaching of the doctrine of salvation. The poor and sick were tenderly cared for. Christian festivals took the place of the heathen ones, and the organization of the Church made rapid progress. The first national synod was held at Linköping in 1152 under the presidency of the papal legate, Bishop Nicholas of Albano. Soon after this Upsala was made the see of a diocese; its first bishop was an Englishman named Henrik. Before long he joined a crusade to Finland, remained in that country, and was killed for the Faith. In 1164 Pope Alexander III raised Upsala to an archdiocese and placed the Swedish Church province under it. As early as the national synod just mentioned the collection of Peterspence was sanctioned; the power of the Church was still further increased when in 1200 Sverker the Younger freed the clergy from the secular jurisdiction and made the payment of tithes obligatory. By the decisions of the national synod held at Skenninge in 1248 the influence of the bishops became greater still. At this synod the election of the bishops was transferred to the cathedral chapters, the study of canon law and the rigid observance of the law of celibacy were made obligatory, while the synod also released the entire clerical body from taking the oath of loyalty to the secular authorities. In 1281, during the reign of Magnus Ladulås, the clergy were released from the payment of taxes, and thus was laid the foundation of their too abundant possessions which were only in part applied to good purposes, such as the building and adornment of churches and the founding of schools and homes for the needy. Birgitta or Brigit, the founder of the Brigittine Order, laboured during the reign of King Magnus Eriksson; she also exerted influence as a writer on mystical subjects, and died at a great age at Rome during the latter part of the fourteenth century. At a later date she was canonized.

The civil wars which wasted the country for hundreds of years were alike injurious to faith and morals. In the course of time the possessions of both nobility and clergy became very great; consequently Margaret, queen of the united Scandinavian countries at the end of the fourteenth century, found it necessary to confiscate a part of these lands, which frequently had been gained by doubtful means. On the other hand there were also excellent princes of the Church, as for example, Archbishop James Ulfsson, for whom may be claimed the honour not only of establishing the first printing press in Sweden in 1483, but, what is more, that of founding the University of Upsala. The last Catholic Bishop of Linköping, Hans Brask, also showed much ability and was as zealous in his episcopal duties as in his promotion of learning. However, the great lack of the true Apostolic spirit among the other Church dignitaries is shown by the fact that Archbishop Bengtsson and Bishop Carlsson led troops against their kings. In addition, Bishop Hemming Gad did everything he could in 1500 and the following years to overthrow the union of the three kingdoms, and then made common cause with the Danes, while Archbishop Gustavus Trolle, who was a strong supporter of the idea of unity, was deposed on this account by the Swedish national council. This last procedure led to the interference of the pope, an act which though just was ill-timed. The victorious King Christian II was guilty of great cruelty to his former foes, largely due to the influence of Archbishop Trolle, and this made the Church very unpopular among a large portion of the population. Consequently Gustavus Eriksson (Vasa), who was elected king in 1523 on account of having incited and led a successful revolution against the domination of Denmark, found the way only too well prepared for the overthrow of all religious conditions.

The first representative of what is called the "ideas of the Reformation" was Olavus Petri, the son of a smith, who was born in 1497 at Örebro. He was a pupil of Luther at Wittenberg and returned home in 1519. As cathedral canon at Straengnaes he won over to his opinions the archdeacon Laurentius Andreas. Very soon the new ruler saw how advantageous it would be to him if he were able to crush the power of the bishops and to confiscate the lands of the Church. As early as 1524 Gustavus Vasa broke off the official connexion of the country with the Roman Curia and permitted Olavus to preach the heretical principles of his former teacher openly in the chief church of Stockholm. Prelates who held strictly to the Faith, as Bishop Peter Jakobsson (Sunnanwäder) and the cathedral provost Knut of Västerås, were accused of treason and executed without any further legal process. At a diet at Västerås three years later Gustavus Vasa was able, by skilful dissimulation, to obtain the passage of laws which made him the *summus episcopus* of the Swedish Church and brought the Church into helpless subordination to the State. In order to dupe the people the Mass, veneration of saints, and pilgrimages were not discontinued at first, ecclesiastical vestments and ceremonies were also retained almost without change. But at the same time, the king and the nobility appropriated as much of the Church lands for themselves as was possible, taking twelve thousand large peasant farms. Even the sacred utensils and bells were seized by Vasa. Many monks and nuns were driven out of their monasteries; a number, including all the members of the Franciscan monastery at Raumo, were killed under circumstances of great cruelty. In order to win over the priests they were permitted to marry, and a great effort was made to win over the common people to the new doctrine by translating the Bible into the vernacular. The attempts of the Dalecarlians and Småländers, who held to the Church, to check the rapid advance of Protestantism was defeated with bloodshed. The most prominent leaders of the Catholic party, Bishop Brask of Linköping, Bishop Haraldsson of Skara, "Lagman" Ture Jonsson, and others, were obliged to flee. Nils Dacke, a peasant of Småland, who for some time successfully led his countrymen against the king, was finally killed in battle. At a second diet held at Västerås in 1544 nearly all the feast days were suppressed and all Catholic customs excepting a few were done away with. The declaration was also made that the country would "never again abandon the word of God and the pure Gospel".

The two chief reformers of Sweden were Olaf and his brother Lars (Laurentius). Gustavus Vasa had made the latter Archbishop of Upsala after the flight of the last lawful bishop, John Magni. Three years before the second Diet of Västerås the two brothers fell into disgrace with the king and were condemned to death; however, upon the payment of a large fine they were pardoned. They were replaced as councillors of the princely tyrant by two Germans, Konrad of Pyhy and Georg Normann, until Konrad was also sent to prison. The skill and success with which Gustavus "purified" the Church is shown by the fact that, although originally almost penniless, at his death he possessed 1,300,000 thalers in coin (about $6,250,000 at the present value of money), and 5000 large farms. This landed property was afterwards called the "Gustavian patrimony". After his death ecclesiastical matters remained for a time as he had left them. However, his son, John III, who had married a Catholic princess, Katherine Jagellon of Poland, was strongly inclined to the Catholic Church. At the diet held in Stockholm in 1577 he forced the Protestant clergy to consent to a new liturgy (*Röda Boken*) and new ecclesiastical regulations. The negotiator for the papacy, Antonio Possevino, S.J., was even able to persuade the monarch to enter the Catholic Church and to begin negotiations with the pope. As, however, the pope could not consent to the Swedish demands, no permanent agreement was made. After John's death his brother Charles called a church assembly at Upsala in 1593 which was largely composed of preachers (135) from the Diocese of Upsala, while the other dioceses were only scantily represented. The members of the assembly repudiated John's liturgy and, in order to avoid all dissension, the "unchanged Augsburg Confession" was made the religion of the State. Severe punishment was the penalty of apostasy from it, while the exercise of any other form of worship was strictly forbidden. In the Province of Finland, just as in Sweden, Protestantism was introduced by force; it was not until towards the end of the sixteenth century, however, that there were no longer nuns at Vadstena and Nådendal and that Catholicism came to an end.

In this period the intolerance of Protestantism was so great that Sigismund, son of John III, who was also King of Poland and a Catholic, was not allowed to hold Catholic services in private, and the expulsion of all non-Lutherans was decreed. After Sigismund's overthrow in 1598 and deposition in 1599 a number of the noblest men of the country were executed on account of their loyalty to their king and their Church. Draconian laws were to put an end forever to "popery". Conversion to Catholicism was punished with loss of all civil rights and perpetual banishment. Foreign ecclesiastics who remained in the country to carry on a propaganda were to be punished with severe imprisonment and heavy fines, and even to be expelled. Conditions did not become better until two hundred years later when, in 1780, King Gustavus III at the request of the Estates granted the free exercise of their religion to "Christians of other faiths" who desired to settle in Sweden for the sake of carrying on commerce or manufactures. In consequence of this, Rome in 1783 appointed a vicar Apostolic for Sweden, who, however, could effect but little, as up to the year 1860 natives of Sweden were forbidden to enter the Catholic Church under penalty of expulsion from the country. Since the year 1873 members of the national Church who are over eighteen years of age may join other religious societies. All proselytizing by the dissenters is forbidden. Moreover, there still exist a series of juggling enactments, which have lately been multiplied, so that there is very little actual religious freedom. According to the literal interpretation of the Constitution Christians of all faiths may be appointed to all offices, excepting the Council of State, but this is not carried out in practice, and in this regard no change will be made within the near future.

Those desiring the history in detail of the development of the Lutheran State Church of Sweden will find it given very exactly and with copious foot-notes in the excellent work of the Anglican Bishop of Salisbury, Dr. John Wordsworth, quoted in the bibliography. It is only necessary to remark here that gradually new life sprang up from the ruins of the Catholic Church organization. The University of Upsala was revived and another university was founded at Lund; in these schools as well as in a number of sees men excellent in their way carried on fruitful labours; missions to the heathen were begun in Sweden earlier than elsewhere—for example, the missions to the Laplanders and the Indians. However, there was no lack of strife and sectarian movements in the Church (Pietism, Moravianism, Swedenborgianism, etc.); since the middle of the eighteenth century Rationalism and Infidelity have assumed formidable proportions. Freemasonry is strong in Sweden, and among its members are many clergymen, church dignitaries, and even bishops. The majority of teachers in the higher schools and many preachers reject belief in the Trinity and regard Christ simply as a sage and philanthropist. Even the instruction for confirmation is at times made use of to sow the seeds of doubt in youthful hearts; matters have gone so far that a bishop declared, without exciting much opposition, that the Apostles' Creed was unnecessary. The number of the unbaptized is constantly increasing. Attendance at church and at the Communion service (8 per cent of the normal attendance) is rapidly declining of late years. Among many intense love of pleasure and unbridled sensuality prevail. Notwithstanding the practice of abortion in many places, every third child is illegitimate. These things lead many of the better classes to join the sects, among which the largest memberships belong to the Methodists and Baptists.

The number of clergy grows continually less, and those who still hold to the Confession of the State Church are hampered in their efforts to maintain religion by the fact that their energies are largely absorbed by matters of secular administration. Consequently the men who courageously fight for their convictions deserve all the more credit, even though they are at the present opponents of Rome. It is due to them that of late far more than formerly efforts have been made to renovate all the churches, and to build new ones, and to improve church music and religious art; as regards the liturgy, a desire to revive the old forms has of late become apparent. Much is done for missions both by the State Church and by the followers of Valdenström, who, notwithstanding their separatistic inclinations, work in union with the State Church in this matter. The various missionary associations labour among the heathen in South Africa, the Congo State, India, China, and Japan. In Palestine the effort is made, with but slight success, to bring the "pure Gospel" to Roman Catholics and Orthodox Greeks. The same effort in Abyssinia is defeated by the conservatism of the Coptic Christians. Missions are also established for converting Jews and Mohammedans although little has been accomplished. On the other hand, home missions and work among the Swedes, especially in America, have made considerable progress.

Political History.—It will probably never be possible to determine when Sweden was first inhabited. However, the large number of objects found by excavating justify the belief that several thousand years before Christ there were people living along the seashore (Baltic, Cattegat) and by the lakes to whom the use of metals was unknown. With constantly increasing skill they manufactured weapons and utensils from horn, stone, and clay. Their only food was gained by hunting and fishing. The raising of cattle and agriculture seem to have become customary very slowly. The dead were buried either in a recumbent or sitting position, in curiously formed stone chambers over which at times mounds of earth of considerable size were raised. Scientific men do not agree as to the original home from which the prehistoric inhabitants of Sweden came. It seems hardly probable that they all spread from the south to the north. Still this may be true of the inhabitants of the present Provinces of Skåne, Blekinge, and Halland. The Stone Age at last gave way to the Age of Bronze. Some two thousand years before our era men learned how to fuse copper and tin, as is proved by great numbers of utensils, as knives, daggers, swords, and shields that have been preserved, which were sometimes very ingeniously made. Gold also began to be used in this period. Bronze was gradually replaced by iron. Roman traders brought into the country not only articles produced by Roman skill in art but also gold coinage. Up to this time the people had tried to preserve the memory of important events by primitive marks (*hällristningar*) scratched on rocks; they now learned from the Roman traders the use of letters, but turned these to suit their own taste into the Runic writing that was long in use. The earliest historical knowledge of Scandinavia and its inhabitants is due to Roman authors. Tacitus (Germania, c. xliv) is the first to call the people "Suiones". How closely this tribe living north of Lakes Wetter and Roxen was related to the Goths living to the south and west, and how it was able to absorb the latter and give its own name to the combined body will always remain obscure.

About the fifth century of the Christian era the civilization of the country had greatly advanced; this is proved by numerous remains of gold utensils, ornaments, runic stones with inscriptions, burial urns, and other articles. Just as in the later Bronze Age, the bodies of the dead were sometimes burned, sometimes buried; however, the latter custom had the greater prevalence. The Swedes had only a small share in the viking expeditions which, from the eighth century onward, were the terror of the peoples of Europe. Besides, in their expeditions they gained a firm foothold in Finland and also came into closer connexion with their neighbours the Russians. The first efforts of missionaries to convert the Swedes to Christianity occurred in the ninth century. It was not until about the year 1000, when Olaf Skötkonung was baptized by the Anglo-Saxon missionary Siegfried, that Christianity was fairly established. Olaf's family, of whose deeds little is known, died out with Emund the Old (1060). At that time the Kingdom of Sweden included only the present northern provinces, while Skåne, Blekinge, and Halland belonged to Denmark and remained united with this country for centuries. The vast forests were largely the cause of the individual development of the tribes, who were separated from one another by them, rendering a common administration for all much more difficult. As roads were lacking, the rivers and lakes were used to connect the different parts of the country. In regard to the government the election of the king customary in earlier times gave way to a settled succession to the throne. Naturally the machinery of government in the modern sense did not exist. Everything depended upon the initiative and force of the ruler, whose commands might, indeed, not be carried out at all or only in part by the great officials or *jarls*. The various provinces had each its own laws (*lag*), and the *lagmen*, or expounders of the law, exerted much influence. They were often able to make their office hereditary. The provinces were divided into hundreds (*härrads*) at the head of each of which was a *höfding*, whose chief duty was to maintain peace and order. For a long time the father of the family still remained the master within his house. The people were divided into the higher and lower freemen (*odalbönder* and *bönder*) and the serfs (*trälar*), and generally lived together on farms or in villages. The houses were built of wood or clay and were covered with shingles or straw. Even at this time, however, there were larger places with occasional stone buildings, as Skara, Linköping, Orebro, Straengnaes, Vesterås, Upsala, Sigtuna, and, at a little later era, Stockholm, which rose rapidly into prominence. The national character showed sharp contrasts: harshness and gentleness, loyalty and deceit, magnanimity and revengefulness. No observer doubts that the gradual improvement in public morals was due to the influence of the Church.

After the old ruling family was extinct a chief named Stenkil was chosen king. He was connected with the former rulers by his wife who was the daughter of Emund the Old, and was an ardent supporter of Christianity. During his reign the first diocese, Skara, was established in eastern Gotland. However, as the actual Sweden (*Uppsvear*) still held to heathenism, rival rulers appeared, and for more than twenty years internal strife prevailed. Finally Inge, the second son of Stenkil, was able to defeat his opponents and bring about a complete victory for Christianity. With the death of a nephew, Inge the Younger, in 1125, the family of Stenkil came to an end. The East Goth Sverker, who married Inge's widow, was able for a time to re-establish the unity that had been disturbed, but his son Charles could not maintain himself. On the other hand Erik, a Swede from the northern provinces, won universal recognition. Erik undertook a crusade in Finland and after his return was killed in a battle (1160) with a Danish pretender Magnus Henriksson. In the following year Magnus was killed by the people. Sverker's son Charles obtained the ascendency, but he had to give way in 1167 to Knut Eriksson. During Knut's administration the first Swedish money was coined and Stockholm was founded. After Knut's death Sverker Karlsson, the son-in-law of Birger Brosa, Knut's chief councillor, obtained the throne (1195), although Knut had left children. Birger owed this success to the clergy, whom he favoured on all occasions. A war broke out between Knut's sons and Sverker after Birger's death; Sverker was obliged to flee, and when he sought with Danish aid to regain the throne he suffered a decisive defeat in 1208 near Falköping. Two years later he also lost a battle near Gestitren, when he was killed. His successful rival Erik Knutsson, the first King of Sweden to be crowned, died in 1216. He was followed by John Sverkersson, at whose death in 1222 the family of Sverker became extinct. Erik, the posthumous son of Erik Knutsson, now came to the throne, but he proved an incompetent ruler and was for a time deposed. By the marriage of his sister Ingeborg with the vigorous Jarl Birger of the Folkunger family he sought to gain Birger for his cause. In 1249 Birger won Finland, which never before had been conquered, for Erik. While Birger was in Finland Erik died, and the nobles of the kingdom elected Birger's son Waldemar. During Waldemar's minority his father carried on the administration with success and skill, maintained good relations with the adjoining countries, and sought to preserve peace at home by wise laws. His son Waldemar, who ruled from 1266, was very unlike his father and had, therefore, to yield the administration to his more strenuous brother Magnus, later called Ladulås.

Magnus was the first to call himself "King of the Swedes and Goths". He continued the work of his father, was able to protect the common freemen (*allmogen*) against the encroachments of the higher nobility, and in 1285 was able to gain the valuable island of Gotland without a blow. When Magnus died in 1290 his heir Birger was a minor; the lord chamberlain, Torgil Knutsson, carried on the government excellently and without self-advantage. After Birger himself came to power Torgil continued to be his most trusted adviser. Finally the king's brothers were able to so arouse Birger's suspicions of Torgil that he seized and beheaded him without trial in 1306. Punishment for such a shameless act did not fail to follow. Left without his one true friend, Birger was made a prisoner by his intriguing brothers and lost his throne. The unfortunate quarrel between the brothers ended apparently four years later with a settlement whereby Birger received a part of the country. However, he misused the power he had regained to obtain revenge, and allowed his two brothers to die of starvation in prison. At this the indignant people drove him from the throne and elected Magnus (1319), the three-year-old son of the late Duke Erik. Shortly before this Magnus had become heir to the throne of Norway by the death of his childless relative King Hakon. When in 1332 Magnus came to power he had the opportunity for the first time to unite temporarily the Danish Provinces of Skåne and Blekinge with his kingdom. His reign was marked by many misfortunes; in particular, the pneumonic plague carried off two-thirds of his subjects. Although the king did much for Sweden by introducing common law and suppressing serfdom, yet he was hardly able to maintain himself in his own country, still less in Norway, especially as he came into disagreement with the pope. He found himself obliged to recognize his son Hakon as King of Norway (1343) and to accept his son Erik as co-regent of Sweden (1356). After Erik's death he reigned jointly with Hakon over both countries. By Hakon's marriage with Margaret, the youthful daughter of King Waldemar of Denmark, the way was prepared for the future union of the three countries.

Discontent with the growing power of the king led the Swedish nobles to revolt against Magnus and offer the crown to Duke Albert of Mecklenburg, who was able, with the aid of German ruling princes, to overthrow Magnus and Hakon (1364). However, as Duke Albert was obliged by agreements made before election to leave unpunished the greatest excesses of the nobles, while the brutality of his vassals and mercenaries aroused universal indignation, it was resolved to elect Margaret Regent of Sweden. In 1375 Margaret had followed her father in the government of the Kingdom of Denmark, and in 1387, after the death of her son Olaf, had been recognized in Norway as the fully authorized and rightful ruler. Albert was defeated by Margaret's army (1389) and was taken prisoner. For a time his adherents continued the struggle for supremacy as pirates (the Vitalians), but finally, in 1395, Queen Margaret came into possession of Stockholm. Before this event the nobles of all three kingdoms at an assembly held at Calmar, 20 July, 1397, had crowned as king of the united kingdoms a boy of seven years, Duke Erik of Pomerania, son of Margaret's niece. At the same time it was settled how the "Union" was in future to be carried on. On account of the great difference in interests and character of the three peoples it is evident that the Union could never attain real strength. As long as Margaret ruled, which was only for fifteen years, everything went smoothly. A woman of great talents and masculine energy, she personally superintended the entire government, saw to the prompt administration of justice, and sought to increase the power of the Crown at the expense of the nobility; her one mistake was that she granted the Danish element too much influence and thus estranged the Swedes. During Margaret's last years Erik began to share in the government, and it was owing to him that a long war broke out with the Counts of Holstein. His attempt to wring a tax from all vessels passing the Oresund made the Hanseatic League his enemy. Only the ability of his wife, Philippa, the daughter of an English nobleman, prevented Copenhagen from falling into the hands of the enemy. Under Erik's autocratic rule the internal government grew worse from year to year, and the growing discontent of the people found vent in bloody revolts. Under the leadership of Engelbrechtsson the Dalecarlians drove away all the Danish supervisors and chose a head of their own (until 1435). The nobles alone for the time being held to the king, but they sought to weaken his power by means of agreements, and as Erik did not keep these promises, allegiance to him was declared to be no longer necessary at the Diet of Arboga (1436) and Charles Knutsson was elected as administrator or stadtholder of the kingdom. Although the democratic Engelbrecht was murdered soon after this, yet the efforts to reconcile king and people had no lasting success, and Erik was deposed in 1439. He also lost the crowns of Norway and Denmark. Denmark elected Duke Christopher of Bavaria king; he was recognized by Sweden in 1440, and later by Norway. The chief event of his short reign (1440–48) was a famine. The condition of the peasants also grew worse. His efforts, however, to establish a settled code of law are very creditable to him.

After Christopher's death the Union fell rapidly to pieces, as the Swedes elected Charles Knutsson, who has already been mentioned, as king, and the Danes and Norwegians Christian of Oldenburg (1448). In 1457 the latter was able to obtain his election in Sweden also, but he could not make any headway against King Charles or Sten Sture the Old, the successor of Charles in the administration of the country. Christian I was followed in Denmark by his son Hans (1481), who gradually gained recognition in Norway (1483) and Sweden (1497). When, however, he was defeated in a battle with the Dithmarschen, Sweden again abandoned its allegiance to him (1501) and on the death of Sten Sture the Old in 1503 the Swedes made Svante Sture the administrator of the country (1503); after this latter's sudden death in 1512 the government passed to Sten Sture the Younger. The son of the late King Hans, Christian II, now sought by arms to force Sweden to re-enter the Union. In this policy he was supported particularly by Archbishop Gustavus Trolle of Upsala, against whom the hatred of all the friends of Sture was naturally directed. The Danish troops which landed at Stockholm in 1517 were soon defeated and driven back, and the next year Christian's troops suffered a still severer defeat at Brännkyrka. The national Swedish party deposed and imprisoned the dignitaries of the Church without any regard to canon law, consequently the pope excommunicated its leaders, placed Sweden under an interdict, and commissioned King Christian to carry out the punishment. Early in 1520 King Christian sent a large army into Western Gotland, and after successful skirmishes the Swedes were overwhelmingly defeated at Upsala. Stockholm alone held out for a time, but when Christian, approached the city with a strong fleet, it was obliged to surrender. The conqueror had been recognized by a part of the council as king before this; he entered the city in state, was able to obtain homage as hereditary ruler, and was then crowned. Unfortunately the adherents of the Union were not content with what had been attained; Archbishop Trolle demanded the punishment of his enemies, and Christian made short work of these. Bishops Matthias of Strængnæs and Vincent of Skara, and a large number of nobles, councillors, and citizens were executed as proclaimed rebels and heretics, and their property was confiscated. While on his return to Denmark the king had various persons executed, hoping in this way to suppress the spirit of insurrection forever. In this he was mistaken.

In January of the next year a peasant insurrection broke out in Dalarne, which spread rapidly. Gustavus Eriksson (Vasa) became the leader of the insurgents, who soon numbered 15,000 men. Vasa had lost his father and brother-in-law in the slaughter at Stockholm, and had been taken prisoner at Brænnkyrka as the chief standard-bearer, but had made his escape. His strength grew as leader of the rebellion through several fortunate skirmishes, and as he succeeded in winning over the influential Bishop Hans Brask to his cause, a popular assembly at Vadstena appointed him *stadtholder* of the kingdom (1521); two years later he was unanimously elected king at Strængnæs. He gained Stockholm and Calmar during the summer months of 1523, and Öland and Finland also acknowledged his sovereignty. At the same time his position was by no means a favourable one, for he lacked the money to meet the most necessary expenses, while the constant civil wars had largely destroyed the sense of order and respect for law. The bishops were powerful and wealthy lords and only partially satisfied with the new conditions; neither could much dependence be placed upon the nobility. Gustavus, however, was never at a loss for expedients. By means of clever dissimulation and deceitful promises he was able to make the citizens and peasants his adherents. The introduction of Luther's doctrines not only freed him from the tutelage of the bishops, but in particular offered him the possibility of gaining control of the Church lands and treasures. As the nobility also gained large sums by this confiscation, community of interest bound them to their princely ruler. Resistance, wherever shown, was crushed mercilessly, generally by foreign mercenaries. Gustavus repaid the loyalty of the Dalecarlians, to whom above all he owed his success, by the execution of their best men. He was an unusually powerful man of coarse instincts; in old age he married for his third wife a very young woman, and had little interest in higher moral aims when they were of no benefit to his practical schemes. For schools he did not care at all, and he allowed the one university, Upsala, to sink into decay. The preachers frequently received mere pittances, and in many cases stood on a low moral and intellectual level. On the other hand much was done to improve agriculture, mining, and commerce, as well as to strengthen the defences of the country. However, the monarch gave much more thought to his own advantage than to the well-being of the nation. When he died in (1560) he was the richest prince in Europe.

Among the later rulers of Sweden only one was a Catholic, Sigismund; two princesses of the royal family, Cecilia Vasa, daughter of Gustavus I, and Christina, daughter of Gustavus II Adolphus, became converts in their later years. The nation was permanently separated from Rome, consequently it is only necessary here to treat the later history of the country very briefly, especially as during the period of the "great powers" it is closely connected with that of Europe. The sons of Gustavus Vasa ruled Sweden from 1560 to 1611. Erik, the first to come to power, was half-crazy, was soon deposed by his brother John, and died in prison. On account of mental deficiencies Magnus never came to the throne. On the other hand Vasa's youngest son, Duke Charles, who had inherited both the good and bad qualities of his father, was able to drive his Catholic nephew Sigismund from the throne and to leave it to his son Gustavus II Adolphus, whose share in the Thirty Years War was of such far-reaching importance. The conversion to Catholicism of his daughter Christina was of as little political importance as the earlier conversion of the most beautiful of Gustavus Vasa's daughters, Cecilia. Cecilia was the ancestress of the Catholic heroes, Margrave Leopold William and Louis William of Baden; she outlived all her brothers and sisters and died at Brussels in 1627.

The guilty family of Vasa was succeeded by relatives who were descendants of the Wittelsbach Palatinate family (1654–1718). The successful warrior Charles X Gustavus reigned only six years. During the reign of Charles XI a large part of the earlier territorial possessions was lost; the imprudence and recklessness of his son Charles XII almost ruined Sweden, although at first he gained some temporary and brilliant successes. These two kings ruled as absolute monarchs and cut down greatly both the rights and possessions of the nobility. The succeeding kings, however, Frederick of Hesse and Adolphus Frederick of Holstein Gottorp, were limited in their sovereignty by political parties (Hats and Caps). Gustavus III (1771–92), son of the last-named sovereign, restored the former splendour of the monarchy, but was assassinated when barely forty-six years old. During his reign the first breach was made in the rigid system of the state Church. His son and successor Gustavus IV Adolphus (1792–1809), of honourable but obstinate character, was naturally not the one to direct state affairs skilfully in an era of universal upheaval. He was deposed by a military conspiracy (23 March, 1809). His uncle and successor, Duke Charles (King Charles XIII), sought to secure peace for the country by the surrender of territory which he could not hold. As he was childless, he first adopted Prince Christian Augustus of Augustenburg and, after the sudden death of this heir, the French marshal, Jean Bernadotte, who accepted the election as crown prince and became a Protestant to secure the succession to the throne for himself and his descendants. Even during the lifetime of his adopted father he was the real ruler. As the representative of the interests of his country he came into collision with his former protector Napoleon, joined the allied powers in 1812, and sent 30,000 men to the Army of the North. After the battle of Leipzig he led his troops (of whom he had taken great care) against the Danes. Denmark was made to sign the Treaty of Kiel (1814) in which it yielded Norway to Sweden. The unwilling Norwegians only consented under pressure of circumstances, and their differences with Sweden were never fully settled. Finally, in 1905, the Norwegian Storthing proclaimed the independence of Norway, and Sweden had to consent to the separation. Conditions in Sweden have greatly improved under the new ruling family, although friction, especially at first, arose between ruler and people. Jean Bernadotte reigned as King Charles XIV John (1818–44). Especially prosperous was the reign of Oscar I (1844–59); his wife Josephine, a Catholic princess of Bavaria, was universally beloved on account of her charitableness. During the reigns of their sons Charles XV (1859–72) and Oscar II (1872–1907) the country developed greatly in all directions, especially as regards political and religious freedom. Oscar II was also a distinguished author. The present king is Gustavus V Adolphus.

ART.—Even as early as the end of the ancient Stone Age, probably a thousand years before Christ, the people of Sweden showed a desire to improve the shapes of utensils in common use, as is evidenced by the discovery of numerous utensils belonging to this long past era. There was a steady improvement in the forms of tools, especially of the axes. Vessels of clay were not only adorned with graceful designs, but at times they were also ornamented with more or less skilful drawings of animals. In the Bronze Age the sense of beauty rapidly increased; weapons and ornaments (rings and diadems) reached a high degree of correctness and beauty, although in part this was plainly due to the influence of foreign skill in art. On the other hand the representations of the human form showed decided clumsiness for a long time. In this period use was also made of the higher metals, gold and silver, especially in ornamenting the weapons for defence and attack. The weapons were first made of bronze and afterwards of iron. Apparently articles made of glass were brought from other lands. The Runic alphabet was first employed in the early Iron Age; the runes were cut on memorial stones that had been formerly without inscriptions. During the era of the Migrations and of the Viking expeditions the æsthetic sense of the Swedish people developed as they became acquainted with artistic models; this is shown especially in the ornamental work. The final victory of the Romano-Christian civilization exerted a profound influence upon technical artistic skill and the tendencies of art. Although goldsmiths and armourers were still held in high repute, and the memory of unusually skilful masters was preserved in song, nevertheless from now on art was above all employed in the service of religious ideas. The royal palaces and princely dwellings, which were chiefly built of wood, have disappeared.

In Norway a number of the old wooden churches are still in existence, but in Sweden only the unassuming little chapel of Hedared, situated between Borås and Alingsås, has withstood the storms of time. On the other hand there are a number of tasteful stone churches in various architectural styles and sometimes very interesting details such as doorways, arcades, tabernacles etc. Some, as the Romanesque cathedrals of Lund and Linköping (Transition Period) and the Gothic cathedral of Upsala, fall but little below the celebrated architectural works of more southern countries in size and splendour. Among the churches worthy of notice are those at Skara, Västerås, and Strängnäs; the monastic churches at Varnhem and Sko (Cistercian), Sigtuna (Dominican), and Vadstena (Brigittine), also several churches, which are in good condition, as the Tyska Kyrkan or the Church of the Virgin at Visby, and some preserved as ruins, especially on the Island of Gotland. The majority of the country churches were built in the Romanesque period; many of them were altered later during the Gothic era. At times the churches are round in shape with remarkably heavy walls; apparently they were used when occasion required for purposes of defence. A number of churches, as those at Råda, Risinge, Arboga etc., were adorned with frescoes, which were afterwards covered with whitewash. Of later years the whitewash has at times been removed and the pictures thus exposed have been skilfully renovated. The churches were also adorned with stone and wood carvings, such as images of Christ, of the Madonna, and the saints, carved altars, baptismal fonts of stone or metal, reliquaries, hanging chandeliers and standing candelabra, chalices and patens, costly ciboriums, monstrances, and ostensories, processional crosses, censers, organs, bells, superb vestments, etc.

Fortunately, notwithstanding the thorough "purification of the Church" undertaken by Gustavus Vasa, enough remains to show that in Sweden also during the Middle Ages there was a sense of pious sacrifice and of purified art. As everywhere else the effect of what is called the "Reformation" was at first destructive, and for centuries nothing new of importance was produced in the domain of ecclesiastical art. It is only of late years that a more and more marked change for the better has appeared. Here and there altars of Catholic origin have been brought from old lumber-rooms and garrets and restored to their former places. Mosaic work is also used. A continually increasing number of orthodox pastors make use of embroidered vestments in the services of the Church and there are signs of a ritualistic movement, which, however, is energetically attacked by the Liberal and unorthodox clergy.

The development of secular art since the twelfth century does not lie within the province of the present article. Instead of building churches Protestant Sweden has very largely erected castles and citadels; these have been filled with weapons, gorgeous furniture and table equipments, ancestral portraits and pictures on panels; on sepulchres, high-sounding epitaphs were common. In isolated instances artists have ventured to represent Biblical subjects. There is no Catholic art; the poverty and small memberships of the Catholic communities forbid the encouragement of such an art. Still the Church of St. Erik in Stockholm is a well-decorated building. The other Catholic churches, as St. Eugenia at Stockholm, those at Göteborg, Malmö, etc., have been able, in the course of time, to obtain better vestments and utensils.

Literature.—In pre-Christian times there was no real literature in Sweden as neither written language nor runes came into use until quite a late period. The oldest known writing of a historical character, the so-called "Röksten" from East Gotland, appeared probably about the year 900. It recounts in alliterative verse the heroic deeds of a king; later inscriptions have also the same theme. It may be assumed with certainty that there were songs of gods and heroes that were orally preserved, but of which next to no traces now remain. The first to arouse the intellectual life of the nation were Catholic priests, especially monks; in doing this they both practised and taught the art of writing with intense energy. They wrote chiefly in the language of the Church; in all countries these Latin and exclusively religious works are very similar and therefore will not be considered here. Gradually, however, the language of the people came more and more into use for literary purposes. It became a serviceable instrument for the expression of higher ideals and noble sentiments. Thus the way was prepared for a literature in the Swedish language. The early writings in Swedish were very largely practical. Thus the current conceptions of law were brought together into codes of law in the twelfth and thirteenth centuries, as the "Västgötalagen" and "Ostgötalagen", the "Uplandslagen" and "Gutalagen". A treatise of the thirteenth century called "Om styrilsi Konunga och höftinga" gives rules for right living. The "Revelations" (*Uppenbarelser*) of St. Birgitta (d. 1373), which are at times very extravagant in style, have been translated into many languages. Of the writings of Magister Mathias, cathedral canon of Linköping and father-confessor of St. Birgitta, there is still in existence a translation of the Bible, besides several sermons and edifying treatises.

The first connected accounts of historical events were two chronicles in rhyme, the chronicle of Erik and that of Karl. The first relates in doggerel the quarrels of the Folkunger family up to the year 1319 and gives, in particular, a vivid description of the actions of King Magnus Ladulås. The other chronicle covers the era, 1389–1452. Poems of imaginary adventures and French metrical romances, as "Ivan and the Lion", "Fleur and Blanchefleur", were imitated in Sweden, and history in a romantic garb, as the legend of Alexander or that of Duke Frederick of Normandy etc., was also recast by Swedish writers. As one of the most important of these early poets should be mensioned Bishop Thomas Simonsson of Strängnäs (d. 1443). He wrote an account in fairly good verse of the national hero Engelbrecht, and in his songs praised the virtue of loyalty and the blessings of freedom. Jöns Budde, a Brigittine monk, who was by birth a German, prepared while living first at Vadstenn and then at Nådendal, Finland, various versions of ascetic works, lives of saints and similar treatises, and also translated several books of the Bible, as Judith, Esther, Ruth, and Machabees. Peder Månsson wrote text-books on mining. Bishop Brask of Linköping wrote two works now lost; one a chronicle of his diocese, issued in 1523, the other a genealogy of the Swedish nobility (1530). Lastly many reminiscences of the heroic and Catholic eras are still found in the *Folkvisorna* (folk-songs). Accounts of the five periods of Protestant Swedish literature may be found in works on the subject. Mention should be made here of John Messenius, author of "Scandia illustrata", the chronicle of a bishop, and various dramas. He was imprisoned for twenty years on account of Catholic tendencies and on his death-bed openly joined the Catholic Church. He left a work in manuscript called "Hertig Carls Slagtarbänk" (Duke Charles's Shambles), now in the royal library at Stockholm, which, although perhaps somewhat too severe and at times exaggerated in tone, describes the bloody persecution that Catholics who were faithful to king and Church suffered from the cruel father of Gustavus Adolphus. It should also be said that Erik John Stagnelius (d. 1823) belongs with Wallin and, in part, Tegner, to the foremost Protestant poets of Sweden; in his drama "The Martyrs" Stagnelius produced a work which is of value particularly to Catholics. Naturally there is nothing to be said of a Catholic Swedish literature of the modern era. The missionaries, however, have not been idle. Besides prayer-books, contemplative works, and catechisms, they have issued several apologetic works, as Gibbons in his "Våra fäders tro" (Faith of our Fathers); also Hammerstein, who has written "Edgar", and devotional treatises (*philothea*), and has been a successful translator of Latin and German hymns into Swedish.

Schück–Warburg, *Illustrerad svensk Literaturhistoria* (Stockholm, 1896–97); Schück, *Svensk Literaturhistoria* (Stockholm, 1890); Bernardini, *La littérature Scandinave* (1894); Niemann, *Das Nordlandbuch* (1909), an introduction to Scandinavian natural history and civilization; Andersson, *Catalogue de l'exposition Suédoise de l'enseignment supérieure* (1900), contains many authorities; *Ordbok öfver svenska språket*, issued by the Swedish Academy; Tamm, *Etymologist svensk ordbok* (Upsala, 1890—); Söderwall, *Ordbok öfver svenska medeltidsspråket*.

P. Wittmann.

Sweden, Vicariate Apostolic of. See Sweden.

Swedenborgians, the believers in the religious doctrines taught by Emanuel Swedenborg. As an organized body they do not call themselves Swedenborgians, which seems to assert the human origin of their religion, but wish to be known as the "Church of the New Jerusalem", or "New Church", claiming for it Divine authorship and promulgation through human instrumentality.

I. Life of Swedenborg.—Emanuel Swedenborg was b. at Stockholm, 29 Jan., 1688; d. in London, 29 March, 1772. His father was Dr. Jesper Swedberg, who later became the Lutheran Bishop of Skara. Swedenborg's life falls into two very distinct periods: the first extends to the year 1745 and reveals him as an adept in the mathematical and physical sciences; in the second he appears as a writer on theological subjects. Endowed with extraordinary talents, he completed his university course at Upsala in 1710 and travelled for four years in England, Holland, France, and Germany. Shortly after his return to Sweden, he was appointed by King Charles XII to an assessorship on the Board of Mines (1716). He gave signal proof of his engineering ability during the siege of Fredrickshall (1718) by inventing a means to transport boats and galleys overland for a distance of fourteen miles. His family was ennobled in 1719, a distinction indicated in the change of the name from Swedberg to Swedenborg. He declined (1724) the chair of mathematics at the University of Upsala and published at Leipzig in 1743 his important "Philosophical and Mineral Works" ("Opera philosophica et mineralia"). A year later appeared his treatise "On the Infinite and Final Cause of Creation" which includes a discussion of the relation between the soul and the body. Another scientific journey took him to Denmark, Germany, Holland, France, and Italy, and in 1740–41 appeared at Amsterdam one of his larger anatomical works ("Œconomia regni animalis"). The trend of his thoughts became distinctly religious in 1734 and exclusively so in 1745. He alleged that at the latter date Our Lord appeared to him in London, initiated him into the spiritual sense of the Scriptures, and commissioned him to expound it to his fellow men. With this vision there began, he declared, an intercourse with God, angels, and spirits which was to terminate only with his death. In 1747 he resigned his assessorship and, at his request, received as a pension the half of his salary. He now spent his time between London, Amsterdam, and Stockholm, and wrote in Latin his voluminous theological works. These soon attracted the attention of the Lutheran clergy of Sweden; a commission was instituted in 1771 to examine them, but took no action against their author. At his death Swedenborg received the Lord's Supper from a Protestant clergyman, to whom he affirmed his final attachment to his religious principles. He was never married, was simple in his habits, worked and slept without much regard to day or night, and lay at times in a trance for several consecutive days. In 1908 his remains were transferred from London to Sweden and deposited in the cathedral at Upsala.

II. Doctrinal Principles.—Swedenborg and his followers hold that as the Christian religion succeeded the Jewish so the Swedenborgian teaching supplemented the Christian. This new dispensation promulgated by Swedenborg is, according to them, based on a Divinely revealed interpretation of the Sacred Scriptures. Some of the characteristic features of this new religious system are presented in the following outline. God is Love Itself and Wisdom Itself. His Power is from and according to these as they flow forth into creative act. The Trinity does not consist of three distinct Divine persons as Catholics maintain; but is understood in the sense that in the Incarnation the Father or Jehovah is essentially the Divine Being, while the Son is the human (or sub-spiritual) element assumed by the Godhead in order to become present among men. The Holy Spirit is the Divine Presence and Power consequent upon this assumption and resultant transfiguration (glorification in Swedenborgian language) of the human element which thus became "a Divine Human" with all power in heaven and on earth. Jesus Christ is, therefore, not the Incarnation of a second Divine person, but of the Divine as a whole; he includes the Father (Godhead), the Son (assumed humanity), and the Holy Spirit (Divine-human power). Life does not exist except in Him or from Him, and cannot be created. Its presence in created forms is accounted for by continuous Divine influx.

On this earth man enjoys the highest participation of life, but he is greatly inferior, in this respect, to the races undoubtedly inhabiting other planets, e. g., Jupiter, Mercury. His three constituent elements are soul, body, and power. Originally granted full freedom in the use of his faculties, he erroneously concluded that he held them from no one but himself and fell away from God. The Lord, after the fall, did not abandon the sinner, but appeared to him in the form of an angel and gave him the law to reclaim him from his evil ways. These efforts were useless, and God clothed Himself with a human organism and redeemed man, opening anew his faculties to the influx of Divine life. Men are admitted into the New Church through baptism; they are strengthened in the spiritual life by the reception of the Eucharist. Justification cannot be obtained by faith alone; good works are likewise necessary. The seclusion of the cloister is not a help but a hindrance to spiritual growth; the healthiest condition for the latter is a life of action in the world. Miracles and visions produce no real spiritual change because they destroy the requisite liberty. The hope of reward is not to be recommended as an incentive to virtue, for good actions are vitiated when prompted by motives of self-interest. Death is the casting off by man of his material body which has no share in the resurrection. Immediately after death all human souls enter into the intermediate state known as the world of spirits, where they are instructed and prepared for their final abodes, heaven or hell. We need not expect the Last Judgment for it has already taken place; it was held in 1757 in Swedenborg's presence. No pure spirits exist; both angels and devils are former members of the human race, have organic forms, and experience sensation. The liturgy of the New Church is modelled on the Anglican service. The Church organization in Great Britain is congregational; in the United States most of the various religious societies are grouped in state associations under the charge of general pastors, while the "General Church" (see below) is avowedly episcopal in government.

III. History of the New Church; statistics; educational and publishing activities.—Swedenborg made no attempt at founding a separate Church; he presented his doctrinal works to university and seminary libraries in the hope that they might be of service; how far ahead he thought is uncertain, as he seemed to hold that his followers might be members of any Christian denomination. But his views were, in many respects, so entirely new that their adoption made the foundation of a distinct religious body inevitable. Few accepted his opinions completely during his lifetime. They found zealous advocates, however, in two Anglican clergymen, Thomas Hartley, rector of Winwick in Northamptonshire, and John Clowes, rector of St. John's at Manchester. These divines rendered his works into English and through the efforts of Clowes, who never separated from the Church of England, Lancashire became at an early date the Swedenborgian stronghold which it still remains to-day. The formal organization of the New Church took place in 1787, and James Hindmarsh, a former Methodist preacher, was chosen by lot to officiate at the inaugural meeting. The first public service was held in 1788 in a chapel at Great Eastcheap, London. Swedenborgian societies were soon formed in various English cities, and in 1789 the first general conference of the New Church met in the place of worship just mentioned. The number of adherents did not increase rapidly. The conference has held annual meetings ever since 1815. Its minutes for 1909 contain the following statistics for England: 45 ministers, 70 societies, 6665 registered members, and 7907 Sunday scholars.

In America the Swedenborgian doctrines were first introduced in 1784 at public lectures delivered in Philadelphia and Boston. The first congregation was organized at Baltimore in 1792. Since then the principles of the New Church have spread to many states of the Union. The first general convention was held in Philadelphia in 1817. It meets annually at present and is mainly composed of delegates sent by the various state organizations. In 1890 the General Church of Pennsylvania severed its connexion with the convention and assumed in 1897 the name of the General Church of the New Jerusalem. It numbered, in 1911, 24 ministers, 16 churches, and 890 communicants; whereas the main body had 107 ministers, 130 churches, and 8500 communicants (Statistics of Dr. H. K. Carroll, in "The Christian Advocate", N. Y., 25 Jan., 1912). Congregations of the New Church are to be found in all civilized countries; but their membership is small. In Germany the Protestant prelate Öttinger translated (1765–86) numerous writings of Swedenborg, but the most important name identified with the history of the denomination in that country is that of Immanuel Tafel (1796–1863), professor and librarian of Tübingen, who devoted his life to the spread of Swedenborgianism. His efforts were mainly literary; but he also organized a congregation in Southern Germany. The religion was proscribed in Sweden until 1866, when greater religious freedom was granted; the churches are still very few, and the membership insignificant. New Churchmen claim, however, that there as well as in all other countries the influence of Swedenborg cannot be gauged by the enrolled membership, because many communicants of other denominations hold Swedenborgian views.

The denomination maintains for the training of its ministry the New Church College at Islington, London, and the New Church Theological School at Cambridge, Mass. A preparatory school is located at Waltham, Mass., and an institution for collegiate and university studies at Urbana, Ohio. The General Church conducts a seminary at Bryn Athyn, Pa., and maintains several parochial schools. The denomination has displayed a remarkable publishing activity. The Swedenborg Society was founded in London in 1810 for the printing of Swedenborgian literature and in celebration of its centenary the International Swedenborg Congress met in the English metropolis in 1910. Other publishing agencies are the New Church Union of Boston, the American Swedenborg Printing and Publishing Society of New York, and a publishing house at Stuttgart, Germany. A monumental edition of Swedenborg's scientific works is in course of publication under the auspices of the Swedish Royal Academy of Sciences. His theological works are available in complete Latin and English editions and have been partly published in numerous modern languages, including Hindu, Arabic, and Japanese. The New Church publishes two quarterly reviews, some monthly magazines, and several weekly papers.

I. Tafel, *Documents concerning the Life and Character of Swedenborg* (London, 1875–77). Numerous *Biographies of Swedenborg* have been written: in English by Doughty (London, 1857); Fletcher (ibid., 1859); Hyde (ibid., 1863); White (ibid., 1867); Worcester (Boston, 1883); Wilkinson (London, 1886); Odhner (Philadelphia, 1893); Trobridge (London, s. d.); in French by Ballet (Paris, 1899); Byse (Paris, 1901); in German by Ranz (Schwäbisch Hall, 1851).

II. These biographies usually contain an exposition of Swedenborg's doctrine; a more complete presentation will be found in his own works, particularly in: *The True Christian Religion; Arcana Cœlestia; The Apocalypse Revealed; The Apocalypse Explained; Divine Love and Wisdom, Divine Providence; Heaven and Hell.* Parsons, *Outlines of the Religion and Philosophy of Swedenborg* (Boston, 1894); *Transactions of the International Swedenborg Congress* (London, 1910).

III. Hindmarsh, *Rise and Progress of the New Church* (London, 1861); Dole, *The New Church, What, How, Why?* (New York, 1906).

For further bibliographical details consult Hyde, *Bibliographical Index to the Published Writings of Emanuel Swedenborg* (London, 1897). Sweetheart Abbey. See New Abbey.

Swetchine, Sophie-Jeanne Soymonof, writer, b. at Moscow, 22 Nov., 1782; d. in Paris, 10 Sept., 1857. She was a member of a noble family, and became associated with French literature through her correspondence and other writings. Impressed by her precocious intelligence, her father gave her a very careful education in everything except religion, which he ignored. At fourteen she was appointed maid of honour to the empress. At seventeen she was married to General Swetchine who was forty-two. By birth she belonged to the Greek, or Orthodox Church, but from the time that her trials, her reading, and her own reflections had made her a Christian, she felt the necessity of following to the end the path which was leading her to the truth, and she became a Catholic, despite the anguish of her heart. "My Faith," she said afterwards, "is to me what Benjamin was to Rachel, the child of my sorrow." At the time of her conversion she was thirty-three years old. She had already left the court, her husband having been disgraced, with his father, as the result of a plot of which he was the victim. Thenceforth she had to leave even her country, since as an avowed Catholic she could not remain at St. Petersburg. With her husband she went to reside at Paris at the beginning of the Restoration. She had been preceded by a letter from Joseph de Maistre, who wrote to Bonald: "In a short time you will see at Paris a Russian lady whom I especially commend to you. Never will you see such moral strength, wit, and learning joined to such goodness." In her *salon* in the Rue Saint Dominique, open from three to six, and from to nine to midnight, she saw all the most distinguished men of the period: Chateaubriand, Bonals, Cuvier, Cousin, Donoso Cortoes, and among her intimates were Augustin Cochin, Tocqueville, Falloux, who wrote her biography, Lacordaire, and Montalembert, who were like her spiritual sons. Her influence was incontestable. She died as a devout Christian in 1857 at the age of seventy-five.

She was remarkable more for the beauty of her soul than that of her countenance. Her intellect was lofty, quick, and penetrating. She read a great deal, and always with her pen in hand. She was pious to the verge of mysticism, and although constantly ill—for she was one of those who never pass a day without suffering—she was resigned to the will of Providence. While kind to all she was an incomparable friend. True modesty prevented her from publishing anything, but at her death she left enough to fill many volumes. De Falloux collected extracts from her manuscripts which were published: "Mme. Swetchine, sa vie, ses œuvres" (2 vols., 1860). There have since appeared: "Lettres de Mme. Swetchine" (1861); "Journal de sa conversion" (1863); "Correspondance du Père Lacordaire et de Mme. Swetchine" (1864); and "Nouvelles lettres de Mme. Swetchine" (1875). Although a Russian Mme. Swetchine wrote well in French; her style is delicate and original, even studied.

GEORGES BERTIN.

Sweynheim (SCHWEINHEIM), KONRAD, printer, b. at Schwanheim, Frankfort, Germany; d. in Rome, 1477. Sweynheim and Arnold Pannartz of Prague, both of whom were ecclesiastics, were the first printers in Italy. At the invitation of Cardinal John Turrecremata they established a printing-press for books in 1464 at the Abbey of Subiaco; in 1467 they removed their press to the Massimi Palace at Rome, and carried on the business jointly until 1472. The first books they printed were: "Donatus" (1464); Cicero's "De oratore" and the "Divinarum institutionum libri septem" of Lactantius (1465). During the years 1464-72 they issued over 12,000 copies of thirty-seven works, these works being chiefly the classics and the Fathers. This shows the remarkable skill of the two printers, who were entirely dependent on themselves. Being an engraver Sweynheim was probably the die-cutter, the type-founder, and the type-setter of the undertaking, while Pannartz had charge of the actual printing and of matters connected with it. The dies cut by Sweynheim deserve especial attention as they embody the preliminary steps of the present type for Latin characters. Sweynheim's typographical capitals are the first to show the forms used in the Roman inscriptions on stone, while some of his small letters repeat the characters used in manuscripts of the ninth to tenth centuries. He also cast the first Greek type; it is to be found in his third book, that of Lactantius, and the type copies the forms of Greek characters found in manuscripts of the seventh to the eighth centuries. Notwithstanding the greatest industry and technical skill the two printers had no pecuniary success. In 1472 their patron and fellow-worker as editor and proofreader, Bishop John Andreas Bussi of Aleria, secretary of the Vatican Library, asked Sixtus IV to aid them. The papal assistance was given in the form of an expectancy. Sweynheim received a canonry in the collegiate Church of St. Victor at Mainz to whose secular brotherhood the inventor Gutenberg also belonged. In 1472 Sweynheim and Pannartz dissolved partnership. Sweynheim worked until his death as engraver on the maps of the "Cosmography" of Ptolemy. He was the first to apply copper engraving to the production of maps; twenty-seven of the beautifully executed plates of the edition of the "Cosmography" of 1478 are his work. Especially characteristic of Sweynheim as a maker of matrices is the fact that the beautiful even writing of the names of places are stamped in the engraved plate by means of individual dies. It is certain that Sweynheim was in close connexion with Mainz until his death, although he did not return there to enjoy his benefice. There is no doubt that he learned the art of printing at Mainz.

HARTWIG, *Festschrift zum 500 jähr. Geburtstage von J. Gutenberg* (Mainz, 1900).

HEINRICH W. WALLAU

Swinomish Indians.—A tribe of Salishan linguistic stock, closely connected with the Skagit. They formerly held the territory about the mouth of the river Skagit together with the adjacent portion of Whidbey Island, and are now gathered upon a reservation in the same territory, near Mount Vernon, Skagit County, north-western Washington. They were missionized about 1850, by Father Casimir Chirouse and the Oblates; Skagit the entire tribe, to the number of 267 in 1910, is now civilized and Catholic. They are one of the tribes included under the jurisdiction of Tulalip agency. For history and general description see TULALIP INDIANS.

JAMES MOONEY.

Swithin (SWITHUN), SAINT, Bishop of Winchester; d. 2 July, 862. Very little is known of this saint's life, for his biographers constructed their "Lives" long after his death and there is hardly any mention of him in contemporary documents. Swithin was one of the two trusted counsellors of Egbert, King of the West Saxons (d. 839), helping him in ecclesiastical matters, while Ealstan of Sherborne was his chief advisor in secular business. He probably entrusted Swithin with the education of his son Ethelwulf and caused the saint to be elected to the Bishopric of Winchester in succession to Helmstan. His consecration by Ceolnoth, Archbishop of Canterbury, seems to have taken place on 30 Oct., 852. On his death-bed Swithin begged that he should be buried outside the north wall of his cathedral where passers-by should pass over his grave and raindrops from the eaves drop upon it. More than a century later (931) his body was translated with great pomp to a shrine within the new church erected by Bishop Ethelwulf (d. 984). A number of miraculous cures took place and Swithin was canonized by popular acclamation. In 1093 his remains were again translated to the new church built by Bishop Walkelin. The shrine was destroyed and the relics scattered in 1538. It has often been said that the saint was a Benedictine monk and even Prior of Winchester but there is no evidence for this statement. From the first translation of his relics in

984 till the destruction of the shrine St. Swithin was the patron of Winchester Cathedral. He is best known from the popular superstition attached to his name and expressed in the following rhyme:

> St. Swithin's day if thou dost rain
> For forty days it will remain;
> St. Swithin's day if thou be fair
> For forty days 'twill rain nae mair.

There have been many attempts to explain the origin of this belief, but none have proved generally satisfactory. A similar belief attaches in France to 8 June, the feast of Sts. Gervasius and Protasius, and to other feasts in different countries (see "Notes and Queries", 1885, XII, 137, 253). St. Swithin's feast is kept on 15 July, the date of his first translation, and is retained in the Anglican Calendar.

The materials for the saint's life will be found in *Acta SS.*, July, I, 321 sqq. See also Potthast, *Wegweiser*, 1588; Hunt in *Dict. Nat. Biog.*, s. v. *Swithun;* Hardy, *Descriptive Catalogue*, I (1862), ii, 513 sqq.

Raymund Webster.

Switzerland, a confederation in the central part of Western Europe, made up of twenty-two cantons, three of which are divided into half-cantons. The country lies between 45° 49′ 2″ and 47° 48′ 32″ north latitude, and 5° 57′ 26″ and 10° 29′ 40″ longitude east of Greenwich. Its area is 15,976 square miles. The name comes from the designation of one of the original cantons, Schwyz (Schwiz), which was extended in the course of time to the entire confederation.

Physical Geography and Ethnography.—As regards its physical geography Switzerland is divided into three divisions: the Alps, the central region, and the Jura. The Swiss Alps form a part of the great curve of the Alpine chain of central Europe; they extend from Mont-Dolent in the chain of Mont Blanc in the west to Piz Mondin, in the Lower Engadine in the east, and have a length measured in a straight line of 170 miles. The smaller part of the Jura range, including, however, its highest peaks, is on Swiss soil. Between the Alps and the Jura extends the central region, which is traversed by countless valleys and includes about 30 per cent of the entire area of Switzerland. The highest peak of the Swiss Alps is Monte Rosa, 15,217 ft. The rivers which have their sources in Switzerland belong to one or another of the following four river-basins: the basin of the Rhine, the waters of which flow into the North Sea; the basin of the Rhone, which carries its waters to the western Mediterranean; the basin of the Po, which empties into the eastern Mediterranean, and the basin of the Inn, which empties into the Danube and with this into the Black Sea. The three river-basins first mentioned have a common watershed, the range of the Gothard. Switzerland also contains a large number of lakes, the largest of which are on the edges of the Alps and Jura, such as Geneva or Leman, Constance, Neuchâtel, Lucerne, Lugano, Maggiore, and Zurich. The lofty mountain chain of the Swiss Alps above a definite height is permanently covered with snow which feeds the glaciers. Switzerland contains altogether not less than 1077 glaciers, which cover an area of 709 sq. miles. Taken altogether 25.2 per cent of the area of Switzerland is completely unproductive.

The climate of Switzerland is not uniform. The differences in temperature of the various parts are conditioned by the differences in altitude, which vary from 581 feet to 15,217 feet above sea-level, and by the Alps, the southern slopes of which have a Mediterranean climate, while their northern slopes show that of central Europe. These striking differences determine the character of the flora and fauna. With the exception of the vegetation which flourishes on a seashore all European types of flora are to be found. The species of animals characteristic of the Alps are: the chamois, the ibex, the marmot, the golden eagle and several other species of birds. Of the productive area 3390 sq. miles are covered with forests, 8427 sq. miles are farm and pasture lands, and 108 sq. miles are planted with vineyards.

In 1850 the total population of Switzerland was 2,392,740 persons; the census of 1910 showed 3,753,293 inhabitants; on 1 December, 1910, the resident population (those actually present in the different localities) was altogether 3,765,002 persons. The original inhabitants of Switzerland were predominantly of Celtic race, although south of the Alps the Italian Lepontii lived in Ticino, and the Grisons was apparently inhabited by Etruscan Rhæti. A mixed population appeared in most parts of the territory owing to the Roman supremacy, the arrival of the Burgundians in the south-western district and of the Alamanni in other parts of the country. Four different languages appeared: German in the districts inhabited by the Alamanni, French in the western regions, where the scanty Burgundian population intermarried with the romanized Helvetii, Italian in Ticino, and Rhæto-Romanic in the Grisons. According to the last census the inhabitants were classified, by native tongues, as follows: Of 3,765,002 inhabitants, 2,599,154 spoke German; 796,244 French; 301,325 Italian; 39,834 Romanic; 28,445 spoke other languages.

Political History.—In the prehistoric era the territory of the present Switzerland was partly inhabited far up into the valleys of the Alps, as is evident from remains found in various caves and graves. Switzerland entered its historical era with the overthrow of the western Helvetii by Cæsar in the year 58 b. c. The entire country came under the control of the Roman Empire after the eastern districts were conquered by Drusus and Tiberius in 15 b. c. On the organization of the Roman provinces before Diocletian the north-western part of the territory of Switzerland belonged to the Province of Germania Superior, the south-western section (Geneva) to the Provincia Narbonensis, the eastern and the greater part of the south-eastern region to the Province of Rhætia. The region of the south-western Alps was divided into special administrative districts, of which the district of the "Alpes Pœninæ" included the present canton of Valais and the adjoining portions of Savoy. In the reorganization of the empire by Diocletian the Province of Rhætia and the district of the "Alpes Pœninæ" were left as they were, the north-western part of the country was included in the Province of Maxima Sequanorum, the south-western section in the Provincia Viennensis, the southern point of Ticino to Liguria, a province of Northern Italy.

During the migrations the territory of Switzerland was occupied by two German tribes. The Burgundians, who had settled in 443 south of Lake Geneva, pushed northwards and occupied the south-western and western regions of Switzerland. They mingled with the Romanic population and quickly adopted the Romanic tongue and customs, so that the language of this section remained Romanic (French). In the fifth century the Alamanni pushed forward as far as the Alps and completely destroyed Roman civilization, so that the language of this section became German. At the beginning of the sixth century all Switzerland north of the Alps fell under the supremacy of the Frankish Kingdom. At a later date, when the Lombard Kingdom was conquered by the Franks, the districts of Switzerland south of the Alps also came under the Frankish mastery. Thus Switzerland belonged to Charlemagne's great empire and shared its fortunes. In the partition of the Frankish Empire by the Treaty of Verdun in 843 the central and eastern parts of Switzerland fell to the Kingdom of Alamannia, the western to the Kingdom of Lorraine, and later to France. The power of the counts grew constantly, and in 888 Count Rudolph of the Guelphic family founded the Kingdom of Burgundy, of which western Switzerland formed a part. The German regions of Switzerland fell to the Duchy of Swabia in 917. In the ninth and tenth centuries several dynasties rose to power and importance, as: the Houses of Zähringen (extinct 1218), of Lenzburg, of Kyburg, and of Savoy. The inheritance of the Lenzburg family fell to the counts of Habsburg. In the twelfth and thirteenth centuries there were some twenty great feudal ruling families in the present Switzerland. The counts of Zähringen sought to secure their supremacy against the attacks of the rural nobility by founding cities, as Fribourg in 1178 and Berne in 1191. The dioceses and abbeys also gradually acquired secular power and rich possessions. When Duke Burkhard of Swabia died childless in 973 the duchy reverted to the German Empire. In 1033, after the death of King Rudolph III of Burgundy, his kingdom also fell to Germany, as Rudolph left it to the empire by will. Consequently the whole of present Switzerland, with the exception of Ticino, which was a part of Lombardy, belonged to the German Empire.

The inhabitants of the Alpine valleys of central Switzerland sought to protect their ancient rights against the growing power of the counts of Habsburg. In 1231 the people of Uri received from the German emperor, Henry, a charter which released them from the control of the counts of Habsburg; this is the first document by which the freedom of the early League of Switzerland was established. Schwyz received a similar charter in 1240 from Emperor Frederick II. In this way the territories of Uri and Schwyz were immediately dependent on the empire. Like the people of these two territories, the inhabitants of Unterwalden had also founded a provincial confederation. During the era of the struggle over the empire Rudolph of Habsburg strengthened his power in Switzerland; when in 1273 he became Emperor of Germany, his conquests transferred the centre of the power of the Habsburgs to Austria. Nevertheless, the emperor vigorously maintained his supremacy over his possessions in Switzerland. Directly after Rudolph's death (1291) the inhabitants of the districts combined in the original Swiss League sought to make use of the opportunity to secure their rights and privileges. On 1 August, 1291, the representatives of the provincial associations formed by Uri, Schwyz, and Unterwalden met and renewed the League that had been formed earlier. The purpose of the League was by united action to protect its members as far as possible against all attacks. The establishment of the League has been poetically embellished by the well-known story of the struggle of William Tell and his companions against the governor, Gessler, who oppressed the people.

Adolph of Nassau, who was elected King of Germany after the death of Rudolph of Habsburg, confirmed the charters of Uri and Schwyz, as did King Henry VII of Luxemburg on 3 June, 1309; at the same time Henry extended the rights and privileges contained in them to Unterwalden. After the death of Henry VII (1313) an old dispute as to the rights over the march between Schwyz and the Abbey of Einsiedeln broke out again and the confederated Swiss attacked the abbey, for which they were excommunicated by the Bishop of Constance and put under the ban of the empire at the same time. Louis of Bavaria withdrew the ban in 1315 and obliged the Archbishop of Mainz to recall the excommunication of the inhabitants of the forest districts (Uri, Schwyz, Unterwalden, and Lucerne). In the struggle for the imperial throne between Louis of Bavaria and Frederick of Austria the Swiss League, made up of these districts, held to Louis. Frederick's brother, Duke Leopold of Austria, attempted to overthrow the League and to punish its members for the attack on Einsiedeln, but his army was defeated by the Swiss at Morgarten on 15 November, 1315. On 9 December, 1315, Schwyz, Uri, and Unterwalden renewed the League and confirmed the same by additional regulations. In the truce concluded with the Duke of Austria the independence of the League was in some degree recognized. The further development of political conditions and the struggle with the Habsburgs connected with it led to the union with the forest districts of the city of Lucerne in 1332, the city of Zurich in 1351, and the district of Glarus and the city of Zug in 1352, all these new members joining the League. In 1353 the city of Berne also joined the League, so that now the old Confederation of eight cities and districts came into existence. The war with the League was renewed by Duke Leopold III of Austria, but in the battle near Sempach in 1386 his army was defeated and he himself was killed. This victory greatly strengthened the independence of the eight members of the Swiss League. The Austrians were again defeated in 1388 at Näfels, during the war with Glarus, which had declared its independence. In this way the freedom and independence of the eight communities were secured and a new compact made on 10 July, 1393.

The success of the Confederates encouraged the inhabitants of neighbouring territories in their struggles for political freedom. The city of St-Gall, which had been a free city of the empire from 1281, sought to make itself as independent as possible of the mastery of the prince-bishop. The inhabitants of Appenzell, who were subjects of the Abbot of St-Gall, also did the same; they gained their freedom and overthrew the lordship of the abbot by success in battle. In 1411 seven of the confederated communities (Berne not taking part) formed an agreement with Appenzell, by which it was taken under the protection of the League; in 1412 a similar agreement was made for ten years with the city of St-Gall, and in 1455 these treaties were changed into the "Everlasting Compact". The inhabitants of Upper Valais, who were subjects of the Bishop of Sion (Sitten), also gained for themselves a certain amount of political freedom, which they successfully defended in battle; they then formed a compact with the districts of Uri, Unterwalden, and Lucerne (1403 and 1416). The districts of Uri and Obwalden won territories south of the Alps in the Val Leventina (1403); some years later (1411) the League occupied jointly the Val d'Ossola and in 1419 bought the Countship of Bellinzona. However, in 1422, the League was defeated by the Duke of Milan and in 1426 it gave up its rights to the Val Leventina and the Val d'Ossola. During the Council of Constance Duke Frederick of Austria was declared under the ban of the empire by Emperor Sigismund. The Swiss League, by the order of the emperor, seized the Swiss lands of the duke; Berne took the cities of Aargau; Lucerne and Zurich took other cities and territories; the League conquered jointly other cities belonging to the Habsburgs. Thus the members of the League obtained subject lands, sometimes subject to the authority of an individual member of the League, sometimes ruled jointly by several members; this changed the former basis of the League, Count Frederick of Toggenburg, who had great possessions, had made various treaties with different members of the League. When he died without heirs in 1436, a dispute arose as to his domains, and Zurich became involved in a war with Schwyz. Zurich formed an alliance with the Emperor Frederick III against the other members of the League, and in the war which followed (1443) Zurich was defeated, while a general of the emperor defeated the League at Basle. In 1450 Zurich made peace by abandoning its alliance with the emperor. Various districts that had been subject to the counts of Toggenburg fell to Schwyz, Glarus, and Appenzell. In 1460 the districts of Thurgau and Sargans were occupied by the League as common property.

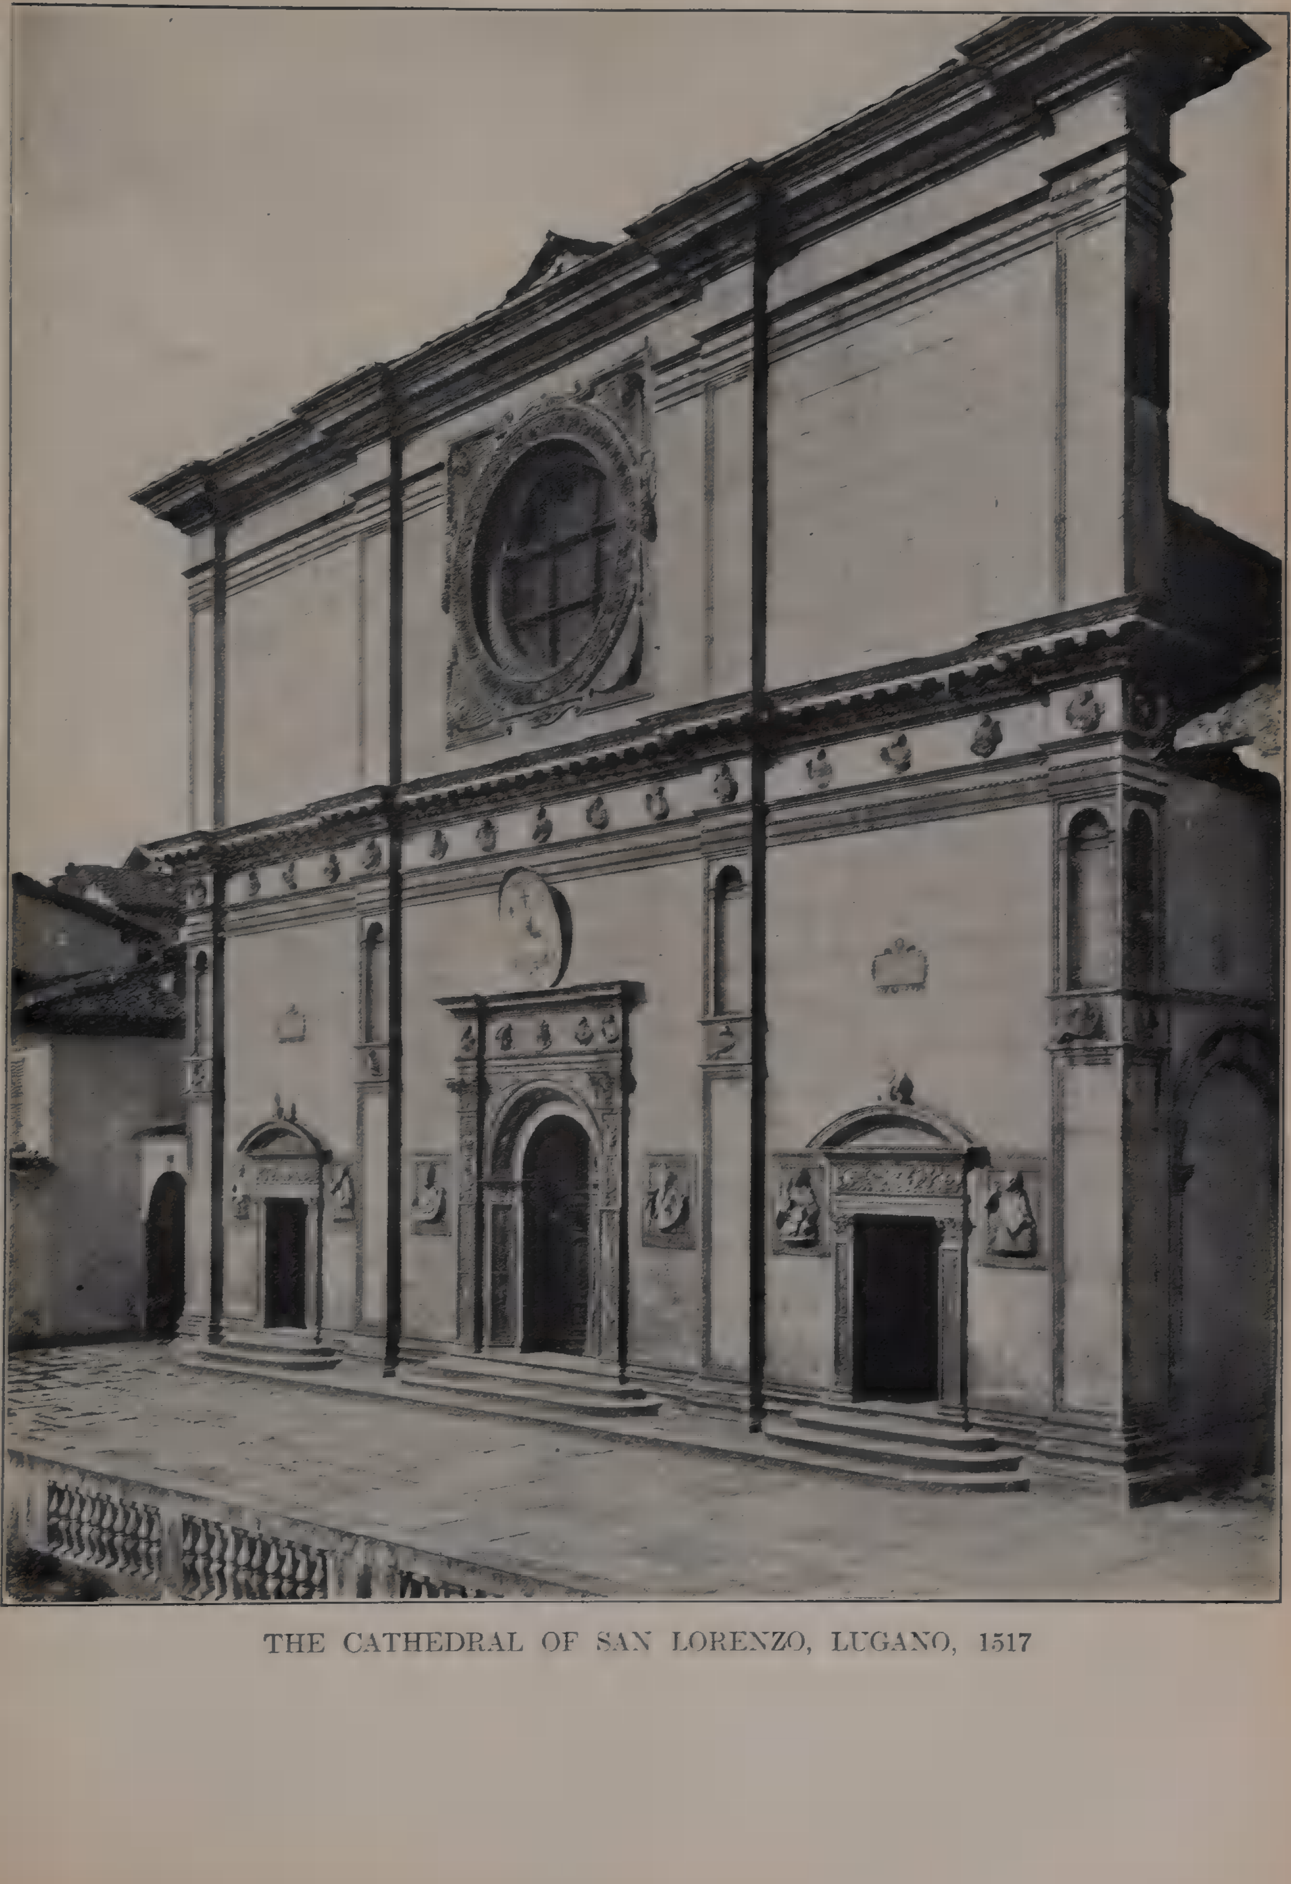
A new opponent of the Swiss Confederates now appeared in Duke Charles the Bold, of Burgundy. The Confederates formed an alliance with France and declared war against this powerful prince, who was allied, on his side, with the Duke of Savoy. The Swiss severely defeated Charles in the battles of Grandson and Murten in 1476. The city of Fribourg had taken part with the confederated Swiss and the two cities of Berne and Fribourg now took possession of several cities of Vaud, while the inhabitants of Upper Valais conquered Lower Valais, that belonged to Savoy. In 1841 the cities of Fribourg and Solothurn (Soleure) were taken as members into the League of the Confederates. The Burgundian War had brought the confederated districts into alliance with France, and consequently their connexion with the German Empire grew weaker and weaker. When in 1495 Emperor Maximilian sought to reorganize the empire, the Confederates were unwilling to recognize the changes. In the struggle, called the Swabian War between the Swiss Confederates and the imperial troops the Swiss were victorious. The Treaty of Basle of 1499 granted the Confederates almost complete independence from the German Empire by releasing them from the jurisdiction of the imperial chamber. Later, in the Peace of Westphalia of 1648, the political separation of Switzerland from Germany was expressly declared. On account of the Swabian War, the cities of Basle and Schaffhausen joined the Confederation in 1501, and in 1513 Appenzell also was accepted as a district belonging to it, so that the Confederation now included thirteen districts. In addition the Countship of Neuchâtel became an associate member, and the Confederation was joined as associate members by the three leagues of the Rhætian Alps: the "Grauer Bund", the "Zehngerichtenbund" (League of the Ten Jurisdictions), and the "Gotteshausbund".

Upper Valais and other spiritual and secular lordships also became associate members. There was no central organized authority over all. The individual members formed special alliances among themselves; their common affairs were discussed at the assembly of the members, which was a congress of sovereign states. In addition to the representatives of the thirteen members of the Confederation most of the associate districts of the Confederation had also the right to send representatives. Other territories were subject lands of one or several members of the Confederation, or belonged in common to the entire Confederation of the thirteen districts. Geneva had formed an alliance with Fribourg and Berne for the protection of its liberties against the bishops and dukes of Savoy; this made it an associate member. From this time on the Swiss Confederates took an important part in the general politics of Europe, especially in the wars in Italy. The Confederates acquired new possessions south of the Alps in Ticino. However, at the battle of Marignano in 1515, the Swiss troops were severely defeated, which put an end to Swiss intervention in European politics.

The inner organization of the different districts of the Confederation varied greatly. Some had a democratic organization; in others the rule of the patrician town council was aristocratic. In the course of the eighteenth century many disputes arose in the cities on account of the despotic patrician government. After the outbreak of the French Revolution this state of affairs led to the interference of France, and in 1798 the territories of the Confederation were occupied by French troops. After the dissolution of the oligarchic governments, the "indivisible Helvetic Republic" with a new Constitution was proclaimed. All the confederated districts and the former subject lands were incorporated in the Republic. The opposition of the original Swiss League was crushed by the French army, the Helvetic Republic was entirely dependent on France. New quarrels constantly arose in Switzerland over the Constitution. Napoleon, therefore, on 19 February, 1803, issued the Act of Mediation, by which Switzerland was changed into a Confederation of nineteen cantons under the protection of France. The Diocese of Basle, the city of Geneva, Ticino, and Valais were annexed by France; the Principality of Neuchâtel was given to Marshal Berthier. In 1815 the Congress of Vienna gave back to Switzerland the districts of Geneva, Valais, and Ticino. Berne was obliged to grant freedom to its former subject lands of Aargau and Vaud, and received as compensation the greater part of the territories of the Bishop of Basle in the Jura; Neuchâtel was at the same time a Prussian principality and a Swiss canton. The second Treaty of Paris gave further districts of France and Savoy to Geneva. Thus Switzerland received its present extent of territory, and formed a confederation of twenty-two cantons, united in complete equality.

The inner political development of several cantons led to disputes concerning the Constitution, especially after the outbreak of the French Revolution of July, 1830. Half the cantons received democratic constitutions; this caused a civil war in Basle that divided the canton into two half-cantons (city of Basle and rural Basle). At the same time a movement for the revision of the Treaty of Confederation of 1815 was started by seven democratic cantons which had formed an agreement among themselves. The Catholic cantons opposed a revision because they feared that it would not only result in a reduction of cantonal sovereignty, but also lead to interference with their religious freedom. The Articles of Baden, agreed to in 1834 by several cantons, introduced Josephinism into the relations between Church and State and greatly impaired ecclesiastical rights. In December, 1845, the seven Catholic cantons, namely, Uri, Schwyz, Unterwalden, Lucerne, Zug, Fribourg, and Valais, united in a league, called the "Sonderbund" (separate league), for the protection of their sovereignty and of their territories. The majority of the cantons decided at the Diets of August, 1846, and of July, 1847, that this league should be dissolved, because it was not compatible with the Treaty of Confederation of 1815. At the same time the same majority voted for a revision of the Constitution, and also voted against the continued presence of the Jesuits in Switzerland. The seven Catholic cantons made ready for war. At the Diet held in October, 1847, their representatives moved that their sovereignty and their ecclesiastical rights be recognized, and that the question as to the Jesuits be removed from the subjects for discussion. The motion was rejected, and the protesting deputies of the seven cantons left the Diet. The civil war, called the War of the Sonderbund, now broke out. The Catholic cantons were defeated, and the war ended without much bloodshed. Radical governments were now forced upon the conquered cantons, but these administrators were later set aside by the popular majorities of the Catholic Conservative party. The expenses of the war to the amount of five million francs were imposed upon the defeated cantons, the result of which was their economic impairment. The Jesuits were driven out and about fifty monasteries and religious foundations were suppressed. It was a victory of Radical Liberalism over the Conservative party. In 1848 Neuchâtel freed itself from Prussia and adopted a new republican Constitution.

On 12 September, 1848, the new Constitution of the Confederation was proclaimed and put in force. It transformed Switzerland into a Confederation similar to the United States. The individual cantons retained, indeed, their sovereignty and their separate Constitutions, but the exercise of sovereignty was



THE CATHEDRAL OF SAN LORENZO, LUGANO, 1517

limited by the federation. There was an assembly to represent the individual states called the Council of States (*Ständerat*), and one to represent the entire Swiss nation called the National Council (*Nationalrat*), which formed together the legislative body of the Confederation. The executive authority was in the hands of a body called the Federal Council. The cantons, however, still retained the right of levying taxes, of police supervision, of the administration of justice, and religious affairs, and all legislation regarding schools. The universities of Switzerland also all remained cantonal institutions; they exist at the present time in Basle, Zurich, Berne, Geneva, Lausanne, Fribourg, and Neuchâtel. Foreign affairs, the army, customs, postal administration, and coinage were transferred to the federation. The Constitution was revised in 1874, and on 9 April of this year the new Constitution was accepted; with a few partial changes it is still in existence. It rests on the principles of a decided centralization as regards the army and the judiciary, and, unfortunately, contains also severe articles directed against the Catholic Church (prohibition of houses of Jesuits, of the founding of new monasteries, etc.). A federal supreme court was established for the entire Confederation. In many of the cantons a strong movement began for making the cantonal constitutions more democratic, and during the last decades new constitutions have been introduced in a large number of them. The creation of a common code of law for civil and criminal cases was transferred to the Confederation. The railways were made state property by the purchase of the larger railways from the companies owning them, the purchase being confirmed in 1898; in this way their administration belongs to the Confederation.

The Commonwealth.—Switzerland forms a confederation made up of the following twenty-two cantons, three being divided into half-cantons. The cantons have sovereign authority in all matters which are not under the jurisdiction of the Confederation. These competencies, however, frequently conflict, as in matters respecting the army, sanitary officers, and police supervision of foreigners. The decisions of the Federal Government are generally executed by the cantonal Governments. The main matters under the jurisdiction of the Confederation are: Intercourse with other countries and the exclusive right to make treaties with them and to direct the foreign policy; since 1898 the entire domain of civil and criminal law, for the purpose of unifying these two codes, although, with the exception of the Federal Court, the organization of the courts belongs to the cantons; the army, all legislation, and the supervision of legislative work; the right to carry out public works that benefit a considerable part of the country; further, the right of general supervision over water and forest inspection. The Confederation also established a federal polytechnic high school at Zurich, the supervision of which belongs exclusively to the federal authorities, while all other schools are cantonal and receive in part subventions from the Federal Government. The Federal Government owns and has the control of the customs, post-office, telegraph and telephone, coinage (since 1905 the monopoly of the issuing of bank-notes has been given to the federal national bank), the manufacture and sale of powder, wholesale selling of alcohol. Trade inspection is also largely regulated by federal law, and the Government has the right to introduce sickness and accident insurance; a law in reference to these was accepted by the nation in 1912. Since they were made state property the larger, standard-gauge railways have been carried on by the Federal Government. The Constitution of the Confederation guarantees freedom of faith and conscience, as well as freedom of worship. Notwithstanding this, the Constitution forbids the reception of Jesuits and affilliated orders and the founding of new monasteries, while the establishment of new dioceses in Switzerland is made dependent on the consent of the Confederation. All these special ordinances refer only to the Catholic Church.

The federal authorities are: (1) legislative; (2) executive; (3) judicial. (1) The legislative authority is the Federal Assembly, composed of two concurrent chambers: the National Council and the Council of States. The National Council is elected directly by the people for three years, there being a deputy for each 20,000 inhabitants, or for a fraction over 10,000 inhabitants of a canton. For this purpose Switzerland is divided into federal electoral districts. The election is direct and the ballot secret. All Swiss citizens over twenty years of age, who are not prevented by cantonal laws from exercising political rights, are entitled to vote. All citizens entitled to vote are also entitled to hold office. The Council of States consists of 44 deputies, of whom each canton appoints two, and each half-canton one. The members of the Council of States are elected, according to the law of each canton, either by the people of the canton, or by the cantonal council, which is the cantonal legislative body. The passage of a law requires the agreement of both the States and National Councils. These two councils unite in the Federal Assembly for certain matters, especially for the election of the executive authorities and of the members of the Federal Court, for voting upon petitions for pardon, for settling disputes as to jurisdiction between federal authorities. The nation has the right of the referendum; when 30,000 citizens entitled to vote, or eight cantons of Switzerland, make the demand, any federal law and any generally binding federal ordinance, if not of a pressing nature, must be laid before the nation, so that the latter by a majority vote can accept or reject it. In 28 cases during the years 1874–1906 in which the referendum vote was taken, the law or the federal decision was rejected in 19 cases. The people also have an initiative in matters respecting the Federal Constitution, inasmuch as 50,000 citizens entitled to vote may petition for a change in the Constitution upon a definite point. The Federal Assembly also can present a similar demand for a change in the Constitution.

(2) The executive authority is the Federal Council, which is composed of seven members, elected by the joint Federal Assembly for three years. Any citizen eligible to the National Council can be elected to the Federal Council. The president of the Federal Council is elected each year by the Federal Assembly, as is also the vice-president; the president cannot be re-elected for the ensuing year. The Federal Council is responsible for the exercise of its office to the Federal Assembly, yet the rejection by the chambers of a bill offered by a member of the Federal Council does not necessitate the dismissal of the respective member. The executive administration of the Confederation is divided into seven departments, each of which is under the direction of a member of the Federal Council; the Department of Foreign Affairs, which is always under the direction of the president of the Confederation; the Department of the Interior, which controls the numerous federal subventions, supervises game and fish inspectors, weights and measures, and directs the sanitary inspectors, and the execution of the laws respecting food; the Department of Justice and Police; the Military Department; the Department of Finance and Customs; the Department of Commerce, Industry, and Agriculture; the Post-Office and Railway Department. (3) The judicial authority is the Federal Court at Lausanne. Up to 1912 the court consisted of nineteen members; when the number was raised to twenty-four, to which should be added nine substitute members. The federal judges are elected for six years by the Federal Assembly. The court is divided into three sections;

one for appeals in the domain of public law and certain matters of civil law, the second for the other appeals in civil law, the third for complaints respecting the law of bankruptcy and the law of obligation. For criminal cases there is a criminal court of three judges and twelve assessors. The federal attorney-general is appointed by the Federal Council.

The Constitutions of the Swiss cantons are in all cases democratic. However, great differences are to be found in the various cantons in regard to the cantonal Constitution, taxation, communal Government, etc. In the larger cantons the legislative body is a council elected by the people, called the Cantonal Council, or the Great Council. The members of the cantonal Governments are elected either by this council or directly by the people. The smaller cantons have as the legislative body the cantonal assembly, composed of all the active citizens of the canton, which elects the cantonal authorities. The chief political parties of Switzerland, as represented in the Federal Assembly, especially in the chamber called the National Council, are: (1) The Radical or Progressive-Democratic party that avowedly strives after greater centralization; this principle is especially advocated by the Radicals of German-Switzerland. At times this part shows anti-Catholic tendencies, as was particularly evidenced in the War of the Sonderbund, and in the turmoil caused by the Old Catholic movement; during the last twenty years, however, this hostility has not been so marked. This party is the dominating one throughout the entire Confederation. (2) The Catholic-Conservative party. (3) The Liberal-Conservative, or Protestant party. Both the Catholic- and Liberal-Conservative parties are Federalists, but lay stress upon the rights of cantonal sovereignty. (4) The Social-Democratic party.

Ecclesiastical History.— There is no doubt that Christian missions were started in the territory of the present Switzerland as early as the third century, but it was not until after the Constantinian era that they made decided progress. The missionaries of Christianity entered the country by three main roads: by way of the valley of the Rhone to Geneva, from Italy over the Great St. Bernard to Valais and into western Switzerland to the Helvetii, and over the passes of the Alps by way of the Grisons into eastern Switzerland to the Rhætians. After the political repartition of the Roman Empire during the reign of Diocletian, the earliest Swiss dioceses appeared in the course of the fourth century: in Valais the Diocese of Octodurum (Martigny), the see of which was transferred in the sixth century to Sion (*Sitten*); in the south-west the Diocese of Geneva (*Genava*) was founded in the *Civitas Genavensium*, which belonged to the great territories of the Allobroges; western and central Switzerland received the Diocese of the Helvetii, that was established in the *Civitas Helvetiorum;* its bishop lived now at Aventicum (*Avenches*), now at Vindonissa (*Windisch*), until at a later date, between the years 585 and 650, the see was transferred to Lausanne, and the northern part of the region, that had been taken by the Alamanni, was assigned to the Diocese of Constance. In the north-west the Diocese of Basle, the origin of which is obscure, was established in the *Civitas Rauracorum.* A part of the present Swiss Jura belonged to the Diocese of Besançon; towards the east, in Rhætia, the Diocese of Chur (Coire) was established. The territories south of the Alps belonged in part to the Dioceses of Como and Milan. A famous shrine was the church built over the graves of the martyr St. Mauritius and his companions (St. Maurice in Valais); in 515 the Burgundian King Sigismund founded an abbey at this spot, the oldest monastery on Swiss soil.

The occupation of western Switzerland by the Burgundians, although they were Arians, led to no serious interruption of the life of the Church. At the beginning of the sixth century King Sigismund became a Catholic; this was quickly followed by the adoption of the Catholic Faith by the Burgundians. From 534 the entire territory of the Burgundians belonged to the Kingdom of the Franks, as they took part in the religious development of this kingdom. The Alamanni were still heathen and when they migrated into northern and north-eastern Switzerland they destroyed, along with the Roman civilization, almost the entire organization of the Church. After the Franks subjugated the Alamanni in 496 the Irish missionaries began to labour in their territories. In the sixth century the Diocese of Constance was founded for Alamannia; it included those parts of Switzerland occupied by this people. St. Columba and St. Gall from the Irish monastery of Bangor laboured on the shores of Lake Constance and on those of Lake Zurich. When about 612 Columba went to Italy, Gall remained behind and founded a monastery, from which developed the celebrated Abbey of St-Gall. The monastery of Reichenau was of great importance in the further spread of Christianity on Lake Constance. Other monasteries were founded in eastern Switzerland, among them Pfaefers and Dissentis, and in the tenth century Einsiedeln. In western Switzerland famous abbeys were established in the territory of the Burgundians, as St-Imier, St-Ursanne, and Romainmotier; these, however, did not appear until the Frankish era. As time went on the growth of religion and civilization brought rich possessions and large secular power to the bishops and abbeys.

The great movement for the reformation of the monasteries during the tenth century, in which Cluny led the way, reached western Switzerland and caused the founding of new and important abbeys, such as Payern in Vaux, St-Victor in Geneva, St-Alban in Basle, and others. Several more Benedictine abbeys were established in the twelfth century; among these were Muri in Schaffhausen, Fischingen at Thurgau; some Cistercian abbeys were also founded, as Hauterive in Fribourg, St-Urban in Lucerne, and Wettingen in Aargau, while the Premonstratensians and Carthusians established numerous monastic houses in various districts of Switzerland. The change in monastic life introduced in the thirteenth century by the Franciscans and Dominicans, who settled in the cities to exercise pastoral care, extended throughout Switzerland at an early date. Both Franciscan and Dominican monasteries sprang up in numerous cities, at Basle, Zurich, Berne, Schaffhausen, Solothurn, Chur, Fribourg, Lausanne, Geneva, and others. Among the knightly orders, the Knights of St. John of Jerusalem had the largest number of houses, some of which were endowed with large revenues. Other orders had a few monasteries. There were also large numbers of convents for women. Besides the monasteries there were houses of Augustinian canons in Switzerland, a few of which still exist in the Catholic cantons. Thus a rich religious life sprang up in the various districts of Switzerland around the numerous religious foundations of various kinds, the sees of the dioceses, the abbeys and other monasteries, and the religious institutions of the cities.

The Protestant schism of the sixteenth century began in German Switzerland with the position taken by Zwingli in Zurich at the same time that it appeared in Germany. At first the religious innovation met with but little success. On 8 April, 1524, the five districts of Uri, Schwyz, Unterwalden, Zug, and Lucerne decided to retain the old, true Christian Faith and to suppress the erroneous doctrine within their territories. At the Diet of the Confederation held at Lucerne on 20 April of the same year this decision was adopted by all the districts excepting Zurich and Schaffhausen. During this period Anabaptists made their appearance, especially in St-Gall and the Grisons, and Anabaptist communities were established in several districts including Schaffhausen and Appenzell. A peasant revolt broke out, partly in connexion with the Anabaptist movement; this outbreak, however, was mainly settled by negotiations after serfdom had been abolished. Notwithstanding the decisions of the Diet of 1524 and all efforts made by the Catholic districts of central Switzerland, Zwinglianism spread to other Swiss cities and territories. The heretical doctrine was introduced into the city of St-Gall by Joachim von Watt (Vadianus) and his followers; in 1528 all Catholics were excluded from the council, and only the abbey remained loyal to the Catholic Faith. Zwinglianism extended from St-Gall into Appenzell and spread among the communes of Appenzell-Ausserrhoden. Through the influence of Zurich, Protestantism was introduced into Toggenburg, which belonged to the Abbey of St-Gall, and into Thurgau, so that in 1525 the majority of the inhabitants of both these districts belonged to the new faith. Protestantism also found entrance into Glarus, Sargans, and the valley of the Rhine, as well as into the Grisons. In these districts, however, the adherents of the heretical doctrine could not attain absolute control. The cities of Basle and Schaffhausen also fell away from the Catholic Faith; much was done for the spread of Protestantism at Basle by Œcolampadius (q. v.). For a considerable time Berne wavered, but in 1528 the new doctrines urged by Francis Kolb, N. Manuel, Berchtold Haller, and Johann Haller conquered, and the heretical doctrine was introduced by force in all the territories of Berne.

The districts that had become Protestant united both with one another and with foreign Protestant cities. The five Catholic districts of Switzerland, mentioned above, had also united in defence of the old Faith in their territories, and had formed an alliance with Austria. Zwingli now sought to force them to submit to his erroneous teachings. This resulted in the two wars of Kappel (1528–31), which ended in the victory of the Catholic districts by the battle near Kappel in 1531, in which Zwingli was killed. In the second Peace of Kappel which was now signed (1531) the Catholic Faith was completely restored in the common dependencies of Baden, Freiamt, and Rapperswyl, and numerous parishes in Thurgau; the valley of the Rhine became Catholic again and the monasteries were re-established. The Protestant Faith was recognized by the Constitution; in the religiously mixed districts and in the German subject lands the individual parishes could decide to which faith to belong, but the free exercise of the religion of the minority was protected; the districts which were entirely Protestant or entirely Catholic retained their respective confessions, and the alliance of the Zwinglian districts was dissolved. In the meantime the heretical doctrine had been carried from Berne into French Switzerland. Among the lordships belonging to the Bishop of Basle in the Jura the new faith made its way into the Münsterthal, Biel, the city of Neuchâtel, and also in the district of Neuchâtel. In 1536 Berne conquered the district of Vaux and introduced Protestantism into it by force, as well as in the lands that Berne owned in common with Fribourg. Berne also supported the adherents of the new faith, which in 1535 had gained the supremacy in the possessions of its ally Geneva, where Calvin soon made his appearance and where he established a new centre of Protestantism.

In religious matters the Confederation was now divided as follows: the five districts of Uri, Schwyz, Unterwalden, Zug, and Lucerne with their dependencies (among them Ticino), also Fribourg, Solothurn, the allied Valais, the Abbot of St-Gall, and the common dependencies of Baden, Freiamt, and Rapperswyl remained Catholic; Zurich, Berne with Vaud, Basle, Schaffhausen, the city of St-Gall, and Geneva were Protestant; both confessions existed together in Appenzell, which in 1597 was divided into Catholic Innerrhoden and Protestant Ausserrhoden, Glarus, the Grisons (where only the "graue Bund" remained Catholic), and in the dependent districts of Aargau Thurgau, Werdenberg, the valley of the Rhine, and Toggenburg. True inner religious reform, based on the pure Catholic Faith, found zealous promoters in Switzerland in the era of the Council of Trent. St. Charles Borromeo (q. v.) laboured with great success, as did also Bishop Christopher Blarer of Basle. Of great value in this work was the summoning of the Jesuits, of whom the most important was Peter Canisius (q. v.); in the years succeeding 1574 they erected flourishing colleges in numerous cities, as Lucerne, Fribourg, Porrentruy, Siders, Brig, Sion, and Solothurn. The Capuchins also entered Switzerland at the same time, and erected their first monastery on Swiss soil at Altorf in 1579; this was gradually followed by the founding of nearly thirty more houses, so that their spiritual labours embraced the larger part of the Catholic districts of the Confederation. Another important factor in the revival of ecclesiastical and religious life was the establishment of a permanent papal nunciature to the Confederation with its seat at Lucerne (from 1579). The Collegium Helveticum at Milan and the Collegium Germanicarum at Rome, both of which had a number of free scholarships for Swiss theologians, did much for the thorough education and earnest religious training of the clergy. The revival of Catholic life was vigorously supported by zealous and orthodox priests, such as provost Schneuwly at Fribourg, and Catholic statesmen, such as L. Pfyffer, of Lucerne, and M. Lussy in the forest districts that had formed the original Swiss League. The internal reform of the Church based on the decrees of the Council of Trent made its way throughout Catholic Switzerland to the great benefit of the loyal Catholic population. The seven Catholic districts formed the Borromæan League in 1586 to prevent the further advance of Protestantism.

The subject lands of Bormia, Chiavenna, and Val Tellina, which had belonged to the Grisons since 1513, remained loyal to the Catholic Faith. They were hard pressed, and the attempts to spread the heretical doctrine in these regions also were supported in every possible manner by the Protestant majority in the Grisons. During the violent political disputes which raged in the Grisons during the seventeenth century a revolt broke out in Val Tellina. The knight James of Grossoto marched into the valley in 1620 and a large part of the Protestant population was killed (the Valtelline Massacre). This led to a war between the Protestant and Catholic districts and their foreign allies, the final end of which was that the Val Tellina and the other Italian subject lands were lost to the Confederates. After the Peace of Kappel of 1531 the Catholic districts had the majority in the Diet of the Confederation, a point of much importance in the garrisoning of the lands held in common that separated Berne and Zurich from each other. These two powerful Protestant members of the Diet sought an occasion to change this state of affairs. The suppression of a Protestant community in Arth, that belonged to Schwyz, gave rise to a dispute between the Catholic and Protestant districts which led to the two Villmergen wars (1656 and 1712). The Catholic districts conquered in the first war; disturbances in Toggenburg led to the second war, in which political questions were especially prominent. This latter war ended in the victory of the Protestant districts, and it was followed by a new partition of the common lordships in favour of the conquerors, as well as by the granting of complete parity to the Protestant inhabitants of the subject lands. This treaty divided the Confederation into two distinct confessional groups.

The hostility to the Church shown in the French

Revolution was also evidenced in the measures adopted by the Helvetic Republic in Switzerland. By a decree of 1798 the possessions of all Swiss monasteries were declared to be national property, and a further decree suppressed, in theory, all monasteries. The papal nuncio was expelled, and foreign bishops were permitted to exercise their ecclesiastical jurisdiction only through delegates who were nominated by the Helvetic Directory. The decree respecting the monasteries was not executed. By the Act of Mediation of 1803 the property of the monasteries was returned to them, and the monasteries could be reopened. Only the venerable Abbey of St-Gall was definitely suppressed. Part of the abbey lands were incorporated in the state property of the Canton of St-Gall, and part were reserved as a special fund for the Catholics of the canton. After the turmoil of the Napoleonic era and after the suppression of the Diocese of Constance the ecclesiastical administration was gradually reorganized during the period of the Restoration. By an agreement of 28 March, 1828, the Diocese of Basle was re-established, with the see at Solothurn (Soleure). The Swiss portion of the Diocese of Geneva was united with the Diocese of Lausanne, and the bishop, whose see was Fribourg, received the title of Bishop of Lausanne and Geneva. The Diocese of Sion (Sitten) was left essentially as before. In 1836 Pope Gregory XVI erected the Vicariate Apostolic of St-Gall, which was later changed into a bishopric. The old Diocese of Chur, which continued to exist, received new boundaries by agreements made with the cantons that had formed the original League. In 1888, after long negotiations, the Canton of Ticino was released from its diocesan connexion with Como and Milan and made a diocese which was, however, united with Basle; it is ruled by an Apostolic administrator with the rank of a bishop.

The War of the Sonderbund greatly damaged Catholic interests in Switzerland. Not only were the Jesuits driven out and their flourishing schools suppressed, but most of the monasteries in the Catholic cantons were also suppressed by the violent radical Governments that had come into power. Even at a later date the Cantons of Thurgau, Zurich, Solothurn, and Aargau secularized the monasteries in their territories and confiscated the monastic possessions. During the nineteenth century some sixty monastic institutions were suppressed throughout Switzerland. In a number of the cantons a strong spirit of Josephinism became apparent, and the free exercise of ecclesiastical authority was frequently prevented. The Catholic minority in the Protestant cantons was oppressed in various ways. This was especially the case on the appearance of Old Catholicism which caused a regular persecution of Catholic priests and people in some cantons, especially Berne and Geneva. The opposition which sprang up in various countries to the definitions of the Vatican Council also manifested itself in Switzerland, and small Old Catholic parishes were formed in various places. The Old Catholics of Switzerland united to form the "Christian Catholic National Church" which received formal recognition both from the Federal Council and from the Governments of several cantons. The Governments of the Cantons of Berne and Geneva settled renegade priests over Catholic parishes by force; churches, parsonages, and the church property were given to these priests and their few adherents by the administrative authorities. A Christian Catholic theological faculty for the training of Old Catholic priests was established at the University of Berne; this faculty still continues a languishing existence.

When Lachat was appointed Administrator Apostolic of Ticino, and Mermillod, Bishop of Lausanne and Geneva, the authorities of the Confederation and some of the cantonal Governments began to yield somewhat in the struggle with the Catholics. Many churches in the Bernese Jura and in Geneva were returned to the Catholics, frequently, though, under great material sacrifice by the latter. The Old Catholic movement in Switzerland, as everywhere else, began very soon to decline. Of late years the attempt has been made in different Swiss cantons to separate Church and State. This separation has been carried out practically in Geneva and Basle. Catholic life has greatly developed in Switzerland notwithstanding the difficulties caused by the War of the Sonderbund and the persecution caused by the Old Catholic movement. Among the larger Catholic organizations which extend over the whole of Switzerland mention should be made of the Catholic People's Union; this society unites the individual organizations into one large association, and labours with much success in the fields of religion, charity, social work, and education. The section for home missions, that aids Catholic parishes in the *diaspora*, distributed for this purpose the sum of 202,720 francs in 1910, and helped 105 mission parishes. The historical section supports the "Zeitschrift für schweizerische Kirchengeschichte". In addition to the People's Union mention should also be made of the "Association of Swiss Catholic Students", which is active in all of the Swiss universities, in several foreign ones, and in the Swiss lyceums, and which has a large membership. A matter of much importance for Catholic life was the founding of the cantonal University of Fribourg (q. v.).

RELIGIOUS STATISTICS.—Of the 3,765,002 actual inhabitants of Switzerland on 1 December, 1910, 2,108,590 were Protestants, 1,590,792 were Catholics, 19,023 Jews, and 46,597 belonged to other confessions or to none. A comparison of the number of Catholics with that of the Protestants at the census of 1900 shows that the Catholics have increased at a more rapid rate within the last ten years than the Protestants. This arises mainly from the fact that the adjacent parts of the neighbouring countries are all Catholic, so that immigration almost always increases only the Catholic population. The Catholic inhabitants of Switzerland belong to the following dioceses: (1) Basle-Lugano; in this double bishopric the Diocese of Basle includes the Cantons of Solothurn, Lucerne, Zug, Berne, Aargau, Thurgau, Basle, and Schaffhausen, while the Diocese of Lugano embraces the Canton of Ticino. (2) Chur, which includes the Cantons of the Grisons, Schwyz, Uri, Unterwalden (both Obwalden and Nidwalden), Glarus, Zurich, and, in addition, the Principality of Lichtenstein. (3) Lausanne-Geneva, which includes the Cantons of Fribourg, Vaud (with exception of a few parishes which belong to Sion), Neuchâtel and Geneva. (4) St-Gall, which includes the cantons of St-Gall, and the two half-Cantons of Appenzell. (5) Sion, which includes the Canton of Valais and the Catholic parishes of the governmental department of Aigle in the Canton of Vaud. In addition there are: the exempt episcopal Abbey of Saint-Maurice in Valais, the abbot of which is always the titular Bishop of Bethlehem, the exempt Abbey of Einsiedeln, the exempt priory of the Great St-Bernard, and two prefectures Apostolic in the Grisons, namely Misox-Calanca, and Rhætia.

With the exception of the Moravians and two Lutheran parishes in Geneva, all the Protestants of Switzerland belong to the Evangelical Reformed Church. The great majority of these belong to the "National Churches", of which there are fifteen, which are organized according to cantons. There are numerous differences in details in the constitutions of these cantonal National Churches. Besides these there are also large independent Protestant Churches and Evangelical sects of the most varied kinds. In the census the Old Catholics are not counted as independent confessions, but are enumerated among the Catholics. Altogether they number about 30,000 persons (more exact statistics are not obtainable). Four years ago the list of Old Catholic clergy gave 56 names; in the summer half-year of 1910 the Old Catholic theological department at Berne had three Swiss and six foreign students. In addition to the Old Catholic bishop, the Christian Catholic National Church is administered by a national synod which meets annually; besides the Old Catholic priests and the bishop its membership includes delegates elected by the parishes. The Swiss Jews are united for worship into twenty-two communities which are organized in accordance with the laws of the Confederation for associations.

J. P. KIRSCH.

Sword, KNIGHTS OF THE. See MILITARY ORDERS, THE.

Sydney, ARCHDIOCESE OF (SYDNEYENSIS).—The vast territories formerly known as New Holland and Van Diemen's Land and since 1900 as The Commonwealth of Australia were erected into the Vicariate Apostolic of New Holland in 1834. John Bede Polding (q. v.), a Benedictine, was appointed vicar Apostolic. He was consecrated bishop in London on 29 June, 1834. Dr. Polding visited Rome in 1841–2, and at his suggestion new sees were erected in Hobart and Adelaide. A few years later Melbourne and Brisbane were also detached from the archdiocese. In New South Wales dioceses were erected at Maitland, Goulburn, Bathurst, Armidale, Lismore, and Wilcannia; these form at present the suffragan sees of Sydney, which was erected into an archdiocese on 15 February, 1842. The archdiocese stretches along the Pacific coast from Red Head on the north to Cape Howe on the south, and inland to the Dividing Range. When Dr. Polding landed at Sydney, there were only four priests in the district; Father Ullathorne, an English Benedictine who had come to Australia in 1833, was vicar general, assisted by Fathers Therry, McEncroe, and Dowling, three Irish priests, the last named a Dominican. The official census of 1833 gave the population of the colony as 60,794, the Protestants of all denominations being 43,095 and the Catholics 17,283. The government allowance in the same year for the maintenance of the Catholic Church was $4000; whilst to the Church of England, exclusive of its rich land endowments, was assigned the sum of $95,355. There were 10 Catholic schools receiving about $2000 from the Government, whilst the Protestant schools were allowed $28,680, in addition to a grant of $16,500 for the building of the Protestant King's School at Parramatta. In 1836 Dr. Ullathorne sailed for England and Ireland to secure priests and nuns for the increasing demands of the diocese. He availed himself of this opportunity to publish a pamphlet setting forth the sad condition of the convicts, and the maladministration of affairs in official quarters. Seventy-five thousand copies of this pamphlet were circulated in England and throughout the Continent, and its effect was seen in the altered conditions of administration soon after introduced. His mission was successful, and in 1841 Dr. Polding was enabled to report to Propaganda that the diocese had 24 priests, a community of nuns, 9 churches completed and 6 others in course of erection, with several small chapels, and 31 schools.

During a visit to Rome in 1846–47 Dr. Polding secured the appointment of Dr. Davis, O.S.B., titular Bishop of Maitland, as his coadjutor bishop. He, however, died in Sydney in 1854. In 1873 Archbishop Roger Bede Vaughan was appointed coadjutor, and he succeeded Dr. Polding on 16 March, 1877. He was remarkable for his eloquence, and upheld with great vigour the Catholic cause in the matter of religious education. On 19 April, 1883, he sailed for England via San Francisco, but died two days after his arrival in Liverpool (18 August). Patrick Francis Moran (see below), Bishop of Ossory, Ireland, was appointed to the vacant see, his Brief being dated 21 March, 1884. Dr. Higgins was appointed auxiliary bishop in 1888, and in 1899 was translated to the See of Rockhampton in Queensland. Most Rev. Michael Kelly, titular Archbishop of Achrida, was appointed coadjutor in 1901. The cathedral under the invocation of Our Lady Help of Christians, begun as far back as 1820 by Father Therry and completed by Archbishop Polding, was destroyed by fire on 29 June, 1865. It was rebuilt according to plans by Wardell, and consecrated by Archbishop Vaughan on 8 September, 1882. Archbishop Moran landed at Sydney on 8 September, 1884. The following year he was summoned to Rome to be promoted to the cardinalate. He convened and presided at three plenary synods (1885, 1895, 1905), and also presided at the Catholic congresses held in 1900, 1904, and 1909. Conferences of the clergy and diocesan synods have been held every year. St. Patrick's Ecclesiastical College, for the secular clergy, was erected at Manly on a government grant of eighty acres; the foundations were blessed during the plenary synod of 1885, and dedicated in 1888. It was built and fully equipped at the sole expense of Cardinal Moran, who wished it to be his gift to the Australian Church, as it was intended not for Sydney alone but for all the Australian dioceses. It has in the present year (1911) eighty students, all Australians, and has since its opening furnished one hundred and thirty priests to the Australian mission. A preparatory ecclesiastical college at Springwood, in the Blue Mountains, was opened last year. It is erected on a site of six hundred acres, the purchase of the land and the erection of the building being a further gift of the cardinal to the diocese. There are two Catholic weekly newspapers: "The Catholic Press" and "The Freeman's Journal"; there is also the quarterly "Australasian Catholic Record", besides, some minor monthly publications. The Catholic Club, organized in 1810, has a considerable enrolment.

When the Dr. Polding was appointed vicar Apostolic, several English Benedictines volunteered for the Australian mission. Some years later, at Dr. Polding's petition, St. Mary's was declared a Benedictine cathedral, the adjoining presbytery was raised to the dignity of a Benedictine priory, and it was hoped by the archbishop that the whole diocese would be efficiently served by an Anglo-Australian Benedictine community. This, however, was soon found to be impracticable. From the first many difficulties beset the Benedictine Order in Sydney. The community was finally dissolved by Archbishop Vaughan, himself a Benedictine, and missions were assigned to its priests in the ranks of the secular clergy. The religious orders of men are at present represented by the Marist Fathers, who entered on their missionary work in 1837, the Jesuits, Franciscans, Missionaries of the Sacred Heart, Vincentians, Passionists, Missionaries of the Divine Word, and Capuchins. In 1883 the members of the religious orders numbered 41; at present they are 79. The Irish Congregation of Sisters of Charity was the first of the orders of nuns to arrive (1 January, 1839) in Australia. For some years their special care was devoted to the female convicts. Later they engaged in the work of education, took charge of St. Vincent's Hospital, the first Catholic hospital in Australia, and visited the prisons. The congregation now numbers in Australia 320 nuns (in Sydney 235). The Benedictine Nuns arrived in Sydney in 1849, and at their monastery of Subiaco devote themselves to the higher branches of education. The Good Samaritans, a purely Australian order instituted in Sydney in 1857, are spread through other dioceses, and number in Sydney 220. The Sisters of St. Joseph are also an Australian institute spread through several dioceses, numbering in Sydney 255. Other religious orders of nuns are the Sisters of Mercy, Religious of the Sacred Heart of Jesus, Poor Clares, Carmelites, Nursing Sisters of the Little Company of Mary, Little Sisters of the Poor, Sisters of St. Brigid, Dominican Nuns, Institute of the Blessed Virgin of Loreto, Sisters of Our Lady of the Sacred Heart, and Marists. At the close of Archbishop Vaughan's episcopate the number of nuns in the diocese was 252; at present (1911) they number 1400. St. John's college is associated with the Sydney University. The Jesuits have the flourishing College of St. Ignatius at Riverview, and the High School of St. Aloysius at Milson's Point. The Marist Brothers have a novitiate besides the College of St. Joseph, the High School at Darlinghurst, and several parochial schools. The Christian Brothers from Ireland were the first teaching religious order to come to Australia. Three Brothers accompanied Dr. Polding to Sydney in 1843, and within a few months they had three schools; sufficient means for their support were lacking and they returned to Ireland in 1844. They returned to Sydney in 1887, and have now a novitiate, two flourishing high schools, and eight parochial schools. The Patrician Brothers have also a flourishing college and some parochial schools. The total number of teaching Brothers at the close of Dr. Vaughan's episcopate was 78; they now number 220.

The Cathedral of St. Mary, Sydney, New South Wales

In 1883 there were 10,936 children in the schools of the diocese; there are at present 25,000. Official returns published last year (1910) in connexion with the cardinal's silver jubilee set forth that during those twenty-five years of his administration 160 churches had been erected or enlarged and about as many schools; 45 presbyteries had been provided, and 34 new parochial districts organized. In 1885 there was only one Catholic orphanage and that was maintained by the Government. In 1888 the government aid was withdrawn and the orphanage suppressed. Since then 9 orphanages have been established and 2 Catholic industrial schools. In 1885 there was only one Catholic hospital, St. Vincent's; it has since then been considerably enlarged, and five other hospitals have been built. A Home for the Aged Poor has also been established, and several other charitable institutions.

In 1911 the Archdiocese of Sydney contained: 175,000 Catholics; churches, 189; districts, 75; priests, secular, 120, regular, 79; religious men, 220, women, 1374; seminaries, 3; colleges, 7; boarding schools (girls) 25; superior day schools (boys), 4; (girls), 47; primary schools, 250; poor schools, 2; night schools (girls), 2; (boys), 1; orphanages, 7; industrial schools, 3; total number of pupils in Catholic schools, 25,000; hospitals, 8; Hospice for the Dying, 1; Foundling Hospital, 1; Home for the Aged Poor, 1; Home for the Blind, 1; Magdalen Retreats, 2; Servants' Home, 1; Home for Mental Invalids, 1; St. Charles' Villa for Aged and Infirm Priests, 1.

Patrick Francis Cardinal Moran, third Archbishop of Sydney, b. at Leighlinbridge, Ireland, 16 Sept., 1830; d. at Manly, Sydney, 16 Aug., 1911. He was the only son of Patrick Moran and Alice Cullen, sister of Cardinal Cullen. Of his three sisters two became nuns, one of them offered her life to God for the cholera patients whom she nursed, and died the last victim of the plague in Ireland. Both his parents died before his eleventh year. He left Ireland in 1842 to pursue his studies in Rome. His "Acta Publica" in universal theology was so masterly as to gain for him the doctorate by acclamation. Among the principal objectors was Cardinal Joachim Pecci, afterwards Leo XIII, who was impressed by the genius of this Irish student. He was appointed vice-rector of the Irish College, and also filled the chair of Hebrew at Propaganda, and was some time vice-rector of the Scots College. In 1886 he was appointed secretary to Cardinal Cullen and professor of Scripture at Clonliffe College. He founded the "Irish Ecclesiastical Record". In 1869 he accompanied Cardinal Cullen to the Vatican Council, and was appointed procurator for one of the absent bishops.

Selected as coadjutor Bishop of Ossory, he was consecrated Bishop of Olba. The diocese was distracted by dissensions between the infirm bishop, Dr. Walsh, and some of his priests and people. Dr. Moran ruled with a firm yet benign hand, and his episcopate was fruitful of much spiritual and temporal advancement in the diocese. He established many religious institutions. At Callan was founded the convent of St. Brigid's Apostolic School, which has blessed with the missionary spirit so many distant lands. He introduced the Sisters of Mercy also into the Irish workhouses, and transformed those dens of misery into homes for the indigent and poor. He established industrial schools for boys and girls, under the guidance of the Sisters of Charity, and was the pioneer in that grand network of child industrial training which has since become the pride of Ireland. He completed the chancel of and adorned the Kilkenny Cathedral, added a new wing to St. Kiernan's College, and founded the public library and archæological society. He always defended the rights of the people and championed Home Rule. He knew Ireland and loved her deeply. He was consulted by W. E. Gladstone prior to the introduction of his Home Rule Bills and his knowledge of the commercial, industrial, and economic conditions of the country was a source of wonder to the prime minister, who ever afterwards cherished for him a profound respect and affection. His great diplomatic skill secured for him the confidence of the Irish hierarchy, and he represented them in many of their most delicate negotiations with the Holy See. Though the Benjamin of the episcopate, he was selected as one of the secretaries to the first National Synod of Maynooth. The Brief of Dr. Moran's translation to Sydney was issued 21 March, 1884. In the archbishop's farewell audience with Leo XIII it was made evident that the intrigues of parties, the interference of government agencies, and the influence of high ecclesiastics had made the matter almost impossible of decision by Propaganda. In the presence of others the Holy Father said clearly, "We took the selection into Our own hands. You are Our personal appointment". In his first outward journey he drew up that spiritual programme which gave such a colouring to his after life. "I must esteem nothing save the service of the Redeemer, everything else is beside my mission; *Ich dien* [I serve] in its highest meaning must be my motto . . . . To do the will of my Divine Master must be my life, my light, my love, my all."

In 1886 he travelled 2500 miles over land and sea, and visited all the dioceses of New Zealand. In the following year he traversed 6000 miles to consecrate Dr. Gibney at Perth. In subsequent years he went to Ballarat, Bathurst, Bendigo, Hobart, Goulburn, Lismore, Melbourne, and Rockhampton for the consecration of their respective cathedrals. In 1908 he revisited and dedicated the cathedral of Auckland, and in the last year of his life he again covered 6000 miles to consecrate Dr. Clune Bishop of Perth. He consecrated fourteen bishops, ordained nearly five hundred priests, dedicated more than five hundred churches, and professed five thousand nuns. The thirty-two charities which he founded in the city of Sydney remain as the crowning achievement of his life. As a statesman he forecasted the necessity of Australian federation, an Australian navy, and an Australian citizen soldiery. By sheer force of character he pressed these questions on the public mind, and lived long enough to see a Federal Labour Ministry remodelling the class legislation of past centuries and equitably evolving the rights of the working classes, the first unit of an Australian navy patrolling Australian waters, and the first 100,000 Australian youths called into disciplinary camps. Rt. Rev. Dr. Hoare, Bishop of Ardagh, was first named to assist Cardinal Moran in the administration of the archdiocese. He was unable to leave Ireland, and Rt. Rev. Dr. Higgins was appointed auxiliary bishop March, 1889. He was transferred to the See of Rockhampton on 4 May, 1899, and now occupies the See of Ballarat. On 20 July, 1901, Dr. Kelly, rector of the Irish College, Rome, was appointed auxiliary, *cum jure successionis*, and succeeded the cardinal at his death. A quarter of a million people witnessed the funeral procession through the heart of the city of Sydney. By permission of the State Government and of the municipal authorities he was interred with the pioneer priests in his beloved St. Mary's Cathedral.

Among his works may be named: "Monasticon Hibernicon"; "Spicilegium Ossoriense", "Memoir of Oliver Plunkett"; "Persecutions of Irish Catholics"; "Lives of the Archbishops of Dublin"; "Life of David Roth"; essays in "Dublin Review"; "Irish Saints in Great Britain"; "Birthplace of St. Patrick"; "St. Bartholomew's Massacre"; "Father Mathew"; "Our Primates"; "Civilisation of Ireland"; "Church and Social Progress"; "Acta Sancti Brendani"; "History of the Catholic Church in Australasia"; "Reunion of Christendom"; "Capital and Labour"; "Mission Field in the Nineteenth Century"; "Patron Saints of Ireland: Patrick, Brigid, and Columbkille"; "Lives of Sts. Canice and Carthage"; "Mission of the Catholic Church"; "Divine Credentials of the Church"; "Discourses on Cardinals Newman and Manning"; "The Anglican Reformation"; "Rights and Duties of Labour"; "Blessed Thomas More"; "Catholics and Irishmen"; "Catholic Democracy"; "The Thirteenth Century"; "Infallible Authority of the Church"; "Perpetuity of the Church"; "The Apostolate of St. Patrick"; "Australian Federation"; "Heritage of Blessings in the Catholic Church"; "Christopher Columbus"; "Fruits of Redemption"; "Discovery of Australia"; etc., "The Beginnings of the Catholic Church in the United States", from unpublished documents.

DENIS F. O'HARAN.

Syene, a titular see in Thebais Secunda, suffragan of Ptolemais. Syene (Egyptian, Souanou, Coptic, Souan), was originally the market-place of the Island of Elephantine (in Egyptian, Abou). Under the Pharaohs, Abou was the capital of a principality, then the chief town of the nome. It is not known at what epoch its suburb across the Nile commenced to grow at its cost; for a long time the two cities were treated as one, Souanou being the port and city of work. Its quarries, with those of Rohannou, were the principal ones of Egypt; they supplied a certain kind of red granite called syenite, out of which were cut the obelisks, monolithic temples, the colossus, etc. From the time of the ancient empire royal Egyptian envoys went there to look for the stone destined for the sarcophagus of the king. These quarries were in full activity in the Roman epoch, and syenite was exported throughout the empire. Another celebrated place in Syene was a pit, which was incorrectly thought to have been placed exactly under the equator. For this reason it was chosen by Eratosthenes as the starting point of his measure of the surface of the earth (230 B. C.). The Syene of the Romans to the south-west of the present city, suffered much from the incursions of the Blemmyes, and from the pest; its inhabitants abandoned it to live in the higher parts built by the Saracens. This new city which was at first very prosperous suffered also from the troubles which followed the extinction of the Fatimite dynasty. Taken and retaken by the Qenous or Barabra of Lower Nubia, and by the Haouârah of Upper Egypt, it was nearly ruined and did not regain its importance until the Sultan Selim established a Turkish garrison there (1517). The Arabian name of the city is Assouan. There the French fought the Mamelukes, on 16 May, 1799. This city of about 10,000 inhabitants, and which may be reached by a railroad, as it is situated to the south of the first cataract of the Nile, is very interesting on account of its picturesque aspect and the strange character of its population composed of Arabs, Barbarins, negroes, Bisharis, and Ababdèh; curious bazaars and quays; remains of Roman quays, inscriptions on rocks, little temple of Isis, Arabian ruins and cemetery. The places of interest in the neighbourhood are the old quarries, the Island of Elephantine (to-day Geziret Assouan), an old necropolis, the beautiful Coptic convent of St. Simeon, and the famous Island of Philæ. Syene is mentioned by the Prophet Ezechiel, who threatened Egypt with devastation "from the tower of Syene, even to the borders of Ethiopia" (Ezech., xxix, 10). See St. Jerome and the modern commentators on this passage, where the Vulgate differs from the Hebrew and the Greek text. Le Quien (Oriens christ., II, 613) mentions two bishops of Syene: St. Ammonius, martyr at Antinoe where he had a church, and Befam, a Jacobite (1086). The Synaxarion of the Coptic church tells us that the city had a bishop from the time of the Patriarch Timothy, one of the successors of St. Athanasius.

S. Pétridès.

Sykes, Edmund, b. at Leeds; martyred at York Tyburn 23 March, 1586–7; was a student at the College at Reims where he was ordained 21 Feb., 1581, and sent to the English Mission on 5 June following. He laboured in his native Yorkshire with such zeal and sacrifice, that his strength failed. Arthur Webster, an apostate, took advantage of his illness to betray him, and he was committed to the York Kidcot by the Council of the North. In his weakness he consented to be present at the heretical service, but he refused to repeat the act and remained a prisoner. After confinement for about six months, he was again brought before the Council and sentenced to banishment. On 23 Aug., 1585, he was transferred to the Castle of Kingston-upon-Hull, and within a week shipped beyond the seas. He made his way to Rome, where he was entertained at the English College for nine days from 15 April, 1586, his purpose being to atone for his lapse by the pilgrimage, and he also entertained some thoughts of entering religion. There he understood that it was God's will that he should return to the English mission, and reaching Reims on 10 June, he left again for England on 16. After about six months he was betrayed by his brother, to whose house in Wath he had resorted, and was sent a close prisoner to York Castle by the Council. He was arraigned at the Lent Assizes, condemned as a traitor on the score of his priesthood, and on 23 March, 1586–7 was drawn on the hurdle from the castle yard to York Tyburn, where he suffered the death penalty.

J. L. Whitfield.

Syllabus (*σύλλαβος*, "collection"), the name given to two series of propostions containing modern religious errors condemned respectively by Pius IX (1864) and Pius X (1907).

I. The Syllabus of Pius IX.—A. *History*.—The first impulse towards the drawing up of the Syllabus of Pius IX came from the Provincial Council of Spoleto in 1849. Probably on the motion of the Cardinal Archbishop of Perugia, Pecci (later on Leo XIII), a petition was laid before Pius IX to bring together under the form of a Constitution the chief errors of the time and to condemn them. The preparation began in 1852. At first Pius IX entrusted it to Cardinal Fornari, but in 1854 the Commission which had prepared the Bull on the Immaculate Conception took matters in hand. It is not known how far the preparation had advanced when Gerbet, Bishop of Perpignan, issued, in July, 1860, a "Pastoral Instruction on various errors of the present" to his clergy. With Gerbet's "Instruction" begins the second phase of the introductory history of the Syllabus. The "Instruction" had grouped the errors in eighty-five theses, and it pleased the pope so much, that he set it down as the groundwork upon which a fresh commission, under the presidency of Cardinal Caterini, was to labour. The result of their work was a specification, or cataloguing, of sixty-one errors with the theological qualifications. In 1862 the whole was laid for examination before three hundred bishops who, on the occasion of the canonization of the Japanese Martyrs, had assembled in Rome. They appear to have approved the list of theses in its essentials. Unfortunately, a weekly paper of Turin, "Il Mediatore", hostile to the Church, published the wording and qualifications of the theses, and thereby gave rise to a far-reaching agitation against the Church. The pope allowed the storm to subside; he withheld the promulgation of these theses, but kept to his plan in what was essential.

The third phase of the introductory history of the Syllabus begins with the appointment of a new commission by Pius IX; its most prominent member was the Barnabite (afterwards Cardinal) Bilio. The commission took the wording of the errors to be condemned from the official declarations of Pius IX and appended to each of the eighty theses a reference indicating its content, so as to determine the true meaning and the theological value of the subjects treated. With that the preparation for the Syllabus, having occupied twelve years, was brought to an end. Of the twenty-eight points which Cardinal Fornari had drawn up in 1852, twenty-two retained their place in the Syllabus; of the sixty-one theses which had been laid before the episcopate for examination in 1862, thirty were selected. The promulgation, according to the original plan, was to have taken place simultaneously with the proclamation of the dogma of the Immaculate Conception; in the event it was ten years later (8 December 1864) that Pius IX published the Encyclical "Quanta Cura", and on the same day, by commission of the pope, the secretary of State, Cardinal Antonelli, sent, together with an official communication, to all the bishops the list of theses condemned by the Holy See. The title of the document was: "A Syllabus containing the most important errors of our time, which have been condemned by our Holy Father Pius IX in Allocutions, at Consistories, in Encyclicals, and other Apostolic Letters".

The reception of the Syllabus among Catholics was assured through the love and obedience which the children of the Church bear towards the vicar of Christ on earth. They were, besides, prepared for its contents by the various announcements of the pope during the eighteen years of his pontificate; and, as a matter of fact, no sooner had it made its appearance than it was solemnly received in national and provincial councils by the episcopate of the whole world. Among the enemies of the Church, no papal utterance had stirred up such a commotion for many years: they saw in the Syllabus a formal rejection of modern culture, the pope's declaration of war on the modern State. In Russia, France, and also in those parts of Italy then subject to Victor Emmanuel, its publication was forbidden. Bismarck and other statesmen of Europe declared themselves against it. And to the present day, it is a stumbling-block to all who favour the licence of false Liberalism.

B. *Binding Power*.—The binding power of the Syllabus of Pius IX is differently explained by Catholic theologians. All are of the opinion that many of the propositions are condemned if not in the Syllabus, then certainly in other final decisions of the infallible teaching authority of the Church, for instance in the Encyclical "Quanta Cura". There is no agreement, however, on the question whether each thesis condemned in the Syllabus is infallibly false, merely because it is condemned in the Syllabus. Many theologians are of the opinion that to the Syllabus as such an infallible teaching authority is to be ascribed, whether due to an ex-cathedra decision by the pope or to the subsequent acceptance by the Church. Others question this. So long as Rome has not decided the question, everyone is free to follow the opinion he chooses. Even should the condemnation of many propositions not possess that unchangeableness peculiar to infallible decisions, nevertheless the binding force of the condemnation in regard to all the propositions is beyond doubt. For the Syllabus, as appears from the official communication of Cardinal Antonelli, is a decision given by the pope speaking [illegible] universal teacher and judge to

Catholics the world over. All Catholics, therefore, are bound to accept the Syllabus. Exteriorly they may neither in word nor in writing oppose its contents; they must also assent to it interiorly.

C. *Contents.*—The general contents of the Syllabus are summed up in the headings of the ten paragraphs, under which the eighty theses are grouped. They are: Pantheism, Naturalism, Absolute Rationalism (1–7); Moderate Rationalism (8–14); Indifferentism and false Tolerance in Religious matters (15–18); Socialism, Communism, Secret Societies, Bible Societies, Liberal Clerical Associations (reference is made to three Encyclicals and two Allocutions of the pope, in which these tendencies are condemned), Errors regarding the Church and its rights (19–38); Errors on the State and its Relation to the Church (39–55); Errors on Natural and Christian Ethics (56–64); Errors on Christian Marriage (65–74); Errors on the Temporal Power of the Pope (75–76); Errors in Connection with Modern Liberalism (77–80). The content of any one thesis of the Syllabus is to be determined according to the laws of scientific interpretation. First of all, one has to refer to the papal documents connected with each thesis. For, in accordance with the peculiar character of the Syllabus, the meaning of the thesis is determined by the meaning of the document it is drawn from. Thus the often-cited eightieth thesis, "The pope may and must reconcile himself with, and adapt himself to, Progress, Liberalism, and Modern Civilization", is to be explained with the help of the Allocution "Jamdudum cernimus" of 18 March, 1861. In this allocution the pope expressly distinguishes between true and false civilization, and declares that history witnesses to the fact that the Holy See has always been the protector and patron of all genuine civilization; and he affirms that, if a system designed to de-Christianize the world be called a system of progress and civilization, he can never hold out the hand of peace to such a system. According to the words of this allocution, then, it is evident that the eightieth thesis of the Syllabus applies to false progress and false Liberalism and not to honest pioneer-work seeking to open out new fields to human activity.

Moreover, should a thesis, according to the papal references, be taken from a condemned book, the meaning of the thesis is to be determined according to that which it has in the condemned book. For the thesis has been condemned in this particular meaning and not in any other which might possibly be read into its wording. For instance, the fifteenth thesis, "Everyone is free to adopt and profess that religion which he, guided by the light of reason, holds to be true", admits in itself of a right interpretation. For man can and must be led to the knowledge of the true religion through the light of reason. However, on consulting the Apostolic Letter "Multiplices inter", dated 10 June, 1851, from which this thesis is taken, it will be found that not every possible meaning is rejected, but only that particular meaning which, in 1848, Vigil, a Peruvian priest, attached to it in his "Defensa". Influenced by Indifferentism and Rationalism, Vigil maintained that man is to trust to his own human reason only and not to a Divine reason, i. e. to the truthful and omniscient God Who in supernatural revelation vouches for the truth of a religion. In the sense in which Vigil's book understands the fifteenth thesis, and in this sense alone does the Syllabus understand and condemn the proposition.

The view held by the Church in opposition to each thesis is contained in the contradictory proposition of each of the condemned theses. This opposition is formulated, in accordance with the rules of dialectics, by prefixing to each proposition the words: "It is not true that . . ." The doctrine of the Church which corresponds, for instance, to the fourteenth thesis is as follows: "It is not true, that 'philosophy must be treated independently of supernatural revelation.'" In itself no opposition is so sharply determined as by the contradictory: it is simply the negation of the foregoing statement. However, the practical use of this negation is not always easy, especially if a compound or dependent sentence is in question, or a theoretical error is concealed under the form of an historical fact. If, as for instance in thesis 42, the proposition, that in a conflict between civil and ecclesiastical laws the rights of the State should prevail, be condemned, then it does not follow from this thesis, that, in every conceivable case of conflicting laws the greater right is with the Church. If, as in thesis 45, it be denied that the entire control of the public schools belongs exclusively to the State, then it is not maintained that their control does in no way concern the State, but only the Church. If the modern claim of general separation between Church and State is rejected, as in thesis 55, it does not follow that separation is not permissible in any case. If it be false to say that matrimony by its very nature is subject to the civil power (thesis 74), it is not necessarily correct to assert that it is in no way subject to the State. While thesis 77 condemns the statement that in our time it is no longer expedient to consider the Catholic religion as the only State religion to the exclusion of all other cults, it follows merely that to-day also the exclusion of non-Catholic cults may prove expedient, if certain conditions be realized.

D. *Importance.*—The importance of the Syllabus lies in its opposition to the high tide of that intellectual movement of the nineteenth century which strove to sweep away the foundations of all human and Divine order. The Syllabus is not only the defence of the inalienable rights of God, of the Church, and of truth against the abuse of the words *freedom* and *culture* on the part of unbridled Liberalism, but it is also a protest, earnest and energetic, against the attempt to eliminate the influence of the Catholic Church on the life of nations and of individuals, on the family and the school. In its nature, it is true, the Syllabus is negative and condemnatory; but it received its complement in the decisions of the Vatican Council and in the Encyclicals of Leo XIII. It is precisely its fearless character that perhaps accounts for its influence on the life of the Church towards the end of the nineteenth century; for it threw a sharp, clear light upon reef and rock in the intellectual currents of the time.

II. THE SYLLABUS OF PIUS X.—A. *History.*—The Syllabus of Pius X is the Decree "Lamentabili sane exitu", issued on 3 July, 1907, condemning in sixty-five propositions the chief tenets of Modernism. This Decree, later on called the Syllabus of Pius X on account of its similarity with the Syllabus of Pius IX, is a doctrinal decision of the Holy Office, i. e. of that Roman Congregation which watches over the purity of Catholic doctrine concerning faith and morals. On 4 July, 1907, Pius X ratified it and ordered its publication; and on 18 November, 1907, in a Motu Proprio he prohibited the defence of the condemned propositions under the penalty of excommunication, reserved ordinarily to the pope. The Decree is supplemented by the Encyclical "Pascendi" of 8 September, 1907, and by the oath against Modernism prescribed on 1 September, 1910. Thus, the Syllabus of Pius X is the first of a series of ecclesiastical pronouncements dealing with the condemnation of Modernism, whilst the Syllabus of Pius IX sums up the condemnations previously passed by the same pope.

B. *Contents.*—By far the greater number of the theses of this Syllabus are taken from the writings of Loisy, the leader of the Modernists in France; only a few are from the works of other writers (e. g., thesis 6, Fogazzaro; 26, Le Roy). As a rule the quotation is not literal, for it would have been possible only in a few cases clearly to express the error in a short proposition. According to their contents the theses may be divided into six groups. They condemn the doctrine of the Modernists on ecclesiastical decisions (1-8), and on Holy Writ (9–19); the Modernist Philosophy of Religion (20–26) and Modernist Christology (27–38); the theory of the Modernists on the origin of the sacraments (39–51) and the evolution of the Church with regard to its constitution and doctrine (52–65). In detail the Syllabus of Pius X condemns the following assertions: ecclesiastical decisions are subject to the judgment of scientific scrutiny and do not demand interior assent (1–8); "excessive simplicity or ignorance is shown by those who believe that God is really the Author of Holy Scripture" (9); God neither inspired (in the Catholic sense of the word) the sacred writers nor guarded them from all error; the Gospels in particular are not books worthy of historic belief, as their authors have consciously, though piously, falsified facts (10–19); Revelation can be nothing else than the consciousness acquired by man of his relation to God, and does not close with the Apostles (20–21); "The Dogmas, which the Church proposes as revealed are not truths fallen from Heaven, but an interpretation of religious facts, acquired by the human mind through laborious process of thought" (this twenty-second thesis, with the somewhat crude expression, "truths fallen from Heaven", is taken from Loisy's "L'Evangile et l'Eglise"); one and the same fact can be historically false and dogmatically true; faith is based upon a number of probabilities; dogmatic definitions have only a passing practical value as norms in life (23–26); the Divinity of Christ is a dogma which the Christian consciousness deduced from its idea of the Messiah; the real, historical Christ is inferior to the Christ idealized by faith; Jesus Christ erred; His resurrection is no historical event; His vicarious death is a Pauline invention (27–38); the sacraments were not instituted by Christ, but are additions made by the Apostles and their successors, who, under the pressure of events, interpreted the idea of Christ (39–51); Jesus Christ did not think of founding a Church; the latter is a purely human society subject to all the changes of time; of the Primacy, Peter himself knew nothing; the Church is an enemy of scientific progress (5–57); "Truth is as changeable as man, because it is evolved with him, in him, and by him" (58); there are no immutable Christian dogmas, they have developed and must develop with the progress of the centuries (59–63); "Scientific progress demands a reform of the Christian dogmatic conception of God, creation, revelation, the Person of the Word Incarnate, and redemption" (64); "The Catholicism of to-day is irreconcilable with genuine scientific knowledge, unless it be transformed into a Christendom without dogmas, i. e. a broad and liberal Protestantism" (65).

C. *Binding Power.*—Many theses of the Syllabus of Pius X, as all Catholic theologians affirm, are heresies, i. e. infallibly false; for their contradictory is dogma, in many cases even fundamental dogma or an article of faith in the Catholic Church. With regard to the question, whether the Syllabus is in itself an infallible dogmatic decision, theologians hold opposite opinions. Some maintain that the Decree is infallible on account of its confirmation (4 July, 1907) or sanction (18 November, 1907) by the pope; others defend the opinion that the Decree remains nevertheless the doctrinal decision of a Roman Congregation, and is, viewed precisely as such, not absolutely immune from error. In this theological dispute, therefore, liberty of opinion, which has always been safeguarded by the Church in undecided questions, still remains to us. Yet all theologians agree that no Catholic is allowed to maintain any of the condemned theses. For in the decrees of a Roman Congregation we not only have the verdict of a scientific commission, which gives its decisions only after close investigation, but also the pronouncement of a legitimate religious authority competent to bind the whole Church in questions within its competence (cf. what has been said above regarding the Syllabus of Pius IX; under I. B.).

D. *Importance.*—The Syllabus of Pius X may be taken as an introduction to the Encyclical "Pascendi", which gives a more systematic exposition of the same subject. It may be, therefore, that later generations will not find it necessary to distinguish between the importance of the Syllabus and that of the Encyclical. Neverthless, the Syllabus was published at the most opportune moment. The Catholics of those countries in which Modernism had worked its ill effects felt relieved. By this Decree the tenets of religious evolutionism were laid before them in short theses and condemned. Up to that time the significance and the bearing of isolated Modernist views, appearing now here, now there, had not always been fully grasped. Now, however, everyone of good will had to recognize that the Modernists, under the plea of assimilation to modern ideas of development, had tried to destroy the foundations of all natural and supernatural knowledge. Moreover, to the whole Catholic world the Decree sounded a note of warning from the supreme pastor and drew attention to the excellent principles of scholastic theology and to the growing importance of a thorough schooling in exegetical criticism and in the history of dogma, which the Modernists had abused in the most unpardonable manner.

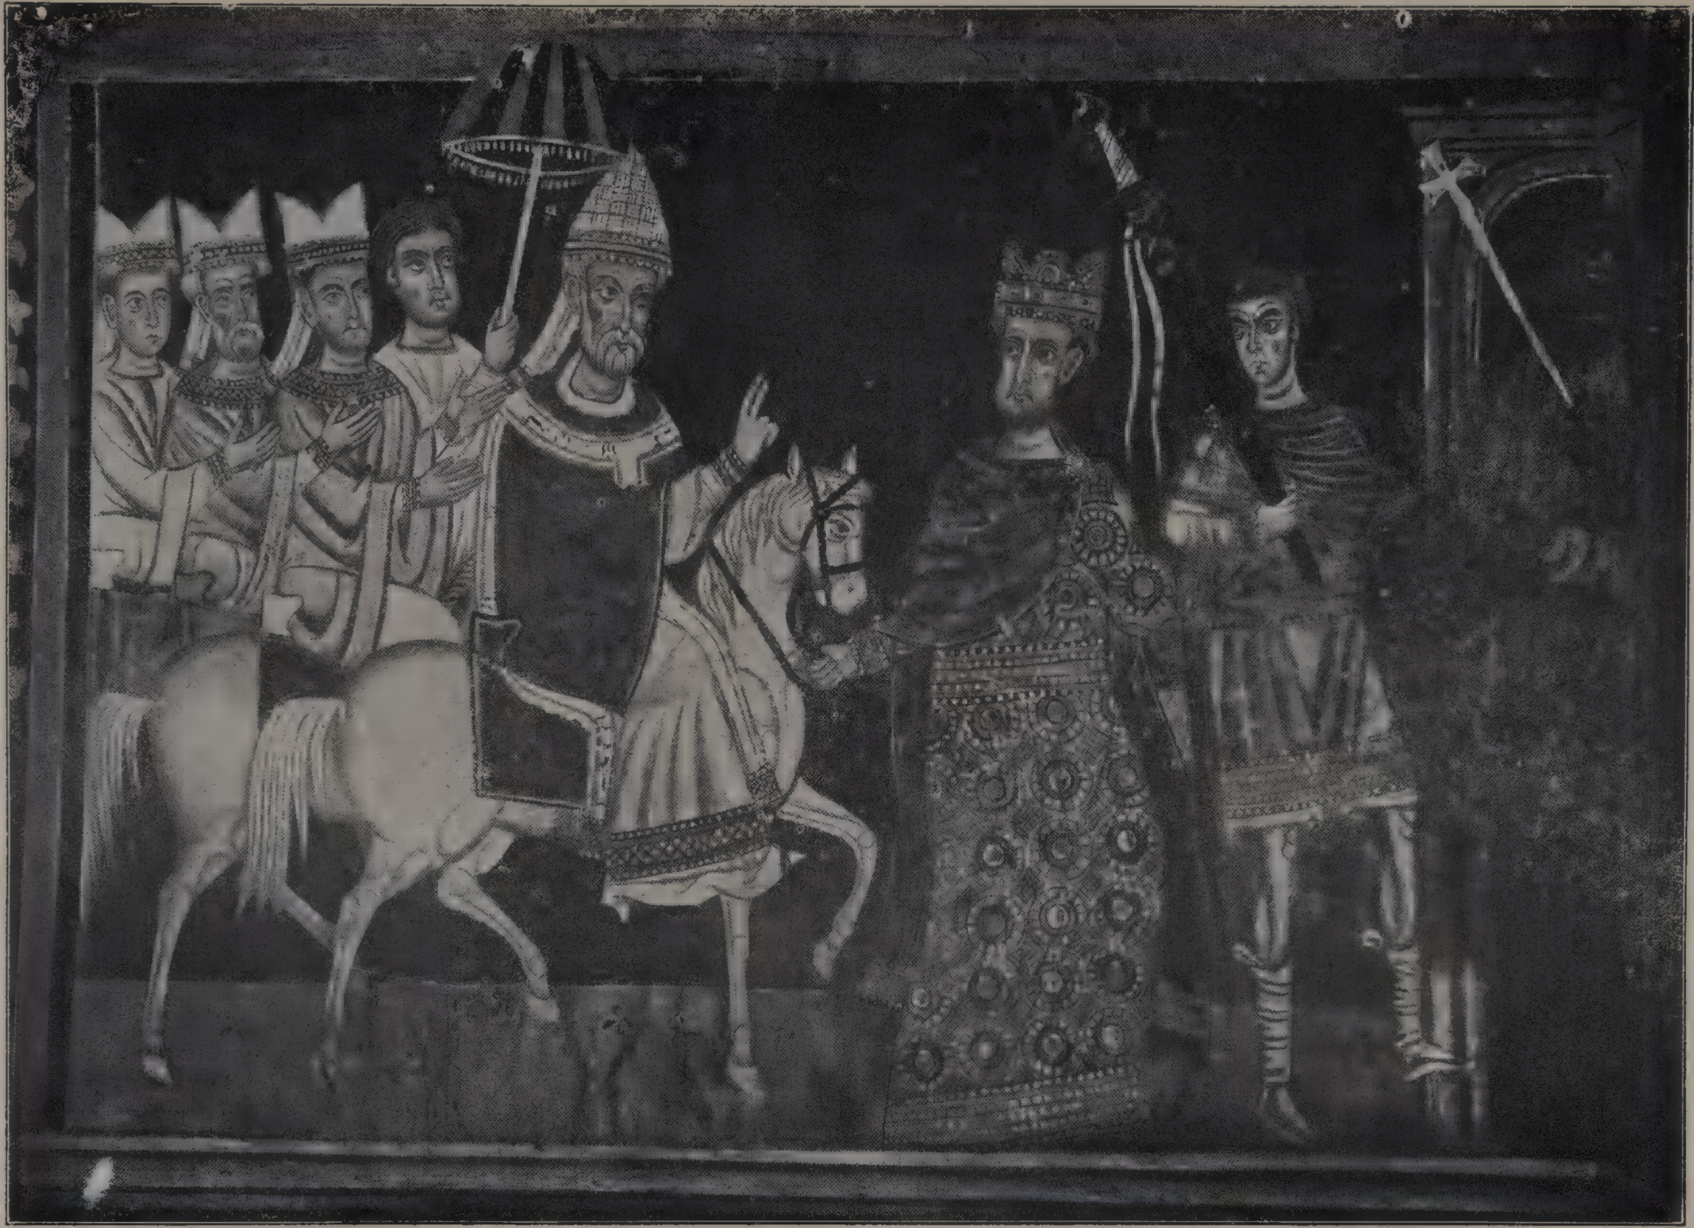
A. Haag.

Sylvester I, Saint, Pope (314–335), date of birth unknown; d. 31 December, 335. According to the "Liber pontificalis" (ed. Duchesne, I, 170) he was the son of a Roman named Rufinus; the legendary "Vita beati Sylvestri" calls his mother Justa. After the death of Miltiades (Melchiades) Sylvester was made Bishop of Rome, and occupied this position twenty-one years. This was the era of Constantine the Great, when the public position of the Church so greatly improved, a change which must certainly have been very noticeable at Rome; it is consequently to be regretted that there is so little authoritative information concerning Sylvester's pontificate. At an early date legend brings him into close relationship with the first Christian emperor, but in a way that is contrary to historical fact. These legends were introduced especially into the "Vita beati Sylvestri" (Duchesne, loc. cit., Introd., cix sq.) which appeared in the East and has been preserved in Greek, Syriac, and Latin in the "Constitutum Sylvestri"—an apocryphal account of an alleged Roman council which belongs to the Symmachian forgeries and appeared between 501 and 508, and also in the "Donatio Constantini". The accounts given in all these writings concerning the persecution of Sylvester, the healing and baptism of Constantine, the emperor's gift to the pope, the rights granted to the latter, and the council



CONSTANTINE HOLDING THE BRIDLE OF ST. SYLVESTER'S HORSE

XII-CENTURY MOSAIC IN THE CHAPEL OF S. SYLVESTER, CHURCH OF THE SANTI QUATTRO CORONATI, ROME

of 275 bishops at Rome, are entirely legendary. The pope, however, took part in the negotiations concerning Arianism and the Council of Nicæa, and the expression ὁμοούσιος was probably agreed upon with him before the council. The pontiff also sent legates to the first œcumenical council. Still it is not certain whether Constantine had arranged beforehand with Sylvester concerning the actual convening of the council, nor whether there was an express papal confirmation of the decrees beyond the signatures of the papal legates (cf. Funk in "Kirchengesch. Abhandlungen und Untersuchungen", I, 95, 501 sq.).

During Sylvester's pontificate were built the great churches founded at Rome by Constantine, e.g. the basilica and baptistery of the Lateran near the former imperial palace where the pope lived, the basilica of the Sessorian palace (Santa Croce), the Church of St. Peter in the Vatican, and several cemeterial churches over the graves of martyrs. No doubt the pope helped towards the construction of these churches. Sylvester's memory is especially connected with the titular Church of Equitius, which takes its name from a Roman presbyter who is said to have erected this church on his property. It was situated near the *thermæ* of Diocletian, and still exists. Parts of the present building may date from the fourth century. No doubt the pope contributed to the development of the liturgy of the Church at Rome. During his reign, moreover, the first martyrology of Roman martyrs was probably drawn up. Sylvester is connected also with the establishment of the Roman school of singing. On the Via Salaria he built a cemeterial church over the Catacomb of Priscilla, the ruins of which have lately been brought to light. In this church he was buried. His feast is given under 31 December in the "Depositio episcoporum", or list of the burial days of the Roman bishops, which was compiled barely a year after his death; the same date is given in the "Calendar" of Philocalus. This day, therefore, is doubtless the day of his burial. For his possible relations with Armenia, see GREGORY THE ILLUMINATOR.

J. P. KIRSCH.

Sylvester II (GERBERT), POPE (999–1003), b. at or near Aurillac, Auvergne, France, about 940–50, of humble parents; d. at Rome, 12 May, 1003. Gerbert entered the service of the Church and received his first training in the Monastery of Aurillac. He was then taken by a Spanish count to Spain, where he studied at Barcelona and also under Arabian teachers at Cordova and Seville, giving much attention to mathematics and the natural sciences, in which he made unusual progress. From Spain he proceeded to Rome with Bishop Hatto of Vich, who had been his chief theological instructor, and John XIII recommended him to the Emperor Otto I, who sent him to Reims to the archdeacon Gerannus. There he was soon appointed a teacher in the cathedral school by Archbishop Adalbero. He undertook journeys of considerable length, e.g. to Ravenna, where he held a disputation with Ortricus of Magdeburg before Otto II. In 983 Otto II bestowed on him the Abbey of Bobbio, but the abbey was very poor and Gerbert returned to Reims. He again taught the most varied branches with great success, devoted himself zealously to study, and helped to raise Hugh Capet to the throne. Adalbero wished Gerbert to be his successor, but when the former died in 988 Arnulph, a natural son of King Lothaire, was raised to the see at the instigation of Hugh Capet. Arnulph was deposed in 991 by a synod held near Reims for alleged treason against the king, and Gerbert was elected his successor. Although Gerbert soon held a provincial synod to condemn those who had injured the property of the Church, and these decisions were confirmed at another synod held at Chela under the presidency of Robert, King of France, there was much opposition to Gerbert's elevation to the See of Reims. Consequently John XV sent Leo, Abbot of Sts. Boniface and Alexius at Rome, as legate to France. On 2 June, 995, Leo held a synod at Mouson. Gerbert appeared personally to defend himself, but was temporarily suspended from his episcopal office. He sought to show that this decree was unlawful, but a further synod (concilium Causeiense), held on 1 July, 995, at which Gerbert was present, declared Arnulph's deposition and Gerbert's elevation illegal and invalid.

Gerbert now went to the Court of the youthful Emperor Otto III, whose teacher he became and whom he accompanied to Italy for the coronation. As the Archbishopric of Reims was not restored to Gerbert, he remained in Italy, and in 998 Gregory V appointed him Archbishop of Ravenna. Gerbert attended the Roman synod before which the marital affairs of King Robert of France were laid. When Gregory V died on 18 February, 999, Gerbert was elected his successor through the influence of the emperor, and took the name of Sylvester. He was the first French pope. The new head of the Church administered his high office with great earnestness and a profound sense of responsibility. His discourse upon the episcopal office shows what his view of the chief spiritual pastors of the Church was ("Sermo de informatione episcoporum", P. L., CXXXIX, 169 sq.). He took energetic measures against the abuses in the life of the clergy caused by simony and concubinage, and was anxious that only capable men of spotless lives should receive the episcopal office. His relations with Otto III were very friendly, and he supported the emperor's political ideas. Otto gave the pope eight Italian countships, which had formerly belonged to the States of the Church, by a deed of gift the genuineness of which, however, is questioned (Wilmans, "Jahrbücher des deutschen Reiches unter den sächsischen Kaisern", II, pt. II, 233 sq.). At the same time the emperor declared the Donation of Constantine to be a forgery. During Otto's residence at Rome in the winter of 1000–1001 Sylvester held a Roman synod on 1 February, 1001, in the presence of the emperor, at which among other matters the affairs of the convent of Gandersheim were discussed. A revolt at Rome directed against the emperor forced Otto and the pope to flee. Sylvester was obliged to remain away for several months, during which the city suffered from party quarrels. On 27 December he called a second synod at Todi on account of the difficulties at Gandersheim, and shortly after was present at Otto's death.

Sylvester regulated important ecclesiastical matters in various countries. Soon after his elevation to the papacy he confirmed anew his former opponent Arnulph as Archbishop of Reims, and in the Bull which he sent to him gives clear proof that he had now abandoned his earlier position in regard to the authority of the papal decisions concerning the disputed see. The pope established an ecclesiastical metropolitan for Poland at Gnesen, and one for Hungary at Gran. On 27 March, 1000, he granted the title of king to the ruler of Hungary and appointed him papal vicar for his country. He energetically maintained church discipline in the question of the marriage of the French King Robert, and obliged the king to send Bertha away. Sylvester returned to Rome soon after Otto's death, although the leaders of the different parties of nobles still retained all their power. A little later he died. His epitaph has been preserved (cf. Forcella, "Iscrizioni delli chiese di Roma", VIII, 9). Besides a dogmatic treatise, "De corpore et sanguine Domini", Sylvester wrote a series of works principally on philosophical, mathematical, and physical subjects; they are to be found in P. L., CXXXIX; Olleris, "Œuvres de Gerbert, pape sous le nom de Sylvester II" (Paris, 1867); "Opera mathematica", ed. Bubnov (Berlin, 1891); "Lettres de Gerbert", published by Havet (Paris, 1889). He was held in high repute for his learning; the common people regarded him as a magician in league with the devil, and many legends grew up around his name. He is said to have introduced the use of Arabic figures into Western Europe, and to have invented the pendulum clock.

Sylvester III, antipope. See Benedict IX, Pope.

Sylvester IV (Maginulf), antipope. See Paschal II, Pope.

Sylvester, Bernard, of Chartres, more properly, of Tours, a twelfth-century philosopher of Neo-Platonic tendencies. Little is known about him. Between the years 1145 and 1153 he composed a work called "De Mundi Universitate", which he dedicated to Thierry (Theodoric) of Chartres with the words "Terrico veris scientiarum titulis Doctori famosissimo Bernardus Silvestris opus suum". From this inscription it is inferred that Bernard was probably a pupil of Thierry or of some other member of the famous School of Chartres. He is not, however, to be confounded with Bernard of Chartres, who died in 1125, and is the author of a work "De Expositione Porphyri". The treatise, "De Mundi Universitate" (republished by Barach, "Bibliotheca Philosophorum Mediæ Ætatis", I, Innsbruck, 1876), is divided by its author into two books, the first of which, "Megacosmus, seu Maior Mundus", is an address of Nature to Intellect, and the second, the response of Intellect to Nature. The style and method of composition remind one of Marcianus Capella. The contents are very curious indeed. There is a good deal of Neo-Platonism and Neo-Pythagoreanism, philosophical tendencies which are very rare in the twelfth century, and practically unknown outside the School of Chartres. It is not at all improbable that Bernard, like the pantheists, Amaury and David, who were his contemporaries, was influenced by the writings of Eriugena. His philosophy is an attempt to account for the universe of nature (physics) by describing the cosmic emanations from an original *Monad*. Not the least valuable portions are those in which the author describes the mountains, rivers, animals, and plants, although the allegorical, poetical manner of the poem very often obscures the meaning. The pantheistic drift of Bernard's philosophy is clear from the expression "Deus omnia, omnia ex Deo sunt". Towards the traditional theology he seems to adopt a sceptical attitude: "Si theologis fidem præbeas argumentis". His favourite philosopher is Plato, although it is clear that he is not acquainted with any of the "Dialogues", except, perhaps, the "Timæus".

William Turner.

Sylvester Gozzolini, Saint, founder of the Sylvestrines, b. of the noble family of the Gozzolini at Osimo, 1177; d. 26 Nov., 1267. He was sent to study jurisprudence at Bologna and Padua, but, feeling within himself a call to the ecclesiastical state, abandoned the study of law for that of theology and Holy Scripture, giving long hours daily to prayer. On his return home we are told that his father, angered at his change of purpose, refused to speak to him for ten years. Sylvester now accepted a canonry at Osimo and devoted himself to pastoral work with such zeal as to arouse the hostility of his bishop, whom he had respectfully rebuked for the scandals caused by the prelate's irregular life. The saint was threatened with the loss of his canonry, but decided to leave the world on seeing the decaying corpse of one who had formerly been noted for great beauty. In 1227 he retired to a desert place about thirty miles from Osimo and lived there in the utmost poverty until he was recognized by the owner of the land, a certain nobleman named Conrad, who offered him a better site for his hermitage. From this spot he was driven by damp and next established himself at Grotta Fucile, where he eventually built a monastery of his order. In this place his penances were most severe, for he lived on raw herbs and water and slept on the bare ground. Disciples flocked to him seeking his direction, and it became necessary to choose a rule. According to the legend the various founders appeared to him in a vision, each begging him to adopt his rule. St. Sylvester chose for his followers that of St. Benedict and built his first monastery on Monte Fano, where, like another St. Benedict, he had first to destroy the remains of a pagan temple. In 1247 he obtained from Innocent IV, at Lyons, a bull confirming his order, and before his death founded a number of monasteries. An account of his miracles and of the growth of his cultus will be found in Bolzonetti. His body was disinterred and placed in a shrine (1275–85) and is still honoured in the church of Monte Fano. Clement IV first recognized the title of blessed popularly bestowed on Sylvester, who was inscribed as a saint in the Roman Martyrology by order of Clement VIII (1598). His office and Mass were extended to the Universal Church by Leo XIII. His feast is kept on 26 November.

Raymund Webster.

Sylvestrines, a minor monastic order or, strictly speaking, congregation following in general the Rule of St. Benedict but distinct from the Black monks and not forming a part of the confederation of Benedictine congregations. The Sylvestrines were founded by St. Sylvester Gozzolini on Monte Fano near Fabriano in 1231. The Rule of St. Benedict was observed in its primitive form, but in many points the founder went considerably beyond it in point of austerity, laying special stress on the strictest observance of poverty. At the death of St. Sylvester in 1267 eleven monasteries were under his leadership of which some had been founded by him, while others, though of older foundation, had adopted his institute. The congregation had been formally sanctioned by Innocent IV twenty years before the founder's death. Except for a few houses in Portugal and Brazil and the Ceylon foundation mentioned below, there have been no Sylvestrine monasteries outside Italy. Under St. Sylvester's immediate successors in the generalship, Giuseppe della Serra San Quirico (d. 1258), Blessed Bartolomeo di Cingoli (d. 1298), and Andrea Giacomo di Fabriano, the biographer of the founder, a number of houses were founded in the March of Ancona, Tuscany, and Umbria. Since 1568 the congregation has possessed at Rome the Church of San Stefano del Cacco in the neighbourhood of the Pantheon; the first possession of the Sylvestrines in Rome was the Church of San Giacomo in Settimania (or alla Lungara), granted to St. Sylvester himself by the Chapter of St. Peter's.

At the present day, besides the Roman monastery at San Stefano, which is the residence of the abbot-general and counts as the mother-house of the order, the Sylvestrines have monasteries at Fabriano, Sasso Ferrato, Perugia, Osimo, Serra San Quirico, and Matelica. Since 1855 they have also had a large mission in Ceylon with its headquarters in the Abbey of Saint Antony at Kandy. At the present day (1911) the congregation numbers some 100 members, of whom about 70 are choir monks; of the total about 40 are in Ceylon. The chief Sylvestrine saints are: the founder, St. Bonfilius, Bl. Giovanni del Bastonne, and the Bl. Giuseppe and Ugo di Serra San Quirico. The congregation is governed by an abbot-general assisted by a vicar; the head of each monastery is a prior or titular abbot. These officials were formerly elected for life, they were made triennial by Paul II in 1543, but since 1690 have been elected every four years. The Constitutions are still those which were confirmed by Alexander VIII in 1690 after the severance of the short-lived union between the Sylvestrine and Vallumbrosan orders (1662–80). The Sylvestrine habit is similar in form to that of the Cassinese Benedictines but blue in colour; fasts are strictly observed and flesh meat is never eaten except in case of illness. A convent of Sylvestrine nuns was founded at Serra San Quirico during the lifetime of the founder, but the only convent now under Sylvestrine rule is that of San Benedetto in Perugia. The arms of the order are three green hills on a blue ground, surmounted by a golden crozier with two rose branches in flower at its side.

There is no satisfactory history of the order. The above is taken from Heimbucher, *Orden u. Kongregationen*, I (2nd ed., Paderborn, 1907); Hélyot, *Histoire des ordres monastiques*, VI (Paris, 1859); Fabrini, *Breve Cronica della Congregazione de' Monachi Silvestrini* (Rome, 1706); *Costituzioni della Congregazione di S. Benedetto di Monte Fano* (Camerino, 1610; Rome, 1690).

Sylvius, Francis, theologian, b. at Braine-le-Comte, Hainault, Belgium, 1581; d. at Douai, 22 Feb., 1649. He was remarkable from an early age for his love of study and his piety. After completing his humanities at Mons, he studied philosophy at Louvain and theology at Douai, in a seminary founded by the bishops of the Province of Cambrai in connexion with the faculty of theology. While studying theology he taught philosophy at the royal college. On 9 Nov., 1610, he was made doctor of theology with the highest honours. The faculty of theology wished to retain this promising scholar, but there was no chair vacant. An eminent professor, Barthélemy Pierre de Lintra, resigned his position in favour of Sylvius, but, upon the death of Estius (20 Sept., 1613), the great light of the University of Douai, Sylvius succeeded him and later was called to direct the episcopal seminary in which he had been a student. He was appointed (1 Feb., 1618) canon of the collegiate Church of St. Amat, and finally dean (28 Jan., 1622), and to this title was added that of vice-chancellor of the university. Henceforth, absorbed by study and the discharge of his duties, his life was tranquil and undisturbed for thirty years until his death. He was buried in the choir of the Church of St. Amat, and an epitaph engraved on his tomb recalled, with his titles and qualities, his attachment to St. Augustine and St. Thomas as a faithful disciple of one and a lucid interpreter of the other, also his liberality towards the poor and religious, whom he made his heirs.

To his piety and austerity, which were admirable, he united an unchangeable attachment to sound doctrines. At the commencement of his works, as at the beginning of his lectures, he never failed to profess his intention to remain always united to the Faith, and submissive to the authority of the Roman Church. When in 1648 the theologians of Louvain sought to win the University of Douai over to Jansenism, Sylvius opposed them vigorously; but throughout the controversy he preserved the moderation and sweetness of his character; always refraining from angry responses to the attacks of his opponents. He gained his reputation as a theologian chiefly through his commentary on the "Summa" of St. Thomas Aquinas. With that of Cajetan it ranks among the best, and many even prefer it on account of its clearness and fullness; besides, Sylvius wrote after the Council of Trent, and profited by its decisions. It contained four folio volumes, which he was prevailed upon to publish. He wrote also several treatises on dogmatic theology and controversy, and some on moral theology. Among his other works may be mentioned: (1) an edition with valuable notes, of Binsfeld's "Enchiridion theologiæ pastoralis", which had great success in Belgium and France, where it was the first manual of theology used by seminarians; (2) resolutions of cases of conscience, in which he showed himself a Probabilist, moderate, solid, and clear. He wrote also commentaries on Genesis, Exodus, Leviticus, and Numbers, the learning, conciseness, and penetration of which were praised by Calmet. He adapted the "Instructions" of St. Charles Borromeo for use of the Church in Belgium, and he made additions to the "Summa Conciliorum" of Carranza. His complete works were published by Père Norbert d'Elbecque at Antwerp in 1698, in six folio volumes, the first of which contains the life of Sylvius. This edition was reproduced at Venice in 1726; it is the best, though the editor omitted the works of Sylvius against Jansenism.

Antoine Degert.

Symbolism may for our present purpose be defined to be the investing of outward things or actions with an inner meaning, more especially for the expression of religious ideas. In a greater or less degree symbolism is essential, to every kind of external worship and we need not shrink from the conclusion that in the matter of baptisms and washings, of genuflexions and other acts of reverence, of lights and sweet smelling incense, of flowers and white vestures, of unctions and the imposing of hands, of sacrifice and the rite of the communion banquet, the Church has borrowed, without hesitation, from the common stock of significant actions known to all periods and to all nations. In such matters as these Christianity claims no monopoly. Religious symbolism is effective precisely in the measure in which it is sufficiently natural and simple to appeal to the intelligence of the people. Hence the choice of suitable acts and objects for this symbolism is not so wide that it would be easy to avoid the appearance of an imitation of paganism even if one deliberately set to work to invent an entirely new ritual.

In any case the Old Testament, and more particularly the religious worship of the Old Testament, is full of symbolism. However literal may be our interpretation of the early chapters of Genesis, we cannot fail to recognize the symbolic element which pervades them. When we read for example how "God created man to his own image", or how He "formed man of the slime of the earth and breathed into his face the breath of life", we can hardly doubt that it was upon the underlying moral lesson rather than upon the material fact suggested by the words that the attention of the writer was concentrated. Still more clearly the words "sitteth at the right hand of God the Father Almighty", by which the Creed recalls the language of Psalm cix, 1, or the whole purport of such a writing as the Canticle of Canticles (q. v.), compels a symbolical interpretation. But it is in the details of worship that the tendency is most apparent. In prayer we constantly find the spreading out of the palms of the hands (see Ex., ix, 29, 33; III Kings, viii, 22, 38, 54; Job, xi, 13; etc.), clearly emphasizing the idea that the worshipper comes forward as a suppliant expectant of good gifts. In the act of blessing the hand is laid upon the head of the recipient or at least is stretched towards him (Gen., xlviii, 14; Lev., ix, 22; IV Kings, xiii, 16; etc.) with the suggestion that virtue passes out to the person so blessed. The rite of circumcision is to be performed in memory of the covenant between God and Abraham (Gen., xvii, 11), and all the Jewish festivals beginning with the Pasch are similarly commemorative of God's mercies to His people. So again of the loaves of proposition (Lev., xxiv, 5 sq.) we are told, "Thou shalt put upon them the clearest frankincense, that the bread may be for a memorial of the oblation of the Lord". Although nothing more is said as to the precise significance of this offering which was to remain from sabbath day to sabbath day in the Holy of Holies, it is clear that it could have served no utilitarian purpose and that its object was purely symbolical. Again the same may be said of the whole sacrificial ritual of the Old Testament, and in the case of the incense the words of Ps. cxl, 2, "let my prayer be directed as incense in thy sight; the lifting up of my hands, as evening sacrifice" (cf. Apoc., v, 8; viii, 3), seem sufficiently to declare what was the spiritual meaning underlying the outward sign. In any case the atmosphere of mystery which surrounded the ark of the covenant and later on the Temple and all the adjuncts of its imposing worship must have been a fertile soil for the growth of a teaching rich in symbolic interpretations. These things clearly suggested inquiry into their hidden significance and if the meaning were not in itself obvious, we may be assured from the genius of the people as manifested in the later Talmud that an explanation would readily be evolved to meet the case.

Coming now to Christian times the conditions of self-effacement and frequently recurring persecution under which the faithful lived in the first ages of the Church must have helped much to develop any tendencies towards a symbolistic treatment of religious truths which they had derived from Judaism. In point of fact the life of the Catacombs and the Discipline of the Secret (q. v.), which partly grew out of it, necessitated a veiling of Christian beliefs under types and figures. Moreover, so far as regards any graphic presentment of these mysteries in sculpture and painting, it seems intrinsically probable that the faithful deliberately availed themselves of such symbols as would not attract too much attention, and that consequently they gave the preference to representations which had some pagan analogue. In the earlier period no representations of the Crucifixion are found, and hardly any of the cross, at least in a large and conspicuous form; neither are the episodes of Christ's life commonly depicted realistically and historically, but only conventionally. But the type of the Good Shepherd carrying the sheep on his shoulders occurs frequently, and this preference may well be due to its resemblance to the pagan figures of Hermes Kriophorus or Aristæus, which at this period were much in vogue. The Christian understood clearly the reference to the loving self-sacrifice of Our Saviour, but pagan curiosity was not aroused by anything startling and unwonted. Again the banquet scenes with fish and bread (see EUCHARIST, EARLY SYMBOLS OF THE), which spoke so eloquently to the faithful of Holy Communion and the marriage supper of the blessed in heaven, seemed to the Roman of the second and third century, who paid homage to the dead with banquets as well as sacrifices, a perfectly natural decoration for a funeral chamber. Even the fable of Orpheus was borrowed pictorially and referred to Christ. Similarly the story of Eros and Psyche was revived and Christianized, serving to remind the believer of the resurrection of the body and the eternal beatitude of heaven. The group of the Twelve Apostles probably attracted the less attention because the twelve *Dii Majores* were often also grouped together. Again the figure of the *Orans* (q. v.), the woman with arms uplifted in prayer, was quite familiar to classical antiquity. Though the precise significance attached to it as it is found in the catacombs is in dispute, it was clearly designed to awaken some spiritual idea in the minds of the initiated. Similarly the fish symbol (see FISH, SYMBOLISM OF THE), representing Christ, the anchor of hope, the palm of victory, were all sufficiently familiar as emblems among pagans to excite no particular attention. Hence even in the case of an inscription which breathes so unmistakably the atmosphere of early Christian symbolism as the epitaph of Abercius (q. v.) with its allusions to the Fish (Christ) in the Eucharist, the shining seal (baptism), the chaste shepherd (Christ), etc., it has been possible for writers like Ficker to deny its Christian significance though in defiance of all probability as Zahn, Duchesne, and many other writers have shown. From whatever cause it arose the strong symbolistic colouring of religious practice during the first ages of Christianity is disputed by hardly anyone, and it was manifestly in harmony with the allegorical tone of the Apocalypse, of the Pastor of Hermas, and of other early apocryphal writings. Further it is certain that the tradition thus created only deepened and spread throughout both the early and the later Middle Ages. The tendency seems to have been particularly fostered by the allegorical exegesis of the theologians of Alexandria which the writings of St. Jerome and St. Gregory the Great helped to make familiar to western Europe. The works of Isidore of Seville and of St. Bede helped in the same direction. Neither must the so-called "Clavis" attributed to St. Melito of Sardis be left out of account. There is certainly no sufficient reason to identify it with the genuine work of St. Melito which bore a corresponding name, but the Clavis gathered up a variety of symbolical interpretations current in St. Augustine and the Fathers, and it seems to be of fairly early date (cf., however, Rotmanner in "Theol. Quartalschrift", 1896, lxxviii, 614–29).

With regard to the early ritual of the Church, the part that symbolism plays in all connected with the sacraments need not be insisted on. The outward sign of the sacrament was itself symbolical. But there was much more than this. In the case of baptism, for instance, nearly all the ceremonial is of very early date. The exorcism of Satan by blowing or breathing, the giving of salt (*sal sapientiæ*), the rite of the *Ephpheta*, and the use of spittle, imitating the action of Our Lord in some of His miracles, the ancient practice of turning to the West when renouncing

Satan but of facing eastwards in making the profession of faith, the white robe or *chrysom* bestowed as an emblem of innocence, the lighted candle typical of the illumination of faith (hence the baptized were early called φωτισθέντες, i. e. the illuminated), and finally the curious custom of giving milk and honey to the newly-baptized infant are all in the highest degree symbolical. In confirmation we have the marking of the Sign of the Cross upon the brow and the use of oil representing the fatness and abundance of grace. The blow upon the cheek, significant of the warfare in which the resolute Christian is engaged, is of much later date and probably imitated from the sword blow by which the young Teutonic warrior was dubbed a knight. The laying of the hand upon the penitent's head, which was practised almost everywhere during the Middle Ages when absolution was given, no doubt symbolized the imparting of grace, as the imposition of hands undoubtedly does in the Sacrament of Orders. Even in the ritual of matrimony such a pagan practice as the giving of the espousal ring, which was probably in the beginning part of the *arrhæ*, was invested at a later period with the mystic meanings of perpetuity and fidelity.

That much of the symbolism which is found in the medieval liturgists was invented *ex post facto* cannot be doubted. We may readily allow that the greater part of the ceremonial practices now adopted by the Church were utilitarian in their origin. For example, the priest washed his hands before the Preface because he had been using the thurible or at least taking up the offerings of the faithful; it was not until later that this act was connected by the liturgist with spiritual purification or even with the hand-washing of Pilate. At the same time it is possible to exaggerate the utilitarian explanation, and the liturgist Claude de Vert, who laid so much stress upon this aspect of the matter, in some instances went too far. For example, de Vert held that the candle given to the newly-baptized was only meant to help them to find their way back from the baptistery to the sanctuary in the darkness of the Easter vigil. But the very early use of the above-mentioned term φωτισθεὶς (illuminated) for a baptized person shows the extravagance of this explanation and, as Le Brun sagely pointed out, the catechumens would have needed candles as much to find their way to the baptistery as to return from it. Whether de Vert was wrong in maintaining that the extinction of the Tenebræ candles one by one had originally no symbolical reference to the abandonment of Christ by His disciples but was simply due to the fact that fewer candles were needed as dawn approached and the office drew to an end, or again in his contention that the noise made at the end of Tenebræ had no reference to the earthquake on Calvary but was simply the signal for departure given by the celebrant after an interval of silent prayer, may like many other familiar problems be left an open question.

It is perhaps most of all in the matter of liturgical vestments that the tendency to attach symbolical meanings to usages originally adopted for some simple and practical purpose shows itself most conspicuously. The prayers recited by the celebrant in assuming these attributes a mystical significance to each, thus the chasuble which covers all denotes charity, and the girdle self-restraint and continence, while medieval liturgists have devised many more; but modern authorities are agreed that in hardly any case has a vestment been adopted in the Church for mystical reasons. The amice, for example, was simply a cloth used like a modern collar to protect the rich chasuble or tunic from contact with the skin. It was only afterwards that the priest was bidden to regard it as a "helmet of salvation to overthrow the assaults of the evil one". And the same holds true of all the rest. Of the pallium, a white woollen band encircling the neck and hanging before and behind, it can at least be said that from the time of St. Gregory the Great it has been sent by the pope to archbishops with the distinctly expressed purpose of symbolizing the archiepiscopal jurisdiction conferred upon them, a purpose for which it is expressly blessed and laid "upon the body of Blessed Peter" in the "confession" of the great Roman basilica" (see TENEBRAE).

In any account of Christian symbolism an important place must always be given to the Church, and that whether the institution or the material building is regarded. It is considered by some that the veiled *Orans*, already spoken of, which appears so frequently in the catacombs represents the Church (see the Pastor of Hermas, iii, 3, 10, and compare the term Virgin Mother παρθένος μήτηρ used of the Church in the second century; Eusebius, "Hist. Eccl.", V, i, 43). This is not certain, but the Church in early mosaics is undoubtedly often personified, as indeed we should expect from the early and widely-read visions contained in the Pastor of Hermas (see HERMAS), and sometimes we find not one, but two, contrasted figures representing respectively the Church of the Gentiles and the Church of the Circumcision. The contrast is also presented to us in the form of two towns set over against each other and duly labelled Bethlehem and Jerusalem, or even more frequently in the confronting portraits of St. Paul and St. Peter. At a later date also, beginning early in the Middle Ages, we repeatedly find two contrasted types, but here representing the Church and the Synagogue. The Church is a crowned and often sceptred figure with a chalice emblematic of her sacramental system. The Synagogue, on the other hand, has lost her crown, her staff is broken, and her attitude betokens defeat. These figures are constantly to be found on either side of early medieval representations of the Crucifixion. Here there is plain opposition between the two types (see Sauer, "Symbolik", p. 247), whereas in early Christian imagery the Church of the Circumcision and the Church of the Gentiles are depicted as constitutive parts of the one Kingdom of God upon earth. This example shows that continuity between primitive and medieval symbolism must not always be assumed, though in many cases we can securely trace back a type to its origins in the earliest ages.

Another early and accepted emblem of the Church was the ship. In the Apostolic Constitutions (II, xlvii) the bishop surrounded by the assembly of the faithful is compared to the helmsman of a ship; but the idea is as old as Tertullian (De bap., xii; P. L., I, 1214) and it was varied sometimes by comparing the Church to the Ark of Noe. In any case the ship was a recognized Christian symbol and Clement of Alexandria approved it for a signet ring. "Let the dove or the fish", he says, "the vessel flying before the wind,—or the marine anchor be our signets" (Pæd. III, ii; P. G., VIII, 633), and numerous representations of ships, sometimes serving as the design for a lamp, with the figure of Christ or St. Peter as helmsman are preserved to us. The name which we still retain for the "nave" (French, *nef*) of a church bears testimony to the persistence of the same idea. Moreover, from the spiritual Church, idealized as the heavenly Jerusalem, to the material edifice the transition was very easy. As early as the Pastor of Hermas the individual members of the Church were looked upon as the stones of which the spiritual building was fashioned, the thought being perpetuated to all time in the magnificent hymn "Cœlestis urbs Jerusalem". No wonder that the liturgists of the Middle Ages found no more fruitful theme than the interpretation of every detail in the fabric and ornamentation of their great cathedrals. Moreover, in this case undoubtedly there was action and reaction. Not only did the teachers set themselves to give mystical explanations of what already existed, but their spiritual conceptions influenced the generations that came after, and architects designed and built with the conscious purpose of rendering in stone the beautiful thoughts which had become to them as a new language. To begin with the church was "oriented", i. e. its chancel (apart from the Roman basilicas where the celebrant offered Mass facing the people) pointed to the East. Whether one is to recognize here the Christianization of a form of sun-worship, which some have traced to the influence of the emperor Constantine, or whether the faithful looked eastward to greet the coming of the "Sun of Justice", the "Orient from on high", certain it is that already in the Apostolic Constitutions of the fourth century (II, xlvii) the church was built to face the East. The practice lasted on throughout the Middle Ages. From this indication of the points of the compass it followed that the deacon in reading the Gospel turned himself sideways so [illegible] to proclaim the glad tidings to the barbarous races of the north. The great porch at the western end, on the other hand, faced the setting sun and led men's thoughts to the close of life. Hence it is that this became the conventional position for those magnificent sculptures or paintings of the last judgment found in many of our old cathedrals. With regard to the door itself there is frequently some significant scheme of decoration which emphasizes the idea that the door is Christ (*Ego sum ostium*, John, x, 7) and this is alone sufficient justification for the glorification of these portals, one, two, or three in number, often encased in great arches and crowded with stone carvings of angels and saints.

In such liturgical treatises [illegible] the "Rationale" of Durandus every detail in the construction of the church has a special significance assigned to it. The roof represents charity which covers a multitude of sins; the beams which tie the building together betoken the champions of ecclesiastical right who defend it with the sword; the vaulting signifies the preachers who bear up the dead weight of man's infirmity heavenwards; the columns and piers stand for the Apostles, bishops, and doctors; the pavement symbolizes the foundation of faith or the humility of the poor; and so on. In all this the mystical interpretation of numbers holds a great place. There are twelve consecration crosses, and this, besides a reference to the Twelve Apostles (in not a few instances each consecration cross is marked upon a shield borne by one of the Apostles), symbolizes the spiritualizing of human nature and of the world by faith, or, as others put it, it betokens the universal Church. The reason is that three, the number of the Blessed Trinity, figures the Divine nature, and four, the number of the elements, typifies the number of the material world. Twelve is the product of three and four, and it consequently betokens the penetration of matter with spirit. So again eight denotes perfection and completion, for the visible world was made in seven days and the invisible kingdom of grace follows upon that. In this way the octagonal shape was judged specially appropriate for the baptistery or for the font, on the ground that this initiation into the supernatural order of grace completed the work of creation. Naturally five recalls the wounds of Christ, and five grains of incense are inserted cross-wise in the Paschal Candle, while ten, the number of the Commandments, is typical of the Old Law. Seven again has its own very special attraction as the number of the sacraments, of the gifts of the Holy Ghost, of the virtues and vices, and many other things. There can be little doubt that much of this symbolism of numbers is to be traced back to Egypt and Assyria, where the movements of the seven planets, as men then counted them, were continuously studied and where the elements of three and four into which seven was divided lent themselves to other combinations also regarded as peculiarly sacred, for example the number sixty, the product of three, four, and five.

Of isolated pieces of symbolism of various kinds medieval art and literature are full. The early monogram of Christ, sometimes spoken of as the *chirho*, as it is a combination of these two letters X P, thus ☧ or ⳩, sometimes again as the *labarum* and in French as the *chrisme*, has been discussed under Cross (IV, 522). Another Christ emblem (besides Fish, treated in a separate article) was the lamb, often associated with a flag. This actually took the place of the figure of Our Saviour, and it was represented in combination with the cross instead of the human form, being sometimes even surrounded by a cruciform nimbus. As there seemed a danger of the Sacred Humanity being lost in allegory, the Council, "In Trullo", at Constantinople (691) decreed that the lamb in future should not be used in this way, but that the figure of Christ should be substituted. As for the first Person of the Blessed Trinity the earliest symbolical representation seems to be found in the Divine hand which is often seen extended from the clouds in early representations of the baptism of Our Saviour and of other operations of grace.

It is hardly needful to add that a vast chapter in the history of symbolism is supplied by the saints and their emblems. Almost everyone of the more familiar saints has some emblem, often more than one, by the presence of which his identity is made known. The gridiron of St. Lawrence, the scallop shell of St. James, the special cross of St. Andrew, the lion of St. Jerome etc. might be quoted in illustration, but often also there are emblems common to a whole group of saints, the palm branch, for example being in general indicative of a martyr, and the deacons being nearly always represented in their dalmatics. For the Evangelists there have been used from very early times certain conventional emblems—a winged man or an angel for St. Matthew, a winged lion for St. Mark, a winged calf for St. Luke, and an eagle for St. John. All these are taken from the description of the heavenly liturgy in Apoc., iv, v, and must have been suggested by the vision of Ezechiel (Ezech., i, 10). In the art of the early Middle Ages these emblems play a very prominent part. Other forms of symbolism are of much later development, for example the type which as been called "the Eucharistic Ecce Homo" representing Our Saviour with the sacred wounds, divested of his garments and standing in the tomb, not dead but living. In the paintings, etc., known as the Mass of St. Gregory which were popular in the fifteenth and sixteenth centuries, Our Lord is generally depicted in this way. Again Our Lady of the Seven Dolours, with the seven swords piercing her heart, is a type of comparatively late occurrence, and this of course is still more true of the pictures connected with the Sacred Heart. The monogram, I. H. S. surrounded by rays, which, from the fact that it was much used by the early Jesuits, has sometimes been supposed to be the peculiar device of the Society of Jesus, really owes its popularity to the preaching of St. Bernardine of Siena (q. v.) at the beginning of the fifteenth century. It represents the Holy Name written in a Greek abbreviated form and had originally nothing to do with *Iesus Hominum, Salvator*.

For another section of symbolism which is concerned with the mystical significance attached to the representations of animals, the reader is referred to the article Bestiaries.

An excellent compendium of the whole subject is that of Jenner, *Christian Symbolism* (London, 1910); a fuller treatise is supplied by Sauer, *Symbolik des Kirchengebaudes* (Freiburg, 1902), which concerns itself chiefly with architecture. The same is true of Kreuser, *Christliche Kirchenbau* (Brixen, 1868–9). Auber, *Hist. et théorie du symbolisme réligieux* (4 vols., Paris, 1874), is very diffuse. Nieuwbarn, *Het roomsche Kergebouw* (tr. Nymwegen, 1908), is too slight and sketchy. For the later Middle Ages and for France in particular there are the two admirable books of Male, *L'art rélig. de la fin du moyen-âge* (Paris, 1908), and *L'art religieux du XIII^e siècle en France* (3rd ed., Paris, 1910). See also Allen, *Early Christian Symbolism in Great Britain and Ireland* (London, 1887); Huysmans, *La Cathédrale*

(Paris, 1898). Regarding the liturgy see: THALHOFER, *Liturgik* (Freiburg, 1883); FRERE, *Principles of Religious Ceremonial* (London, 1906); HULME, *Symbolism in Christian Art* (London, 1899). On the emblems of the saints see: CAHIER, *Caractéristiques des saints* (Paris, 1887); DETZEL, *Christliche Ikonographie* (Freiburg, 1894); PFLEIDERER, *Die Attributen der Heiligen* (Ulm, 1898); RADOWITZ, *The Saints in Art* (Rome, 1898); JAMESON, *Sacred and Legendary Art* (London, 1848), and other works; GREENE, *Saints and Their Symbols* (London, 1904). The great storehouse of medieval symbolism is the *Rationale divinorum officiorum* of DURANDUS (modern ed., Naples, 1859), parts of which have been translated (Leeds, 1843, and London, 1899).

HERBERT THURSTON.

Symeon Stylites, SAINT. See SIMEON.

Symmachus, SAINT, POPE (498–514), date of birth unknown; d. 19 July, 514. According to the "Liber pontificalis" (ed. Duchesne, I, 260) he was a native of Sardinia and his father was named Fortunatus. Symmachus was baptized at Rome (Thiel, "Epist. pont. rom.", I, 702), entered the ranks of the clergy of Rome, and was ordained deacon. Directly after the death of Pope Anastasius II, Symmachus was elected his successor by a majority of the Roman clergy at the Lateran Basilica on 22 November, 498. The election was approved by a part of the Roman Senate and he was at once consecrated Bishop of Rome. Later on the same day a minority of the clergy who were friendly to the Byzantines and were supported by a party in the Senate met in the Basilica of Santa Maria Maggiore and elected the Roman archpresbyter Laurentius as antipope. According to Theodorus Lector (P. G., LXXXVI, 193), the Laurentian party was aided with money supplied chiefly by the rich Senator Festus, who hoped that Laurentius would be influenced by this to sign the "Henotikon", the edict of faith of the Emperor Zeno. The other authorities do not speak of such motives, which are very probable, and the testimony of Theodorus can very readily be accepted. Both parties, however, agreed that the two candidates should appear at Ravenna before the Gothic king Theodoric, the ruler of Italy, and abide by his decision. Theodoric pronouncing in favour of Symmachus on the ground that he was elected first and by the majority of the clergy, Laurentius submitted to the decision. At a synod held at Rome on 1 March, 499, the Acts of which have been preserved, Symmachus, who was now universally acknowledged, bestowed on Laurentius the Diocese of Nocera in Campania. The synod ordained that any Roman cleric who sought to gain votes for a successor to the papacy during the lifetime of the pope, or who called conferences and held consultations for that purpose, should be deposed. King Theodoric was given a vote of thanks by acclamation for his unpartizan decision. When the king came to Rome in the following year he had a brilliant reception both from the pope and the people. However, the Byzantine party, headed by the two senators Festus and Probinus, did not abandon its hostility and hope of overthrowing the pope and gaining the papal see for Laurentius. The opportunity occurred in the following year, 501. Pope Symmachus celebrated Easter on 25 March, following the old Roman cycle, while the Byzantines and others observed the feast on 22 April, according to a new reckoning. The Laurentian party appealed to King Theodoric against the pope, making other accusations besides this digression in the celebration of Easter. Theodoric summoned the pope and Symmachus set out to meet him. At Rimini Symmachus learned the contents of the indictment and, refusing to acknowledge the king as his judge, returned home. The opposing party now accused him of squandering the property of the Church and other matters. It gained in strength and occupied the Lateran palace, so that the pope was obliged to live near the Church of St. Peter outside the city walls. His opponents requested the king to call a synod for the investigation of the accusations and to appoint a visitor for Rome. Symmachus agreed to the calling of a synod, but he and his adherents protested against the sending of a visitor. Theodoric, however, sent as visitor Bishop Peter of Altinum in upper Italy, who was to administer the Roman Church in the place of the accused pope. Peter came to Rome and, contrary to the commands of the king, allowed himself to be won over by the adherents of Laurentius, so that Theodoric at a later date dismissed him. Not long after Easter, between May and July, 502, the synod met in the basilica of Julius (Santa Maria in Trastevere). The pope declared before the synod that it had been called with his consent and that he was ready to answer the accusations before it, if the visitor were removed and he were re-established as the administrator of the Church. To this the majority of the bishops agreed and sent an embassy to the king to demand the execution of these conditions. Theodoric, however, refused, and demanded, first of all, an investigation of the accusations against the pope. A second session of the synod was held, therefore, on 1 September, 502, in the Sessorian basilica (Santa Croce in Gerusalemme), and the minority had the indictment made by the Laurentian party read aloud. Symmachus desired to go from St. Peter's to the synod in order to defend himself, but on the way there he was attacked by his opponents and maltreated, and, escaping only with great difficulty, returned to St. Peter's; several priests who were with him were killed or severely wounded. The Goths sent by Theodoric promised him a reliable escort but the pope now refused to appear before the synod, although invited three times. Consequently the assembled bishops declared at the third session, held about the middle of September, they could not pass judgment upon the pope, because he had appeared twice before his judges, and because there was no precedent showing that an occupant of the Roman See had been subjected to the judgment of other bishops. They called upon the opposing clergy to submit to the pope, and requested the king to permit the bishops to return to their dioceses. All these steps were in vain; the majority of the clergy and people sided indeed with Symmachus, but a minority of the clergy and a majority of the Senators were at that time partizans of Laurentius. A fourth session, therefore, was held on 23 October, 502, called the "Synodus Palmaris" (Palmary synod) either from the place where it was held (*ad Palmata, Palma*), or because it was the most important session (*palmaris*). At this session it was decided that on account of the reasons given earlier the decision must be left to the judgment of God; Symmachus was to be regarded as free from all the crimes of which he was accused, and therefore entitled to the full exercise of his episcopal office; the whole property of the Church was to be transferred to him; whoever returned to his obedience should escape punishment, but whoever undertook ecclesiastical functions at Rome without papal permission was to be regarded as a schismatic. The decision was signed by seventy-five bishops, among them the bishops of Milan and Ravenna. Many bishops now returned to their dioceses. The majority, however, met with the Roman priests in St. Peter's for a fifth session under the presidency of Symmachus on 6 November, 502. The edict issued by the prefect Basilius, in 483, regulating the administration of the possessions of the Church was declared invalid and Symmachus issued a new edict respecting the administration of this property, and especially in regard to its sale.

King Theodoric, not satisfied with the decision of the synod, although the great majority of the Italian episcopate was on the side of the rightful pope, did nothing to carry out the new ordinances. Consequently the opposition called its candidate Laurentius again to Rome. He resided in the Lateran palace, which was in the hands of his adherents, while Symmachus retained the house of the bishop (*episcopium*) near St. Peter's. The division continued for four years, during which both parties carried on a furious quarrel at Rome. Laurentius had his portrait added to the series of popes in the Church of Saint Paul Without the Walls. However, certain prominent persons exerted their influence in favour of Symmachus, as Bishop Avitus of Vienne, who, at the request of the Gallican bishops, addressed an urgent letter to the Senate on behalf of the rightful pope and for the restoration of unity. Symmachus gradually won over a number of the adherents of the opposition. The greatest factor in the healing of the schism was the interposition of Deacon Dioscurus of Alexandria, who had come to Rome. He was commissioned by Symmachus to go to Theodoric, and won the king over to the side of the rightful pope. Apparently political motives were involved, as the king wished to take action against the Laurentian party, which inclined to Constantinople. He commanded Senator Festus, the head of the hostile party, to return all Roman churches to Symmachus. Laurentius having lost many adherents among the senators the king's command was executed without difficulty. The antipope, obliged to leave Rome, retired to a farm belonging to his protector Festus. Only a small party still held to Laurentius and refused to recognize Symmachus as Bishop of Rome; but it was insignificant and was reconciled later to Hormisdas, the successor of Symmachus. During the schism a number of polemical writings appeared, as from the party of Laurentius the treatise "Contra Synodum absolutionis incongruæ", to which Deacon Ennodius replied in "Libellus adversus eos qui contra Synodum scribere præsumpserunt" ("Mon. Germ. Hist.: Auct. ant.", VII, 48 sq.). While the author of the life of Symmachus in the completely preserved text of the "Liber pontificalis" is very favourable to this pope, the writer of another continuation of the papal biographies supports the cause of Laurentius ("Fragment Laurentien", ed. Duchesne in "Liber pontificalis", I, 44–46). During the dispute the adherents of Symmachus drew up four apocryphal writings called the "Symmachian Forgeries"; these were: "Gesta synodi Sinuessanæ de Marcellino"; "Constitutum Silvestri"; "Gesta Liberii"; "Gesta de purgatione Xysti et Polychronii accusatione". These four works are to be found in Coustant, "Epist. rom. pontif." (Paris, 1721), appendix, 29 sq.; cf. Duchesne, "Liber pontificalis", I, introduction, CXXXIII sq.: "Histoire littéraire des apocryphes symmachiens". The object of these forgeries was to produce alleged instances from earlier times to support the whole procedure of the adherents of Symmachus, and, in particular, the position that the Roman bishop could not be judged by any court composed of other bishops. Still these forgeries are not the first documents to maintain this latter tenet.

Symmachus zealously defended the supporters of orthodoxy during the disorders of the Acacian schism. He defends, although without success, the opponents of the "Henotikon" in a letter to Emperor Anastasius I (491–518). At a later date many of the persecuted Oriental bishops addressed themselves to the pope to whom they sent a confession of faith. Shortly after 506 the emperor sent him a letter full of invectives, to which the pope sent a firm answer, maintaining forcibly the rights and liberty of the Church (Thiel, "Epist. rom. pont.", I, 700 sq.) In a letter of 8 October, 512, addressed to the bishops of Illyria, the pope warned the clergy of that province not to hold communion with heretics. Soon after the beginning of his pontificate Symmachus interposed in the quarrel between the Archbishops of Arles and Vienne as to the boundaries of their respective territories. He annulled the edict issued by Anastasius II in favour of the Archbishop of Vienne and later (6 November, 513) confirmed the metropolitan rights of Archbishop Cæsarius of Arles, as these had been fixed by Leo I. Moreover, he granted Cæsarius the privilege of wearing the pallium, the first-known instance of such a grant by the Holy See to a bishop outside of Italy. In a letter of 11 June, 514, he appointed Cæsarius to represent the interests of the Church both in Gaul and Spain, to hold synods of the bishops in certain cases, to give letters of recommendation to clergy who journeyed to Rome. More important matters were to be laid before the Holy See. In the city of Rome, according to the "Liber pontificalis", the pope took severe measures against the Manichæans, ordered the burning of their books, and expelled them from the city. He erected or restored and adorned various churches. Thus he built a Church of St. Andrew near St. Peter's, a Basilica of St. Agnes on the Via Aurelia, adorned the Church of St. Peter's, completely rebuilt the Basilica of Sts. Sylvester and Martinus, and made improvements over the Catacomb of the Jordani on the Via Salaria. He built episcopal houses (*episcopia*) to the right and left of the parvis of St. Peter's. These buildings were evidently connected with the residence of the pope for several years near St. Peter's during the disorders of the Laurentian schism. He also built asylums for the poor near the three churches of St. Peter, St. Paul, and St. Laurence that were outside the city walls. The pope contributed large sums for the support of the Catholic bishops of Africa who were persecuted by the rulers of the Arian Vandals. He also aided the inhabitants of the provinces of upper Italy who suffered so sorely from the invasion of the barbarians. After his death he was buried at St. Peter's. Symmachus is venerated in the Roman Church as a saint.

J. P. Kirsch.

Symmachus the Ebionite, author of one of the Greek versions of the Old Testament included by Origen in his Hexapla and Tetrapla. Some fragments of this version survive in what remains of the Hexapla. Symmachus also wrote "Commentaries", not extant, apparently to support the heresy of the Ebionites by attacking the Gospel of St. Matthew. "Origen states that he obtained these and other commentaries of Symmachus on the Scriptures from a certain Juliana, who, he says, inherited them from Symmachus himself" (Eusebius, "Hist. Eccl.", VI, xvii). Palladius (Hist. Laus., lxiv) found in a manuscript "very ancient and arranged in *stichoi*" the following entry made by Origen: "This book I found in the house of Juliana, the virgin in Cæsarea, when I was hiding there; who said she had received it from Symmachus himself the interpreter of the Jews". The date of Origen's stay with Juliana was probably 238–41, i. e. during the persecution of Maximin, but this tells us nothing about the date of Symmachus's version of the Scriptures which was known to Origen when he wrote (about 228) his earliest commentaries (see Swete, "Introd. to O. T. in Greek", p. 50). It used commonly to be accepted, on the supposed authority of St. Epiphanius (De mens. et pond., xvi), that Symmachus flourished in the age of Severus (193–211), but the text of Epiphanius is full of the wildest blunders. The Syriac translator who (as was first pointed out by Lagarde), had a less corrupt text before him, reads Verus not Severus, and explains a little later that by this emperor is meant Marcus Aurelius (161–80). All that can be said is that there is nothing improbable about this date. Epiphanius says further that Symmachus was a Samaritan who having quarrelled with his own people went over to Judaism, but all other ancient authorities are unanimous in making him an Ebionite. From the language of many writers who speak of Symmachus (Ambrosiaster, "Prol. in Ep. ad Galat"; Philastrius, lxiii; St. Augustine, "Contra Faust.", XIX, iv, xii), Symmachus must have been a man of great importance in his sect, if not the founder of a sect within a sect. His version of the Old Testament was largely used by St. Jerome, who twice speaks of two editions of it. As a translator he aimed at writing good Greek and not at the slavish literalness of Aquila. "Aquila et Symmachus et Theodotio . . . diversum pæne opus in eodem opere prodiderunt, alio nitente verbum de verbo exprimere, alio sensum potius sequi, tertio non multum a veteribus discrepare" (St. Jerome, "Prolog. in Euseb. Chronicon").

FRANCIS J. BACCHUS.

Symmachus Version. See VERSIONS OF THE BIBLE.

Symphorosa, SAINT, martyred with her seven sons at Tibur (Tivoli) towards the end of the reign of Emperor Hadrian (117-138). The story of their martyrdom is told in an old Passio, the reliability of which is seriously questioned by many modern hagiologists. According to this Passio, Symphorosa was a lady living at Tibur, the widow of the tribune, Getulius, who had previously been martyred by Emperor Hadrian at Gabii, now Torri, a town of the Sabines. When Hadrian had completed his costly palace at Tibur and began its dedication by offering sacrifices, he received the following response from the gods: "The widow Symphorosa and her sons torment us daily by invoking their God. If she and her sons offer sacrifice, we promise to give you all that you ask for." When all the emperor's attempts to induce Symphorosa and her sons to sacrifice to the gods were unsuccessful, he ordered her to be brought to the Temple of Hercules, where, after various tortures, she was thrown into the river (Anio), with a heavy rock fastened to her neck. Her brother Eugenius, who was a member of the council of Tibur, buried her in the outskirts of the city. The next day the emperor summoned her seven sons, and being equally unsuccessful in his attempts to make them sacrifice to the gods, he ordered them to be tied to seven stakes which had been erected for the purpose round the Temple of Hercules. Each of them suffered a different kind of martyrdom. Crescens was pierced through the throat, Julian through the breast, Nemesius through the heart, Primitivus was wounded at the navel, Justinus was pierced through the back, Stracteus (Stacteus, Estacteus) was wounded at the side, and Eugenius was cleft in two parts from top to bottom. Their bodies were thrown into a deep ditch at a place which the pagan priests afterwards called "Ad septem Biothanatos". (The Greek word βιοϑάνατος, or rather βιαιοϑάνατος, was employed for self-murderers and, by the pagans, applied to Christians who suffered martyrdom). Hereupon the persecution ceased for one year and six months, during which period the bodies of the martyrs were buried on the Via Tiburtina, eight or nine miles from Rome.

It is difficult to ascertain how much reliability these Acts possess. The opinion that they were written by Julius Africanus (third century) has been almost universally rejected, since neither Eusebius nor any other historian of that period makes the least allusion to any Acts of Roman or Italian martyrs composed by this African writer. The "Hieronymian Martyrology", which was compiled by an unknown author in the second half of the fifth century, commemorates St. Symphorosa and her sons on 18 July, but here the names of her sons are entirely different from those given in the Acts. One of the manuscripts (codex Bernensis) of this martyrology states that the Acts of these martyrs are extant: "quorum gesta habentur" ("Martyrologium Hieronymianum", edited by De Rossi and Duchesne in Acta SS. Novembris II, I, 93). Since here the names of Symphorosa's sons are different from those of the Acts which we possess, there must have existed some other "Gesta" to which the author of the martyrology refers. In the same martyrology, on 27 June, are commemorated seven brother-martyrs, whose names are identical with those which our Acts assign to the sons of Symphorosa. It is probable that the author of the Acts, guided by the tradition that Symphorosa had seven sons who were martyred, made her the mother of the seven martyrs, whom he found mentioned in the martyrology on 27 June. If this is the case, we may infer, provided Symphorosa had seven sons at all, that their names were not those mentioned in the Acts. Whether they were those assigned to them in the "Hieronymian Martyrology," will also remain doubtful as long as we have no certainty that the "Gesta" to which the author refers are authentic. Some hagiologists consider the seven sons of Symphorosa, like those of Felicitas (q. v.), a mere adaptation of the seven sons of the Maccabean Mother. In the seventeenth century, Bosio discovered the ruins of a basilica at the place popularly called "le sette fratte" (the seven brothers), on the Via Tiburtina, nine miles from Rome. (Bosio, "Roma Sotteranea", 105-9). The Acts and the "Hieronymian Martyrology" agree in designating this spot as the tomb of Symphorosa and her sons. Further discoveries, that leave no room for doubt that the basilica was built over their tomb, were made by Stevenson. The remains were transferred to the Church of S. Angelo is Pescaria at Rome by Stephen (II) III in 752. A sarcophagus was found here in 1610, bearing the inscription: "Hic requiescunt corpora SS. Martyrum Simforosæ, viri sui Zotici (Getulii) et Filiorum ejus a Stephano Papa translata." The Diocese of Tivoli honours them as patrons and the whole Church celebrates their feast 18 July.

Sympson. RICHARD, VENERABLE. See GARLICK, NICHOLAS, VENERABLE.

Synagogue, the place of assemblage of the Jews. This article will treat of the name, origin, history, organization, liturgy and building of the synagogue.

I. NAME.—The Greek συναγωγή, whence the Latin *synagoga*, French *synagogue*, and English synagogue, means a meeting, an assembly; and is used by the Septuagint to translate the Hebrew עדה. The Aramaic translation is כנשׁתא (cf. Arabic *Kanîsah*, a church) to which is akin the New Hebrew כנסת. The place of assemblage was termed in New Hebrew, בית הכנסת, meeting-house, i. e., οἶκος συναγωγῆς. In the course of time, the single word synagogue came to mean not only the meeting but the meeting-house, the teaching thereof and, in the broadest sense, the body politic of the Jews. This broad sense of the word synagogue is seen in John's use of ʾαποσυναγωγός, "excommunicated" or "put out of the synagogue" (cf. ix, 22; xii, 42; xvi, 2). Another Greek name for synagogue in use among Hellenistic Jews, is προσευχή shortened after the analogy of συναγωγή, from οἶκος προσευχῆς, *house of prayer* (cf. Philo, "In Flacc.", §§6.7; "Ad Gaium", §§20.23.43). This phrase is in the Septuagint translation of Isaias (lvi, 7): "My house shall be called the *house of prayer* [בית תפלה] for all nations." The Latinized proseucha of Juvenal (Sat., III, 296) means the Jewish house of prayer or synagogue. Josephus (Antiq., XVI, vi, 2) cites an edict of Augustus which calls the Synagogue σαββατεῖον, the *Sabbath-house.*

II. Origin.—Obscurity enshrouds the first beginnings of the synagogue. The Jerusalem Talmud (in Ex., xviii, 20) dates it from the time of Moses; so, too, the tradition of the Alexandrian Jews, according to the witness of Philo, "De Vita Mosis" (III, 27) and Josephus, "Contra Apion." (II, 17). This rabbinical tradition is not reliable. It was probably during the Babylonian captivity that the synagogue became a national feature of Hebrew worship. Afar from their Temple, the exiled Jews gathered into local meeting-houses for public worship. Sacrifice was denied them; prayer in common was not. The longer their exile from the national altar of sacrifice, the greater became their need of houses of prayer; this need was met by an ever-increasing number of synagogues, scattered throughout the land of exile. From Babylonia this national system of synagogue worship was brought to Jerusalem. That the synagogue dates many generations earlier than Apostolic times, is clear from the authority of St. James: "For Moses of old time [ἐκ γενεῶν ἀρχαίων] hath in every city them that preach him in the synagogues, where he is read every sabbath" (Acts, xv, 21).

Remains of a Synagogue at Kefr Bir'im, Palestine

III. History.—From the outset of Christianity the synagogue was in full power of its various functions; the New Testament speaks thereof fifty-five times. The word is used to denote the body politic of the Jews twelve times: twice in Matthew (x, 17; xxiii, 34); once in Mark (xiii, 9); three times in Luke's Gospel (viii, 41; xii, 11; xxi, 12), and four times in his Acts (vi, 9; ix, 2; xxii, 19; xxvi, 11); and twice in the Johannine writings (Apoc., ii, 9; iii, 9). The more restricted meaning of meeting-house occurs forty-three times in the New Testament—seven in Matthew (iv, 23; vi, 2. 5; ix, 35; xii, 9; xiii, 54; xxiii, 6); seven times in Mark (i, 21, 23, 29, 39; iii, 1; vi, 2; xii, 39); twelve times in Luke's Gospel (iv, 15; 16, 20, 28, 33, 38, 44; vi, 6; vii, 5; xi, 43; xiii, 10; xx, 46), and fourteen times in his Acts (ix, 20; xiii, 5, 14, 42; xiv, 1; xv, 21; xvii, 1, 10, 17; xviii, 4, 7, 19, 26; xix, 8); twice in John (vi, 59; xviii, 20); once in James (ii, 2). Our Lord taught in the synagogues of Nazareth (Matt., xiii, 54; Mark, vi, 2; Luke, iv, 16), and Capharnaum (Mark, i, 21; Luke, vii, 5; John, vi, 59). Saint Paul preached in the synagogues of Damascus (Acts, ix, 20), Salamina in Cyprus (Acts, xiii, 5), Antioch in Pisidia (Acts, xiii 14), Iconium (xiv, 1), Philippi (xvi, 13), Thessalonica (xvii, 1), Berœa (xvii, 10), Athens (xvii, 17), Corinth (xviii, 4, 7), and Ephesus (xviii, 19). It is worthy of note that despite his frequent use of the Jewish meeting-house, St. Paul in his stern antagonism never once deigns to make mention of the synagogue. He designates Judaism by the term "circumcision", and not, as do the Evangelists, by the word "synagogue". And even in speaking of the Jews as "the circumcision", St. Paul avoids the received word περιτομή, "a cutting around", a word employed by the Alexandrian Philo for Judaism and reserved by the Apostle for Christianity. The sworn foe of the "false circumcision" takes a current word κατατομή, "a cutting down", and with the vigourous die of his fancy, stamps thereon an entirely new and exclusively Pauline meaning—the false circumcision of Judaism.

At the time of the destruction of Jerusalem (A. D. 70) there were in the city itself 394 synagogues, according to the Babylonian Talmud (Kethub. 105 a); 480, according to the Jerusalem Talmud (Megilla 73d). Besides these synagogues for the Palestinian Jews, each group of Hellenistic Jews in Jerusalem had its own synagogue—the Libertines, the Alexandrians, the Cyrenians, the Cilicians, etc. (Acts, vi, 9). Josephus speaks of the synagogue which Agrippa I erected in Dora (Antiq., XIX, vi, 3), of the Cæsarean synagogue which revolted against Rome (Bell, Jud., II, xiv, 4), of the great synagogue of Tiberias (Vita, 54), and of the synagogue of Antioch in Syria to which the sacred vessels were borne away in the time of the Seleucid War (Bell. Jud., VII, iii, 3). Philo is authority for the existence, during the first century A. D., of many synagogues in Alexandria (Leg. ad Gaium, 20), and of not a few in Rome (Ibid., 23). In Northern Galilee, are numerous ruins whose style of architecture and inscriptions are indications of synagogues of the second and, maybe, the first century A. D. The Franciscans are now engaged in the restoration of the ruined synagogue of Tel Hum, the site of ancient Capharnaum. This beautiful and colossal synagogue was probably the one in which Jesus taught (Luke, vii, 5). Of the ruined synagogues of Galilee, that of Kefr Bir'im is the most perfectly preserved. Various Greek inscriptions, recently discovered in Lower Egypt, tell of synagogues built there in the days of the Ptolemies. A marble slab, unearthed in 1902 some twelve miles from Alexandria, reads: "In honour of King Ptolemy and Queen Berenice, his sister and wife, and their children, the Jews (dedicate) this προσευχή". Both the Jerusalem and the Babylonian Talmud make mention of numerous Galilean synagogues which were centres of rabbinical literary, and religious and political influence at Sepphoris, Tiberias, Scythopolis, etc. Every Jewish settlement was obliged by Talmudic law to have its synagogue; the members of the community could oblige one another to the building and maintaining thereof; indeed the members of the Jewish community were designated "sons of the synagogue". For further history of the synagogue, see Jews and Judaism.

The Great Synagogue is worthy of special mention, as to it is assigned, by Jewish tradition, the important rôle of forming the Canon of the Old Testament. It is said to have been founded by Esdras in the middle of the fifth century B. C., and to have been a permanent and legislative assemblage for two and a half centuries. The Mishnah (Pirke Aboth, I, 1) claims that the Prophets handed down the Torah to the men of the Great Synagogue. "Aboth Rabbi Nathan" (a post-Talmudic treatise) paraphrases this statement by including the last three Prophets in this assemblage: "Aggeus, Zacharias and Malachias received [the Torah] from the Prophets; and the men of the Great Synagogue received from Aggeus, Zacharias and Malachias". How long this supposedly authoritative body held control of the religion of Israel, it is impossible to tell. Jewish chronology from the Exile to Alexander's conquest is far from clear. Rabbi Jeremiah (Jerus. Talmud, Berakot, 4d) says that one hundred and twenty elders made up this body and instituted the prayers and benedictions of *Kiddush* and *habdalah*. The Talmud, on the contrary (Peah, II, 6), hands down Torah from the Prophets to the Zugoth (Pairs) without the intervention of the Great Synagogue. Be the Great Synagogue of Jewish tradition what it may, historical criticism has ruled it out of court. Kuenen, in his epoch-making monograph "Over die Mannen der groote synagoge" (Amsterdam, 1876), shows that a single meeting came to be looked upon as a permanent institution. The Levites and people met once and only once, probably on the occasion of the covenant described by Nehemias (II Esd., viii–x), and the important assemblage became the nucleus round which were wrapped the fables of later Jewish tradition. Such is the conclusion of W. R. Smith, "The Old Testament in the Jewish Church", p. 169; Ryle, "Canon of the Old Testament", p. 250; Buhl, "Canon and Text of the Old Testament", p. 33; Driver, "Introduction to the Literature of the Old Testament", 6th ed., p. 7.

IV. ORGANIZATION.—(1) *Judicial.*—The "sons of the synagogue" were governed by a council called *bêth dîn*, "house of justice"; or *συνέδριον* "council" (transliterated סנהדרין, Sanhedrin); or *βουλή*, "council". The members of this council were twenty-three in larger towns, seven in smaller; and were called *ἄρχοντες*, "rulers" (Matt., ix, 18, 23; Luke, viii, 41), or *πρεσβύτεροι*, "ancients" (Luke, vii, 3). The "rulers of the synagogue" had it in their power to punish by excommunication, scourging and death. (a) Excommunication from the synagogal community was termed *ḥērém*, חרם, *ἀνάθεμα* (see ANATHEMA). Both the Hebrew and Greek words mean that an object is "sacred" or "accursed" (cf. Arabic *ḥárîm*, the harem, a precinct sacred to the women of a household or the mosque of a community). (b) Scourging (מכות, cf. Makkoth, III, 12; *μαστιγόω*, cf. Matt. x, 17; xxiii, 34; *δέρω*, cf. Mark, xiii, 9; Acts, xxii, 19) was thirty-nine stripes (Makkoth, III, 10; II Cor., xi, 24) laid on by the "servant of the synagogue", *ḥazzan*, *ὑπερέτης*, for minor offences. Three elders made up a tribunal competent to inflict the penalty of scourging. It is likely to this lesser tribunal that Our Lord refers: "Whosoever is angry with his brother shall be in danger of the judgment", *ἔνοχος ἔσται τῇ κρίσει* (Matt., v, 22). (c) The death penalty was inflicted by the Sanhedrin in full session of twenty-three elders (cf. Sanhedrin I, 4). To this penalty or to that of excommunication should probably be referred Our Lord's words: "And whosoever shall say to his brother, Raca, shall be in danger of the council", *ἔνοχος ἔσται τῷ συνεδρίῳ* (Matt., v, 22).

(2) *Liturgical.*—The "ruler of the synagogue", *ἀρχισυναγωγός* (Mark, v, 22, 35, 36, 38; Luke, viii, 49; xiii, 14; Acts, xiii, 15; xviii, 8, 17), *rôsh hákkenēséth* (Sota, VII, 7) presided over the synagogue and its services. This presidency did not prevent the "sons of the synagogue" from freely officiating. Witness the freedom with which Our Lord and St. Paul stood up to explain the Scriptures in the various synagogues of Palestine and the Diaspora. The *ḥazzan*, "servant", handed the scrolls to the readers and taught the children.

V. LITURGY.—There were five parts in the synagogue service: (1) the Shĕma' is made up of Deut., vi, 4–9; xi, 13–21; Num., xv, 37–41—two opening blessings for morning and evening, one closing blessing for morning and two for evening. These benedictions are named *Shĕma'* from the opening word, the imperative שמע: "Hear, O Israel; Jahweh our God is one Jahweh". The origin of the *Shĕma'*, as of other portions of Jewish liturgy, is unknown. It seems undoubtedly to be pre-Christian. For it ordains the wearing of the phylacteries or frontlets—prayer-bands borne upon the arm and between the eyes—during the recitation of the great commandment of the love of God (cf. Deut., vi, 8; xi, 18). These phylacteries (*φυλακτήρια*) are called in the Talmud, "the prayer which is for the hand", תפלה שׁל יד, and "the prayer which is for the head", תפלה שׁל ראשׁ. The wearing of the two bands was in vogue in Christian times (Matt., xxiii, 5; Josephus, "Antiquit.", IV, viii, 13).

(2) *The Prayer* is called "the eighteenth", *Shemónéh 'ēsréh* (שמנה עשרה), because of its eighteen benedictions and petitions. There are two recensions—the Babylonian, which is commonly in use, and the Palestinian, which Schechter recently discovered in a Cairo *genizah* (MSS.-box). Dalman (Worte Jesu, p. 304) considers that petitions 7, 10–14, are later than the destruction of Jerusalem (A. D. 70). The twelfth petition of the Palestinian recension shows that the Christians were mentioned in this daily prayer of the synagogue:

> "May the Christians and heretics perish in a moment;
> May they be blotted out of the book of life;
> May they not be written with the just."

The Babylonian recension omits נצרים, Christians. The Lord's prayer is made up, in like manner, out of petitions and praises, but in a very unlike and un-Jewish spirit of love of enemies.

(3) *Torah.*—The Jerusalem Talmud (Megilla, 75a) tells us that the reading of the Law on sabbaths, feast-days, new moons, and half feast-days is of Mosaic institution; and that Esdras inaugurated the reading of Torah on Mondays, Thursdays, and Saturdays. This Talmudic tradition, though not very reliable, points to a very ancient custom. The law is divided into fifty-four sections, *sedārîm*, which make up a pericopic sabbath reading of the Pentateuch. Special readings are assigned for special sabbaths; seven readers are called upon at random, and each reads his share.

(4) *The Prophets.*—Parallel to the pericopic reading of Torah is a pericopic reading from the Prophets, or second part of the Hebrew Canon. These sections are chosen with a view to exemplify or drive home the lesson from the Law which precedes. The name of the section from the Prophets, *haphtārā* (from Hiph'il of פטר, "to dismiss"), indicates that at first the synagogue service here came to a close.

(5) *The Scripture Lesson.*—Even by the time of Christ, the exposition of Scripture was part of the synagogal liturgy (Matt., iv, 23; Mark, i, 21; vi, 2). Any of the brethren might be called upon to give the "word of exhortation" (Acts, xiii, 15). The Talmudic statute (Megilla, IV, 4) was that the *methúrgemān*, interpreter, paraphrase the section from Torah one verse at a time and the section from the Prophets one to three verses at a time. These paraphrases are called *tárgûmîm;* a lengthy exposition of a section is a *midrāsh*. There was formerly an antiphonal chanting of one or other of Psalms cv–cvii, cxi–cxix, cxvi–cxviii, cxxxv, cxxxvi, cxxxxvi–cl. The precentor chanted verse after verse and the choir repeated the first verse of the psalm. At the end, he chanted the doxologyand called upon the people to answer "Amen", which they did.

VI. BUILDING.—(1) *Site.*—In Palestine, the synagogues were built within the city. In the Diaspora, a site was generally chosen outside the city gate and either by the seaside or river-side (Acts, xvi, 13). The Tosephta (Megilla, IV, 22) ordains that the synagogue be in the highest place of the city and face to the east. The ruins of Galilean synagogues show no observance of this ordinance.

(2) *Style of Architecture.*—There seems to have been no established style of synagogal architecture. Until recent years, the synagogue has been built in whatsoever style had vogue in the place and at the time of building. The ruined synagogue of Merom is in severe Doric. That of Kafr Bir'im is in a Græco-Roman modification of Corinthian. The building is quadrangular in form. On the main façade there are three doorways, each of which has a highly ornamented architrave; above the centre doorway is a carefully carved Roman arch. Later on, Russian synagogues were built in decidedly Russian style. In Strasburg, Munich, Cassel, Hanover, and elsewhere the synagogues show the influence of the different styles of the churches of those cities. The cruciform plan is naturally not followed; the transepts are omitted. Synagogues of Padua, Venice, Livorno and other Italian cities are in the Renaissance style. Since the expulsion of the Jews from Spain, Moorish forms have gradually come to be considered the distinctive trait of synagogal architecture. El Transito and Santa Maria la Blanca, both in Toledo, are two of the finest examples of this Moorish architecture under Jewish influence.

(3) *Interior Setting.*—The Ark, *arôn têbāh*, containing the sacred scrolls, stood at the eastern end opposite the entrance to the rectangular building. In the center was a raised platform (*βῆμα*, בימה), and thereupon the lectern (*ἀναλογεῖον*, אנלוגין). This elevated platform is also called "Almemar", a word corrupted from the Arabic *Al-minbar*, the "chair", the "pulpit". These two furnishings are the most essential interior settings of the synagogue. The Ark was originally but a niche in the wall. In time, as the most dignified feature, it received most concern in the decorative scheme. Nowadays, it is raised on high, approached by three or more steps and covered by an elaborately embellished canopy. The Almemar, too, has undergone various embellishments. It is approached by steps, sometimes has seats, is railed in and at times surrounded by a grille, round about or on both sides of it, are the seats for the congregation (*κλιντήρ*, קלטר). The first seats, *πρωτοκαθεδρία* (cf. Matt., xxiii, 6; Mark, xii, 39; Luke, xi, 43 and xx, 46) are those nearest the Ark; they are reserved for those who are highest in rank (cf. Tosephta, Megilla, IV, 21). Women, at least since the Middle Ages, sit in galleries to which they enter by stairways from the outside. These galleries were formerly set very high; but now are low enough to show both the Ark and the Almemar.

Synaus (Synaitansis), a titular see in Phrygia Pacatiana, suffragan of Laodicea. Nothing is known of the history of this city located by Ptolemy (V, ii, 22) in Great Phrygia, and in the sixth century by Hierocles (668, 13), in Phrygia Pacatiana, its metropolis being Laodicea. It is now Semao (or Simao), chief town of a caza in the vilayet of Broussa near the springs of Semav Sou, formerly Macestus; containing 5000 inhabitants all Mussulmans. It has a few inscriptions but no ruins. Le Quien (Oriens christianus, I, 813) mentions the following bishops: Arabius, represented by his metropolitan at Chalcedon (451); Pronimus, at Constantinople (553); Stephanus, at Nicæa (787); Constantine at Constantinople (869); Sisinnius and Eusebius, supporters respectively of St. Ignatius and Photius, at the Photian Council of Constantinople (879); Isaac, at the Council of Constantinople (1351), which approved the doctrines of Palamas. To these may be added Stephanus, whose name occurs in the inscription (eighth century?) "Corp. inscr. græc.", 8666 perhaps the Stephanus mentioned in 787. In 1394 the See of Synaus was united to Philadelphia. In the seventh century it was still suffragan of Laodicea; it seems also that at this time it was united to the See of Ancyra, now Kilissé Keui. In the ninth century it was attached to the metropolis of Hierapolis and remained so till its disappearance, as appears from the Greek "Notitiæ episcopatuum"; however, the Roman Curia's official list of titular sees makes it suffragan of Laodicea.

Synaxarion (*συναξάριον*, collection), the name of a liturgical book of the Byzantine Church. The exact meaning of the name has changed at various times. Its first use was for the index to the Biblical and other lessons to be read in church. In this sense it corresponds to the Latin Capitulare and Comes (see Lessons in the Liturgy). Then the Synaxarion was filled up with the whole text of the pericopes to be read. As far as the Holy Liturgy was concerned this meant that it was replaced by the "Gospel" and "Apostle" books. Synaxarion remained the title for the index to other lessons. Without changing its name it was filled up with complete texts of these lessons in the same way. As the lessons in the Byzantine Divine Office are always lives of saints, the Synaxarion became the collection of short lives of saints and accounts of events whose memory is kept (like the lessons of our second nocturn). It is often compared to the Roman Martyrology. The parallel would be more exact, if we imagine the second nocturn lessons arranged together in a separate book. The mere index of such lessons is generally called *μηνολόγιον ἑορταστικόν*, a book hardly needed or used, since the Typikon supplies all that is wanted. There are a great number of medieval Synaxaria extant in manuscript. They are important for Byzantine heortology and church history. The short lives that form the lessons were composed or collected by various writers. Of these Symeon Metaphrastes (q. v.) is the most important. The accounts are of very varying historical value. Emperor Basil II (976–1025) ordered a revision of the Synaxarion, which forms an important element of the present official edition (Analecta Bollandiana, XIV, 1895, p. 404). The Synaxarion is not now used as a separate book; it is incorporated in the Menaia. The account of the saint or feast is read in the Orthros after the sixth ode of the Canon. It is printed in its place here, and bears each time the name *συναξάριον* as title. Synaxarion then in modern use means, not the whole collection, but each separate lesson in the Menaia and other books. An example of such a Synaxarion (for St. Martin I, 13 April) will be found in Nilles, *op. cit.*, infra, I, xlix. Certain metrical calendars extant in the Middle Ages were also called Synaxaria. Krumbacher ("Gesch. der byzantin. Lit.", 2nd ed., Munich, 1897, pp. 738, 755) describes those composed by Christopher of Mytilene (d. about 1050) and Theodore Prodromus (twelfth century).

The *Menologion (Synaxarion) of Basil II* was edited by Urbino (3 vols., 1727), reprinted in *P. G.*, CXVII; Allatius, *De libris eccles. Græcorum* (Paris, 1645), 78–93; Delehaye, *Le Synaxaire de Sirmond* in *Analecta Bolland.*, XIV (1895), 396–434;

GEDEON, Βυδαντινόν ἑορτολόγιον in Σύλλογος, XXIV (1895), 121–60. See also MENAION.

ADRIAN FORTESCUE.

Synaxis (*σύναξις* from *συνάγω*) means gathering, assembly, reunion. It is exactly equivalent to the Latin *collecta* (from *colligere*), and corresponds to synagogue (*συναγωγή*), the place of reunion. In Christian and liturgical use the Synaxis is the assembly for any religious function, either in the abstract sense (*nomen actionis*) or concretely for the people assembled (cf. German *Sammlung* and *Versammlung*). The verb *συνάγω* occurs frequently in the New Testament, for gathering together a religious meeting (Acts, xi, 26; xiv, 27 etc.), as also for the Jewish services and councils (e. g. John, xi, 47). So also in the Apostolic Fathers (Didache, ix, 4; xiv, 1; I Clem., xxxiv, 7; in general for the union of the church, Ignatius, "Magn.", x, 3). We must distinguish the liturgical (eucharistic) from the aliturgical Synaxis, which consisted only of prayers, readings, psalms, out of which our Divine Office evolved. Dionysius the Pseudo-Areopagite uses the word only for the eucharistic service ("De eccles. hier.", iii, in P. G., III), and Cardinal Bona thinks that so it may have a mystic meaning, as referring to our union with God or Communion (Rerum liturg., I, iii, 3). But it occurs frequently for any religious assembly, and in this sense was adopted in the West by St. Benedict ("Regula Ben.", 17: "Vespertina Synaxis"—Vespers) and by John Cassian ("Collat.", IX, 34: "ad concludendam synaxim"; ed. Hurter, Innsbruck, 1887, p. 315) etc. In this signification the word is now archaic in Greek and Latin. It is preserved, however, in the Byzantine Calendar as the title of certain feasts on which the people assemble in some particular church for the Holy Liturgy, and therefore corresponds to the Roman *statio*. Thus 4 January is the "Synaxis of the holy Seventy", that is the feast of the seventy disciples (Luke, x, 1, where the Vulgate has seventy-two, on which day the assembly was once made in some church (at Constantinople?) dedicated to them (Nilles, "Kalendarium manuale," I, 2nd ed., Innsbruck, 1896, p. 52); 26 December is the "Synaxis of the Theotokos and of Joseph the spouse and guardian of the Virgin", a feast in memory of the flight into Egypt, on which again the station was at a special church (ibid., 366).

ADRIAN FORTESCUE.

Syncelli (*σύγκελλοι*, from *σύν*, with, and *κέλλιον*, the Græcized form of the Latin *cella*, cell), a name which in the early Church was given to those monks or clerics who lived in the same room with their bishops, and whose duty it was to be witnesses to the purity of their lives or to perform the daily spiritual exercises in common with them. In the Eastern Church they soon became the councillors and confessors of the patriarchs and bishops, and exerted a great influence over them. They held the first place after their masters and had a seat and vote in the councils of the Church. In the course of time the patriarchs took two or more syncelli, the most distinguished of whom was called protosyncellus (*πρωτοσύγκελλος*). Since the tenth century their influence began to decrease, but in the Greek Church they still exist. In the Latin Church they never became very influential, though popes and bishops had syncelli as witnesses of their mode of life (Gregory the Great, "Epistolarum libri XIV", IV, ep. xliv). They gradually developed into the *consiliarii papales et episcopales* (spiritual councillors).

MICHAEL OTT.

Syncellus, GEORGE. See GEORGIUS SYNCELLUS.

Syncretism, from *συγκρητίζειν* (not from *συγκεραννύναι*). An explanation is given by Plutarch in a small work on brotherly love ("Opera Moralia", ed. Reiske, VII, 910). He there tells how the Cretans were often engaged in quarrels among themselves, but became immediately reconciled when an external enemy approached. "And that is their so-called Syncretism." In the sixteenth century the term became known through the "Adagia" of Erasmus, and came into use to designate the coherence of dissenters in spite of their difference of opinions, especially with reference to theological divisions. Later, when the term came to be referred to *συγκεραννύναι*, it was inaccurately employed to designate the mixture of dissimilar or incompatible things or ideas. This inexact use continues to some extent even to-day.

(1) Syncretism is sometimes used to designate the fusion of pagan religions. In the East the intermixture of the civilizations of different nations began at a very early period. When the East was hellenized under Alexander the Great and the Diadochi in the fourth century B. C., the Grecian and Oriental civilizations were brought into contact, and a compromise to a large extent effected. The foreign deities were identified with the native (e. g. Serapis = Zeus, Dionysus) and a fusion of the cults succeeded. After the Romans had conquered the Greeks, the victors, as is known, succumbed to the culture of the vanquished, and the ancient Roman religion became completely hellenized. Later the Romans gradually received all the religions of the peoples whom they subdued, so that Rome became the "temple of the whole world". Syncretism reached its culmination in the third century A. D. under the emperors Caracalla, Heliogabalus, and Alexander Severus (211–35). The countless cults of the Roman Empire were regarded as unessential forms of the same thing—a view which doubtless strengthened the tendency towards Monotheism. Heliogabalus even sought to combine Christianity and Judaism with his religion, the cult of the sun-god. Julia Mamæa, the mother of Alexander Severus, attended in Alexandria the lectures of Origen, and Alexander placed in his *lararium* the images of Abraham and Christ.

(2) A modern tendency in the history of religions sees in the Biblical revealed religion a product of syncretism, the fusion of various religious forms and views. As regards the Old Testament, the Chanaanite myth, the Egyptian, Old Babylonian, and Persian religions are regarded as the sources of Israelitic religion, the latter itself having developed from Fetichism and Animism into Henotheism and Monotheism. It is sought to explain the origin of Christianity from the continuation and development of Jewish ideas and the influx of Brahmanistic, Buddhist, Græco-Roman, and Egyptian religious notions, and from the Stoic and Philonic philosophy; it is held to have received its development and explanation especially from the neo-Platonic philosophy. That Judaism and Christianity agree with other religions in many of their external forms and ideas, is true; many religious ideas are common to all mankind. The points of agreement between the Babylonian religions and the Jewish faith, which provoked a lively discussion some years ago after the appearance of Friedrich Delitzsch's "Babel und Bibel", may be explained in so far as they exist (e. g.) as due to an original revelation, of which traces, albeit tainted with Polytheism, appear among the Babylonians. In many cases the agreement can be shown to be merely in form, not in content; in others it is doubtful which religion contained the original and which borrowed. As to the special doctrines of the Bible, search has been vainly made for sources from which they might have been derived. Catholic theology holds firmly to revelation and to the foundation of Christianity by Jesus of Nazareth.

(3) The Syncretistic Strife is the name given to the theological quarrel provoked by the efforts of Georg Calixt and his supporters to secure a basis on which

the Lutherans could make overtures to the Catholic and the Reformed Churches. It lasted from 1640 to 1686. Calixt, a professor in Helmstedt, had through his travels in England, Holland, Italy, and France, through his acquaintance with the different Churches and their representatives, and through his extensive study, acquired a more friendly attitude towards the different religious bodies than was then usual among the majority of Lutheran theologians. While the latter firmly adhered to the "pure doctrine", Calixt was not disposed to regard doctrine as the one thing necessary in order to be a Christian, while in doctrine itself he did not regard everything as equally certain and important. Consequently, he advocated unity between those who were in agreement concerning the fundamental minimum, with liberty as to all less fundamental points. In regard to Catholicism, he was prepared (as Melanchthon once was) to concede to the pope a primacy human in origin, and he also admitted that the Mass might be called a sacrifice. On the side of Calixt stood the theological faculties of Helmstedt, Rinteln, and Königsberg; opposed to him were those of Leipzig, Jena, Strasburg, Giessen, Marburg, and Greifswald. His chief opponent was Abraham Calov. The Elector of Saxony was for political reasons an opponent of the Reformed Church, because the other two secular electors (Palatine and Brandenburg) were "reformed", and were getting more and more the advantage of him. In 1649 he sent to the three dukes of Brunswick, who maintained Helmstedt as their common university, a communication in which he voices all the objections of his Lutheran professors, and complains that Calixt wished to extract the elements of truth from all religions, fuse all into an entirely new religion, and so provoke a violent schism. In 1650 Calov was called to Wittenberg as professor, and he signalized his entrance into office with a vehement attack on the Syncretists in Helmstedt. An outburst of polemical writings followed. In 1650 the dukes of Brunswick answered the Elector of Saxony that the discord should not be allowed to increase, and proposed a meeting of the political councillors. Saxony, however, did not favour this suggestion. An attempt to convene a meeting of theologians was not more successful. The theologians of Wittenberg and Leipzig now elaborated a new formula, in which ninety-eight heresies of the Helmstedt theologians were condemned. This formula (*consensus*) was to be signed by everyone who wished to remain in the Lutheran Church. Outside Wittenberg and Leipzig, however, it was not accepted, and Calixt's death in 1656 was followed by five years of almost undisturbed peace.

The strife was renewed in Hesse-Cassel, where Landgrave Wilhelm VI sought to effect a union between his Lutheran and Reformed subjects, or at least to lessen their mutual hatred. In 1661 he had a colloquy held in Cassel between the Lutheran theologians of the University of Rinteln and the Reformed theologians of the University of Marburg. Enraged at this revival of the Syncretism of Calixt, the Wittenberg theologians in vehement terms called on the Rinteln professors to make their submission, whereupon the latter answered with a detailed defence. Another long series of polemical treatises followed. In Brandenburg-Prussia the Great Elector (Frederick William I) forbade (1663) preachers to speak of the disputes between the Evangelical bodies. A long colloquy in Berlin (Sept., 1662–May, 1663) led only to fresh discord. In 1664 the elector repeated his command that preachers of both parties should abstain from mutual abuse, and should attribute to the other party no doctrine which was not actually held by such party. Whoever refused to sign the form declaring his intention to observe this regulation, was deprived of his position (e. g. Paul Gerhardt, writer of religious songs). This arrangement was later modified, in that the forms were withdrawn, and action was taken only against those who disturbed the peace. The attempts of the Wittenberg theologians to declare Calixt and his school un-Lutheran and heretical were now met by Calixt's son, Friedrich Ulrich Calixt. The latter defended the theology of his father, but also tried to show that his doctrine did not so very much differ from that of his opponents. Wittenberg found its new champion in Ægidius Strauch, who attacked Calixt with all the resources of learning, polemics, sophistry, wit, cynicism, and abuse. The Helmstedt side was defended by the celebrated scholar and statesman, Hermann Conring. The Saxon princes now recognized the danger that the attempt to carry through the "Consensus" as a formula of belief might lead to a fresh schism in the Lutheran Church, and might thus render its position difficult in the face of the Catholics. The proposals of Calov and his party to continue the refutation and to compel the Brunswick theologians to bind themselves under obligation to the old Lutheran confession, were therefore not carried into effect. On the contrary the Saxon theologians were forbidden to continue the strife in writing. Negotiations for peace then resulted, Duke Ernst the Pious of Saxe-Gotha being especially active towards this end, and the project of establishing a permanent college of theologians to decide theological disputes was entertained. However, the negotiations with the courts of Brunswick, Mecklenburg, Denmark, and Sweden were as fruitless as those with the theological faculties, except that peace was maintained until 1675. Calov then renewed hostilities. Besides Calixt, his attack was now directed particularly against the moderate John Musæus of Jena. Calov succeeded in having the whole University of Jena (and after a long resistance Musæus himself) compelled to renounce Syncretism. But this was his last victory. The elector renewed his prohibition against polemical writings. Calov seemed to give way, since in 1683 he asked whether, in the view of the danger which France then constituted for Germany, a Calixtinic Syncretism with "Papists" and the Reformed were still condemnable, and whether in deference to the Elector of Brandenburg and the dukes of Brunswick, the strife should not be buried by an amnesty, or whether, on the contrary, the war against Syncretism should be continued. He later returned to his attack on the Syncretists, but died in 1686, and with his death the strife ended. The result of the Syncretist Strife was that it lessened religious hatred and promoted mutual forbearance. Catholicism was thus benefited, as it came to be better understood and appreciated by Protestants. In Protestant theology it prepared the way for the sentimental theology of Pietism as the successor of fossilized orthodoxy.

(4) Concerning Syncretism in the doctrine of grace, see GRACE, CONTROVERSIES ON, VI, 713.

KLEMENS LÖFFLER.

Synderesis, or more correctly *synteresis*, is a term used by the Scholastic theologians to signify the habitual knowledge of the universal practical principles of moral action. The reasoning process in the field of speculative science presupposes certain fundamental axioms on which all science rests. Such are the principle of contradiction, "a thing cannot both be and not be at the same time", and self-evident truths like "the whole is greater than its part". These are the first principles of the speculative intellect. In the field of moral conduct there are similar first principles of action, such as: "evil must be avoided, good done"; "Do not to others what you do not wish to be done to yourself"; "Parents should be honoured"; "We should live temperately and act justly". Such as these are self-evident truths in the field of moral conduct which any sane person will admit if he understands them. According to the Scholastics, the readiness with which such moral truths are apprehended by the practical intellect is due to the natural habit impressed on the cognitive faculty which they call synderesis. While conscience is a dictate of the practical reason deciding that any particular action which I am contemplating is right or wrong, synderesis is a dictate of the same practical reason which has for its object the first general principles of moral action.

T. Slater.

Syndic, Apostolic.—A layman who in the name, and by the authority, of the Holy See assumes the care and civil administration of the temporalities and in particular the pecuniary alms destined for the support and benefit of Franciscan convents, and thence provides for the requirements of the brethren. To the Friars Minor corporate as well as individual ownership was forbidden by the constitution or the rule. During the first years of the order's existence, the literal observance of this precept, being feasible as well as possible, presented no difficulty; but as time went on, and the order developed as a vast organization, and spread over the whole world, countless difficulties had to be faced and fierce controversy arose, the *quæstio de paupertate* lasting for centuries. To preserve and safeguard as far as possible the letter as well as the spirit of the complete "expropriation" advocated by St. Francis, the popes adopted the *fictio juris* of assuming to themselves the ownership of all goods bestowed upon the friars. Thus the friars were legally regarded as mere users, the right of property being vested in the Roman pontiff, except in cases where the donors made explicit reservation in their own behalf. But as the civil administration of property in one's own interest is [illegible] act of ownership, and this was prohibited by the rule, such administration had to be exercised by a steward appointed, or at least authorized, by the Holy See.

According to the Decretal of Nicolas III, "Exiit qui seminat" (art. 12, n. 2), 14 August, 1279, the appointment of the syndic Apostolic rested with the sovereign pontiff or the cardinal protector,—sometimes bishops acted as their delegates in this matter; but Martin IV ("Exultantes", 18 January, 1283) empowered the superiors of the order—the general, the provincials, and the custodes—within their respective spheres of jurisdiction, to appoint and remove syndics as circumstances might require. The larger powers with which the syndic was invested by Martin IV and by his successors, Martin V ("Constitutiones Martinianæ" in Wadding, "Annales", X, 301) and Paul IV ("Ex Clementi", 1 July, 1555), gave rise to the appellation *syndicus Martinianus* in contradistinction to *syndicus communis*. This latter, as constituted by Nicholas III (Exiit) and Clement V ("Exivi de Paradiso", 6 May, 1312), could deal only with movable property (valuables excepted) and with purchase moneys. The Martinian syndic on the other hand, as trustee and agent of the Holy See on behalf of the friars, might receive and dispose of all goods movable and immovable (money offerings, legacies, and remunerations) and, in pursuance of his trust, institute proceedings in the courts and take such other steps as might be deemed necessary to protect the interests of the community in whose favour he acted. The Apostolic syndic and his wife and children were accorded the enjoyment of all and sundry indulgences, pardons, and privileges which the friars themselves have obtained, or shall obtain, from the Holy See (Clement VII, "Dum Consideramus", 16 April, 1526).

Gregory Cleary.

Syndicalism.—The term Syndicalism has been derived from the French *syndicats*, associations of workingmen uniting members of the same trade or industry for the furtherance of common economic interests. Syndicalism should therefore be synonymous with Industrial or Trades Unionism; but like "Socialism" the word has come to be used almost exclusively in a restricted sense and implies the principles expressed in theory and practice by French syndicates united in the Confédération Générale du Travail (General Confederation of Labour). Three influences have combined in the formation of this new system: revolutionary unionism, Anarchism, and Socialism. The theories of Proudhon together with those of Marx and Bakounine are here combined in a new form of industrial agitation which has received the name of "direct action". There has been no scientific or purposeful adaptation of the various doctrines. The mere cooperation in the same *syndicats* by followers of these often most antagonistic leaders has gradually brought about an agreement upon fundamental principles of revolutionary action to which all could subscribe, while free divergence of opinion might still find its individual expression outside the Syndicalist movement. While Syndicalism has but recently forced itself into popular notice, it is not new in its doctrines, which had almost all been accepted by the old "International" of Paepe, Marx, and Bakounine. When this was finally swept away during the revolutionary period of 1870–71, the present *syndicats* were gradually constructed, and after countless vicissitudes the Socialistic and Anarchistic elements were at last consolidated in the Confédération Générale du Travail.

The primary object of revolutionary Syndicalism is common to the various groups of which it is composed and consists in the destruction of the existing order of society, the expropriation and abolition of capital, and the elimination of the entire system of wages. Its basic doctrine is the teaching of the class struggle, while, like Socialism and Anarchism, it sees in patriotism one of its worst enemies. The State is to be violently combatted even when it enacts measures beneficial to the labourer, since all reforms are said to be deceptive unless forced from it by the syndicalist workers themselves. There are but two divisions of mankind, the employers and the employed, and anything which can foment bitterness and disagreement between these two is a triumph for the worker. All this is pure Marxian doctrine. The method by which revolutionary Syndicalism would bring about its purpose is known as direct action, i. e. the absolute rejection of all intermediary influences between the worker and his intended revolution. It disregards politics and parliamentary activity, repudiates intellectualism, and refuses to employ any agency except that of the workingman alone. Although direct action does not in itself imply violence, yet the employment of physical force is considered inseparable from its successful application. The particular form in which direct action is to find its adequate expression is the general strike. Each strike now takes on the nature of a skirmish preceding the great battle and becomes an end in itself independently of its success or failure. It calls for the support of the entire working class, and the more severe the conflict the greater the class-consciousness that is developed.

The culmination of these minor conflicts is to be the great battle which is proposed as the immediate object of Syndicalism, the general strike. This idea had already been clearly formulated by the "International". Success by the ballot is considered illusory because of its demoralizing influence upon the leaders, while street barricading and fighting seem useless against modern armaments. Nothing therefore is said to remain for the worker except the general strike of all industries at the same time. This will distribute the army over every section of the entire country and so render it helpless. The business and industrial sections of the cities will thus fall into the possession of the *syndicats*, who are at present to be prepared by education and class morality to take instant and successful control of all productive enterprises. The struggle itself is to be brief, but intense.

Two special theories are connected with the general strike. They are known as the minority and the myth theories. The syndicalists are only a small proportion of the French workingmen and without financial resources to sustain a prolonged strike. To answer the difficulties which this condition naturally suggests it is taught that their lack of resources will beget a spirit of recklessness, while their revolutionary education will infuse enthusiasm into the comrades, whose leaders they are destined to become. Thus the "conscious" or "bold" minority will suffice for the victory. The second theory was first proposed by Sorel in his "Réflexions sur la violence". Myths are defined by him as "artificial combinations invented to give the appearance of reality to hopes that inspire men in their present activity". Such a myth, he says, was for the early Christians the second coming of Christ and the Kingdom of Heaven; such for the syndicalist revolutionists is the myth of the general strike which has no objective reality in the present.

We have hitherto advisedly spoken of "revolutionary" Syndicalism, since there is likewise a "reformist" element in the Syndicalist movement, or as it is more appropriately called, a "reformist revolutionary" group. It consists of a certain portion of the socialist following, whose ultimate object is identical with that of their comrades, the general strike and the social revolution; but who are opposed to the practice of violence, as inexpedient, and for the same reason likewise exercise greater precaution in dealing with other critical questions, such as patriotism and militarism. They believe likewise in securing a safe financial status for the *syndicats* and in fighting for present reforms. These reforms, however, are to be understood in a purely Socialistic and Syndicalistic sense. Nothing that does not actually weaken the capitalistic class and prepare for its destruction is to be accounted of any value; while no concession that can ever be gained is to be considered final. It is difficult to ascertain the exact strength of this reformist element. Although it is in nowise inconsiderable; yet the Confédération Générale du Travail has hitherto sailed under exclusively revolutionary colours. The ultimate aim of Syndicalism, as far as this can be ascertained, is the establishment of an "economic federalism" in which the Bourses du Travail, or Labour Exchanges, which are affiliated with the Confédération Générale du Travail, are meant to play an important rôle. The units of society are to be the *syndicats* united in the trade federations, which in turn are to be centralized in the general confederation. The supreme thought of the present is, however, the general strike, and the *syndicats* united for this purpose are known as the *syndicats rouges* in distinction to the *syndicats jaunes*, who are opposed to Syndicalism and favour the strike only as an extreme measure.

The term Syndicalism has not as yet been officially applied to any labour association in the United States; nevertheless the movement itself exists in the organization of the "Industrial Workers of the World" and is likewise widely agitated under the form of industrial unionism by leading American socialists. In England a strong Syndicalist movement has sprung up since 1910, in which year Tom Mann issued the first number of his "Industrial Syndicalist". While radical Socialists have been obliged to construct a new labour union in the United States, their fellows in England have striven to develop the existing unions in the direction of solidarity and "direct action".

JOSEPH HUSSLEIN.

Synedrium. See SANHEDRIN.

Synesius of Cyrene, Bishop of Ptolomais, neo-Platonist, date of birth uncertain; d. about 414. He was a younger son of an ancient family of Cyrene which traced its descent from the Heracleidæ, the mythical founders of the city. Synesius pursued his higher studies at Alexandria, where he became a devoted disciple of the famous Hypatia, to whom several of his letters are addressed and for whom he entertained a life-long devotion. After serving some time in the army he settled in his native land, "studying philosophy, mathematics, astronomy, everything; farming, hunting, having many a brush with hordes of pilfering Libyans; and every now and then upholding the cause of some one who had undeservedly fallen into difficulties". This kind of life, in every way suited to his tastes and disposition, was interrupted by a mission to Constantinople, the object of which was to present a gold crown to the new emperor, Arcadius, and obtain alleviation of the burden of taxation. Nearly three years he waited for an audience. The all-powerful Eutropius who sold the provinces to the highest bidder was not the man to allow the emperor to be troubled with complaints. Finally, Synesius obtained an audience and delivered his famous oration "On Kingship". He left Constantinople in 400. According to some authorities before, and according to others after, the mission to Constantinople, Synesius visited Athens. He has described the visit in two letters [54 and 135] to his brother, Euoptius. His reason for undertaking the voyage was, he jestingly said, that "a number of people, priests and private persons, had had revelations in dreams that, unless he did so, some great evil would befall him. Then he would escape the present evils and would no longer have to revere people who had been to Athens and regarded themselves as demigods, and those who had not as demi-donkeys or mules." Athens was a disappointment. Like a beast that had been sacrificed, only the hide remained. At Alexandria, Synesius married a Christian by whom he had several children. During this period he did most of his literary work and carried on a large correspondence with his friends. Owing to the incapacity and cowardice of the military authorities, the desultory raids of the barbarians assumed almost the proportions of regular warfare. Synesius took a leading part in organizing defensive measures, levying volunteers, procuring arms, etc.

In 409 Synesius was elected Metropolitan of Ptolemais. The bishop-elect unbosomed himself in a letter [Ep. cv] to Euoptius. The duties of a bishop were uncongenial to him, fond as he was of his amusements as well as of religious study. He could not forsake the wife given him by "God, the law and the sacred hand of Theophilus". His amusements might go, much as he would hate to see his "darling dogs no longer allowed to hunt". Still, "if it is God's will, I will submit". But there was a worse obstacle.

"Philosophy is opposed to the opinions of the vulgar. I certainly shall not admit that the soul is posterior to the body . . . that the world and all its parts shall perish together. The resurrection . . . I consider something sacred and ineffable and am far from sharing the ideas of the multitude". He could keep silence but not "pretend to hold opinions which he did not hold". Theophilus, he said, must know everything and decide. Seven months elapsed between the writing of this letter and Synesius's consecration. That Synesius should yield is hardly surprising. His dogmatic perceptions were not keen enough to make him realize the falseness of his position as a bishop. Theophilus, the persecutor of the Origenists, is the difficulty. Perhaps, like many masterful men, he could put the telescope to his blind eye and refuse to see what he did not wish to see. Perhaps the negations in Synesius's letter were not his last word with regard to doctrinal questions. Baronius held that Synesius defamed himself to escape the episcopate, and this was also the opinion of Jeremy Taylor, "for all this Theophilus, Bishop of Alexandria, consecrated him, as knowing all this to be but stratagem and the arts of an odd fantastic humility" [Ductor dubitantium, iii, 2]. The "fantastic humility" solution of the problem has found very few supporters. As a bishop, Synesius devoted himself to the multiform duties of this office, without, however, concealing how uncongenial such a press of business was to him. We find him first warning and then excommunicating a bloodthirsty governor, denouncing the Eunomians, superintending the elections of bishops, etc. His latter days were embittered by the death of his three sons and the ruin of his country by the barbarians. His last letter was to Hypatia. She had been to him, "a mother, a sister, and a teacher". In his last hymn he recommends himself to Christ. It is a prayer that "his sins may be forgiven and that he may behold the glory of the Saviour".

The following are his writings: "De Providentia", first part composed while in Constantinople, second part after return to Cyrene: a political pamphlet in which Gainas and Aurelian figure as Typhon and Osiris; "De regno", in which an ideal Roman emperor is presented in an oration, delivered before Arcadius; "De dono astrolabii", a treatise accompanying the gift of a planisphere to one Paconius at Constantinople. The following were written between 400 and 409: the "Cynogetics" (not extant), a treatise on the breeding of dogs; "De insomniis", a curious treatise on dreams. Divination, according to Synesius, following Plotinus, was possible because of the unity of nature. All parts of the universe are in sympathy, so in each thing there are indications of other things. "Dion", a vindication of his manner of life against stern asceticism; "Calvitii Encomium", a facetious eulogy on baldness by a man who suffered from that complaint. The following belong to 409–14: two fragments of homilies; "Constitutio sive elogium Anysii" (Anysius was a general who had been successful against the barbarians); "Catastasis", describing the ruin of Pentapolis. There are one hundred and fifty-five epistles and ten hymns written at different periods of his life, the latter valuable because of the light which they throw on his religious and philosophical views, the former, the most precious of his writings, because of the light they throw on the writer's personality, and the picture which they give of the age in which he lived.

The only complete edition of Synesius's writings is that published by PETAVIUS (Paris, 1612); the fourth edition (1640) is the best; KRABINGER (1825–35) published the *De regno, Calvitii Encomium*, and *De providentia*, with German translations and the first volume of a complete edition, *Synesii opera omnia. I: Orationes et homiliarum fragmenta* (Landshut, 1850). This volume contains the greater works but not the hymns or epistles. A new edition of the Hymns was brought out by BOISSONADE, *Sylloge poetarum græc.*, XV (Paris, 1825); by CHRIST AND PARANIKAS in *Anthologia græca carminum christianorum* (Leipzig, 1871). There is a French translation of the Epistles by LAPATZ (Paris, 1870), very useful but not always trustworthy. See also VOLKMANN, *Synesius von Cyrene* (Berlin, 1869); CLAUSEN, *De Synesio* (Copenhagen, 1831); HALCOMB, *Dict. Christ. Biog.*; GARDNER, *Synesius of Cyrene* (London, 1886); CRAWFORD, *Synesios, the Hellene* (London, 1901); KRAUS, *Studien über Synesios von Cyrene* in *Theol. Quartalschr.* (Tübingen, 1865–66). For the religious views of Synesius when he was elected bishop see also HOLSTENIUS, *Dissertatio de Synesio et Fuga Episcopatus*, which will be found in READING'S edition of *Evagrius and Theodoret* (Cambridge, 1720). Holstenius's view is opposed to that of Baronius.

F. J. BACCHUS.

Synnada, titular metropolis in Phrygia Salutaris. Synnada is said to have been founded by Acamas who went to Phrygia after the Trojan war and took some Macedonian colonists. The consul Manlius Vulso passed through that city on his expeditions against the Galatians. It was situated in the south-eastern part of Eastern Phrygia, or Parorea, thus named because it extended to the foot of the mountains of Pisidia. After having belonged to the kingdom of the Attali, it became the capital of a district of the province of Asia, except on two occasions during the last century of the Republic when it was temporarily attached to Cilicia. Under these two regimes Synnada was the centre of an important *conventus juridicus*, or judicial centre; it was to preside at this assembly that Cicero stopped at Synnada on his way from Ephesus to Cilicia and on his return. Although small, the city was celebrated throughout the empire on account of the trade in marble which came from the quarries of the neighbouring city of Dacimium. Under Diocletian at the time of the creation of Phrygia Pacatiana, Synnada, at the intersection of two great roads, became the metropolis. On its coins, which disappear after the reign of Gallienus, its inhabitants call themselves Dorians and Ionians. To-day it is the city of Schifout Kassaba, situated five hours south of Afioun Kara Hissar, vilayet of Broussa.

Christianity was introduced at an early date into Synnada. The "Martyrologium Hieronymianum" mentions several of its martyrs. For St. Trophimus, honoured by the Latin and Greek Churches on 19 Sept., see "Acta SS.", VI Sept., 9 sq. A reliquary in the form of a sarcophagus containing some of the bones of this martyr has been discovered at Schifout Kassaba and transported to the museum at Broussa; this curious monument may date back to the third century [see Mendel in "Bulletin de Correspondance Hellénique", XXXIII (1909), 342 sq.]. Eusebius (Hist. Eccl., VI, 19) speaks of its pious bishop Atticus who entrusted to the layman Theodore the duty of instructing the Christians. About 230–5 a council on the rebaptizing of heretics was held there (Euseb., Hist. Eccl., VII, 7). St. Agapetus, mentioned in the Roman Martyrology on 24 March as Bishop of Synnada, belonged to Synaus. For a list of other bishops see Le Quien, "Oriens christ.", I, 827. Mention must be made of Procopius (321); Cyriacus, friend of St. John Chrysostom; Theodosius and his competitor Agapetus, at first a Macedonian heretic; Severus (431); Marinianus (448–51); Theogenes (536); Severus (553); St. Pausicacus, during the reign of Maurice, honoured by the Greek Church on 13 May; Cosmas, 680; John, adversary of the Iconoclasts in the time of Patriarch St. Germanus; St. Michael, honoured by the Latin and Greek churches 23 May, died 23 May, 826, in exile for his zeal in defending the worship of images; Peter under Photius; John under Photius; Pantaleon under Leo the Wise; Leo under Basil II; Nicetas in 1082; Georgios at the Council of St. Sophia, about 1450, if one can believe the apocryphal Acts of this council, which perhaps never occurred. The last Bishop of Synnada spoken of in the documents, without mentioning his name, probably lived under John Cantacuzenus (see "Cantacuz. Hist.", III, 73) and probably never lived at Synnada on account of the

Turkish conquest. Several years after (1385) the see was committed to the Metropolitan of Philadelphia. In conclusion may be mentioned St. Constantine, a converted Jew of Synnada, who lived in the tenth century; he became a monk, and is honoured by the Greek Church 26 December.

S. Pétridès.

Synod (Gr. *σύνοδος*, an assembly), a general term for ecclesiastical gatherings under hierarchical authority, for the discussion and decision of matters relating to faith, morals, or discipline. It corresponds to the Latin word *concilium*. The word *synodus* appears probably for the first time in the so-called "Apostolic canons", while the word *concilium* was employed in the same meaning by Tertullian more than a century earlier. Synod and council are, therefore, synonymous terms. When the bishops of the whole world are congregated under the presidency of the pope, the synod is denominated œcumenical or general. It is only to such an assembly that it is lawful to apply the term *sancta synodus* (see Councils, General). If the bishops of an ecclesiastical province meet under the headship of their metropolitan, the council is termed provincial. When the hierarchs of all the provinces of a nation assemble, the synod is called national, or, under certain circumstances, plenary. The regulations governing provincial and plenary councils are practically the same. In addition to those mentioned, there are other synods that are more difficult of classification, as synods of the East or the West, the *synodoi endemousai* of Constantinople, and the mixed councils of ecclesiastical and secular dignitaries who assembled together to make regulations for both spiritual and civil matters.

Different from all other councils is the diocesan synod. Other councils are assemblies of bishops who have a definitive vote in the matters under consideration, but in a diocesan synod there is only one voter and only one lawgiver, the bishop of the diocese. This article deals mainly with diocesan synods. In his book "De Synodo Diœcesana" (lib. 1, c. i) Benedict XIV thus defines a diocesan synod: "A lawful assembly convoked by the bishop, in which he gathers together the priests and clerics of his diocese and all others who are bound to attend it, for the purpose of doing and deliberating concerning what belongs to the pastoral care." The Council of Trent (Sess. XXIV, c. ii, "De ref.") requires that a diocesan synod be held once a year. This law is still in force, but a mild interpretation, introduced by custom, has been tacitly sanctioned by the Holy See. Usually, the date for holding the synod should be announced on the Feast of the Epiphany. A month before the opening the decree of convocation should be affixed to the cathedral doors, and it should be published on three successive Sundays in parish churches. When two dioceses are united under one bishop, the synod should be celebrated alternately in the cathedral of each such diocese. It belongs to the bishop to convoke the diocesan synod whether he be consecrated as yet or not. An archbishop, however, who has not yet received the pallium, has not the same right. Vicars-general can assemble a synod only in virtue of a special mandate of the bishop. When a diocese is vacant, the vicar capitular can and should hold a diocesan synod if a year has elapsed since the celebration of the last one. Ordinarily, the convocation of a synod should take place after the episcopal visitation of the diocese, as the bishop can then be better guided in forming his statutes. When, however, the visitation has been neglected for years, it is considered more advisable to hold the synod first. As the bishop is the only lawgiver at a synod, it belongs to him to draw up the various decrees which he may wish to promulgate at its sessions. While he convokes the synod by his own authority and is not required to consult his chapter concerning the convocation or its preparatory acts, yet he must ask the counsel of his chapter or diocesan consultors as to the decrees he desires to enact, though he is not bound to follow their advice. The bishop is exhorted, in the formation of his decrees, to hold private conferences with the prudent, learned, and pious clerics of his diocese, and then to consult his chapter on the proposed statutes thus formed (S. C. C., 26 Nov., 1689). Only in this way does the bishop deliberate with the clergy of his diocese at a synod, and though the finished decrees will receive all their authority from him, yet it is consonant with the mind of the Church that, in the formation of the statutes, the opinion of the clergy be heard and considered. Summonses to a diocesan synod should be given to the vicar-general, the members of the cathedral chapter, holders of benefices, and all others who have care of souls. If there is a custom to that effect, all the clergy of the diocese may be summoned. Regulars who have care of souls are obliged to attend a synod. Their superiors are not, however, obliged to attend, unless they personally act as parish priests or curates. The bishop has power to punish with censures all those legitimately summoned who fail to attend. Laymen may also be invited by the bishop to be present at a synod if there is a custom to that effect, but under no circumstances can they acquire a right to such summons.

At the synod the decrees determined on by the bishop are promulgated, and a period of two months is allowed for having recourse against them to the bishop or the Holy See. All the clergy and laity of the diocese are bound by these decrees, and it is not necessary for the bishop to send his statutes to Rome for revision before publication. Exempt regulars are bound to observe diocesan decrees in all things which concern the sacred canons, the Constitutions of popes and councils, and the decrees of the Sacred Roman Congregations. The bishop may not force his clergy to buy printed copies of the diocesan statutes (S. C. C., 14 Dec., 1658). During the synod the appointment is made of synodal examiners. To the former duties of these officials has been added by the "Maxima Cura" of Pius X (20 Aug., 1910) that of being associated with the bishop in drawing up the decree for the administrative removal of parish priests. By the same papal Constitution, parochial consultors, who are to be assessors in case of recourse against a decree of removal, are also to be chosen by the synod from among the parish priests. Synodal witnesses are likewise chosen at some synods, whose main duty it is to help in the framing of deliberative questions or to report at the following synod what has been the effect of the degrees promulgated at the last assembly, or to suggest new ones. Synodal judges are also to be chosen, though they are rarely now employed. Their office is to expedite such causes as may be committed to their judgment outside Rome by the Holy See. These judges should be at least four in number in every diocese, and their names must be forwarded to Rome as soon as selected. The subject-matter of the decrees framed at a diocesan synod should concern only the preservation of faith or discipline. Under no circumstances may such a synod define any new article of faith or decide any doctrinal point in dispute between Catholic theologians or frame statutes contrary to the common canon law of the Church.

For synods in general use see bibliography of article Councils, General. The best work on diocesan synods is that of Benedict XIV, *De Synodo Dioecesana*. Bouix treats of these synods in *De Episcopo*, II (3rd ed., Paris, 1883); Ferraris, *Bibliotheca Canonica*, II (Rome, 1891), s. v. *Concilium*, art. 3; in Taunton, *The Law of the Church* (London, 1906), s. v.; Hefele, *Councils of the Church*, ed. Clark (Edinburgh, 1871—), and new French translation by Leclercq (Paris, 1907—).

Synods, National.—According to the recent canon law, national councils are the deliberating assemblies at which all the bishops of a nation are convoked by the patriarch or primate (Cf. Bened. XIV, "De Synodo", I, i), but, in order to include the ancient national synods, it would be more correct to say a legitimate assemblage of the episcopate of a nation, the decisions of which are valid for an entire national Church. For the classic definition is far from being applicable to all the ancient national councils, as it is difficult to apply to all recognized œcumenical councils the present classic definition and conditions for such councils.

Councils are commonly divided into general or œcumenical, or particular; the latter are subdivided into national and provincial according as they assemble the bishops of a whole nation or of an ecclesiastical province. Finally come the assemblies of the clergy of a diocese, which are called diocesan synods rather than councils. But writers point out that this classification is not and cannot be very exact. For instance, to what category belongs the Council of Arles of 314, at which Constantine in agreement with the pope convoked all the bishops, or at least a representation, of the whole episcopate of his empire at that time? So also if we agree with most authors in regarding as national councils the assemblies of African bishops, it may be objected that Africa did not form a distinct nation in the Roman Empire. On the other hand there have been councils which, while they did not assemble all the bishops of a nation, may nevertheless be regarded as real national synods; such were the reform assemblies held at the command of Charlemagne in 814 simultaneously at Arles, Reims, Mainz, Tours, and Châlons. Moreover, if in order to be national a council must be presided over by a patriarch or primate, we must remove from the list of national councils nearly all the episcopal assemblies of the Frankish Kingdom and Empire, for they were convoked at the command of kings and emperors, and the Frankish Church never had any patriarchal or primatial see whose bishop was qualified to convoke or preside over the entire national episcopate. Besides the term "national" was not very widespread in ancient times, it being the custom to speak rather of "universal" or "plenary" councils as in Africa or Spain, but this word was not used as synonymous with œcumenical. It meant plenary for all the provinces of Roman Africa or for the whole Visigothic Kingdom, in the same sense that the plenary Councils of Baltimore were meetings of the episcopate of the United States.

This being understood, the canonical prescriptions regarding national councils are the same, proportionately speaking, as for general and provincial councils. To be legitimate their convocation must proceed from the authority having competent jurisdiction over the national church, either partiarch or primate (provided that these titles be not merely honorary). In default of this authority the convocation should proceed from the Holy See, as was done for the recent national councils enumerated below. It was because the convocation was not competent that the "national council" of Paris of 1811 was not legitimate. To this convocation corresponds on the part of the bishops the obligation to appear in person at the assembly unless they have a legitimate reason. But representation of a numerous episcopate will suffice, as was the case in Africa, according to canon ix of the Plenary Council of Milevis in 402. The presidency rightfully belongs to the delegates of the Holy See, if there are any; if not, to the partiarch or primate, or to the oldest metropolitan, as was the custom in the Frankish kingdoms. A national council freely discusses the ecclesiastical or mixed matters which have been the cause of the meeting; the decisions adopted become a law for the entire nation, but like those of provincial councils, and with much more reason, they must first be submitted to the approval of the Holy See.

No historical or canonical interest of any importance determines which of the ancient councils held at Antioch, Alexandria, and Constantinople may be classed as national councils. Obviously, the presence and authority of the patriarchs of the various churches rendered this sort of meeting very easy. On several occasions the Patriarchs of Constantinople convoked the whole episcopate of the Byzantine Empire. But these councils have left no very distinct traces in the Greek canonical collections, whereas those of the Nestorian Church of the Persian Empire consist chiefly of canons of the national councils held from 410 to 775 (cf. "Synodicon Orientale", ed. Chabot, 1903). In the West also there was an important series of national councils, the most noteworthy being the assemblies of the episcopate of Christian Africa under the presidency of the Bishop of Carthage, especially the twenty-one plenary councils held during the episcopate of Aurelius (393 427), which form almost the entire canonical collection of Africa. In like manner the Spanish canonical collection is chiefly composed of the canons of the seventeen national councils which the episcopate of the Visigothic Kingdom held, nearly always at Toledo, from 589 to 694. But while the African councils consisted wholly of bishops, the kings and nobles of the kingdom assisted at those of Toledo, without, however, otherwise interfering in matters properly religious. The same was true of the Frankish national councils, where the episcopal assemblies were, as it were, duplicated by an assembly of nobles; occasionally, as at Mainz in 813, there was a third group, composed of abbots and monks. The list opens with three national councils which assembled the episcopate of the three kingdoms into which Gaul was divided at the beginning of the fifth century: Agde (506) for the Arian Visigothic Kingdom; Orléans (511), for the Kingdom of the Franks; Epaone (517), for that of the Burgundians. Most of the Frankish councils held under the Merovingians and Carlovingians assembled the episcopate of one, sometimes of several kingdoms. The king often assisted thereat and the conciliar decisions bearing on discipline were the subject of royal ordinances or capitulars. These double assemblies of bishops and *comites* (counts) were the usual method in the Frankish kingdoms, and Thomassin rightly regards them as the historical origin of parliaments. The acts of these meetings have not been gathered into a uniform complete canonical collection.

In recent centuries Catholic national councils have been resumed in the East and the West at the instance of the popes and under the presidency of their legates. Without going into details, the most noteworthy of these were: the provincial or national councils of Mount Lebanon, for the Maronites, in 1736, confirmed by Benedict XIV; those of 1803 and 1871 for the Albanians; those of Zamosk 1720 and 1891 for the Ruthenians; that of 1841 for the Melchites; that of Sciarfa in the Lebanon (1888) for the Syrians; that of Cairo in 1898 for the Copts; that of Rome in 1911 for the Armenians; in America the three plenary Councils of Baltimore (1852, 1866, 1884), and the plenary rather than national council of Latin America in 1899.

Synods, Mixed. *See* Councils, General, subtitle II.

Synoptics, the name given since Griesbach's time (about 1790) to the first three canonical Gospels. It is derived from the fact that these Gospels admit,—differently from the evangelical narrative of St. John,—of being arranged and harmonized section by section, so as to allow the eye to realize at a glance (*σύνοψις*) the numerous passages which are common to them, and also the portions which are peculiar either to only two, or even to only one, of them.

I. *Differences and Resemblances.*—Turning over the pages of an ordinary harmony of the four, or of a synopsis of the first three, Gospels, which show in parallel columns the coincident parts of the evangelical narratives, the reader will at once notice the large amount of matter which is common to the Gospels of St. Matthew, St. Mark, and St. Luke. Brief as these three sketches of Christ's life actually are, they run parallel to one another in no less than 330–370 verses or about one-third of their whole account of Christ's words and deeds, while, with the exception of a few incidents (68 verses), the whole contents of St. Mark are practically found in St. Matthew and in St. Luke. This agreement in the facts related appears all the more striking, because of the great amount of historical material which must have been at the disposal of each Synoptical writer. The Synoptists are, each and all, fully aware that Jesus healed vast numbers of various diseases; they nevertheless agree in selecting the same cases of healing for fuller record; and while they distinctly speak of His unceasing and extensive teaching, yet they usually concur in reporting the same discourses. A no less wonderful similarity may be observed between the first three Gospels with regard to the general conception and the order of the whole narrative. In all three, Christ's public life is distinctly connected with the preaching of St. John the Baptist, is chiefly confined to Galilee, and is set forth in certain epochs, as the early Galilean ministry, the crisis in Galilee, the ministry in Perea and Jerusalem, and the tragic end in the Holy City followed by a glorious Resurrection. In constructing their several records, the Synoptists adopt the same general method of presentation, giving not a consecutive narrative that would result from a fusing of the material employed, but a series of little accounts which are isolated by peculiar introductory and concluding formulæ, and which repeatedly agree in details and in order even where a deviation from the chronological sequence is manifest. Together with all these resemblances, there is throughout the Synoptics a remarkable agreement in words and phrases, which can be more particularly realized by means of a Greek harmony or a close translation of the original text. This verbal agreement in the Greek Gospels is all the more surprising, as Jesus spoke in Aramaic, and as in most cases, it is plain that the verbal resemblances cannot be referred to an accidental similarity, since they are due to the common use of very peculiar terms and expressions, of identical variations from either the Hebrew or the Septuagint in quotations from the Old Testament.

The interconnexion of the Synoptics is not, however, simply one of close resemblance, it is also one of striking difference. When compared attentively, the three records appear distinct as well as similar in incidents, plan, and language. Each Synoptical writer introduces into his narrative fragments more or less extensive, at times entire episodes which are not related by the other two Evangelists. St. Mark says nothing of the infancy and the early life of Christ, while St. Matthew and St. Luke, who speak of them, do not as a rule narrate the same facts. St. Mark does not even allude to the Sermon on the Mount, and St. Luke alone narrates in detail the last journey of Jesus from Galilee to Jerusalem. On the other hand, Matt., xiv, 22—xvi, 12 and Mark, vi, 45—viii, 26, record a series of Galilean incidents which are nowhere found in the third Gospel. Despite his obvious conciseness, St. Mark has two miracles and two parables wholly peculiar to himself. St. Matthew, who apparently does not aim at brevity, makes no reference to the Ascension. Moreover, in the very passages which indicate a close relation of the three, or of at least two, Synoptics, in their sources, minor differences in the events recorded continually appear, which can be fully realized only through a diligent study of the parallel passages, or through the perusal of larger commentaries in which such constant differences are distinctly pointed out. At times the divergences are so great as to appear, at first, actual contradictions. Of this description are the differences noticeable between the genealogies of Jesus (Matt., i, 1–17; Luke, iii, 23–38), the accounts of the episode of the demoniacs of Gerasa (Matt., viii, 28–34; Mark, v, 1–20; Luke, viii, 26–39), of the miraculous healing connected with Jericho (Matt., xx, 29–34; Mark, x, 46–52; Luke, xviii, 35–43), of the petition of the mother of James and John (Matt., xx, 20–28; Mark, x, 35–45), of the incidents relative to the Resurrection, etc. The general disposition of the events narrated betrays also considerable differences. Thus while St. Matthew devotes three successive chapters to the Sermon on the Mount (v-vii) and gives together the parables of the kingdom in one chapter (xiii), St. Luke divides this twofold topic into several portions which he connects with distinct circumstances. It is well known too, that St. Matthew very often gathers together topics which are similar, while St. Mark and St. Luke follow more closely the chronological order, whence arise numerous transpositions which affect the general arrangement of the narrative.

Numerous variations can likewise be noticed in the particular arrangement of facts and words, for the elements of the one and the same episode often occupy a different place in one or other of the Synoptics, or either Evangelist suppresses or adds a detail which modifies the incident. Finally, the verbal differences between the first three Gospels are hardly less numerous and striking than their verbal resemblances. Each Synoptist has his peculiar and favourite words and expressions, which have been carefully tabulated by recent Biblical scholars (Hawkins, "Horæ synopticæ"; Allen, on St. Matthew; Swete, on St. Mark; Plummer, on St. Luke). The verbal differences appear in the very passages which abound in verbal coincidences (cf. for instance, Matt., xviii, 2, 3; Mark, ix, 47, 48), the identity of expression never extending through passages of any length, and unless in reported discourses of Christ rarely beyond a few words at a time. This is often due to the use of synonymous terms, or of different tenses, or of different propositions, or of short glosses which either Synoptist adds to the same name or detail. We find for instance, in Matt., ix, 6, *κλίνη*, in Mark, ii, 11, *κράββατος*, in Luke, v, 24, *κλινιδίον*; in Matt., iii, 16, "Spirit of God", in Mark, i, 10, "Spirit", in Luke, iii, 22, "the Holy Ghost"; etc. And what is of particular significance in this connexion, is the fact that the verbal differences occur when one should most naturally expect an absolute identity of expressions, as for instance, in the words of the institution of the Holy Eucharist, in the record of the title on the Cross, etc.

II. *The Synoptic Problem.*—These resemblances and differences, the extent and complexity of which grow upon the student who compares carefully the Synoptic Gospels and contrasts them with St. John's narrative, constitute a unique phenomenon in ancient and modern literature. They are facts which no one can refer either to mere chance, or to the direct influence of inspiration. On the one hand, the resemblances are too numerous and too striking to be regarded as explicable on the hypothesis that the first three Evangelists wrote independently of one another. On the other, the differences are at times so significant as to imply that they are due to the use of different documents by the Evangelists, as for example in the case of the two genealogies of Jesus Christ. The harmony and the variety, the resemblances and the differences must be both accounted for. They form together a literary problem,—the Synoptic Problem, as it is called,—the existence of which was practically unknown to the ancient ecclesiastical writers. In point of fact, St. Chrysostom and St. Augustine are the only Fathers who have formulated views concerning the mutual relation of the Synoptic Gospels, and the writers of the Middle Ages do not seem to have taken into account these patristic views which, after all, were far from affording a complete solution of that difficult question. Subsequent leading scholars, such as Grotius, Rich, Simon, Le Clerc, had little more than a suspicion of the problem, and it is only in the course of the eighteenth century that the scientific examination of the question was actually started.

Ever since the last quarter of that century, the discussion of the origin of the mutual relationship between the first three Gospels has been carried on with great ardour and ingenuity especially in Germany. As might well be expected, the supposition that these Gospels are so like one another because their respective authors made use of each other's writings was first tried, and in settling the order, that in which the Synoptic Gospels stand in the canon first found favour. As fresh investigations brought new facts to light, new forms of hypothesis sought to satisfy the facts, with the gradual result that the domain of possibility well-nigh appears to have been measured out. Numerous and conflicting as the successive attempts at solution have been, their history shows that a certain progress has been made in the discussion of the Synoptic Problem. The many relations of the question have come into clearer light, and the data for its solution have been revealing themselves while mere a priori views or unsound inferences have been discarded.

III. *Solutions of the Synoptic Problem.*—All attempts at assigning the cause of the resemblances and differences of the first three Gospels admit of being classified under three general heads, according as the relationship of the Synoptics has been explained by appealing to: A, oral tradition; B, mutual dependence; or C, earlier documents.

A. *Oral Dependence.*—The hypothesis of oral tradition implies that before our Gospels arose there were no written records of Christ's ministry, or at least none which was used by the Synoptists. It asserts that these Evangelists have drawn from narratives of sayings and deeds of Jesus which eye-witnesses of His public life handed on by word of mouth, and which gradually assumed a greater or less degree of fixity with constant repetition. According to this theory, the resemblances between the first three Gospels can be easily accounted for. The sections common to all are explained by a cycle of teaching probably formed in Jerusalem, actually made up of incidents and discourses connected with Christ's life from the baptism of John to the Ascension (cf. Acts, i, 21, 22), and faithfully preserved with regard to order and language by the trained retentiveness of Eastern memories. In like manner, the differences of the Synoptic Gospels are easily explained. Sections are found only in two, or one, of the Gospels because the bond established between the narratives was at times modified to suit the various circles of the hearers, and other differences in order or wording are due either to previous variations in oral tradition or to the personal initiative of the several Evangelists who fixed it in writing. This theory of an oral Gospel, handed on everywhere in very similar form, was enunciated by Herder, and chiefly elaborated by Gieseler and A. Wright. With differences in detail, it has been admitted by a large number of Catholic exegetes (Schegg, Haneberg, Friedlieb, Kaulen, Cornely, Knabenbauer, Meignan, Fillion, Fouard, Le Camus, Felten), and by many Protestant scholars (Credner, Guericke, De Wette, Ebrard, Lange, Hase, Wetzel, Thompson, Westcott, Godet, etc.). It undoubtedly points to a *vera causa* in the spread of the Gospel, and cannot be wholly left out of account in an endeavour to explain the origin of our written records of Christ's life. One of its claims to acceptance is that it dispenses with the unseemly supposition that any of the Evangelists made wholesale use in their own Gospels of written records composed by others, and nevertheless did not reproduce them with greater fidelity. Appeal is also made in favour of this theory, to its simplicity, and to its aptness to account for the resemblances and the differences exhibited by the Synoptics.

By itself, however, the hypothesis of oral tradition can hardly be considered as an adequate solution of the Synoptical problem. First, it does not satisfactorily explain the selection of the material included in our first three Gospels. Oral tradition had undoubtedly preserved much more than the Synoptics record, and of this the Evangelists themselves were fully aware (Matt., xi, 21; xxiii, 37; Luke, x, 13; John, xxi, 25; etc.); whence then does it come that the framework of the Synoptic narrative is practically the same in all the first three Gospels, that it consists very largely of the same events and the same discourses, and gives no account of Jesus' ministry in Jerusalem, that is, of His ministry in the very place where the oral tradition is generally supposed to have been formed?

Secondly, the hypothesis of oral tradition does not account for the general identity of order noticeable in the Synoptics. The order of St. Mark is, as it seems, the fundamental order, and it can hardly be said to have been known simply as an oral tradition to St. Matthew and St. Luke, else the sequence of its sections, when additions were made by these two Evangelists, would not have remained as little altered as it has. Again and again, the thread of the common order is resumed at the point at which it had been left. On the supposition of a written source to which St. Matthew and St. Luke had recourse, this is natural enough. But if they depended on memory, the natural effect of the working of the laws of association, would be that when some fresh incident or some part of Christ's teaching was recalled, the old order would be disturbed more or less extensively than we notice it to be.

Thirdly, the verbal relationship between the Greek Gospels is not satisfactorily explained on the hypothesis of oral tradition. This oral tradition was primitively in Aramaic, and the coincidences in the Greek with regard to rare words, irregular arrangement of the sentence, etc., cannot be explained by supposing that our Gospels are independent translations of one and the same Aramaic oral tradition. It is true that in order to account for these coincidences in the Greek, the early formation of an oral Greek tradition which would more or less be the counterpart of the Aramaic one, and which would have been directly utilized by our Evangelists, has been postulated by many advocates of the theory under review. But it remains very doubtful whether such oral Greek tradition would really explain the coincidences in question; and it is quite certain that it would not satisfactorily account for the variations in Greek wording of such important passages as the words of the institution of the Holy Eucharist, of the Lord's Prayer, of the Beatitudes, of the title on the Cross, etc. Lastly, there are historical proofs of the existence of written documents at the time when our Synoptics were written (cf. Matt., xxiv, 15, 16; Mark, xiii, 14; Luke, i, 1), and the most natural supposition is that our Evangelists availed themselves of them. In fact, many phenomena disclosed by the attentive study of the first three Gospels render the supposition so probable, not to say necessary, that several advocates of the hypothesis of oral tradition (Eckermann, Fillion, Le

Camus, etc.), have been led to admit a limited use of written helps by the Synoptists.

B. *Mutual Dependence.*—The hypothesis of mutual dependence assumes that the authors of the Synoptic Gospels used each other's writings, each successive writer availing himself of earlier contributions, so that the second Evangelist (in the order of time) borrowed from the first, and the third from both first and second. According to it, the passages which are alike reproduce those of earlier writings; those which are divergent come from the personal memory of the author or from an oral source. This, it is said, is the most natural, as it is the oldest, manner of explaining the resemblances and differences of the first three Gospels. It is the most natural, inasmuch as if three other writers exhibited such a close resemblance in their works as the Synoptists do, it would readily occur to the reader's mind that they are not independent of each other. It is the oldest also, for it goes back to St. Augustine who formulated it in a general way in his "De consensu evangelistarum" (I, ii, 4), and who in describing the order of succession of the Synoptics, naturally followed the one embodied in the canon: Matthew, Mark, Luke. This order of succession has been accepted by many scholars, Catholic (Hug, Danko, Reithmayr, Patrizi, De Valroger, Wallon, Schanz, Coleridge, Bacuez) and Protestant (Mill, Wetstein, Bengel, Credner, Hilgenfeld, etc.). But every other possible order of arrangement has found advocates, in accordance with their respective views concerning the priority and order of sequence of the Synoptics. The order: Matthew, Luke, Mark, was advanced by Griesbach and has been adopted by De Wette, Bleek, Maier, Langen, Grimm, Pasquier. The arrangement: Mark, Matthew, Luke, with various modifications as to their interdependence, is admitted by Ritschl, Reuss, Meyer, Wilke, Simons, Holtzmann, Weiss, Batiffol, Weizsäcker, etc. It is often designated under the name of the "Mark hypothesis", although in the eyes of most of its defenders, it is no longer a hypothesis, meaning thereby that it is an established fact. Besides these principal orders, others (Mark, Luke, Matthew; Luke, Matthew, Mark; Luke, Mark, Matthew) have been proposed, and more recent combinations (such as those advocated by Calmet, Zahn, Belser, and Bonaccorsi) have also been suggested. As regards the theory of Baur and his school concerning the composition of the Gospels, suffice it to say that it should not really be connected with the hypothesis of mutual dependence, inasmuch as its contention as to the origin of the canonical Gospels has nothing to do with the literary process of composition propounded by that hypothesis to explain the relationship of the Synoptics.

By itself alone, the theory of mutual dependence cannot be regarded as a full solution of the Synoptic Problem. Whichever order be adopted, there are always narratives where one of the Evangelists,—at times, St. Mark himself,—is more complete than the one who is given as his source, and consequently is independent of him, so that in all such cases appeal must needs be made either to oral tradition or to non-canonical writings. Again, in any form of the theory, the differences in form of narration, especially where one writer seems irreconcilable with the other, and the differences in arrangement, where the temporal sequence is very close, remain unaccounted for. Obviously, there is little need to criticize all the forms of this hypothesis by bringing forward special instances of the general objections just mentioned. These forms of it, however, which have found most able and numerous advocates, may be briefly considered. Against the form which asserts that St. Mark made use of St. Matthew, and St. Luke made use of both, it may more particularly be urged: (1) that St. Mark bears in the Greek too manifest a stamp of originality that it should be regarded simply as the work of an abbreviator of St. Matthew; (2) that the use of both St. Matthew and St. Mark by St. Luke, even though we should suppose it to be a fact, is insufficient for explaining by itself alone the presence in our Third Gospel of an independent genealogy of Christ, the insertion by St. Luke of an altogether new narrative of Jesus's birth and infancy, his scattering of many of Christ's sayings grouped by St. Matthew in the Sermon on the Mount, his detailed account of the Perean journey which is absent from both St. Matthew and St. Mark, etc.

The arrangement advocated by Griesbach, to wit, that St. Luke made use of St. Matthew and St. Mark utilized both, is likewise open to weighty objections. Plainly, the supposition that St. Mark followed and epitomized the other two Synoptics renders it more difficult to account for the freshness and power of his narrative; and in point of fact, it clearly appears that if a direct dependence is to be admitted at all, it is time and again not on the side of St. Mark's rugged style and shorter account of the Galilean ministry, but on the side of the smoother form and larger framework of St. Matthew and St. Luke. Again, the dependence of St. Luke on St. Matthew alone leaves unaccounted for the additions, transpositions, etc., already referred to. Finally, the following are the principal difficulties urged against the "Mark hypothesis". Its supposition that St. Mark is prior to the other two Evangelists, goes against the traditional data which describe St. Matthew's Gospel (in the Aramaic) as written first, and St. Mark's narrative as originating independently of any written Gospel. Again, the assumed priority of St. Mark to St. Matthew and St. Luke makes it hard to imagine on what principle the later two Evangelists partitioned between themselves practically all the contents of St. Mark's writing. It is also urged that in the "Mark hypothesis" neither the simple dependence of St. Matthew on St. Mark alone, nor that of St. Luke on both St. Matthew and St. Mark can account for all the phenomena (additions, inversions, verbal changes, etc.), which are disclosed by an attentive study of the Synoptics.

C. *Earlier Documents.*—The documentary hypothesis is the prevalent theory among non-Catholics. Its general principle of solution of the Synoptic Problem is that in the composition of their writings, the first three Evangelists have all made use of earlier written material. The application of this general principle has given rise to a great number of suppositions, the principal of which may be briefly considered. Since Eichhorn (close of the eighteenth century), and especially since Resch (close of the nineteenth), attempts have been made to get behind our Greek Gospels to one or more Semitic documents used in them, and thus to account for the relationship of the Synoptics. This written source, the primitive contents and wording of which might still be detected, was Hebrew according to Resch and Abbott, Aramaic according to Marshall, Hoffmann, etc. In general, the variation in the words and clauses in our Gospels is accounted for by the different translations given to the Aramaic or Hebrew words. It is undoubted that the recent advocates of the hypothesis of a Semitic source have displayed great learning and ingenuity in pointing out the Semitic expressions which might underlie the divers readings noticeable in parallel passages of the Synoptics. It is undoubted, too, that the general background of the Gospels is Semitic in thought and forms of expression, and even that Semitic documents (for instance, Christ's genealogies) have been used by their authors.

By itself alone, however, the theory of a Semitic source does not appear a satisfactory solution of the Synoptic Problem. It is not certain that the whole Semitic background of the Synoptics had assumed a written shape before it was utilized by the Evangelists, for countless instances of Semitic forms of thought and expression may equally well be accounted for through the direct use of oral tradition, to which source, as a matter of fact, Papias refers the origin of St. Mark's Gospel. Again, the differences between the parallel passages of the first three Gospels are very often such as to point directly to the use by the Synoptists of the same Greek sources, so that in large portions of their works, it is much more natural to account for such differences by the individual literary taste, general purpose, etc., of the Evangelists, than by an appeal to the collateral use of a Semitic original, or a multiplicity of versions of it, the very existence of which is doubtful, and the knowledge of which by the Synoptists is still more questionable.

A more plausible form of the documentary hypothesis goes back in substance to Schleiermacher (1817). It maintains that, at an early period, many evangelical fragments, Greek as well as Aramaic, were scattered throughout the Churches,—traditions floating about of which written accounts had been made. These the three Synoptists worked in their Gospels, together with materials which each had himself collected; and in this manner the coincidences and the differences of the Synoptics may be accounted for. This theory of a plurality of primitive documents,—which in certain of its modifications is combined with that of a dependence of later, on earlier, canonical Gospels,—is admitted by many scholars (Renan, Wrede, Schmiedel, Loisy, etc.). This form of the documentary hypothesis does not necessarily go against the inspired character of the Synoptic Gospels. The actual use of certain primitive documents, notably by St. Matthew and St. Luke, may also be readily granted. But tradition ascribes to St. Mark's Gospel a very different origin from the one supposed by this theory, and a careful study of the contents and the style of that Gospel has recently convinced several prominent scholars that the work is not a compilation from written sources. Again, it is not proved that because St. Matthew and St. Luke employed written documents, they exclusively confined themselves to the use of such sources. In their day, oral tradition was certainly much alive. At that time, the difference between oral tradition and a document was not great in many cases where it had easily become stereotyped by frequent repetition. And it is not a safe position to deny the use of this tradition by St. Luke, in particular, that is, by a writer who would naturally utilize every source of information at his disposal. Finally, a constant appeal to new documents, the contents, extent, and very existence of which cannot, many a time, be ascertained, gives to this theory an air of artificiality which recommends it little as an exact description of the actual manner in which the Synoptic Gospels were composed.

The last general form of the documentary hypothesis which remains to be examined is the "Two Document theory", according to which two large works form the main sources of the Synoptics. One work like our Gospel of St. Mark, if not identical with it, is the source of the narratives common to the first three Gospels, and the other, containing the Sayings of Jesus, is the source of the didactic matter common to St. Matthew and St. Luke. Modified in various ways, this solution of the Synoptic problem has had, and has yet, numerous advocates chiefly among Protestant scholars. In the eyes of all such critics, the theory of only two main written sources is especially commendable for its simplicity and plausibility. The contents of the Synoptics comprise two classes of parallel sections: the one consists of narratives of actions and events found in all three Gospels; the other consisting of Christ's teaching appears only in St. Matthew and St. Luke. Now, as in the selection of material, the arrangement, and the language of sections parallel in all three, St. Matthew constantly agrees with St. Mark against St. Luke, and St. Luke with St. Mark against St. Matthew, but St. Matthew and St. Luke scarcely ever agree against St. Mark, the simplest supposition is that St. Matthew and St. Luke made independent use of St. Mark as we have it, or of a Gospel like it (Ur-Marcus). The freshness and power of St. Mark's narrative go also to prove its priority to that of the other two Evangelists. Thus far of the material common to the first three Gospels. The great bulk of the additional matter found only in St. Matthew and St. Luke consists mainly of the words and discourses of Jesus, and although it is very differently given as to historic connexion and grouping, yet it is pervaded by such similarity of thought and expression as to suggest forcibly the hypothesis of a single main source as its natural explanation. The "Two Document theory" is also claimed to explain the peculiar phenomenon of "doublets" in St. Matthew and St. Luke. Finally, it is said to be supported by tradition rightly interpreted. Papias, speaking of books about Christ written by St. Matthew and St. Mark, says: "Mark, being the interpreter of Peter, wrote carefully, though not in order, as he remembered them, the things spoken and done by Christ". "Matthew wrote the *Logia* in the Hebrew language, and every one translated them as he was able". These statements seem to point to two books as the fountains of evangelical written tradition. One can be distinctly named; it is practically our second Gospel. The other, according to Harnack, Wellhausen, Stanton, can still be reconstructed; it is a record of *Logia* chiefly embodied in our first Gospel (Ur-Mattheus) and also utilized by St. Luke.

The "Two Document theory" is advocated by many prominent critics (H. Holtzmann, B. Weiss, Wendt, Wernle, Soltau, Jülicher, Hawkins, etc.). Yet, is is not an adequate solution of the Synoptic problem. It leaves its defenders hopelessly divided on points of considerable importance, such as the compilatory character of St. Mark's Gospel; the extent and exact nature of the Logian document (Q) utilized by our first and third Evangelists; the manner of its use by St. Matthew and St. Luke, respectively; the question whether it was used by St. Mark also; the number of the sources employed by St. Matthew and St. Luke besides St. Mark and Q; etc. A greater difficulty sometimes urged against this theory, regards the priority of St. Mark, which its advocates treat as a point altogether settled. Tradition has it that St. Matthew's Gospel existed in a Semitic form before it was rendered into Greek, that is before it assumed the only form now available for a comparison, with St. Mark's narrative. Hence, it is claimed that St. Matthew's dependence in the Greek on our second Gospel is one arising from the fact that its Greek translation was made with the aid of our second Gospel, and leaving intact the priority of the earlier Semitic form of St. Matthew's Gospel to the composition of St. Mark's writing. Among other difficulties against the "Two Document theory" may be mentioned: (1) its inherent tendency to appeal to subsidiary written sources, the extent and nature of which cannot be determined; (2) its general disregard of the influence of oral tradition in the composition of the Synoptics; (3) its common, but very improbable, denial of St. Luke's dependence on both St. Matthew and St. Luke.

From the foregoing rapid survey of the attempts at solving the Synoptic Problem, it is plain that none of them has been really successful. The problem is very intricate; the historical information concerning the origin of our first three Gospels, incomplete; and every theory, one-sided. The satisfactory hypothesis, yet to be formulated, must be a combination hypothesis gathering and uniting, in due proportions, all the truths presented by the various opinions, and also a more thorough theory taking fully into account both the data of Patristic tradition and those disclosed by literary analysis. Such theory, when framed, will undoubtedly supply the fullest vindication of the historical value of our Synoptic records.

THE SYNOPTIC QUESTION AND THE BIBLICAL COMMISSION.—The only decree thus far enacted by the Biblical Commission, which has a bearing on the Synoptic Question, was issued 19 June, 1911. Its direct object is to affirm the traditional authorship, date of composition, and historical character of St. Matthew's Gospel. Accordingly, it declares that the author of our first Gospel is no other than the Apostle St. Matthew, who wrote before the other Evangelists and considerably before the destruction of Jerusalem, in the language of the Palestinian Jews for whom he composed his work. It authoritatively affirms that the original work of St. Matthew was not a mere collection of the sayings and deeds of Christ, but a Gospel substantially identical with our present Greek Gospel according to St. Matthew. It finally proclaims the historical character of our first Gospel and the genuineness of some of its portions (the first two chapters; dogmatic passages concerning the primacy of Peter, the form of baptism, etc.), which has been questioned by modern critics. Hence it is plain that by this decree the Biblical Commission did not intend to deal with the Synoptic problem, to set forth an explanation of the resemblances and differences disclosed by a comparison of our first three Gospels. Yet, the Roman decree has a particular bearing on the theories of mutual dependence and earlier documents put forth as solutions of the Synoptic question. In deciding the priority of St. Matthew's Gospel in its original language and substance, to the other evangelical narratives, the Biblical Commission has solemnly disapproved of any form of those theories which maintains that St. Matthew's original work was not a complete Gospel or the first Gospel in the order of time. In fact those Catholic scholars who admit either of these theories regard our Greek Gospel according to St. Matthew as a work which goes back in its primitive Aramaic form to the Apostle of that name, and restrict its dependence on St. Mark to its extant Greek translation.

(The names of Catholic authors are marked with an asterisk.)

FRANCIS E. GIGOT.

Syntagma Canonum, a canonical collection made in 1335 by Blastares, a Greek monk about whose life nothing certain is known. The collector aimed at reducing canon law to a handier and more accessible form than it appeared in the Nomocanon of Photius, and to give a more comprehensive presentation than the epitomes and synopses of earlier writers such as Stephen (fifth century), Aristenus (1160), Arsenius (1255), etc. The author arranged his matter in alphabetical order. He made 24 general divisions, each marked off by a letter of the Greek alphabet. These sections he subdivided into 303 titles, themselves distinguished by letters; for example, the third section contains such topics as: περὶ γάμου (about marriage), περὶ γυναικῶν (about women), etc. The titles ordinarily treat of the civil law (νόμοι πολιτικοί), as well as ecclesiastical law. Some titles however are purely ecclesiastical, others purely civil. The church ordinances are quoted from previous collections, especially from the Nomocanon (883), while the extracts from the civil law are for the most part transcribed without any reference to their origin. The compilation soon came into general use among the clergy, and preserved its authority even under Turkish rule. A translation into Servian followed close upon its first publication. It even worked its way into the political life of the Servian people through an abridgment which King Douchan appended to his code of laws (1349). From this the purely ecclesiastical enactments were excluded, but the civil law contained in the Syntagma was reproduced whenever adaptable to the social condition of the people. In the sixteenth century the Syntagma Canonum was translated into Bulgarian; in the seventeenth century into Russian.

JOHN DELAUNAY.

Syon Monastery, Middlesex, England, founded in 1415 by King Henry V at his manor of Isleworth. The "Monastery of St. Saviour and St. Bridget of Syon" was the only one in England belonging to the modified order of St. Augustine, as reformed by St. Bridget (see BRIGITTINES), and comprised thirteen priests, four deacons, and eight lay brethren, besides sixty nuns. The property extended for half a mile along the bank of the Thames, near Twickenham; and the chief duty of the community was to pray for the souls of the royal founder and his near relatives and for all the faithful departed. Martin V confirmed the foundation in 1418, and the first novices were professed in 1420. Six years later the Regent (John, Duke of Bedford) laid the first stone of the chapel; endowments and benefactions rapidly flowed in, and towards the close of the century and a quarter which elapsed between its foundation and dissolution, the annual income of the monastery was estimated at £1730, equal in modern money to 100,000 dollars. The good observance of Syon was maintained to the last; and even Layton and Bedell, Henry VIII's servile commissioners, could find little or nothing to bring against the community. The inmates were nevertheless expelled in 1539, and the buildings seized by Henry, who imprisoned his fifth wife, Katherine Howard, in them for some months. The nuns retired to a house of their order in Flanders, but in 1557, on the accession of Queen Mary, they returned to Syon, and the greater part of their property was restored to them. At the queen's death, however, they were once more exiled, and after various wanderings in France and Spain settled in Lisbon, where they still own property. The Lisbon community returned to England in 1861, settling at Spettisbury, Dorsetshire (transferred to Chudleigh, Devon, in 1887). The Isleworth monastery was granted by James I to the ninth Earl of Northumberland, whose descendants still hold it. The present mansion is mostly the work of Inigo Jones, the ancient mulberry-trees in the garden being, it is said, the sole relic of the conventual domain.

D. O. HUNTER-BLAIR.

Syra, Diocese of (Syrensis) a Latin diocese, suffragan of Naxos, comprising the Island of Syra of the Cyclades in the Ægean Sea. The island has an area of about thirty-one square miles and 32,000 inhabitants; it was first called Syria and also Syros, and appears to have been inhabited by the Phœnicians. It was the country of the swineherd Eumæus who described it at length (Odyssey, XV, 403 sq.); and of the philosopher Pherecydes, the teacher of Pythagoras. It possessed two leading cities, Syros (now the modern Hermupolis) and another city on the western coast where stands to-day Maria della Grazia. The island played no rôle in antiquity nor in the Christian epoch; it was not even a diocese, at a time when the smallest island possessed its bishop. Devastated several times during the Middle Ages with the other Cyclades by the Sicilians, Arabs, Turks, and Venetians, it was definitively conquered by these last in 1207. They kept it until 1522 when the corsair Barbarossa took possession of it for the Turks; after 1821 it was annexed to the Hellenic kingdom. The Venetians established there a Latin bishopric which was subject to the Archbishopric of Athens until 1525, afterwards to that of Naxos. The list of titulars may be found in Le Quien (Oriens christianus, III, 865–868) and in Eubel (Hierarchia catholica medii ævi, I, 492; II, 267; III, 324). The most celebrated among them is the Venerable John Andrew Carga, strangled by the Turks in 1617 for having refused to become a Mussulman (Pétridès in "Revue de l'Orient chrétien", V, 407–422). From the occupation of the island by the Turks in the sixteenth century, the Greeks established there a metropolitan: Joseph (Le Quien, op. cit., II, 233) is the earliest known, with Symeon who died in 1594 (Ampelas, "Histoire de Syros", 411) and Ignatius in 1596 (Miklosich and Mueller, "Acta patriarchatus constantinopolitani", V, 461). The island became for the most part Catholic (Ricaut, "Histoire de l'estat présent de l'Eglise grecque", 361; Hilaire de Barenton, "La France Catholique en Orient", 171–173).

Syra took no part in the Greek revolt of 1821; but here the refugees flocked and founded the town of Hermupolis, which rapidly became the leading port of Greece. Since 1870 the ports of Piræus and Patras have greatly injured it from a commercial standpoint. The diocese numbers 8000 Catholics, 21 secular priests and 8 regulars, 7 parishes, 7 churches with a resident priest, 3 without a priest, and 56 chapels. The Capuchins and Jesuits have each an establishment; the Sisters of Charity, 2 houses, one of which is a hospital; the Sisters of St. Joseph of the Apparition have a boarding-school.

S. Vailhé.

Syracuse, Archdiocese of (Syracusana), in Sicily. The city is situated upon a peninsula extending into the Ionian Sea, near the mouth of the River Anapus, on the banks of which the papyrus plant is still cultivated. The territory produces all varieties of grains, vegetables, and fruits. Of the two harbours of the city, the principal one is the largest in Sicily and one of the largest of the Mediterranean; two islets, San Marciano and Castelluccio, render it secure without obstructing the entrance. At present the exports exceed the imports. The cathedral is built on the ruins of an ancient temple of Minerva, which was a hexastylo-peripteros with thirty-six columns of which only twenty-two remain. In front of the cathedral are statues of St. Peter and St. Paul by Marabitti; in the interior are several pictures (Madonna of the Pillar; Birth of the Virgin) by Agostino Scilla, who also painted the frescoes of the vault of the Chapel of the Blessed Sacrament and the silver statue of St. Lucy. The baptismal font is fashioned from a large Greek crater, resting upon seven small lions of bronze, found in the catacombs of San Giovanni. Among the furniture is a storiated amber chalice. Other churches are: Santa Lucia, with a "Martyrdom" of the saint by Guinaccia; San Benedetto, containing a picture of the saint by Minniti; San Martino; San Spirito; San Domenico; Il Gesù (the church of the Jesuits), with paintings of the Venetian School and a statue of St. Ignatius by Marabitti; the Church of Santa Lucia dei Riformati without the city, possessing a painting by Caravaggio. Among the civic buildings are the fort of Giorgios Maniakes and Palazzo Montaldo, in the Gothic and Moorish styles. The museum is rich in both Greek and Latin inscriptions (among which are many Christian inscriptions from the catacombs) and fragments of statues, including a Venus leaving the bath. The public library has an important collection of medals. Ancient ruins at Syracuse are much less numerous than one would expect. There are still to be seen: the amphitheatre (epoch of Augustus); the Greek theatre, excavated from the rock; sepulchres also excavated in the rock; the colossal altar of Hiero II, seven hundred and sixty feet long, upon which, after the expulsion of Thrasybulus, four hundred and fifty oxen were sacrificed; the "Latomie", i. e. caves in the rock where condemned prisoners of war and others were incarcerated, of which the most famous is the "Ear of Dionysius". The fountain of Arethusa, which issues forth in the ward of Ortygia (the present Syracuse), in antiquity was sweet but since an earthquake of the twelfth century has become salt. The Catacombs of San Giovanni, of Santa Maria del Gesù, and the catacombs Cassai, similar to those at Rome, are well known; besides these there have been discovered in the environs of Syracuse various tombs (Lentini, Valle del Molinello, Priolo, San Alfano, Palazzolo, etc.) which have rather the character of ancient tombs of the Sicelioti (aboriginal inhabitants). The present Syracuse occupies only a part of the ancient city. The latter was composed of five great quarters: (1) Ortygia, originally an island but after-

The Cathedral, Syracuse, Sicily

wards artificially joined with the mainland, the most ancient part of the city, containing the acropolis dismantled by Timoleon, and the palace of King Hiero, where in later days the Roman govenors resided; (2) Achradine, the most sumptuous quarter, where most business was conducted, situated on the small port or the Trogilos (now the Gulf of Manghisi). It was fortified and contained the temple of Jupiter Olympicus, the prytaneion, the theatre, and the catacomb of San Giovanni; (3) Tyche, the most populous part, deriving its name from the temple of Fortune and containing the palaces of Diocles and Dionysius, the lighthouse, and the Galeagra Tower; (4) Neapolis or Temenites, containing various temples, the theatre, the amphitheatre, and the Latomie; (5) Epipolai, which arose on the heights dominating the remainder of the city, and contained the fort Euryalos. All the city was surrounded by strong walls and beyond Epipolai was the castle of Labdalon. The circumference of the city was 180 *stadia* (20 miles). The name Syracuse is derived from the swamps of the valley of the Anapus. The ancient aqueduct is still in use.

When in 734 the Corinthian Archias approached the isle of Ortygia, it was inhabited by natives whom he expelled. The colony flourished amid continual petty wars with the natives, whose greatest leader, Ducetius (450 B. C.) voluntarily surrendered to the Syracusans, who sent him to Corinth. The government was in the hands of the landowners (*geomoroi*), against whom in 484 the slaves revolted. The landowners were expelled, but were conducted back into the city by Gelon, tyrant of Gela, who in this manner became lord also of Syracuse. It being easier, as he said, to govern one hundred rich than a single poor man, the poor were sold. Otherwise Gelon was an excellent ruler. He conquered the Carthaginians at Himera, aspired to dominion over the whole island, and was an object of wonder to all the aristocrats of Syracuse. It was he who aggrandized the city by bringing in the inhabitants of Camarina, of Megara, of Eubœa, and part of those of Gela. In 478 he was succeeded by his brother Hiero, who held a splendid court, favoured poets, orators, and philosophers. He contrived to avoid a war with Girgenti, aided the Cumaneans to conquer the Etruscans by sea (474), and established his dominion as far as Mt. Etna. He should have been succeeded by his son, but his brother Thrasybulus assumed the government, which he carried on with such cruelty and perfidy that he was expelled after a year. Syracuse was again free, and the government then became a democracy. Following the example of Athenian ostracism they introduced the practice of "petalism", according to which each man wrote on an olive leaf the name of the most powerful citizen; whoever obtained the greatest number of leaves was banished for five years. At first the democracy was favourable to the greatness of the city, which obtained a sort of hegemony over the Greek cities of Sicily, and also of Magna Græcia. The arts and literature flourished. The ambitious designs of the Syracusans at the expense of the Leontines (427) and of Egesta (416) caused the intervention of the Athenians, instigated especially by Alcibiades. In 415 a splendid fleet sailed for Sicily and anchored in the great harbour. The city would perhaps have fallen if the Spartans, lead by Gylippos, had not come to the rescue. Finally, in September, 413, the Athenian army and fleet were totally destroyed. The prisoners were either slain or thrown into the Latomie. Syracuse received from Diocles a new constitution and new laws which were most severe. But soon the interference of Syracuse in the quarrels of Egesta and Selinus provoked the intervention of Carthage. The victories of the Carthaginians at Himera (409) gave the opportunity to Hermocrates, then an exile, to attempt to overturn the Government, an attempt which cost him his life (407). Dionysius, proceeding more craftily, first had himself elected among the judges. By flattering the common people and discrediting his colleagues he obtained for himself the sole command of the army and succoured Gela against Hannibal the Elder (405). On his return the people gave him unlimited powers. He surrounded himself with a bodyguard, fortified and enlarged the city, combatted with varying fortunes the Carthaginians, who were conquered at Motye in 397, and obliged to retreat from Syracuse, which they had besieged by land and by sea (396). Every reverse of the tyrant was followed by revolts, which were, however, always crushed with extreme severity. Having made peace with the Carthaginians in 392, he attempted the subjection of Magna Græcia as well, until the activities of the Carthaginians called him back to Syracuse (383–68). Dionysius perfected the science and technic of war, favoured poets and philosophers, and was a wise ruler, but he was suspicious and cruel.

He was succeeded in 368 by his son Dionysius II, a vicious young man, upon whom his uncle Dion and Plato in vain attempted to exercise a beneficent influence. Dion deposed him in 356, but imprudently rendered himself unpopular and was slain (354) by the Athenian Callipus. The latter was in turn expelled by Hipparinus, another son of Dionysius I (353–51). Nysæus followed in succession (350–47), but in 346 Dionysius II, who had remained in exile at Locri, expelled Nysæus, and resumed the government with greater tyrnanny than ever. The nobility conspired against him, and summoned Hicatas, tyrant of Leontini, who succeeded in conquering and imprisoning Dionysius. Others, however, had applied for aid to Corinth, which in 345 sent Timoleon, who conquered Hicatas and the Carthaginians (340), and re-established the constitution of Diocles. In 317 Agathocles, an able general, by the slaughter of six hundred of the richest Syracusans obtained the appointment to the command of the troops and the government. A good ruler, he warred with the Carthaginians, who in 311, for the third time, entered the port of Syracuse. By an act of supreme audacity, Agathocles shifted the scene of the war into Africa and thus liberated his country. His star afterwards declined and he was killed by his nephew Archagathus (289). The city fell into a state of anarchy, ended in 288 by Hicatas, who was in turn deposed by Tinion (280). In 271 it was found necessary to summon the aid of Pyrrhus, King of Epirus, who raised the siege of the city, but soon retired. The ravages of the Mamertines gave occasion to Hiero II to oppose them successfully, and thus to acquire the government of Syracuse (269). This war brought him into opposition with the Romans, with whom he finally concluded peace by becoming their tributary, and even aided them after their disaster at Cannæ. His nephew and successor, Hieronymus (216), changed this policy, forming an alliance with Hannibal, which policy was continued after his murder by the popular government. For this reason the city was besieged and blockaded in 214 by Claudius Marcellus, and finally taken and sacked in 212. The statues and other objects of art or of value were transported to Rome. Syracuse became the seat of the Roman government in Sicily, and remained such until the Byzantine epoch. During the Roman period the Latin language replaced the Greek, which was restored under the Byzantines. From 663 to 668 the Emperor Constantine II resided here until he was slain by his general Mezezius, who in his turn was killed by the soldiery of Italy. News of these events brought over the Saracens from Africa, who sacked the city. A century later (878) the city was taken and pillaged for forty days by the Arabs. Its decline, which began during the Roman period, progressed more and more, particularly after Palermo became the capital. In the attempted reconquest by the Byzantines, George Maniakis, after having taken Messina, captured Syracuse (1038). In 1086 it was taken by Count Ruggiero, and from this time it followed the fate of Sicily. In 1194 it was besieged and captured by the Emperor Henry VI; on the other hand, in 1298, it successfully resisted the Aragonese fleet, and in like manner the blockade by the French admiral, Vivonne (1677). In 1504 it became the residence of the Spanish viceroys, but after a century this honour was given to Palermo, whither the noble families were also transferred. In 1542 and again in 1693 it was damaged by earthquakes. In 1798 and 1805 the port of Syracuse was of great importance for the operations of the English fleet against the French.

Among the illustrious Syracusans of antiquity were: the poets Theocritus, Callimachus, and Moschus; Epicharmus, the writer of comedies; the philosopher Philolaos; the orators Ctesias, Dion, and Lysias; the historian Flavius Vopiscus, and St. Methodius, monk and Patriarch of Constantinople. (d. 1847). Syracuse claims to be the second Church founded by St. Peter, after that of Antioch. It also claims that St. Paul preached there. As the first bishop it venerates St. Marcianus, the date of whose life is not an easy matter to establish, since too little authenticity can be assigned to the list of the seventeen bishops who were predecessors of Cherstus, to whom the Emperor Constantine wrote a letter. In the times of St. Cyprian (the middle of the third century), Christianity certainly flourished at Syracuse, and the catacombs clearly show that this was the case in the second century. Besides its martyred bishops, Syracuse boasts of not a few other martyrs, such as Sts. Benignus and Eugarius (204), St. Bassianus (270); and the martyrdom of the deacon Euplius and the virgin Lucy under Diocletian are beyond doubt true. The names of the known bishops of the following century are few in number: Germanus (346); Eulalius (465); Agatho (553), during whose rule Pope Virgilius died at Syracuse; Maximianus and Joannes (586), who received letters from St. Gregory the Martyr; while another bishop was denounced by Pope Honorius for the protection which he accorded to women of the streets; St. Zozimus (640), who founded the monastery of Santa Lucia fuori-le-mura; St. Elias (d. 660). Of Marcianos II it is related that he was consecrated not at Rome, but at Syracuse, since the Emperor Leo the Isaurian (726) had removed Southern Italy from the jurisdiction of Rome, and had then elevated Syracuse to the dignity of a metropolitan see, over the thirteen other dioceses of Sicily. Stephen II (768) carried to Constantinople the relics of St. Lucy for safety against the Saracen incursions. Gregorios Asbestas (about 845) was deposed by St. Ignatius, Patriarch of Constantinople, and then became the principal abettor of the schismatic Photius. In 878 St. Sophronius, together with the monk Theodosius, was thrown into prison at Palermo where he died in a dungeon. Until the Norman Conquest the names of further bishops are not known. The series reopens in 1093 with Bishop Roger, who received the pallium from Urban II; in 1169 the Englishman Richard Palmer was also invested by papal authority. In 1188 the see became suffragan of Monreale. Among the bishops of this period are: Rinaldo de Lusio, killed in 1154; Pietro de Moncada (1313) and Ruggero Bellomo (1419), who restored the cathedral; Jacopo Venerio (1460), afterwards cardinal; Pietro de Urries (1516), ambassador of Charles V to the Lateran Council; Gerolamo Bononi (1541), a distinguished reformer at the Council of Trent; Jacopo Orozco (1562), who introduced the Roman ritual in place of the Gallican, and who founded the seminary. During the sixteenth and seventeenth centuries, celebrated synods were frequently held at Syracuse. Bishop Annibale Termini (1695) rebuilt the church, thirty-five monasteries, and the seminary, which had been destroyed by an earthquake. In 1816 the Diocese of Caltagirone was detached from Syracuse. Piazza Armerina and Noto were made its suffragan sees, but the latter was detached in the same year.

The archdiocese has 31 parishes, 400 secular and 70 regular clergy, with 300,000 souls; six monasteries for men and eight convents for women; it publishes a Catholic weekly and "Il Foglio Ecclesiastico".

Syracuse, Diocese of (Syracusensis), in the State of New York, comprises the counties of Broome, Chenango, Cortland, Madison, Oneida, Onondaga, and Oswego, and contains an area of 5626 square miles, a little more than one-ninth of the entire state. Out of a population of 609,041, about 161,000, or a little more than one-fourth, are Catholics.

Missions Among the Indians.—The Oneidas and the Onondagas occupied lands near the shores of the lakes which bear their names. The first chosen president of the Iroquois was the venerable Ato-tao-ho, a famous Onondaga chief. The Onondagas were the central nation of the League, and not far from the present episcopal city, on Indian Hill, between the ravines formed by the west and middle branches of Limestone Creek in the town of Pompey, about two miles south of Manlius, was the village of Onondaga, the seat of government for the League of the Five Nations. It is probable that some of the Franciscan Fathers of the Recollect reform, whom Champlain obtained from France in 1614 to minister to the French settlers and convert the natives, visited this territory and offered up the Holy Sacrifice of the Mass on the shores of Lakes Onondaga or Oneida, and perhaps in what is now Oswego as early as 1615. Father Le Moyne, S.J., however, must be considered the real founder of the Church in the Diocese of Syracuse. Fathers Joseph Chaumonot and Claude Dablon were selected to begin the work of evangelization. They said Mass on the chosen site Sunday, 14 November, 1654. A little bark chapel was soon constructed with the assistance of the Indians. St. John the Baptist had been adopted as the patron of the mission, and it was doubtless under his patronage that this first chapel on the soil of New York was dedicated. Another chapel was built for the French settlers, St. Mary's of Ganantaa (Lake Onondaga). But these first missions among the Onondagas and the Oneidas had but an ephemeral existence. The Iroquois were constantly incited against the French missionaries by both the Dutch and English in Albany. James II ascended the throne of England in 1685 and openly professed the Catholic Faith. While Duke of York (1682) he had appointed Colonel Thomas Dongan Governor of the Colony of New York. Dongan, an Irishman and a Catholic, presided over the first representative assembly of New York which gave us the charter of liberties. Loyal to his Faith and country alike he sought to preserve and perpetuate the Catholic missions among the Iroquois without strengthening French influence in the colony. For this purpose he brought over with him three English Jesuits: Thomas Harvey, Charles Gage, and Henry Harrison. He established a Latin school in New York and placed it in charge of these Jesuits. He planned also to establish a settlement of Irish Catholics in the interior of the colony, very likely somewhere within the limits of the present diocese. But when Dongan fell all prospect of liberty for Catholic worship in the colony of New York disappeared, and the hope was expressed at the time of his downfall "that Papists would not henceforth come so freely to settle in the colony". Governor Bellemont of New York secured the passage of a law by the colonial legislature punishing with perpetual imprisonment any priest remaining in the province or coming after 1 November, 1700, and any priest who escaped from his dungeon was liable to the penalty of death if he should be retaken. To harbour a Catholic was to incur a fine of £250 and to stand in the pillory for three days. Under these circumstances the Jesuit missions were necessarily closed among the Five Nations. The mission of Ogdensburg, established a little later for the Onondagas and the Oneidas by Abbé François Picquet, a Sulpician, was finally abandoned in 1760, and the last chapter was closed in the story of the Jesuit missions among the Iroquois.

The Church among the Whites.—Less than a quarter of a century after the final destruction of the missions among the Iroquois the first white settler came to Oriskany. Gradually, a few Catholics followed, John Cunningham of Utica being the first Catholic of whom history makes mention. Rev. Paul McQuade who was ordained in Montreal in 1808 was the first missionary. He was pastor of St. Mary's church, Albany, from 1813 to 1815, and made frequent visitations to Utica. There is no record of where the first Mass was celebrated in Utica, but there is no doubt that it was in the home of John C. Devereux, one of the pioneer Catholics then (1813) a member of the board of trustees of St. Mary's church, Albany. Rev. Michael O'Gorman, a native of Ireland, pastor of St. Mary's church, Albany, from 1817 to 1819, was the founder of the first parish in the Diocese of Syracuse, though not the first pastor. He celebrated the first public Mass in Utica, in the Court House, 10 January, 1819. He organized the Catholics, and it was decided to erect a church for Central and Western New York, at Utica. A corporation was duly formed under the name of the "Trustees of the first Catholic Church in the Western District of New York". The first trustees were: John O'Connor of Auburn; John C. Devereux and Nicholas Devereux of Utica; Morris Hogan of New Hartford; Oliver Western of Johnstown; Thomas McCarthy of Syracuse; John McGuire of Rochester; and Charles Carroll of Genesee River. The resident congregation did not exceed thirty. Rev. John Farnan, a native of Ireland, appointed pastor, began at once the erection of St. John's church, Utica, and the little chapel was dedicated by Bishop Connoly, 19 August, 1821. While pastor of Utica, Father Farnan visited Rochester, in 1820, and celebrated the first public Mass in that city. He was also the first resident priest to attend the Catholics of Brooklyn. Among the Catholic laymen of that early period, might be mentioned James Lynch and Thomas McCarthy of Syracuse, and Dominick Lynch of Lynchville, now Rome, N. Y. Dominick Lynch was one of the first trustees of St. Peter's church, New York, and in 1790 when the Catholics of the United States presented an address of congratulation to George Washington, on his election to the presidency, he was one of the four laymen who signed it.

The Diocese of Syracuse.—The Diocese of Syracuse was projected by the Holy See, 12 September, 1886, and Rt. Rev. Patrick Anthony Ludden, D.D., then vicar-general of the Diocese of Albany, and rector of St. Peter's church, Troy, was nominated for the contemplated see. Father Ludden declined the honour. Thereupon, considerable correspondence passed between Archbishop Corrigan of New York and the Cardinal Prefect of the Sacred Congregation of the Propaganda in Rome. Finally, the Diocese of Syracuse was erected by Leo XIII, 20 November, 1886, and Father Ludden, in spite of his emphatic refusal, was appointed bishop of the new see, 14 December, 1886. He was born 4 February, 1836, near Castlebar, County Mayo, Ireland, and was ordained priest, 21 May, 1864, in the Grand Seminary, Montreal, by Bishop Bourget. He was rector of the Cathedral of the Immaculate Conception, Albany, under Bishop McCloskey, and vicar general under Bishops Conroy and McNeirny, and for seven years previous to his appointment as Bishop of Syracuse, he had been rector of St. Peter's church, Troy. He was consecrated at Syracuse, 1 May, 1887, by Archbishop Corrigan of New York, assisted by Bishop McQuade of Rochester, and Bishop McNeirny of Albany. When the diocese was established, there were but 64 secular, and 10 religious priests; 46 parish, and 20 mission churches; 15 chapels; 16 parochial schools; 2 academies; 5 orphan asylums; and 2 hospitals. Rt. Rev. Mgr. John Grimes, D.D., was appointed coadjutor Bishop of Syracuse, with the title of Bishop of Imeria, 9 February, 1909. He was born in Ireland, 18 December, 1852, made his ecclesiastical studies in the Grand Seminary, Montreal, and was ordained to the priesthood in Albany, 19 February, 1882, by Bishop McNeirny, of Albany. He was consecrated bishop 16 May, 1909, in the Cathedral of the Immaculate Conception, Syracuse, by Archbishop Farley of New York. St. John the Evangelist church in Syracuse was the pro-cathedral until 1903. At that time, Bishop Ludden purchased with his own money, property adjoining St. Mary's church which had been planned and constructed by Rev. James A. O'Hara, D. D., for many years one of the most prominent figures in Central New York. He died 26 Dec., 1889. Bishop Ludden, at his own expense, erected on the property a new cathedral and consecrated it 25 September, 1910.

Among the pioneer priests of the diocese may be mentioned: Right Rev. David W. Bacon and the Right Rev. Francis P. McFarland; Fathers William Beecham, Thomas Daly, Michael Hackett, Michael Heas, Bartholomew F. McLoghlin, Leopold Moczygemba, O.M.C., Walter J. Quarter. The prominent laymen include Francis Baumer, Ulric Burke, M. D., John Carton, John C. Devereux, Nicholas Devereux, Capt. David Dodge, Francis Kernan, James Lynch, John McCarthy, Thomas McCarthy, Peter McGuire, Michael McQuade, Francis Murphy, Owen O'Neil, Edward White.

There are many causes for the remarkable growth of the Catholic Church in Central New York. It was chiefly the Irish immigrants who dug the Erie Canal, which was begun 4 July, 1817, almost the exact date of the organization of the first church in the diocese. The salt springs of Syracuse discovered by Father Le Moyne, in the missionary period, added much to the wealth of these parts and attracted many. When through tariff reduction this investment became no longer profitable, extensive cotton and woolen mills, foundries and factories of all kinds, were established. Another cause which contributed to the growth as well as to the cosmopolitan character of the people, was the coming of various nationalities at different periods. The Germans began to come in small numbers, soon after the erection of the first church (1820). According to the official records, Rev. John Lewis Wariath was placed in charge of these immigrants as early as 1837. The Italian immigration began with the construction of the West Shore Railroad in the early eighties. The Poles began to locate in the diocese about a quarter of a century ago. They have now large and flourishing parishes, churches, and schools in various parts of the diocese. The Lithuanians are, as yet, comparatively few in number. They have fine property, a temporary church, a resident priest in Utica, and give evidence of rapid progress. The Syrians began to come about a decade ago. They are found chiefly in Syracuse and Utica. In the latter city, they have a handsome church, and a resident priest. They worship according to the Syro-Maronite Rite. The Slovaks began coming to the diocese only within the last few years. They are of the Latin and the Greek Rite, and are found principally in Syracuse and in Binghamton. In the latter city they have a resident priest and a flourishing parish.

Religious Communities.—Another important factor in the upbuilding of the diocese, was the work of the different religious communities devoted to education and charity. The Franciscan Fathers of the Order of Minor Conventuals came in 1859. The mother-house of the Order of the Minor Conventuals in the United States is located in Syracuse. The Christian Brothers have been labouring in the diocese for more than half a century. They have a large and flourishing academy in Syracuse. Assumption Academy is the academic department for boys of the Utica Catholic Academy. The Sisters of Charity of St. Vincent de Paul (Emmitsburg) for more than three-quarters of a century have laboured in Utica, and for most of that time in Syracuse, caring for the orphans and building up their schools. The Sisters of St. Joseph, from St. Louis, Mo., have an academy for young ladies in Binghamtom and have charge of many parochial schools. The Sisters of the Holy Name have an academy for young ladies at Rome. The Sisters of the Third Order of St. Francis have charge of hospitals in Syracuse and Utica.

Statistics for 1911 are: priests, regular 16, secular 115; parish churches, 75; mission churches, 34; chapels, 35; parochial schools, 25; parochial high schools, 4; academies, 4; orphan asylums, 5; maternity hospital, 1; infant asylums, 2; hospitals, 3. In the various religious orders there are: brothers, 33; sisters, 330; lay teachers, 8. The pupils in Catholic schools number 10,000. The Catholic population includes, English-speaking, 95,000; Italians, 25,000; Germans, 15,000; Poles, 120,000; Lithuanians, 1000; Slavs (Latin and Greek), 2000; Bohemians, 100; French, 2000; Syrians, 1000.

Syria.—Geography and Political Divisions, Ancient and Modern.—A country in Western Asia, which in modern times comprises all that region bounded on the north by the highlands of the Taurus, on the south by Egypt, on the east by Mesopotamia and the Arabian Desert, and on the west by the Mediterranean; thus including within its area the ancient and modern countries of Aram or North Syria, a portion of the Hittite and Mitanni kingdoms, Phœnicia, the Land of Canaan or Palestine, and even a section of the Sinaitic Peninsula. Strictly speaking, however, and especially from the point of view of Biblical and classical geography, which is the one followed in this article, Syria proper comprises only that portion of the above-mentioned territories that is bounded on the north and north-west by the Taurus and Asia Minor, on the south by Palestine, on the east by the Euphrates, the Syro-Arabian desert, and Mesopotamia, and on the west by the Mediterranean. The northern portion is elevated, the eastern is level, extending to the Syro-Arabian desert; the north-western is crowned by the Amanus and Taurus mountains, while the mountains of Lebanon and Anti-Lebanon are parallel ranges on the north of Palestine or south of Syria. Between these two ranges is the long narrow valley called Cœle-Syria (Hollow Syria). Its chief rivers are the Litâny (*Leontes*), the Orontes (*Al-'Asi*), and the Barada or Abana. Cœle-Syria varies in breadth from three or four miles to fifteen miles, and is in some places broken by projecting spurs of the Lebanon ranges. At its northern end it curves round to the west and opens out to the Mediterranean. It has two slopes, a northerly and a southerly one, and both are fertile and beautiful. This valley was always an important route of travel between Mesopotamia, the Mediterranean coast, Arabia, and Egypt. The whole of Syria, however, is about 250 miles in length, and an average of 130 miles in breadth, having a total area of about 32,500 square miles. The most important towns of Syria in ancient times were Damascus, Karkamish, Hamath, Baalbec, Palmyra or Tadmur, Riblah, Antioch, Daphne, Seleucia, Abila, Chalcis, Lybo, Laodicea, Arethusa, and Apamea, whereas the famous cities of Tyre, Sidon, Berytus Byblos, and Aradus belong properly speaking to Phœnicia. The most important towns of modern Syria are Alexandretta, Antakiah, Beirut, Aleppo, Latakyah, Hamah, Homs, Tripoli, Damascus, Sayda, Akka, and Jaffa.

The name "Syria" was formerly believed to be either an abbreviation of "Assyria" or derived from Tsur (Tyre), hence Tsurya, and that it was of Greek origin. This, however, is untenable, as the name, in all probability, is derived from the old Babylonian name *Suri*, applied originally to the north-eastern region of the present Syria. Later on the name Syria was applied by the Greeks and Romans to the whole of Syria, or the country lying between the Euphrates, the Mediterranean, the Taurus, and Egypt. By the Babylonians and Assyrians it was called "Amurru" (the Land of the Amorites) and "Martu" (the West-Land). The extreme northern part of it was also known as "Khatti", or the Land of the Hittites, whilst the most southern region was known as "Kena'nu" or "Kanaan" (Palestine). In Arabic it is called either "Suriyya" (Syria), or "Al-Sham" (the country situated to the "left"), in opposition to "El-Yemen" or South Arabia, which is situated to the "right". The political and geographical divisions of Syria have been numerous and constantly varying. In the Old Testament it is generally called "Aram", and its inhabitants, "Arameans". But there were several Biblical "Arams", viz: "Aram-naharaim", or "Aram of the two rivers", i. e. Mesopotamia; "Paddon-Aram" (the region of Harran), in the extreme north of Mesopotamia; "Aram-Ma'ak", to the north of Palestine; "Aram-beth Rehob"; "Aram-Sobah", etc. The Syrian Aram, however, which corresponds to the classical Syria is called generally in the Old Testament "Aram of Damascus", from the principal city of the country. It is of these Arameans or Syrians, who occupied Central Syria, with Damascus as the capital city, that we hear most in the Old Testament.

During the Greek and Roman dominations the political divisions of Syria were indefinite and almost unintelligible. Strabo mentions five great provinces: (1) Commagene, a small territory in the extreme north, with Samosata for capital, situated on the Euphrates; (2) Seleucia, lying south of the former, and subdivided into four districts according to the number of its chief cities, viz.: Antioch Epidaphne; Seleucia, in Pieria; Apamea, and Laodicea; (3) Cœle-Syria, comprising Laodicea ad Libanum, Chalcis, Abilene, Damascus, Ituræa, and others farther south, included in Palestine; (4) Phœnicia; (5) Judæa. Pliny's divisions are still more numerous than those of Strabo. It appears that each city on rising to importance gave its name to a surrounding territory, larger or smaller, and this in time assumed the rank of a province. Ptolemy mentions thirteen provinces: Cammagene, Pieria, Cyrrhestica, Seleucia, Casiotis, Chalibonitis, Chalcis, Apamene, Laodicea, Phœnicia, Cœle-Syria, Palmyrene, and Batanea, and he gives a long list of the cities contained in them. Under the Romans, Syria became a province of the empire. Some portions of it were permitted to remain for a time under the rule of petty princes, dependent on the imperial government. Gradually, however, all these were incorporated, and Antioch was the capital. Under Hadrian the province was divided into two parts: Syria Major, on the north, and Syria-Phœnice, on the south. Towards the close of the fourth century another partition of Syria was made, and formed the basis of its ecclesiastical government: (1) Syria Prima, with Antioch as its capital; (2) Syria Secunda, with Apamea as capital; (3) Phœnicia Prima, including the greater part of ancient Phœnicia, with Tyre as its capital; (4) Phœnicia Secunda, also called Phœnicia ad Libanum, with Damascus as its capital. During the Arabian domination, i. e. from the seventh to the fifteenth century, Syria was generally divided into six large districts (*Giunds*), viz.: (1) Filistîn (Palestine), consisting of Judæa, Samaria, and a portion of the territory east of the Jordan, its capital was Ramlah, Jerusalem ranking next; (2) Urdun (Jordan), of which the capital was Tabaria (Tiberias), roughly speaking it consisted of the rest of Palestine as far as Tyre; (3) Damascus, a district which included Baalbek, Tripoli, Beirut, and the Hauran; (4) Homs, including Hamah; (5) Qinnasrin, corresponding to Northern Syria; the capital at first was Qinnasrin, to the south of Aleppo, by which it was afterwards superseded; (6) the sixth district was the military frontier (*'awâsim*) bordering upon the Byzantine dominions in Asia Minor. Under the present Turkish rule, Syria is divided into the following six vilayets, or provinces: (1) the Vilayet of Aleppo, with the 3 *liwas* of Aleppo, Marash, and Urfa: (2) the independent *Liwa* of Zor (*Deir ez-Zor*); (3) the Vilayet of Beirut, including the coast south of the mouth of the Orontes, the mountain-district of the Nosairiyeh and Lebanon to the south of Tripoli, further the town of Beirut and the country between the sea and the Jordan from Saida to the north of Jaffa, and is divided into 5 *liwas:* Ladikiyeh, Tarabulus, Beirut, 'Akka (Acre), and Nabulus; (4) Lebanon, from the south of Tripoli to the north of Saida, exclusive of the town of Beirut, forms an independent *liwa*, administered by a governor with the rank of *mushîr;* (5) the Vilayet of Suriyya (Syria) comprises the country from Hamah to the Hijaz—the capital is Damascus—and is divided into the *liwas* of Hamah, Damascus, Hauran, and Kerak; (6) El-Quds, or Jerusalem, is an independent *liwa* under a *mutesarrif* of the first class. At the head of each vilayet is a *vali*, or governor-general, whose province is divided into departments (*sanjak, liwa*) each presided over by a *mutesarrif;* each department again contains so many divisions (*kaimmakamlik, kada*) each under a *kaimmakam;* and these again are divided into districts (*mudiriyeh, nahiya*) under *mudirs*. The independent *liwas* of Ez-Zor and El-Quds stand in direct connexion with the central government at Constantinople.

ETHNOGRAPHY OF MODERN SYRIA —Ethnographically, the modern inhabitants of Syria consist of Syrians, Arabs, Turks, Jews, and Franks or Europeans. (1) The Syrians are the direct descendants of the ancient Arameans who inhabited the country from about the first millennium B. C., and who spoke Aramaic. Most of these embraced Christianity and continued to speak Aramaic till about the seventh century, when the Arab invasion forced the Arabic language to become the vernacular tongue of the country. Aramaic, however, held its ground for a considerable time, and traces of it are still to be found in the liturgy of the so-called Syrian, Chaldean, and Maronite Churches, as well as in three villages of the anti-Libanus. (2) The Arabian population consists of *hadari*, or settled, and *bedawi* (pl. *bedu*) or nomadic tribes. The settled population is of very mixed origin, but the Bedouins are mostly of pure Arab blood. They are the direct descendants of the half-savage nomads who have inhabited Arabia from time immemorial. Their dwellings consist of portable tents made of black goats' hair. There are two main branches; one of these consists of the 'Ænezeh, who migrate in winter towards Central Arabia, while the other embraces those tribes which remain permanently in Syria. (3) The Turks are not a numerous class of the community of Syria. They are intellectually inferior to the Arabs, but the lower classes are generally characterized by patriarchal simplicity of manner. There are two parties of Turks, the Old, and the Young, or Liberal Party. In Northern Syria, as well as on the Great Hermon, are still several nomadic Turkish tribes, or Turcomans, whose mode of life is the same as that of the Bedouin Arabs. (4) The Jews who remained in the country are but few in number; most of those who now reside in Palestine are comparatively recent settlers from Europe. (5) The Franks (Europeans) form a very small proportion of the population. Distinct from them are the so-called "Levantines", who are either Europeans or descendants of Europeans, who have entirely adopted the manners of the country.

RELIGIONS OF MODERN SYRIA.—In regard to religion the modern inhabitants of Syria consist of Mohammedans, Christians, and Jews. The first are divided into Sunnites or orthodox Mohammedans, Metawileh, Nusairiyyeh or Ansairiyyeh, and Ismailiyyeh. To these may be added the Druzes. The Christians include Roman Catholics of the Latin Rite; Greek Orthodox; Roman Catholic Greeks or Melchites; Maronites (all Roman Catholic); Roman Catholic Syrians, Roman Catholic Chaldeans, Roman Catholic Armenians; Schismatic Syrians, i. e. Monophysites, commonly called Jacobites; Schismatic Armenians, Catholic Armenians, and Protestants.

The Mohammedans or Moslems are and have been for the last twelve centuries the lords of the land and still constitute the great majority of its inhabitants. They are generally ignorant and fanatical, although of late education has spread among the better class in the larger towns. Till a few years ago they were inclined to look with contempt on all other peoples and religions. This, however, is gradually disappearing owing mainly to the wonderful stride the Christians of Syria have been making of late in the matter of schools, universities, hospitals, seminaries, and educational and commercial institutions. The Syrian Moslems are generally noble in bearing, polite in address, and profuse in hospitality; but they are regardless of truth, dishonest in their dealings, and immoral in their conduct. In large towns the greater proportion of the upper classes are both physically and mentally feeble, owing to the effects of polygamy, early marriages, and degrading vices; but the peasantry are robust and vigorous, and much might be hoped from them if they were brought under the influence of liberal institutions, and if they had examples around them of the industry and the enterprise of Western Europe. Experience, indeed, has already shown that they are not slow to adopt the improvements of other lands. In religion the Mohammedans of Syria are Sunnites, or Traditionists—that is, in addition to the written word of the Koran, they recognize the authority of the Sunna, a collection of traditional sayings of the "Prophet", which is a kind of supplement to the Koran, directing the right observance of many things omitted in that book. They are in general exact in the observance of the outward rites of their religion.

The Metawileh (sing. Metawly) are the followers of ʿAly, the son-in-law of Mohammed. His predecessors, Abu Bekr, ʿOmar, and Othman, they do not acknowledge as true khalifs. ʿAly they maintain to be the lawful Imam; and they hold that the supreme authority, both in things spiritual and temporal, belongs of right to his descendants alone. They reject the Sunna, and are therefore regarded as heretics by the orthodox. They are allied in faith to the Shiʿites of Persia. They are almost as scrupulous in their ceremonial observances as the Hindus. The districts in which they chiefly reside are Ba'albek, where their chiefs are the noted family of Harfush; Belad Besharah, on the southern part of the Lebanon range; and a district on the west bank of the Orontes, around the village of Hurmul. They also occupy several scattered villages in Lebanon.

The Nusairiyyeh.—It is not easy to tell whether these people are Mohammedans or not. Their religion still remains a secret, notwithstanding all attempts lately made to dive into their mysteries. They are represented as holding a faith half Christian and half Mohammedan. They believe in the transmigration of souls; and observe in a singular, perhaps idolatrous, manner a few of the ceremonies common in the Eastern Church. They inhabit a range of mountains extending from the great valley north of Lebanon to the gorge of the Orontes at Antioch.

The Ismailiyyeh, who inhabit a few villages on the eastern slopes of the Ansairiyeh Mountains, resemble the Nusairiyyeh in this, that their religion is a mystery. They were originally a religious-political subdivision of the Shi'ites, and are the feeble remnant of a people too well known in the time of the Crusades as the Assassins. They have still their chief seat in the Castle of Masyad, on the mountains west of Hamah.

The Druzes (The generic name in Arabic is *ed-Deruz*, sing. *Durzy*).—The peculiar doctrines of the Druzes were first propagated in Egypt by the notorious Hakim, third of the Fatimite dynasty. This khalif, who gave himself out as a prophet, though he acted more like a madman, taught a system of half-materialism, asserting that the Deity resided in ʿAly. In A. D. 1017 a Persian of the sect of Batanism, called Mohammed Ben-Ismail ed-Dorazy, settled in Egypt, and became a devoted follower and stimulator of Hakim. He not only affected to believe in and propagate the absurd pretensions of the new Egyptian prophet, but he added to his doctrines that of the transmigration of souls, which he had brought from his native country, and he carried his fanaticism to such an extent that the people at last drove him out of Egypt. He took refuge in Wady el-Teim, at the western base of Hermon; and, being secretly supplied with money by the Egyptian monarch, propagated his dogmas, and became the founder of the Druzes. His system was enlarged, and in some degree modified, by other disciples of Hakim, especially by the Persian Hamzeh, whom the Druzes still venerate as the founder of their sect and the author of their law. Hamzeh tried to gain over the Christians by representing Hakim as the Messiah whose advent they expected. For further details see DRUZES.

The Jews of Syria are of several different classes. The Sephardim are Spanish-Portuguese Jews, who immigrated after the expulsion of the Jews from Spain under Isabella I; most of them now speak Arabic, though some still speak a Spanish patois. The Ashkenazim are from Russia, Galicia, Hungary, Bohemia, Moravia, Germany, and Holland, and speak the dialect known as Yiddish. These again are subdivided into the Perushim and the Chasadim. The Jews of the East have retained their original character to a considerable extent, and are generally tall and slender in stature. They live in the towns, generally in a quarter of their own.

HISTORY OF CHRISTIANITY IN SYRIA.—The history of Christianity in Syria proper during the first three centuries and down to the Council of Nicæa (A. D. 325) centres chiefly about Antioch, while from the time of the Council of Nicæa down to the Arab invasion it is absorbed into that of the Antiochene Patriarchate (see ANTIOCH, THE CHURCH OF), just as the Christianity of Palestine is practically that of Jerusalem, of Egypt that of Alexandria, of the West that of Rome, of Mesopotamia and Persia that of Seleucia Ctesiphon, and of the Byzantine Greek Church that of Constantinople. As Jewish Christianity originated in Jerusalem, so Gentile Christianity started at Antioch, then the leading city of the Hellenistic East, with Peter and Paul as its leading Apostles. From Antioch it spread to the various cities and provinces of Syria, among the Hellenistic Syrians as well as among the Jews who, as a result of the great rebellions against the Romans in A. D. 70 and 130, were driven out from Jerusalem and Palestine into Syria. The spread of the new religion was so rapid and successful that at the time of Constantine Syria was honeycombed with Christian churches. The history of the Christian Church in Syria during the second and third centuries is rather obscure, yet sufficient data to furnish a fair idea of the rapid spread of Christianity in Syria during those two centuries have been collected by Harnack in his well-known work, "The Mission and Expansion of Christianity in the First Three Centuries" (Eng. tr., 2nd ed., London, 1908, vol. II, pp. 120 sqq.).

Outside the gates of Antioch, that "fair city of the Greeks" (see Isaac of Antioch's "Carmen", 15, ed. Bickell, i, 294), Syriac was the language of the people; in fact it was spoken by the lower classes in Antioch itself and only among the upper classes of the Greek towns was it displaced by Greek. The Syriac spirit was wedded to Greek, however, even here, and remained the predominant factor in religious and in social life, although at first and indeed for long it did not look as if it would. Yet, in this Syrian world, Christianity seems to have operated from Edessa rather than from Antioch. The wide territory lying between these cities was consequently evangelized from two centres during the third century: from Antioch in the West by means of a Greek Christian propaganda, and from Edessa in the East by means of one which was Syro-Christian. The inference is that the larger towns practically adopted the former, while the country towns and villages went over to the latter. At the same time there was also a Western Syrian movement of Christianity, though it did not amount to much, both in and after the days of Paul of Samosata and Zenobia. The work of conversion, so it would appear, made greater headway in Cœle-Syria, however, than in Phœnicia. No fewer than twenty-two bishops from Cœle-Syria attended Nicæa (two chorepiscopi), including several who had Hellenic names. Hence we may infer the existence of no inconsiderable number of national Syrian Christians. By about 325 the districts round Antioch seem to have contained a very large number of Christians, and one dated (331) Christian inscription runs as follows: "Christ, have mercy; there is but one God".

In Chrysostom's day these Syrian villages appear to have been practically Christian. Lucian, the priest of Antioch, declares in his speech before the magistrate in Nicomedia (311) that "almost the greater part of the world now adheres to this Truth, yea whole cities; even if any of this evidence seems suspect, there is no doubt regarding multitudes of country-folk, who are innocent of guile" (pars paene mundi iam maior huic veritati adstipulatur, urbes integræ, aut si in his aliquid suspectum videtur, contestatur de his etiam agrestis manus, ignara figmenti); and although this may reflect impressions which he had just received in Bithynia, there was substantial ground for the statement in the local circumstances of Syria. The number of clergy in 303 throughout Syria is evident from Eus., H. E., viii, 6: "An enormous number were put in prison at every place. The prisons, hitherto reserved for murderers and riflers of graves, were now packed everywhere with bishops, priests, deacons, lectors, and exorcists". Further data at our command are as follows: (1) Acts, xv, already mentions Churches in Syria besides Antioch. (2) Ignatius, apropos of Antioch (ad Philad., 10) mentions "Churches in the neighbourhood" which had already bishops of their own. These certainly included Seleucia, the seaport of Antioch mentioned in Acts, xiii, 4. (3) Apamæa was a centre of the Elkesaites. (4) Dionys. Alex. (in Eus., "H. E.", VII, v) observes that the Roman Church frequently sent contributions to the Syrian Churches. (5) The document of the Antiochene Synod of 268 (Eus., VII, xxx) mentions, in connexion with Antioch, "bishops of the neighbouring country and cities".

The towns in the vicinity of Antioch, far and near, must already have had bishops, in all or nearly all cases, if country bishops were in existence. From Eus., VI, xii we learn that by about A. D. 200 there was a Christian community at Rhossus which was gravitating towards Antioch. (6) Two chorepiscopi from Cœle-Syria attended the Council of Nicæa. In Martyrol. Hieron. (Achelis, "Mart. Hieron.," p. 168) a martyrdom is noted as having occurred "in Syria provincia regione Apameæ vico Aprovavictu", but both these places are unknown. (7) Bishops from the following places in Cœle-Syria were present at Nicæa: Antioch, Seleucia, Laodicea, Apamæa, Raphaneæ, Hierapolis (=Mabug, Bambyce), Germanicia, Samosata, Doliche, Balaneæ Gabula, Zeugma, Larissa, Epiphania, Arethusa, Neocæsarea, Cyrrhus, Gindron, Arbokadama, and Gabala. These towns lay in the most diverse districts of this wide country, on the seaboard, in the Valley of the Orontes, in the Euphrates Valley, between the Orontes and the Euphrates, and in the north. Their distribution shows that Christianity was fairly uniform and fairly strong in Syria about 325, as is strikingly shown by the rescript of Daza to Sabinus (Eus., "H. E.", IX, ix), for we must understand the experiences undergone by the Churches of Syrian Antioch and Asia Minor, when we read the emperor's words about almost all men abandoning the worship of the gods and attaching themselves to the Christian people. This remark is not one to be taken simply as a rhetorical flourish. For after speaking in one place about the first edict of Diocletian, Eusebius proceeds as follows: "Not long afterwards, as some people in the district called Melitene and in other districts throughout Syria attempted to usurp the kingdom, a royal decree went forth to the effect that the head officials of the churches everywhere should be put in prison and chains" (VIII, vi, 8). Eusebius does not say it in so many words, but the context makes it quite clear that the emperor held the Christians responsible for both of these outbreaks (that in Melitene being unknown to history). This proves that the Christians in Melitene and Syria must have been extremely numerous, otherwise the emperor would never have met revolutionary outbreaks (which in Syria, and, one may conjecture, in Melitene also, originated with the army) with edicts against the Christian clergy. The Bishop of Rhossus was not at Nicæa (Rhossus, however, may also be assigned to Cilicia). But, as we already know, Rhossus did possess a Christian Church about A. D. 200, which came under the supervision of the Church at Antioch. There was a Jewish Christian Church at Berœa (Aleppo) in the fourth century. The local Gentile Christian Church cannot have been important; cf. the experience of Julian there (Ep. xxvii, p. 516, ed. Hertlein).

As to Phœnicia, one of the most important provinces of Syria, the history of Christianity there is also obscure. Here again, we learn from the Acts of the Apostles that Christianity reached the Phœnician cities at a very early period. When Paul was converted, there were already Christians at Damascus (Acts ix, 2, 10 sq., 19); for Christians in Tyre see xxi, 4; for Ptolemais see xxi, 7; for Sidon xxvii, 3; and in general xi, 19. The metropolitan position of Tyre, which was the leading city in the East for manufactures and trade, made it the ecclesiastical capital of the province; but it is questionable if Tyre enjoyed this pre-eminence as early as the second century, for at the Palestinian Synod on the Eastern controversy Cassius, the Bishop of Tyre, and Clarus, the Bishop of Ptolemais, took counsel with the Bishop of Ælia and of Cæsarea (Eus., "H. E.", V, xxv) to whom they seem to have been subordinate. On the other hand, Marinus of Tyre is mentioned in a letter of Dionysius of Alexandria (ibid., VII, v, 1) in such a way as to make his metropolitan dignity extremely probable. Martyrs in or from Tyre, during the great persecution, are noted by Eusebius, VIII, vii, 1 (VIII, viii), VIII, xiii, 3. Origen died at Tyre and was buried there. It is curious also to note that the learned Antiochene priest Dorotheus, the teacher of Eusebius, was appointed by the emperor (Diocletian, or one of his immediate predecessors) to be the director of the purple-dyeing trade in Tyre (Eus., "H. E.", VII, xxxii). A particularly libellous edict issued by the Emperor Daza against the Christians is preserved by Eusebius (IX, vii) who copied it from the pillar in Tyre on which it was cut, and the historian's work reaches its climax in the great speech upon the reconstruction of the church at Tyre, "by far the most beautiful in all Phœnicia" (X, iv). This speech is dedicated to Paulinus, Bishop of Tyre, in whose honour indeed the whole of the tenth book of its history is written. Unfortunately we get no information whatever, in this long address, upon the Christian community at Tyre. We can only infer the size of the community from the size of the church building, which may have stood where the ruins of the large crusading church now astonish the traveller (cf. Baedeker's "Palestine", pp. 300 sq.). Tyre as a Christian city was to Phœnicia what Cæsarea was to Palestine. It seems to have blossomed out as a manufacturing and trading centre during the imperial age, especially in the third century. A number of passages in Jerome give characteristic estimates of its size and importance. In Sidon Origen stayed for some time (Hom. xiv, 2, in Josuam), while it was there that the presbyter Zenobius (Eus., "H. E.", VIII, xiii, 3) died during the great persecution, as did some Christians at Damascus (IX, v). Eleven bishops, but no chorepiscopi, were present at the Council of Nicæa from Phœnicia; namely the bishops of Tyre, Ptolemais, Damascus, Sidon, Tripolis, Paneas, Berytus, Palmyra, Alassus, Emesa, and Antaradus. From Eusebius we also learn that many Jewish Christians also resided in Paneas (Eus., "H. E.", VII, xvii, 18). Tripolis is mentioned even before the Council of Nicæa (in "Mart. Pal.," III, where a Christian named Dionysius comes from Tripolis); the Apostolic Constitutions (vii, 46) declare that Marthones was bishop of this town as early as the Apostolic age; while, previous to the Council of Nicæa, Hellenicus, the local bishop, opposed Arius (Theodoret, "H. E.", I, iv), though Gregory, Bishop of Berytus, sided with him (loc. cit.; for Berytus, see also

"Mart. Pal.", iv). The local church was burnt under Julian (cf. Theod., "H. E.", IV, xxii). Eusebius (VIII, xiii) calls Silvanus, at the period of the great persecution, bishop, not of Emesa but of "the churches round Emesa". Emesa thus resembled Gaza; owing to the fanaticism of the inhabitants Christians were unable to reside within the town itself, they had to quarter themselves in the adjoining villages. Anatolius, the successor of Silvanus, was the first to take up his abode within the town. Theodoret ("H. E.", III, vii), writing of the age of Julian, says that the church there was *νεόδυητος* (newly built). With regard to Heliopolis we have this definite information, that the town acquired its first church and bishop, thanks to Constantine, after 325 (cf. "Vita Constant.," III, lviii, and Socrat., I, xviii). The "Mart. Syriacum" mentions one martyr, Lucian, at Heliopolis. Christians also were deported ("Mart. Pal.," XIII, ii) by Daza to Lebanon for penal servitude. One martyrdom makes it plain that there were Christians at Byblus. At Choda (Kabun), north of Damascus, there were also numerous Jewish Christians in the days of Eusebius.

We have no information in detail upon the diffusion and density of the Christian population throughout Phœnicia. Rather general and satisfactory information is available for Syria, a province with which Phœnicia was at that time very closely bound up; even the Phœnician tongue had long been dislodged by Syriac. From the letters of Chrysostom and the state of matters which still obtained in the second half of the sixth century, however, it is quite clear that Christianity got a firm footing only on the seaboard, while the inland districts of Phœnicia remained pagan for the most part. Yet it was but recently, not earlier than the third century, that these Phœnician-Hellenic cults had experienced a powerful revival. The situation is quite clear: wherever Christianity went, it implied Hellenizing, and vice versa. Christianity, in the first instance, only secured a firm footing where there were Greeks. The majority of the Phœnician towns where Christian bishops can be traced lay on the coast; i. e., they were towns with a strong Greek population. In the large pagan cities, Emesa and Heliopolis, on the other hand, Christians were not tolerated. Once we leave out inland localities where "heretics", viz., Marcionites and Jewish Christians, resided, the only places in the interior where Christians can be found are Damascus, Paneas, and Palmyra. Damascus, the great trading city, was Greek (cf. Mommsen, "Rom. Gesch.", V., p. 473; Eng. trans., II, 146); so was Paneas. In Palmyra, the headquarters of the desert trade, a strong Greek element also existed (Mommsen, pp. 425 sq.; Eng. trans., II, 96 sq.). The national royal house in Palmyra, with its Greek infusion, was well disposed not towards the Greek but towards the scanty indigenous Christians of Syria, as may be inferred from the relations between Paul of Samosata and Zenobia, no less than from the policy adopted by Rome against him.

The Edict of Milan (A. D. 313) marks the beginning of a better-known period in the history of Syrian Christianity, during which the See of Antioch was filled by a succession of bishops illustrious throughout the Church, and the Church of Syria was involved in the most troublesome period of church history and theology, which marks the beginning of those fatal schisms, heresies, and Christological controversies that led to the final separation of the Syrian Church and the Churches of the East from the Church of Rome (See ARIANISM; NESTORIANISM; MONOPHYSITISM). The death of Severus (542), the deposed Monophysite Patriarch of Antioch, may be taken to mark the beginning of a new period in the history of the Syrian Church; for from this date the double succession in the See of Antioch has been maintained to the present day. The death of the Emperor Maurice (A. D. 602) and the succession of his murderer, Phocas, gave the signal for the Persians to ravage the Roman dominions. Hitherto Mesopotamia had been the arena of war between the rival powers, and Dara, Amida, and Nisibis the keys of possession. But Heraclius came to the throne in 602 to find all Syria in the hands of Chosroes. First Damascus, then the Holy City itself fell before the Persian general Shahrbarz (614), and the Patriarch Zacharias of Jerusalem was carried off with the True Cross itself, to grace the infidel's triumph. Never since Constantinople was built had there been such a disaster; and at Chalcedon itself, almost opposite the very walls of the capital, the Persians were encamped, stretching out their hands to the Slavs and Avars, who threatened the city on the north side of the isthmus, and inviting them to join in its destruction. An insulting and blasphemous letter from the Persian king aroused the emperor and all Christendom; while from Constantinople to Arabia the Church poured forth her treasures of plate and money to help in the crusade. Constantinople was fortified and with a gigantic effort, worthy of the great conquerors of the world's history, Heraclius drove back the Persians, cutting them off in Cilicia, and forcing them finally to make an abject appeal for mercy in the very royal palace of Dastagerd itself. Chosroes had been already murdered by his son, who submitted to Heraclius (A. D. 628). The emperor returned, leaving the East in peace, to restore the Cross to its place in Jerusalem.

Meanwhile in an obscure corner of the empire Mohammed had been born, and in this very year sent round a letter demanding for a new creed the submission of the kings of the earth. "The year of flight" (A. D. 622) had passed, and Mohammed was at the head of a devoted band of followers, ready to conquer Arabia and perhaps the world. It was an epoch of the world's history, and twice the patriarchs of Jerusalem saw the abomination of desolation standing in the holy place, and thought the end of all things at hand. Ten years after Shahrbarz (637), when the glories of Heraclius paled before the storm of Arab conquest, Sophronius the Patriarch and Omar the Arab stood side by side at the altar of the Church of the Holy Sepulchre in Jerusalem. East of the Mediterranean the Roman Empire had given way for ever, and the Arab arms now ruled the Churches which the councils of two centuries before had cut off from the orthodox communion. For the future it was not the Melchite or Imperialist to whom the Eastern Churches were to acknowledge an unwilling homage, but to the sword of Islam. Byzantine history now affected them little, for the successors of Heraclius had enough to do to keep the Saracen fleets away from the capital. The famous Iconoclastic controversy, begun by Leo the Isaurian, was continued for nearly a hundred years (720–802) by his successors. How little the second great controversy of the times affected the Syrians may be judged by their own language in regard to the "Procession of the Holy Ghost". The words inserted in the Creed by the Western Church were the occasion of the rupture, for which the rival claims of Gregory of Rome and John Scholasticus of Constantinople had paved the way; and the ninth century witnessed the unseemly recriminations and the final break between the two great communions

In the seventh century the Syrian Christians fade from the general history of the Church. The Arabs were inclined to favour them as rivals of the Greeks, and early in the eighth century Wâlid secured the entry of their patriarch into Antioch, whence they had been driven by the Greeks since the death of Jacobus Baradæus. But he remained there only a short time, nor were his people free from the persecutions which Abdelmalik and Yazid ordered against the Christians; while in 771 the Khalif Abdullah took a census throughout Syria and Mesopotamia, ordering all Jews and Christians, especially at Jerusalem, to be branded on the neck and forehead. A short-lived union between the Syrians and Armenians (726) was followed by persecution at the hands of the Greeks (750), who took away many Syrian and Armenian slaves from Mesopotamia to the West. Two centuries later Nicephorus Phocas, anxious to unite Christendom against the Arabs, caused John Sarighta, the Patriarch of the Syrians, to be brought to Constantinople, there to discuss with Polyeuctus, Patriarch of that city, the differences that divided them. In the letter written by John to Mennas of Alexandria we perceive how much the controversy had become a mere matter of verbal expression, and how the Syrians clung to the words which Greek tyranny had made the badge of a rival party. The imprisonment of John, added to other acts of tyranny, confirmed their hatred of the Greeks, and made them prefer even the domination of the Moslem. From the eighth and ninth centuries down to our own times the history of Christianity in Syria is the history of Nestorianism and of the Nestorian Church, of Eutychianism and the Monophysite or Jacobite Syriac Church, of the Monophysite Armenian Church of Syria, of the Greek Schism and of the Byzantine, Russian, and Greek, or the so-called Orthodox Eastern Church; the Schismatic and Melchite (Catholic) Greek Patriarchates of Antioch; the Syrian, Monophysite, and Catholic Patriarchates of Antioch, the Latin Patriarchate of Antioch, and the Maronite Church, for all which see respective articles.

Statistics of the Various Christian Sects and Churches.—The Christians of Modern Syria, schismatic as well as Catholic, are divided into the following sects and churches:—

Greek Orthodox, i. e. the Syrian Greek Schismatic Church.—The Greek Orthodox of Syria are under the jurisdiction of the Patriarch of the Greek Orthodox of Antioch, whose residence is at Damascus and who has under his jurisdiction 2 suffragan or auxiliary bishops attached to him personally, and 13 eparchies, or archdioceses, 50,000 families, or about 250,000 subjects, most of whom dwell in Syria proper. Of these thirteen eparchies eleven are in Syria, one in Northern Mesopotamia, one in Armenia and Asia Minor. The Greek Orthodox of Syria have 5 schools with 810 pupils in Beirut; 24 in Damascus and surrounding villages, with 2215 pupils and 60 teachers; and 12 in Northern Syria with 2400 pupils and 65 teachers. The liturgy of the Syrian Greek Orthodox is that of the Greek Church, and the liturgical language, Greek with a great deal of Arabic, which is the vernacular of all the Christians of Syria.

Greek-Melchites, i. e. Roman Catholic Syrians of the Greek Rite.—These are under the jurisdiction of the Greek-Melchite Patriarch of Antioch, whose residence is at Damascus, and who has under his patriarchal jurisdiction 4 archdioceses, 8 dioceses, 2 patriarchal vicariates (at Jerusalem and Alexandria), with a total of about 125,000 souls, divided as follows: (1) Archdiocese of Aleppo, 6 churches and chapels, 10,000 souls, 86 colleges superintended by Franciscan, Capuchin and Jesuit missionaries; (2) Archdiocese of Bostra and Hauran with 12,000 souls, 4 churches, 8 chapels, 15 priests and 4 schools; (3) Archdiocese of Homs and Hamah, with 8000 souls, 20 churches and chapels, 20 priests and 18 schools, residence at Homs; (4) Archdiocese of Tyre, with 6200 souls, 11 churches and chapels, 20 priests, of which 15 are Basilian monks, and 13 schools, residence at Sur (Tyre); (5) Diocese of Beirut and Djebail, with 15,000 souls, one seminary at Ain-Traz, 150 parishes, 195 churches and chapels, and 19 schools, residence at Beirut; (6) Diocese of Cæsarea-Philippi, or Baneas, with 4500 souls, 15 parishes, 9 churches and chapels, 17 priests, and 19 schools, residence at Gemaidat-Marjoun; (7) Diocese of Damascus, of which the patriarch himself is the ordinary, with one suffragan bishop, with 12,000 souls, 9 parishes, and 9 churches; (8) Diocese of Heliopolis or Ba'albek, with 5000 souls, 9 parishes, 10 churches, 15 priests, and 8 schools, residence at Ba'albek; (9) Diocese of Ptolemais or Saint John of Acre, with 9000 souls, 24 stations, 25 churches, 34 priests, and 8 schools, residence at Akka; (10) Diocese of Sidon, with 18,000 souls, 38 churches and chapels, 41 priests, 34 schools, residence at Sayda; (11) Diocese of Tripoli, erected in 1897; (12) Diocese of Zahle and Furzoul, with 17,000 souls, 30 churches and chapels, 35 priests, 12 schools, residence at Zahle.

The two patriarchal vicariates at Jerusalem and Alexandria have a dozen parishes in the latter and four or five parishes in the former. The Greek-Melchites have also a parish with a church in Marseilles, another in Paris (since 1889), and several in the United States. In Jerusalem they have the Seminary of St. Anne, founded in 1882 by Cardinal Lavigerie under the direction of the White Fathers. The number of these average between 125 and 150. They have also a seminary in Rome founded for them in 1577 by Gregory XIII, under the name of College of St. Athanasius; also a small seminary in Beirut, and a larger one at Ain-Traz. Three indigenous religious orders, for men and women alike, are still in existence among the Greek-Melchites in Syria, viz: The Aleppine, with 40 monks and 18 nuns; the Baladites of the Order of St. John, with 96 monks and 42 nuns; and the Mokhallasites, or Salvatorians, with 200 monks and 25 nuns. The rules followed by these three orders are either those of St. Basil or St. George. From the time of Gregory XVI (1831–46) the patriarch of the Greek-Melchites is allowed to assume the official title of "Patriarch of Antioch, Alexandria, and Jerusalem".

The Syrian Jacobites, i. e. Monophysites.—They are under the jurisdiction of the Syrian Jacobite Patriarch of Antioch, whose residence is at Der-el-Zafaran near Mardin in Northern Mesopotamia. The Syrian Jacobites were formerly very numerous and scattered all over Western Asia, Egypt, and India, having had in the twelfth and thirteenth centuries as many as 20 metropolitans and 100 bishops or dioceses. At present, they have but 8 archbishops and 3 bishops with a total of about 80,000 souls, not including those of Malabar, in India, who are not under the direct jurisdiction of the Syrian Jacobite Patriarch of Antioch. The episcopal sees of this Church, with the exception of that of Jerusalem, whose titular bishop resides at Za'faran near Mardin, are all situated in Mesopotamia, and in the extreme northeastern section of Syria. Their liturgical language is Syriac (see Monophysites).

Catholic Syrians.—These consist mainly of those Syrian Jacobites who in the last five or six centuries have gradually given up their Monophysite heresy, and embraced the Catholic Faith, though retaining their Syrian Rite, customs, and liturgy. In course of time they have become numerous enough to have a patriarch of their own with several dioceses and bishops. They are to be found mainly in Syria, Palestine, Mesopotamia, and Babylonia. Their patriarch, whose official residence is at Mardin, but who lives sometimes in Mosul and sometimes in Aleppo or Beirut, in Syria, is officially entitled the "Syrian Patriarch of Antioch", having under his jurisdiction nine dioceses with a total of about 40,000 souls, divided as follows: (1) Archdiocese of Bagdad, with 2000 souls, 3 churches, 6 priests, and 1 school, residence Bagdad; (2) Archdiocese of Damascus, with 4000 souls, 6 parishes, 6 churches, 12 priests, and 6 schools, residence Damascus; (3) Archdiocese of Homs and Hamah, with 3000 souls, 5 parishes, and 5 churches, residence Homs; (4) Diocese of Aleppo, with 4000 souls, 3 parishes, 3 churches, and 15 priests, residence Aleppo; (5) Diocese of Beirut, with 700 souls, 1 church, and 3 priests; (6) Diocese of Diarbekir, with 1000 souls, 3 parishes, 3 churches, and 7 priests. (7) Diocese of Djezire, with 2000 souls, 7 churches, 10 priests, and 6 schools, residence Djezire; (8) Diocese of Mardin, with 5000 souls, 7 stations, 9 churches, 25 priests, and 7 schools; (9) Diocese of Mosul, with 10,000 souls, 8 parishes, 12 churches, and 25 priests, residence Mosul. The liturgical language of this Church is Syriac.

Catholics of the Latin Rite.—The Catholics of the Latin Rite in Syria are not very numerous, and are under the jurisdiction of the Apostolic Delegate of Syria, whose residence is at Beirut (formerly at Aleppo). They number about 7000, scattered all over the large towns of Syria, and are either of Italian or French descent, having settled in Syria mainly for commercial or educational purposes. The so-called Latin Patriarchate of Antioch owes its origin to the times of the Crusades of the eleventh, twelfth, and thirteenth centuries, in connexion with the establishment of the Latin Patriarchate of Jerusalem, both of which are nowadays simply titular, without any jurisdiction, and their titulars reside in Rome. The Latin Patriarch of Antioch has under his purely titular jurisdiction the following titular archbishoprics: Apamea, Adana, Tarsus, Anazarbe, Seleucia, Irenopolis, Cyr, Hierapolis, Edessa, Amida, Nisibis, Emesa, Heliopolis, Palmyra, Damascus, Philadelphia, Bostra, Almire, Derbe, Epiphania, Gabala, and Rosea. For Armenians (Catholic and Schismatic) see ARMENIA; for Chaldeans (Catholic) see CHALDEAN CHRISTIANS. The last group of Christians in Syria, and, perhaps the most important one, consists of the Maronites of Mt. Lebanon. They form by far the largest Christian community of Syria, and are all in union with the Catholic Church. (See MARONITES.)

The latest approximate statistics of the population and various denominations in Syria are—total population, 3,226,160; Mohammedans, 2,209-450; Catholic Christians, 555,949; non-Catholic Christians, 435,389; Nusairiyyeh, about 150,000; Ismailiyyeh, about 120,000; Druzes, about 70,000; Jews, 65,246.

CATHOLIC MISSIONS IN SYRIA.—The beginnings of Catholic missions in Syria may be appropriately traced back to the age of the Crusaders and the establishment of the Latin Patriarchate of Antioch in 1100, and that of the Vicariate Apostolic of Aleppo in 1762. The first Latin Patriarch of Antioch was appointed either in 1100 (according to Le Quien) or 1098 (according to Mas Latrie) by Pope Urban II. The first appointee was Bernard, Bishop of Artesia, near Antioch. He died in 1132 and was succeeded by Raoul, from Dumfront in Normandy, who, owing to flagrant acts of impertinence and insubordination to the Holy See, was forced to resign in 1142. He was succeeded by Aimeric or Amaury, of Limoges, who, having incurred the displeasure of Renaud de Chatillon, Prince of Antioch, was persecuted, tortured, and finally compelled to flee to Jerusalem. In 1160, however, he was restored to his see by Baudouin II, Prince of Aleppo. Soon, however, Bohemond III, Prince of Antioch, drove Amaury out of his see and offered it instead, in 1161, to the Greek Patriarch, Athanasius. On the death of the latter in 1170, caused by a terrific earthquake, in which most of the Greek clergy also lost their lives, the Greeks lost their influence and power with the people. In 1196 Amaury himself died and was succeeded by Pierre d'Angoulème, Bishop of Tripoli. In 1204 Pietro of Capua, known as Pietro d'Amalfi, was chosen Patriarch of Antioch. Bohemond IV, however, soon began to intrigue in order to replace him with the Greek Patriarch, Simeon III; but he was excommunicated by the patriarch and by the pope himself, Innocent III, which caused the whole Latin clergy to rebel against the king. Pietro d'Amalfi, nevertheless, was imprisoned by Bohemond and died in 1208, and was succeeded by the Latin Bishop of Jerusalem, Pietro di Capua, nephew of the deceased patriarch. Bohemond IV, however, refused to acknowledge him. In the meanwhile, after many quarrels and vicissitudes, King Bohemond and the Latin clergy agreed to the election of Rainier, in 1219, as Patriarch of Antioch, after having succeeded in inducing the pope to create the Greek occupant of the see, the Patriarch Peter, a cardinal. Rainier died in 1226 and was succeeded in 1228 by Albert Rezato, who was present at the Council of Lyons in 1245 and who died a short time afterwards.

In the thirteenth and fourteenth centuries several Latin patriarchs occupied the See of Antioch, but were constantly harassed and molested by the native Greek clergy and by the Frankish princes themselves, who for political purposes were ever ready to sacrifice religious interests in order to secure the good will of the native Greek Syrians. In the year 1348, however, the Latin Patriarchate of Antioch came to an end, as far as effective jurisdiction was concerned, although it continued to exist till our own times simply as a titular dignity. The present Latin Patriarch of Antioch resides in Rome. In the thirteenth century, however, when it was at its height, the Latin Patriarchate of Antioch had under its jurisdiction the Latin sees of Laodicea, Gabala, Antaradus or Tortosa, Tripoli, Byblos, Seleucia, Tarsus, Corycos, Mamistra, Edessa, Apamea, Balanea, Artesia, Albaria, Larissa, Mariames, Hierapolis, Cyr, Nicosia, Paphos, Famagusta, and Limassol (see Le Quien, "Oriens Christianus", III, 1165–1232). During these two centuries, the presence of so many Catholic bishops, clergy, and lay people of the Latin Rite in Palestine and Syria was productive of good Catholic missionary results, as, owing precisely to the contact of the Latins with the various Oriental Schismatic Churches of the Near East, a large number of Greeks, Nestorians, Jacobite Syrians and Monophysite Armenians, not seldom led by their own bishops and clergy, embraced the Catholic Faith.

The second centre of Catholic propaganda in Syria was the Latin Vicariate Apostolic of Aleppo. This Vicariate was first established in 1762, extending its jurisdiction and its beneficial missionary influence over all Syria, Cyprus, Egypt, and Arabia, all of which provinces were then, by a special decree of the Congregation of the Propaganda, detached from the Vicariate Apostolic of Constantinople. Its first occupant was the Lazarist Bassu. After his death, and, in fact, several decades later, in 1817, he was succeeded by Mgr. Gandolfi, of the Congregation of the Mission, who was replaced in 1827 by Mgr. Losanna, titular Bishop of Abydos. From 1827 down to 1896, owing to the special rights and privileges enjoyed by the Franciscans as the custodians of the Holy Land, all the Latin Vicars Apostolic of Aleppo were selected from the Franciscan order as follows: A. Fazio (1836–38); Father Fillardell (1839–52) who died a martyr in Constantinople in 1852; P. Brunoni (1853); S. Milani (1874–76); L. Piavi in 1877, who in 1889 was made Latin Patriarch of Jerusalem; and G. Bonfigli in 1890, who in 1896 was transferred to the Latin Vicariate Apostolic of Egypt. In the meanwhile the residence was transferred from Aleppo to Beirut, which was gradually becoming the most influential and progressive town of the Near East. In 1896 a French Dominican, Mgr Charles Duval, for nearly thirty years missionary at Mosul, succeeded Bonfigli. Duval died in 1904 and was succeeded on January 17 of the following year (1905) by Mgr. Frediano Giannini, titular Archbishop of Serra.

During the course of the nineteenth century the Vicariate Apostolic of Syria suffered several losses. In 1838 Egypt and Arabia were taken away; and in 1848 Jerusalem was elevated to the rank of Latin patriarchate with jurisdiction over Palestine, Southern

Phœnicia, and the Island of Cyprus. But on the other hand the Vicariate Apostolic of Syria obtained full jurisdiction over all the Latins of this vicariate, this prerogative being definitely withdrawn from the supervision of the Holy Land. The Vicariate Apostolic of Syria embraces at present the following territory: on the north its boundary line starts from the Gulf of Adalia, and touching the southern limits of Taurus, stretches toward the Euphrates, making a bend at Hamah On the east is the Desert of Palmyra; on the south, Palestine; on the west the Mediterranean Sea. Since their institution the vicars of Syria have held the title of vicars Apostolic of the Holy See for the non-Latin Catholics who live within the limits of their province. Their power as delegates however has not undergone the same restrictions as their authority of Vicars Apostolic; and Catholics of the Oriental Rite in the Latin Patriarchate of Jerusalem are subject to Syria by way of delegation.

The Latin communities, especially the French, have developed very extensively, particularly in this century, under the Vicariate Apostolic of Syria. They afford at the present time the strongest bulwark against the increasing encroachments of both Protestant and Orthodox missions which are seducing with money and promises the hard-working, but poor people of Syria. The Capuchins, stationed in Syria since 1627, care for the parishes of Antioch, Baabdath, Beirut, and Mersina: they have besides houses at Aleppo, Abey, Ghazir, Koderbek, and Salima. Their religious however are but few in number. The Franciscans have twelve convents in the following places: Aintab, Aleppo, Beirut, Damascus, Harissa, Ienige-Kale, Kenaye, Latakie, Marash, Sayda, Sour, and Tripoli. They also have 10 parishes, and number about 56 religious. Their college at Aleppo is in a flourishing condition and numbers 140 pupils. The Trappists have a house at Sheikle by Akbes, near Alexandretta. The Lazarists, established in Syria since 1784, have five houses with parishes and missions at Antoura, Beirut Damascus, and Tripoli. They number about 37 religious, and possess in the villages of Lebanon a large number of primary schools which they themselves visit and maintain. The Carmelites, stationed in Syria since 1650, have five residences: at Alexandretta, which forms a parish, in Beylan, Biscerri, Kobbayat, and Tripoli. Their religious are about 8 in number. The Brothers of the Christian Schools have 4 primary schools in Beirut, Latakie, Tripoli, and Tripoli By-the-Sea.

The Jesuits were established for the first time in 1595, and later returned to Syria at the invitation of Mgr. Mazloum and in obedience to the order of Gregory XVI. Their mission numbers 174 members, of whom 66 are priests, 47 scholastics, and 61 brother assistants. After being stationed at Zeilah, and later in Mesopotamia, the Jesuits founded at Ghazir in 1846 the Oriental Seminary which was transferred to Beirut in 1875 and has an enrollment of 50 students. This seminary has already sent forth over 130 priests. The younger religious of the Antonines, of the Maronite Rite, of the Basilian, and of the Greek Rite, follow their courses of philosophy and theology with the seminarists, all being related by similarity of rite. In 1848 the Jesuits established another college at Ghazir; this too was transferred to Beirut, and has become the celebrated College of St. Joseph. In 1883 the medical school was added, which to-day is attended by 130 students; the college has 500 students enrolled. Eighty religious professors and six French doctors take part in the instruction of the students and direct the most complete printing establishment in the Orient, publishing a weekly newspaper in Arabic, the "Beshîr", and the bi-monthly Arabic review, "Al-Mashrik". In 1896 P. Barnier founded at Sayda in the region of Akkar a normal school which is attended by 40 pupils; also an orphanage at Tanail.

During the last three centuries the Catholic missionaries of Syria have had to contend against heavy odds and difficulties occasioned by the Mohammedans, the Druzes, and the various Oriental Schismatic Churches, and, in the last century, also against many obstacles and antagonisms offered by the various Syrian Protestant Missions. But notwithstanding opposition they have forged ahead and are regenerating the Christians of Syria into a new life, mainly through the channels of religious instruction, conversion, and educational and philanthropic enterprises. The Jesuits, the Lazarists, and, of late, the Christian Brothers have achieved such progress in the line of religious and educational work that they have under their care, at present, nearly 300 schools, with 400 teachers and some 14,000 pupils. The Jesuits alone have under their care 155 elementary schools scattered all over Syria: 5 in Beirut with 16 teachers and 900 pupils; 5 in Damascus with 6 teachers and 250 pupils; 19 in Bikfaya with 29 teachers and 1300 pupils; 29 in Ghazir with 27 teachers and nearly 2000 pupils; 21 at Homs with 30 teachers and 1000 students; 37 at Sayda with 55 teachers and 1500 pupils; 18 at Tanial with 22 teachers and 900 students; and 21 at Zahle with 30 teachers and nearly 1300 students. The Lazarists, established in Syria in 1784, have under their care 110 elementary schools with 130 teachers and nearly 6000 pupils. Their high school and college at Antoura and Damascus have 300 and 200 students respectively. The Sisters of St. Vincent de Paul have charge of some 80 female schools and 4000 girls. The Sisters of Nazareth of Lyons, established since 1871, have schools and *pensionnats* at Beirut, St. John of Acre, Shefamar, Haiffa, and Nazareth, with about 2000 pupils. The Sisters of St. Joseph of Marseilles, established in Syria in 1846, have several schools in Beirut, Sayda, Nazareth, Tyre, and Deir-el-Qamar, with about 1500 pupils. The Sisters of the Holy Family have a large school at Beirut, with over 250 pupils. The Sisters of the Good Shepherd of Angers, have an orphanage at Hammana with 150 inmates. Finally, the Mariamettes, an order of native nuns, established in 1860, have under their care not less than 41 schools, 85 teachers, and some 3500 pupils, scattered all over Syria; 1 at Beirut, 2 at Celip, 9 at Bikfaya, 1 in Damascus, 6 in Ghazir, 2 at Homs, 6 at Sayda, 6 at Tanail, and 8 at Zahle.

Gabriel Oussani.

Syriac Hymnody.—To the general consideration set forth in the article Hymnody and Hymnology must be added some bearing particularly on the structure and liturgical use of hymns (*madrashê*), exclusive of poetical homilies or discourses (*mimrê*), which belong to the narrative and epic class, while the hymns are lyrical. The chief basis of Syriac metre is the fixed number of syllables of the verses, without distinction of *long* and *short* syllables, as in several modern languages. Verses of all lengths from two to twelve syllables are known, but the metres most used in hymnody are verses of twelve syllables formed of three equal measures (4+4+4), verses of seven syllables formed of two measures (4+3 or 3+4), and verses of five syllables also formed of two measures (2+3 or 3+2). These verses may be employed alone or grouped in strophes, the latter form being most frequent in hymns composed of verses of five and seven syllables. A strophe is generally composed of equal verses, but it sometimes happens that the first or the last verse is in a different measure from the other verses of the strophe. All the strophes of a hymn are usually of the same construction.

Besides variety of metre and division into strophes the Syrians prior to the ninth century knew no other artifice than the arrangement of acrostic poems. The acrostic played an important part in Syriac hymnody and its use, especially the alphabetic acrostic, seems to have been introduced in imitation of the Psalms and the Lamentations of Jeremias. Sometimes the acrostic is linear, simple when each verse begins successively with one of the twenty-two letters of the Syriac alphabet, multiple, when two, three, or more verses begin with the same letter without forming strophes; sometimes it is strophic, when each strophe is marked by a letter of the alphabet. This letter may be only at the beginning of the first verse or it may be repeated at the beginning of each verse of the strophe. There may be two or more successive strophes beginning with the same letter, each letter regularly marking the same number of strophes throughout the poem which thus consists of forty-four strophes, of sixty-six, or of any other multiple of twenty-two. The verbal acrostic is more rare. The name of Jesus Christ, of Mary, or of the saint in whose honour the hymn is composed serves to form linear or strophic acrostics. St. Ephraem signed some of his poems with his acrostic.

From the ninth century the influence of Arabic poetry made itself felt in Syriac hymnody, especially by the introduction of rhyme; this manner of marking the final stroke of a verse had been hitherto unknown, the rare examples held to have been discovered among older authors being merely voluntary or fortuitous assonances. But the Syrians made varied use of rhyme. There are poems in which all the verses have the same rhyme as in the "Kasida" of the Arabs; in others, and these are the more numerous, the verses of each strophe have a single rhyme which is not the same for all the strophes. In others the verses of a strophe rhyme among themselves, with the exception of the last, which repeats the rhyme of the first strophe like a refrain. In acrostic poems the rhyme is sometimes supplied by the corresponding letter of the alphabet; thus the first strophe rhymes with *a*, the second with *b*, etc. In verses of twelve syllables formed of three tetrasyllabic measures the rhyme is at the end of each verse or at each measure, so that it is repeated three times in each verse. There may also be a different rhyme for the first two measures and for the last. These are the most frequent combinations, but there are others.

Most ancient hymns, e. g. those of St. Ephraem, Narses, and Balai, although composed for one or two choirs, were not originally intended for liturgical use properly so called. They were addressed as much to the laity as to clerics, and date from a period when the codification of harmony, if we may so speak, was not yet regularly established. The result of adapting these hymns to liturgical offices was that they underwent various modifications: (1) in the assignment of authorship—the Syrian Jacobites and the Maronites in adopting those of Nestorian origin either suppressed the name of the author or substituted the name of one whom they considered orthodox, most frequently St. Ephraem; (2) in revision, those which were too long were shortened and heterodox expressions were modified—thus the term "Mother of Christ" was replaced by "Mother of God", etc.; (3) in general arrangement, especially by the addition of a refrain when there was none in the original. Thus a hymn by St. Ephraem the acrostic of which forms the name "Jesus Christ", begins with the strophe:—

Jesus Our Lord the Christ [Father;
Has appeared to us from the bosom of His
He has come to deliver us from darkness,
And to illumine us with his resplendent light.

It was preceded by the following distich which forms the refrain:

Light is arisen upon the just
And joy for those who are broken-hearted.

Likewise a hymn of Narses on the Epiphany begins:—

Error like darkness,
Was stretched over creatures;
The light of Christ is risen
And the world possesses knowledge.

Its refrain is the following distich:—

The light of the appearing of Christ
Has rejoiced the earth and the heavens.

Hymns do not occur only in the Office which corresponds to the Roman Breviary; the Syrians also made use of them in various liturgical functions, such as funerals and marriage celebrations.

Simple hymns without refrain are called *teshbuhtê* (glorifications); the name *cala* (voice) is given to the hymns in which each strophe is preceded by a sentence (metrical or not) expressing a thought in conformity with that of the strophe. It is in a manner an invitation from the first choir to which the second replies by strophe, e. g.:—

First choir: Open to me the gates of justice.
Second choir: Open to us, Lord, the great treasure, (strophe of four verses).
First choir: And I will enter to praise the Lord.
Second choir: At the gate of thy mercies (etc., strophe of four verses).

Sometimes the strophes are interspersed with versicles from the Psalms.

The hymns in the Jacobite Office which conclude the part known as *sedra* and replace the short prayers of the Nestorian Office are called *ba'utha* (prayer, request). Most hymns of this class are in pentasyllabic verses and are the work of the poet Balai (d. about 450). They show great simplicity of thought tand language and consist of two strophes, generally of six verses each, sometimes of four, as for example:—

During forty days
Moses fasted on the mountain:
And with the splendour of its light
His countenance shone.

During forty days
Ninive fasted:
And the Lord was appeased,
And annulled the sentence.

Instead of the *ba'utha* occasionally occurs a metrical composition called *seblata* (stairs), which are factitious arrangements of verses borrowed from various sources and arbitrarily arranged by those who co-ordinated or revised the Offices, and are of no assistance in the study of Syriac hymnody. The *sagithâ* is less frequently replaced by the *augîtha*, a canticle in the form of a dialogue which recalls the "Victimæ paschali" of the Roman Missal. All the poems of this kind known to us are of Nestorian origin, and are probably the work of Narses. They are uniformly constructed with an introduction and a dialogue; the introduction is composed of from five to ten strophes of four heptasyllabic verses; the dialogue between two persons or two groups of persons contains forty-four strophes (twenty-two for each interlocutor) similar to those in the prologue and forming an alphabetic acrostic. These compositions of rather lively measure are stamped by a certain grace. The subject is adapted to the feast of the day; thus in the canticle for Christmas the dialogue is between the Blessed Virgin and the Magi; for the Annunciation, between Gabriel and Mary; for the feast of the Syrian Doctors, between Cyril and Nestorius, etc. These three kinds of hymns correspond to the three subjects which form their usual theme, praise, prayer, and instruction, but as has been said the last-named was chiefly imparted by the *mimrê*.

Extensive study of Syriac hymnody would show whether there is any relationship between it and Byzantine hymnody, an hypothesis which has had as many opponents as defenders; but this study has not yet been attempted, and it is an undertaking fraught with difficulties, owing to the small number of documents published in satisfactory condition. Indeed the knowledge of hymns supplied by editions of the liturgical books of Uniat Chaldeans, Syrians, or Maronites is inadequate for the reasons indicated above. The works of St. Ephraem which contain a large number of them (authentic or apocryphal) have not been critically edited. The Nestorian Breviaries which have most faithfully preserved the ancient texts have never been printed and MSS. are rare, while the collections of hymns apart from liturgical books are few and have not been sufficiently studied.

(a) Studies.—Cardahi, *Liber thesauri de arte poetica Syrorum* (Rome, 1875); Martin, *De la métrique chez les Syriens* (Leipzig, 1879); Lamy, *On Syriac Prosody* (London, 1891); Mayer, *Anfgang und Ursprung der lateinischen und griech. rythmischen Dichtung* (Munich, 1885); Grimme, *Der Strophenbau in den Gedichten Ephraems* (Fribourg, 1893); refuted by Brockelmann in *Zeitsch. der deutsch morg. Gesellschaft*, LII, 402; Duval, *Notes sur la poésie syriaque* in *Journ. asiat.*, II (1897), 57; Zingerle, *Harfenklänge von Libanon* (Innsbruck, 1840); Idem, *Das syrische Festbrevier aus Libanons Gärten* (Villengen, 1846); Denzinger, *Ritus orientalium* (Würzburg, 1863), Bickell, *Ausgewählte gedichte der syrischen Kirchenväter* (Kempten, 1872); Maclean, *East Syrian Daily Offices* (London, 1894).

(b) Editions.—For the liturgical books of the Syrians see Bickell, *Conspectus rei Syrorum litterariæ* (Munich, 1871); Nestle, *Litteratura syriaca* (Berlin, 1888), §3; for the works of St. Ephraem see Ephraem, bibliography; other editions; Assemani, *Codex liturgicus* (Rome, 1749–66); Zingerle, *Zeitschr. d. morg. Geselsch.* (1865), 730; Splieth in Daniel, *Thesaurus hymnologicus*, III (Halle, 1856); Overbeck, S. *Ephraemi syri . . . Balaci aliorumque opera selecta* (Oxford, 1865); Deutsch, *Edition dreier syrischen Lieder* (Berlin, 1895); Sachau, *Uber die Poesie in der Völksprache der Nestorianer* (Berlin, 1896); Folkmann, *Ausgewählte nestorianische Gedichte von Giwargis Warda* (Kirchain, 1896); Feldmann, *Syrische Wechsellieder von Narses* (Leipzig, 1896); Zetterstein, *Beiträge zur Kenntnis der religiösen Dichtung Balai's* (Leipzig, 1902); Hilgenfeld, *Ausgewählte Gesänge des G. Warda* (Leipzig, 1904). Some hymns by various authors are in Manna, *Morceaux choisis de littérature araméenne* (Mosul, 1901), and in *Ktabuna dpartutê* (Ourmia, 1898).

J. B. Chabot.

Syriac Language and Literature.—Syriac is the most important branch of the group of Semitic languages known as Aramaic. In the time of Alexander the Great, Aramaic was the official language of all the nations from Asia Minor to Persia, from Armenia to the Arabian Peninsula. It was divided into two dialects: the western, used in Palestine and Syria by the Jews, Palmyrans, and Nabateans; the eastern, spoken in Babylonia by Jews, Mandeans, Manichæans, and the peoples of Upper Mesopotamia. The Syriac language, as we know it from its literature, did not spring from the dialect spoken in Syria, but from the eastern Mesopotamian dialect. When the weakened Seleucides ceased to defend the Euphrates, small independent principalities were formed in that region. The most famous was the little Kingdom of Edessa whose capital Osrhoene was the religious centre of the country (cf. R. Duval, "Hist. d'Edesse", Paris, 1893). This city also became an intellectual centre, and even then the language of its people attained great perfection. A little later under the influence of Christianity it developed considerably, and eventually became the liturgical and literary language of all the Churches from the shores of the Mediterranean to the centre of Persia. The suppleness and flexibility of this dialect and its loose and variable syntax readily lent itself to the most different constructions, and offered to Christianity a more appropriate instrument than Greek for the expression and spread of new ideas. In Syria proper and western Mesopotamia Syriac was first used simultaneously with Greek, but after the Monophysite schism Greek gradually fell into disuse. The period from the middle of the fifth century to the end of the seventh was the most brilliant period of Syriac literature. The Mussulman invasion brought about the decadence by imposing Arabic as the official language; the latter rapidly came into general use, and Syriac was no longer spoken or understood by the people, although it was upheld as a literary language for four centuries longer, and until the present time as a liturgical language. Nevertheless, the destruction was not complete; Syriac, or rather Aramaic, modified according to the laws of evolution common to all languages, is still spoken in three villages in the neighbourhood of Damascus, in Tour Abdin (Mesopotamia, between

Nisibis and the Tigris), and in Kurdistan, especially in the neighbourhood of Ourmiah. The language of this city is even in process of becoming a literary tongue, through the efforts of the missionaries (American Protestants and French Lazarists), who print numerous works in this dialect, Bibles, text-books, prayer-books, and even reviews.

The works transmitted to us in the Syriac language form an essentially and almost exclusively Christian religious literature. After Latin and Greek there is none more useful to the exegete, the theologian, and the ecclesiastical historian. We know of more than 150 authors who enriched it from the fourth to the thirteenth century. The libraries of Europe and those of some eastern monasteries which are of easy access possess nearly 3000 MSS., containing the greater part of these works. Our short list will take only the best-known authors and the most important works. Of pagan literature there remain only a few short inscriptions, most of them funereal, and a letter from Mara bar Serapion, Stoic philosopher of Samosata, to his son, written probably in the course of the third century (ed. Cureton, "Spicelegium Syr.", London, 1855). The writings of the Gnostic Bardesanes of the same period, with a Gnostic hymn inserted in the Acts of St. Thomas, form a sort of transition between Pagan and Christian literature. The earliest monument of the latter is the version of the Bible called the Peschitta (simple), which is treated elsewhere (see VERSIONS OF THE BIBLE). It suffices to mention also the two oldest orthodox writers, Aphraates the Persian Sage (d. 350), and St. Ephraem, the most brilliant of the Fathers of the Syrian Church (d. 373). Among the disciples of Ephraem was Mar Aba, the author of commentaries on the Gospels and of a homily on Job; Zenobius, deacon of Edessa, who wrote treatises against Marcion and Pamphylus and a "Life of St. Ephraem"; Paulinus, who possibly fell into heresy after having written against Marcion and the sceptics. Abamya, a nephew of Ephraem, has been wrongly identified with Cyrillona, an unknown author who wrote in 397 a poem on the two plagues of that period, the locusts and the Huns.

At the beginning of the fifth century there flourished at Edessa the famous school of the Persians, in which the doctrines of Theodore of Mopsuestia and Nestorius found fervent adherents. The bishop then was Rabbula, son of a pagan priest of Kenneshrin (Chalcis). He was converted by Eusebius, bishop of that city, distributed his goods to the poor, and embraced the ascetic life. In 412 Acacius of Aleppo appointed him Bishop of Edessa; he died in 435. After inclining to Nestorianism he became an ardent partisan of St. Cyril of Alexandria. His severity made him formidable to his clergy, and won for him the title "tyrant of Edessa". At Constantinople he delivered a discourse against Nestorius, which was translated into Syriac, as well as several of his letters. He himself translated the treatise "Of the Orthodox Faith" which Cyril addressed to him. His extant works were translated by Overbeck (Oxford, 1865). His successor was the famous Ibas, or Hiba, who favoured the Nestorians. Mari the Persian of Rewardashir, to whom the celebrated letter of Ibas was addressed, wrote a commentary on Daniel and a controversial treatise against the Magians. He also commentated the (lost) letters of Acacius of Amida (Diarbekir), an avowed Nestorian, less noted for his writings than for his charity, which won him a place in the Roman Martyrology (9 April). He must not be confounded with Acacius of Melytene who joined Rabbula in his warfare against Nestorianism, nor with Acacius of Seleucia, patriarch of the Nestorians (484–96), author of homilies on fasting and of treatises against the Monophysites; he also translated into Persian the treatise on faith of Osee, Bishop of Nisibis, who in 496 promulgated the statutes of the school of that city (ed. Guidi). About the middle of the century lived Isaac of Antioch, called the Great and regarded as a saint. His history is unknown. The Syrians have attached his name to a considerable collection of metrical homilies (partly edited by Bickell, Giessen, 1873–77, and by Bedyan, Paris, 1903), but it is certain that the works of several authors of the same name have been attributed to him.

Among these are Isaac of Edessa, a Monophysite of the end of the sixth century, and Isaac of Amida. The last-named is the author of a poem on secular games (414) and on the taking of Rome (410). In the first half of the century lived Balai, chorepiscopus of Aleppo, the author of numerous poems which have been preserved in part. At the death of Ibas the doctors of the school of Edessa were expelled, and withdrew to the Persian Empire. Among them were Barsauma, who became Bishop of Nisibis and was noted for his despotism; we have six of his letters addressed to the Patriarch Acacius. He also wrote exhortations, funeral orations, and hymns; Narsai joined him and was the real founder of the School of Nisibis which continued the tradition of that of Edessa; he taught there for more than forty years. He was praised in most exalted terms by his coreligionists, who called him "the Tongue of the East", "the Poet of Religion", "the Harp of the Holy Ghost". The Monophysites nicknamed him "the Leper". He died about 502. He is said to have composed commentaries on most of the books of the Old Testament, and 360 metrical discourses. Many of them have been edited by Mingana (Mossoul, 1905). Mana, who became a bishop in Persia, was distinguished at Edessa for his translation of the works of Theodore of Mopsuestia.

Eliseus bar Kozbaye and Abraham of Beit Rabban, the successors of Narsai in the direction of the school, wrote Biblical commentaries and numerous treatises against the Magians. Most of the Nestorian authors of the sixth century proceeded from this school. One of the most famous was the Patriarch Mar Aba I (540–52), a convert from Zoroastrianism; he studied at Nisibis, learned Greek at Edessa, and went to Constantinople; later he founded the School of Seleucia. He preached boldly against the Magi; Khusrau I exiled him; on his return to Seleucia he was thrown into prison, where he died. He is credited with a translation of the Scriptures, but there is no trace of it; he wrote Biblical commentaries, homilies, and synodal letters. He also translated into Syriac the liturgy of Nestorius. Paul the Persian, very learned in profane philosophy, composed a treatise on the "Logic" of Aristotle, dedicated to King Khusrau (ed. Land), and several other didactic works, preserved in part. His namesake, Paul of Nisibis, a disciple of Mar Aba, was the author of Biblical commentaries. Theodore, made Bishop of Merw in 540, wrote a commentary on the Psalms and a reply to ten questions of Sergius of Reshayna. His brother Gabriel, Bishop of Hormisdardashir, wrote controversial books against the Manichæans, and the solution of difficult Scriptural questions. To Abraham bar Kardahe, of Nisibis, are attributed homilies, funeral orations, sermons, and a letter against Shisban, probably a Magian. Another Abraham, of Kashkar, founded and governed on Mount Izla near Nisibis a famous monastery called the Great Convent. The rules he established in 571 were published (Chabot, Rome, 1898) with those of Dadisko, his successor (588–604).

The physician Joseph, the successor of Mar Aba (552–67), is spoken of as the author of an apocryphal correspondence attributed to the Patriarch Papa (fourth century). Joseph Houzaya of Al-Ahwaz was then teaching at Nisibis; he is credited with the oldest grammatical treatise known to Syriac literature, and is regarded as the inventor of the system of punctuation in use among the Nestorians, compiled in imitation of the Massoretic signs, perhaps with the assistance of the Jews of Nisibis. Henana of Adiabene at the end of the sixth century drew to Nisibis a large number of disciples; his teaching caused serious dissensions in the Nestorian Church, for he abandoned the doctrines of Theodore of Mopsuestia to attach himself to St. John Chrysostom. His doctrine, censured by Ishoyahb I, was condemned by the Synod of Sabrisho (596). Most of his literary work consists of Biblical commentaries. They are lost, but extensive fragments are inserted in the "Garden of Delights", a twelfth-century compilation, which has preserved numerous extracts from the oldest Nestorian exegetes. Under the patriarchate of Ezechiel (570–81) Barhadbeshabba, who became Bishop of Holwan, a partisan of Henana, wrote numerous controversial and exegetical works and a treatise "On the Reason of the Schools" (ed. Scher, Paris, 1909), which throws light on the history of Nisibis. We have the synodal letters, and twenty-two questions on the sacraments of the Patriarch Ishoyahb I of Arzon (582–95).

At the end of this century the Syrians had a copious hagiographical literature, of which the oldest and most authentic portion consists of the Acts of the Martyrs of the persecution of Sapor II (see PERSECUTION). To these were added numerous passions, lives of saints, and biographies translated from the Greek, the whole forming a rich mine for the historian and the hagiographer. In this century also there were translated and were often re-written the Greek apocrypha of the Old and New Testament which have come down to us in Syriac, together with some native productions, such as the teaching of Addai. The curious romance of Julian the Apostate (ed. Hoffmann) dates from the sixth century as well as the valuable chronicle of Edessa and the large historical compilation (ed. Land) ascribed to Zacharias the Rhetorician; it consists in part of original documents and partly of Greek sources, and is of Monophysite origin.

While Mesopotamia and especially Persia was attached to Nestorianism, the western Syrians embraced the Monophysite doctrines of Eutyches, propagated by the monk Barsauma, condemned as a heretic by the Council of Chalcedon (451), and in this they claimed to remain faithful to the traditions of St. Cyril of Alexandria (see MONOPHYSITES AND MONOPHYSITISM). All their theological and polemical literature was inspired by this doctrine, which was defended by talented writers. The foremost were James of Sarugh and Philoxenes of Mabboug. The latter was born at Tabal in Mesopotamia, studied at Edessa in the time of Ibas, and later ardently embraced the Monophysite cause. Appointed Bishop of Mabboug (Hierapolis) in 485, he went twice to Constantinople and was much esteemed by the Emperor Anastasius. He presided at the council which made the famous Severus Patriarch of Antioch (512). He was exiled by Justin and died at Gangres about 523. Despite his eventful life he was one of the most prolific and elegant of Syriac writers. Of his writings we possess liturgies and prayers, thirteen homilies (ed. Budge, London, 1894) which constitute a treatise of Christian ethics, a commentary on the Gospels (preserved only in part), a treatise on the Trinity and the Incarnation (ed. Vaschalde, Paris, 1907), some discourses, professions of faith, several short polemical treatises against the Catholics and the Nestorians, and numerous letters.

James and Philoxenes wrote against Stephen bar Sudailê, a pious monk, born at Edessa; on his return from a journey to Egypt he preached pantheistic doctrines. Driven from Edessa he withdrew to Palestine, where among the Origenistic monks he found a fertile field for his ideas (cf. Frothingham, "Stephen bar Sudaili", Leyden, 1886). None of his letters or mystical commentaries on the Bible remain, but he is the author of a book, "The Hidden Mysteries of the House of God", which he issued under the name of Hierotheus, the pretended master of Dionysius the Areopagite. This extensive treatise was very influential in the development in Syria of pseudo-Dionysian literature; it was afterwards forgotten, and in the thirteenth century Barhebræus had great difficulty in securing a copy; this copy is now in the British Museum.

Among the other Monophysite writers of the sixth century were: Simeon of Beit Arsham, a skilful dialectician who combatted the Nestorians. He died at Constantinople in the reign of Justinian. His letters on the propagation of Nestorianism and on the Christian martyrs of Yemen (Himyarites) are famous. John bar Cursus, Bishop of Tella, expelled from his see in 521, died at Antioch in 538. He is the author of exhortations to the clergy and disciplinary questions, a profession of faith, and a commentary on the Trisagion. Paul, Bishop of Callinicus, deposed in 519, translated into Syriac the works of Severus of Antioch. Jacob Barbuadæus, the real founder of the Monophysite Church, from whom it derived its name of Jacobite, died in 578. His letters and profession of faith are preserved in Syriac translations. The lives of all these men are more or less well-known through numerous monographs which cannot be enumerated here, and through the valuable historical works of John of Ephesus.

Sergius of Reshaina was a physician and a distinguished scholar; his friendship with the Nestorians and the part he played at the end of his life caused him to be suspected of having abandoned Monophysite doctrines. He studied at Alexandria, where he learned Greek. In 535 he was sent to Rome by Ephrem, Orthodox Patriarch of Antioch, and escorted Pope Agapetus to Constantinople. Here Sergius sought to expel the patriarchs Severus of Antioch, Theodosius of Alexandria, and Anthinus, who had met there. He died there in 536. His considerable literary work consists almost entirely of Greek translations remarkable for their fidelity; his version of the works of the pseudo-Areopagite greatly influenced the theology of the western Syrians, and his translations of profane authors (Porphyry, Aristotle, Galen, etc.) hold a special place in the body of Syriac translations. A number of the works of Sergius have reached us; they have been published in part; mention must also be made of Rhoudemeh of Tagrit (d. 575), who left philosophical and grammatical works; Moses of Aghel, translator of the works of Cyril of Alexandria; and the Patriarch Peter of Callinicus (578–91), whose theological writings against Damian of Alexandria and the Tritheists have reached us, together with some letters.

Among the Nestorians the literature of the seventh century begins with Babai the Great, Abbot of Mount Izla, who governed the Church of Persia during the vacancy of the patriarchal see (608–29) brought about by the hostility of Khusrau II. He composed many works; his treatise on the union of the two natures of Christ which we possess is one of the most important works of Nestorian theology. There are extant a hymn and a dogmatic letter by the Patriarch Ishoyahb II of Gedala (628–43). Ishoyahb III of Adiabene (648–60) was a prolific writer, and remarkable for his studied style; he composed controversial treatises, funeral orations, hymns, numerous liturgical works, and the history of the martyr Ishosabran. We have also a collection of 104 of his letters (ed. Duval, Paris, 1904), which is important for the religious history of this period. Ishoyahb energetically opposed Sahdona (Martyrius), Bishop of Mahoze, his former friend and his companion in the embassy from Boran to the Emperor Heraclius in 630. Sahdona became converted to Catholicism. The extant portion of his numerous writings has been edited by Bedjan (Leipzig, 1902); it consists mainly of the end of a treatise in moral and dogmatic theology of which the first seventeen chapters were assailed by Ishoyahb. To this period belong the two most original ascetic writers, Isaac of Nineveh and John of Phanek (often called John Saba); the works of the latter, many of which have been preserved, embrace all subjects relating to religious perfection. Under the patriarchate of George (661–80) the monk Enanisho composed the work entitled "Paradise"; it consists of two parts, the first a translation of the "Lausiac History" of Palladius and the "Monastic History" of Rufinus, the second a collection of apothegms from the Fathers, and questions concerning the ascetic life (ed. Bedjan, Leipzig, 1897). This work must not be confounded with the "Paradise of Orientals", which contains the lives of Eastern ascetics and was compiled by Joseph Hazaya (the Seer), an austere monk, the author of numerous ascetical treatises, and the warm partisan of Henana, with whom he was condemned; he lived at the beginning of the seventh century.

The Jacobite writers of this period are less numerous: John I, Patriarch of Antioch 631–48, is the author of numerous liturgical prayers; Maranta of Tagrit (d. 649) left a liturgy, hymns, and commentaries; Severus Sebokt, his contemporary, devoted himself in the celebrated convent of Kenneshrê on the banks of the Euphrates to philosophical and scientific studies; his works, which are partly preserved, exercised great influence on the following centuries. His letters deal with theological subjects. His disciple Athanasius of Balad, who became patriarch (634–88), likewise devoted himself to Greek philosophy. All these names were eclipsed by another of his disciples, James of Edessa, a writer as distinguished for the extent and variety of his knowledge as for his literary talent.

During the seventh century public events had created new conditions in the lands where Syriac was spoken. The end of the Roman domination in Syria almost coincided with the fall of the Persian dynasty of the Sassanides, and the Mussulman rule enforced the use of the Arabic tongue. These new conditions introduced a new character in literature, among Nestorians as well as Jacobites. Theological treatises were thenceforth more didactic than polemic, and Biblical exegesis became chiefly grammatical and philological. The eighth century began a period of decadence. Among Nestorian writers were Babai of Gebilta, a reformer of religious music in the time of the Patriarch Salibazekha (714–28); he was the author of funeral orations, hymns, and letters, preserved in part; Bar Sahdê, of Karka of Beit Slok, the author of an ecclesiastical history and of a treatise against Zoroastrianism, both lost; he lived in the time of the Patriarch Pethion (731–40). About the same time David of Beit Rabban wrote "The Little Paradise", a kind of monastic history from which Thomas of Marga borrowed. Abraham bar Daschandad, a disciple of Babai, was the author of a book of exhortations, homilies, letters, "The Book of the Royal Way", and a commentary on the writings of the monk Marcus. Mar Aba II, who became patriarch at the age of 100 (741–51), wrote a commentary on the works of St. Gregory of Nazianzus, and another on the Dialectics of Aristotle, a "Book of Military Governors", demonstrations, and letters. His compatriot, Simeon bar Tabbakhê, treasurer of the Caliph al-Mansur, was the author of an ecclesiastical history.

Surinus, Bishop of Nisibis and later of Holwan, elected patriarch in 754 and immediately deposed, is regarded as the author of a treatise against the heretics. Cyprian, Bishop of Nisibis (741–67), composed a commentary on the theological discourses of St. Gregory of Nazianzus and a treatise on ordination. Abu Noah of Anbar, secretary of the Governor of Mosul at the end of this century, wrote a refutation of the Koran, a refutation of heretics, and a life of John of Dailam. The Patriarch Henanisho II (775–79) is the author of letters, hymns for the dead, metrical homilies, and canonical questions. He was succeeded by Timotheus, whose literary work excels that of all his contemporaries.

Timotheus I, a native of Hazza (near Arbelles), a disciple of Abraham bar Daschandad, became Bishop of Beit Bagash; at the death of Henanisho he was elected patriarch by intrigue and the favour of the Governor of Mosul; he quieted the rivalry and was installed in 780, dying in 823. During his patriarchate the Nestorian missions in Central Asia received powerful encouragement, and he introduced important disciplinary reforms into his church (cf. Labourt, "De Timotheo patriarcha", Paris, 1904). His literary work comprises an astronomical treatise entitled "Book of the Stars" (lost), two volumes of canonical questions, a controversy concerning the Christian faith maintained before the Caliph Al-Mahidi, a commentary on the works of St. Gregory of Nazianzus, and about 200 letters. Sixty of these letters, the controversy, and a large proportion of the questions are extant in various MSS. Through him was made the first collection of the Nestorian councils, which under the name "Synodicon Orientale" (ed. Charbot, Paris, 1903) comprises the acts of thirteen synods convened by his predecessors from 410 to 775. It is the basis of the Nestorian canon law and the official exposition of its creed. About this time lived Theodorus bar Kônî, the author of a book of *scholia* (ed. Scher, Paris, 1908–11), which contains *scholia* on the Old and New Testament, a treatise against the Monophysites, one against the Arians, a colloquy between a pagan and a Christian, and a treatise on heresies. Ishodenah (or Denahisho), Bishop of Bassorah, composed an ecclesiastical history (lost), and the "Book of Chastity" (ed. Chabot, Rome, 1898), which contains 150 notices of the founders of Oriental convents.

The share of the Jacobites in the literary work of this period is far inferior to that of the Nestorians. With the exception of George, Bishop of the Arabs, a disciple of James of Edessa who is treated elsewhere (see MONOPHYSITES AND MONOPHYSITISM), the writers are of only secondary interest. Of Elias, Patriarch of Antioch (709–24), we have an apology explaining why he abandoned the Diophysite doctrine; it is addressed to Leo, Diophysite Bishop of Harran and author of controversial writings. Daniel of Salah wrote an extensive commentary on the Psalms, in three volumes; the first to have reached us in the original text and the third in an Arabic version. David bar Paulos left a grammatical work, letters, a commentary on chap. x of Genesis, a dialogue on the addition of the words "who was crucified for us" to the Sanctus. To him are also ascribed poems which seem to belong to a later period. A celebrated author was Theophilus of Edessa, called Maronite by Bar-Hebræus, and Chalcedonian by Michael the Syrian; this distinguished astronomer, who was much esteemed by the Caliph al-Mahdi, died in 785. His works include astronomical treatises, a history, and a Syriac version of Homer, several quotations from which have been found. About 775 Lazarus of Beit Kandasa compiled a commentary on the New Testament, a portion of which (St. Mark, St. John, and ten Epistles of St. Paul) is extant. George of Beelthan, a monk of Kenneshrê who became patriarch (758–90), is the author of a discourse and of some homilies (lost) and of a commentary on the Gospel of St. Matthew (partly preserved). His successor Syriacus (793-817) left a liturgy, canons, some homilies, and letters.

The ninth century witnessed a renaissance in scientific and historical studies. Among the Nestorians there was a series of Christian physicians who enjoyed the favour of the caliphs of Bagdad; Gabriel Boktisho (d. 828), John bar Maswai (d. 857), Honein (d. 873), and at the end of the century John bar Serapion were famous among Christians and Mussulmans for their medical works and their translations into Syriac and Arabic of the works of Dioscorides, Hippocrates, Galen, and Paul of Agima. Honein was at once physician, philosopher, historian, grammarian, and lexicographer. His disciple Isho bar Ali is the author of a voluminous lexicon (ed. Hoffmann, Kiel, 1874; Gottheil, Rome, 1910). The patriarch, Isho bar Noun (823–27), was esteemed as a theologian and canonist; of his numerous works there remain juridical questions, questions of Scripture, funeral orations, and letters. Ishodad of Merw, Bishop of Haditha, about the middle of the century composed commentaries on the Old and New Testaments, which are of great interest in the history of exegesis. In 840 Thomas, Bishop of Marga, a former monk of Beit Abê, wrote the history of that famous convent which was located in his diocese, and fortunately he inserted therein numerous documents which would not otherwise be known to us; hence his work sheds much light on the history of the whole Nestorian Church during a period of three centuries. It has been edited by Budge (London, 1893) and by Bedjan (Leipzig, 1901).

The less numerous list of Jacobite writers of the ninth century opens with the name of Dionysius of Tell Mahre, who was elected patriarch in 815 and died in 845. He wrote an ecclesiastical history in two parts, each consisting of eight books divided into chapters. It extended from 581 to 833; unfortunately it is lost but is made known to us by the copious extracts which Michael inserted in his own chronicle (see below). This work is quite different from the chronicle which Assemani incorrectly ascribes to Dionysius. The latter, which stops at the year 775, is divided into four parts. The first (ed. Eulberg, Upsala, 1851) goes as far as Constantine, and relies chiefly on Eusebius; the second, as far as Theodosius the Younger, mainly follows Socrates; the third reproduces the second part (lost) of the history of John of Asia and the chronicle of Josue the Stylite (ed. Wright, London, 1882); the fourth (ed. Chabot, Paris, 1895) is the personal work of the author, probably a monk at the convent of Touknin in Tour Abdin. The work of Dionysius was dedicated to Iwannis (John), Bishop of Dara, one of the most esteemed Monophysite theologians, of whom we possess a treatise on the priesthood, one of the Resurrection, one of the soul, and a commentary on the books of the Pseudo-Areopagite. Theodosius of Edessa, brother of the Patriarch Dionysius, executed a version of the poems of St. Gregory of Nazianzus. He was the close friend of a monk of Tagrit, Antonius, surnamed the Rhetorician, author of a treatise on rhetoric, a treatise on Providence, of panegyrics, letters, hymns, and prayers. Lazarus bar Sabtha, Bishop of Bagdad, deposed in 828, was the author of a liturgy and an explanation of the offices of the church. Nonnius, Archdeacon of Nisibis, about the middle of the century wrote a controversy against Thomas of Marga and some polemical letters. The monk Romanus, who took the name of Theodosius when he became patriarch (887–96), compiled a medical collection (lost), a copious commentary on the book of Hierotheus, and a collection of Pythagorean maxims (ed. Zotenberg, Paris, 1876). No writer of this century was so prolific as Moses bar Cephas (q. v.) who took the name Severus when he became bishop.

The next two centuries mark the lowest point of the period of decadence. Most of the ecclesiastical dignitaries and the rare authors who concerned themselves with learning wrote chiefly in Arabic. There was not a single Jacobite writer during the whole of the tenth century; among the Nestorians those worthy of mention were Henanisho bar Seroshwa, Bishop of Hira at the beginning of the century; he composed Scriptural disquisitions, and a lexicon, now lost, but included almost in its entirety in that of Bar Bahlul; Elias, Bishop of Perozshabur (c. 920), wrote letters, homilies, an apology, and a collection of maxims known as "Centuries"; George, Metropolitan of Arbella (d. 987), is the author of a canonical collection and some hymns. To him is also attributed an interesting "Explanation of the liturgical offices". Emmanuel bar Shahharé (d. 980) wrote a treatise "On the six days of creation and Providence", divided into four parts and twenty-eight books; the second book is missing in all known MSS. Towards the end of the century Andrew, a grammarian, composed a treatise on punctuation and some hymns. At the same period at Bagdad where he taught, Abu' l' Hassan, known as Bar Bahlul, compiled his famous "Lexicon", a small encyclopedia in which he collected, together with the lexicographical works of his predecessors, numerous notices on the natural sciences, philosophy, theology, and Biblical exegesis (ed. Duval, Paris, 1888–1901). At the end of the century John Bar Khaldon wrote the life of the monk Joseph Bosnaya, in which he inserted a curious treatise on mystical theology. The following are the foremost Nestorian writers of the eleventh century. Elias of Tirhan, who became patriarch (1028–49), is famous for his treatise on grammar; he completed the canonical collection made by Timotheus, adding later decisions, and wrote legal treatises. Elias bar Shinaya, Metropolitan of Nisibis, is the most remarkable writer of this century. Appointed Bishop of Beit Nouhadrê in 1002, and of Nisibis in 1008, he occupied the see more than forty years and survived the Patriarch Elias. He is the author of a Syriac grammar, an Arabic-Syriac grammar, hymns, metrical homilies, letters, and a collection of canonical decisions. His most important work is his "Chronography", written in 1019; it includes a chronicle and a treatise on the calendar (ed. Brooks-Chabot, Paris, 1909–10). Elias also wrote in Arabic several dogmatic and moral treatises. Abdisho bar Bahriz, who became Bishop of Arbela and Mosul in 1030, is the author of a collection of "Laws and Judicial Sentences". Among the Jacobites were: John of Maroun (d. 1003), the author of a commentary on the Book of Wisdom; and Isho bar Shoushan, Patriarch of Antioch under the name of John (1064–73). He composed a liturgy, canons, a treatise in defence of the Syrian custom of mixing salt and oil in the Eucharistic bread, four poems on the pillage of Nelitene by the Turks (1058), and several letters in Syriac or Arabic. At the time of his death he was engaged in collecting the works of St. Ephrem and Isaac of Antioch.

In the thirteenth century the Nestorians also began to write in Arabic. Elias III Abuhalim, Metropolitan of Nisibis and afterwards patriarch (1176–90), composed prayers and wrote letters. John bar Malkon, who took the name of Ishoyahb when he became Bishop of Nisibis (1190), is the author of a grammatical treatise. The monk Simeon of Shanklawa about the same period wrote a chronological treatise and poem in enigmatic style. He is probably the author of the "Book of the Fathers", which has been ascribed to Simeon bar Sabbaê (fourth century). His disciple John bar Zoubi is chiefly known for his grammatical works.

The Jacobites had able writers. John, Bishop of Harran and Mardin, wrote on the capture of Edessa by Zangui (1144). James bar Salibi is the most prolific writer of the century. He took the name of Dionysius when he became Bishop of Marash in 1154; in 1166 Michael transferred him to Amida, where he died in 1171. His most important work is his commentary on the Old and New Testament, a vast compilation in which he cites or recapitulates the whole exegesis of the Western Syrians. Among his other writings were: a commentary on the "Centuries" of

Evagrius, a commentary on dialectics, letters, an abridgment of the histories of the Fathers, saints, and martyrs, a collection of canons, several theological treatises, two liturgies, an explanation of the Mass (ed. Labourt, Paris, 1903), a voluminous treatise against the heresies, a treatise on Providence, homilies, and occasional verses. His commentaries and most of his other works are extant. Michael the Syrian (Michael the Great), the son of a priest of Nelitene, was Abbot of Barasuma when he was elected patriarch (1166–99). He is the author of several liturgical works, but his chief work is his "Chronicle" (ed. Chabot, Paris, 1898–1911). It is the most voluminous historical compilation transmitted to us by the Syrians; that of Bar Hebræus is generally only a faithful abridgment of it. Many earlier documents are inserted or summarized in it; the author furnishes valuable information concerning the historians who preceded him, and for his own period furnishes interesting details concerning the occupation of Edessa by the Crusaders, and the wars of the Mussulman princes who occupied Asia Minor, especially Cappadocia. Michael's "Chronicle" begins with the Creation and stops with the death of Saladin (1196). Theodore bar Wahboun, a disciple of Michael, who rebelled against him and had himself named patriarch by the dissatisfied bishops, is the author of a liturgy.

The thirteenth century marks the end of Syriac literature. Among the Jacobites were: James (Severus) bar Shakako, Bishop of Mosul (d. 1241), whose "Dialogues" are a philosophical course, and his "Book of Treasures" a course in theology; Aharon (John) bar Madani, who was Bishop of Mardin, Maphrian (1232), later patriarch (1252–61), and the author of numerous poems; and Maphrian Gregory bar Hebræus, a man of encyclopedic learning, whose name worthily terminates this list (see Bar Hebræus). Mention must be made of the book of the "Knowledge of Truth" (ed. Kayser, Leipzig, 1889), the author of which plans to assemble in one religious community Christians, Jews, and Mussulmans; also of the chronicle, likewise anonymous, recently discovered by Mgr Rahmani. Among the Nestorians were Solomon, Bishop of Bassora (c. 1222) whose chief work is the "Book of the Bee", an historico-theological compilation in which he inserted numerous legends (ed. Budge, Oxford, 1886); George Warda and Khamis bar Kardahe, authors of numerous hymns in the Nestorian office. Gabriel Kamsa, author of a theological poem, and John of Mosul, who wrote edifying poems, belong to the second half of the century. The history of the Patriarch Yaballaha III (1281–1318) is a very curious document; his successor Timotheus II is the author of a book on the Sacraments. Addisho bar Brika is the last writer deserving of mention. He was Bishop of Nisibis and died in 1318. His most useful work is his "Catalogue of writers", a sort of literary history of the East Syrians (ed. Assemani, "Bibl. Orientalis", III); he concludes with a list of his own numerous and various works: commentaries on the Old and New Testaments, a work on the Life of Christ, one against heresies, one on the mysteries of the Greek philosophers, twelve treatises on the sciences. These works of his have been lost, but we possess his "Nomocanon", or methodical collection of canon law, and his theological treatise called "The Pearl" (both edited by Mai, Rome, 1838), his "Rule of Ecclesiastical Judgments", a kind of code of procedure, fifty metrical homilies which form the "Book of the Paradise of Eden", and twenty-two poems on love and wisdom. From the fourteenth century Syriac literature produced no works of value. The few authors who cultivated it showed neither talent nor originality; nevertheless useful indications concerning local history may be found in their occasional writings.

The great services rendered to scholarship by translations which form a large part of Syriac literature should not be lost sight of; they include both profane and Christian works. The former were chiefly Greek scientific and theological works, principally those of Aristotle and his school. It was through this intermediary that the Arabs became acquainted with scientific culture, and came into contact with Hellenic philosophy, so that the important part they played in the propagation of the sciences during the Middle Ages had its origin in Syriac literature. The "Romance of Alexander" and that of "Kalila and Dimna" were both translated from the Pahlowi about the sixth century. A portion of the works of the most celebrated of the Greek fathers of the fourth and fifth centuries were translated into Syriac; they possess only a secondary importance where we have the original texts, but are of the greatest value when they represent lost works, as is the case with regard to the "Apology of Aristides", the festal letters of St. Athanasius, the treatise of Titus of Bosra against the Manichæans, the Theophany of Eusebius, the commentaries of Cyril of Alexandria on St. Luke, the works of Severus of Antioch, the commentary of Theodore of Mopsuestia on St. John and his treatise on the Incarnation, the Apology of Nestorius, etc.

Syriac Versions of the Bible. See Versions of the Bible.

Syrian Rite, East, also known as the Chaldean, Assyrian, or Persian Rite.

History and Origin.—This rite is used by the Nestorians and also by the Uniat bodies in Syria, Mesopotamia, Persia, and Malabar, who have separated from them. The Syrian and Mesopotamian Uniats are now commonly called Chaldeans, or Syro-Chaldeans; the term Chaldean, which in Syriac generally meant magician or astrologer, denoted in Latin and other European languages Syrian nationality and the Syriac or Aramaic language (especially that form of the latter which is found in certain chapters of Daniel), until the Latin missionaries at Mosul in the seventeenth century adopted it to distinguish the Catholics of the East Syrian Rite from the West Syrian Uniats, whom they call "Syrians", and from the Nestorians. The last call themselves "Syrians" (Surayi), and even "Christians" only, though they do not all repudiate the name "Nestorayi", and distinguish themselves from the rest of Christendom as the "Church of the East" or "Easterns", as opposed to "Westerns", by which they denote Latin Catholics, Orthodox, Monophysites, and Protestants. In recent times they have been called, chiefly by Anglicans, the "Assyrian Church", a name which can be defended on archæological grounds. Brightman, in his "Liturgies Eastern and Western", includes Chaldean and Malabar Uniats and Nestorians under "Persian Rite", and Bishop Arthur Maclean of Moray and Ross (Anglican) who is probably the best living authority on the existing Nestorians, calls them "East Syrians", which is perhaps the most satisfactory term. The catalogue of liturgies in the British Museum has adopted the usual Catholic nomenclature, calling the rite of the East Syrian Uniats and Nestorians the "Chaldean Rite", that of the South Indian Uniats and schismatics the "Malabar Rite", and that of the West Syrian Monophysites and Uniats the "Syrian Rite".

a convenient arrangement in view of the fact that most printed liturgies of these rites are Uniat. The language of all three forms of the East Syrian Rite is Syriac, a modern form of which is still spoken by the Nestorians and some of the Uniats. The origin of the rite is unknown. The tradition—resting on the legend of Abgar and of his correspondence with Christ, which has been shown to be apocryphal (see Abgar, the Legend of)—is to the effect that St. Thomas the Apostle, on his way to India, established Christianity in Mesopotamia, Assyria, and Persia, and left Adæus (or Thaddeus), "one of the Seventy", and Maris in charge. To these the normal liturgy is attributed, but it is said to have been revised by the Patriarch Yeshuyab III in about 650. Some, however, consider this liturgy to be a development of the Antiochene.

After the Council of Ephesus (431), the Church of Seleucia-Ctesiphon, which had hitherto been governed by a catholicos under Antioch, refused to accept the condemnation of Nestorius, and cut itself and the Church to the East of it off from the Catholic Church. In 498 the catholicos assumed the title of "Patriarch of the East", and for many centuries this most successful missionary Church continued to spread throughout Persia, Tartary, Mongolia, China, and India, developing on lines of its own, very little influenced by the rest of Christendom. At the end of the fourteenth century the conquests of Tamerlane all but destroyed this flourishing Church at one blow, and reduced it to a few small communities in Persia, Turkey in Asia, Cyprus, South India, and the Island of Socotra. The Cypriote Nestorians united themselves to Rome in 1445; in the sixteenth century there was a schism in the patriarchate between the rival lines of Mar Shimun and Mar Elia; the Christianity of Socotra, such as it was, died out about the seventeenth century; the Malabarese Church divided into Uniats and Schismatics in 1599, the latter deserting Nestorianism for Monophysitism and adopting the West Syrian Rite about fifty years later; in 1681 the Chaldean Unia, which had been struggling into existence since 1552, was finally established, and in 1778 received a great accession of strength in the adhesion of the whole Mar Elia patriarchate, and all that was left of the original Nestorian Church consisted of the inhabitants of a district between the Lakes of Van and Urmi and the Tigris, and an outlying colony in Palestine. These have been further reduced by a great massacre by the Kurds in 1843, and by the secession of a large number to the Russian Church within the last few years. About twenty years ago there was an attempt to form an "Independent Catholic Chaldean Church", on the model of the "Old Catholics". This resulted in separating a few from the Uniats.

MSS. and Editions.—The authorities for this rite are chiefly in manuscript, the printed editions being very few. Few of the manuscripts, except some lectionaries in the British Museum, were written before the fifteenth century, and most, whether Chaldean or Nestorian, are of the seventeenth and eighteenth. The books in use are: (1) *Takhsa*, a priest's book, containing the Eucharistic service (*Qurbana* or *Qudasha*) in its three forms, with the administration of other sacraments, and various occasional prayers and blessings. It is nearly the *Euchologion* of the Greeks (see Constantinople, Rite of). (2) *Kthawa dhaqdham wadhwathar* or *Qdhamuwathar*, "Before and After", contains the Ordinary of the Divine Office, except the Psalter, arranged for two weeks. (3) *Dawidha* (David), the Psalter, divided into *hulali*, which answer more or less to the καθισματα of the Greeks. It includes the collects of the *hulali*. (4) *Qiryana*, *Shlika w'Iwangaliyuna*, lections, epistles, and gospels, sometimes together, sometimes in separate books. (5) *Turgama*, explanatory hymns sung before the Epistle and Gospel. (6) *Khudra*, containing the variables for Sundays, Lent and the Fast of the Ninevites, and other holy days. (7) *Kashkul*, a selection from the *Khudra* for weekdays. (8) *Geza*, containing variables for festivals except Sundays. (9) *Abukhalima*, a collectary, so called from its compiler, Elias III, Abu Khalim ibn al-Khaditha, Metropolitan of Nisibis, and patriarch (1175–99). (10) *Ba'utha d'Ninwayi*, rhythmical prayers attributed to St. Ephraem, used during the Fast of the Ninevites. (11) *Takhsa d'amadha*, the office of baptism. (12) *Burakha*, the marriage service. (13) *Kahnita*, the burial service for priests. (14) *Anidha*, the burial service for lay people. (15) *Takhsa d'siamidha*, the ordination services. (16) *Takhsa d'khusaya*, the "Office of Pardon", or the reconciliation of penitents. These last (11 to 16) are excerpts from the *Takhsa*.

Of the above the following have been printed in Syriac:

For the Nestorians.—The *Takhsa*, in two parts, by the Archbishop of Canterbury's Assyrian Mission (Urmi, 1890–92). The Society for Promoting Christian Knowledge has published an English translation of the first part of the *Takhsa*, both parts "unmodified except by the omission of the heretical names" (Brightman); *Dhaqdham wadhwathar*, by the same (Urmi, 1894); *Dawidha*, by the same (Urmi, 1891).

For the Chaldean Uniats: "Missale Chaldaicum", containing the Liturgy of the Apostles in Syriac and the Epistles and Gospels in Syriac with an Arabic translation, in Carshuni (Propaganda Press fol., Rome, 1767). A new and revised edition, containing the three liturgies and the lections, epistles, and gospels, was published by the Dominicans at Mosul in 1901. The Order of the Church Services of Common Days, etc., from *Kthawa dhaqdham wadhwathar* (8vo, Mosul, 1866). "Breviarium Chaldaicum in usum Nationis Chaldaicæ a Josepho Guriel secundo editum" (16mo, Propaganda Press, Rome, 1865). "Breviarium Chaldaicum", etc. [8vo, Paris (printed at Leipzig), 1886].

For the Malabar Uniats: "Ordo Chaldaicus Missæ Beatorum Apostolorum, juxta ritum Ecclesiæ Malabaricæ" (fol., Propaganda Press, Rome, 1774). "Ordo Chaldaicus Rituum et Lectionum", etc., (fol., Rome, 1775). "Ordo Chaldaicus ministerii Sacramentorum Sanctorum", etc. (fol., Rome, 1775). These three, which together form a *Takhsa* and Lectionary, are commonly found bound together. The Propaganda reprinted the third part in 1845. "Ordo Baptismi adultorum juxta ritum Ecclesiæ Malabaricæ Chaldæorum" (8vo, Propaganda Press, Rome, 1859), a Syriac translation of the Roman Order.

The Malabar Rite was revised in a Catholic direction by Aleixo de Menezes, Archbishop of Goa, and the revision was authorized by the Synod of Diamper in 1599. So effectively was the original Malabar Rite abolished by the Catholics in favour of this revision, and by the schismatics (when in 1649, being cut off from their own patriarch by the Spaniards and Portuguese, they put themselves under the Jacobite patriarch) in favour of the West Syrian Liturgy, that no copy is known to exist, but it is evident from the revised form that it could not have differed materially from the existing Nestorian Rite.

The Eucharistic Service, *Qurbana*, "the Offering", *udasha*, "the Hallowing".—There are three Anaphoræ; that of the Apostles (Sts. Adæus and Maris), that of Nestorius, and that of Theodore (of Mopsuestia) the Interpreter. The first is the normal form, and from it the Malabar revision was derived. The second is used by the Chaldeans and Nestorians on the Epiphany and the feasts of St. John the Baptist and of the Greek Doctors, both of which occur in Epiphany-tide on the Wednesday of the Fast of the Ninevites, and on Maundy Thursday

The third is used by the same (except when the second is ordered) from Advent Sunday to Palm Sunday. The same pro-anaphoral part serves for all three. Three other Anaphoræ are mentioned by Ebedyeshu (Metropolitan of Nisibis, 1298) in his catalogue, those of Barsuma, Narses, and Diodorus of Tarsus; but they are not known now, unless Dr. Wright is correct in calling the fragment in Brit. Mus. Add. 14669, "Diodore of Tarsus".

The Mass is preceded by a preparation, or "Office of the Prothesis", which includes the solemn kneading and baking of the loaves. These among the Nestorians are leavened, the flour being mixed with a little oil and the holy leaven (*malka*), which, according to the legend, "was given and handed down to us by our holy fathers Mar Addai and Mar Mari and Mar Tuma", and of which and of the holy oil a very strange story is told. The real leavening, however, is done by means of fermented dough (*khmira*) from the preparation of the last Mass. The Chaldean Uniats now use unleavened bread.

The Mass itself is introduced by the first verse of the *Gloria in Excelsis* and the Lord's Prayer. with "farcings" (*giyura*), consisting of a form of the *Sanctus*. Then follow:

(1) The Introit Psalm (variable), called *Marmitha*, with a preliminary prayer, varying for Sundays and greater feasts and for "Memorials" and ferias. In the Malabar Rite, Pss. xiv, cl, and cxvi are said in alternate verses by priests and deacons.

(2) The "Antiphon of the Sanctuary" (*Unitha d'qanki*), variable, with a similarly varying prayer.

(3) The Lakhumara, an antiphon beginning "To Thee, Lord", which occurs in other services also preceded by a similarly varying prayer.

(4) The Trisagion. Incense is used before this. In the Uniat Rite at low Mass the elements are put on the altar before the incensing.

(5) The Lections. These are four or five: (a) the Law and (b) the Prophecy, from the Old Testament, (c) the Lection from the Acts, (d) the Epistle, always from St. Paul, (e) the Gospel. Some days have all five lections, some four, some only three. All have an Epistle and a Gospel, but, generally, when there is a Lection from the Law there is none from the Acts, and vice versa. Sometimes there is none from either Law or Acts. The first three are called *Qiryani* (Lections), the third *Shlikha* (Apostle). Before the Epistle and Gospel, hymns called *Turgama* (interpretation) are, or should be, said; that before the Epistle is invariable, that of the Gospel varies with the day. They answer to the Greek *προκείμενα*. The *Turgama* of the Epistle is preceded by proper psalm verses called *Shuraya* (beginning), and that of the Gospel by other proper psalm verses called *Zumara* (song). The latter includes Alleluia between the verses.

(6) The Deacon's Litany, or *Ektene*, called *Karazutha* (proclamation). This resembles the "Great Synapte" of the Greeks. During it the proper "Antiphon [*Unitha*] of the Gospel" is sung by the people.

(7) The Offertory. The deacons proclaim the expulsion of the unbaptized, and set the "hearers" to watch the doors. The priest places the bread and wine on the altar, with words (in the Nestorian, but not in the Chaldean Uniat Rite) which seem as if they were already consecrated. He sets aside a "memorial of the Virgin Mary, Mother of Christ" (Chaldean; usual Malabar Rite, "Mother of God"; but according to Raulin's Latin of the Malabar Rite, "Mother of God Himself and of the Lord Jesus Christ"), and of the patron of the Church (in the Malabar Rite, "of St. Thomas"). Then follows the proper "Antiphon of the Mysteries" (*Unitha d'razi*), answering to the Offertory.

(8) The Creed. This is a variant of the Nicene Creed. It is possible that the order or words "and was incarnate by the Holy Ghost and was made man, and was conceived and born of the Virgin Mary", may enshrine a Nestorian idea, but the Chaldean Uniats do not seem to have noticed it, their only alteration being the addition of the *Filioque*. The Malabar Book has an exact translation of the Latin. In Neale's translation of the Malabar Rite the *Karazutha*, the Offertory, and the Expulsion of the Unbaptized come before the Lections, and the Creed follows immediately on the Gospel, but in the Propaganda edition of 1774 the Offertory follows the Creed, which follows the Gospel.

(9) The first Lavabo, followed by a *Kushapa* ("beseeching", i. e., prayer said kneeling) and a form of the "Orate fratres", with its response. It is now that the variations of the three Anaphora begin.

(10) The Kiss of Peace, preceded by a *G'hantha*, i. e., a prayer said with bowed head.

(11) The prayer of Memorial (*Dukhrana*) of the Living and the Dead, and the Diptychs; the latter is now obsolete among the Nestorians.

(12) The Anaphora. As in all liturgies this begins with a form of the Sursum corda, but the East Syrian form is more elaborate than any other, especially in the Anaphora of Theodore. Then follows the Preface of the usual type ending with the Sanctus.

(13) The Post-Sanctus (to use the Hispano-Gallican term). This is an amplification (similar in idea and often in phraseology to those in all liturgies except the Roman) of the idea of the Sanctus into a recital of the work of Redemption, extending to some length and ending, in the Anaphoræ of Nestorius and Theodore, with the recital of the Institution. In the Anaphora of the Apostles the recital of the Institution is wanting, though it has been supplied in the Chaldean and Malabar Uniat liturgies and in the Anglican edition of the Nestorian book. Hammond (Liturgies Eastern and Western, p. lix) and most other writers hold that the Words of Institution belong to this Liturgy and should be supplied somewhere; Hammond (loc. cit.) suggests many arguments for their former presence. The reason of their absence is uncertain. While some hold that this essential passage dropped out in times of ignorance, others say it never was there at all, being unnecessary, since the consecration was held to be effected by the subsequent Epiklesis alone. Another theory, evidently of Western origin and not quite consistent with the general Eastern theory of consecration by an Epiklesis following Christ's words, is that, being the formula of consecration, it was held too sacred to be written down. It does not seem to be quite certain whether Nestorian priests did or did not insert the Words of Institution in old times, but it seems that many of them do not do so now.

(14) The Prayer of the Great Oblation with a second memorial of the Living and the Dead, a *Kushapa*.

(15) The *G'hantha* of the Epiklesis, or Invocation of the Holy Spirit. The Epiklesis formula itself is called *Nithi Mar* (May He come, O Lord) from its opening words. The Liturgy of the Apostles is so vague as to the purpose of the Invocation that, when the Words of Institution are not said, it would be difficult to imagine this formula to be sufficient on any hypothesis, Eastern or Western. The Anaphoræ of Nestorius and Theodore, besides having the Words of Institution, have definite Invocations, evidently copied from Antiochene or Byzantine forms. The older Chaldean and the Malabar Uniat books have inserted the Words of Institution with an Elevation, *after* the Epiklesis. But the 1901 Mosul edition puts the Words of Institution first.

(16) Here follow a Prayer for Peace, a second Lavabo and a censing.

(17) The Fraction, Consignation, Conjunction, and Commixture. The Host is broken in two, and the sign of the Cross is made in the Chalice with one

half, after which the other half is signed with the half that has been dipped in the Chalice. The two halves are then reunited on the Paten. Then a cleft is made in the Host "qua parte intincta est in Sanguine" (Renaudot's tr.), and a particle is put in the chalice, after some intricate arranging on the paten.

(18) The Communion. The veil is thrown open, the deacon exhorts the communicants to draw near, the priest breaks up the Host for distribution. Then follows the Lord's Prayer, with Introduction and Embolism, and the *Sancta Sanctis*, and then the "Antiphon of the Bema" (Communion) is sung. The Communion is in both species separately, the priest giving the Host and the deacon the Chalice. Then follows a variable antiphon of thanksgiving, a post-communion, and a dismissal. Afterwards the *Mkaprana*, an unconsecrated portion of the holy loaf, is distributed to the communicants, but not, as in the case of the Greek ἀντίδωρον, and as the name of the latter implies, to non-communicants. The Chaldean Uniats are communicated with the Host dipped in the Chalice. They reserve what is left of the Holy Gifts, while the Nestorian priests consume all before leaving the church.

Properly, and according to their own canons, the Nestorians ought to say Mass on every Sunday and Friday, on every festival, and daily during the first, middle, and last week of Lent and the octave of Easter. In practice it is only said on Sundays and greater festivals, at the best, and in many churches not so often, a sort of "dry Mass" being used instead. The Chaldean Uniat priests say Mass daily, and where there are many priests there will be many Masses in the same Church in one day, which is contrary to the Nestorian canons. The Anglican editions of the liturgies omit the names of heretics and call the Anaphoræ of Nestorius and Theodore the "Second Hallowing" and "Third Hallowing". Otherwise there are no alterations except the addition of Words of Institution to the first Anaphoræ. The recent Uniat edition has made the same alterations and substituted "Mother of God" for "Mother of Christ". In each edition the added Words of Institution follow the form of the rite of the edition. The prayers of the Mass, like those of the Orthodox Eastern Church, are generally long and diffuse. Frequently they end with a sort of doxology called *Qanuna*, which is said aloud, the rest being recited in a low tone. The *Qanuna* in form and usage resembles the Greek ἐκφώνησις.

The vestments used by the priest at Mass are the *Sudhra*, a girded alb with three crosses in red or black on the shoulder, the *Urara* (ὠράριον) or stole worn crossed by priests, but not by bishops (as in the West), and the *Ma'apra*, a sort of linen cope. The deacon wears the *Sudhra*, with an *Urara* over the left shoulder.

THE DIVINE OFFICE.—The nucleus of this is, as is usual, the recitation of the Psalter. There are only three regular hours of service (Evening, Midnight, and Morning) with a rarely used Compline. In practice only Morning and Evening are commonly used, but these are extremely well attended daily by laity as well as clergy. When Nestorian monasteries existed (which is no longer the case) seven hours of prayer were the custom in them, and three *hulali* of the Psalter were recited at each. This would mean a daily recitation of the whole Psalter. The present arrangement provides for seven *hulali* at each ferial night service, ten on Sundays, three on "Memorials", and the whole Psalter on feasts of Our Lord. At the evening service there is a selection of from four to seven psalms, varying with the day of the week, and also a *Shuraya*, or short psalm, with generally a portion of Ps. cxviii, varying with the day of the fortnight. At the morning service the invariable psalms are cix, xc, ciii (1–6), cxii, xcii, cxlviii, cl, cxvi. On ferias and "Memorials" Ps. cxlvi is said after Ps. cxlviii, and on ferias Ps. l, 1–18, comes at the end of the psalms. The rest of the services consist of prayers, antiphons, litanies, and verses (*giyura*) inserted, like the Greek στιχηρά, but more extensively, between verses of psalms. On Sundays the *Gloria in Excelsis* and *Benedicite* are said instead of Ps. cxlvi. Both morning and evening services end with several prayers, a blessing, (*Khuthama*, "Sealing"), the kiss of peace, and the Creed. The variables, besides the psalms, are those of the feast or day, which are very few, and those of the day of the fortnight. These fortnights consist of weeks called "Before" (*Qdham*) and "After" (*Wathar*), according to which of the two choirs begins the service. Hence the book of the Divine Office is called *Qdham u wathar*, or at full length *Kthawa daqdham wadhwathar*, the "Book of Before and After".

THE CALENDAR.—The Calendar is very peculiar. The year is divided into periods of about seven weeks each, called *Shawu'i;* these are Advent (called *Subara*, "Annunciation"), Epiphany, Lent, Easter, the Apostles, Summer, "Elias and the Cross", "Moses", and the "Dedication" (*Qudash idta*). "Moses" and the "Dedication" have only four weeks each. The Sundays are generally named after the *Shawu'a* in which they occur, "Fourth Sunday of Epiphany", "Second Sunday of the Annunciation," etc., though sometimes the name changes in the middle of a *Shawu'a*. Most of the "Memorials" (*dukhrani*), or saints' days, which have special lections, occur on the Fridays between Christmas and Lent, and are therefore movable feasts, but some, such as Christmas, Epiphany, the Assumption, and about thirty smaller days without proper lections are on fixed days. There are four shorter fasting periods besides the Great Fast (Lent); these are: (1) the Fast of Mar Zaya, the three days after the second Sunday of the Nativity; (2) the Fast of the Virgins, after the first Sunday of the Epiphany; (3) the Rogation of the Ninevites, seventy days before Easter; (4) the Fast of Mart Mariam (Our Lady), from the first to the fourteenth of August. The Fast of the Ninevites commemorates the repentance of Nineveh at the preaching of Jonas, and is carefully kept. Those of Mar Zaya and the Virgins are nearly obsolete. As compared with the Latin and Greek Calendars, that of the Chaldeans, whether Uniat or Nestorian, is very meagre. The Malabar Rite has largely adopted the Roman Calendar, and several Roman days have been added to that of the Chaldean Uniats. The Chaldean Easter coincides with that of the Orthodox Eastern Church, as the Julian Calendar is used, but the years are numbered, not from the birth of Christ, but from the Seleucid era, 311 B. C.

THE OTHER SACRAMENTS AND OCCASIONAL SERVICES.—The other Sacraments in use among the Nestorians are Baptism, with which is always associated an anointing, which as in other eastern rites answers to Confirmation, Holy Order and Matrimony, but not Penance or Unction of the Sick. The latter appears to be unknown to the Nestorians, though Assemani ("Bibliotheca Orientalis", pt. II, p. cclxxii) considers it might be shown from their books that its omission was a modern error. The Chaldean Uniats now have a form not unlike the Byzantine and West Syrian. The nearest approach to Penance among the Nestorians is a form, counted as a sacrament, for the reconcilation of apostates and excommunicated persons, prayers from which are occasionally used in cases of other penitents. Assemani's arguments (ibid., cclxxxvi–viii) for a belief in Penance as a Sacrament among the ancient Nestorians or for the practice of auricular confession among the Malabar Nestorians are not conclusive. The Chaldeans have a similar form to that of the Latin Rite. The Nestorians omit Matrimony from the list, and according to Ebedyeshu make up the number of the mysteries to seven by including the Holy Leaven and the Sign of the Cross, but they are now rather vague about the definition or numeration. The only other rite of any interest is the consecration of churches. Oil, but not chrism, plays a considerable part in these rites, being used in Baptism, possibly in Confirmation, in the reconciliation of apostates, etc., in the consecration of churches, and the making of bread for the Eucharist. It is not used in ordination or for the sick. There are two sorts of oil; the one is ordinary olive oil, blessed or not blessed for the occasion, the other is the oil of the Holy Horn. The last, which, though really only plain oil, represents the chrism (or *μύρον*) of other rites, is believed to have been handed down from the Apostles with the Holy Leaven. The legend is that the Baptist caught the water which fell from the Body of Christ at His baptism and preserved it. He gave it to St. John the Evangelist, who added to it some of the water which fell from the pierced Side. At the Last Supper Jesus gave two loaves to St. John, bidding him keep one for the Holy Leaven. With this St. John mingled some of the Blood from the Side of Christ. After Pentecost the Apostles mixed oil with the sacred water, and each took a horn of it, and the loaf they ground to pieces and mixed it with flour and salt to be the Holy Leaven. The Holy Horn is constantly renewed by the addition of oil blessed by a bishop on Maundy Thursday.

The baptismal service is modelled on the Eucharistic. The Mass of the Catechumens is almost identical, with of course appropriate Collects, psalms, Litanies, and Lections. After the introductory *Gloria*, Lord's Prayer, *Marmitha* (in this case Ps. lxxxiii) and its Collect, follow the imposition of hands and the signing with oil, after which follow an Antiphon of the Sanctuary and Ps. xliv, cix, cxxxi, with *giyuri*, Litanies, and Collects, then the *Lakhumara*, Trisagion, and Lections (Epistle and Gospel), and the *Karazutha*, after which the priest says the prayer of the imposition of hands, and the unbaptized are dismissed. An antiphon answering to that "of the mysteries" follows, and then the Creed is said. The bringing forward of the Holy Horn and the blessing of the oil take the place of the Offertory. The Anaphora is paralleled by Sursum corda, Preface, and Sanctus, a *Nithi Mar*, or Epiklesis, upon the oil, a commixture of the new oil with that of the Holy Horn, and the Lord's Prayer. Then the font is blessed and signed with the holy oil, and in the place of the Communion comes the Baptism itself. The children are signed with the oil on the breast and then anointed all over, and are dipped thrice in the font. The formula is: "N., be thou baptized in the name of the Father, in the name of the Son, in the name of the Holy Ghost. Amen." Then follows the post-baptismal thanksgiving. Confirmation follows immediately. There are two prayers of confirmation and a signing between the eyes with the formula: "N. is baptized and perfected in the name, etc." It is not quite clear whether oil should be used with this signing or not. Then any oil that remains over is poured into the Holy Horn, held over the font, and the water in the font is loosed from its former consecration with rather curious ceremonies. The Chaldean Uniats have added the renunciations, profession of faith, and answers of the sponsors from the Roman Ritual, and anoint with chrism.

The marriage service (*Burakha*, "Blessing") has nothing very distinctive about it, and resembles closely the Byzantine, and to some extent the Jewish rite.

The orders of the Nestorians are those of reader (*Qaruya*), subdeacon (*Hiupathiaqna*), deacon (*Shamasha*), priest (*Qashisha*), archdeadon (*Arkidhyaquna*) and bishop (*Apisqupa*). The degree of archdeacon, though it has an ordination service of its own, is only counted as a degree of the presbyterate, and is by some held to be the same as that of *chorepiscopus* (*Kurapisqupa*), which never involved episcopal ordination among the Nestorians. When a priest is engaged in sacerdotal functions, he is called *Kahna* (i. e., *ἱερεύς*; *sacerdos*, cf. Hebrew כהן) and a bishop is similarly *Rab Kahni* (Chief of the Priests, *ἀρχιερεύς*, *pontifex*). *Quashisha* and *Apisqupa* only denote the degree. *Kahnutha*, priesthood, is used of the three degrees of deacon, priest, and bishop. The ordination formula is: "N. has been set apart, consecrated, and perfected to the work of the diaconate [or of the presbyterate] and to the Levitical and Stephanite Office [or for the Office of the Aaronic priesthood], in the Name, etc. In the case of a bishop it is: "to the great work of the episcopate of the city of——". A similar formula is used for archdeacons and metropolitans.

The Consecration of churches (*Siamidha* or *Qudash Madhbkha*) consists largely of unctions. The altar is anointed all over, and there are four consecration crosses on the four interior walls of the sanctuary, and these and the lintel of the door and various other places are anointed. The oil is not that of the Holy Horn, but fresh olive oil consecrated by the bishop.

HENRY JENNER.

Syrian Rite, WEST.—The rite used by the Jacobite sect in Syria and by the Catholic Syrians is in its origin simply the old rite of Antioch in the Syriac language. Into this framework the Jacobites have fitted a great number of other Anaphoras, so that now their Liturgy has more variant forms than any other. The oldest form of the Antiochene Rite that we know is in Greek (see ANTIOCHENE LITURGY). It was apparently composed in that language. The many Greek terms that remain in the Syriac form show that this is derived from Greek. The version must have been made very early, evidently before the Monophysite schism, before the influence of Constantinople and Byzantine infiltrations had begun. No doubt as soon as Christian communities arose in the country parts of Syria the prayers which in the cities (Antioch, Jerusalem, etc.) were said in Greek, were, as a matter of course, translated into the peasants' language (Syriac) for their use. The "Peregrinatio Silviæ" describes the services at Jerusalem as being Greek; but the lessons, first read in Greek, are then translated into Syriac *propter populum* (ed. Geyer, p. 99). As long as all Western Syria was one communion, the country dioceses followed the rite of their patriarch at Antioch, only changing the language. Modifications adopted at Antioch in

Greek were copied in Syriac by those who said their prayers in the national tongue. This point is important because the Syriac Liturgy (in its fundamental form) already contains all the changes brought to Antioch from Jerusalem. It is not the older pure Antiochene Rite, but the later Rite of Jerusalem-Antioch. The Syriac Liturgy in its Intercession, like the Greek "St. James", prays first not for the Church of Antioch, but "for the holy Sion, the mother of all churches" (Brightman, pp. 89–90). The fact that the Jacobites as well as the Orthodox have the Jerusalem-Antiochene Liturgy is the chief proof that this had supplanted the older Antiochene Use before the schism of the fifth century.

Our first Syriac documents come from about the end of the fifth century ("Testamentum Domini," ed. by Ignatius Rahmani II, Life of Severus of Antioch, sixth century). They give us valuable information about local forms of the Rite of Antioch-Jerusalem. The Jacobite sect kept a version of this rite which is obviously a local variant. Its scheme and most of its prayers correspond to those of the Greek St. James; but it has amplifications and omissions, such as we find in all local forms of early rites. It seems too that the Jacobites after the schism made some modifications. We know this for certain in one point (the Trisagion). The first Jacobite writer on their rite is James of Edessa (d. 708), who wrote a letter to a priest Thomas comparing the Syrian Liturgy with that of Egypt. This letter is an exceedingly valuable and really critical discussion of the rite. A number of later Jacobite writers followed James of Edessa. On the whole this sect produced the first scientific students of liturgy. Benjamin of Edessa (period unknown), Lazarus bar Sabhetha of Bagdad (ninth century), Moses bar Kephas of Mosul (d. 903), Dionysius bar Salibhi of Amida (d. 1171) wrote valuable commentaries on the Jacobite Rite. In the eighth and ninth centuries a controversy concerning the prayer at the Fraction produced much liturgical literature. The chronicle of their Patriarch Michael the Great (d. 1199) discusses the question and supplies valuable contemporary documents.

The oldest Jacobite Liturgy extant is the one ascribed (as in its Greek form) to St. James. It is in the dialect of Edessa. The pro-anaphoral part of this is the *Ordo communis* to which the other later Anaphoras are joined. It is printed in Latin by Renaudot (II, 1–44) and in English by Brightman (pp. 69–110). This follows the Greek St. James (see ANTIOCHENE LITURGY) with these differences. All the vesting prayer and preparation of the offering (*Proskomide*) are considerably expanded, and the prayers differ. This part of the Liturgy is always most subject to modification; it began as private prayer only. The *Monogenes* comes later; the litany before the lessons is missing; the incensing is expanded into a more elaborate rite. The *Trisagion* comes after the lessons from the Old Testament; it contains the addition: "who wast crucified for us". This is the most famous characteristic of the Jacobite Rite. The clause was added by Peter the Dyer (Fullo), Monophysite Patriarch of Antioch (d. 488), was believed to imply Monophysism and caused much controversy during those times, eventually becoming a kind of watchword to the Jacobites (see Zacharias Rhetor, "Hist. eccl.", P. G., LXXXV, 1165). The litany between the lessons is represented by the word *Kurillison* said thrice. There is no chant at the Great Entrance (a Byzantine addition in the Greek Rite). The long Offertory prayers of the Greek Rite do not occur. The Epiklesis and Intercession are much the same as in Greek. The Lord's Prayer follows the Fraction. At the Communion-litany the answer is *Halleluiah* instead of *Kyrie eleison*.

In this Syriac Liturgy many Greek forms remain: *Stomen kalos*, *Kurillison*, *Sophia*, *Proschomen*, etc. Renaudot gives also a second form of the *Ordo communis* (II, 12–28) with many variants. To the *Ordo communis* the Jacobites have added a very great number of alternative Anaphoras, many of which have not yet been published. These Anaphoras are ascribed to all manner of people; they were composed at very different periods. One explanation of their attribution to various saints is that they were originally used on their feasts. Renaudot translated and published thirty-nine of these. After that of St. James follows (in his work) a shortened form of the same. This is the one commonly used to-day. Then: (3) Liturgy of St. Xystus, which is placed first in the Maronite books; (4) of St. Peter; (5) another of St. Peter; (6) of St. John; (7) of the Twelve Apostles; (8) of St. Mark; (9) of St. Clement of Rome; (10) of St. Dionysius; (11) of St. Ignatius; (12) of St. Julius of Rome; (13) of St. Eustathius; (14) of St. John Chrysostom; (15) of St. John Chrysostom (from Chaldæan sources); (16) of St. Maruta; (17) of St. Cyril; (18) of Dioscor; (19) of Philoxenus of Hierapolis; (20) a second Liturgy also ascribed to him; (21) of Serverus of Antioch; (22) of James Baradæus; (23) of Matthew the Shepherd; (24) of St. James of Botnan and Serug; (25) of James of Edessa, the Interpreter; (26) of Thomas of Heraclea; (27) of Moses bar Kephas; (28) of Philoxenus of Bagdad; (29) of the Doctors, arranged by John the Great, Patriarch; (30) of John of Basora; (31) of Michael of Antioch; (32) of Dionysius Bar-Salibhi; (33) of Gregory Bar-Hebræus; (34) of St. John the Patriarch, called Acœmetus (*Ακοίμητος*); (35) of St. Dioscor of Kardu; (36) John, Patriarch of Antioch; (37) of Ignatius of Antioch (Joseph Ibn Wahib); (39) of St. Basil (another version, by Masius).

Brightman (pp. lviii-lix) mentions sixty-four Liturgies as known, at least by name. Notes of this bewildering number of Anaphoras will be found after each in Renaudot. In most cases all he can say is that he knows nothing of the real author; often the names affixed are otherwise unknown. Many Anaphoras are obviously quite late, inflated with long prayers and rhetorical expressions, many contain Monophysite ideas, some are insufficient at the consecration so as to be invalid. Baumstark (Die Messe im Morgenland, 44–46) thinks the Anaphora of St. Ignatius most important, as containing parts of the old pure Antiochene Rite. He considers that many attributions to later Jacobite authors may be correct, that the Liturgy of Ignatius of Antioch (Joseph Ibn Wahib; d. 1304) is the latest. Most of these Anaphoras have now fallen into disuse. The Jacobite celebrant generally uses the shortened form of St. James. There is an ancient Armenian version (shortened) of the Syriac St. James. The Liturgy is said in Syriac with (since the fifteenth century) many Arabic substitutions in the lessons and proanaphoral prayers. The Lectionary and Diaconicum have not been published and are hardly known. The vestments correspond almost exactly to those of the Orthodox, except that the bishop wears a latinized mitre. The Calendar has few feasts. It follows in its main lines the old order of Antioch, observed also by the Nestorians, which is the basis of the Byzantine Calendar. Feasts are divided into three classes of dignity. Wednesday and Friday are fast-days. There are also the four great fasts, as with the Orthodox. The Divine Office consists of Vespers, Compline, Nocturns, Lauds, Terce, Sext, and None, or rather of hours that correspond to these among Latins. Vespers always belongs to the following day. The great part of this office (known in the West chiefly by the Uniat books and now by Dr. Baumstark's "Festbrevier u. Kirchenjahr der syrischen Jakobiten") consists of long poems composed for the purpose, like the Byzantine odes. Baptism is performed by immersion; the priest confirms at once with chrism blessed by the patriarch. Confession is not much used; it has fallen into the same decay as in most Eastern Churches. Communion is administered under both kinds; the sick are anointed with oil blessed by a priest—the ideal is to have seven priests to administer it. The orders are bishop, priest, deacon, subdeacon, lector, and singer. There are many chorepiscopi, not ordained bishop. It will be seen, then, that one little Jabobite Church has followed much the same line of development in its rites as its powerful Orthodox neighbour.

The Syrian Uniats use the same rite as the Jacobites. But (as is the case with most Uniat Churches) it is better organized with them. There is not much that can be called Romanizing in their books; but they have the advantage of well-arranged, well-edited, and well-printed books. All the great students of the West-Syrian Rite (the Assemani, Renaudot, etc.) have been Catholics. Their knowledge and the higher Western standard of scholarship in general are advantages of which the Uniats rather than the Jacobites profit. Of the manifold Syrian Anaphoras the Uniats use seven only—those of St. James, St. John, St. Peter, St. Chrysostom, St. Xystus, St. Matthew, and St. Basil. That of St. Xystus is attached to the *Ordo communis* in their official book; that of St. John is said on the chief feasts. The lessons only are in Arabic. It was inevitable that the Syrian Liturgies, coming from Monophysite sources, should be examined at Rome before they were allowed to Uniats. But the revisers made very few changes. Out of the mass of Anaphoras they chose the oldest and purest, leaving out the long series of later ones that were unorthodox, or even invalid. In the seven kept for Uniat use what alterations have been made are chiefly the omission of redundant prayers, simplification of confused parts in which the Diaconicum and the Euchologion had become mixed together. The only important correction is the omission of the fatal clause: "Who was crucified for us" in the Trisagion. There is no suspicion of modifying in the direction of the Roman Rite. The other books of the Uniats, the Diaconicum, office-book, and ritual are edited at Rome, Beirut, and the Uniat Patriarchal press at Sharfé; they are considerably the most accessible, the best-arranged books in which to study this rite.

The West-Syrian Rite has also been used at intervals by sections of the (schismatical) Malabar Church. Namely, as the Malabar Christians at various times made approaches to the Jacobite Patriarch or received bishops from him, so did they at such times use his Liturgy. Most of Malabar has now returned to the Nestorian communion; but there are still Jacobite communities using this rite among them.

The Maronite Rite is merely a Romanized adaptation of that of the West Syrians.

I. Texts.—A. Jacobite editions: BODERIANUS, *D. Severus alexandrinus de ritibus baptismi et sacræ synaxis* (Antwerp, 1572), Syriac and Latin; RENAUDOT, *Liturgiarum orientalium collectio*, II (2nd ed., Frankfort, 1847), II, 1–560, Latin; BRIGHTMAN, *Eastern Liturgies* (Oxford, 1896), 69–110, using BODERIANUS for the *Ordo communis*, with the Anaphora of St. James.

B. Uniat editions: *Missale Syriacum iuxta ritum ecclesiæ antiochenæ syrorum* (Rome, 1843), Syriac; *Diakonikon* in Syriac only (Beirut, 1888); PRINCE MAX OF SAXONY, *Missa Syro-Antiochena* (Ratisbon, 1908), with the Anaphora of St. John, Latin only.

C. Malabar editions: HOUGH, *Christianity in India*, II (London, 1845), 623–45; HOWARD, *The Christians of St. Thomas* (Oxford, 1864), 199–219.

II. Commentaries:—*Vie de Sévère par Zacharie le Scholastique* in *Patrologia Orientalis*, II (Paris, 1903), 1; LABOURT, *Dionysios Bar Salibi, Expositio liturgiæ* in *Corp. Script. Orient.: Script. Syri*, II (Paris, 1903), 93; ASSEMANI, *Bibliotheca orientalis*, II (Rome, 1719–28), §10; RENAUDOT, *op. cit.*; BAUMSTARK, *Die Messe im Morgenland* in KÖSEL, *Collection* (Kempten and Munich, 1906); *Festbrevier u. Kirchenjahr der syrischen Jakobiten* (Paderborn, 1910).

Szántó (ARATOR), STEPHAN, b. in the Diocese of Raab, Hungary, 1541; d. at Olmütz, 1612. On finishing his studies in Vienna, he attached himself to the Diocese of Raab, and in 1560 was sent by his bishop to the German College at Rome. Here he joined the Jesuit Order, and after his novitiate was ordained priest. In 1566 he returned to Vienna, and thence went as professor to Nagy-Szombát. The succeeding years were spent at the universities of Vienna and Graz, where he lectured on philosophy. From 1568 Szántó strove to found a Catholic mission for Transylvania, where Protestantism was making great headway; this project he continued in Rome, whither he was summoned in 1579 as Hungarian penitentiary. This last position he held until 1579. His endeavours to found a Hungarian college in Rome after the model of the German College met with but temporary success. The monastery of the Hermits of St. Paul near St. Stephen's on the Cœlian was to serve for this purpose; the deed of foundation was approved by Gregory XIII and the college was opened on 28 May, 1579. The pope, however, soon united the college with the German College. At the end of 1579 Szántó left Rome, and proceeded to Transylvania, where he displayed great activity in the work of Catholic missions at Klausenburg (Kolozsvár) and later at Várad. At this time occurred his literary polemics with the Reform preacher, Peter Beregszászi, against whom he wrote his "Epistola apologetica". In 1585 Szántó proceeded to Gyula-Fehérvár and thence, on the expulsion of the Jesuit Order from Transylvania, to Séllye. In 1600 he went to Znióváralja, and in 1605, on the destruction of this place by the troops of Bocskay, to Olmütz, where he remained until his death. During the siege of Znióváralja his books and manuscripts, including the Hungarian catechism which he composed in Rome, were lost; until his death he was working on a translation of the New Testament, which was later used by Georg Káldy. Szántó must also be credited, as has been recently proved, with the Hungarian portion of the great dictionary of Calepino.

Szatmár, DIOCESE OF (SZATMARIENSIS), in Hungary, suffragan of Eger, from which it was formed, by King Francis I, at the same time as the See of Kassa. The diocese includes the counties (*Komitate*) of Szatmár, Bereg, Mármaros, Ugocsa, Ungvar, and a small part of the district of Szabolcs. The first bishop was Stephen Fischer (1804–7), later Archbishop of Eger. Of his successors may be mentioned: Peter Klobusiczky (1807–21), who rendered great service in the organization of the diocese; John Hám (1827–57), who gave great attention to education. Under them the cathedral was enlarged and renewed, and several other churches were built. Many of the charitable institutions of the diocese owe their foundation to Hám, whose beatification is under consideration. Tiburtius Boromisza (1906) is the present bishop. His residence is at Szatmár-Németi. The diocese is divided into 5 archdeaneries, and consists of 95 parishes. The clergy number 177. There are: 1 titular abbey, 2 titular provostships, and 15 monasteries with 703 members. The chapter consists of 6 members and 6 titular canons. Roman Catholics number 149,807; and Greek Catholics, 625,627.

Sze-ch'wan, EASTERN, VICARIATE APOSTOLIC OF.—The mission of Eastern Sze-ch'wan was separated from North-western Sze-ch'wan and erected in a vicariate Apostolic in 1856. Its first name was South-eastern Sze-ch'wan. There were nine European and ten native priests. The Right Rev. Mgr Desflèches (1844–87), titular Bishop of Sinita, was elected first vicar Apostolic. Missionaries and Christians had at first to undergo many persecutions. At last after the Franco-Chinese war, in 1860, they obtained entire freedom to preach the Christian doctrine. In 1860 the mission was divided in two vicariates Apostolic: Eastern and Southern Sze-ch'wan. The missionaries got from Chinese officials a piece of ground in the city of Ch'ung-k'ing, as compensation for the losses undergone by the mission. New persecutions broke out. At Yu-yang Father Eyraud was put in jail, Fathers Mabileau and Rigaud were murdered. At Kien-Kiang Fathers Hue and Tay were killed in 1873. On 8 March, 1876, the settlements of the Christians were pillaged at Kiang-pe. Father Coupat was elected coadjutor in 1882, and in 1883 succeeded Bishop Desflèches, appointed Archbishop of Mandianopolis. In 1886 the buildings of the mission at Ch'ung-k'ing were pillaged and destroyed. The bishop and missionaries had to retire into the Chinese tribunal. In 1891 the Right Rev. Mgr Chouvellon, titular Bishop of Dansara, succeeded Bishop Coupat. In 1898 Father Fleury was captured by Yu-man-tse and kept as prisoner for several months. The mission is confided to the Society of the Foreign Missions of Paris. The present vicar Apostolic is the Right Rev. Celestin-Felix-Joseph Chouvellon, consecrated titular Bishop of Dansara in 1891. He resides at Ch'ung-k'ing. In 1889 the mission numbered: 1 bishop, 32 missionaries, 33 native priests, 2 seminaries with 74 students, 151 schools with 1963 pupils, 105 churches or chapels, 31,539 Catholics. In 1910, there were: 1 bishop, 51 missionaries, 46 native priests, 3 seminaries with 130 students, 341 schools with 5365 pupils, 175 churches or chapels, 3 orphanages with 327 orphans, 40,587 Catholics.

LAUNAY, *Atlas de la société des missions-étrangères* (1890).

V. H. MONTANAR.

Sze-ch'wan, NORTH-WESTERN, VICARIATE APOSTOLIC OF.—The mission of North-western Sze-ch'wan includes the territories known as Ch'wan-si and Ch'-wan-pe, the cities of Kiong-chu, Ta-y-hien, the Principality of Mu-pin, and a part of the civil prefecture of Tsechu. There are 25,000,000 inhabitants, 23,500,000 are Chinese and 1,500,000 are Barbarian Man-tse. On 17 August, 1658, the Holy See entrusted the mission of Sze-ch'wan to Bishop Pallu, of the Society of the Foreign Missions of Paris, Vicar Apostolic of Tong-king. But neither Bishop Pallu nor his successor, Bishop de Lyonne (1699–1713) who was the first Vicar Apostolic of Sze-ch'wan, could get into the province. In 1707 Fathers de la Balluère and Basset, of the Society of the Foreign Missions of Paris, and Fathers Mullener and Appiani, priests of the Congregation of St. Vincent de Paul, got into Sze-ch'wan where they found some Christians who had emigrated from other provinces. Father de la Balluère, elected vicar Apostolic in 1713, died in 1715 before being consecrated bishop. Father Mullener was consecrated titular Bishop of Myriopolis in 1717. Bishop Enjobert de Martillat succeeded him. He established the Institute of the Christian Virgins. The following four missionaries were elected as vicars Apostolic, but were not consecrated bishops: Fathers Lacerre, Maigrot (1752), de Raymond (1756), Kerhervé (1756). It is only from the year 1765 and the consecration of Bishop Pottier (1769–92) that really dates the existence of this mission. It numbered then about 4000 Christians, including those of Yun-nan and Kwei-chou. Fathers Delpont and Devaux died in the jails of Pekin; Bishop de Saint-Martin (1784–1801), coadjutor and successor to Bishop Pottier, was banished with Father Dufresse. 40,000 pagans were christened. Bishop Dufresse (1801–15) succeeded Bishop de Saint-Martin, with Bishop Frenchant as coadjutor (1802–06). The Synod of Sze-ch'wan took place and completed the organization of the mission. On 14 September, 1815, Blessed Gabriel Taurin-Dufresse, titular Bishop of Tabraca, was sentenced to death and executed. He was beatified in 1900. At the death of the bishop, Sze-ch'wan had only two missionaries, and the Christians were everywhere persecuted. This awful persecution came to an end only in 1840, two years after the death of Bishop Fontana (1820–38), whom Bishop Perocheau (1838–61) succeeded. In 1840 Yun-nan was separated from Sze-ch'wan; Kwei-chou was separated in 1846, South-eastern Sze-ch'wan in 1856, and Southern Sze-ch'wan in 1861. Bishop Pinchon, coadjutor in 1858, succeeded Bishop Perocheau in 1861. In 1864 the seminary of Mu-pin was burned and many Christians killed. On 28 May, 1895, the buildings of the Protestants at Chen-tu were destroyed and the following day the Catholic settlements had a similar fate. The mission of North-western Sze-ch'wan is entrusted to the Society of the Foreign Missions of Paris. The present vicar Apostolic is the Right Rev. Marie-Julien Dunand, consecrated in 1893 titular Bishop of Caloe. He resides at Chen-tu. In 1890 the mission numbered: 1 bishop, 27 missionaries, 39 native priests, 2 seminaries with 87 students, 413 schools with 3023 pupils, 43 churches or chapels, 38,800 Catholics. In 1910 there were: 1 bishop, 39 missionaries, 49 native priests, 2 seminaries with 110 seminarians, 340 schools with 5322 pupils, 5 orphanages with 962 orphans, 105 churches or chapels, 45,000 Catholics.

LAUNAY, *Atlas des missions de la société des missions-étrangères* (1890).

V. H. MONTANAR.

Sze-ch'wan, SOUTHERN, VICARIATE APOSTOLIC OF.—On 24 January, 1860, the mission of Southern Sze-ch'wan was separated from Eastern Sze-ch'wan and erected into a vicariate Apostolic by a Decree of Pius IX. The Right Rev. Mgr Pichon, titular Bishop of Helenopolis, was the first vicar Apostolic. The mission numbered 12,000 Catholics and the bishop there was the only European missionary with three native priests and four chapels. Bishop Desflèches gave him one missionary, Father Larcher, and one Chinese priest. In 1862 Bishop Pichon established a seminary at Ho-ti-keou. In 1871 he died in France, and Bishop Lepley succeeded him. Bishop Chatagnon succeeded Bishop Lepley in 1887. On 28 May, 1895, the buildings of the Protestants at Chen-tu were destroyed. The following day the settlements of Bishop Dunand were also ruined. About half of the Catholic settlements in the Southern Sze-ch'wan missions were destroyed. Bishop Chatagnon escaped into the tribunal of Mei-chou. In July, 1898, a new persecution broke out. In 1900 the mission did not suffer much from the Boxers. In 1902 there was an awful persecution. Many Christians were killed. From 1895 till 1904 there were about thirty Christians murdered on account of their Faith. The mission is entrusted to the Society of the Foreign Missons of Paris. The present vicar Apostolic is Right Rev. Marc Chatagnon, titular Bishop of Chersonesus, who resides at Sui-fu, and has as his

Coadjutor Right Rev. Pierre-Marie Fayolle, consecrated titular Bishop of Lampas in 1909. In 1910 the mission of Kien-Chang was separated from Southern Sze-ch'wan and Father J.-B.-Marie de Guébriant elected bishop and first vicar Apostolic. As this mission has been newly formed, it has been impossible to get any information about the number of the Christians. In 1889 the mission numbered: 1 bishop, 26 missionaries, 9 native priests, 50 catechists, 38 churches and chapels, 1 seminary with 31 students, 68 schools with 1265 pupils, 18,000 Catholics. In 1910 there were 2 bishops, 40 missionaries, 15 native priests, 98 catechists, 2 seminaries with 115 students, 284 schools with 5765 pupils, 6 orphanages with 153 orphans, 104 churches or chapels, 30,618 Catholics.

Szentiványi, Martin, b. at Szentiván, Hungary, 20 October, 1633; d. at Nagy-Szombát (Tyrnau), 5 March, 1708. He entered the Society of Jesus in 1653, and was professor of Scripture for five years at Vienna and Nagy-Szombát, professor of mathematics and philosophy for nine years, and professor of canon law and theology for seven years. For twelve years he filled the office of chancellor of the University of Nagy-Szombát, and in addition was for nine successive years governor of the Pasmaneum in Vienna and of the academy at Nagy-Szombát. His numerous writings appeared in Hungarian, Latin, German, and Slovak, and some were translated into French. The most important are: "Curiosiora et selectiora variarum scientiarum miscellanea in tres partes divisa" (Tyrnau, 1689); "Dissertationes septem, etc." (Tyrnau, 1689); "Rectus modus interpretandi scripturam sacram" (Tyrnau, 1696); "Summarium chronologiæ Hungariæ" (Tyrnau, 1697); "Hungaria in immaculatam conceptionem b. Mariæ virginis magnæ dominæ suæ credens et iuvans" (Tyrnau, 1701); "Doctrina fidei christianæ" (Louvain, 1708); "Lutheranicum nunquam et nusquam" (Tyrnau, 1702); "Relatio status futuræ vitæ" (Tyrnau, 1699); "Dissertationes hæresiologico-polemicæ de hæresiarchis, hæresibus, et erroribus in fide, dogmatibus, hoc sæculo nostro (Tyrnau, 1701); "Solutiones catholicæ, etc." (Tyrnau, 1701); "Quinquaginta rationes et motiva cur in tanta varietate religionum et confessionum fidei in christianitate moderno tempore vigentium, sola religio Romano-catholica sit eligenda et omnibus aliis preferenda" (Tyrnau, 1701; German and Hungarian, Tyrnau, 1702).

Szujski, Joseph, b. at Tarnow, 1835; d. at Cracow, 1883. He studied at Tarnow, then at Cracow (1854) and at Vienna (1858–9). He began his career as a poet, and continued to write verses till the end of his brief and fruitful life. Apart from many short lyrical poems, his first attempts were dramatic: "Samuel Zborowski", "Halszka of Ostrog", and a translation of the "Agamemnon" of Æschylus. Before his marriage (1861) he had also published his "Portraits, not by Van Dyck", in which various types of Poles are characterized perhaps too roughly, but with acumen, often with accuracy. He began working at a manual of Polish history, publishing two volumes in 1862, but was presently convinced of the necessity of independent research, of which volumes three and four (1864–6) give good evidence. The calamitous insurrection of 1863 was a terrible blow to Szujski's buoyant hopes for Poland's future, and he resolved to devote his whole life to seeking the causes of his beloved country's misfortunes, with a view to her regeneration. At the time that he was publishing the poems: "The Servant of the Tombs", "The Defence of Czestochowa", and the dramas, "George Lubomirski" and "Wallas", he placed himself in the front rank of Polish historians by his work, "Some Truths of our History" (1865). "No nation", he said, "can fall save through her own fault, nor rise again, save by her own intelligent labour and spiritual activity"; and he most courageously indicated all Poland's faults, not however omitting the means of reformation. He founded the "Polish Review" (1866), and the next year brought out "Hedwige" and "Twardowski", both dramas. When the use of the national language was restored in Cracow University, Szujski was named (1869) professor of Polish history; later, he was chosen rector. As early as 1872, he was the life and the moving spirit of the Academy of Sciences at Cracow in his capacity of secretary. About that time, for his researches were not confined to Poland, he published a sketch of the literary history of the non-Christian world; studies on Marcus Aurelius and on Lucian; translations from Æschylus and Aristophanes; "Maryna Mnischowna", and "The Death of Ladislaus IV", dramas of his own, together with several other works. After his rectorate (1879) Szujski was made a peer. But his health, which had always been precarious, now failed completely, and consumption set in. He continued to work, however, till he could work no more.

As a historian, Szujski ranks with Kalinka. He united the most ardent patriotism with a supreme love for truth and a remarkable comprehension of political situations and the characters of those who played their parts in them; consequently no one could explain so well as he the sequence of events and the causes which, for good or evil, influenced the nation. His history, first sketched in four volumes, from the sixteenth century on, was supplemented by three other volumes, entitled "Relations and Researches"; the most admirable parts being those dealing with the Renaissance and the Reformation. It has been said of him that "the historian killed the poet"; and indeed his attempts to force into his historical dramas every incident relative to their times in many cases impede their proper development; but he allowed history to dominate his art through a feeling of duty to his country. The lessons which he found in the annals of the nation he sought to reproduce upon the stage. He was himself well aware of his shortcomings, and believed his plays destined merely to pave the way for a simpler expression of patriotic feeling, without morbid sentimentality. Though sometimes lacking in style, due to the great amount of work which he undertook, Szujski was a great historian, a poet of high ideals and aspirations, and one to whom the Polish nation of the present day owes much.

St. Tarnowski.

Szymonowicz, Simon, known also by the Latin name of Simonides, b. at Lemberg, 1558; d. 1629. He studied first at Lemberg, afterwards in the Cracow Academy, and then abroad in the Netherlands and in France. On his return, he became a private tutor; among other young men, he taught Sobieski's father and the son of John Zolkiewski, who took Moscow. He enjoyed intimate relations with the famous John Zamoyski, whose son he also educated; after which (1614) he retired to the country, where he remained until his death. He was never married. Szymonowicz may be styled the last of the Polish Humanists, to whom indeed he belongs both by his erudition and by the character of his creations. He spent the greater part of his life writing Latin poems, once much appreciated throughout Europe. The best of these are: "Flagellum Livoris", a collection of odes dedicated to Zamoyski; "Ælinopæan", in honour of one of Zamoyski's victories; "Joel Propheta", a paraphrase of the Book of Joel, inscribed to Clement VIII, whom our poet had known personally as a legate in Poland; "Hercules Prodiceus", written for his pupil, the young Thomas Zamoyski; and two dramas: "Penthesilea" and "Castus Joseph".

His first Polish verses were written in 1606, in favour of the rebellion of Zebrzydowski. He also wrote a few fugitive poems, but his fame mainly rests on his "Idyls", which appeared in 1614. They were the first and still remain the best poems of the kind in the Polish language. They faithfully follow the old classical type, so often imitated by French and Italian Humanists in the fifteenth and sixteenth centuries; but under this form there is a true national element, and the Polish landscape and peasantry are gracefully described. Like Virgil's "Eclogues", all are short; several were composed on special occasions. Not all are uniformly beautiful, indeed the finest are often marred by weak passages. But they have the merit of simplicity, not unfrequent depth of feeling or pleasant wit and humour, profound political allusions, clarity of thought and a noble diction. His influence is visible in the writings of both the Zimorowicz, and also in Gavinski's "Idyls". More recently he has been imitated by Naruszewicz, and at times by Kniaznin and Karpinski. In the nineteenth century Mickiewicz appreciated him admirably in his course of lectures on Slavic literature, and, we may say, rediscovered him.

ST. TARNOWSKI.

T

Tabæ, titular see in Caria, suffragan of Stauropolis; according to Strabo (XII, 570, 576) it was located in a plain in Phrygia on the boundaries of Caria. Stephanus Byzantius (s. v.) mentions two cities of this name, one in Lydia, the other in Caria. Livy (XXXVIII, 13) says that it was on the frontier of Pisidia towards the coast of the Gulf of Pamphylia. The town in question, however, some coins of which are extant, was one which claimed to have been founded by one Tabus. Others derive its name from *tabi,* which in Semitic languages means "good", and others from a native word *taba,* meaning "rock", which seems a probable derivation. In 189 B. C. the consul Gneius Malius Vulso, having defeated the natives who blocked his passage, exacted from Tabæ a fine of 25 talents and 10,000 *medimni* of wheat. Three bishops of Tabæ are known: Rufinus, present at the Council of Ephesus (431); Severus, at Constantinople (553); Basilius, at Nicæa (787) (Le Quien, "Oriens christ.", I. 905). The "Notitiæ Episcopatuum" continue to mention the see among the suffragans of Stauropolis until the thirteenth century. Tabæ is now the village of Davas which gives its name to a caza of the vilayet of Smyrna; some inscriptions and numerous ancient remains are found.

S. PÉTRIDÈS.

Tabasco, DIOCESE OF (TABASQUENSIS), in the Republic of Mexico, suffragan of the Archbishopric of Yucatán. It comprises the States of Tabasco, having an area of 10,872 sq. miles and a population (in 1910) of 183,805. The bishop and the governor reside at San Juan Bautista, founded in 1598 under the name of Villa de Felipe II, known as Villa Hermosa till 1826, when it got its present name. The city has at present (1910) a population of 12,084 inhabitants. In the decree of Charles V, 19 September, 1525, we read:—"At the request and with the express assent of the said Bishop Don Fray Julián Garcés, we declare, make known, and appoint as the boundaries of the said Bishopric of Yucatán and Santa María de los Remedios the following provinces and territories: First, the entire Province of Tlaxcaltechle, and San Juan de Ullua, ...; the Villa de Medellín and the territory of Tabasco", etc. The Gospel was preached here in the early period of the Spanish conquest. In 1545 the Dominican Fathers going to Chiapas passed through Tabasco and in 1578 organized the house of Oxolotlán, the first vicar of which was Padre Tomás Aguilar. Christianity in Tabasco must already have made considerable progress, for Philip II during the time of the Viceroy Velasco planned the erection of a see there. Philip III also intended to do so, in 1609, but was unsuccessful. Another futile attempt was made in 1680. Finally, in 1864, Mgr. Rodríguez de la Gala, Apostolic administrator, later Bishop, of Yucatán, promoted the establishment of a see which was created by Leo XIII on the petition of Mgr. Labastida, Archbishop of Mexico. The new diocese was established in 1880 from parishes taken from the Sees of Chiapas, Oaxaca, and Yucatán. It was suffragan to the Archdiocese of Mexico until 1891; to the See of Oaxaca from 1891 till 1906; and finally in 1906 to the See of Yucatán. The diocese contains: an ecclesiastical seminary with 6 students; 7 parochial schools; 4 Catholic colleges, and about 600 *alumni;* a Protestant college with 25 pupils; and 3 churches.

VERA, *Catecismo geográfico-histórico-estadístico de la Iglesia mexicana* (Amecameca, 1881); CARILLO, *El Obispado de Yukatán* (Mérida, 1895).

CAMILLUS CRIVELLI.

Tabb, JOHN BANNISTER, an American poet and educator, b. at "The Forest" near Richmond, 1845; d. at Ellicott City, Md., 1909. Descended from one of the oldest and wealthiest Virginian families, he was carefully trained by private tutors. At the age of fourteen his sight was so poor that he had to give up his books, and for three years spent much time at the piano, becoming proficient in music. On the breaking out of the Civil War he enlisted under the Confederacy and served in the navy till taken captive, 4 June, 1864. He was sent to the "Bull-Pen" at Point Lookout, where he formed an enduring friendship with Sidney Lanier. Released from prison the following February, he was penniless. He undertook to fit himself for a musical career and to that end practised seven hours a day. His patron failing, he was obliged to maintain himself as a teacher, securing a position at St. Paul's School, Baltimore. While there he fell under the influence of the Rev. Alfred Curtis, who later on was converted from Episcopalianism to the Catholic Church. Tabb followed his master into the fold in 1872. A few years later he entered St. Charles's College to prepare for the priesthood. On completing his classical studies he was retained by the faculty as teacher of English. Thus interrupted, his theological studies were not completed till the Christmas of 1884, when he was ordained. He continued to teach English Grammar at St. Charles's till a short time before his death and till he had become totally blind. His "Bone Rules" is counted a valuable contribution to his art. It is his only prose work. Father Tabb consecrated all his energies to the vocation of teacher. His poems were written here, there, and everywhere; but every one of them bears the stamp of a highly cultivated and gifted mind. They were contributed to the foremost magazines and were read with avidity. Concise and suggestive, these literary gems cling to the fancy and thus realize the modest ambition of their author as expressed in the opening poem of his "Later Lyrics":

"O little bird, I'd be
A poet like to thee
Singing my native song,
Brief to the ear, but long
To love and memory."

In the lyric field he was greatly admired. Under his muse inanimate things took on life and beauty and the abstract became concrete and personal. His poems are collected in five volumes which were published in the following order: "Poems"; "Lyrics"; "Child Verse"; "Later Lyrics"; "Sonnets".

MEYNELL, *Father Tabb* in *The Catholic World* (Feb., 1910); DUGGAN, *Father Tabb* in *America* (5, 12, 19 Feb., 1910).

Tabbora, a titular see in Africa Proconsularis, suffragan of Carthage. Tabbora or Talbora has been identified with two groups of ruins rather close to each other, now called Tembra, west of Bijga (ancient Bisica) in the valley of Wady Siliana, Tunis. Two bishops are known: Marinus, present at the Conference of Carthage (411), where his rival was Victor, also rival of the Bishop of Bisica; and Constantine, who signed the letter from the bishops of the province to Paul, Patriarch of Constantinople, against the Monothelites (646).

Toulotte, *Géog. de l'Afrique Chrétienne: Proconsulaire* (Paris, 1892), 257.

S. Pétridès.

Tabernacle (Tabernaculum) signified in the Middle Ages sometimes a ciborium-altar, a structure resting on pillars and covered with a baldachino that was set over an altar, sometimes an ostensory or monstrance, a tower-shaped vessel for preserving and exhibiting relics and the Blessed Sacrament, sometimes, lastly, like to-day, it was the name of the vessel holding the pyx. That is, at the present time in ecclesiastical usage it is only the name for the receptacle or case placed upon the table of the high altar or of another altar in which the vessels containing the Blessed Sacrament, as the ciborium, monstrance, custodia, are kept. As a rule, in cathedrals and monastic churches it is not set upon the high altar but upon a side altar, or the altar of a special sacramentary chapel; this is to be done both on account of the reverence due the Holy Sacrament and to avoid impeding the course of the ceremonies in solemn functions at the high altar. On the other hand it is generally to be placed upon the high altar in parish churches as the most befitting position ("Cærem. ep.", I, xii, No. 8; "Rit. rom.", tit. IV, i, no. 6; S. C. Episc., 10 February, 1579). A number of decisions have been given by the Sacred Congregation of Rites regarding the tabernacle. According to these, to mention the more important decisions, relics and pictures are not to be displayed for veneration either on or before the tabernacle ("Decreta auth.", nos. 2613, 2906). Neither is it permissible to place a vase of flowers in such manner before the door of the tabernacle as to conceal it (no. 2067). The interior of the tabernacle must either be gilded or covered with white silk (no. 4035, ad 4); but the exterior is to be equipped with a mantle-like hanging, that must be either always white or is to be changed according to the colour of the day; this hanging is called the *canopeum* (no. 3520; cf. "Rit. rom., loc. cit.). A benediction of the tabernacle is customary but is not prescribed.

History.—In the Middle Ages there was no uniform custom in regard to the place where the Blessed Sacrament was kept. The Fourth Lateran Council and many provincial and diocesan synods held in the Middle Ages require only that the Host be kept in a secure, well-fastened receptacle. At the most they demand that it be put in a clean, conspicuous place. Only a few synods designate the spot more closely, as the Synods of Cologne (1281) and of Münster (1279), which commanded that it was to be kept above the altar and protected by locking with a key. In general, four main methods of preserving the Blessed Sacrament may be distinguished in medieval times: (1) in a cabinet in the sacristy, a custom that is connected with early Christian usage; (2) in a cupboard in the wall of the choir or in a projection from one of the walls which was constructed like a tower, was called Sacrament-House, and sometimes reached up to the vaulting; (3) in a dove or pyx, surrounded by a cover or receptacle and generally surmounted by a small baldachino, which hung over the altar by a chain or cord; (4) lastly, upon the altar table, either in the pyx alone or in a receptacle similar to a tabernacle, or in a small cupboard arranged in the reredos or predella of the altar. This last method is mentioned in the "Admonitio synodalis" of the ninth century by Regino of Prüm (d. 915), later by Durandus, and in the regulations issued by the Synods of Trier and Münster already mentioned. Reredoses containing cupboards to hold the Blessed Sacrament can be proved to have existed as early as the fourteenth century, as, for instance, the altar of St. Clara in the Cologne cathedral, although they were not numerous until the end of the medieval period. The high altar dating from 1424 in the Church of St. Martin at Landshut, Bavaria, is an example of the combination of reredos and Sacrament-House. From the sixteenth century it became gradually, although slowly, more customary to preserve the Blessed Sacrament in a receptacle that rose above the altar table. This was the case above all at Rome, where the custom first came into use, and in Italy in general, influenced largely by the good example set by St. Charles Borromeo. The change came very slowly in France, where even in the eighteenth century it was still customary in many cathedrals to suspend the Blessed Sacrament over the altar, and also in Belgium and Germany, where the custom of using the Sacrament-House was maintained in many places until after the middle of the nineteenth century, when the decision of the Sacred Congregation of Rites of 21 August, 1863, put an end to the employment of such receptacles.

Joseph Braun.

Tabernacle (Latin *tabernaculum*, tent) in Biblical parlance usually designates the movable tent-like sanctuary of the Hebrews before the erection of Solomon's Temple. The various expressions in the Hebrew text in reference to the Tabernacle (*'ohel*, tent; *'ohel mo'ed*, tent of meeting; *'ohel ha-'eduth*, tent of the testimony; *mishkan*, dwelling; *mishkan ha- 'eduth*, dwelling of the testimony; *mishkan 'ohel*, dwelling of the tent; *beth Yahweh*, house of Yahweh; *qodesh*, holy; *miqdash*, sanctuary; *hekal*, temple), while enabling us to form a fair idea of this construction, raise, by the seeming consistency of the passages in which they severally occur, many problems with which all modern commentators of the Scriptures have to grapple. Thus, Exodus describes the ark as sheltered in a tent (xxxiii, 7; Hebr. *'ohel mo'ed*), whose position was "without the camp afar off" (Cf. Num., xi, 16 sqq.; 24–30; xii; Deut., xxxi, 14 sqq.), guarded by "Josue the son of Nun" (11), and at the door of which Yahweh was wont to manifest himself to Moses (9–11; cf. Num., xii, 5; Deut., xxxi, 15). That this "tent of tryst" (or better, perhaps, "tent of the oracle") was not identical with the tabernacle modern independent critics urge from the fact that this *'ohel mo'ed* was in existence before Beseleel and Ooliab commenced the construction of the Tabernacle (Ex., xxxv–xxxvi) and that the customary place of the latter was in the very midst of the encampment (Num., ii, 1 sqq.; x, 15 sqq.). Much stress is laid upon this and other seeming discrepancies to conclude that the description of the tabernacle found in Ex., xxv–xxxi, xxxix–xl, is the work of the post-exilian authors of the Priestly Code.

Assuming, however, the historical accuracy of the Biblical narratives, we shall limit ourselves here to a brief description of that "portable sanctuary" of the Hebrews. In this sanctuary we should distinguish the tent or tabernacle proper from the sacred enclosure in which the tent stood. The "court of the tabernacle" (Ex., xxvii, 9) was a rectangular space, measuring 100 by 50 cubits (probably the Egyptian cubit, 20¾ ins.), screened off by curtains of "fine twisted linen" (xxvii, 9), 5 cubits high, 100 cubits long on the north and south sides, 50 on the east and 15 on the west, and 20 cubits on either side of the entrance. The entrance was closed by a hanging of fine twisted linen, embroidered in violet, purple, and scarlet and "twice dyed" on a white ground (probable meaning of Ex., xxvii, 16). All these curtains were suspended from sixty pillars, but not in a "loose and flowing manner", as Josephus wrongly states, since the total length of the curtains is exactly the same as the perimeter of the court, one pillar being assigned to every five cubits of curtain. These pillars of setimwood, five cubits high, stood on bases ("sockets", Ex., xxxix, 39) of brass and were held in position by means of cords (ibid., xxxix, 40) fastened to brass pegs ("pins", ibid., xxxv, 18) which were stuck in the ground; the pillars ended in a capital ("head", Exod., xxxix, 17, etc.; we must believe that the height given above includes both the base and capital of the pillar) with a band or necking (to hang the curtain) overlaid with silver. East of the entrance were found successively: the altar of holocausts (Ex., xxvii, 1–8, etc.), the brazen layer (xxx, 18–21; xxxviii, 8, etc.), and the tabernacle proper. The latter was conceived to be the dwelling-tent of God; hence it consisted essentially of curtains, the wooden framework, though indispensable, being only of secondary importance. The whole structure measured 30 by 10 cubits, and was divided into two sections; the one to the west, the "Holy Place", containing the altar of incense, the golden candlestick, and the table of shewbreads; and the other, the "Holy of Holies", containing the Ark of the Covenant with the propitiatory and the cherubim. These sections were respectively 20 and 10 cubits long.

Jewish exegetical tradition, followed by almost every Christian exponent of the Bible, understood the wooden framework to be made up of 48 massive boards (rather beams) of setim wood, measuring 10 by 1½ by 1 cubit, placed side by side. This means a weight (about fifty tons) out of proportion with what these beams would have to bear and very difficult of transportation. Some modern scholars having studied more closely the technical terms used in the original adopt another view. According to them the "boards" of the tabernacle must be understood as light frames consisting of two uprights joined (probably at the top, middle, and bottom) by ties or cross-rails (the "mortises" in Ex., xxvi, 17). Of these frames, overlaid with gold (xxvi, 29), there were 20 on the north side of the tabernacle, 20 on the south, and 6 on the east. To provide solidity and rigidity, a slanting frame was put at the north-east and south-east corners to buttress the structure (xxvi, 23); the lower part of the uprights was sunk deep into silver sockets or bases, probably to be understood as square blocks (about 1 cubit high and ¾ cubit square); finally, five wooden bars, passing through rings attached to the frames, ran along the sides (xxvi, 26–28). On the west the frames were to be replaced by five pillars of setimwood overlaid with gold, sunk in brass bases, and crowned with golden capitals (xxvi, 37). Four pillars of the same workmanship, with silver bases, separated the Holy Place from the Holy of Holies.

A curtain, two pieces of fine tapestry joined by golden rings, was spread over the whole framework; each piece of tapestry consisted of five strips, 28 by 4 cubits, fitted together by loops. The total dimension of this being 20 by 40 cubits, it must have reached on the north and south the top of the bases, against which it was possibly fixed (there were loops at the top of the curtains likely for this purpose), whereas on the east it reached to the ground. Covering this curtain was another, woven of goats' hair (the ordinary tent material), fitted in somewhat similarly; its dimensions, 11 (6+5)×4=44 by 30 cubits, were so calculated as to cover entirely the inside curtain on the north, east, and south sides and to hang down doubled on the west side, thus covering the tops and capitals of the pillars (Ex., xxvi, 7–13). Two outer coverings (no dimensions are given), one of dyed rams' skin and one of dugongs' skin, protected the whole structure. A hanging, of apparently the same workmanship as that closing the entrance of the court, screened the entrance of the tabernacle (ibid., 36); finally, a veil of the same tapestry as the inner curtain, hooked from the four pillars mentioned above, completed the separation of the Holy of Holies from the Holy Place.

History.—Delayed by the people's outburst of idolatrous worship pending the long intercourse of Moses with God on Mount Sinai, the construction was achieved by the skilful workmen selected by God, and was dedicated on the first day of the second year after the flight from Egypt. Henceforth the tabernacle, under the special care of the Levites of the family of Gerson, accompanied the Israelites through their wanderings in the wilderness; during marches, it came after the first six tribes and before the other six (Num., ii, 3–34); in encampments, it occupied the middle of the camp, three tribes being on each side. After the crossing of the Jordan, it remained very likely at Galgala until its removal to Silo (Jos., xviii, 1), where it remained many years. In Saul's time we hear of the tabernacle at Nobe (I Kings, xxi, 1–6), and later at Gabaon (I Par., xvi, 39), until Solomon had it removed to his new Temple (III Kings, viii, 4; II Par., v, 5). It disappeared in the first years of the sixth century B. C., being either taken away by the Babylonian army in 588, or, if credence be given the letter prefacing II Mach., hidden by Jeremias in an unknown and secure place.

CHARLES L. SOUVAY.

Tabernacles, FEAST OF, one of the three great feasts of the Hebrew liturgical calendar, even the greatest, according to Philo (*ἑορτῶν μεγίστη*) and Josephus (*ἑορτὴ ἁγιωτάτη καὶ μεγίστη*). The common name, feast of Tabernacles—among Greek-speaking Jews *σκηνοπηγία*, that is, "the pitching of the tent" (John, vii, 2)—recalls to mind the custom established by the law of Lev., xxiii, 40, of erecting on the roofs of houses, and even in streets and public squares, booths of branches and foliage, wherein all who were not exempted through illness or weakness were obliged to live during the entire celebration. It is sometimes asserted that the origin of the feast was similar to our "harvest-home" festivities.

This naturalistic view, based on the assumption that the religious enactments of the Law are of relatively recent date and mere sacerdotal ordinances, takes no account of the significance which at all times attached to the feast. True it is that one of the features of the celebrations was to be, after a fashion, a harvest-home, and to offer thanksgiving for the crops of the year (Deut., xvi, 13; Ex., xxiii, 16); and it is perhaps owing to this special feature that the character of the feast was one of joy and merriment (cf. Ps. iv, 7–8, in Heb.; Joseph., Ant., VIII, iv, 1), and that numerous sacrifices were then offered (Num., xxix, 12–39); yet to the Jews the feast of Tabernacles was always and primarily in commemoration of their forefathers' indwelling in tents in the wilderness (Lev., xxiii, 43) and in thanksgiving for the permanent abode given them in the Promised Land, and, later on, after the erection of the Temple, for a permanent place of worship (cf. III Kings, viii, 2; xii, 32). The feast began on the fifteenth day of the seventh month, Ethanim of Tishri (about our September), and lasted seven days (Lev., xxiii, 34–36). Every male Israelite was, according to law, obliged to go to Jerusalem, and "every one who was of the people of Israel" was bound to live in booths, which, though involving some discomfort, at the same time contributed much to the merriment attending the celebration. The distinctions between rich and poor were then somewhat obliterated in the general encampment, and thus the feast had a most beneficial social influence. The first day was held most solemn and considered a sabbath, all servile work being forbidden on that day (Lev., xxiii, 39; Num., xxix, 35); during the whole octave numerous sacrifices were offered (Num., xxix, 12–39) and on the eighth day [styled the great(est) day of the feast in John, vii, 37], was held a sabbath like the first and marked by special sacrifices of its own, the booths were broken up and the people returned home.

After the Exile, the feast was protracted to the twenty-fifth of the month, and two new rites were added to the old ceremonial. Every morning of the celebration a priest went down to the Siloe Fountain, whence he brought in a golden ewer water which was poured on the altar of holocausts amidst the singing of the Hallel (Pss. cxii–cxvii) and the joyful sound of musical instruments. It was possibly the performance of this ceremony (the institution of which may have been suggested by Is., xii, 3) which afforded to Our Lord the occasion to compare the action of the Holy Ghost in the faithful to a spring of living water (John, vii, 37–39). The other new feature added to the ritual of the feast was the illuminations of the women's court, together with the singing of the Psalms of the Degrees (Pss. cxix–cxxxiii) and the performance of dances or processions in the sacred precincts. On the eighth day a procession went seven times around the altar, the people carrying myrtle-boughs and palms and shouting: "Hosannah!" in memory of the fall of Jericho.

Every seven years, that is in the year of release, during the feast of Tabernacles, the Law was to be read before all the people according to the command found in Deut., xxxi, 10. But this enactment was probably soon found to be impracticable; and thus the Jewish authorities arranged to read on every sabbath, commencing with the sabbath after the feast of Tabernacles in one year of release and ending with the feast of Tabernacles in the next year of release, a portion of the Law so calculated that the whole Pentateuch would be read through in seven years. Thus would in some way the commandment be fulfilled. Some time later, the Jews of Palestine lengthened the sections for each sabbath in such a manner that the entire Law could be read in three years (Talm. Babyl. Megillah, 29b). At present (and this custom seems to go back to the first century B. C.) the Jews have the Pentateuch so divided that they read it through every year, the first *Parashah* (division) being appointed for the sabbath after the feast of Tabernacles, and the last chapters for the last day of the feast in the next year, this being the day of "rejoicing in the Law".

Tabernacle Societies.—The Association of Perpetual Adoration of the Blessed Sacrament and of work for poor churches was founded at Brussels in 1848 by Anne de Meeûs. By 1851 it had the approval of the bishops of Belgium. Within a few years a number of its members formed themselves into a religious congregation, that of the Sisters of Perpetual Adoration (q. v.), Mdlle de Meeûs becoming the first superior general. In 1853 the society became an archconfraternity for Belgium, but quickly spread to the nearby countries where it met similar needs and received similar privileges, and in 1863 Pius IX granted the mother-society at Brussels the right to affiliate confraternities throughout the world, except in the city of Rome. This last restriction was removed when the mother-house of the Sisters of Perpetual Adoration was transferred to Rome, which then became the centre of the association. An archconfraternity with the same name and purpose already existing at Rome, but founded subsequent to that of Brussels, was merged with the latter. The statutes of the archconfraternity were approved by the Congregation of Bishops and Regulars, 12 January, 1880, and Leo XIII by a Brief of 21 June, 1881, approved its transfer to Rome and right to affiliate; and by a Brief of 30 July, 1895, granted it the title of *Prima Primaria*.

The members pledge themselves to spend an hour each month in adoration before the Blessed Sacrament and to pay yearly dues into a fund for the benefit of poor churches. The contributions are used to purchase materials for vestments which are made by women members of the society and given to poor churches. A great work is thus done and many churches have been benefited in Belgium, Germany, Austria, England, the United States, and the mission fields. The eleventh Eucharistic Congress was held in Brussels in 1898 in the church in which the society was founded, and on that occasion a glowing tribute was paid to its work. In Belgium alone it has nearly 200,000 members. Special mention should be made of the association as it is maintained in convents of Religious of the Sacred Heart. It was founded in the houses of the United States by Rev. Mother Hardey, then assistant superior general of the Society, on the occasion of her visit in 1874. She established it in connexion with the Sodality of the Children of Mary, and its marvellous growth and work for poor churches are attested by the annual reports issued by each house. Paris is the centre of the Archconfraternity of Perpetual Adoration and work for Tabernacles, founded there in the Church of St. Thomas Aquinas in 1846 and with affiliations in the dioceses of France and Algiers. It was approved by Pius IX in 1856 and made a confraternity in 1858.

Blanche M. Kelly.

Tabernacle Society, Notre Dame Convent, Philadelphia, a society of persons affiliated with the Association of Perpetual Adoration and Work for Churches in Rome. The Philadelphia organization was begun by five graduates of the convent in 1866, who formed the first Sodality of the Children of Mary in that city, affiliated with the Roman Sodality, who resolved to do some work for the altar. On 1 Oct., 1878, Archbishop Wood had the society affiliated to the Association of Perpetual Adoration and Work for Poor Churches in Brussels. This association was transferred to Rome in 1879, and the Philadelphia organization was aggregated to it 8 Oct., 1881. There are now 22 societies in the United States thus aggregated with the archassociation. The Philadelphia Association is authorized to affiliate parishes, and these share in all the benefits. From the beginning until the present the Philadelphia Society has enrolled over 10,000 members. It now has 1800 active members in and around the city, and many more throughout the country in affiliated parishes. It has the approbation of 92 archbishops and bishops. It has helped about 4600 parishes and missions in every part of the United

States, and many foreign countries. It expends about $4000 a year for materials which are made up by the members without compensation. About 100 sacred vessels are given away each year, and these are all donated, generally as memorials of the dead or for some favour received. The association publishes its "Annals" three times a year: the January number contains the report for the previous year.

Manual of Tabernacle Soc., and *Annals of Association of Perpetual Adoration and Work for Poor Churches* (Notre Dame Convent, Philadelphia).

Tabor. See THABOR.

Tacana Indians, the collective designation for a group of tribes constituting the Tacanan linguistic stock in different dialects, occupying the upper valleys of the Beni and Madre de Dios Rivers, on the eastern slope of the Andes, Department of Beni, northwestern Bolivia. The group includes: the Tacana proper, the Isiamo, the Cavina, and the Aten or Leco, all missionized by the Franciscan Fathers of the College of Ocopa, Peru, about the end of the eighteenth century; the still uncivilized Toromona and Araume and several others; and the more remote Sapibocona of the Moxos mission farther to the south. In 1832 the five Tacana missions contained 5304 Christian Indians, while the wild Toromona were estimated at 1000 more. In 1852 the traveller Weddell spent some time at the mission of Guanay and has given us a good description of the Indians as he found them. In 1883 Heath reports them as greatly reduced, the 1000 Cavina of 1832 having dwindled to 70 souls. Like their neighbours, the Mozetena and Yurucare, the Tacana are noted for their light complexion, fine features, and tall stature, averaging over five and a half feet. Of their language, which is extremely guttural and jerky in pronunciation, we have vocabularies by Heath and Weddell, besides a small devotional publication. In their primitive condition they subsisted, and still do, by agriculture, hunting, and fishing, went naked except for feather decorations on dance occasions, and lived in small communities subject to petty chiefs. Some of their tribes were reputed cannibals. The civilized Tacana wear as their principal garment a sleeveless shirt or chemise, keeping the head and feet bare. They are expert at weaving and the making of straw hats, but are not industrious beyond their immediate needs.

Tacapæ, titular see of Tripolitana in northern Africa. The official list of titular sees of the Roman Curia calls this see Tacapæ; the ancient milestones bear the name Tacapas, Tacapa, Tacapes; the Greek name was probably Tacape. It is mentioned in numerous ancient geographical documents, but nothing is known of its history. It was located in the interior of Syrtis Minor in a fertile country, was provided with several roads, and was the commercial centre of the region. At first attached to Byzantium, in the third century it became a Roman colony and formed part of Tripolitana. It is now Gabes, chief town of a civil control and the seat of a military commandery which comprises all the southern part of Tunis. It has 1200 inhabitants of whom 400 are French and live in an oasis due to the waters of Wady Gabes, with the two neighbouring villages of Djara (3000 inhabitants) and Menzel (300 inhabitants). Three of its bishops are known: Dulcitius, legate of the bishops of Tripolitana to the Council of Carthage (403) and present at the Conference of Carthage in 411; Servilius, exiled by Huneric in 484; Caius or Gallus, legate of the bishops of his province to the Council of Carthage in 525. The see still survived under Justinian who fortified the town.

S. PÉTRIDÈS.

Taché, ALEXANDRE-ANTONIN, first Archbishop of St. Boniface, Manitoba, missionary, prelate, statesman, and writer of Western Canada, b. at Fraserville, Province of Quebec, 23 July, 1823; d. at St. Boniface, 22 June, 1894. By his father, Charles Taché, he belonged to one of the principal French Canadian families, and through his mother, Louise Henriette de La Broquerie, he was a descendant of Lavérendrye (q. v.), the discoverer of the country in which he was to pass forty-nine years of his life. His classical studies were made at the College of St. Hyacinthe, whence he went (1 Sept., 1841) to the seminary of Montreal to study for the priesthood. Thence he passed to the novitiate of the recently-arrived Oblates of Mary Immaculate, and when Bishop Provencher obtained the co-operation of this Institute for his distant missions of the Red River, Brother Taché, though still a novice, was chosen to accompany thither Father Pierre Aubert, O.M.I. After a two months' journey through Canadian territory, Taché arrived at St. Boniface on 25 August, 1845. On the first Sunday following he was ordained deacon by Bishop Provencher, and, on 12 October of the same year, was promoted to the priesthood, pronouncing the final vows of an Oblate on the next day. For nine months he studied the Saulteux language; this knowledge, however, was not to be of assistance to him until years later, for in July, 1846, he was sent to Ile-à-la-Crosse. There he spent four years, learning the language of the Chippewayans, his new flock, among whom he laboured, literally changing the morals, no less than the creed, of the northern aborigines. On snow-shoes and by canoe he made long journeys for the benefit of the Crees, Chippeways, Athabaskans, and Caribou-Eaters, until, at the age of twenty-seven he was chosen as the coadjutor and future successor of Mgr. Provencher. In obedience to the founder of his congregation, Bishop de Mazenod, he crossed over to Marseilles, and was consecrated (23 November, 1851) titular Bishop of Arath. On 27 June, 1852, he was back at St. Boniface, and on 10 September, 1852, he arrived at Ile-à-la-Crosse. He then continued his missionary life, which was rendered locally all the more useful as the Indians had resented his departure and the presence of priests not familiar with their language.

ALEXANDRE-ANTONIN TACHÉ
First Archbishop of St. Boniface

So absorbed was Taché in his apostolic labours that on the death of Bishop Provencher (7 June, 1853) he did not deem it incumbent upon himself to immediately return to St. Boniface. He went on with his peregrinations among Indians and halfbreeds until in the course of 1854 he proceeded south to officially take possession of his see. On 5 June, 1855, he returned north, going as far as Great Slave Lake, where he established a mission for the benefit of another Déné tribe. Then, as his diocese was becoming too large for one man to administer, he had one of his priests, Father Vital J. Grandin, O.M.I., appointed his coadjutor. Between 1860 and 1861 Mgr. Taché resumed his journeyings among the natives, and, nine miles from Edmonton, decided upon the site of a new mission which Father Lacombe was to establish under the name of St. Albert. Returning to St. Boniface, he learned of the destruction by fire (14 December, 1860) of his residence and the cathedral, the latter, whose bells have been sung of by the Quaker poet Whittier, was the pride of the settlement. He then passed into Canada, as the East of the present Dominion was called, and, by his appeals, secured the means of commencing a new and more modest cathedral. He even went as far as Europe, and procured the erection, in the most northern part of his immense diocese, of a new vicariate Apostolic which was entrusted to the care of Bishop Faraud.

This division enabled Mgr. Taché to give more attention to the home, or southern, missions and the embryonic parishes of what is to-day Manitoba. This territory, then called Assiniboia, was peopled by a mixed population under the paternal rule of the Hudson Bay Company, assisted by a legislative body of which the Bishop of St. Boniface was a member. A restless alien element, hailing mostly from Ontario, was at that time striving to change a political regime which was satisfactory to all classes of the local society, French and English, Catholic and Protestant. When the provinces of the east had been united into a confederation, one of the first cares of the new power resulting from the 1867 Act was to obtain from the Imperial Government the transfer, in consideration of £300,000, of Assiniboia and surrounding regions which had previously belonged to the Hudson Bay Company. Not only were the inhabitants of those territories not consulted as to the advisability of this transaction, but the emissaries of Ottawa in the valley of the Red River acted so rashly and in such a domineering way towards the French and Catholic part of the population, at a time when the Federal authorities whom they represented had not as yet any jurisdiction over the country, that the discontent they caused culminated (11 October, 1869) in open revolt under Louis Riel.

The Federal authorities begged Taché, who was then attending the Œcumenical Council of the Vatican, to come and intervene in the interest of peace. On his way home the prelate had interviews with the governor-general and his ministers, and was assured by them of a full amnesty for the *métis* in arms if the latter would only send delegates to Ottawa to treat of the matters in dispute and would not oppose the coming of the military expedition that was dispatched to Red River under Wolseley. In the meantime the Provisional Government, regularly formed there by the properly elected representatives of both portions of the population, had found it necessary to execute a troublesome character named Thomas Scott. The bishop's arrival (9 March, 1870), five days after the execution, was timely, inasmuch as Riel had manifested his intention of resisting the progress of the Anglo-Canadian troops. After Taché's intervention, which was based on the promise of an amnesty received at Ottawa, the métis could no longer be relied on to pursue an aggressive policy. Delegates were sent to the Federal capital, their efforts resulting in the Manitoba Act.

Unfortunately, the authorities took the execution of Scott, a rabid Orangeman, as an excuse for refusing the amnesty to which they had solemnly pledged themselves. This was a great blow to Mgr. Taché's prestige among his people. For years he laboured to secure for the leaders in the movement of resistance against the unwarranted aggression of the representatives of Ottawa that meed of justice to which he thought they had a right. He would probably have been more successful had he shown himself less confident in their honesty in his dealings with politicians, and required written assurances when it was scarcely possible to refuse them. It was not till the end of October, 1874, that a partial amnesty was proclaimed, but not before one of Riel's lieutenants, A. D. Lépine, had been condemned to death, a sentence which Mgr. Taché had had commuted into eighteen months' imprisonment. Taché had been appointed Archbishop of St. Boniface on 22 September, 1871. Thenceforth his efforts were mostly directed towards bringing in Catholic immigrants to the new ecclesiastical province and founding new parishes within his own archdiocese. In the midst of these labours the Saskatchewan Rebellion of 1885, under the same L. Riel who had directed the legitimate rising of 1869 (see SASKATCHEWAN AND ALBERTA), took place. Taché wrote (7 Dec., 1885) a little pamphlet, "La Situation", a masterpiece of its kind, in which he deplored the rebellion, yet remained to the end sympathetic to his former protégé. The latter had paid with his life (16 Nov., 1885) for excesses that were due to good intentions rendered ineffective by the failure of an overworked brain. From 13 to 24 July, 1889, were held at St. Boniface the sessions of its First Provincial Council. But soon after this joyful event the separate schools which were guaranteed by the provincial Constitution were ruthlessly abolished. The archbishop made numerous attempts to obtain redress, publishing several letters and pamphlets to show the injustice done his people; he also had appeals taken to the various courts, but the findings were contradictory, and therefore futile, until the Privy Council of the Empire acknowledged the reality of the grievances and pointed out the Federal Parliament as the party which had power to redress them (29 Jan., 1895). Taché did not live to see this tardy justice. The anxieties of the last few years had accentuated the ravages of a malady which carried him off, to the regret of friends and foes alike. Apart from the respectful tributes of the press, some 15,000 Protestants publicly testified after his death their recognition of his worth.

Archbishop Taché had to a considerable extent shaped the destinies of the Canadian West. He was a writer of no mean order. His literary productions have a special aroma of delicacy and, at times, quiet wit, which denote the well-bred gentleman, and his French is remarkably pure and free from foreign elements. Of his first book, "Vingt Années de Missions" (Montreal, 1866), 15,000 copies were sold, and it is now very rare. A short time later he published his "Esquisse sur le Nord-Ouest de l'Amérique", almost a classic on the subject; besides a second edition, it had the honour of an English translation. The harassing school persecution which began in the year 1890 was responsible for several public documents of Archbishop Taché's, prominent among which is "A Page of the History of the Schools in Manitoba"; this document was published in English and French, and is regarded as a model of close dialectics and irrefutable logic.

Taché, ETIENNE-PASCAL, statesman, b. at St. Thomas (Montmagny, Province of Quebec), 5 Sept., 1795, son of Charles, and Geneviève Michon; d. 30 July, 1865. Through his grandmother, he was a descendant of Joliet, the discoverer of the Mississippi. He served in the war of 1812 as lieutenant of the "Chasseurs canadiens". He was a self-made man, who after a mere elementary course succeeded in graduating at Philadelphia as a physician, and later in taking the foremost rank among Canadian statesmen. After twenty-two years of successful medical practice, he entered politics as member of the Legislative Assembly at the first election following the Union (1841), which he had strenuously opposed. Re-elected in 1844, he accepted (1846) the post of adjutant-general of militia. In 1848 he became chief commissioner of public works in the Lafontaine-Baldwin ministry, and helped to save the former's life during the violent sessions of 1849. M. Taché was a member of each successive Cabinet from 1848 to 1856. In 1858 he was knighted by Queen Victoria, and in 1860 appointed aide-de-camp to Her Majesty, with the rank of colonel in the regular army. In 1862 Pius IX bestowed on him the title of Commander of the Order of St. Gregory. He aided in reorganizing the militia at the time of the Trent affair. In 1864 he formed the Taché-MacDonald administration, and presided over the conference of the delegates of the British North American provinces preparatory to confederation. Taché was ever a loyal Catholic.

LIONEL LINDSAY.

Tadama, a titular see in Mauretania Cæsariensis, of which nothing is known. Its bishop David is mentioned among the bishops of Mauretania Cæsariensis in the "Notitiæ episcopatuum" of 482. He is also the hundredth and fifth on the list of the bishops of that province who went in 484 to the Conference of Carthage and were subsequently exiled by Huneric. His name is followed by the word *probatus*, showing that he died in exile for the Faith.

TOULOTTE, *Géographie de l'Afrique chrétienne: Maurétanies* (Montreuil, 1894), 143.

S. PÉTRIDÈS.

Tænarum, a titular see in Greece, suffragan of Corinth. Tænarum, or Tænarus, was situated five English miles north of Cape Tænarum, now Cape Matapan. It contained a temple of Demeter, also one of Aphrodite. It is to-day the village of Kyparrisos. After their freedom from the Spartan yoke, the maritime Laconians formed a confederation, and founded a capital, called Cænepolis, i. e. new town. From inscriptions we learn that this new city was really Tænarum, which still preserved its old name. However, there may have been two distinct cities, in close proximity; but there is no mention of Tænarum in the "Notitiæ episcopatuum", or of any of its bishops.

SMITH, *Dict. of Greek and Roman Geog.*, s. v.; MÜLLER, *Notes to Ptolemy*, ed. DIDOT, I, 551.

S. PÉTRIDÈS.

Taensa Indians, a tribe of Muskhogean stock and somewhat superior culture, living when first known on the west bank of the Mississippi, within the present limits of Tensas parish, Louisiana, and numbering perhaps 1200 souls, in several villages. The meaning of the name is unknown. In language, religion, and custom they were nearly identical with the celebrated Natchez, their near neighbours on the opposite bank of the Mississippi, a little lower down. The Taensa were sedentary and agricultural and expert canoe men, living in large houses described as having walls of earth, but more probably of logs plastered with clay, and roofed with mats of woven cane splits. Their chiefs exercised despotic power and were treated with great respect, in marked contrast to the custom among the northern tribes. On one occasion of a ceremonial visit to La Salle the chief was accompanied by attendants who, with their hands, swept the road in front of him as he advanced. Towards the French they manifested from the first a warm friendship, but although described by the early explorers as dignified, polished, docile, and even "humane", their religion, like that of the Natchez, was notable for its bloody rites. Their chief deities seem to have been the sun and the serpent. Their dome-shaped temple was surmounted by the figures of three eagles facing the rising sun, the outer walls and the roof being of cane mats painted entirely red, and the whole was surrounded with a palisade of stakes, on each of which was set a human skull, the remains of a former sacrifice. Inside was an altar, with a rope of human scalp locks, and a perpetual fire guarded day and night by two old priests. When a chief died his wives and personal attendants were killed that their spirits might accompany him to the other world. At one chief's funeral thirteen victims were thus slaughtered. On another occasion Father Montigny, being present, interposed and prevented the sacrifice. Shortly afterwards, during a thunder storm, the temple was struck by lightning and entirely consumed. The high priest interpreted this as a sign of the anger of the god at the neglect of the ancient custom, and for reparation called upon the women to throw their children into the fire. In response five mothers rushed forward and cast their infants into the flames and others were about to follow when the soldiers of Iberville's party interfered. The five mothers who had thus given their children to death were afterwards led in procession, clad in white robes woven from the fiber of the inner bark of the mulberry.

The Taensa may have been visited by De Soto's expedition in 1540, but their definite history dates from 1682, when the French commander La Salle, accompanied by Tonti and the Recollect Father Zenobius Membré, stopped at their villages for a day or two while descending the Mississippi and met a friendly reception. In 1686 Tonti again visited them, and in 1690 he made their villages the starting-point for his expedition to the west in search of La Salle. In 1698 they were terribly wasted by a smallpox epidemic which ravaged all the tribes of the lower Mississippi, but were still estimated at about 800. In the same year, Fathers F. J. de Montigny, Antoine Davion, and Thaumur de la Source were sent out from Quebec by the Seminary of Foreign Missions (Missions Etrangères) which had undertaken work among the southern tribes. After a preliminary reconnaissance, Father Montigny, with powers of vicar-general from the Bishop of Quebec, went in 1699 to the Taensa, assigning Davion to the Tonica. Later on Father Buisson de St. Cosme, of the same seminary, arrived and was assigned to the Natchez. Father Montigny was well received, and, as has been stated, was able at the time to prevent the funeral slaughter on the death of the chief, as also to make peace between the Taensa and the Natchez. In 1700 they were visited by Iberville, governor of the Louisiana colony. The missions, however, did not prosper. Iberville himself was unfriendly to the Quebec order, and the Taensa and Tonica, while apparently kindly, were too much attached to their own ritual and custom to be moved. The murder of Father Foucault by a neighbouring hostile tribe, the Koroa, in 1702, led to the withdrawal of the seminary priests and the abandonment of the missions.

In 1706 the hostility of the Chickasaw and Yazoo compelled the Taensa to abandon their villages and retire lower down the river. In consequence of their treacherous attack upon a tribe which had given them shelter, they were again forced to become refugees and finally, about 1740, removed to Tensas river near Mobile, Alabama, under the protection of the French. They were still mainly heathen. On the cession of Mobile to the English in 1763 they, with several other small tribes, again moved over into Louisiana, settling on Red River, where they still resided in 1805, reduced then to 25 men or perhaps 100 souls. Some years later they removed south to Bayou Bœuf and thence to Grand Lake, after which the remnant disappears from history.

In 1880–2 considerable interest was aroused among philologists by the publication in Paris of what purported to be important material of the Taensa language, including papers, songs, a grammar and vocabulary, but which proved to be the fraudulent invention of a young clerical student named Parisot, or of some one else from whom the manuscripts had originally come. The deception was exposed by Brinton in 1885 and has been more recently pointed out by Swanton.

JAMES MOONEY.

Tahiti, VICARIATE APOSTOLIC OF.—Tahiti, the most important of the Society Islands, has an area of 600 square miles and a population of 11,691 inhabitants, and lies between 17° 29′ 30″ and 17° 47′ S. lat. and 151° 29′ 53″ and 151° 56′ W. long. It was discovered by Wallis in 1757. This honour is also claimed for Fernández Quiros, the pilot of the Mendana expedition from Peru to the Philippines, about 1600. Bougainville, Cook, and other explorers made Tahiti famous in Paris as "La Nouvelle Cythère", and in London aroused an enthusiasm for "the lovely isle", which led to the formation, by Dr. Haweis and others, of the London Missionary Society in 1794–95, and the despatch of the "Duff" in 1796 with some 60 persons, missionaries and teachers of trades and crafts, for the conversion of the island and its neighbours. The representatives of the society made little progress until Pomaré II, King of Tahiti, accepted Protestantism in 1815. Under his successors they gained great influence in the island government. In 1836 two priests of the Congregation of the Sacred Hearts of Jesus and Mary of Picpus arrived in Tahiti from the Gambier Islands, where Catholicism had gained a foothold. They were twice expelled by Queen Pomaré IV, with the support and approbation of the English Protestant missionaries, and took their cause to Paris. In 1838 a French naval expedition exacted from Queen Pomaré an indemnity and guarantees for the future for French residents in the island. In 1841 a mission was established by the Congregation of Picpus. In 1842 Pomaré IV signed a convention with Admiral Dupetit-Thouars, establishing a French protectorate and guaranteeing full religious liberty in Tahiti, which was ratified by Louis-Philippe in 1843. An uprising of the natives against the protectorate resulted in a punitive expedition by the French admiral, the flight of Queen Pomaré, and the forcible expulsion from the island of Rev. W. T. Pritchard of the London Missionary Society, whom the admiral held responsible for the revolt. This act was disavowed by the French Government and an indemnity paid to Great Britain based upon the claim that Pritchard, at the time of his expulsion, had been appointed British consul.

In 1848 Tahiti with its dependent islands was detached from the Vicariate of the Marquesas, and placed under the able and scholarly Mgr Jaussen. In 1880 King Pomaré, with the consent of the French Chambers, proclaimed Tahiti an integral part of the French Republic. In 1887 the French Government secularized the schools. Upon the death of Mgr Jaussen in 1891 Mgr Verdier, his assistant since 1884, succeeded to his labours, made doubly difficult by the sectarian missions and the attitude of French officials. Since 1903 the various groups of French islands in Oceania, exclusive of New Caledonia and its dependencies, have been united in one homogeneous colonial establishment, administered from Tahiti by a governor and privy council, with an administrative council. The present Vicariate of Tahiti covers the Society group, the Leeward and Gambier Islands, the Tuamotu group, Tubuai and Rapa, all belonging to France; the Cook and Penrhyn Islands, annexed to New Zealand in 1902; Pitcairn (unattached) and Easter Island, belonging to Chile. The Mission consists of: 1 bishop (Mgr Hermel, whose residence is at Papeete, the chief town of Tahiti), 1 coadjutor with right of succession, 30 priests and several brothers of the Congregation of Picpus; 6 brothers of Ploërmel; 12 churches with resident pastors; 50 other churches and chapels; 24 Sisters of St. Joseph of Cluny; 1 boys' school; 1 girls' school; 20 parochial schools; 2 hospitals. The total population of the vicariate is estimated at 31,000 inhabitants, with 7700 Catholics.

Taigi, ANNA MARIA GESUALDA ANTONIA (maiden name GIANNETTI), Venerable Servant of God, b. at Siena, Italy, 29 May, 1769; d. at Rome, 9 June, 1837. Her parents, Luigi Giannetti and Maria Masi, kept an apothecary shop at Siena, but lost all their fortune and were obliged to go to Rome in search of a livelihood. Anna Maria was then five years old. Having been educated in all the domestic virtues, she was married in course of time, 7 Jan., 1789, to Dominico Taigi, a retainer of the noble family of Chigi, with whom she lived happily for forty-eight years. Hitherto nothing extraordinary had happened in her life. But one day while she knelt with her husband at the *Confessio* in St. Peter's she felt a strong inspiration to renounce such little vanities of the world as she had allowed herself. She began to pay little attention to dress and to listen to the inner voice of grace. Soon afterwards she was received publicly in the Third Order of Trinitarians in the Church of S. Carlo alle Quatro Fontane, and having found holy spiritual directors, she made rapid progress in the way of perfection. All the money she could spare she devoted to the poor and miserable, and though not rich she was very charitable. Of the hospitals she regularly visited, the preferred one was S. Giacomo of the Incurables. Despite her love for the poor, she never neglected her own family. Of her children two died young, the others grew up in piety under the surveillance of the mother. But she never availed herself of her connexions with persons of good position to take her children out of their humble social environment. The whole family were wont to assemble for prayers in a small private chapel, and here, later on, Mass was celebrated by a priest who dwelt with the family. The great virtues of Anna Maria were rewarded by extraordinary gifts of God's grace. During many years, when praying in her chapel she had ecstasies and frequent visions, in which she foresaw the future. She exercised a peculiar influence over individuals and converted many a sinner to God. During her life she suffered much both corporally and spiritually, and was at times meanly calumniated. But after death her name soon became venerated in Rome. Her body was several times transferred, and rests finally at S. Crisogono in Trastevere. The process of her beatification was begun in 1863, but has not yet been finished.

Tait Indians (*Te-it*, "Those up river"), a collective term for those members of the Cowichan tribe, of Salishan linguistic stock, occupying the Lower Fraser River, Yale District, British Columbia (Canada), between Nicomen and Yale, where they border upon the Thompson River Indians. They have several small reserves within the jurisdiction of Fraser River agency, of which the principal are Chehalis (116), Cheam (95), Hope (79), and Yale (76). From perhaps 3000 souls a century ago they have decreased, through smallpox, disease, and former dissipation, since the occupation of the country by the whites, to 932 in 1890 and 578 in 1910. The gospel was preached to them by the Oblates, beginning with Fr. Charles Grandidier in 1869, at which time the whole Cowichan tribe was sunk in the lowest stage of degradation from drunkenness and association with depraved whites, drunken murders being of almost nightly occurrence. Within two years they were completely reclaimed, all Christians, sober and law-abiding; all due, according to Protestant testimony, "To the honest and persevering labours of a poor Catholic priest who receives no salary, and is fed by the Indians" ("The British Colonist", Victoria, B. C., 26 March, 1861, quoted in Morice, "History of the Catholic Church in Western Canada", II, 312). Of the whole number all but seventy-five are now Catholic, the others being Anglican or Methodist, and are officially reported as law-abiding, industrious, strictly moral, and generally temperate. Their principal educational centre is St. Mary's Mission, on the Fraser River, established in 1861 under the management of the Oblates assisted by the Sisters of St. Ann, besides a smaller and more recent mission school at Yale. Of the Cowichan language, which is spoken by a number of bands about Lower Fraser and on the opposite coast of Vancouver Island, very little has been recorded beyond some vocabularies by Tolmie and Dawson. A brief sketch of the ethnology of the tribe group is given by Boas in "Reports to the British Association for the Advancement of Science". In their primitive customs and characteristics they resembled the cognate Songish, Squamish, Shuswap, and Lillooet.

James Mooney.

Takkali (more properly Takhehl, plural Takhehlne), the hybrid name by which the Carrier Indians of the northern interior of British Columbia were originally made known by the fur traders, who sometimes comprised under that denomination the Chilcotin and the Babine tribes as well. The Carriers proper inhabit more or less permanent villages disseminated from the forks of Lake Tatla in the north to Alexandria in the south, or from 55° 15′ to 52° 30′ N. lat. They are subdivided into a number of septs, based mostly on differences in speech, all of which can be reduced to two main branches: the Lower and the Upper Carriers, the line of demarcation running between Stuart and Fraser Lakes. They number to-day some 1614 individuals, distributed in twelve villages. We may remark that under the fostering care of the missionaries, the population of some of those villages has of late years been constantly on the increase. This cannot be said of their southern neighbours, the Chilcotins, a rather restless horde now temporarily settled along the Chilcotin valley. As late as 1864 they still numbered fully 1500 souls; but attacks of small-pox and other causes have reduced their population to some 450. When the Babines in the north were first visited by the whites, those amongst them who claimed as their home the valley of the lake called after them boasted alone a population of at least 2000. Together with their congeners on the Bulkley River they do not now number more than 530 souls.

Socially speaking, the Carriers and the Babines follow matriarchy, succession to titles and property being among them along the female line. They are in a way ruled over by a number of hereditary petty chiefs, who alone own the land on which their co-clansmen hunt for the benefit of their respective headmen. A number of clans divide the tribes, which in the eyes of the natives are the source of a relationship at least as binding as regular consanguinity is with us. Before the advent of the missionaries the main duty of these chiefs, or noblemen, was the giving of noisy feasts called "potlatches" on the North Pacific coast, which consisted in the public distribution, to the members of clans different from that of the donors, of eatables, dressed skins, blankets, and other pieces of wearing apparel. These bounties usually celebrated the demise of some individual. They had to be scrupulously reciprocated as soon as a similar occasion presented itself to the recipients of the same. The Chilcotins knew also of those "potlatches", but among them inheritance followed patrilineal principles, and their chiefs had more power because less numerous and unconnected with the clan system. With them the son of a chief succeeded his father, instead of a nephew taking the place of his maternal uncle among the Carriers and Babines. Likewise, while the two last-named tribes cremated their dead, the Chilcotins buried them, generally on hills or knolls. The members of the three tribes believed in the immortality of the soul and followed the religious system outlined in the article Dénés, where the reason for the names Carrier and Babine will also be found.

The first contact of the Carriers with the whites dates from 1793; the Chilcotins first met them in 1808, and the Babines in 1812, while the first notions they obtained of the religion of the newcomers were derived from the Catholic servants of the traders among them. In 1842 the Carriers received their first missionary in the person of Rev. M. Demers (q. v.), and four years later Father J. Nobili not only retraced his itinerary but also evangelized the Babines. The good seed distributed by these apostolic men could not, however, come to full germination before the spring of 1873, when a permanent mission was established by Father J.-M. Le Jacq, O.M.I., on the banks of Lake Stuart, whence the Carrier and Babine villages were periodically visited. The less sedentary Chilcotins had already received a few visits from this priest since 1867, the date of the foundation of St. Joseph's Mission, some distance from their lands. The Carriers, especially, proved easily amenable to Catholic ways of thinking, and in the course of years all of them were fully converted to the Catholic religion. Such was the state of affairs among them when A. G. Morice left the north after a residence of nineteen years among the Carriers. Though as religiously inclined, the Babines took more time to fully attain the moral standard presented to their appreciation. To-day all those aborigines are Catholics, and the conduct of most of them is an honour to the Faith they profess.

A. G. Morice.

Talbot, James, fourth son of George Talbot and brother of the fourteenth Earl of Shrewsbury (b. 1726; d. 1790), is chiefly known for having been the last priest to be indicted in the public courts for saying Mass. He was educated at Douai, to which college he was a great benefactor. In 1759, at the age of thirty-three, he was consecrated coadjutor bishop to Dr. Challoner. During his episcopate he was twice brought to trial, on the information lodged by the well-known "Informer" Payne, in 1769 and 1771 respectively. In each case he was acquitted for want of evidence, but the judge, Lord Mansfield, was plainly on his side, in consequence of which, though he was no friend to Catholics as such, his house was sacked during the Gordon Riots in 1780. On the death of Bishop Challoner in 1781, Bishop James Talbot became Vicar Apostolic of the London District, which he ruled for nine years. He lived a retired life at Hammersmith, his unbounded charity gaining for him the title of "the Good Bishop Talbot". His chief work during these years was the completion of the purchase of the property at Old Hall, Herts, where he had a preparatory academy which afterwards developed into St. Edmund's College. The penal law against Catholic schools still existed, and Bishop Talbot was again threatened with imprisonment; but he contrived to evade punishment. During the last years of his life the Catholic Committee was already threatening trouble. In order to control it, Bishop Talbot allowed himself to be elected a member; but it was soon evident that the laymen were beyond control. The crisis however had not yet arrived when Bishop Talbot died at his house at Hammersmith.

The only connected account of his episcopate is in Ward, *Dawn of Catholic Revival* (London, 1909). For details of his trials, see Barnard, *Life of Challoner* (London, 1784); Burton, *The Life and Times of Bishop Challoner* (London, 1910); further allusions in Husenbeth, *Life of Milner* (Dublin, 1862); Brady, *Catholic Hierarchy* (London, 1877); Amherst, *History of Catholic Emancipation* (London, 1886); Ward, *History of St. Edmund's College* (London, 1893); Haile and Bonney, *Life of Lingard* (London, 1911). See also Milner's *Obituary Sermon* (MS. in Westminster Archives).

Bernard Ward.

Talbot, John, English Catholic layman, b. 1535(?); d. 1607(?). Only son and heir of Sir John Talbot, of Grafton, Worcestershire, he was the father, by Katharine, d. of Sir William Petre, of the Rev. George Talbot, Catholic priest, and ninth Earl of Shrewsbury. He became a member of Lincoln's Inn, 10 February, 1555–6. It was when passing through Smithfield, London, in July, 1580, with Mr. and Mrs. Talbot, that Bl. Robert Johnson, the martyr, was recognized by Sledd, the informer. Indeed, Fr. Persons, S.J., calls Bl. Robert "Mr. Talbot's priest" (Cath. Rec. Soc., II, 27), though, as it appears, he was, rather, Lady Petre's. Talbot was committed to the custody of the Dean of Westminster, 24 August, 1580, and afterwards removed to the house of his brother-in-law, Sir John Petre, in Aldersgate Street. On 1 October, 1581, the plague being then rife in the City, he was moved to some other house within ten or twelve miles of London. In 1583 the priest, Hugh Hall, confessed that he had in past years been entertained by him. Later Talbot was restricted to the house of one Henry Whitney, at Mitcham, Surrey, and two miles round it. In 1588 he was imprisoned in Wisbech Castle for having heard Mass contrary to the provisions of the statute 23 Eliz. c. i. From 9 Dec., 1588, to about 13 May, 1589, he was liberated on bail, owing to his own and his wife's bad health. He then seems to have been restricted to his house in Clerkenwell. On 12 March, 1589–90, he was ordered into confinement at the house of Richard Fiennes at Broughton in Oxfordshire, whence he was released on bail for a fortnight on 24 May, 1590. He was again allowed out on bail on 20 December, 1590, and 22 July, 1591. In 1592 he was at "Bickslie" (Bexley or Bickley?) Kent. On 27 August, 1592, the recusants formerly imprisoned at Ely, Banbury, and Broughton were ordered back to their respective prisons; but an exception was made (17 September, 1592) in favour of John Talbot. However, next year we find him in Ely gaol. Thence he was liberated on bail for a considerable period to act as umpire in a family dispute. Later on he was allowed to take "the Bathes", presumably at Bath, on account of his health. Between Michaelmas, 1593, and 10 March following, he paid £120 in fines for recusancy. Afterwards he was imprisoned in Banbury Castle, whence he was released on bail for two months, 27 Feb., 1596–7, his leave being subsequently extended on 29 April, 1597, and 6 Nov., 1597. In 1601 he was living in Worcestershire and pressure was brought to bear on him to secure his influence to promote the candidature of Sir Thomas Leighton as one of the parliamentary representatives of the shire. In 1604 he was paying £20 a month in fines for his recusancy, the benefit of which was on 26 August granted to Sir William Anstruther, who on 13 October in the same year obtained his pardon. On the following 8 December a warrant was issued for the release to him of £160, due from him to the Crown in fines for recusancy. In 1605 he was suspected of complicity with the conspirators of the Gunpowder Plot, one of whom, Robert Winter, of Haddington, near Droitwich, had married his daughter Gertrude. Robert Winter, however, declared that he had said nothing on the subject to his father-in-law, knowing that he would not join the plot under any circumstances. Indeed he had actually driven the fugitive conspirators from his door. Talbot was, nevertheless, arrested, and on 4 December, 1605, examined. On 26 September, 1606, the value of his recusancy was granted to Lord Hay. His second son, John, father of the tenth Earl of Shrewsbury, died in London in 1607, and he himself probably died about the same year.

John B. Wainewright.

Talbot, John, Venerable. See Palasor, Thomas, Venerable.

Talbot, Peter, Archbishop of Dublin, 1669–1680; b. at Malahide, Dublin, in 1620. At an early age he entered the Society of Jesus in Portugal, where he pursued his sacred studies with great distinction. He was ordained priest at Rome, and subsequently for some years held the chair of theology at the College of Antwerp. Meantime, through the Cromwellian usurpation, Charles II and the royal family were compelled to seek a refuge first in Paris and then at Cologne. Throughout the whole period of the king's exile, the four brothers of Dr. Talbot were attached to the royal Court. The eldest brother, Sir Robert Talbot, had held a high commission under Lord Ormond in the army in Ireland during the Federation period, and was now reckoned among the king's most confidential advisers. A younger brother, Colonel Richard Talbot, was also remarkable for his devotedness to the cause of the exiled monarch and stood high in royal favour. Under James II he became Duke of Tyrconnell and Lord-Lieutenant of Ireland. Dr. Talbot himself was constantly in attendance on the king and his Court. On account of his knowledge of the continental languages he was repeatedly dispatched on private embassies to Lisbon, Madrid, and Paris, and in all of them gave abundant proof of ability and fidelity to the royal cause. It appears unquestionable that during his exile in Cologne, Charles II received instruction in the Catholic faith, and was privately received into the Church by Dr. Talbot. It used to be said of the king by his friends that whenever he was in a serious mood he was a Catholic, but when he was in a merry mood he bade adieu to all religion. Unfortunately this second mood generally prevailed, especially after the Restoration, and this explains why he needed to be again received into the Church on his death-bed by Father Hudlestone, O.S.B. On the return of the king to London, Dr. Talbot received an appointment as Queen's Almoner, but the Clarendon and Ormond faction, that was then predominant, feared his influence with the king. A plot was devised against him. He was even accused of conspiring with the aid of four Jesuits to assassinate the Duke of Ormond, and so fierce was the persecution stirred up against him that he was forced to seek safety by resigning his position at Court and retiring to the Continent. The king allowed him a pension of three hundred pounds a year. Before his return to England Dr. Talbot had, with the approval of the General of the Jesuits, dissevered his connexion with the Society. He was appointed Archbishop of Dublin on 11 January, 1669, and was consecrated at Antwerp on 9 May the same year, by the Bishop of Antwerp, assisted by the Bishops of Ghent and Ferns. It was a propitious time for appointments to the Irish sees. Lord Ormond was no longer in favour and was soon after removed from the Viceroyalty, and those who succeeded him were supposed not to be so hostile to the religious interests of Ireland; they were even said to have received instructions from the king to be lenient in their dealings with his Irish Catholic subjects, and to show special favour to Dr. Talbot. The archbishop entered with great zeal on the administration of the diocese and was untiring in his efforts to promote the interests of his long persecuted flock. In the month of August, 1670, he held his first diocesan synod in Dublin. It was a memorable event that gave joy to the Catholic body. It was opened with High Mass, which for forty years many of the faithful had not witnessed. To add to the solemnity, rich embroidery and other ornaments were sent from the viceregal castle to adorn the altar. One of the abuses that called for remedy tells of the difficulties that pressed upon the priests of those days in their endeavour to meet the wants of the faithful. On week days they had been accustomed to duplicate, whilst on Sundays they had to celebrate holy Mass three times. In the same year an assembly of the archbishops and bishops and representatives of the clergy was held in Dublin, having for its main purpose the consideration of a form or Declaration of Allegiance which was drawn up by Father Peter Walsh and his associate Remonstrants, and which was urged on the bishops for general acceptance by the Ormondist party, the better to sow dissensions among the Irish Catholics. The assembled bishops and clergy rejected the proposed form of allegiance, but, to prove that this was not done through any lack of loyalty, they drew up another Declaration expressive of their due allegiance, but omitting some phrases offensive to Catholics that had been cunningly inserted in the rejected Declaration. A fierce discussion was in consequence raised by the Remonstrants backed by the Ormondists, that distracted the country for several years. At this assembly the question of precedence and of the primatial authority gave rise to considerable discussion and led to an embittered controversy between the Archbishop of Dublin and Ven. Oliver Plunkett, Archbishop of Armagh. Both prelates considered that they were asserting the rights of their respective sees, and each published a learned treatise on the subject. Whilst this controversy lasted Dr. Talbot wrote some severe censures regarding the Archbishop of Armagh, but when in prison for the Faith in later years, he addressed to the Archbishop of Armagh, then a brother prisoner, an ample apology asking his forgiveness for the harsh things that had been formerly written, and the Ven. Oliver Plunkett, as we will just now see, showed in a most practical manner how sincerely and affectionately he was reconciled to his former opponent. Another meeting of the Catholic gentry, convened by Dr. Talbot, at which it was resolved to send to the Court at London a representative who would seek redress for some of the grievances to which the Catholics of Ireland were subjected, gave great alarm to the Cromwellian settlers and to the Ormondists. It was an attempt, they said, to reverse the Act of Settlement and to foster a fresh rebellion. An address from Parliament was presented to the king praying that by royal edict all the Catholic prelates and clergy, and in particular "Peter Talbot, pretended Archbishop of Dublin", be banished from the kingdom, and further "that all convents, seminaries, and popish public schools be suppressed; that no Irish papist be admitted to inhabit in any corporation of that kingdom; that all the Irish Papists might be disarmed, and no Papist be either continued or admitted to be a commander or soldier in that Kingdom". The king knew full well how groundless and absurd were the pretences for such a royal edict, but he was too weak to offer any resistance, and thus, in 1673, a fierce storm of persecution was let loose against the whole Catholic body in Ireland, and Dr. Talbot was compelled to seek safety in exile. During his banishment he resided generally in Paris; but by pastoral letters and written instructions he continued to do all that was in his power to guide and comfort his flock. In 1675 Dr. Talbot, worn out with infirmities, obtained permission to return to England only, and for two years he resided with a family friend at Poole Hall in Cheshire. Towards the close of 1677, he petitioned the Crown for leave "to come to Ireland to die in his own country", and through the influence of the Duke of York his petition was granted. Just then the "Popish Plot" was being organized by Lord Shaftesbury and Titus Oates, and very soon information was forwarded to the Lord-Lieutenant, the Duke of Ormond, to the effect that a rebellion was being planned in Ireland, that Peter Talbot, Archbishop of Dublin, was one of the accomplices, and that assassins were hired to murder the duke himself. Ormond replied that he had no apprehension whatever on these heads, and that as regards Peter Talbot there could be no foundation for them, as he was in a dying state. Nevertheless as it was necessary to give some colour to the existence of such a plot, on 8 October, 1678, he signed a warrant for the archbishop's arrest, and he writes on the same day to the Council in London: "I have sent a squadron of his Majesty's guard of horse to apprehend Peter Talbot, the Titular Archbishop of Dublin". He was arrested at Cartown near Maynooth at the house of his brother, Colonel Richard Talbot, and, as Carte attests, was removed to Dublin "in a chair, and committed close prisoner to the Castle with a person to attend him in his miserable and helpless condition, the violence of his distemper being scarce supportable and threatening his death at every moment." For two years Dr. Talbot endured with heroic constancy all the sufferings of his painful disease and the hardships and filth of his loathsome dungeon. He died in prison in the beginning of November, 1680. Ormond, in a postscript to a letter of 20 Nov., 1680, addressed to Lord Sutherland, writes: "I have for two or three posts forgot to acquaint your Lordship that Peter Talbot, the Titular Archbishop of Dublin, is dead, and that care was taken to have the body looked upon by some that knew him." It is the tradition that he was interred in the churchyard of St. Andeon's, close by Lord Portlester's tomb. From his prison cell Dr. Talbot had written on 12 April, 1679, petitioning that a priest be allowed to visit him, as he was bedridden "these six months past" and was now in imminent danger of death. The petition was refused, but the Venerable Oliver Plunkett, Archbishop of Armagh, was a prisoner for the Faith in an adjoining cell, and on hearing of Dr. Talbot's dying condition forced his way through the warders and administered to the dying prelate the last consolations of religion. Dr. Talbot may justly be styled a confessor of the Faith and a true martyr of Christ.

WRITINGS.—Dr. Talbot, whilst living on the Continent, published several works, as well before his appointment to the See of Dublin, as during his years of exile. His principal writings are: "A Treatise on the Nature of Catholic Faith and Heresy with Reflexions upon the Nullity of the English Protestant Church and Clergy" (8 vols., Rouen, 1657); "The Politician's Catechism", by N. N., printed at Antworp (sic) in the year 1658; "The Nullity of the Prelatique Clergy" (Brussels, 1659); "The Duty and Comfort of Suffering Subjects" (a pastoral letter to the Irish Catholics), Paris, 1674; "Blackloanæ Hæresis, Historia et Confutatio, Auctore M. Lomino Theologo, Gandavi anno 1675" (mainly directed against Dr. Sargent; in the appendix is inserted a letter of the nuncio in Paris of 26 July, 1676, congratulating Dr. Talbot on his excellent work and intimating that Sargent had retracted his erroneous propositions); "Primatus Dublinensis, vel summa rationum quibus innititur ecclesia Dublinensis in possessione et prosecutione sui juris ad primatum Hyberniæ. Insulis, Ex Officina Nicolai de Rache, sub Bibliis aureis, 1674" (an exceedingly rare work; there is a copy in the library of the College of Propaganda at Rome, with the inscription, "Ex libris Jacobi Eustachii, Dublinensis, 1683").

PATRICK FRANCIS CARDINAL MORAN.

Talbot, THOMAS JOSEPH, b. 14 February, 1727; d. at Hotwells, near Bristol, 24 April, 1795. Brother of the fourteenth Earl of Shrewsbury, and of Bishop James Talbot (q. v.), he was sent to Twyford School, and thence to Douai (1739). In 1745–46, together with his brother James, he made the grand tour under the tutelage of Alban Butler. He returned to Douai to study theology; and after ordination he spent some time with Alban Butler at Norwich. In 1754 he was placed at Brockhampton. On the expulsion of the Jesuits from France, Talbot was named President of the College of St. Omer's by the committee of the Parliament of Paris (August, 1762), a post which he accepted only after much hesitation and with great reluctance. He was consecrated to the titular See of Acon (March, 1766) as coadjutor to Bishop Hornyold, whom he succeeded in the government of the Midland District (26 December, 1778). His rule fell in a time of transition, when the desire and prospect of relief from the Penal Laws led many prominent Catholics to adopt a policy of excessive compromise, the period of the Catholic Committees and the Cisalpine Club, for the difficulties of which his peaceful character was but ill-adapted. Although he joined the three other vicars Apostolic in condemning the proposed oath in 1789, he hesitated to promulgate the condemnation in his district, and in the second condemnation which the other vicars Apostolic published in 1791 he thought it neither expedient nor justifiable to concur. The explanation of this action is to be found in his conviction that peace and concord could only be restored to the distracted Catholics by means of mutual concession and charity, a sentiment which almost all his letters manifest. Certainly the most memorable, as also the most permanent, act of his administration was his invitation to Dr. John Bew (November, 1793) to take charge of the mission of Oscott and to undertake there the training of students for the priesthood, whereby was made the beginning of Oscott College. Deeply characteristic of the man is his only recorded literary publication, a small treatise on "Almsgiving" which he translated from the French. He was buried in the vault under Trenchard Street church; in 1906 his remains were removed to Downside Abbey.

Talisman. See AMULET.

Talleyrand-Périgord, CHARLES-MAURICE DE, Prince of Benevento, Bishop of Autun, French minister and ambassador, b. in Paris, 13 February, 1754; d. there, May, 1838. The eldest of an ancient French family, he was destined for Holy orders, owing to an accident which had made him lame. After having completed his studies at the Collège d'Harcourt, he went to St-Sulpice and, against his inclination, became an abbé. He then read the "most revolutionary books", and at length, giving up his priestly life, plunged into the licentiousness of the period. Having, nevertheless, been ordained priest (1779) and appointed general agent of the clergy (1780) he rapidly acquired a reputation as a man of ability. The Assembly of the Clergy of France of 1782 appointed him their promoter, and in 1785 he became secretary. Owing to his notorious immorality he obtained an episcopal see only through a promise wrung from the dying king by his father, Comte Daniel de Talleyrand. Consecrated on 16 January, 1789, and promoted to the Bishopric of Autun, he appeared in his diocese only to be elected a member of the "Etats Généraux". He soon became one of the most important personages in Europe, and utilized every opportunity to advance his private interests.

Opposed in his heart to a revolution which he accused of having "dismembered France", he first advised Louis XVI to dissolve the Assembly, but believing the democratic movement irresistible he joined it. As a member of the Constitutional Committee, he took part in the "Declaration of the Rights of Man". He extolled the spoliation of the clergy and took the oath to the Civil Constitution. His chapter, however, having described him as deserving "infamy in this world and damnation in the next", he resigned his see. But he had consecrated several constitutional bishops, given Gobel the Bishopric of Paris, and was excommunicated by pontifical Brief of 13 April, 1791. In 1792 he was sent to London on an unofficial diplomatic mission and endeavoured to organize a Franco-English alliance. He did not, however, obtain more than a promise of neutrality. Finally banished by the Convention, he escaped to the United States. He returned to Paris in March, 1796, and, owing to the influence of Barras, was appointed Minister of Foreign Affairs. He immediately welcomed Bonaparte as the great auxiliary "who would make everything smooth". With Bonaparte and Sieyès he prepared the *coup d'état* of Brumaire, after which he assisted the First Consul in the drafting of the Concordat. The pope meanwhile had released him from the ban of excommunication and restored him to secular life and the lay communion. Napoleon then compelled him (1803) to marry by civil law his mistress, Madame Grand, an English *divorcée*, who had not lived with her former husband. As the principal agent in the treaties concluded by Napoleon, he obtained for his services a fortune of some sixty million francs. He was made grand chamberlain, vice-elector of the Empire, and Sovereign Prince of Benevento. However, he advised against the Franco-Russian Alliance and resigned the ministry in August, 1807. His opposition to the Spanish War in 1809 was the cause of his complete disgrace, and he awaited at Valençay at his hotel in the Rue St. Florentin the fall of Napoleon.

In 1814 the Emperor of Russia, his guest, "committed himself entirely into his hands". Once more leader of the provisional Government, he made the Senate establish a constitution to give power to Louis XVIII. On his appointment as Minister of Foreign Affairs he preserved to France its frontiers of 1792, and at the Congress of Vienna he broke the union of the great powers by secretly concluding a treaty with Austria and England. Again appointed minister of Louis XVIII (1815) he preserved his country from dismemberment, but left the presidency of the Council after the election of 22 August, 1815. As grand chamberlain and peer of France, he henceforward contented himself with watching and sententiously criticizing events. In 1830 Louis Philippe, whose accession he had favoured, appointed him to the embassy of London, where the representatives of all the countries "bent before him". After having established the *entente cordiale* with England, he resigned office in November, 1834. In his magnificent "solitude" of Valençay he wrote his "Mémoires", in which he asserts he "never had betrayed a government which had not betrayed itself first", nor ever put his "own interests in the balance with those of France". Four hours before his death he signed, in the presence of Abbé Dupanloup, a solemn declaration in which he openly disavowed "the great errors which . . . had troubled and afflicted the Catholic, Apostolic and Roman Church, and in which he himself had had the misfortune to fall".

Gustave Gautherot.

Tallis, Thomas, English composer, b. about 1514; d. 23 Nov., 1585. He was a chorister at Saint Paul's Cathedral, London, becoming organist of Waltham Abbey in 1536. In 1540 his post was forfeited on the dissolution of the abbey, and in 1542 he appears as a gentleman of the Chapel Royal, continuing as such under Henry VIII, Edward VI, Queens Mary and Elizabeth. Owing to his extraordinary eminence as a musician, he retained his Chapel Royal appointment unmolested, although he steadfastly clung to the old Faith amid all the changes from 1545 to 1584. Like Byrd he was an avowed Catholic, and even Elizabeth herself connived at the retention of Tallis in his court appointments. In conjunction with Byrd he obtained the valuable monopoly of printing music and ruled music paper from 1575 till his death, and he was also given lands valued at 30 pounds sterling per year by Elizabeth, as well as various tithes. He was buried in Greenwich parish church. The metrical epitaph which was placed over his tomb was subsequently set to music by De Cooke. His fecundity as a composer was enormous, and he wrote several *tours de force* including a forty-part motet "Spem aliam non habui". Many of his masses are of great merit, especially his "Salve intemerata" and his mass for four voices. Owing to his religious views most of his compositions were not printed during his lifetime, but in recent years his MS. work has received much attention from skilled editors. His Dorian service and five-part Litany are gems of musical art, but are not to be compared to his exquisite Latin motets, and above all his glorious "Lamentations". Some charming motets are included in his printed "Cantiones" (1576), while many of his Latin settings are tinkered to suit Anglican tastes, e. g. his "O Sacrum Convivium" adapted to "I call and cry" by Barnard. He essayed all the existing art-forms, including "Fancies for the Organ" and some virginal pieces. Unfortunately, he has been too frequently judged by his English services, but these were merely written ex officio and do not reveal the genuine Tallis, whose best contrapuntal work may be placed almost on a par with that of Palestrina.

W. H. Grattan-Flood.

Talmud.—I. Definition.—תלמוד, a post-Biblical substantive formation of Pi'el למר, "to teach" originally signified "doctrine", "study". In a special sense, however, it meant the justification and explanation of religious and legal norms or *Halakhoth* ("conduct", signifying "the law in accordance with which the conduct of life is to be regulated"). When in the third century the Halakhoth collection of Jehuda I or the recorded Mishna became the chief object of study, the expression "Talmud" was applied chiefly to the discussions and explanations of the Mishna. Finally, it became the general designation for the Mishna itself and the collection of discussions concerned with it. For the latter, the designation Gemara, interpreted [illegible] "completion" from גמר, "to complete", Aramaic גמרא, abbreviated גמ׳, subsequently became the accepted term. The word first found entrance into the Talmud editions through Christian censorship; manuscripts and the old printed editions use the expression *Talmud*. We therefore understand by Talmud a compilation consisting of the *Mishna*, i. e. the codification of Jewish religious and legal norms, and of the *Gemara*, or the collection of discussions and explanations concerning the Mishna.

II. Origin of the Talmud.—Since Esdras the foundation of the Jewish religious community was the law. Everything was regulated in accordance with fixed norms; nothing could be added or changed in the law laid down in the Pentateuch. Yet the ever-varying conditions of life called for new ordinances, and these were decreed in accordance with the needs of the time and the special cases to be determined. There were thus formed a traditional law and custom orally transmitted. Every decree of this kind (*halakha*), if it had existed from time immemorial and nothing further could be said in regard to its origin, was called הלכה למשה מסיני, a law given to Moses on Mount Sinai. Even for orthodox Judaism of to-day it is an article of faith that Moses, at the same time that he received the written law, recorded in the Pentateuch also received detailed explanations of the different laws, which were handed down by tradition as oral law. In addition to this the scribes at an early period attempted, by interpretation of the Torah, to make the law applicable to the changed conditions of life, to base the new precepts at least retrospectively on the Torah, and to draw out of it further religious laws. For this kind of Scriptural learning hermeneutic rules (*Middoth*) were at a later period established, at first seven, which were then divided into fourteen, and finally increased to thirty-two. All the older additions to the Torah as well as the constantly increasing new material were for a long time transmitted orally, and, according to the prevailing view, it was forbidden to record it in writing. But it is at all events wrong to assume that there was a formal prohibition to record Halakhoth in writing. The prohibition probably referred to written records intended for public use; for a fixed record of the traditional law would have acted as a hindrance to its further development in accordance with the existing needs of the day. It is by no means improbable that the final reduction of the Mishna was preceded by previous written records, especially after Rabbi Agiba, at the beginning of the second century, had divested the study of the law of its previous Midrash character and had undertaken to arrange the materials systematically. Among his pupils it was probably Rabbi Me'ir who continued these systematic labours. But of such collections only one finally attained canonical recognition, and therefore was called Mishna *par excellence*, viz. the one edited about the end of the second century of our era by Rabbi Jehuda I, called *Ha-nashi* (the prince) or *Ha-gadosh* (the saint) or simply the Rabbi. This then is our Mishna, the basis of the Talmud.

Rabbi Jehuda had adopted only a part of the doctrines, which in course of time had been handed down in the different schools. Although he selected what was most important, he sometimes omitted much that seemed important to others; and, on the other hand, it was felt that even the unimportant should not be allowed to sink into oblivion. In consequence, other collections soon originated, which, though not canonical, were nevertheless highly valued. All the Halakhoth which were not included in the Mishna of Jehuda received the name *Baraithoth* (sing. *Baraitha*, "omitted doctrine"). The most important Baraitha collection is the Tosephta.

The precise brevity of expression and the pregnant form in which the Mishna had codified the Halakhoth made an interpretation of them necessary, while the casuistic features of the work were a stimulus to further casuistic development. In the profound study and explanation of its contents much weight was placed upon the Haggada, i. e. the doctrines not included in the law (folk-lore, legends, historic recollections, ethics and didactics, etc.), of which Jehuda, who aimed to draw up a code of laws, had taken little or no account. Everything, in fact, that tradition offered was brought within the range of discussion. In order to give a suitable designation to the new tendency in the teaching of the law, scholars, up to the time of the final transcription of the Mishna, were known as *Tanna'im* (sing. *Tanna*, "teacher"), those who came after them, *Amora'im* (sing. *Amora*, "speaker"). The collection of the Amora'im, as finally recorded, was called, as stated above, Talmud, later Gemara: that of the Palestinian schools, the Palestinian Gemara, that of the Babylonian schools, the Babylonian Gemara. The combined edition of the Mishna and Gemara, or the Talmud in our sense of the word, discriminates, therefore, between Mishna and Palestinian Gemara, or "Palestinian Talmud", and Mishna and Babylonian Gemara or "Babylonian Talmud". The latter is meant when the Talmud without further specification is referred to.

III. THE MISHNA (משנה, "repetition", translated by the Fathers of the Church *δευτέρωσις*). The word is a substantive formation from the root שנה, "to repeat". From this meaning was developed, in the language of the later schools, the characteristic method of all teaching and learning, particularly of doctrines orally transmitted, which was accomplished by repeated enunciation on the part of the teacher and frequent repetition on the part of the pupil. Both expressions (שנה and משנה) thus became a term for the science of tradition, the former signifying the special study of orally transmitted law, the latter the law itself in contrast to מקרא (from קרא, "to read"), the written law. But the expression is also used for each of the doctrines orally transmitted, and differs from Halakha in that the latter signifies the traditional law so far as it is binding, while the former designates it as an object of study. Furthermore, the word Mishna is applied to the systematic collection of such doctrines, and finally to that collection which alone has attained canonical recognition, i. e. the collection of Jehuda I. This collection represents Jewish law codified in that development which it received in the schools of Palestine up to the end of the second century after Christ. Through it the orally transmitted law was finally established along with the written law or the Torah. The foundation of this collection is formed by the collections which already existed before Jehuda, particularly that of Rabbi Me'ir. The Mishna does not pretend to be a collection of sources of the Halakha, but merely to teach it. Whether its fixation in writing was the work of Jehuda himself or took place after him is a debated point; but the former is the more probable theory. The only question then is how much of it he wrote; in the extended form which it now presents it could not have been written by him alone. It has evidently received additions in course of time, and in other respects also the text has been altered.

As regards the subject matter the Mishna is divided into six institutes or *Sedarim;* for this reason Jews are accustomed to call the Talmud *Shas*. Each Seder has a number (7–12) of treatises; these are divided into chapters or *Peraqim*, and each chapter into precepts. The six institutes and their treatises are as follows:

A. *Seder Zeraʿim* (harvest), containing in eleven treatises the laws on the cultivation of the soil and its products.

(1) *Berakhoth* (benedictions) blessings and prayers, particularly those in daily use. (2) *Pe'a* (corner), concerning the parts of the fields and their products which are to be left to the poor (cf. Lev., xix, 9 sq.; xxiii, 22; Deut., xxiv, 19 sq.) and in general concerning the poor laws. (3) *Demai*, more properly *Dammai* (doubtful), concerning the fruits of the soil of which it is doubtful whether the tithes have been paid. (4) *Kil'ayim* (heterogenea), concerning the unlawful combinations of plants, animals, and garments (cf. Lev., xix, 19; Deut., xxii, 9 sq.). (5) *Shebiʿith* (seventh), i. e. Sabbatical year (Deut., xv, 1 sq.). (6) *Terumoth* (heave offerings) for the priests (Num., xviii, 8 sq.; Deut., xviii, 4). (7) *Maʿasroth* (tithes) for the Levites (Num., xviii, 21 sq.). (8) *Maʿaser shenî* (second tithe), (Deut., xiv, 22 sq.; xxvi, 12 sq.) which had to be spent at Jerusalem. (9) *Halla* (yeast) (cf. Num., xv, 18 sq.). (10) *ʿOrla* (foreskin) concerning uncircumcised fruits and trees (Lev., xix, 23). (11) *Bikkurim* (first fruits) brought to the temple (Deut., xxvi, 1 sq; Ex., xxiii, 19).

B. *Seder Moʿed* (season of feasts), treats in twelve treatises of the precepts governing rest on the Sabbath, the other feast and holy days, as well as fast days. (1) *Shabbath.* (2) *ʽErubin* (combinations), the means by which one could circumvent especially onerous provisions of the Sabbath laws. (3) *Pesaḥim* (Passover). (4) *Sheqalim* (shekels), treats of the tax of half a shekel for the maintenance of Divine service in the temple (cf. Neh., x, 33), based upon Ex., xxx, 12 sq. (5) *Yoma* (day), i. e. day of expiation. (6) *Sukka* (Tabernacle), treats of the feast of Tabernacles. (7) *Beca* (egg), taken from the first word with which the treatise begins or *Yom tob* (feast), is concerned with the kinds of work permitted or prohibited on festivals. (8) *Rosh hashana* (beginning of the year), treats of the civil new year on the first of Tishri (Lev., xxiii, 24 sq.; Num., xxix, 1 sq.). (9) *Taʽanith* (fast). (10) *Megilla* (roll) of Esther, respecting the laws to be observed on the feast of Purim. (11) *Moʽed qatan* (minor feast), the laws relating to the feasts intervening between the first and last days of the Passover and Sukkoth. (12) *Hagiga* (feast-offering), treats (chaps. i and iii) of the duty of pilgrimage to Jerusalem and the private offerings on such occasions (cf. Deut., xvi, 16 sq.).

C. *Seder Nashim* (women), elucidates in seven treatises the laws of marriage and all pertaining thereto, vows, and the marriage laws of the Nazarites. (1) *Jebamoth,* levirate marriages (Deut., xxv, 5 sq.). (2) *Kethuboth* ("marriage deeds" and marriage settlements). (3) *Nedarim* ("vows") and their annulment. (4) *Nazir* (Nazarite; cf. Num., vi). (5) *Sota* ("suspected woman"; cf. Num., v, 11 sq.). (6) *Gittin* (letters of divorce; cf. Deut., xxiv, 1 sq.). (7) *Giddushin* (betrothals).

D. *Seder Nezigin* ("damages"), explains in eight treatises civil and criminal law. In this institute are included the Eduyyoth, a collection of traditions, and the Haggadic treatise, Aboth.

The treatises 1–3, *Baba Kamma* (the first gate), *Baba meçiʽa* (the middle gate), and *Baba bathra* (the last gate), originally formed a single treatise, the subdivision of which was caused by its great length (30 chaps.). They treat of the laws of property, inheritance, and obligation. *Baba Kamma* treats of damages in a narrow sense (along with theft, robbery, and bodily injury) and the right to damages; *Baba meçiʽa* is concerned chiefly with legal questions in regard to capital and treats finding, deposits, interest and loans; *Baba Bathra* is concerned with questions of social polity (possessions, limitations, buying and selling, security, inheritance and documents). (4) *Sanhedrin,* i. e. *συνέδριον,* treats of the law courts, legal processes, and criminal justice. (5) *Makkoth* (stripes), treats of punishment by stripes legally acknowledged (cf. Deut., xxv, 1 sq.). (6) *Shebuʽoth* (oaths). (7) *ʽEduyyoth* (test), containing a collection of legal decisions gathered from the testimonies of distinguished authorities. (8) *ʽAboda Zara* (idolatry). (9) *ʽAboth* (fathers) or *Pirqe Aboth* (sections of fathers) contains ethical maxims of the *Tanna'im* (200 B. C.–A. D. 200). (10) *Horayoth* (decisions), concerning legal decisions and religious questions which were erroneously rendered.

E. *Seder Qodashim* (sacred things), treats in twelve treatises of the sacrifices, temple service, and dedicated objects (1) *Zebahim* (animal sacrifices). (2) *Menahoth* (meat offerings). (3) *Hullin* (things profane) of the sacrifice of pure and impure animals and of laws concerning food. (4) *Bekhoroth* (first born) of men and animals (cf. Ex., xiii, 2, 12 sq.; Lev., xxvii, 26 sq.; Num., viii, 16 sq.; xviii, 15 sq.; Deut., xv, 19 sq. (5) *ʽArakhin* (valuations), that is equivalents to be given for the redemption of persons and things dedicated to God (Lev., xvii, 2 sq., xxv, 15 sq.). (6) *Temura* (exchange) of a sacred object (Lev., xxvii, 10–33). (7) *Kerithoth* (excisions), concerning the sins punished by this penalty, and what was to be done when anyone intentionally committed such a sin. (8) *Meʽild* (violation) of a sacred object (cf. Num., v, 6 sq.; Lev., v, 15 sq.). (9) *Tamid* (continual sacrifice), concerning the daily morning and evening sacrifice and the temple in general. (10) *Middoth* (measurements), a description of the temple and of the temple service. (11) *Quinnim* ("nests" of birds), of the sacrifices of doves by the poor (Lev., i, 14 sq.; xii, 8).

F. *Seder Teharoth* (purifications), treats in twelve treatises of the ordinances of cleanness and of purifications. (1) *Kelim* (vessels), treats of the conditions under which domestic utensils, garments, etc., become unclean. (2) *Ohaloth* (tents) of the defilement of dwellings by a corpse (Num., xix, 14 sq.). (3) *Negaʽim* (leprosy). (4) *Para* (red heifer; cf. Num., xix). (5) *Teharoth* (purifications) (euphemistically), treats of the lesser degrees of defilement lasting only till sunset. (6) *Miqwaʽoth* (wells), the conditions under which wells and reservoirs are fit to be used for ritual purification. (7) *Nidda* (menstruation). (8) *Makhshirin* (preparers), the conditions under which certain articles, by coming in contact with liquids, become ritually unclean (Lev., xi, 34, 37, 38). (9) *Zabim* (persons afflicted with running issues; cf. Lev., xv). (10) *Tebul yom* (immersed at day), i. e. the condition of the person who had taken the ritual bath, but who has not been perfectly purified by sunset. (11) *Yadâyim* (hands), treats of the ritual uncleanness of the hands and their purification. (12) *ʽUqcin* (stalks) of fruits and shells and their ritual uncleanness.

In our editions the number of treatises is sixty-three; originally there were only sixty, because the four paragraphs of the treatise Baba kamma, Baba bathra, Baba meciʽa, likewise Sanhedrin and Makkoth, formed only one treatise. The Mishna exists in three recensions: in the manuscripts of editions of the separate Mishna, in the Palestinian Talmud in which the commentaries of the Amora'im follow short passages of the Mishna, and in the Babylonian Talmud, in which the Gemara is appended to an entire chapter of the Mishna. The contents of the Mishna, aside from the treatises Aboth and Middoth, are with few exceptions Halakhic. The language, the so-called Mishna Hebrew or New Hebrew, is a fairly pure Hebrew, not without proof of a living development—enriched by words borrowed from Greek and Latin and certain newly-created technical expressions, which seem partly developed as imitations of Roman legal formulas. The Mishna is cited by giving the treatise, chapter, and precept, e. g. 'Berakh, i, 1.

Among the commentators of the whole Mishna the following deserve special mention: Maimonides, the Hebrew translation of whose Arabic original is printed in most editions of the Mishna; Obadia di Bertinoro (d. 1510), Jom Tob Lippmann Heller (d. 1654), Jisrael Lipschütz (his Mishna with commentary תפארת ישראל (6 vols., Königsberg, 1830–50).

The first edition of the complete Mishna was at Naples in 1492. Texts with Hebrew commentaries exist in great numbers. Of importance as a confirmation of the Palestinian version is the edition of W. H. Lowe (Cambridge, 1883), after the Cambridge manuscript. Also deserving of mention are: "Misna . . . Latinitate donavit G. Lurenhusius" (text, Latin translation, notes, Latin translation of Maimonides and Obadia, 6 vols., Amsterdam, 1698–1703); "Mishnajoth", with punctuation and German translation in Hebrew letters, begun by Sammter (Berlin, 1887—still incomplete); Ger. tr. of the Mishna by Rabe (6 parts, Onolzbach, 1760–63).

IV. The Palestinian Talmud.—On the basis of the Mishna, juridical discussions were continued, at first in the schools of Palestine, particularly at Tiberias, in the third and fourth centuries. Through the final codification of the material thus collected, there arose in the second half of the fourth century the so-called Jerusalem, more properly Palestinian, Talmud. The usual opinion, which originated with Maimonides, that its author was Rabbi Jochanan, who lived in the third century, is untenable because of the names of the later scholars which occur in it. In the Palestinian Talmud the text of the Mishna is taken sentence by sentence, and explained with increasingly casuistic acumen. The Baraithoth, i. e. the maxims of the Torah not found in the Mishna, as well as the legal paragraphs are always given in Hebrew, and so are most of the appended elucidations; the remainder is written in a West Aramaic dialect (G. Dalman, "Grammatik des jüdisch-Palästinischen Aramäisch", Leipzig, 1905). Along with the Halakha it contains rich Haggadic material. Whether the Palestinian Talmud ever included the entire Mishna is a matter of dispute. The only parts preserved are the commentaries on the first four Sedarim (with the exception of several chapters and the treatises Eduyyoth and Aboth) and on the three first divisions of the treatise Nidda in the sixth Seder. The supposed discovery by S. Friedländer of treatises on the fifth Seder is based upon a forgery (cf. "Theologische Literaturzeitung", 1908, col. 513 sq., and "Zeitschr. d. Deutsch. Morgenländisch. Gesellsch.", LXII, 184). The Palestinian Talmud is generally cited by giving the treatise, chapter, page, and column after the Venetian and Cracow editions, mostly also the line, indicated by *j* (= jerus.) or pal.; e. g. pal. Makkoth, 2 Bl. 31^d 56. Many scholars cite in the same manner as for the Mishna, but this is not to be recommended.

Editions: Venice (Bomberg), 1523–24; Cracow, 1609; Krotoshin, 1866; Zhitomir, 1860–67; Piotrkow, 1900–02. French translation by M. Schwab, 11 vols., Paris, 1879–80; I^2 1890.

Several treatises are printed with Latin translations in Ugolini, "Thesaurus antiquitatum sacrarum", vols. XVII–XXX, Venice, 1755–65; Wünsche, "Der palästinische Talmud in seinen haggadischen Bestandteilen ins Deutsche übersetzt" (Zurich, 1880).

V. Babylonian Talmud.—The Mishna is said to have been brought to Babylon by Aba Areka, generally called Rab (d. 247), a pupil of Rabbi Jehuda. In the schools there it became a norm of legal religious life and a basis of juridical discussion. But while in Palestine there was a greater tendency to preserve and propagate what had been handed down, the Babylonian Amora‘im developed their interpretation of the law in all directions, which explains why the Babylonian Talmud acquired a greater significance for Judaism than the Palestinian. Thus the material grew rapidly and gradually led to a codification, which was undertaken by R. Ashi (d. 427), head of the school at Sura, and by R. Abina or Rabbina (d. 499), the last of the Amora‘im. The scholars who lived after him (at the end of the fifth and in the first half of the sixth centuries), called *Sabora‘im* ("those who reflect, examine", because they weighed and also completed what had been written by the Amora‘im), are to be regarded as those who really completed the Babylonian Talmud.

Like the Palestinian, the Babylonian Talmud does not include the entire Mishna. In the first and sixth divisions only the treatises Berakhoth and Nidda are considered; in the second division Shegalim is omitted, in the fourth Eduyyoth and Aboth, in the fifth Middoth, Ginnim, and half of Tamid. It is indeed questionable if the greater number of these treatises were included in the Babylonian Gemara; Eduyyoth and Aboth are excluded, by reason of the subject matter, while the remainder treat for the most part ordinances which could not be applied outside of Palestine. The Babylonian Talmud therefore includes only 36½ treatises, but is at least four times the extent of the Palestinian, although the latter deals with 39 treatises. The Haggada is even more fully represented than in the Palestinian. The language, excepting the legal paragraphs and the quotations of the older scholars and Palestinian rabbis, is that of the East Aramaic dialect of Babylonia (cf. Levias, "A Grammar of the Aramaic Idiom contained in the Babylonian Talmud", Cincinnati, 1900; M. L. Margolis, "Grammatik des babylonischen Talmuds", Munich, 1910). The Babylonian Talmud is cited according to treatise, folio, and page, as the content in nearly all the editions since that of the third Bomberg one (1548) is the same, e. g. Berakh 22^a. In these editions there are usually appended at the end of the fourth Seder seven small treatises, partly from Talmudic, partly from post-Talmudic times, among which is the post-Talmudic treatise Sopherim (directions for the writer and public reader of the Torah). Among the commentaries the first place belongs to that of Rashi (d. 1105), completed by his grandson Samuel ben Me‘ir (d. about 1174). Chiefly of a supplementary character are the works of the Tosaphists or authors of the *Tosaphoth* (additions), who lived in France and Germany during the twelfth and thirteenth centuries. They give amplifications and learned explanations of certain treatises. Other commentaries are enumerated by Strack, op. cit. infra, 149–51.

The Babylonian Talmud has often been printed, but until the present time a critical edition has remained a desideratum. Material for this purpose is furnished by Raphael Rabbinovicz, among others, in his "Variæ lectiones in Mischnam et in Talm. Babyl.", etc. (15 vols., Munich, 1868–86); Vol. XVI was edited by Ehrentreu (Przemysl, 1897). Serious mutilations and bungling changes in the text were caused by the Christian censorship, at first in the Basle edition (1578–81). The numerous bickerings among the Jews had the further consequence that they themselves practised censorship. The excised passages were partly collected in small treatises, published for the most part anonymously.

Editions.—Raphael Rabbinovicz, מאמר על הדפסת התלמוד (*Ma’amar ‘al hadpasath ha-talmud*), (Munich, 1877), a critical review of the editions of the Babylonian Talmud, as a whole or in part since 1484. The first complete edition appeared at Venice (Bomberg), (12 vols., 1520–23). The advantage of this edition consists in its complete character; the text itself is full of errors. A certain reputation is enjoyed by the Amsterdam edition (1644–48), in which the censured passages have been as far as possible restored. The edition of Frankfort (1720–22) served directly or indirectly as a basis for those which followed. Of the later editions may be mentioned those of Berlin (1862–68), Vienna (1864–72), and Vilna (1880–86). A quarto edition, the text after the *editio princeps*, with the variants of the Munich manuscripts and a German translation, was begun by Lazarus Goldschmidt in 1897. Up to date 6 vols., containing the Institutes I, II, IV, V, and the two first treatises of III, have appeared. Unfortunately this publication is by no means faultless. M. L. Rodkinson, "New Edition of the Babylonian Talmud", New York, 1896; M. Mielziner, "Introduction to the Talmud" (Cincinnati, 1894; New York, 1903); M. L. Rodkinson, "The History of the Talmud" (New York, 1903); H. L. Strack, "Einleitung in den Talmud" (Leipzig, 1908), pp. 139–175, containing an extensive bibliography of the Talmud and of the questions concerning it.

F. Schühlein.

Talon, Jean, first intendant in exercise of New France, b. at Châlons-sur-Marne, 1625, of Philippe and Anne Beuvy; d. at Versailles, 23 Nov., 1691. After studying at the Jesuit college of Clermont, in Paris, he embraced the career of military administration, beginning as war commissary in Flanders (1654), where he acted as intendant to Turenne's army. His success won Cardinal Mazarin's favour, and he was promoted (1655) Intendant of the Province of Hainaut Louis XIV and Colbert being determined to save Canada, then in great distress, Talon was appointed intendant the same day (23 March, 1655) that Courcelles became Governor of New France. They, with Tracy, lieutenant-general of all the French possessions in America, formed a powerful triumvirate. Talon's faculties were most ample, comprising justice, police, and finance. Reaching Quebec in 1665, he immediately began colonizing in the neighbourhood. In 1666 he had the first Canadian census taken; it gave only 3215 souls. Had his colonization policy been adopted, New France would have had 500,000 inhabitants in 1760, instead of only 60,000. Talon shared the glory of Tracy and Courcelles's expedition against the Iroquois (1666), by the preparation that had alone rendered it possible. He consented to remain after the two years of his term of office. The annexation of the New Netherlands to the French domain, which he suggested to Colbert, was not favoured by the king. He concurred (1666) in reorganizing the Sovereign Council and in reforming the petty courts. By his plan of grouping settlers round the city, a defence corps of volunteer militia would have dispensed with reinforcements of regular troops. Three years of Talon's administration had renewed the face of the country. Agriculture had progressed, cod and seal fishing were developed, shipbuilding began to thrive, and trade with the Antilles was inaugurated.

After returning to France (1668) he strove to promote Canada's interests. Reappointed in 1670, he brought with him freedom of trade. He sent explorers north, west, and south. St-Lusson took possession of Lake Superior. Forts were built and the Kennebec route opened between Quebec and Acadia, lately restored to France by the treaty of Breda. Father Albanel and his party reached James Bay and planted the cross in the far north. Jolliet, charged by Talon to find the north-west passage, discovered the Mississippi. At Talon's bidding, New France set her seal on the three-fourths of North America. He returned to France in 1672, after having, during his last weeks in office, created many seigniories for officers of the Carignan regiment, thereby contributing to the development of colonization and to the foundation of an aristocracy. During his seven years of office Talon had realized the programme he had traced in 1665. By establishing administrative and judiciary institutions that lasted throughout the entire French regime, by encouraging industry and commerce, fostering charitable works, creating new centres of population, and fortifying the colony's frontiers he prepared the way with remarkable foresight for the future development of the country, and ranks among the foremost makers of Canada. Louis XIV created him Count d'Orsainville (1675), honouring him with several important dignities and ample emoluments. Talon generously aided James II in his efforts to regain his throne, likewise assisting the exiled followers of the Stuarts. Naturally influenced by the Gallican spirit of his age, he was inclined to overmagnify the royal authority in its centralizing and domineering attitude towards the Church. His excessive zeal for the financial prosperity of the State caused him to resent unreasonably the wise restrictions imposed by Bishop Laval on the liquor traffic with the Indians.

Lionel Lindsay.

Talon, Nicolas, French Jesuit, historian, and ascetical writer, b. at Moulins, 31 August, 1605; d. at Paris, 29 March, 1691. Entering the Society in 1621, he taught literature for several years, with remarkable success. After his ordination he gained some reputation as a preacher, was a devoted worker in the prisons and hospitals of Paris, and served as army-chaplain with the French troops in Flanders, winning the admiration and love of the men and the life-long friendship of the Prince de Condé. He assisted the notorious Aimé du Poncet during his painfully protracted execution. Thanks to Talon's gentleness, the terrible outlaw died penitent and resigned. This striking conversion made a profound impression. As a writer, Talon had original, if not always correct, views, a lively imagination, a quaint and comparatively pure and elegant style. Besides his "Oraison funèbre de Louis XIII" (Paris, 1644), a "Description de la pompe funèbre du Prince de Condé" (Paris, 1646), and some books of minor importance, Talon wrote "La vie de St. François de Sales" (Paris, 1640), "La vie de St. François Borgia" (Paris, 1671), "Les peintures chrétiennes" (Paris, 1667 according to Weiss, 1647 according to Sommervogel), and a Bible history, the first part of which, "Histoire sainte", was published at Paris in 1640. The author's purpose was to interest his readers in the Old-Testament story. The book became popular and was several times reprinted, notably in a fine Cramoisy edition (1665). The Marquis of Winchester gave an English translation in 1653. Talon's "Histoire sainte" is deficient in taste and critical judgment; it is a romance, not a reliable exposition of facts. Its methods, if not as objectionable as Berruyer's in his "Histoire du peuple de Dieu", are unsound. The author published a sequel, "L'histoire sainte du Nouveau Testament" (Paris, 1669). It met with little success. Talon's portrait has been engraved by Heer. Sommervogel mentions 300 of his letters in the d'Aumale collection at Chantilly.

John C. Reville.

Talon, Pierre, a French-Canadian explorer, b. at Quebec, 1676, of Lucien and Isabelle Planteau; d. in France in the first half of the eighteenth century. His entire family had just emigrated to France, when they were all engaged to follow Cavalier de La Salle in his attempt to colonize Louisiana (1684). Shortly after landing there, Pierre Talon was sent to learn the language of the Cenis Indians, and spent six years in their country about one hundred leagues inland at the limit of La Salle's discoveries. After the murder of the latter by one of his party, and the massacre of many of the colonists, in their first settlement by the Clamcoët Indians, the country was occupied by the Spaniards. Talon's father had perished in the woods, but his brothers and sisters had been saved by Indian women. They all followed the invaders to New Spain, first to San Luis Potosi; and then to Mexico City, where they spent ten years. The viceroy took them all into his palace as servants and treated them well. Talon and his brother Jean-Baptiste enlisted as Spanish marines and embarked at Vera Cruz. When their vessel was captured by Captain Desaugurs, they begged to be sent back to Spain, but were enrolled in the Fouguerolles company of French marines. Talon, in his evidence sworn at Brest (1698), gives abundant details regarding the character, customs, and religious rites of the Indian tribes with whom he had lived, as well as of the fauna and flora of the southern portion of the continent. The tribes he mentions are inscribed under the following names: Clamcoëts, Temerlouans, Tohos, Cenis, Ayennys, Amalchams, Canotinos, Paouitas, and Chomans. There is a great probability, although Talon cannot affirm it as certain, that one of the rivers seen by him during his intercourse with the Indians was the Mississippi which La Salle's premature death prevented the discoverer from seeing again.

Tamanac Indians, a formerly important tribe of Cariban linguistic stock occupying the territory about the Cuchivero River, a tributary of the lower Orinoco, Venezuela. In 1749 they were in part, together with a part of the Saliva, gathered into the mission of San Luis del Encaramada (briefly Encaramada), established in that year by the celebrated Jesuit missionary and historian, Father S. Gilii, on the east bank of the Orinoco, some distance above the Apure. Father Gilii resided with the tribe for eighteen years until the expulsion of the order, when the Jesuit missions of the Orinoco were turned over to the Franciscans. Change of administration, disorders of the revolutionary period and governmental neglect ruined the missions, while frequent fever epidemics and terrible losses during the War of Independence decimated the Orinoco tribes, and as early as 1840 the Tamanac were virtually extinct with the exception of a few scattered individuals. In culture and mode of living the Tamanac resembled the Maipure. They had a lengthy genesis myth, with a deluge, in which a man and a woman saved themselves by climbing to the top of a high mountain called Tamanaca and miraculously created a new human race from the fruit of the mauritius palm. Hence the name of the tribe. Their great culture hero was Amalivaca, who came to them in a boat from over the eastern ocean and finally returned in the same way, after carving numerous sacred pictographs upon now inaccessible cliffs in the Tamanac country. Hence the missionaries were supposed by some of the Indians to be messengers from their lost culture hero and benefactor. (See also Maipure; Saliva.)

James Mooney.

Tamassus, a titular see in Cyprus, suffragan of Salamis, was situated in the great central plain of the island, south-west of Soli, on the road from Soli to Tremithus. As there were copper mines in the neighbourhood, it is very probably the Temese, mentioned by Homer (Odyssey, I, 184), which was in his time the principal copper market of the island. To-day the three villages of Pera, Episkopio, and Politiko occupy the former site. The coins warrant our use of the spelling, Tamassus. According to the legends of Saints Barnabas and Auxibius, the first consecrated bishop was St. Heraclides, later transferred to Salamis, where he was succeeded by St. Myron, like himself a martyr (27 September). Three other bishops are mentioned: Tychon present at the Council of Constantinople, 381; Epaphroditus at the Council of Chalcedon, 451; Nicetas in 1210. The see was suppressed by the Latins in 1222, and never re-established.

S. Pétridès.

Tamaulipas, Diocese of (Civitatis Victoriæ sive Tamaulipensis), in the Mexican Republic, suffragan of Linares. Its area is that of the state of the same name, 31,758 sq. miles, besides two parishes in the northern part of the State of Vera Cruz; it has a population of 249,253 (Census of 1910). The residence of the bishop and governor is in Ciudad Victoria, 2467 feet above sea level, which has a population of 17,861 inhabitants (1910). Father André Olmos, who was the first to preach the Gospel in the region now known as the above bishopric, came from Burgos, Spain, in 1528, and worked until 1571, when he died at Tampico, beloved by all. In 1530 the Franciscan Fathers founded the Guardianship of San Salvador, which comprised twelve convents, and were almost all situated in the territory now known as the State of Tamaulipas; a few of these convents, however, were situated outside of this territory, for instance, that of Ozuloama, which is now a parish, and which, although situated in the State of Vera Cruz, belongs to the Bishopric of Tamaulipas. In 1748 the Fathers of the Apostolic College of Nuestra Señora de Guadalupe de Zacatecas took charge of the missions; these were placed in the hands of the Fathers of the Province of Santo Evangelio de Mexico in 1768. This see was planned as early as 1722. In 1860 Pius IX made a vicariate Apostolic of the territory, and in 1869 the pope's Bull "Apostolicum in Universas Orbis Ecclesias" raised it to the rank of a bishopric, naming Ciudad Victoria as its episcopal see, and making it suffragan of Mexico. When the new Archbishopric of Linares (or Monterey) was created in 1891 it became part of it, and so remains to this day.

There are no seminaries in this bishopric, priests and rectors being furnished by the Diocese of Zamora and others. It is credited, however, with 3 parochial schools, and 6 Catholic colleges with 700 students; there are 10 Protestant colleges, numbering about 500 students, and 14 Protestant churches. The episcopal city of Ciudad Victoria was founded in 1750 under the name of Santa Maria del Refugio de Aguayo, and has been known by its present name only since 1825.

Camillus Crivelli.

Tamburini, Michelangelo, fourteenth General of the Society of Jesus, b. at Modena, 27 Sept., 1648; d. 28 Feb., 1730. After having taught Scholastic philosophy and theology for twelve years, he was successively made rector of several colleges, was chosen by Cardinal Reynold of Este as his private theologian, held the offices of secretary general and vicar to Thyrsus Gonzalez, and finally, on the latter's death, was elected general on 3 Jan., 1706, a post which he occupied till his death. The reputation for solid virtue, patience, and courage, which he had acquired in the different grades of his order, was by no means dimmed in the long years of his generalate. During Tamburini's superiorship, the apostolic activity of the Society was at its best; but, at the same time, could be seen signs of the storm which was, half a century later, to annihilate it. The Reductions of Paraguay were beginning to bear fruit; missionaries were laying down their lives for the pest-stricken in the Levant or were pushing into the steppes of Tibet amid untold hardships. Peter the Great, desirous of giving his barbarous subjects the benefits of true religion and genuine civilization, admitted the Jesuits into Russia. Jansenism, the Society's bitterest foe, received its death-blow in 1708 by a Bull of Clement XI ordering the suppression of Port-Royal. Three Jesuits, Tolomei, Cienfuegos, and Salerno, were, in short succession, raised to the dignity of the cardinalate. John Francis Regis was beatified, Aloysius of Gonzaga and Stanislaus Kostka were given the honours of the altar. At the same time, future saints (St. Francis de Hieronymo and Bl. Anthony Baldinucci in Italy, Emmanuel Padial in Spain) were labouring with extraordinary success for the salvation of souls. But at this period, too, the debate over the Chinese Rites was at its height.

The Jesuit missionaries in China had been accused of not obeying the orders of the Supreme Pontiff. Tamburini, though naturally of a gentle disposition, could be firm when the honour of the Society was at stake. In the name of all the assistants and procurators gathered at Rome, he protested to Clement XI the fidelity and obedience of the whole Society to the Vicar of Christ. Thus ran the finishing sentence of his declaration: "But if, which God forbid, there be anyone among us who should harbour other thoughts or breathe other sentiments—for, where the number of subjects is so large, human prudence finds it difficult to prevent or hinder all such things—the General, in the name of the Society, declares, assures and protests that we reprove and reject him even now, that he is worthy of chastisement, and that he cannot be regarded as a true and legitimate son of the Society of Jesus".

A. C. COTTER.

Tamburini, THOMAS, moral theologian, b. at Caltanisetta in Sicily, 6 March, 1591; d. at Palermo, 10 October, 1675. He entered the Society of Jesus when fifteen years old; there he became distinguished for extraordinary virtue and a rare talent for teaching. After a successful course of studies, he held the professorship of philosophy four years, of dogmatic theology seven years, of moral theology seventeen years, and during thirteen years was rector of various colleges. His writings are: "Methodus expeditæ confessionis" (5 vols., Rome, 1647); "De communione" (Palermo, 1649); "Explicatio decalogi" (Venice, 1654, 1707; Milan, 1655; Munich, 1659); "De sacrificio missæ" (3 vols., Antwerp, 1656); "De bulla cruciata" with other works (Palermo, 1663); "Juris divini, naturalis et eccles. expositio" (3 vols., Palermo, 1659–60). All these works exhibited solidity of doctrine and elegance of style and went through several editions. Though severe towards himself, Tamburini, when deciding cases of conscience for others, was inclined to follow the milder views which he found reputable authors declaring probable. This is the basis of the accusation of laxity frequently brought against him, and led to his controversy with Vincent Baron. Tamburini published a refutation of the attacks of his adversary under the title, "Germana doctrina R. P. Th. Tamburini, S.J." In determining the value of Tamburini's works, it is well to recall the criticism of St. Alphonsus Liguori in his "Theologia Moralis": "Let us add a word about this author [Tamburini], who is not estimated by many at his full value. It cannot be denied that he was apt to consider some opinions probable which do not deserve that note; hence he must be used with caution. But when Tamburini establishes his own opinions, he shows that he is a thorough theologian and solves the questions by reducing them to their last principles. Competent judges will find that the opinions which he then sets down as the more tenable are in the majority of cases the more correct".

JOHN M. FOX.

Tametsi (ALTHOUGH), the first word of ch. i, sess. 24, De Ref. Matr., of the Council of Trent. This chapter contains the legislation of the Church which was in force until Easter, 1908, concerning clandestine marriage. It decrees thus: Those who attempt to contract marriage otherwise than in the presence of the parish priest or of another priest delegated by him or by the ordinary, and before two or three witnesses, the holy synod renders wholly incapable of contracting and declares such contracts null and void. The reader is referred to the article CLANDESTINITY for a complete study of this decree. In a modified form the prescriptions of "Tametsi" were extended to the universal Church by the decree "Ne temere". The chapter "Tametsi" declares that clandestine contracts of marriage freely entered into are valid, unless rendered null by the non-observance of regulations made by the Church, and anathematizes those who hold the contrary, as well as those who falsely assert the invalidity of a marriage contracted without parents' consent, or who affirm that parents by their approval or disapproval may affect the binding force of such contracts. It is declared, however, that the Church has always disapproved of marriages contracted secretly, or without the consent of parents. This same chapter of the Tridentine Council prescribes the promulgation of the banns of marriage, which is a repetition of the Fourth Lateran Council, the form expressing consent to be used and the inscribing of the marriage in the parochial register. It declares also that any priest, secular or regular, other than the pastor, assisting at a marriage or giving the solemn nuptial blessing without proper delegation is suspended at once and remains under suspension till rightly absolved by the ordinary of the parish priest of the contracting parties. This censure, however, is no longer incurred, though punishment may be meted out to those who offend in this matter. Finally, "Tametsi" recommends that those about to marry approach the Sacraments of Penance and the Eucharist, and that local customs and rites connected with marriage be observed. (See also MARRIAGE, MORAL AND CANONICAL ASPECT OF.)

ANDREW B. MEEHAN

Tamisier, MARIE-MARTHE-BAPTISTINE (called by her intimates EMILIA), initiator of international Eucharistic congresses, b. at Tours, 1 Nov., 1834; d. there 20 June, 1910. From her childhood her devotion to the Blessed Sacrament was extraordinary; she called a day without Holy Communion a veritable Good Friday. In 1847 she became a pupil of the Religious of the Sacred Heart at Marmoutier, remaining there four years. Without any special attraction for the life of a religious she made three unsuccessful attempts to enter it; the third was in the Convent of Perpetual Adoration founded by Ven. Père Eymard, who assured her she still belonged to our Lord in the Blessed Sacrament. A lady of wealth sought her aid in establishing a community of perpetual adoration but this plan also came to naught. She then (1871) went to live near the tomb of Blessed Jean Vianney at Ars. Coming under the direction of Abbè Chevrier of Lyons she found her true vocation, at once contemplative and active, in the Eucharistic cause. She had been prepared for it by many trials and disappointments. Throughout France and beyond, by extensive correspondence and by travel she spread the devotion. With the help of Mgr de Ségur and Mgr

Richard, then Bishop of Belley, pilgrimages were started to sanctuaries where Eucharistic miracles had taken place. Their success led to Eucharistic congresses. At the Lourdes Congress she was called the Jeanne d'Arc of the Blessed Sacrament, but her name was not publicly associated with the congresses until after her death. Canon Vaudon's history of the congresses published just before her death, though giving a detailed account of her apostolic career, calls her only "Mlle . . . ". She lived for some years at Issoudun and ministered there to the Shrine of Our Lady of the Sacred Heart. All her spare means, though often depriving herself, she devoted to the education of poor aspirants to the priesthood.

Mlle Tamisier in *The Sentinel of the Blessed Sacrament* (New York, July, 1911); Vaudon, *L'Œuvre des Congrès Eucharistiques* (Paris and Montreal, 1910); *L'Idéal* (Paris, 1910).

B. Randolph.

Tanagra, a titular see in Hellas, suffragan of Corinth; it was a town of Bœotia, in a fertile plain on the right bank of the Æsopus. It was also called Poemandria and its territory Poemandris. In 457 B. C. the Athenians were defeated near Tanagra by the Lacedæmonians, but early in the following year they in turn defeated the Bœotians, thereby becoming masters of Bœotia. The city walls were destroyed. In 426 the Athenians invaded the territory of Tanagra and defeated the Tanagrians and Bœotians. The people of Tanagra were noted for their frugality, loyalty, and hospitality. Their land yielded little wheat, but the best wine in Bœotia, and the town was also noted for its fighting-cocks. Under Augustus Tanagra and Thespiæ were the chief towns of Bœotia. It had numerous temples, one of Dionysius with a famous statue by Calanus and a remarkable Triton, other temples of Themis, Aphrodite, Apollo, Hermes Criophorus, and Hermes Promaclius. The gymnasium contained a portrait of the poetess, Corinna, who was born at Tanagra and commemorated there by a monument. Pliny calls Tanagra a free state. It was still important in the sixth century, but must soon after have been destroyed by Slavic invasions. A station on the railway between Athens and Thebes is now called Tanagra; it connects with the village of Skimatari (650 inhabitants), about eight miles south of which are the ruins of the ancient town including the acropolis, necropolis etc. Excavations have made the tombs famous for the pretty little terra-cotta figurines which they contain. Duchesne has published ("Bulletin de correspondance hellénique", III, Paris, 1879, 144) a Christian inscription dating from the fifth or sixth century. Only one bishop is known, Hesychius, who in 458 signed the letter from the provincial synod to the Emperor Leo (Le Quien, "Oriens Christ.", II, 212); the other bishop mentioned by him belongs to another see.

Tanagra Figurine

Smith, *Dict. of Greek and Roman Geog.*, s. v.

S. Pétridès.

Tancred, Prince of Antioch, b. about 1072; d. at Antioch, 12 Dec., 1112. He was the son of Marquess Odo and Emma, probably the daughter of Robert Guiscard. He took the Cross in 1096 with the Norman lords of Southern Italy and joined the service of his uncle Bohemund. Having disembarked at Arlona (Epirus), they marched towards Constantinople, and Tancred soon attracted attention by his activity, bravery, and somewhat undisciplined zeal; according to his biographer, Raoul de Caen, he was noted also for his humanity and kindness towards the defenceless. He brilliantly repulsed the Byzantine army which attacked him as he was crossing the Vardar (28 Feb., 1097), from which time Tancred became and remained the bitter enemy of the Greeks. Unlike Bohemund, he was the only one of all the leaders who refused to take the oath of fidelity demanded by Alexis Comnenus. He played an important part in the siege of Nicæa, and later, during the difficult march through Asia Minor, he led the way southwards and captured Tarsus which Baldwin tried in vain to wrest from him (Sept., 1097). While Baldwin advanced towards the Euphrates, Tancred seized the towns of Cilicia. He took an active part also in the siege of Antioch. In the march on Jerusalem he commanded the vanguard, and on 15 July, 1099, he entered the city, after making a breach in the gate of St. Stephen. He vainly endeavoured to save the lives of 300 Mussulmans who had taken refuge in the Mosque of Omar (*Templum Domini*). On the other hand he looted the treasures amassed in that building and distributed them among his knights. He received from Godfrey de Bouillon, who had been selected over him as king, the fiefs of Tiberias and Caïfa. When Bohemund was captured by the Turks in July, 1100, Tancred assumed the government of the Principality of Antioch, and extended its boundaries at the expense of the Turks and the Greeks. During the war between Bohemund and Alexis Comnenus (1104–08), Tancred defended both the Principality of Antioch and the Countship of Edessa; he also strengthened the Christian power in those districts, and refused to recognize the Treaty of Durazzo by which Bohemund had ceded the suzerainty of Antioch to the emperor. A skilled politician, he knew how to placate the Greeks and issued Greek money on which he is represented adorned with gold and jewels, wearing a turban surmounted by a cross.

Louis Bréhier.

Taney, Roger Brooke (pronounced Tawney), fifth chief justice of the Supreme Court of the United States, b. in Calvert County, Maryland, 17 March, 1777; d. at Washington, 12 October, 1864. His father, Michael Taney, was a gentleman of Catholic ancestry and education, and his mother, Monica Brooke, was also a Catholic. He was educated at private schools and by tutors until 15 years old, when he entered Dickinson College, Carlisle, Pennsylvania. He obtained his B. A. in 1795, and in the spring of 1796 went to Annapolis to read law in the office of Jeremiah Townley Chase, one of the chief justices of the General Court of Maryland. Early in 1799 he was admitted to the bar. Returning to his father's home in Calvert County to practice his profession, he shortly afterwards was elected to the House of Delegates, being then scarcely twenty-three years of age and the youngest member of the Assembly. In March, 1801, he went to Frederick to establish himself better in his legal practice, having been defeated for re-election to the Legislature from Calvert County. He was a candidate for member of the House of Delegates from Frederick county in 1803 on the Federal ticket, but, the county being strongly Republican, he was again defeated. On 7 January, 1806, he married Anne Phoebe Charlton Key, only daughter of John Ross Key, and sister of Francis Scott Key, a law student with Taney, at Annapolis, who afterwards wrote the "Star-spangled Banner".

When General Wilkinson, then Commander-in-Chief of the United States Army, was tried before a court martial, convened at Frederick in 1811, on charges of being an accomplice of Aaron Burr, Taney was one of the counsel in his defence, and, together with John Hanson Thomas, succeeded in winning his acquittal. Both refused any fee for their service because they had shared the suspicion against the accused. Taney was defeated on the Federal ticket for member of the House of Representatives of the United States, but in 1816 was elected to the state Senate. At the March term, 1819, of the Frederick County Court, he successfully defended Jacob Gruber, a Methodist minister, who was indicted for inciting slaves to the disturbance of the peace of the state. In 1823, he moved to Baltimore, and was soon recognized as the leading lawyer of that city, being appointed in 1827 by Governor Kent as Attorney-General of Maryland, upon the unanimous recommendation of the Baltimore bar. President Andrew Jackson, a warm admirer of Taney, appointed him Attorney-General of the United States on 21 June, 1831, and, upon the refusal of William J. Duane, Secretary of the Treasury, to remove the government deposits from the United States Bank, the president removed Duane from office on 23 Sept., 1833, and, on the same day, appointed Taney in his stead. The latter assumed the duties of the secretaryship on the following day, and two days later gave the order for the removal of the deposits to take effect on the first of October following. His appointment to the office of Secretary of the Treasury having been made during a recess of Congress, his nomination was sent to the Senate by the president on 23 June, 1834, and was rejected after a heated debate. This was the first time in the history of the Government that a cabinet officer appointed by a president had been rejected. Taney immediately submitted his resignation to President Jackson, and the latter accepted it with much regret. Judge Gabriel Duvall of Maryland, an associate justice of the Supreme Court of the United States, resigned in 1835, and President Jackson nominated Taney in his stead, but the nomination was not brought up in the Senate until the end of the session, and was then indefinitely postponed, which amounted to a rejection. This was due to the fact that the Senate as then constituted was violently opposed on political grounds to the president. In the same year Jackson again named Taney for a place on the Supreme Bench, this time as Chief Justice Marshall's successor. The nomination was strongly opposed by Senators Webster and Clay, but was finally confirmed on 15 March, 1836, by a majority of fourteen votes.

In the outbreak of yellow fever of 1855, Justice Taney's wife, who never became a Catholic, was stricken and died at Old Point Comfort on 29 September, and their youngest child died the following day. The most famous case decided by the Supreme Court during Chief Justice Taney's incumbency was that of Dred Scott *v.* John F. A. Sanford, the opinion in which, delivered by Taney, has been much misquoted and misunderstood. Chief Justice Taney did much towards the building up of the system of practice in the Supreme Court, framing it after that of the English courts, yet so modified as to be adaptable to the changed conditions existing in the United States. His opinions were arrived at rather by deep reflection and application of established legal principles to the questions presented to him than through exhaustive research of authorities. While giving due respect to former decisions, he did not rely slavishly upon precedents. By his dignified, though kindly, bearing, he always commanded the utmost respect for his Court. He had few, if any, personal enemies, and the purity of his private life was never questioned, even by his political opponents. Early in life he manumitted the slaves inherited from his father, and as long as they lived, he provided for the older ones by monthly pensions. He was buried at Frederick by the side of his mother's grave, in accordance with his own request. There is a handsome statue of him in Mount Vernon Place, Baltimore.

J. P. W. MCNEAL.

Tanguay, CYPRIEN, genealogist, b. at Quebec, 1819; d. 1902. After a course of classics and theology at Quebec Seminary, he was ordained in 1843. The first twenty-two years of his priesthood were devoted to parochial work, especially at Rimouski, where he greatly contributed to the foundation of the future diocesan seminary. His early taste for genealogical studies fully manifested itself after his official appointment to the Dominion Statistics Department (1867). His whole time was henceforth spent in consulting and compiling parochial and historical records throughout Quebec, the Maritime Provinces, Ontario, and the old French settlements in the United States. He also twice visited France for the same purpose. As the result of his labours he published (1871–90) his "Dictionnaire généalogique des familles canadiennes françaises depuis les origines de la colonie jusqu'à nos jours", comprising seven large double column volumes of over six hundred pages: a colossal undertaking, fit for a numerous body of collaborators, which he achieved alone. Although he was unable to realize the latter part of his programme entirely and many inaccuracies have crept into his work, yet on the whole it is highly reliable and almost unique. Every French Canadian by completing from contemporary registers the information supplied by this dictionary can proudly trace back his genealogy to his ancestors from old France. It has proved valuable for the discovery of canonical impediments to marriage through relationship, and has given birth to a copious genealogical literature of less comprehensiveness. In recognition of his labours the author received a prelature from Leo XIII (1887). He likewise published "Répertoire du clergé canadien-français" (1868) and "A travers les registres" (1886).

LIONEL LINDSAY.

Tanis, a titular see, suffragan of Pelusium in Augustamnica Prima, capital of the fourteenth district of Lower Egypt. Tanis (in Egyptian Zani, in Hebrew Zoan) was situated on a branch of the Nile, to which it gave its name. It was one of the oldest cities in the world, as the Bible bears witness (Num., xiii, 23), and hieroglyphic inscriptions attest its existence under Pharao Pepi I Merira of the sixth dynasty. It flourished especially under the pharoas of the twelfth dynasty, under the Hyksos, or shepherd kings (fifteenth to seventeenth dynasties), under the pharoas of the nineteenth, twenty-first, and twenty-third dynasties, who had made Tanis their capital. It was under the shepherd kings that the Jews installed themselves in Egypt in the land of Gessen, near Tanis, and it is in this city, which was the residence of Rameses II, that Moses and Aaron performed many wonders (Ps. lxxvii, 12 and 43). It is a mistake to confound Tanis with the Ramesses built by the Israelites (Ex., i, 10 and 11) and situated very probably at Tell-Rotab. The Prophet Isaias (xix, 11–13; xxx, 4) denounced Tanis and the Jewish politicians who had recourse to its kings; so too Ezechiel (xxx, 14 and 18), who announced its approaching destruction. Jeremias, who also pronounced (ii, 16) anathemas against the city, was forced to follow the Jews thither after the conquest of Palestine by Nabuchodonosor (Jer., xliii, 7–10; xliv, 1; xlvi, 14). In these last passages however the Bible uses Thacphanes or Thaphanhes, in Latin Taphnes, and it is not absolutely certain that this is the same as Tanis, some identifying Taphnes with Tell Dafaneh, about seventeen miles from Ṣan or Tanis. The earliest Bishop of Tanis is Eudæmon, a Melitian bishop at the beginning of the fourth century. Mention may be made also of Hermion, bishop in 362; Apollonius, present at the Robber Synod of Ephesus and Paul in 458. Besides these Le Quien speaks of eight Jacobite bishops (Oriens christ., II, 535–38), the last of whom lived in 1086. About 870 the French monk Bernard visited Tanis, "in qua sunt christiani multum religiosi, nimia hospitalite ferventes" (Tobler and Molinier, "Itinera hierosolymitana", I, 313). At the present time Tanis is a poor village called San el Haggar containing 1570 inhabitants, near Lake Menzaleh. The ruins, situated about twenty minutes distance, consist of a large temple, a small granite temple, and of other monuments not identified.

S. Vailhé.

Tanner, Adam, controversialist, b. at Innsbruck in 1571; d. at Unken, 25 May, 1632. He entered the Society of Jesus in 1589, and taught at first Hebrew, apologetics, and moral theology. When in 1601 the religious debate between Catholics and Lutherans was arranged at Ratisbon, Tanner aided his fellow Jesuit Gretser in proving that the dead word of the Bible could not be the supreme arbiter in matters of faith. He himself published an account of the proceedings (Mainz, 1602) and in subsequent apologies hurled back the charges brought against the Catholics by the Reformers. In 1603, the Bavarian duke invited him to occupy the chair of Scholastic theology in the University of Ingolstadt. A stranger in no field of science and gifted with a keen intellect, Tanner now developed an increasing activity both in teaching and writing on theological subjects. In his "Anatomiæ confessionis augustanæ" (Ingolstadt, 1613), he points out the fallacies of the Augsburg Confession, both from Luther's own assertions and from the qualities essential to the true Church. Against the so-called Utraquists, he wrote several works, both in Latin and in German, defending the Church's practice of giving Communion under one species only, and the sacrifice of the Mass. Other pamphlets were issued by him to clear his order from the false accusations of its enemies. When the conflict between the Venetians and Pope Paul V (q. v.) broke out, an able defence from his pen, "Defensionis ecclesiæ libertatis libri duo" (Ingolstadt, 1607), vindicated the Church's freedom against the tyrannical aggressions of the State.

After fifteen years spent at Ingolstadt, he was called by the Emperor Matthias to the University of Vienna. While there he published his greatest work, the "Universa theologia scholastica" (Ingolstadt, 1626–27), which resembles the "Summa" of St. Thomas not only in its arrangement, but also in its solidity of doctrine and conciseness of diction. Ferdinand II, Matthias's successor on the throne of the Habsburgs, appointed him chancellor of the University of Prague. Fleeing from the Swedes, Tanner died at Unken, an insignificant village near Salzburg. There he still rests amid unlettered peasants in an unknown grave. But, as Cordara says, "his virtues, coupled with his eminent erudition, will ever be his most splendid epitaph and mausoleum."

Cordara, *Hist. Soc. Iesu*, VI, 583; Guilhermy, *Ménologe*, I, 470; Thölen, *Menologium*, 325; Hurter, *Nomenclator*, I, 254; Sommervogel, *Bibliothèque* VII, 1843, sqq.

A. C. Cotter.

Tanner, Conrad, Abbot of Einsiedeln, b. at Arth in the Canton of Schwyz, 28 Dec., 1752; d. 7 April, 1825. He studied the classics and theology at Einsiedeln; made vows in the Order of St. Benedict on 8 Sept., 1772, and was ordained in May, 1777. He was engaged as teacher at the *gymnasium* of Einsiedeln and later at Bellinzona. In 1787 he held the position of librarian at his abbey, and in 1789 he was made director of the college at Bellinzona. During the Revolution Tanner fled to the Tyrol, taking with him the miraculous statue, the head of St. Meinrad, and other valuables, and remained there until he could restore the treasures to the abbey. He was appointed pastor of St. Gerold in Vorarlberg in 1802, where he remained for three years, until recalled to act as master of novices. At the death of Abbot Beat in 1808 Tanner was elected abbot. With great prudence he accommodated himself to the political situation and thus secured the existence of the monastery. He encouraged the pursuit of studies, renovated the buildings, and rebuilt the Holy Chapel which had been destroyed 1798 by the French. Although the village of Einsiedeln was no longer under his jurisdiction, he retained for it a fatherly solicitude which he manifested especially in the years of famine (1816 and 1817). It was the intention of Pius VII to create the new Diocese of Waldstätten out of the cantons Uri, Schwyz, and Unterwalden, to make Tanner bishop, and to constitute the monks of Einsiedeln as cathedral chapter. The matter was proposed in 1818, but was declined by the abbot and his capitulars. Tanner's writings are: "Betrachtungen zur sittlichen Aufklärung im neunzehnten Jahrhundert" (5 vols., Augsburg, 1804–1808); "Bildung des Geistlichen durch Geistesübungen" (Augsburg, 1807), of which a fifth edition appeared at Einsiedeln in 1846; his pedagogical works were published by his successor, Abbot Celestine Müller.

Francis Mershman.

Tanner, Edmund, Bishop of Cork and Cloyne, Ireland, 1574–1579; b. about 1526; d. 1579. The statement in his brief of appointment that he was born in the ecclesiastical province of Dublin is all that is known of his early life. His surname was borne by persons of humble station at Calverstown, Co. Kildare, which, coupled with his familiarity with the Eustaces of Baltinglas, may give colour to a surmise that he was a native of that district. In 1565 he was at Rome, being then probably in Holy orders, and entered the Society of Jesus; after a year in the Roman College he was sent to Dillingen University in 1567, and became doctor of divinity. His health, however, failed and he left the Society. In 1574 he was again at Rome, and the See of Cork and Cloyne being vacant, he was appointed thereto, 5 November, 1574, and was consecrated at Rome. In May, 1575, he set out for Ireland with exceptional faculties for his own diocese and for those of Cashel, Dublin, and its suffragan sees in the absence of their respective prelates. Not long after his reaching Ireland he was captured while exercising his functions at Clonmel, and was thrown into prison; here, as Holing tells, he was visited by a schismatical bishop whom he reconciled to the Church. A few days later he was himself released through the influence of a noble earl. Thereafter he did not venture into his own diocese, but as commissary-Apostolic he traversed the other districts assigned him, administering the sacraments and discharging in secret the other duties of his office. Four years he laboured thus in continual peril and distress, and at length succumbed to his privations and fatigues in the Diocese of Ossory, 4 June, 1579. Bruodin states that he died in Dublin Castle after eighteen months of imprisonment and cruel torture.

Charles McNeill.

Tanner, Matthias, b. at Pilsen in Bohemia, 28 Feb., 1630; d. at Prague, 8 Feb., 1692. He entered the Society of Jesus in 1646. The greatest part of his life was spent at Prague, where he taught humanities, philosophy, theology, and Scripture, was made rector of the imperial university, and guided for six years the Bohemian province of his order. Not only did Tanner burn to imitate the apostles and martyrs of the Society, but, to awaken in his brethren a like desire, he employed his leisure hours in recounting to them the lives and deaths of the most prominent sons of St. Ignatius. His two works, "Societas Jesu ad sanguinis et vitæ profusionem militans" (a history of the lives and deaths of those Jesuits who suffered martyrdom for the faith) and "Societas Jesu Apostolorum imitatrix" (describing the heroic deeds and virtues of the Jesuits who laboured in all parts of the world with extraordinary success for the salvation of souls) were written in this spirit. He paid special attention to reverence and devotion during the holy sacrifice of the Mass. According to his biographer, he used to celebrate with such living piety that he was like a lodestone, attracting the faithful to the altar where he offered the sacrifice. To foster this reverence in others, he wrote two other works, "Explanation of the Bloody Sacrifice of Christ in the Unbloody Sacrifice of the Mass", which was re-edited three times, and a pamphlet proclaiming God's wrath against those who should dare to desecrate holy temples by their misbehaviour. His name became more widely known through his work, "Dialogus controversisticus" on the validity of the Holy orders conferred on Andrew Frommens during the lifetime of his wife.

A. C. Cotter.

Tantum Ergo, the opening words of the penultimate stanza of the Vesper hymn (see Pange Lingua Gloriosi, II) of Corpus Christi. This stanza and the closing one, or doxology ("Genitori" etc.), form a separate hymn which is prescribed for Benediction of the Blessed Sacrament (q. v.).

In private exposition, where permission has been obtained to give benediction with the pyx, the two stanzas are recited by the priest (or sung by a choir, if this is feasible: "si fieri potest, optandum est", says Van der Stappen). In other expositions they must always be sung. Customs vary in respect of the method of singing. In some places the choir sings the stanzas; in others, the celebrant sings the opening words of each stanza, the choir continuing. The Ritual (Tit. IX, c. 5) speaks of all the clergy present singing the stanzas, and Schober (Cæremoniæ missarum solemnium et pontificalium), commenting on this, suggests that either the celebrant and assisting clergy should intone the first line of the stanza, or the choir alone should sing both stanzas. A profound inclination of the head is made at the words "veneremur cernui" (Wapelhorst). The "American Ecclesiastical Review" (XXI, 1889, 644) points out that the rubrics do not prescribe an inclination of the head at the words "veneremur cernui", although the practice is frequent. "Gardellini, in his "Commentary on the Clementine Instruction" (XXIV, 9–10), cites the custom of the churches of Rome; and the Rituals before his day make mention of the profound inclination at the Tantum ergo down to the word "cernui": "nam in verbo cernui completur dictionis sensus, qui inclinationem postulat". Authorities differ as to the time for incensing. Martinucci directs the placing of incense in the thurible before "Tantum ergo" and the incensing after "veneremur cernui". De Carpo suggests both either before "Tantum ergo" or after "veneremur cernui", according to the custom of the particular church. Wapelhorst, following De Herdt, directs that both take place when "Genitori" is intoned.

The "magnificent doxology" (W. A. Shoults in Julian, "Dict. of Hymnol.") is a fitting climax to the great hymn. It borrows, however, the expressions "Genitori Genitoque"—"Procedenti ab utroque, Compar" from a Pentecost sequence by Adam of St-Victor. Dreves, "Analecta hymnica", IV, 70, gives a sequence in honour of St. Agnes, in which occurs the stanza:—

Genitori Genitoque,
Psallat nostra concio;
Procedenti ab utroque
Compar sit laudatio;
Virginalis ipsum quoque
Laudet benedictio.

Of the musical settings, which are very abundant, the appropriate word must be one of caution in view of the direction of Pius X in his Instruction on Sacred Music (22 Nov., 1903, §IV): "In the hymns of the Church the traditional form of the hymn is to be preserved. It is not lawful, therefore, to compose, for instance, a *Tantum ergo* in such wise that the first strophe presents a *romanza*, a *cavatina*, an *adagio*, and the *Genitori* an *allegro*." Singenberger, "Guide to Catholic Church Music" (St. Francis, Wisconsin, 1905), gives grade, voices, composer, etc., of more than six hundred settings of the "Tantum ergo" and the "Pange lingua", almost wholly of the German Cecilian School. Since 1903 many settings, also liturgically correct, have appeared by composers of other nationalities. The Vatican Graduale (1908) gives two plainchant melodies, or rather two forms of the same melody.

Neale, "Mediæval Hymns and Sequences" (3rd ed., London, 1867, 178–81), discusses translations of the "Pange lingua", and, speaking of the penultimate stanza, remarks that the lines "Præstet fides supplementum Sensuum defectui" are "avoided by all" the four authors he mentions, and notes that "Caswall's translation, unshackled by rhyme, is nearest" to the original Latin: "Faith for all defects supplying, Where the feeble senses fail". Neale's own translation of this stanza is given, with slight alterations, in

"Hymns Ancient and Modern" in the (Baltimore) "Manual of Prayers", and in the "English Hymnal". Some of the earliest translations of the two lines are: "And where our sense is seen to fail, There must faith supply restore" (Primer, 1604); "And faith with all, those wants supply Wherein the senses feel defect" (Primer, 1619); "Let faith in Jesus Christ supply The senses' insufficiency" (Primer, 1685); "And faith for all defects supply, Whilst sense is lost in mystery" (Primer, 1706). One of the most recent translations is that of the revised Husenbeth, "The Missal for the Use of the Laity" (London, 1903, 286): "Let us profoundly bend before This awful mystery, and adore; Let types of former days give way, Like darkness at the blaze of day; And sense's failure be supplied By faith, our firm support and guide."

H. T. Henry.

Tanucci, Bernardo, Marchese, Italian statesman, b. at Stia in Tuscany, of poor family, in 1698; d. at Naples, 29 April, 1793. At the University of Pisa, where certain benefactors enabled him to study, he was appointed in 1725 to a chair of law, and attracted attention in the republic of scholars by the vehemence, rather than by the erudition, with which he defended the authenticity of the Codex Pisanus of the Pandects. When Charles, son of Philip V of Spain, passed through Tuscany on his way to conquer the Kingdom of Naples, he took Tanucci with him; he appointed him at first council of state, then superintendent of posts, and finally prime minister. On the last occasion the king ennobled him. As prime minister he was most zealous in establishing the supremacy of the State over the Church, and in abolishing the privileges of the nobility together with feudalism. He restricted the jurisdiction of the bishops, impeded the last increment of the so-called mortmain, and reduced the taxes belonging to the chancery of the Roman Curia. All this was sanctioned in the Concordat of 1741, the application of which, however, went far beyond the intentions of the Holy See. For controversies which might arise in consequence of the Concordat a mixed tribunal, composed of ecclesiastics and laymen, was constituted. But Tanucci went much farther, establishing the principle that not more than ten priests should be ordained for every thousand souls, which number was later reduced to five for each thousand. The *Placet* was rigorously enforced. The censures of bishops against laymen incurred by obedience to the state laws were annulled. Without permission of the king new churches could not be erected.

His hostile policy to the Church led Tanucci to neglect other interests, above all the foreign relations. In 1742 an English fleet seriously threatened the Neapolitan coasts, and the kingdom was saved only by the signature of an act of neutrality in the war between Spain and Austria. For the reformation of the laws he instituted a commission of learned jurists with instructions to compile a new code, which was, however, not put into force. When Charles III of Naples succeeded to the throne of Spain in 1759, Tanucci was made president of the council of regency instituted for the nine-year-old Ferdinand V. The latter, even when he attained his majority, preferred to hold aloof from the government business and plunged into the pleasures of the chase. Furthermore, the former King Charles III, although in Spain, continued by his instructions to Tanucci to govern the kingdom. The latter could now with greater freedom take up his hostile policy to the Church. The revenues of the vacant bishoprics and abbeys—and as time went on their number always increased—were confiscated. Thirty-eight convents were suppressed; tithes were at first restricted, then abolished; the acquisition of new property by mortmain was forbidden, and new restrictions were made against the recruitment of the clergy. The *Placet* was even extended to ancient papal Bulls, and the principle was established that concessions of an ecclesiastical nature, not made or assented to by the king, could be revoked at pleasure by the same king or by his successors. In this manner it was possible to suppress or change testaments in favour of the Church at the pleasure of the king, who, according to Tanucci, possessed this power directly from God. Appeals to Rome were forbidden without the royal permission. Matrimony was declared a civil contract by nature, from which principle the trial of matrimonial cases by civil courts was deduced. By the order of Charles III the Jesuits were suppressed and expelled from the Kingdom of Naples (1767).

This expulsion of the Jesuits was part of the movement of the Bourbon courts throughout Europe to destroy the Society, Pombal in Portugal, Aranda in Spain, Choiseul in France, and Tanucci in Naples acting in concert to this end. Scarcely had Clement XIV been elevated to the pontificate than he was urgently solicited by the Bourbon courts to suppress the Jesuits, and no effort was left untried by the Bourbon ministers to accomplish this purpose. The pope pleaded time and patience in the examination of the charges against the Society, but was overborne by the incessant and menacing attitude of the Bourbon league against the Jesuits. Tanucci laboured with no less energy in the war upon the Society of Jesus than Pombal, Aranda, and Choiseul, with whom he was in close sympathy in their general hostility to the Church as well as in their determination to bring about the complete suppression of an order of men, whose widespread influence was a check upon their own high-handed methods against the freedom of the Church. To excommunication by Clement XIII Tanucci responded with the occupation of Benevento and Pontecorvo, which were not evacuated until after the suppression of the Jesuits in 1773. The protests of the bishops against many of the new teachings in the schools after the expulsion of the Jesuits were dismissed as invalid. One of the last of his acts was the abolition of the *chinea*, that is the annual tribute which the kings of Naples since the time of Charles of Anjou had paid to the pope as sovereign (1776). His unfortunate policy in finance and in regard to the food taxes provoked popular revolutions on several occasions. But when, in 1774, Queen Caroline, an Austrian princess, entered the Council of State, the power of Tanucci began to decline. In vain he endeavoured to neutralize the influence of the queen, and in 1777 he fell into disgrace and was dismissed. Retiring into the country, he died neglected and childless.

Tanucci represents the Italian type of that unfortunate species of statesman of the eighteenth century the most prominent example of which was the notorious Pombal. Sceptics in faith and in morals, they were "anti-clerical" because they aspired to a universal tyranny of the State, in which the king should be a figurehead while the minister himself was the master. They desired to expel the Jesuits, accusing them, as one would say to-day, "of liberalism"; they ably prepared the way for the power of sects and the crash of revolutions.

Lastre, *Elogio del marchese Tanucci* (*Novelle letterarie fiorentine*) (Florence, 1783); Colletta, *Storia del regno di Napoli dal 1735 al 1825*, I (Capolago, 1834). See also the documents and statutes on the suppression of the Jesuits. Among the publications of Tanucci are *Epistola de pandectis pisanis* (2 vols., Florence, 1731).

U. Benigni.

Taoism (Tao-kiao) is the second of the three state religions (*San-kiao*) of China. This religion is derived from the philosophical doctrines of Lao-tze. "Lao-tze's Taoism", says Legge (Religions of China, 229), "is the exhibition of a way or method of living which men should cultivate as the highest and purest development of their nature". According to De Groot (Religious System of China, IV, p. 66): "Taoism, as the word indicates, is the Religion of the Tao, a term meaning Path or Way, but denoting in this peculiar case the way, course or movement of the Universe, her processes and methods. In other words, Taoism is the Religion of Heaven and Earth, of the Cosmos, of the World or Nature in the broadest sense of these words. Hence we may call it Naturism".

Lao-tze, the equivalent to "the Old or Venerable Philosopher" (if taken as a title of respect), or to "Old Boy" (if literally translated), was born in the third year of Ting Wang, Prince of Chou, i. e. in 604, at K'io-jin, in the Kingdom of Ts'u, to-day Ho-nan Province. The legend given by Ko Hung in his "Record of Spirits and Immortals" (written in the fourth century A.D.), says that "he was not born till his mother had carried him in her womb seventy-two years or, according to some accounts, eighty-one years". "No wonder", adds Legge (l. c., pp. 203–4), "that the child should have had white hair,—an 'old boy' of about fourscore years"! This date of 604, in accordance with historical tradition, is not given by Sze-ma Ts'ien in the biography which he devoted to the philosopher in his "She-ki" (Historical Memoirs); if this date be accepted, it is difficult to admit of the authenticity of the meeting between Lao-tze and Confucius, 500 B.C.; if the latter was then fifty-one years old according to Chwang-tze, Lao-tze was then one hundred and four years old. The family name of Lao-tze was Li, his name Eul (meaning "Ear"), his honorary title Pe-yang, and his posthumous name Tan (meaning "Flat-eared"). He was one of the "Sze", recorders, historiographers, keepers of the archives of Lo, the Court of the princes of the Chou dynasty. Foreseeing the decay of this dynasty, he gave up his office, and undertook a journey; at the Han-kou Pass, Ho-nan Province, the watchman, Yin Hi, begged him to write his thoughts for his own instruction before he retired from the world; consequently, Lao-tze wrote his work in two parts in the Tao and the Te, and having entrusted it to Yin Hi, he disappeared; the time of the death of the philosopher is not known. Lao-tze had a son called Tsung who was a general of the Kingdom of Wei and who obtained the grant of land at Twan-kan. His son named Chu had himself a child Kung; Hia, grandson of Kung, was an official under Emperor Hiao-wen-ti, of the Han dynasty. Kiai, son of Hia, became a minister of K'iang, King of Kiao-si, and, owing to this circumstance, settled with his family in the Kingdom of Ts'i.

This story is too matter of fact and lacks the marvellous legend which should surround the person of the chief of a new religion. Legend was provided for. Ko Hung, already mentioned, had placed the legend of Lao-tze at the beginning of the "Shon-sion-ch'-wan" (Records of Spirits and Immortals), and he says: "His mother carried him after the emotion she felt in seeing a large shooting star. He received from Heaven the vital breath; as he was born in a house whose proprietor was called Li (Pear tree), so he was named Li". Some authors say that Lao-tze was born before heaven and earth. According to others, he possessed a pure soul emanated from heaven. He belonged to the class of spirits and gods. The chief work of Lao-tze, in fact the only one which has been ascribed to him with some probability, is the "Tao-teh-king". In the "China Review" (March-April, 1886), Dr. Herbert A Giles wrote a sensational article, "The Remains of Lao Tzu", to show by various arguments that the "Tao-teh-king" is a spurious work and that its now spurious portions have been mostly mistranslated. It was the starting-point of a controversy in which Dr. Chalmers, Dr. Legge, Dr. Edkins, and some other sinologues took part. The authenticity of the work has been admitted by most of them. Wylie says (Notes on Chinese Literature, new ed., p. 216): "The only work which is known to be truly the production of Lao Keun is the 'Taòu tih king', which has maintained its reputation and secured a popularity to a certain extent among reading men generally of every denomination." Legge writes (Religions of China, p. 203): "No other writing has come down to us from the pencil of Lâo-tsze, its author", and (Brit. Quart. Rev., July, 1883, p. 9): "We know that Lao Tzu wrote the 'Tao Tê Ching'", and (p. 11): "The 'Tao Tê Ching' is a genuine relic of one of the most original minds of the Chinese race, putting his thoughts on record 2400 years ago." The German E. Faber (China Rev., XIII, 241) says that "there is little room left for doubts regarding the authenticity of our Canon."

Besides the "Tao-teh-king", a good many works treat of Taoism: the "Yin-fu-king-kiai" which professes to be an exposition of the oldest Taoist record in existence; "Ts'ing-tsing-king" (The Book of Purity and Rest); the "T'ai-hsi-king" (Respiration of the Embryo); the "T'ai-shang-Kan-ying-pien" (Tractate of Actions and their Retributions). The chief Taoist philosophers are: Tsou-yuen (400 B. C.), author of a work on the influences of the five ruling elements, influenced by Buddhist doctrines; Kwei-ku-tze (380 B. C.), a mystic, astrologer, and fortune-teller; Ho-kwan-tze (325–298 B. C.), an orthodox Confucianist when writing on jurisprudence, a Taoist in other writings; Chwang-tze (330 B. C.), the author of the "Nan-hua" classic, the adversary to Mencius, and according to Eitel "the most original thinker China ever produced"; Shi-tze (280 B. C.), a Taoist writer, influenced by the heterodox philosopher, Yang-chu (450 B. C.), the Apostle of Selfishness; the statesman Han-fei-tze (250 B. C.); Liu-ngan or Hwai-nan-tze (d. 112 B. C.), a cosmogonist. But the first disciples of Lao-tze were Kang-sang-tze (570–543 B. C.), the first expositor of Taoism as a distinct system, the sceptic Li-tze (500 B. C.), and Wen-tze (500 B. C.). The historian Sze-ma-ts'ien speaking of Chwang-tze says: "He wrote with a view to asperse the Confucian school and to glorify the mysteries of Lao Tze... His teachings are like an overwhelming flood, which spreads at its own sweet will. Consequently, from rulers and ministers downwards, none could apply them to any definite use." Giles (Chinese Literature, 60) concludes from this passage: "Here we have the key to the triumph of the Tao of Confucius over the Tao of Lao Tze. The latter was idealistic, the former a practical system for every-day use."

As De Groot observes (l. s. c., IV, 67): "Taoism being fundamentally a religion of the Cosmos and its subdivisions, old Chinese Cosmogony is its Theogony. It conceives the Universe as one large organism of powers and influences, a living machine, the core of which is the Great Ultimate Principle or *T'ai-kih*, comprising the two cosmic Breaths or Souls, known as the *Yang* and the *Yin*, of which, respectively, Heaven and Earth are the chief depositories. These two souls produce the four seasons, and the phenomena of Nature represented by the lineal figures called *kwa*". In fact the *Yang* and the *Yin* produce by the power of their co-operation all that exists, man included. Ancient Chinese philosophy attributes to man two souls: (1) the *shen*, or immaterial soul, emanates from the ethereal, celestial part of the Cosmos, and consists of *yang* substance. When operating actively in the living human body, it is called *k'i* or 'breath', and *hwun*; when separated from it after death, it lives as a refulgent spirit, styled *ming*. (2) The *kwei*, the material, substantial soul, emanates from the terrestrial part of the Universe, and is formed of *yin* substance. In living man it operates under the name of *p'oh* and on his death it returns to the Earth" (De Groot, IV, p. 5). Thus the *kwei* is buried with the man and the *shen* lingers about the tomb. Marking the distinction between the two souls, there existed in the legendary period, according to the "Li-ki", a sacrificial worship to each soul separately: the *hwun* or *k'i* returns to heaven, the *p'oh* returns to earth. These two souls are composite; in fact all the viscera have a particular *shen*. "There are medical authors who ascribe to man an indefinite number of souls or soul-parts, or, as they express it, a hundred *shen*. Those souls, they say, shift in the body according to the age of the owner; so, e. g. when he is 25, 31, 68 or 74, and older, they dwell in his forehead, so that it is then very dangerous to have boils or ulcers there, because effusion of the blood would entail death. At other times of life they nestle under the feet or in other parts and limbs, and only in the 21st, 38th, 41st, and 50th years of life they are distributed equally through the body, so that open abscesses, wherever they appear, do not heal then at all. Such pathologic nonsense regulates, of course, medical practice to a high degree" (De Groot, IV, p. 75). The liver, the lungs, and the kidneys correspond to the spring, to the autumn, to the winter, as well as to the east, the west, and the north. The soul may be extracted from a living man; the body may still live when left by the soul, for instance during sleep; the soul of a dead man may be reborn into other bodies. Ghosts may enter into relation with the living, not only in dreams, but they may take revenge on their enemies.

At the head of the Taoist Pantheon is a trinity of persons: (1) *Yuen-shi-t'ien-tsun*, "the honoured one of heaven, first in time", residing in "the jade-stone region", who created the three worlds; (2) *Ling-pan-t'ien-tsun*, "the honored one of heaven who is valued and powerful", residing in the "upper pure region", collector of the sacred books, calculator of the succession of time, and the regulator of the two principles *yin* and *yang*; (3) Lao-tze himself, who exposed to mankind the doctrines uttered by the first person in the trinity and collected in the form of books by the second. Next come: *Yuh-hwang-ta-ti*, "the great jade-stone emperor", who governs the physical universe; *Hen-t'u-hwang-ti-k'i*, "Spirit of imperial earth, ruler of the soil"; the star gods, whose lord (*sing-chu*) resides in a star near the pole; *T'ien-hwang-ta-ti*, who lives in the pole star, etc.; *Liu-tsu*, the "father of thunder". "While he discourses on doctrine, his foot rests on nine beautiful birds. He has under him thirty-six generals, *t'ien tsiang*" (Edkins, "Journ. North China Br. Roy. Asiat. Soc.," III, Dec., 1859, p. 311); the sun and moon; the *San-yuen* or *San-kwan*, "the three rulers" who preside over three departments of physical nature, heaven, earth, and water; *Hiuen-kien-shang-ti*, "high emperor of the dark heaven", who is described as the model of the true ascetic. He has transformed himself eighty-two times to become the instructor of men in the three national religions (Edkins, l. c., p. 312). A number of personages were worshipped under the name of *tsu*, patriarchs. Confucius himself has a place assigned him among the deities of this religion, and he is addressed as "the honoured one of heaven who causes literature to flourish and the world to prosper" (Edkins). Some men have been worshipped as gods after their death: Kwan-ti, the god of war; Hu-tsu, a physician; a medical divinity, Ko-tsu Sa-tsu; etc.

One may well ask how the pure, abstract doctrine of Lao-tze was turned into a medley of alchemical researches, a practice of witchcraft, with the addition of Buddhist superstitions, which constitute to-day what is called *Tao-kiao*, the religion or the teaching of Tao. This was the work of a legendary being, Chang Tao-ling, a descendant of the eighth generation of Chang Leang, a celebrated advisor of Liu-pang, founder of the Han dynasty. He was born in the tenth year of the Emperor Kwang Wu-ti (A. D. 34) in a cottage of a small village of the Che-kiang Province, at the foot of the T'ien-mu-Shan, in the Hang-chou Prefecture. At an early age Chang studied the works of Lao-tze to which he added researches of alchemy, a science aiming at "prolonging life beyond the limits assigned by nature". He found the drug of immortality, and by order of Lao-tze he destroyed the six great demons of the province; Lao-tze gave him also two books, two swords, one male, one female, a seal called *Tu-kung*, etc. Chang gave his swords and books to his son Heng, bidding him to continue his pontificate from generation to generation. At noon on the seventh day of the first moon of the second year Yung-shou of the Han Emperor Heng (A. D. 157), Tao-ling ascended the Cloudy Mountain (*Yun-shan*) with his wife and two disciples, and with them disappeared into heaven. Chang Heng, son of Chang Tao-ling, continued his father's tradition both in spiritual and alchemical researches, and Chang Lu, the grandson, played an important part in the Yellow Cap Rebellion at the beginning of the Han dynasty. During the fifth century A. D., when the Wei dynasty was ruling in Northern China, a certain K'iu Kien-che tried to substitute himself to the Chang family and received in 423 from the emperor the title of *T'ien-shi*, "Preceptor of Heaven", which formerly belonged to Tao-ling. In 748 the T'ang Emperor Hiuen-Tsung conferred this title upon the heirs of the latter, and a grant of a large property near Lung-hu Shan was made to them in 1016 by the Sung Emperor Chen-Tsung. Heredity in the charge of high priest of the cult was secured to the descendants of Chang by the transmigration of the soul of Tao-ling's successor, at the time of his demise, to the body of a junior member of the family, whose selection is indicated by a supernatural phenomenon.

To-day, at the head of the Taoist hierarchy is the *Cheng-i-sze-kiao-chen-jen*, "Heir to the founder of the Taoist sect"; this title was conferred by the Ming dynasty upon Chang Cheng-shang, descendant from Chang Tao-ling of the thirty-ninth generation. This title "belongs, by an hereditary privilege, to the first-born descending in a direct line from Chang Tao-ling. He lives upon the Lung-hu Mountain, in the Kiang-si Province. His office consists in using his magical art to frighten demons away, to baffle diabolical influence, and to refrain the evil-doing souls of the dead. He names the new *Ch'eng-hwang*, 'tutelary deities of the cities', and for a fee, he gives to Taoists titles permitting them to celebrate the ceremonies with more solemnity" (P. Hoang, "Mélanges sur l'Administration", 34). In the capital of the empire the Taoist priesthood includes: two *Tao-lu-sze*, superiors, a title corresponding with that of the Buddhists, *Seng-lu-sze;* two *Cheng-i*, Taoists of right simplicity; two *Yen-fa*, ritual Taoists; two *Che-ling*, Taoists of great excellence, thaumaturgus; and two *Che-i*, Taoists of great probity, an inferior class of priests. In the provinces at the head of the priesthood are: *Tao-ki-sze Ton-ki*, superior of the Taoists of a *fu* (prefecture), and *Tao-ki-sze Fou Ton-ki*, vice-superior of the Taoists of a *fu; Tao-cheng*, superior of the Taoists of a *chou* or a *t'ing; Tao-hwei*, superior of the Taoists of a *hien*. The superiors are appointed by the governors-general (*tsung-tu*), or by the governors (*fu-t'ai*), on the presentation of the prefect of sub-prefect of the *chou*, *t'ing*, or *hien*.

HENRI CORDIER.

Taos Pueblo, an important town of the Pueblo group, inhabited by Indians speaking the Tigua language of Shoshonean linguistic stock, and situated on Taos River, Taos County, New Mexico, United States of America, about fifty miles north-east from Santa Fe. From an estimated population of 2500 in 1630, and 2000 just previous to the outbreak of the rebellion in 1680, it had dwindled to 578 in 1788 and stands now at about 450. It was first visited by Coronado's men in 1540. About the year 1620 a Spanish Franciscan mission was established there under the name of San Gerónimo de Taos. In the great Pueblo revolt of 1680 the people of Taos took a prominent part, their town being the headquarters of Popé, the leader of the rebellion; the two resident missionaries were killed. On the reconquest of the country some fifteen years later, most of the missions were reestablished, but under the attacks of the wild Ute and Navaho the prosperity of the Pueblo steadily declined. In 1847 the people of Taos resisted the American occupation, killing the newly-appointed governor, Charles Bent, and a number of others. As a result their town was stormed by the American troops, and some 150 of the Indians were killed in addition to sixteen others afterwards executed for their part in the massacre. In 1910 troops were again called out to quell a threatened rising. In general culture and condition the Taos people resemble the other Pueblos, but are noted for their extreme tenacity of ancient custom, and for a greater boldness of spirit, probably due to the large admixture of Ute blood. The mission of San Gerónimo still exists, served by a secular priest, and the principal festival occasion is the patronal feast of San Gerónimo, 30 Sept., a leading feature being a relay foot-race; but many of the old-time tribal rites are still kept up by a large proportion of the people.

MILLER, *Prelim. Study of the Pueblo of Taos* in University of Chicago publications (Chicago, 1898); see also bibliography under PUEBLO INDIANS.

JAMES MOONEY.

Taparelli (D'AZEGLIO), ALOYSIUS (christened PROSPERO), philosopher and writer on sociological subjects, b. at Turin, 24 Nov., 1793; d. at Rome, 20 Sept., 1862; interred near the altar of St. Aloysius in the Church of St. Ignatius. His father, Cesare, was at one time ambassador of Victor Emmanuel I of Sardinia to the Holy See, and his brother, Massimo, was one of the Italian ministers of State. He was educated under the Calasanctians at Senis and in the Atheneo of Turin. He attended the military school of St-Cyr at Paris for some months, but he was not destined to be a soldier. He entered the Society of Jesus at Rome, 12 Nov., 1814. In his youth he displayed a bent for mechanics, painting, and music, and later invented a musical instrument which he called the *violicembolo* (highly praised by Liszt and afterwards at his suggestion named the *symphonium*), and which was exhibited at the London Exhibition. He was the first rector of the Roman College after its restoration to the Jesuits by Leo XII. He taught philosophy for sixteen years at Palermo, and for many years afterwards was attached to the editorial staff of the "Civiltà Cattolica". His chief work, "Saggio teoretico di diritto naturale appogiato sul fatto", i. e. "A Theoretical Essay on Natural Right from an Historical Standpoint" (2 vols., 7th ed., Rome, 1883), was in a way the beginning of modern sociology. It was translated into German (Ratisbon, 1845) and twice into French (Tournai, 1851; Paris, 1896). Herein was developed the position, at once widely accepted in conservative circles on the Continent, that the normal origin of civil government was by extension of paternal power through the patriarchal head of a group of families. This essay was later abridged into "An Elementary Course in Natural Right" (6th ed., Naples, 1860; also in French, Tournai, 1864; and in Spanish, Paris, 1875), which was in use as a text-book in the University of Modena. Next in importance is his "Esame critico degli ordini rappresentativi nella società moderna", i. e. "Critical Examination of Representative Government in Modern Society" (2 vols., Rome, 1854; in Spanish, Madrid, 1867). Besides his striking monographs on "Nationality" (Rome, 1847), "Sovereignty of the People" (Palermo, 1848; Florence, 1849), and "The Grounds of War" (Genoa, 1847) he left a long list of articles in the "Civiltà Cattolica" chiefly on subjects in political economy and social right, as well as an equally long list of book reviews on kindred topics, which were acute and penetrating essays.

De claris sodalibus provinciæ Taurinensis (Turin, 1906); SOMMERVOGEL, *Bibliothèque de la C. de. J.* (Brussels, 1896); *Civiltà Cattolica*, series V, vol. IV, and series X, vol. XI. The last reference gives a critical estimate of his writings.

CHARLES MACKSEY.

Tapestry.—A word of French origin naming a fabric in which the two processes of weaving and embroidering are combined. The woof is not made in the usual way by throwing the threads with a shuttle, but is added to the warp by the aid of a needle carrying a short thread of the colour called for by the design. The fabric produced by this method of work, in which richness of colour and exquisite gradation of tints are easily obtainable, is a mosaic made up of dyed threads. It is used for wall-hangings, floor and furniture coverings. It was so employed by the ancient Egyptians, passing from them through Western Asia to Europe. Here, during the later Middle Ages and the Renaissance the art of the tapiser reached a high state of perfection, more particularly at Arras in France, so much so that arras-work came to be the common designation for all sorts of tapestry, no matter where made. In England, prior to the Reformation, the making of tapestry was the special handicraft of the monastic houses; and their arras-work was in very great demand for reredoses, altar-frontals, antependiums, hearse-cloths, sanctuary carpets, palace wall and choir hangings. They were not only wrought along purely ornamental lines, but more often represented Biblical subjects, incidents in the lives of the saints, historic scenes, or illustrated by symbols some point of Faith.

Matthew Paris records the fact that, among other ornaments which, in the reign of Henry I, Abbot Geoffrey had made for his Church of St. Albans "were three tapestry reredoses: the first a large one wrought with the finding of the body of St. Alban; the other two figured with the parables of the man who fell among thieves and of the prodigal son". Antedating this gift, the Abbot Egetric gave to the Abbey of Croyland, some time before the year 992, "two large foot-clothes (tapestry-carpets) woven with lions to be laid out before the high altar on great festivals and two shorter ones trailed all over with flowers for the feast days of the Apostles". A number of these early English tapestries, in a good state of preservation, were saved from the vandalism of the first Reformers, but the art of making tapestry declined before their mistaken zeal, so much so that, when tapestries were wanted to decorate the walls of the House of Lords, representing the defeat of the Spanish Armada, the order had to be placed in Flanders. A number of great artists have made designs for tapestry work, notably Raphael, who, with the assistance of Francisco Penni and Giovanni da Udine, executed the coloured cartoons for the tapestries of wool, silk, and gold that now hang in the Vatican at Rome, the most beautiful in existence. Raphael also prepared cartoons for other tapestries; the last he designed, twelve in number, were made for Francis I of France in 1519. He did not, however, live to finish the cartoons; his pupil, Giulio Romano, completed them. The tapestries made from them now hang in the Vatican, in the apartment of Pius V.

CARYL COLEMAN.

Tapis, Esteban, b. at Santa Coloma de Farnes, Catalonia, Spain, 25 Aug., 1754; d. 3 Nov., 1825. He entered the Franciscan Order at Gerona, 27 Jan., 1778, and joined the missionary College of San Fernando, Mexico, in 1786. Reaching California in 1790, he was in succession stationed at the Indian missions of San Luis Obispo till 1793; Santa Barbara till 1806; San Carlos till 1811; Purísima Concepción till 1813; Santa Ines in 1814; San Juan Bautista to the day of his death. He was three times elected *presidente*, or superior, of the California missions, holding the office from 1803 to 1812. During the same period he was also *vicario foraneo* of the Bishop of Sonora for California. Father Tapis was familiar with several Indian languages, and noted for his fondness for teaching Indian boys to read and write. He was a truly evangelical man, and was held in the highest esteem by the missionaries for his learning and piety. Numerous letters from his hand are still extant. His best and longest literary effort was his defence of the missionary fathers and their missionary system against the accusations of Captain Goyoechea of the Santa Barbara *presidio*. The arguments proved so crushing that the Government deemed it advisable to promote the officer to a post in Mexico. Father Tapis strenuously opposed taking the oath of allegiance to the so-called Republic of Mexico, which to him was nothing but an attempt at putting Voltairean principles into practice.

Zephyrin Engelhardt.

Tarabotti, Helena, nun and authoress, b. at Venice, 1605; d. there 1652. Obliged by her father, who was descended from a family of Bergamo, to enter the Convent of Sta. Anna at Venice, at the age of eleven years, she remained there, under the name of Arcangela, without any religious vocation. In earnest study, her keen spirit found its element, and through various works she became an authoress of some repute. Her first books betray an unsettled state of mind, but later she wrote treatises on the spiritual life in which, through the influence of Cardinal Cornaro, Patriarch of Venice, she finally found peace. Her more worldly works, partly pseudonymous, are: "Antisatira d'A[rcangela]T[arabotti] in risposta alla satira Menippea contro il lusso donnesco di Francesco Buoninsegni", Venice, 1644; "Lettere familiari e di complemento", Venice, 1650; "Difesa delle donne contro Orazio Plata", Venice, 1651; "La semplicità ingannata", Leyden, 1654; the last two were written under the name of Galerana Barcitotti. The books referring to spiritual life are: "La luce monacale"; "Via per andare al cielo"; "Paradiso monacale"; "Purgatorio delle mal maritate"; "Contemplazioni dell' anima amante".

Cicogna, *Delle Tuscrizioni Veneziane* (Venice, 1824–65), I 135–36, 164, 359; II, 430; V, 536–37; VI, 807–08; *Dizionario geografico storico biografico italiano*, part II (Florence, 1848), 1610; Cantù, *Parini e la Lombardia* (Milan, 1854), 119.

Livarius Oliger.

Tarachus, Probus, and Andronicus, Saints, martyrs of the Diocletian persecution (about 304). The "Martyrologium Hieronymian." contains the names of these three martyrs on four different days (the four days 8–11 October evidently signify no more than the date of a single day), with the topographical identification: "In Tarso Cilicie", on 27 Sept. (ed. De Rossi-Duchesne, 126), to which corresponds the expression, "In Cilicia", given on the two days of 5 April, and 8–11 October. The expression, "In Palestina", given under 13 May (ibid., 60), is either an error or refers to a special shrine of the martyrs in Palestine. There are two accounts of the glorious martyrdom of these three witnesses by blood, the first account being held by Ruinart (Acta Martyrum, ed. Ratisbon, 448 sq.) to be entirely authentic. According to these Acts, Tarachus, a native of Claudiopolis in Isauria, Probus of Side in Pamphylia, and Andronicus, who belonged to a prominent family of Ephesus, were tried and horribly tortured three times in various cities, at Tarsus, and at Anazarbus of Cilicia. They were then condemned to death by wild beasts, and when the animals would not touch them in the amphitheatre they were put to death with the sword. Harnack, however, expressed doubts as to the genuineness of the account (Geschichte der altchristlichen Literatur, pt. II: Die Chronologie, I, 479 sq., note 5), and Delehaye (Les légendes hagiographiques, 135 sq.) puts the martyrdom in the class of legends of martyrs that he calls "historical romances". At the same time, however, there can be no doubt as to the actual existence of the three martyrs. Their feast is celebrated in the Latin Church on 11 October, and in the Greek Church on 12 October.

Acta SS., October, V, 566 sq., earliest form of the *Acts*, *P. G.*, CXV, 1068 sq., second form, *Bibliotheca hagiographica græca*, ed. Bolland. (2nd ed.), 220; Quentin, *Les martyrologes historiques* (Paris, 1908), 279.

J. P. Kirsch.

Taranto, Diocese of (Tarentina), in southern Italy, on a bay in the Gulf of Taranto. The ancient city was situated on an island, joined by two bridges with the mainland, where the new city is built. Two islets, S. Pietro and S. Paolo, protect the bay (*Mar grande*), the commercial port, while the old city forms another bay (*Mar piccolo*), a military port next in strategic importance to Spezzia; the coast and islets are therefore very strongly fortified. The city has a large export trade and extensive works connected with the construction of warships, while the fishing industry, especially in the *Mar piccolo*, is flourishing. The cathedral dates from the eleventh century, but has been partially reconstructed in modern times. The high altar has a silver statue of St. Cathaldus; the saint's chapel, rich in marble and statues, with a cupola decorated with a fresco of Paolo de Matteis, is due to the munificence of Archbishops Lelio Brancaccio, Sarria, and Pignatelli.

Tarentum, called Taras by the Greeks, was founded in 707 b. c. by some Spartans, who, the sons of free women and enslaved fathers, were born during the Messenian War. They succeeded in conquering the Menapii and Lucani. Like Sparta, Tarentum was an aristocratic republic, but became democratic when the ancient nobility dwindled. Its government was praised by Aristotle. The people were industrious and commercial, employing a mercenary army commanded by foreign leaders, like the King of Sparta Archidamus II, Cleonymus, and later Pyrrhus. Alexander, King of Epirus, tried in vain to capture the city; he then became an ally of the Romans, and his death in a new expedition against the Tarentines led to the first dispute between the two republics. War resulted from the violation of a maritime treaty by the Romans (281). Tarentum engaged the services of Pyrrhus, who, victorious at first, was finally conquered at Beneventum (275); in 272 the city was taken by the Romans and included in the federation. Even in those early days it was renowned for its beautiful climate. In 208 it sided with Hannibal, but was retaken in 205, losing its liberty and its art treasures, including the statue of Victory. In ancient times its poets Apollodorus and Clinias, its painter Zeuxis, and its mathematician Archytas were renowned. The Byzantines captured Taranto in 545 during the Gothic wars, but abandoned it in 552. In 668 it belonged to Romuald, Duke of Beneventum. In 882 the Saracens, having been invited by Duke Radelchis to assist him, captured it and held it for some time. It was retaken by the Byzantines, who were forced to cede it to Otto II in 982; in 1080 it fell into the hands of Robert Guiscard, who made it the capital of the Principality of Taranto, and gave it to Boemund, his son. When the House of Anjou was divided, Taranto fell to Durazzo (1394–1463). In 1504 Ferdinand, King of Naples, valiantly defended this extremity of his kingdom, but had to cede it to Gonsalvo di Cordova. In 1801 it was taken by the French, who fortified the port; in 1805 the Russian fleet, allied with the British, remained there for several months. Taranto is the birthplace of the musician Paisiello.

According to the local legend, the Gospel was preached in Taranto by the same St. Peter who had consecrated St. Amasianus bishop. The city venerates also the martyr St. Orontius. The first bishop whose date is known is Innocentius (496). In the time of St. Gregory the Great, three bishops filled the episcopal chair: Andreas (590), Joannes (601), Honorius (603). It is uncertain whether St. Cataldus belongs to the sixth or the seventh century. Joannes (978) is the first who had the title of archbishop. It is well known that Taranto even under the Byzantines never adopted the Greek Rite. Stephanus perished in the battle of Nelfi (1041) fought by the Greeks and the Normans; Draco (1071) erected the cathedral; Filippo (1138) was deposed for supporting the antipope Anacletus II, and died in the monastery of Chiaravalle; Archbishop Angelo was employed in several embassies by Innocent III; Jacopo da Atri was slain (1370); Marino del Giudice (1371) was one of the cardinals condemned by Urban VI (1385). Cardinal Ludovico Bonito (1406) was one of the few who remained faithful to Gregory XII; Cardinal Giovanni d'Aragona (1478), was son of King Ferdinand of Naples; Giovanni Battista Petrucci suffered for the complicity of his father in the conspiracy of the barons; Cardinal Battista Orsini died in 1503 in the Castle of Sant' Angelo; Cardinal Marcantonio Colonna (1560) introduced the Tridentine reforms and established the seminary; Girolamo Gambara (1569) was a distinguished nuncio; Lelio Brancaccio (1574) suffered considerable persecution on account of his efforts at reformation; Tommaso Caracciolo (1630), a Theatine, died in the odour of sanctity. The city of Taranto forms a single parish divided into four *pittagerii*, each of which contains a *sub-pittagerio*. It includes the Basilian Abbey of S. Maria di Talfano, where there are still some Albanians following the Greek Rite. The suffragan sees are Castellaneta and Oria. The archdiocese contains 26 parishes, 214 secular and 47 regular priests; 5 religious houses of men, and 12 of nuns; and 220,300 inhabitants.

U. BENIGNI.

Tarapacá, VICARIATE APOSTOLIC OF (DE TARAPACÁ), situated in Chile, bounded on the north by the cañon of the Camarones and on the south by the Loa River. It comprises the civil province of the same name, has an area of 19,305 square miles, and a population of 106,215 Catholics and 3821 non-Catholics. The diocese is divided into 11 parishes, and has 63 churches and chapels, and 30 secular and 14 regular priests. The male religious orders are represented by the Franciscans, Redemptorists, and Salesians; they have 4 houses and 24 members. The female orders are Sisters of the Good Shepherd of Angers, of St. Joseph of Cluny, and the Salesian Sisters; they have 50 members and 5 houses. In Iquique the Salesian Fathers have a college for boys and the Salesian Sisters one for girls, the latter having more than 200 pupils. The Sisters of St. Joseph of Cluny have a school in Pica, and a hospital and asylum for children in Iquique. The Sisters of the Good Shepherd have a house of correction for women in Iquique. There are many societies and pious associations in the diocese, the principal being that of *Orden Social* for men, the *Centro Cristiano* and the Society of St. Philomena for women in Iquique, and the Society of St. Andrew in Pica. There are 5 primary schools with 481 pupils. The State pays an annuity to the vicar Apostolic, and to the employees of the vicarage, the parish priests, and curates, and also contributes towards the construction of the churches. The vicariate was erected in 1882, when Chile took possession of the Province of Tarapacá, which had formerly belonged to Peru and to the Diocese of Arequipa. Five vicars apostolic have ruled the vicariate since its erection: Camilo Ortûzar; Plácido Labarca; Daniel Fuenzalida; Guillermo Juan Cárter, titular Bishop of Anthedon; and Martín Rücker. The principal cities are: Iquique (45,000 inhabitants) and Pisaqua (5105 inhabitants). The population is composed mainly of miners and workers in the saltpetre beds, who are homeless and little given to the practice of their religion. To provide a remedy and alleviate this condition, missions are preached almost every year in the saltpetre works.

CARLOS S. COTAPOS.

Tarasius, SAINT, Patriarch of Constantinople, date of birth unknown; d. 25 February, 806. He was the son of the Patrician and Prefect of Constantinople, George, and his wife Eukratia, and entered the service of the State. In 784 when Paul IV Patriarch of Constantinople died Tarasius was an imperial secretary, and a champion of the veneration of images. It may be that before his death the patriarch had recommended Tarasius as his successor in the patriarchate to the Empress Irene who was regent for her son Constantine VI (780–797). After the burial of Paul IV a great popular assembly was held before the Magnaura Palace to discuss the filling of the vacant see. The empress delivered an oration on the new appointment to the patriarchate and the people proclaimed Tarasius as the most worthy candidate. The empress agreed but said that Tarasius refused to accept the position. Tarasius now made a speech himself in which he declared he felt himself unworthy of the office, further that the elevation of a layman was very hazardous, and that the position of the Church of Constantinople had become a very difficult one, as it was separated from the Catholics of Western Europe and isolated from the other Oriental patriarchates; consequently he would only be willing to accept the position of patriarch on condition that Church unity be restored and that, in connexion with the pope, an œcumenical council be called. The majority of the populace approved of these views and the imperial Court agreed to it. So on 25 December, 784, Tarasius was consecrated patriarch. In 785 he sent the priest George as his legate to Hadrian I with a letter in which he announced his appointment. In his reply the pope expressed his disapproval of the elevation of Tarasius directly from the laity to the dignity of a bishop contrary to canonical regulation, but allowed clemency to rule in view of the orthodoxy of the new patriarch's views, and recognized him as patriarch. After this by joint action with the pope and the imperial Court Tarasius called the Second Council of Nicæa, the Seventh Œcumenical Council, which rejected Iconoclasm (q. v.). Union with the Roman Church was restored.

After the synod the patriarch had a number of struggles not only with the Iconoclastic party of the capital but also with a party of Orthodox monks. First, the latter upbraided him for restoring to office the bishops who had formerly maintained Iconoclasm, but who had submitted to the decrees of the Council of 787. As, however, this was in accordance with the decrees of the council the accusation was allowed to drop. Another accusation was much more serious, namely, that Tarasius tolerated and encouraged simony, because those bishops who had given money to obtain their positions were only commanded by him to do a year's penance and were permitted to retain their offices. The patriarch defended himself in writing against this accusation which he denied in toto; moreover, he issued a severe synodal letter against Simonists. The monks, however, were not satisfied; they maintained their accusations and also attacked the Council of 787. At a later date Theodore of Studium, who took part in these disputes, changed his opinion of Tarasius, and also of the Second Council of Nicæa, the œcumenical character of which he acknowledged. Many serious difficulties still existed in regard to Western Europe. There were also fresh disputes in Constantinople when the Emperor Constantine VI put aside his lawful wife and wished to marry Theodata, a relative of Abbot Theodore of Studium. Tarasius positively refused to perform the second marriage and expressed his displeasure at the conduct of the priest Joseph who had married the emperor. The zealous monks, whose leaders were the Abbots Plato of Saccudium and Theodore of Studium, accused the patriarch of weakness, because he took no further steps against the emperor. They refused to have Church fellowship any longer with Tarasius, and were, consequently, violently persecuted by the emperor who, however, also treated the patriarch harshly. After Irene had dethroned Constantine in 797, Tarasius deposed the priest Joseph and peace was once more restored between the patriarch and the monks. (See THEODORE OF STUDIUM). In 802 Tarasius crowned as emperor Nicephorus, who had overthrown Irene, an act that greatly dissatisfied the populace. The patriarch had nothing to do with the intrigues of the Court. His life was ascetic and simple, he checked the luxury of the clergy, preached with great zeal, and was very benevolent to the poor. After his death he was venerated as a saint. His name is also placed in the Roman Martyrology under the date of 25 February.

J. P. KIRSCH.

Tarazona, DIOCESE OF (TURIASONENSIS), comprises the Spanish provinces of Saragossa, Soria, Navarre, and Logroño. The city of Tarazona has a population of 8650, and is situated on a commanding point, surrounded by a beautiful open plain, through which the River Queiles flows. Turiaso was one of the principal towns of the ancient Celtiberian province, and within the confines of the diocese are found many very ancient cities: Bilbilis (Calatayud); Aquæ Bilbilitanorum (Alhama); Atacum (Ateca); Augustobriga (Muro); Boverca (Buvierca); Bursao (Borja); Cascantum (Cascante); Gracuris (Corella); Monóbriga (Munébrega); and Vergegium (Verdejo). Pliny numbers Tarazona among the principal cities of the Celtiberians, and its inhabitants had the privileges of citizenship. Its coat of arms bore the motto "Tubal-Cain built me and Hercules rebuilt me". Nothing definite is known of the origin of Christianity in Tarazona. Owing to its proximity to Saragossa it is supposed that it was visited at an early date by the disciples of St. James, but until the fifth century there is no reliable mention of a bishop of Tarazona. The chronicler Idatius names Leo and says that he lived in 449; the chronological list of bishops gives St. Prudentius, but the history of this saint is not positively known. The Tarazona Breviary gives 390 as the date, but other sources place him as late as the ninth century. Idatius says that Leo was killed in an uprising led by a certain Basilius where the Bagandæ took refuge in the cathedral, and in which a great number were killed.

St. Gaudiosus, a former monk of the Monastery of Asanense and a disciple of St. Victorian, was bishop in 530. He worked against the Arians, and died in his native city, Escoron. His remains were translated to the Monastery of Asanense, and King Sancho Ramírez had them removed to Montearagón. St. Braulio, in his life of St. Emilianus, speaks of a Didymus, Bishop of Tarazona. A Bishop Stephen assisted at the Third Council of Toledo and at the Council of Saragossa; Floridius, at that of Gundemar (611); Elpisius, at the Fourth and Fifth Council of Toledo; Antherius (683) sent a deacon to represent him at the Thirteenth Council of Toledo; and Nepotianus assisted at the fifteenth and seventeenth. He seems to have been the last bishop of the Visigothic epoch. When the Moors took Tarazona they were able to hold it for a long time on account of its fortified position near the Moncaya, between the Douro and the Ebro. The names of its Mozarabic bishops have not come down to us, although it is very probable there were such; on the other hand we know of the Mozarabic saints, St. Attilanus, Bishop of Zamora and St. Iñigo of Calatayud. Alfonso I the Warrior (*el Batallador*) took possession of Tarazona in 1119, and named Miguel Cornel the bishop. Alfonso VII, in an effort to get possession of Tarazona, intruded a certain de Bujedo into the see; but de Bujedo repented shortly afterwards, restored the see to its rightful owner, Miguel, and retired to the Monastery of Valpuesta. The Council of Burgos, which was convened in 1139, and was presided over by the legate Guido, took from the jurisdiction of Tarazona most of the towns of Soria, but bestowed in its place the Archdeaconry of Calatayud.

Miguel was the real restorer of the see. He governed for thirty-three years, and established the chapters of Tarazona, Calatayud, and Tudela, under the Rule of St. Augustine. In his time also were founded the Monasteries of Fitero and Veruela. Three bishops of the name of Frontin succeeded him: Juan (1173–94); Garcia, who was present at the battle of Las Navas, and Garcia II, the counsellor of Jaime the Conqueror (*el Conquistador*). In a species of national council held at Tarazona, the marriage of Jaime to Leonor of Castile was declared null on account of the relationship existing between them. The Franciscans, Mercedarians, Dominicans, and Trinitarians, and the Cistercian and Poor Clare nuns were established in the diocese at this time. Miguel Jiménez de Urrea, bishop from 1309 to 1316, was protected by Jaime II, and during the time of Pedro Perez Calvillo the war between Pedro IV the Ceremonious (*el Ceremonioso*) and Pedro the Cruel of Castile took place. Tarazona was laid waste and its cathedral desecrated by the Castilians. The episcopal palace was burned, and la Zuda, sometimes also called Alcázar de Hércules, the palace of the Arab governors, was taken to replace it.

The following bishops are also worthy of special mention: Jorje Bardaji (1443–64), son of an Aragonese magistrate; Cardinal Pedro Ferriz, favourite of Paul II and Sixtus IV; Guillén Ramon de Moncada; Pedro Cerbuna, founder of the seminary and of the University of Saragossa (1585–97); Jerónimo Castellon y Salas, last Inquisitor-General of Spain (1815–35). The Church of the Magdalen was the ancient cathedral, but the Moors, objecting to its prominent position, compelled them to use a church on the outskirts of the town. In the records left by Miguel this was variously called Santa Maria de la Hidria, de la Vega, or de la Huerta, on account of its position. It was endowed by Teresa Cajal, mother of Pedro de Atarés and wife of Borja, and had been commenced in 1152. Architecturally it is a combination of Byzantine and Gothic, with a high portico entrance and a high brick-trimmed tower. The centre nave with its pointed arches rises above the side aisles and merges into a spacious transept. In the windows the Gothic gives place to the Plateresque, but in the side chapels dedicated to St. Lawrence, St. Andrew, the Rosary, St. Peter, the Beheading of St. John the Baptist, the Annunciation, St. Elizabeth, the Purification, and St. James, the Gothic prevails in the reredos and mausoleums. Bishop Moncada attempted to rebuild the beautiful cloister which had been destroyed in the war with Castile, but as late as 1529 this had not been completed. Besides the Church of the Magdalen, the Church of St. Michael, with its simple Gothic nave and that of the Conception nuns, are also notable. The Church of St. Francis is said to have been founded by St. Francis himself in 1214, and Cisneros was consecrated Bishop of Toledo in the Chapel of La Piedad in 1495.

The episcopal palace, the ancient Azuda, is built upon a commanding eminence and has a beautiful view. Bishop Calvillo purchased this from the Aragonese governor, Jordán Pérez de Urríes, in 1386, and entailed it to the bishopric. The diocesan seminary, dedicated to St. Gaudiosus, was founded in 1593 by Bishop Cerbuna. It has recently been extensively renovated. Mention should be made of the monastery of Nuestra Señora de Veruela, a Cistercian abbey founded by Pedro de Atarés, and now a Jesuit novitiate; also of the Church of Borja, ranking as a collegiate church since the time of Nicholas V (1449), favoured and protected by Alexander VI; and of the ancient collegiate church of Calatayud, Santa Maria de Mediavilla, whose priors ranked as mitred deans.

RAMON RUIZ AMADO.

THE CATHEDRAL, TARBES

Tarbes, DIOCESE OF (TARBIA), comprises the Department of the Hautes-Pyrénées (ancient territory of Bigorre), included in 1802 in the Diocese of Bayonne, re-established theoretically by the Concordat of 1817 and actually by the Bull of 6 October, 1822. The new Diocese of Tarbes lost twenty-one parishes which were added to the Diocese of Bayonne, and twenty to the Archdiocese of Auch; but the parishes of the country of the Quatre Vallées and of the Vallée de Louron, formerly part of the archdiocese of Auch and the bishopric of Comminges, were reunited to the Diocese of Tarbes, suffragan of Auch. Tradition has preserved the names of St. Girinus and St. Evex or Erex, as the first martyrs of Bigorre. The district was laid waste by the Vandals, who were afterwards put to flight by St. Missolinus, a priest; it was disturbed by the Priscillianist heresy and finally terrorized by the Arian Visigoths, who, in the reign of Ewarik, waged a bloody persecution against the clergy. Mgr Duchesne considers St. Justin whom the "Gallia Christiana" cites as the first in the list of bishops of Tarbes, to have been only a priest, and excludes from that list St. Faustus, who, in his opinion, is none other than the celebrated Faustus of Riez. He considers Aper, represented at the Council of Agde in 506, as the first historically known bishop of the see. Among the successors are cited: St. Landeolus, bishop in 870; William I (1120–41) who helped to draw up the ancient "For de Bigorre," one of the oldest and most curious monuments of the law of the Middle Ages; Pierre de Foix (1462–64), cardinal in 1437; Gabriel de Gramont (1524–34), cardinal in 1531, who attempted to negotiate between Henry VIII and the Holy See to prevent a rupture.

The Benedictine monastery of St. Savin of Lavedan was founded by Charlemagne and shortly took the name of the hermit and miracle worker, St. Savin, who was one of its monks and died before 840; the abbot was lord of the territory and the villages under his obedience were called a republic. The Benedictine Abbeys of St. Orens of Larreule and of St. Orens of Lavedan were founded, one in 970 and the other before the eleventh century in honour of St. Orens, Bishop of Auch, who had first lived as a hermit in the Lavedan. The monastery of St-Pé de Générès, was founded about 1032 by Sanche, Duke of Gascony; it was the cradle of the town of Saint-Pé. The priory of Sarrancolin was founded about 1050 in memory of St. Ebbons, who fought against the Moors in Catalonia and died at Sarrancolin. The Abbey of Escale Dieu was founded in 1140; it was the daughter of the Cistercian Abbey of Morimond. St. Bertrand of Comminges was one of its monks; another, St. Raymond, was sent to Spain in 1158, where he founded the Abbey of Fitère, and the celebrated semi-religious, semi-military order of Calatrava. St. Bertrand, Bishop of Comminges (1073–1123), preached the Gospel in the Vallée d'Azun in the Diocese of Tarbes. To make amends for the hostile reception that had been given him, the inhabitants pledged themselves to give the See of Comminges all the butter that should be produced in the territory of Azun during the week preceding Pentecost; this impost was paid down to 1789. As natives of Bigorre may be cited: Cardinal Arnaud d'Ossat (1536–1604), born at Larroque Magnoac, who played an important part in the reign of Henry IV; Bernard Pierre Carasse, born at Tarbes at the opening of the sixteenth century, who, from being a warrior, became general of the Carthusians, revised the constitutions of the order, and was so illustrious in his day, that in 1582 Catherine de Medici visited La Chartreuse to see him.

The fame of the Diocese of Tarbes has been spread throughout the Christian world since 1858 by the pilgrimages and the miracles of Lourdes (q. v.). Mention must also be made of the pilgrimage of Notre Dame de Garraison at Monléon, dating back to the fifteenth century; that of Notre Dame de Poueylahun near Eaux Bonnes, dating back to the sixteenth century; the pilgrimage to Mazères, near the vacant shrine of St. Liberata, perhaps a martyr under Julian the Apostate; the pilgrimage to Arreau, to the chapel of St. Exuperius, friend of St. Jerome, who died Archbishop of Toulouse, about 417, after combating the heresy of Vigilantius. Before the application of the law of 1901 against the congregations there were in the Diocese of Tarbes, the Priests of the Immaculate Conception at Lourdes, Carmelites, and various teaching orders of brothers. Several congregations of nuns were originally founded in the diocese: the Sisters of St. Joseph, hospitallers and teachers, with their mother-house at Cantaous; the Sisters of Notre Dame des Douleurs, hospitallers, with their mother-house at Tarbes, and a branch house in Cairo; the Sisters of the Immaculate Conception of Notre Dame de Lourdes, with their mother-house at Lourdes. At the close of the nineteenth century the religious congregations directed in the diocese: 5 schools, 1 home for sick children, 1 school for the deaf and dumb, 6 girls' orphanages, 6 workshops, 3 homes for the poor, 12 hospitals or hospices, 3 houses of retreat, 6 houses of nuns devoted to nursing the sick in their own homes. At the time of the abrogation of the Concordat (1905) the Diocese of Tarbes contained 215,546 inhabitants, 28 cures, 300 succursal churches, and 135 vicariates towards the support of which the State contributed.

Gallia Christiana (*nova*) (1715), I, 1223–42, *instrum.*, 191–7; Duchesne, *Fastes épiscopaux*, II (Paris, 1894–9), 101–02; Couture, *Le diocèse de Tarbes et son dernier historien* in *Revue de Gascogne*, VI (1865), 575–85; de Lagrèze, *Histoire religieuse de la Bigorre* (Paris, 1862); Batsere, *Esquisses: Tarbes et ses environs, Bagnéres, Baudéan, épisodes* (Tarbes, 1856).

Georges Goyau.

Tarentaise, Diocese of (Tarantasiensis), comprises the arrondissement of Moutiers in the Department of Savoie; it is also sometimes called the Diocese of Moutiers en Tarentaise, and is suffragan of Chambéry. Legend relates that the "Centrones" were evangelized in the fifth century by James the Assyrian, secretary to St. Honoratus, Archbishop of Arles. He became the first Bishop of Darantasia or Tarentaise, the metropolis of the "Centrones", and named St. Marcellus as his successor. The first document in which the Diocese of Tarentaise is reliably mentioned is a letter of Leo the Great (5 May, 450) which assigns to the Archdiocese of Vienne, among other suffragans, the Bishop of Tarentaise. The first historically known bishop is Sanctius who in 517 assisted at the Council of Epaon. A plea was brought before the Council of Frankfort (794) against the decision of Leo I that had been confirmed by Popes Symmachus and Gregory the Great. Leo III partly acceded to this plea, and made Darantasia a metropolis with three suffragans, Aosta, Sion, and Maurienne, but maintained the primacy of Vienne. For four centuries this primacy was the cause of conflicts between the archbishops of Tarentaise and those of Vienne; subsequently Maurienne was again attached to the metropolis of Vienne.

The city of Darantasia was destroyed by the Saracens in the tenth century, whereupon the archbishops moved their residence to the right bank of the Isère, calling it their *moutier* (monastery), and it was at this place that the town of Moutiers began to be built in the second half of the tenth century. In the twelfth century the archbishops of Tarentaise were powerful sovereigns. In 1186 a bull of Frederick Barbarossa recognized the Archbishop of Tarentaise as immediate vassal of the empire and prince of the Holy Roman Empire in disregard of the pretensions of Humbert III, Count of Savoy; but in 1358 a transaction between Archbishop Jean de Bertrand and the Count of Savoy, Amadeus VI, fixed the respective rights of the archbishops and the counts. Tarentaise belonged to France from 1536 to 1559, and from the sixteenth to the eighteenth century was on four occasions wrested for a time by France from the House of Savoy. In 1792 it formed the Department of Mont Blanc. The Treaty of Paris (30 May, 1814) gave it to the King of Sardinia, while the Plebiscite of 22 and 23 April, 1860, gave it to France. The Archdiocese of Moutiers in Tarentaise was suppressed in 1792 by the French Revolution. In 1825 a diocese was re-established at Moutiers, suffragan of Chambéry, and was maintained in 1860 in virtue of a special clause in the treaty ceding Savoy to France.

Among the archbishops of Moutiers in Tarentaise may be mentioned: St. Peter I (about 1130), the first Cistercian raised to the episcopate, who founded in a defile the Cistercian Abbey of Tamié, to serve as a shelter for pilgrims and travellers; the Cistercian monk St. Peter II (1141–74) founded the charity of the *pain de Mai*, which until the second half of the eighteenth century distributed bread at Moutiers at the expense of the archdiocese during the first twenty-eight days of May; it was he who upheld Alexander III against Frederick Barbarossa and the Antipope Victor IV, and maintained in obedience to Alexander III the seven hundred abbeys of the Cistercian Order. Alexander decided (3 Feb., 1171) that thenceforth the metropolitan See of Tarentaise should depend only on Rome; St. Peter III (1271–83); Cardinal Antoine de Chalant (1402–18), to whom has been ascribed "Le livre du Roi Modus et de la reine Ratio", a much-esteemed treatise on hunting; Cardinal Jean d'Arces' (1438–54), who at the Council of Basle in 1440 supported Duke Amadeus of Savoy, antipope under the name of Felix V, against Eugene IV; Cardinals Christopher and Dominic de la Rovère (1472–78 and 1478–83), whose tomb erected at Rome in the Church of Santa Maria del Popolo is a splendid monument of the Renaissance; Germonio (1607–27), who played an important part in the seventeenth-century reform of the clergy and whose "Commentaries" and "Acta Ecclesiæ Tarentasiensis" are important documents for the history of the time. As natives of the diocese may be mentioned: Pope Nicholas II (1059), b. at Chevron-Villette of the family of the lords of Miolans; Pierre d'Aigueblanche, who in 1240 became Archbishop of Hereford in England, and for twenty-five years was councillor and minister to Henry III of England; Blessed Peter of Tarentaise, who became pope in 1276 under the name of Innocent V.

The chief pilgrimages of the diocese are: Notre Dame de Briançon, which dates from the victory over the Saracens in the tenth century. Francis I and Henry IV visited this shrine; Notre Dame des Vernettes, at Peisey, created in the eighteenth century near a miraculous fountain; Notre Dame de la Vie at St. Martin de Belleville; Notre Dame de Beaufort; St. Anne at Villette dating from 1248. Before the application of the Law of 1901 regarding associations there were in the diocese Augustinians of the Assumption, Capuchins, and two orders of teaching brothers. The Sisters of St. Joseph, nursing and teaching sisters, separated in 1825 from the Congregation of Puy. Several hospitals and schools in Brazil are dependent on their mother-house at Moutiers. At the end of the nineteenth century religious congregations in the diocese were charged with: 4 infant schools, 2 orphanages for girls, 6 infirmaries or hospitals, 4 houses of retreat. In 1905 (end of the period of the Concordat) the diocese numbered 68,000 inhabitants, 7 parishes, 79 succursal churches, and 21 vicariates remunerated by the Government.

Georges Goyau.

Targum (Targumim; תרגומים singular, תרגום "translation" (cf. מתרגם, Ezra, iv, 7) is the distinctive designation of the Aramaic translations or paraphrases of the Old Testament. After the return from exile Aramaic gradually won the ascendancy as the colloquial language over the slowly decaying Hebrew until, from probably the last century before the Christian era, Hebrew was hardly more than the language of the schools and of worship. As the majority of the population ceased to be conversant with the sacred language it became necessary to provide translations for the better understanding of the passages of the Bible read in Hebrew at the liturgical services. Thus to meet this need it became customary to add to the portions of the Scriptures read on the Sabbath an explanatory oral translation—a Targum. At first this was probably done only for the more difficult passages, but as time went on, for the entire text. The "Mishna" gives elaborate instructions as to the way in which this translating should be done. According to the "Megillah" (IV, 4), when the lesson to be read aloud was from the "Torah" only one verse was to be read to the translator (*Methurgeman*, מתורגמן). When the lesson was from the "Nebi'im" it was permitted to read three to him, unless each verse formed a special division. The directions also state which portions are to be read aloud but not translated (cf. for instance "Meg.", IV, 10), and a warning is given against translations that are either too free, palliative, allegorical etc.

Another regulation was that the Targum was not to be written down ("Jer. Meg.", IV, i=fol. 74 d). This prohibition, however, probably referred only to the interpretation given in the synagogue and did not apply to private use or to its employment in study. In any case, written Targums must have existed at an early date. Thus, for instance, one on the Book of Job is mentioned in the era of Gamaliel I (middle of the first century A. D.), which he, however, was not willing to recognize ("Sabb.", 115a; cf. "Tos. Sabb.", 13, 2=p. 128, ed. Zuckermandel). If Matt., xxvii, 46, gives the Aramaic form of Ps., xxi, 2, the last utterance of the Saviour upon the Cross, this shows that even then the Psalms were current among the people in the Aramaic language; moreover, Ephes., iv, 8, has a closer connexion with the Targum to Ps., lxvii, 19, than with the Masoretic text. In addition, the "Mishna Yadayim", IV, 5, and "Sabb.", XVI, also indicates the early existence of MSS. of the Targum. These MSS., however, were only owned privately not officially as for a long period the Targums were without authoritative and official importance in Palestine. This authoritative position was first gained among the Babylonian Jews and through their influence the Targums were also more highly esteemed in Palestine, at least the two older ones. In the form in which they exist at present no Targum that has been preserved goes back further than the fifth century. Various indications, however, show the great antiquity of the main contents of many Targums, their theology among other things. That as early as the third century the text, for instance, of the Targum on the Pentateuch was regarded by the synagogue as traditionally settled is evident from the "Mishna Meg.", IV, 10, "Jer. Meg.", 74d, "Hab. Kidd.", 49d, "Tos. Meg.", IV, 41. There are Targums to all the canonical books excepting Daniel, Ezra, and Nehemiah; for some books of the Bible there are several Targums. As regards age and linguistic character they may be divided into three classes: (1) Targum of Onkelos and Targum of Jonathan; (2) Jerusalem Targums; (3) Targum on the Hagiographa.

The form of language used in the Targums is called specifically the "Targum dialect". It belongs to western Aramaic and more particularly to the Aramaic of Palestine. Its home is to be sought in Judea, the ancient seat of the learning of the scribes. It should be borne in mind that this Targumic language does not represent the spoken Aramaic, but is the result of the labours of scholars. Consequently the point under discussion turns on a literary Aramaic originally formed in Judea. This is particularly true of the two earlier Targums; the later ones show generally an artificially mixed type of language. The traditional pointing of the texts is valueless and misleading: a more certain basis was first offered by MSS. from Southern Arabia in which the pointing for the vowels was placed above the line. In Arabia the old synagogal custom of reciting the Targum at the religious services had been retained, and consequently more interest was felt there in the pronunciation. It must be acknowledged, however, that this cannot be regarded as a direct reproduction of the Palestinian pronunciation; it may have sprung from a formal treatment of the Targum of Onkelos customary among the Babylonian scholars. As regards the method of translation all Targums in common strive to avoid as much as possible anthropomorphisms and anthropopathic terms, as well as other apparently undignified expressions concerning, and descriptive of God. The Targums are printed in the Rabbinical and Polyglot Bibles, although the two do not always contain the same Targums or an equal number of them. See below for particulars as to individual editions.

Wissensch. des Judentums*, XXXVIII (1894), 203 sqq., 241 sqq., 289 sqq.; MAYBAUM, *Die Anthropomorphien u. Anthropopathien bei Onkelos u. in den späteren Targumim* (Breslau, 1878); GINSBURGER, *Die Anthropomorphismen in den Thargumim* in *Jahrbücher für prot. Theol.* (Brunswick, 1891), 262 sqq., 430 sqq. As regards the language: DALMAN, *Grammatik des jüdisch-palästinischen Aramäisch* (2nd ed., Leipzig, 1905); IDEM, *Aramäisch-neuhebr. Wörterbuch* (Frankfort, 1897–1901).

I. THE TARGUM OF ONKELOS.—The official Targum to the Pentateuch (תרגום שׁל תורה) is designated by the name of Onkelos (אנקלוס). In the Babylonian Talmud and in the Tosephta, Onkelos is the name of a proselyte who is mentioned as a contemporary of the elder Gamaliel ("Aboda zara", 11a; cf. "Tos. sabb.", 8=p. 119, ed. Zuckermandel). The labours of Onkelos are referred to in "Meg.", 3a, in the following words: "Rab Jeremiya, according to others Rab Hiya bar Abba says: 'According to the statement (מפי) of Rab Eliezer and Rab Josua, Onkelos the proselyte has said, אמרו that is, has orally formulated, the Targum of the Torah'". Gaon Sar Shalon (d. 859) was the first who, taking this passage as a basis, called the Pentateuch-Targum the Targum of Onkelos. This he did in an opinion concerning the Targum which he evidently had before him at the time in a written copy. The designation that thus arose became customary through its acceptance by Rashi and others. It is evident, however, that in the passage mentioned ("Meg.", 3a) there has been a confusion with the name of Aquila, the translator of the Bible, for the older parallel passage of the Palestinian Talmud ("Meg.", I, 11 = fol. 71c) says the same of Aquila and his Greek translation of the Bible. Compare also Midrash, Tanchuma, Mishpatim, 91, 92 (ed. Mantua, 1863, fol. 36b). Thus it seems that in Babylonia the old and correct knowledge of the Greek translation of the proselyte Aquila was erroneously transferred to the anonymous Aramaic translation, that consequently Onkelos (instead of Akylas) is a corrupted form or a provincial modification of Aquila (עקילס), as, for instance, the Tosephta has אנקלס always (five times) for עקילס. It is not necessary to discuss here earlier views concerning this point. The effort to prove the existence of an Onkelos distinct from Aquila is still made by Friedmann ("Onkelos und Akylas" in "Jahresber. der Israelit.-theol. Lehranstalt in Wien", 1896), but the proof adduced is not convincing (cf. Blau in "Jewish Quarterly Review," IX, 1897, p. 727 sqq.).

Thus it is not known who wrote the Targum named after Onkelos. In any case the Targum, at least the greater part of it, is old, a fact indicated by the connexion with Rab Eliezer and Rab Josua, and belongs probably to the second, or it may be to the first century of our era. It arose, as the idiom shows, in Judea, but it received official recognition first from the Babylonian Rabbis, and is therefore called by them תרגום דידן (our Targum), or is quoted with the formula כדמתרגמינן (as we translate). Rab Natronay (d. 869) in speaking of this ת̇ דרבנן says, that it is not permitted to replace it in the services of the synagogue by any other translation of the Pentateuch. The high reputation of this authorized translation is shown by the fact that it has a Masorah of its own. The fixing of the written form, and thereby the final settlement of the text as well, should not be assigned to a date before the fifth century. The language is, in general, an artificial form of speech closely connected with the Biblical Aramaic. It is probably not the spoken Aramaic used as a dialect by the Jewish people, but a copy made by scholars of the Hebraic original, of which the Targum claims to give the most faithful reproduction possible. In doing this the Aramaic language is treated similarly to the Greek in the translation of Aquila, consequently the many Hebraic idioms. There is no positive proof (Dalman, "Gramm", 13) of a corrupting influence of the Babylonian dialect as Noldeke held ["Semit. Sprachen" (1887), 32; (2nd ed., 1899), 38].

As regards the character of the translation it is, taken altogether, fairly literal. Anthropomorphic and anthropopathic expressions are avoided by roundabout expressions or in other ways; obscure Hebrew words are often taken without change into the text; proper names are frequently interpreted, as Shinar-Babylon, Ishmaelites-Arabs; for figurative expressions are substituted the corresponding literal ones. Haggadic interpretation is only used at times, for instance in prophetic passages, as Gen., xlix; Num., xxiv; Deut., xxxiii. This Targum was first printed at Bologna (1482) together with the Hebrew text of the Bible and the commentary of Rashi; later, in the Rabbinical Bibles of Bomberg and Buxtorf, and with a Latin translation in the Complutensian Polyglot (1517), and the Polyglots of Antwerp (1569), Paris (1645), and London (1657). Among separate editions of the Targum special mention should be made of that printed in 1557 at Sabbioneta. More modern editions are: Berliner, "Targum Onkelos" (2 vols., Berlin, 1884), in which vol. I contains the text according to the Sabbioneta edition, and vol. II, elucidations; the Yemanites at Jerusalem have printed with an edition of the Pentateuch (*sefer Keter tora*) from MSS. the Arabic translation by Saadya (Jerusalem, 1894–1901), in which publication the vowel pointing above the line has been changed to sublinear pointing; Barnheim, "The Targum of Onkelos to Genesis" (London, 1896), on the text of the Yemen manuscripts. In addition to the Latin translations in the Polyglot Bibles there is one by Fagius (Strasburg, 1546); there is also an English translation by Etheridge, "The Targum of Onkelos and Jonathan ben Uzziel on the Pent., with the Fragments of the Jerusalem Targum", from the Chaldee (2 vols., London, 1862–65).

KAUTZSCH, *Mitteilung über eine alte Handschr. des Targ. Onk.* in *Cod. Socini, No. 84* (Halle, 1893); BERLINER, *Die Massorah zum Targ. O.* (Leipzig, 1877); LANDAUER, *Die Mâsôrâh zum O.* (Amsterdam, 1896); BREDEREK, *Concordanz zum T. O.* (Giessen, 1906); IDEM, *Über die Art der Übersetzung im T. Onk.* in *Theol. Studien u. Kritiken* (Gotha, 1901), 351–77.

THE TARGUM OF JONATHAN (YONATHAN).—The Targum to the Prophets (*priores*, historical books; *posteriores*, the actual Prophets) now in existence is ascribed to Jonathan ben Uzziel, who is said on the authority of the Babylonian "Megillah", 3a, to have formulated it orally (אמרו), in accordance with the instructions (מפי) of Haggai, Zachariah, and Malachi. This assertion probably means that in his exposition he gives the traditional interpretation that had been handed down from one generation to another since early times. According to the Babylonian "Sukkah" (28a=baba bathra 134a), he was the most noted pupil of the elder Hillel, and is therefore assigned to the first Christian century. The Babylonian Talmud in quoting passages from this Targum ascribes them to Rab Joseph bar Hiya (d. 333), the head of the school at Pumbaditha. Rab Joseph was regarded as a great authority on the tradition of the Targum and his judgment on the translation of individual passages was eagerly listened to; he may perhaps be considered as the editor of this Targum. For Jonathan as for Onkelos the final settlement of the written form did not occur until the fifth Christian century. Cornill claims to show ("Einleitung", 2nd ed., 1893, p. 308) that the Targum on the Prophets is older than the Torah-Targum, but the reasons produced are not convincing (cf. Dalman, 15, *passim*). Linguistically, this Targum approaches most closely that of Onkelos; in grammatical construction the two are alike but the words used differ, and this Targum is more paraphrastic. In the historical books Jonathan himself is often the expounder, but in the actual prophetic books the exposition is in reality Haggadic. The religious opinions and theological conceptions of the era that are interwoven are very instructive. The text, further, is not free from later additions; from this cause arise the double translations of which the Targum contains several. The "Prophetæ priores" was first printed with the Hebrew text and the commentaries of Gimhi and Levi at Leiria, Portugal, in 1494. At a later date the whole Targum was printed in the Rabbinical Bibles of Bomberg and Buxtorf and in the Polyglot Bibles of Antwerp, Paris, and London. The last edition is that of de Lagarde, "Prophetæ chaldaice e fide codicis Reuchliniani" (Leipzig, 1872). There are supplementary additions to this from an Erfurt MS. in "Symmicta", I, 139. The Targum to the Haphtarah is to be found in what is called the Pentateuch edition of the Yemanites at Jerusalem. English translations are: Pauli, "The Chaldee Paraphrase on the Prophet Isaiah Translated" (London, 1871); Levy, "Targum on Isaiah," I (London, 1889).

II. THE JERUSALEM TARGUMS.—This designation is not correct; the older and more correct name. תרגום ארע ישראל, i. e. Palestinian Targum, is found for instance in the writings of Gaon Haï (d. 1038). At a later date this designation was displaced by the term ירושלמי, just as before this the Palestinian Talmud (תלמוד ארץ ישראל) is called in the writings of Gaon Sar Shalon ת׳ ירושלמי. Fundamentally the language of these Targums is Palestinian Aramaic but of a very mixed type. Neither of them is homogeneous grammatically and lexically. Besides expressions that recall the Galilean dialect of the Palestinian Talmud a preference is shown for imitation of the language of the Targum of Onkelos, while there are also various terms belonging to the language of the Babylonian Talmud.

A. *Targum Yerushalmi I on the Pentateuch.*—This is generally called the Targum of Jonathan or of Pseudo-Jonathan, because it is cited in the first printed edition (Venice, 1591) under the name of Jonathan ben Uzziel. This designation, however, rests on a mistaken solution of the abbreviation ת ׳, that is, ת׳ירושלמי. The Targum could not have appeared in its present form before the second half of the seventh century. For example (Gen., xxi, 21), a wife and daughter of Mohammed are mentioned. Compare also (Gen., xlix, 26) the position of Esau and Ishmael as representatives of the Christian and the Mohammedan world. The Targum covers the entire Pentateuch. The only passages that are lacking are: Gen., vi, 15; x, 23; xviii, 4; xx, 15; xxiv, 28; xli, 49; xliv, 30–31; Exod., iv, 8; Lev., xxiv, 4; Num., xxii, 18; xxx, 20^b, 21^a; xxxvi, 8–9. As to its form it is a free Haggadic treatment of the text, that is, an exposition rather than a translation. A large part of it is made up of legendary narratives; there are also dialogues, rhetorical and poetical digressions. The paraphrase also discusses religious and metaphysical conceptions, as was the custom of the Jewish mystics of the seventh century. This Targum was first printed: as "תרגום ההרוש יונ תן כן עוז־אל", at Venice in 1591. It is also to be found in volume IV of the London Polyglot. A separate edition of this Targum was edited from the manuscript in the British Museum (MS. Addit. 27031) by Ginsburger, "Targum Jonathan ben Usiel zum Pentat." (Berlin, 1903). Concerning this codex cf. Barnstein in "Jew. Quart. Rev.", XI (1899), 167 sqq. An English translation has been published by Etheridge (*supra*).

Seligsohn and Traub, *Über den Geist der Übersetzung des Jonathan ben Usiel zum Pent. etc.* in *Monatschrift für Gesch. u. Wissenschaft des Judentums* (1857), 96 sqq., 138 sqq.; Marmorstein, *Studien zum Pseudo-Jonathan Targum* (Presburg, 1905).

B. *Targum Yerushalmi II* on the Pentateuch is also called the Fragmentary Targum, because the Targum on the entire Pentateuch has not been preserved, but only portions of it on numerous longer and shorter passages, frequently only the Targum on individual verses or parts of such. These fragments were first printed in the rabbinical Bible of 1517 as תרגום ירושלמי. In language, method of translation, and exegetical form they are related to the Pseudo-Jonathan. A perspicuously arranged compilation of the fragments that have been preserved is given by Ginsburger in the "ZDMG", LVII (1903), 67 sqq., and in loc. cit., LVIII (1904), 374 sqq., on a page that came from a *geniza* or repository in a synagogue for damaged manuscripts. A Latin translation from the Venice edition of 1517 was published by Taylor (London, 1649); English tr. by Etheridge (*supra*).

Ginsburger, *Das Fragmententargum* (Berlin, 1899); (1) Targum according to Cod. 110 of the National Library at Paris; (2) variants from Cod. Vat. 440 and Lips. 1; (3) quotations from old writers; matter supplementary to this work is given by Marx in *Zeitschrift für hebr. Bibliographie* (1902), 55–58.

Opinions concerning the connexion between the Targums Jerushalmi I and Jerushalmi II agree in general that both are to be traced back to different recensions of an old Jerusalem Targum. This is the view of Zunz (p. 73, and passim), and also that of Geiger, "Urschrift und Übersetzungen der Bibel" (Berlin, 1857), 454. Bassfreund (*infra*) reaches the conclusion that the basis both of the Fragmentary Targum and that of the Pseudo-Jonathan is a complete Jerusalem Targum of post-Talmudic origin, but that the two Targums, Jerushalmi I and II, presuppose the existence of the Targum of Onkelos. The Fragmentary Targum gives from this ancient Jerusalem Targum, according to Bassfreund, only matter supplementary to Onkelos, while Onkelos and the Jerusalem Targum have been used in preparing the Pseudo-Jonathan. In the preface to his edition of the Pseudo-Jonathan (see below) Ginsburger tries to prove that both the Fragmentary Targum and the Pseudo-Jonathan may be traced back to a very ancient Palestinian Targum, which was not influenced by the Targum of Onkelos until a later date. The Fragmentary Targum, in Ginsburger's opinion, represents a variant collection, not to Onkelos (as Bassfreund thinks), but to another recension of that ancient Jerusalem Targum. Ginsburger's views will have to be accepted as the more probable.

Bassfreund, *Das Fragmententargum u. sein Verhältnis zu den anderen paläst. Targumim* in *Monatschrift für Gesch. u. Wissenschaft des Judentums*, XL (1896), 1 sqq., 49 sqq., 97 sqq., 145 sqq., 241 sqq., 352 sqq.; 396 sqq.; Ginsburger, loc. cit., XLI (1897), 289 sqq., 340 sqq.; preface to *Pseudo-Jonathan*, ed. Idem (Berlin, 1903); Neumark, *Lexikalische Untersuchungen zur Sprache der jerusalemischen Pentat. Targume* (Berlin, 1905).

C. *Targum Yerushalmi III* is the name assigned by Dalman (Gramm., 29) to fragments which are given in old editions of the Pentateuch, as Lisbon (1491), Salonica (1520), Constantinople (1546), Venice (1591), and in several MSS. Nearly all have been published by Ginsburger, "Das Fragmententargum" (1899), 71–74.

D. There have also been Jerusalem Targums on the Prophets and on individual books of the Hagiographa. As regards the Targums on the Prophets de Lagarde has given Reuchlin's notes from the "Nebi'im Codex" in the introduction (pp. VI–XLII) to his "Prophetæ chaldaice" (*infra*). There are fragments on Josue, Judges, Samuel, Kings, Isaias, Jeremias, Amos, Jonas, Zacharias. [Cf. Bacher in "ZDMG", XXVIII (1874), 1–72; XXIX (1875), 157 sqq., 319 sq.]

III. Targums on the Hagiographa.—They are the work of various authors and have the character more or less of private undertakings, with the production of which the schools had nothing to do. Linguistically they are to be regarded as the work artificially produced of a late age. They depend in the main on the Jerusalem Targums and probably belong to the same era; the Targum on Chronicles may be somewhat later. Three groups are to be distinguished as regards linguistic character and relation to the original text: (a) Targums to Proverbs, Psalms, and Job; (b) Targums to the five *Megilloth*, that is Ruth, Esther, Lamentations, Ecclesiastes, Canticles; (c) Targums to the Books of Chronicles. The Targums mentioned under (a) adhere relatively closest to the text of the Bible. The Targum to Proverbs is in language and contents very dependent on the text of the Syriac Peschitto, and is but little more than a Jewish recension of the same. [Cf. Nöldeke in "'Merx' Archiv für wissenschaftl. Erforschung des A. T.", II (1872), 246 sqq.; Baumgartner, "Etude critique sur l'état du texte du livre des Proverbes" (Leipzig, 1890), 267 sqq.] Haggadic additions are found only occasionally in the Targum on the Psalms. In a number of passages a second translation is introduced with the remark ת' א' (that is, תרגום אחר another Targum). The Targum to Job contains many more additions. There are also variants of the usual formula of citation ת' א', and much oftener than in the Targum on the Psalms. In style and language this Targum resembles that on the Psalms, consequently both perhaps are the work of the same author.

(b) The Targums on the *Megilloth* are not in reality translations but rather Haggadic commentaries. The Biblical text is most clearly evident in the Targums to Ruth and to Lamentations. The Targum to Ecclesiastes is a tasteless declamation upon the text on which it is based; that on Canticles is an allegorico-mystical Midrash. There are two Targums to Esther, the one closely resembles a paraphrase and has no legends interwoven with it; the other, called Targum *scheni*, has altogether the character of a Midrash. It is only to a small degree a translation; the greater part of it consists of stories, legends, and discourses that have but slight connexion with the contents of the book. (c) A Targum on the Books of Chronicles was edited from a MS. in Erfurt by Matthias Beck (2 pts., Augsburg, 1680–83); a more complete and correct text taken from a MS. at Cambridge was edited by Wilkins, "Paraphrasis Chaldaica in librum priorem et posteriorem Chronicorum" (Amsterdam, 1715).

All the Targums to the Hagiographa (excepting Chronicles) were printed for the first time in the Bomberg Bible in 1517; afterwards in the "Polyglots" of Antwerp, Paris, and London. A modern edition from the Bomberg text, with Chronicles from the Erfurt Codex, was edited by de Lagarde, "Hagiographa chaldaice" (Leipzig, 1873).

Esther* (Breslau, 1896); David, *Das Targum scheni zum B. Esther* (Berlin, 1898); Taylor, *Targ. prius et posterius in Estheram . . . in linguam Latinam translatum* (London, 1655); Gelbhaus, *Das Targum scheni zum B. Esther* (Frankfort, 1893).

Fr. Schühlein.

Tarisel, Pierre, master-mason to the king, b. about 1442; d. in August, 1510. (In 1555 the title of architect was used at Amiens for the first time, but it was not until 1609 that a master-mason of the town called himself an architect). We have no details concerning his birthplace, save that he belonged to no family of masons known at Amiens. It is certain that he was the most renowned master-mason at Amiens at the time in which he lived. He was already famous in 1475, when he was summoned to inspect the cathedral of Noyon, which threatened to become ruinous in many places. Although he was not then entitled master-mason of the city, he was so in fact, as nothing of importance was done without him. In 1477 he was at Arras, at work for the King of France. In 1500 the plan of Martin Cambiche for the restoration and decoration of the cathedral of Beauvais was submitted to him. On 4 Nov., 1483, at the death of Guillaume Postel, Pierre Tarisel was appointed master-mason of the city of Amiens. His predecessors had been paid at the rate of 4s. per day; according to the accounts which have been preserved, Tarisel received 5s. The rate was again reduced to 4s. for his successor, which shows with what esteem his talent was regarded.

There is no document to show in what year he became master-mason of the cathedral; but it seems certain beyond doubt that he fulfilled these duties in 1482–83. On 7 March, 1497, Tarisel visited all the cloistered houses subject to the cathedral chapter. Shortly afterwards he undertook the task of restoring the cathedral. The second pillar of the choir, on the left, threatened to fall, but under Tarisel's direction it was restored in 1497. The projecting arch and the arches near it were restored, and the outer wall was propped by an additional flying buttress. In 1503 the same was done for the remaining pillars. Between 1497 and 1503 the pillars of the transept "buckled", owing to the weight of the rear side arches, and cracks formed. The remedy was found in bands of Spanish iron, reaching from the transept to the ends of the choir, the nave, and the cross bars. The great iron chainwork upholding the four large pillars of the transept running the length of the triforium in four directions still exists, and is justly famous. All this was the work of Tarisel, by whom the cathedral of Amiens was saved from ruin in the fifteenth and sixteenth centuries, and which is a sufficient claim to renown.

M. VACCON.

Tarkin, SAINT (TALARICAN), Bishop of Sodor (including the western islands of Scotland), was probably of purely Pictish origin, though the Aberdeen Breviary (1509) says he was born in Ireland. The legend in the Breviary states that he was raised to the episcopate by Pope Gregory; and Adam King's Kalendar (1558) styles him "bischop and confess. in Scotland under King Solvathius". The Bollandists, following the chronology of the Dalriadic kings as adopted by Pinkerton and Skene, place the reign of Selvach from 706 to 726; and, as Gregory II was pope from 715 to 731, conclude that Talarican became bishop about 720, a few years after the Columban monks of Iona had been induced by St. Egbert to conform to the Roman Rite. He is said to have offered the Holy Sacrifice every day, to have been noted for his zeal and his mortified life, and to have converted many pagans in the northern coasts of Scotland through his preaching and example. According to Dempster, he died in the Island of Lismore. Many churches subsequently founded in the Dioceses of Moray, Ross, and Aberdeen were dedicated in his honour. His name is perpetuated in the great district of Kiltarlity (Inverness-shire), the church and cemetery of Ceilltarraglan (Skye), and wells still known as "St. Tarkin's" at Fordyce, Kilsyth, and elsewhere.

D. O. HUNTER-BLAIR.

Tarnow, DIOCESE OF (TARNOVIENSIS), in western Galicia, Austria. The See of Posen, founded in 968 by Duke Miecyslaw, was the only one in Poland until 1100. In that year Otto III and Duke Boleslaw Chabry founded the Sees of Gnesen and Cracow, to which also belonged what is to-day western Galicia. When in the First Partition of Poland, in 1772, the latter fell to Austria, it was separated from the foreign See of Cracow, and the administration entrusted to the vicar-general, Johann von Duval, who resided at Tarnow. On the erection of the See of Tarnow in 1783, he became its first bishop. By the Third Partition of Poland in 1795, Cracow too fell to Austria, whereupon it was considered advisable after the death of the second bishop (1801) to divide the See of Tarnow between Cracow and Przemysl. By the Peace of Vienna in 1809 Austria was obliged to relinquish western Galicia and with it Cracow, both assigned to the Duchy of Warsaw. The Diocese of Tarnow thereupon came under Lemberg, whose bishop gave the management of it to the prior of Alt Sandek as his vicar-general. In the Congress of Vienna, Austria once more incorporated the Kingdom of Galicia. The Emperor Francis in 1822 gave Tarnow another bishop, Gregorius Thomas Ziegler. He had been a Benedictine at Wiblingen, but was at that time professor of dogma at Vienna. He established his residence in the former Benedictine monastery of Tyniec. This, however, was too near Cracow, and Ziegler removed thence to Bochnia and finally in 1826 back to Tarnow. There are to-day in this diocese 809,000 Catholics; 379 secular priests; 72 male religious and 340 nuns.

CÖLESTIN WOLFSGRUBER.

Tarquini, CAMILLUS, cardinal, Jesuit canonist and archæologist, b. at Marta in the Diocese of Montefiascone, Italy, 27 Sept., 1810; d. at Rome, 15 Feb., 1874. Tarquini entered the Society of Jesus on 27 Aug., 1837, but before his entrance he had published, as a thesis for his doctorate, a work on canon law: "Institutionum juris canonici tabulæ synopticæ juxta ordinem habitum a Joanne Devoti" (Rome, 1835). As a professor, Tarquini held the chair of canon law at the Roman College, and he attracted notice by his masterly explanations of Sacred Scripture at the Gesù. Besides his published works, he contributed many articles to reviews, notably to the "Civiltà Cattolica". It is principally as a canonist that he achieved fame. His first work on the law of the Church to bring him into international celebrity was that on the *Regium Placet*, or *Exequatur*, for papal Bulls (Rome, 1851), which was translated into German, Spanish, and French. This treatise is generally published as an appendix to his main work on canon law: "Juris ecclesiastici publici institutiones" (Rome, 1862), which has gone through fourteen editions.

The work was translated into French (Brussels, 1868). Other works on canon law are his treatise on the French Concordat of 1801 (Rome, 1871), and a disquisition on the Pauline Privilege (published posthumously in 1888).

Though best known, perhaps, as a canonist, Tarquini was also an archæologist of no mean repute, especially on matters relating to the ancient Etruscans of Italy. His earliest archæological treatise is "Breve commento di antiche iscrizioni appartenenti alla città di Fermo" (1847). He began the Etruscan series of his works specifically with "Dichiarazione dell' epigrafe del lampadario di Cortona" (1862), which was soon followed by a more general treatise: "Dizzertazioni intorno ad alcuni monumenti etruschi" (Rome, 1862). The "Civiltà Cattolica" of 1857 and 1858 contains many of Tarquini's articles on Etruscan antiquities, the most noted being: "Origini italiche e principalmente etruschi rivelate dei nomi geografici" (Ser. 3, Vol. VI); "I misteri della lingua etrusca" (Vol. VIII); "Iscrizioni etrusche in monumenti autofoni" (Vol. IX); "Di vasi etruschi divinatorii" (Vol. X); "Iscrizione etrusca di Perugia" (Vol. XI); and "Sopra il semitismo della lingua etrusca" (Ser. 4, Vol. VII). He also wrote an Etruscan grammar and a dictionary of the Etruscan language. Other archæological treatises are: "Della iscrizione della cattedra Alessandrina di San Marco" (1868), and "De l'origine des phéniciens et leur identité avec les Pasteurs qui envahirent l'Egypte" (1870). Tarquini was a member of the Pontifical Roman Academy of Archæology and of the Imperial and Royal Academy of Science of Lucca. He was also president of the historical and archæological sections of the Accademia de' Quriti. He was raised to the cardinalate by Pius IX with the diaconal title of St. Nicholas at the Tullian Prison on 22 Dec., 1873, only a few months before his death.

WILLIAM H. W. FANNING.

Tarragona ARCHDIOCESE OF (TARRACONENSIS), bounded on the N. by Barcelona and Lérida, on the E. by Barcelona, on the S. by the Mediterranean Sea and Tortosa, and on the W. by Tortosa. It comprises the civil Provinces of Tarragona and Lérida, and its capital city has 24,335 inhabitants. Its suffragans are Barcelona, Lérida, Gerona, Urgel, Vich, Tortosa, and Solsona. Tarragona is one of the most ancient cities of Spain, probably of Iberian origin, as its coins and Cyclopean walls indicate. The Romans selected Tarragona as the centre of their government in Spain. In the division it was the capital first of Hither Spain (*Hispania Citerior*) and then of the Province of Tarraconensis. In the fifth century it was overrun by the Vandals, Suevi, and Alani. The Visigothic king, Euric, took possession of it in 475 and totally demolished it. During the occupation of the Visigoths it flourished once more, but the Arabs again destroyed it in 719.

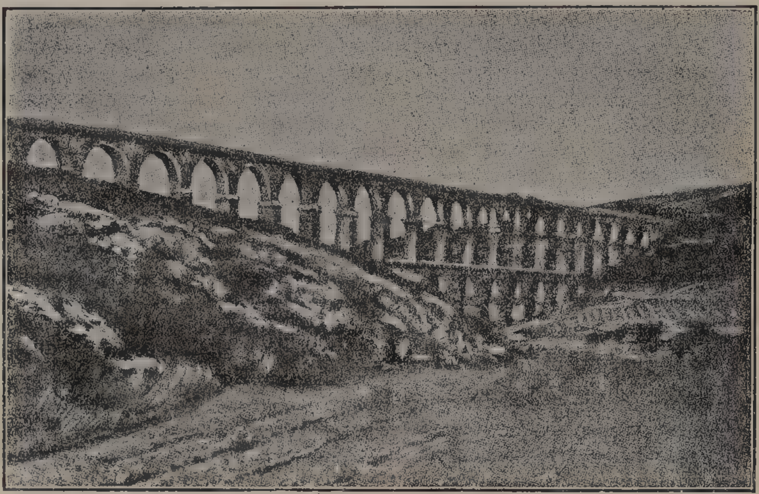
The Church of Tarragona is undoubtedly one of the most ancient in Spain, holding as it does the tradition of the coming of St. James and St. Paul. The visit of St. Paul to Tarragona is not altogether beyond the range of possibilities, supposing that he came from Rome to Spain, as he promised to do, in the Epistle to the Romans, and as St. Jerome affirms that he did. The first written testimony which we have concerning the bishops of Tarragona dates from the third century. This is in the Acts of the Martyrdom of the bishop St. Fructuosus and his deacons Augurius and Eulogius. The list of the bishops of Tarragona, therefore, begins with St. Fructuosus, but it is supposed that other bishops, whose names have been lost to us, preceded him. The see of Tarragona, which was vacant at that time, was represented at the Council of Arles (314) by two procurators, the priest Probatius and the deacon Castorius. Himerius, who sent the priest Basianus to Pope St. Damasus, and who obtained a letter from Pope St. Siricius, was Archbishop of Tarragona in 384. It is also conjectured that the Hilarius who was the subject of the Decretal issued by Innocent I was also a Bishop of Tarragona. Ascanio was bishop in 465, and previous to 516 we find the name of Archbishop John, who, on 6 November, 516, assembled all the bishops of his province and held the first provincial council of Tarragona, at which ten bishops were present. In 517 he assembled another provincial council in Gerona.

TOWER AND APSE OF THE CATHEDRAL, TARRAGONA

Sergius, who was bishop from 535 to 546, held councils in Barcelona and Lérida. St. Justus, Bishop of Urgel, dedicated to him his commentary on the Song of Solomon. Tranquillinus was bishop for many years previous to 560. He had been a monk in the Monastery of Asana under the direction of St. Victornus. Artemius, bishop prior to 589, was not able to attend the Third Council of Toledo, but sent a substitute, Stephen. He called provincial councils at Saragossa (599) and Barcelona. Eusebius (610–32) held the council of Egara (Tarrasa) to enforce the canons of the Council of Huesca. Audax (633–38) was present at the Fourth Council of Toledo, and Protasius (637–46) at the Sixth and Seventh. Cyprianus (680–88) sent representatives to the Thirteenth, Fourteenth, and Fifteenth Councils of Toledo, and Vera assisted personally at the Sixteenth and Seventeenth. In his time or in that of his successor, George, the Mohammedan invasion took place. Ludovico Pio appears to have temporarily taken possession of the city. A portion of its territory was bestowed on the Bishop of Barcelona, and the metropolitan rank was given to the Bishop of Narbonne, but was recovered in 759. Cæsarius endeavoured to obtain recognition as titular Archbishop of Tarragona, but was not successful, although he was consecrated by the bishops of Leon and Galicia, and obtained from the pope the abbey of Santa Cecilia, which belonged to the Archbishop of Tarragona. Borrell, Count of Barcelona, induced

Pope John XIII to confer the title of Archbishop of Tarragona on Bishop Attón of Vich, although he never was called Archbishop of Tarragona but of Ausona.

The Bishop of Vich, Berengarius of Rosanes, petitioned Pope Urban II for permission to promote a crusade for the reconquest of Tarragona. Count Berenguer Ramón II (the Fratricide) succeeded in taking the city and made it a fief of the Holy See. The pope, in recognition of the efforts of the Bishop of Vich, conferred on him the pallium as Archbishop of Tarragona, transferring to him all rights to the city and its churches which had previously belonged to the Holy See. The new bishop, however, was to remain in possession of the Church of Vich. A similar concession was granted to St. Olegarius, Bishop of Barcelona, who was permitted to retain possession of his former Church until he had obtained complete and peaceful possession of that of Tarragona, of which he had been named Archbishop. It was not until 1116 that Tarragona was definitively reconquered by Ramón Berenguer III (the Great). Bishop Berenguer had died in 1110, after having assisted, in 1096, at the Council of Nîmes convoked by Urban II. His successor in the See of Tarragona, St. Olegarius, had been a canon regular at St. Rufus in Provence, later an abbot, and then Bishop of Barcelona. To him is due the restoration of the metropolitan authority of Tarragona. In 1117 Count Ramón Berenguer III conferred on him the government of the city that he might endeavour to recolonize it, which work he carried on with great zeal. He assisted at the councils of Toulouse and Reims (1109), of the Lateran (1123), and of Clermont (1130), and accompanied the Count of Barcelona as pontifical legate in the war which terminated in the imposition of a tribute upon Tortosa and Lérida. The Norman Robert Burdet also joined the forces of the Count of Barcelona, established himself in Tarragona and obtained dominion over a great part of the city. The consequent dissensions among his sons led to the murder by them of Archbishop Hugo de Cervellón 22 April, 1171. On the death of St. Olegarius (6 March, 1137), Gregory, Abbot of Cuxana, succeeded him in the vacant See of Tarragona, and was the first incumbent of that see to receive the title of archbishop.



Roman Aqueduct, Tarragona

The dissensions between the archbishops and the kings, on account of the jurisdiction over Tarragona granted to the bishops who had begun its resettlement, continued during the time of Alfonso II, who bestowed the city as a dowry on his wife, Doña Sancha, and of Pedro IV (the Ceremonious), who, after forcibly seizing the dominions of the archbishop, repented in his last illness and restored to St. Tecla, patroness of the city, all that he had unjustly acquired. By special privilege of the pope, all the kings of Aragon were crowned at Saragossa by the archbishop of Tarragona, until the metropolitan See of Sargossa was re-established. When Jaime I, a child of six years, took the oath, the Archbishop of Tarragona, Don Aspargo Barca, carried him in his arms. Although he was far advanced in years, he wished to accompany the king in his expedition to conquer Majorca, and when Don Jaime refused his consent, he contributed a thousand marks in gold and twelve hundred armed men. In 1242 a provincial council was convoked at Tarragona to regulate the procedure of the Inquisition and canonical penances. In 1312 a provincial council was assembled in the Corpus Christi Chapel of the cathedral cloister, to pass sentence on the Templars, whom it declared innocent. Don Pedro Zagarriga, Archbishop of Tarragona, was one of the arbitrators at Caspe. One of the most celebrated prelates of Tarragona, Don Antonio Agustin (d. 1586), a native of Saragossa, was an eminent jurisconsult and numismatist. He put an end to the struggles referred to in "Don Quixote", between the Narros and Cadells factions, which had disturbed the peace of Catalonia.

The cathedral, it is believed, was begun by St. Olegarius. The edifice is solid and elegant, combining the Romanesque, Arabic, and Gothic styles of architecture, producing a very original and unique effect. Its façade is composed of three sections, and the ground plan, in the form of a Latin cross, has three naves and a wide transept. In the right nave is the chapel of St. Tecla, patroness of the city, begun in 1760 under the direction of Don José Prats and finished in 1776. The baptismal font is a magnificent marble basin found in the ruins of the palace of Augustus. The chapter house, celebrated for the councils held there, has a Byzantine door and a notable dome. As late as the fifteenth century the cathedral had not yet been completed, as the sculptor, Pedro Juan, did not begin work on the main altar until 1426. The choir was not finished until 1493. The chapel of the Blessed Sacrament, the organ, built by the cura of Tivisa, Don Jaime Amigó, the stained glass, etc. date from the sixteenth century.

Among the buildings worthy of mention are the Churches of San Pablo and Santa Tecla, the convent of the Poor Clares, near the walls, that of Santa Teresa, and the church of the Capuchins, the parish church of the port. The former Convent of San Francisco has been converted into government offices and a secondary school, the Jesuit college turned into barracks, their church, however, having been restored to them. The convent of the Dominicans is now the town hall, and the convents of the Mercedarians and Carmelites turned over to military uses. The archiepiscopal palace is situated on the site of the ancient capitol, one tower of which still remains. The palace was rebuilt by Don Romualdo Mon y Valarde (1815–19). Near the sea, in the Roman amphitheatre, is the edifice called *el Milagro* (the Miracle), which belonged to the Knights Templar. It was afterwards used by the Trinitarian Fathers, and has since been converted into a penitentiary. The remains of many Roman buildings are to be found at Tarragona; the walls, the capitol, or citadel, the forum, the palace of Augustus, called the house of Pilate, the circus or amphitheatre, the aqueduct, known as the Puente del Diablo, the so-called tower, or sepulchre, of the Scipios, the arch of Sura, or of Bara, and the Aurelian Way. There is also a good archæological museum. The conciliar seminary of San Pablo and Santa Tecla was founded in 1570 by the cardinal archbishop, Gaspar de Cervantes, and was the first to comply with the decrees of the Council of Trent. In 1858 Archbishop Costa y Borrás built a fourth wing. Benito Villamitjana built a new seminary behind the cathedral in 1886, in the courtyard of which stands the old chapel of San Pablo. Leo XIII raised this to the rank of a pontifical university. In the district of Montblanc, in this archdiocese, is the ancient monastery of Poblet, founded in 1151 by Ramón Berenguer IV, which was the pantheon of the kings of Aragon.

Ramón Ruiz Amado.

Tarsicius, Saint, martyr. The only positive information concerning this Roman martyr is found in the poem composed in his honour by Pope Damasus ("Damasi epigrammata", ed. Ihm, 14). In these lines Damasus compares Tarsicius to the protomartyr Stephen: just as the latter was stoned by the people of Judea so Tarsicius, carrying the Blessed Sacrament, was attacked by a heathen rabble, and he suffered death rather "than surrender the Sacred Body [of Christ] to the raging dogs". This tradition so positively asserted by Damasus is undoubtedly historical. Nothing definite is known concerning the personality of this martyr of the Eucharist. He may have been a deacon, as Damasus compares him to Stephen. An addition to the sixth-century legend of the martyrdom of Pope St. Stephen makes Tarsicius, for some unknown reason, an acolyte; this addition, however, is based on the poem of Damasus. It is evident that the death of this martyr occurred in one of the persecutions that took place between the middle of the third century and the beginning of the fourth. He was buried in the Catacomb of St. Callistus, and the inscription by Damasus was placed later on his tomb. In the seventh century his remains rested in the same grave as those of Pope Zephyrinus; according to Wilpert they lay in the burial vault above ground (*cella trichora*) which was situated towards the west over the Catacomb of St. Callistus. The feast of the saint is observed on 15 August.

Wilpert, *Die Papstgräber u. die Cäciliengruft in der Katakombe des hl. Kallistus* (Freiburg, 1909), 91 sq., there is in the same work a note by Franchi de' Cavalieri, 96–98; Marucchi, *La cella tricora di S. Sotere ed il gruppo topografico di Marco-Marcelliano e Damaso* in *Nuovo Bullettino di arch. crist.* (1908), 157 sq. (1910), 205 sq., opposes Wilpert's opinion concerning the grave of Tarsicius; Lambert, *Etude historique et critique sur St. Tarsicius* (Rome, 1890); Allard, *Hist. des persécutions*, III, 71 sq.

J. P. Kirsch.

Tarsus, a metropolitan see of Cilicia Prima. It appears to have been of Semitic origin and is mentioned several times in the campaigns of Salmanasar and Sennacherib. The Greek legend connects it with the memory of Sardanapalus, still preserved in the Dunuk-Tach, called tomb of Sardanapalus, a monument of unknown origin. When in the year 401 B. C., the younger Cyrus marched against Babylon, the city was governed by King Syennesis in the name of the Persian monarch. Tarsus was already Greek and had a tendency to become more and more hellenized. Alexander the Great came near meeting his death there after a bath in the Cydnus, the modern Tarsus-Irmak. By its literary schools, Tarsus rivalled Athens and Alexandria. It was then comprised in the kingdom of the Seleucides, took the name of Antioch, and the Bible (II Mach., iv, 30) records its revolt against Antiochus IV Epiphanes, about 171 B. C. Pompey subjected it to Rome. To flatter Cæsar it took the name of Juliopolis; it was there that Cleopatra and Anthony met, and it was the scene of the celebrated feasts which they gave during the construction of their fleet. Tarsus was already the *caput Ciliciæ*, the metropolis, where the governor resided. When the province was divided it remained the civil and religious metropolis of Cilicia Prima. The greatest glory of Tarsus is that it was the birthplace of St. Paul (Acts, ix, 11; xxi, 39; xxii, 3), who took refuge there after his conversion (Acts, ix, 30), and was joined by Barnabas (Acts, xi, 25). It is probable that at this time a Christian community was established there, although the first bishop, Helenus, dates only from the third century; he went several times to Antioch in connexion with the dispute concerning Paul of Samosata (Eusebius, "Hist. eccl.", VI, xlvi; VII, v).

Le Quien (Oriens christianus, II, 869–76) mentions twenty-two of its bishops, of whom several are legendary. Among them are Lupus, present at the Council of Ancyra in 314; Theodorus, at that of Nicæa in 325; Helladius, condemned at Ephesus, and who appealed to the pope in 433; above all the celebrated exegete Diodorus, teacher of Theodore of Mopsuestia and consequently one of the fathers of Nestorianism. From the sixth century the metropolitan See of Tarsus had seven suffragan bishoprics (Echos d'Orient, X, 145); the Greek archdiocese is again mentioned in the tenth century (op. cit., X, 98), and has existed down to the present day, being comprised in the Patriarchate of Antioch. Owing to the importance of Tarsus many martyrs were put to death there, among them being St. Pelagia, St. Boniface, St. Marinus, St. Diomedus, and Sts. Cerycus and Julitta; several Roman emperors were interred there—namely, Tacitus, Maximinus Daza, and Julian the Apostate. The Arabs took possession of Tarsus from the seventh century and kept it until 965, when Nicephorus Phocas annexed it again to the Byzantine Empire. The union continued for nearly a century. The crusaders captured it again from the Turks in 1097, and then it was disputed between Latins, Greeks, and Armenians of the Kingdom of Lesser Armenia; these last became definitively masters until about 1350, when it was sold to the Egyptians. Since then Tarsus has belonged to the Mussulmans. About the end of the tenth century, the Armenians established a diocese of their rite, which still exists; St. Nerses of Lambroun was its most distinguished representative in the twelfth century. Tarsus, which has preserved its name, is a caza of the vilayet of Adana on the railroad from Adana to Mersina; the city numbers about 18,000 inhabitants, of whom 10,000 are Mussulmans, the remainder are Greek or schismatic Armenian. Only a few Catholics are found there.

S. Vailhé.

Tartaglia (Tartalea), Nicolò, Italian mathematician, b. at Brescia, c. 1500; d. at Venice, 13 December, 1557. His father, Michele Fontana, died in 1506, leaving his widow, two sons, and two daughters in poverty. As a result of a blow across the mouth inflicted by some French soldiers at the sack of Brescia in 1512, Nicolò stammered in his speech, thus obtaining the nickname of Tartaglia, afterwards assumed by himself. He was self-taught. In 1521, he was teaching mathematics in Verona and in 1534 he went to Venice. By 1541, he had achieved the remarkable triumph of solving the cubic equation. In a mathematical contest with Antonio del Fiore, held in 1535, he had shown the superiority of his methods to the method previously obtained by Scipione del Ferro (d. 1526) and known at that time to del Fiore alone. The glory of giving these results to the world was not for Tartaglia, as Cardan (q. v.) having in 1539 obtained a knowledge of them under the most solemn pledges of secrecy, inserted them, with some additions and with some mention of indebtedness, in his "Ars Magna", published in 1545. A long and bitter controversy ensued in which Cardan was supported by his pupil Ferrari. In 1548 Tartaglia became professor of Euclid at Brescia but returned, after eighteen months, to Venice, where he died. In his will he expressed the request to be buried in the Church of San Silvestro, which wish, according to Dr. Giuseppe Tassin (“Curiosità Veneziane”, Venice, 1864), was fulfilled.

The published works of Tartaglia include: “Nuova Scienza”, dealing with gunnery (Venice, 1537, French translation by Rieffel, Paris, 1845–6); the first Italian translation of Euclid (Venice, 1543); the earliest Latin version of some of the works of Archimedes (Venice, 1543) “Quesiti ed Invenzioni Diverse”, including problems in ballistics and fortification (Venice, 1546, new ed., 1554); “Regola Generale per sollevare ogni affondata Nave, intitolata la Travagliata Invenzione” (Venice, 1551, English version published by Salusbury, London, 1564); “Ragionamenti sopra la Travagliata Invenzione” (Venice 1551); “Trattato Generale di Numeri e Misure” (Venice, 2 pts. in 1556, 4 pts. in 1560); “Trattato di aritmetica” (Venice, 1556, French tr. by Gosselin, Paris, 1578); “Opere del Famosissimo Nicolò Tartaglia” (Venice, 1606); and an English translation, by Lucar in 1588, of his writings on gunnery. A letter of Tartaglia’s is in the archives of Urbino and another letter and his will are in the archives of Venice.

NICOLAVS TARTAGLIA GEOMETRA
Diuitias patriæ cumulat Tartaglia linguæ,
Euclidem Etrusco dum docet ore loqui.
Hic certam tractare dedit tormenta per artem
Et tonitru, & damnis æmula fulmineis.

Nicolò Tartaglia

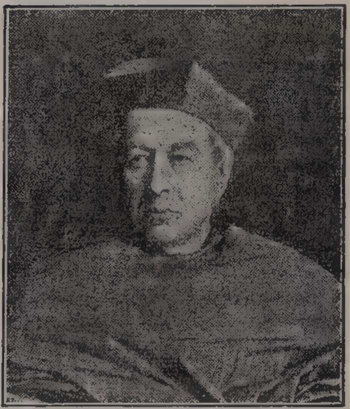
Paul H. Linehan.

Tartini, Giuseppe, violinist, composer, and theorist, b. at Pirano, Italy, 12 April, 1692; d. at Padua, 16 Feb., 1770. He resisted the earnest desire of his parents that he enter the Franciscan Order, and matriculated at the University of Padua in 1710 as a student in jurisprudence. It was not long before he abandoned this for the study of music, especially the violin, and the art of fencing, in which latter he soon became a master. Having secretly married a relative of Cardinal Cornaro, and being accused of abduction, he fled to Assisi, where he found an asylum and a guide of the first order for his musical studies in the person of Padre Boemo. After two years he emerged from his seclusion—the charge against him having in the meantime been dropped—and returned to Padua, settling later in Ancona for several years. There he developed into one of the greatest violin players of all time, and also continued his theoretical studies. In 1721 he was appointed solo violinist and orchestra conductor at the Cathedral of Padua, a position which he held, with the exception of two years spent in the service of Count Kinsky at Prague, until the end of his life. He refused many flattering invitations to visit other countries. In 1728 Tartini established at Padua a school for violin-playing which has given to the world some of its greatest masters, among them Nardini, Pasqualino, Bini, and many others. The manner of bowing originated by Tartini is still standard. He published an enormous number of compositions for the violin and for several combinations of instruments. Of the former many are the repertoires of present-day violin virtuosi. His single composition for the Church was a “Miserere” for four, five, and eight voices, which was performed by the Sistine choir in 1768. Although not the first to discover the so-called combination tone, or third tone, which results when two tones forming a perfect consonance are sounded, his name has always been associated with this discovery because he made it the basis of a new system of harmony. This system he laid down in his “Trattato di musica” in 1754.

Mendel, *Musikalisches Conversations-Lexikon*, X (Berlin, 1878); Fangazo, *Orazione delle lodi di Giuseppe Tartini* (Padua, 1770); Ugoni, *Giuseppe Tartini, sua vita* (Brescia, 1802).

Joseph Otten.

Taschereau, Elzéar-Alexandre, Archbishop of Quebec and first Canadian cardinal, b. 17 February, 1820, at La Beauce, Province of Quebec; d. 1898, at Quebec. He entered the Seminary of Quebec in 1828, and graduated after brilliant studies in 1826. While pursuing further studies in Rome he was on the point of joining the Benedictines, owing to his relations with Dom Guéranger. He reconsidered his decision, however, and returned to Quebec, was ordained priest at La Beauce, 10 Sept., 1842, and thenceforth devoted himself to the work of the seminary. He was successively occupied as disciplinarian and professor, and as member of the seminary council was one of the founders of Laval University in 1852. In 1854 he again studied in Rome, residing at the French Seminary, where he took the degree of Doctor of Canon Law in 1856. He was superior, 1860–66. In 1862 and 1864 he returned to Rome in defence of the rights of Laval, and again in 1869, as theologian of Archbishop Baillargeon during the Vatican Council. In the same year he was re-elected superior of the seminary and Rector of Laval University, and in 1871 was made Archbishop of Quebec. In 1886 he was raised to the cardinalate, taking his title from Santa Maria della Vittoria. He was particularly zealous in educational matters; the Seminary of Quebec found him at all times a devoted protector; he saved from extinction the classical college of Ste. Anne de la Pocatière, and aided the growth of new colleges at Lévis and Chicoutimi.



Elzéar-Alexandre, Cardinal Taschereau

Mgr Taschereau’s episcopal administration was very fruitful. He founded at Quebec the Sacred Heart Hospital, canonically erected forty parishes, founded thirty missions, established various devotions, procured the creation of an episcopal see at Chicoutimi, consecrated seven bishops, ordained more than three hundred priests, convened three provincial councils, and introduced the Redemptorist Order into his diocese, giving it charge of the parish of St. Patrick, and of the shrine of Ste. Anne de Beaupré. He organized the memorable celebration of the second centenary of the foundation of the See of Quebec, consecrated the new basilica of Ste. Anne de Beaupré, and performed the solemn translation of the remains of Mgr de Laval. He was much devoted to the Holy See, to which he paid episcopal visits in 1872, 1884, and 1888. He also welcomed at Quebec on three occasions the representatives of the Holy See, Monsignori Conroy, Smeulders, and Merry del Val. In 1871 he was himself charged with the office of papal delegate in a very important matter concerning Montreal. His theological ability and literary gifts were of a high order. Though obliged to give most of his time to administrative matters, he left a manuscript "History of the Seminary of Quebec"; his published discourses, and pastoral and other letters fill six folio volumes of 900 pages each. Cardinal Taschereau was of a silent disposition, but his speech was always pointed and effective. He was venerated by his clergy and people, who admired his Christian piety and dignified bearing.

Tassach, Saint, Irish saint, b. in the first decade of the fifth century; d. about 497. He was one of St. Patrick's artificers. When St. Patrick founded the Church of Raholp he placed St. Tassach over it as first bishop. This ancient monastic see (Rath-colpa), a couple of miles north-east of Saul, County Down, ultimately merged into the Diocese of Down. Tassach's rule is for ever memorable for the fact that he was selected by the national Apostle to be with him in his last moments and to administer the Holy Viaticum to him. This event is thus chronicled in "The Martyrology of Donegall": "Tassach of Raholp gave the Body of Christ to Saint Patrick before his death in the monastery of Saul". His feast is on 14 April.

Tassé, Joseph, writer and journalist, b. at Montreal, 23 Oct., 1848; d. 17 Jan., 1895; son of Joseph, and Adeline Daoust. He received a classical education at Bourget College, Rigaud, Province of Quebec, and began his literary career at nineteen, as chief editor of "Le Canada", a tri-weekly, then daily, newspaper at Ottawa. In 1869 he became editor of "La Minerve", Montreal, the foremost Conservative organ, resigning in 1872. In 1878 he was elected member of the House of Commons for the City of Ottawa, and re-elected in 1882. He was appointed to the Senate in 1891. Besides contributing over a hundred articles to "La Revue canadienne", and presenting several valuable historical articles to the Royal Society of Canada, he wrote the following highly-appreciated works: "Philémon Wright ou colonization et commerce de bois" (1871); "Le chemin de fer canadien du Pacifique" (1873); "La Vallée de l'Outaouais" (1873); "Le 38e fauteuil" (1891). His most important work is: "Les Canadiens de l'Ouest" (1878). Tassé lectured frequently and effectively in Canada and the United States. His style is characterized by clearness and warmth.

Lionel Lindsay.

Tassin, René-Prosper, French historian, belonging to the Benedictine Congregation of Saint-Maur, b. at Lonlay, in the Diocese of Le Mans, in 1697; d. at Paris, 1777. He was professed at the Abbey of Jumièges in 1718. United in close friendship with his brother-religious, Dom Toustain, he collaborated with him on a new edition of the works of Theodore the Studite, which task led them to visit Rome together. Their work was interrupted by a dispute between the Benedictine Abbey of St. Ouen and the chapter of Rouen which was supported by the erudite Saas. Tassin and his friend wrote against Saas in defence of their brethren. They then resided at the Abbey of Rouen where they remained till 1747, when they were summoned to the convent of Saint-Germain-des-Prés, at Paris, by their general. To defend the authenticity of the deeds of their abbey they were obliged to make a deep study of diplomacy, a science dealing with diplomas, charters, and other official documents, which Mabillon had already set forth in his celebrated Latin work, "De re diplomatica". As a result of their researches they wrote the "Nouveau traité de diplomatique", six quarto volumes, which appeared between the years 1750 and 1765. Toustain having died before the second volume was entirely printed, Tassin completed the great work alone, but he wished the name of his friend to be associated with all the volumes; these, consequently, are known like the first two as the work of "two Benedictines". Later Tassin wrote his "Histoire littéraire de la Congrégation de Saint-Maur" (Paris and Brussels, 1770, in quarto), a model history containing the lives and list of works, printed or in MS., of all the learned authors of the Congregation, from its formation (1618) till the time when Tassin wrote, together with a list of their works, printed or in MS. Several MS. works of Tassin are in the National Library at Paris.

Georges Bertrin.

Tasso, Torquato, Italian poet, b. at Sorrento near Naples in 1544; d. at Rome, in 1595; son of Bernardo Tasso, who was also an author and of noble family, and of Porzia de Rossi. He enriched the Italian literature of the Renaissance with an epic glorifying the Crusades. The depth of his Catholic feeling accords well with the growing resistance to the Reformation developed at Rome in the latter half of the sixteenth century. Educated at the Court of the Dukes of Urbino and later at Venice and the University of Padua, and soon carried away by the whirl of frivolous society, he manifested great precocity, composing his poem "Rinaldo" before reaching the age of twenty. Already he had determined to celebrate in verse the prowess of Godfrey de Bouillon, and had composed the entire first canto. When he had settled at Ferrara in the suite of Cardinal Louis d'Este, he resumed the work. In 1570 he accompanied the cardinal on a voyage to France, and returned in time to hear at Rome the news of the victory of Lepanto. The atmosphere was suitable for the composition of the "Gerusalemme liberata", on which Tasso continued to work after his return to the Court of Duke Alphonso II at Ferrara. Moreover he composed an excellent pastoral idyl, "Aminta" (1573). The poet had now adopted the practice of consulting some learned friends, among others Mgr. Scipio Gonzaga, on the definitive form of his great work, and was very careful not to violate the rules of good literature then commonly accepted.

Torquato Tasso
Portrait by Alessandro Allori in the Uffizi

After 1575, in addition to his literary anxieties, Tasso suffered from intense religious scruples. His life had not been free from reproach; he had frequently been carried away by the storms of passion, and now he became an almost helpless victim of remorse of conscience. He was tormented by the thought of the liberties he had allowed himself in his poems, and consulted the inquisitors. Months of painful doubt followed, with happily a little respite which allowed him to complete his work, some dangerous passages of which he wished to justify by allegorical interpretation. In 1587 his anxieties returned with increased intensity. Court life became unsuitable for him under the circumstances. He began to travel and left Duke Alphonso, but only temporarily, for he returned a prey to a kind of mania about persecution which induced the duke, who had lost patience, to send him to St. Anne's lunatic asylum. The publication of the "Gerusalemme liberata" was undertaken by his friends Angelo Ingegneri and Febo Bonna, the latter working almost in accordance with the wishes of the poet. When at length Tasso left the asylum and was received by the Gonzaga, he began about 1586 to revise his poem and after six years he transformed it into the "Gerusalemme conquistata", an inferior work. It was, however, more satisfactory to certain critics, who had taken umbrage at the "Gerusalemme liberata". Finally, accepting the invitation of Cardinal Aldobrandini, Tasso went to Rome, where he died in the Convent of Sant' Onofrio, under the protection of the pope, the day before he was to be crowned as poet laureate.

GIUSEPPE GALLAVRESI.

Tassoni, ALESSANDRO, Italian poet, b. at Modena in 1565; d. there in 1635. He spent his life in the service of prelates and princes in Italy, acting as secretary or in some similar capacity. His fame depends chiefly upon the undoubted success of his mock-heroic poem, the "Secchia rapita" (1614), which deals in a pretendedly serious way with a mighty struggle between the citizens of two adjoining towns in Italy over the purloining of a well-bucket. The comic and the serious are skilfully blended throughout and the methods of the ancient epic description are faithfully copied. While in a measure the poem develops germs of the mock-heroic already perceptible in Italian literature back as far as the fourteenth century, it is more particularly significant as marking a natural outcome of poetizing on chivalrous, romantic subjects, such as Ariosto and Tasso had treated, once these subjects ceased to be regarded with any degree of seriousness as meet for artistic treatment. The "Secchia rapita" belongs to the same category as the ancient "Battle of the Frogs and Mice", Lope de Vega's "Gatomaquia", Boileau's "Lutrin" and Pope's "Rape of the Lock", and ranks worthily with them. The patriotic Italian's dislike of the arrogant invading Spaniard is clear in his "Filippiche contra gli Spagnuoli"; his views on literary criticism and his disapproval of the bad taste of his time may be seen in his "Considerazioni sopra le rime del Petrarca" and his "Pensieri diversi". There are various editions of the "Secchia rapita", e. g., Paris (1622); Modena (1744), with a life by Muratori; Florence (1861), with a study by Carducci; Florence (1887); with the addition of certain minor writings in prose and verse.

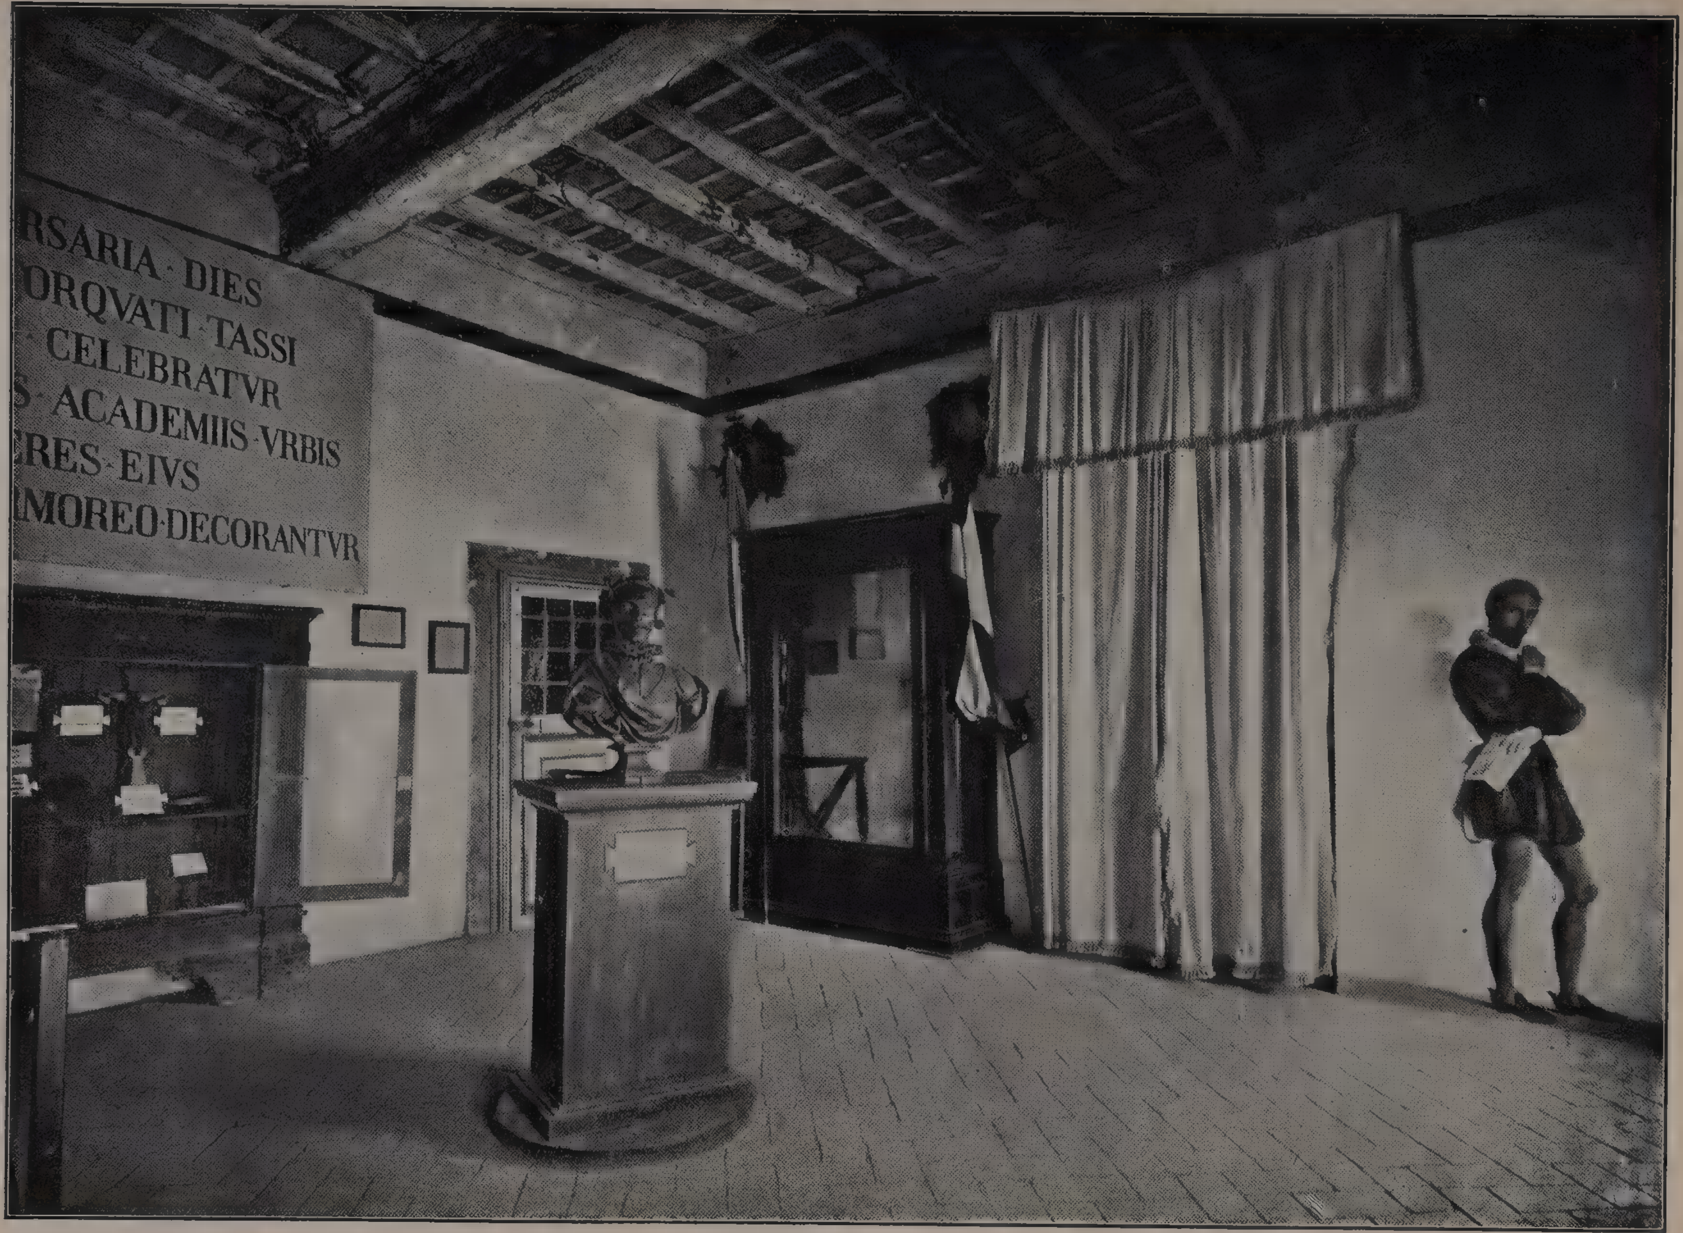
J. D. M. FORD.

Tatian, a second-century apologist about whose antecedents and early history nothing can be affirmed with certainty except that he was born in Assyria and that he was trained in Greek philosophy. While a young man he travelled extensively. Disgusted with the greed of the pagan philosophers with whom he came in contact, he conceived a profound contempt for their teachings. Repelled by the grossness and immorality of the pagans and attracted by the holiness of the Christian religion and the sublimity and simplicity of the Scriptures, he became a convert, probably about A. D. 150. He joined the Christian community in Rome, where he was a "hearer" of Justin. There is no reason to think he was converted by the latter. While Justin lived Tatian remained orthodox. Later (c. 172) he apostatized, became a Gnostic of the Encratite sect, and returned to the Orient. The circumstances and date of his death are not known. Tatian wrote many works. Only two have survived. One of these, "Oratio ad Græcos" (Πρὸς Ἕλληνας), is an apology for Christianity, containing in the first part (i–xxxi) an exposition of the Christian Faith with a view to showing its superiority over Greek philosophy, and in the second part a demonstration of the high antiquity of the Christian religion. The tone of this apology is bitter and denunciatory. The author inveighs against Hellenism in all its forms and expresses the deepest contempt for Greek philosophy and Greek manners.

The other extant work is the "Diatesseron", a harmony of the four Gospels containing in continuous narrative the principal events in the life of Our Lord. The question regarding the language in which this work was composed is still in dispute. Lightfoot, Hilgenfeld, Bardenhewer, and others contend that the original language was Syriac. Harnack, Burkitt, and others are equally positive that it was composed in Greek and translated into Syriac during the lifetime of Tatian. There are only a few fragments extant in Syriac but a comparatively full reconstruction of the whole has been effected from St. Ephraem's commentary, the Syriac text of which has been lost, but which exists in an Armenian version. Two revisions of the "Diatesseron" are available: one in Latin preserved in the "Codex Fuldensis" of the Gospels dating from about A. D. 545, the other in an Arabic version found in two manuscripts of a later date. The "Diatesseron" or "Evangelion da Mehallete" (the Gospel of the mixed) was practically the only gospel text used in Syria during the third and fourth centuries. Rabbula, Bishop of Edessa (411–435), ordered the priests and deacons to see that every church should have a copy of the separate Gospels (Evangelion da Mepharreshe), and Theodoret, Bishop of Cyrus (423–457), removed more than two hundred copies of the "Diatesseron" from the churches in his diocese. Several other works written by Tatian have disappeared. In his apology (xv) he mentions a work "on animals" and (xvi) one on the "nature of demons". Another work in refutation of the calumnies against the Christians (xl) was planned but perhaps never written. He also wrote a "Book



TASSO'S CELL IN THE CONVENT OF S. ONOFRIO, ROME

of Problems" (Eus., "Hist. Eccl.", V, 13), dealing with the difficulties in the Scriptures, and one "On Perfection according to the Precepts of Our Saviour" (Clem. Alex., "Strom.", III, 12, 81).

Patrick J. Healy.

Tatti, Jacopo. See Sansovino, Andrea Contucci.

Tatwin (Tatuini), Saint, Archbishop of Canterbury; d. 30 July, 734. A Mercian by birth, he became a monk at Briudun in Worcestershire. The Venerable Bede describes him as "a man illustrious for religion and prudence and excellently instructed in the sacred letters" (Hist. Eccl., V, xxiii). He was elected to succeed Brihtwald as Archbishop of Canterbury, and was consecrated there on 10 June, 731, afterwards receiving the pallium from the pope. (Symeon Dunelm., "Hist. Reg.", II, 30). During his brief episcopate of three years he blessed Nothbald, the new Abbot of St. Augustine's Abbey, who had succeeded Tatwin's friend, Albinus, and he also consecrated bishops for Lindsey and Selsey. After his death miracles were wrought through his intercession, an account of which was written by Goscelin. Certain rhymed *ænigmata* or riddles (published by Giles in "Anecdota Bedæ", 1851) are ascribed to him, and he is said to have written some poems in Anglo-Saxon which have perished.

Edwin Burton.

Taubaté, Diocese of (de Taubaté), in Brazil, South America, established on 29 April, 1908, as a suffragan of São Paulo. The present incumbent and first bishop, the Right Rev. Epaminondas Nuñes de Avila e Silva (b. 4 July, 1869; consecrated 8 Sept., 1909) entered upon his duties on 21 Nov., 1909. In the town of Taubaté, there are, besides the cathedral, which is one of the finest in Brazil, the churches of Sant' Anna, Nossa Senhora do Pilar, and Santa Clara (built in 1644), and the chapels of the San José school of Santa Isabel Hospital, and of the Mendicant Asylum. The Catholic educational institutions in Taubaté are: the Seminario Menor, under the Capuchin Fathers; the Collegio de Nossa Senhora do Bom Conselho, and the San José School, both under the Sisters of St. Joseph; the Collegio Immaculado Coraçao de Maria, and the Collegio de Santa Veronica, administered by the Third Order of St. Francis. The religious orders in the diocese are: Capuchins; Franciscans; and Sisters of St. Joseph. There are seven religious associations or brotherhoods. The official organ of the diocese is "O Labaro", which was founded by Mgr. Nuñes de Avila.

For bibliography see Brazil.

Julian Moreno-Lacalle.

Tauler, John, German Dominican, one of the greatest mystics and preachers of the Middle Ages, b. at Strasburg about 1300; d. at the same place, 16 June, 1361. He was the son of a prosperous citizen of that city. Apparently while still a youth he entered the Dominican Order at Strasburg, because according to his own confession the ascetic life of the order attracted him. It is possible that while taking the customary eight-years' course of study at the monastery he heard Eckhart preach. When a student at the university of the order at Cologne, he became more closely acquainted with Eckhart. In the same way he probably came to know Henry Suso at Cologne. Whether he also studied at Paris is uncertain; more probably he returned from Cologne to Strasburg. From about 1339 to 1347 or 1348 he lived at Basle where he and Henry of Nördlingen were the centre of the large society called the Friends of God of Basle; these were persons who favoured the mystical life and who gave themselves this name from St. John, xv, 15. Tauler then returned to Strasburg where he laboured as a preacher. Christina Ebner praises his fiery tongue that kindled the entire world; Rulman Merswin chose him as confessor. Later he lived for some time at Cologne. During the last period of his life he was again at Strasburg.

The "Meisterbuch" of the "Friend of God of the Upland" gives an account of a master of the Scriptures who attracted great attention in 1346 by his preaching. One day a layman accused the master of seemingly seeking his own honour rather than that of God, saying also that probably he had not himself borne the burdens he had laid upon others. Without making any stipulations the master allowed himself to be guided by the layman and learned from him to forget the world and himself, to turn all his thoughts upon God and to lead a life of the Spirit. For two years he lived in seclusion. When after this he preached again for the first time the effect was so great that forty of his hearers went into convulsions and twelve could hardly be revived. After the master had lived and laboured for nine years more he fell dangerously ill, and calling for the layman gave him a written account of his conversion. To this account the layman added five sermons of the master that he had copied. It was customary at an earlier date to regard Tauler as this master, and the "Meisterbuch" was from the year 1498 included in the editions of Tauler's sermons. In more recent times Preger has also supported this opinion. But in the treatise "Taulers Bekehrung" Denifle has produced strong proofs against attributing to Tauler the rôle of this master; this view is now generally maintained. The story told by the later Strasburg chronicler, Speckle (d. 1589) is a tissue of falsehoods; it relates that Tauler opposed the pope and the interdict that the pope had laid upon Strasburg in the struggle between the papacy and the Emperor Louis the Bavarian.

Tauler's writings have not yet been subjected to a thorough critical investigation. Much that is attributed to him is doubtful, much not genuine. He certainly did not write the book of the "Nachahmung des armen Lebens Christi" or "Von der geistlichen Armut". The "Exercitia super vita et passione Jesu Christi" and the spiritual songs attributed to him are also spurious. At the most he only wrote a small part of the "Medulla animæ" or of "Institutiones divinæ". Only the sermons, therefore, remain as the actual works of Tauler. The first edition appeared in 1498 at Leipzig and includes 84 sermons; the second edition (Basle, 1521–22) added 42 more some of which, however, even in the opinion of the editor of the edition, were not Tauler's; in the third edition (Cologne, 1543) 25 new sermons were added, part of which are also spurious. The Cologne edition was translated into or rather paraphrased in, Latin by Laurentius Surius (Cologne, 1548). This Latin edition was the copy used for translations into various foreign languages and for both Catholic and Protestant retranslations into German. The modern editions (Frankfort, 1826, 1864, 1872; Berlin, 1841) are based on the old German editions. Lately, Ferdinand Vetter has prepared an edition (Berlin, 1910) based on the Engelberg manuscript (the only one made at Cologne and the oldest one that may perhaps represent the collection revised by Tauler himself), also on the Freiburg manuscript, and on copies of the three manuscripts burned at Strasburg in 1870. This edition contains 81 sermons. The sermons are among the finest monuments of the German language, of German fervour of belief, and of profound spiritual feeling. The language is quiet and measured, yet warm, animated, and full of imagery. Tauler is not so speculative as his teacher Eckhart, but he is clearer, more practical, and more adapted to the common people; with all this he united Suso's fervour. The expression used by Christina Ebner, that he had set the whole world aflame by his fiery tongue, does not mean that he was a preacher of fiery, entrancing eloquence, but a preacher who warmed and inflamed the hearts of his hearers by the quiet flame of the pure love that burned in his own breast.

The centre of Tauler's mysticism is the doctrine of the *visio essentiæ Dei*, the blessed contemplation or knowledge of the Divine nature. He takes this doctrine from Thomas Aquinas, but goes further than the latter in believing that the Divine knowledge is attainable in this world also by a perfect man, and should be sought by every means. God dwells within each human being. In order, however, that the transcendent God may appear in man as a second subject, the human, sinful activities must cease. Aid is given in this effort by the light of grace which raises nature far above itself. The way to God is through love; God replies to its highest development by His presence. Tauler gives advice of the most varied character for attaining that height of religion in which the Divine enters into the human subject. Something needs to be said as regards Tauler's position towards the Church. Luther praised him greatly and Protestants have always had a very high opinion of him, and have included him among the "reformers before the Reformation". However, it is now conceded by Protestants that he was "in reality entirely mediæval and not Protestant". He was in fact a dutiful son of the Church and never thought of withdrawing his allegiance. He expresses his opinion very plainly in his sermon on St. Matthew. He set his face against all heresy, especially that of the Brethren of the Free Spirit. What attracted Luther was probably not Tauler's doctrine itself, but only here and there some subordinate thought. Perhaps it pleased him that the word indulgence appears only once in Tauler's sermons, or it aroused his sympathy that Tauler laid less stress upon works, or again he was attracted by the tremendous earnestness of this seeker after God.

KLEMENS LÖFFLER.

Taunton, Ethelred, writer, b. at Rugeley, Staffordshire, England, 17 Oct., 1857; d. in London, 9 May, 1907. He was educated at Downside, and formed a desire both then and later in life to enter the Benedictine Order, but his weak health was an insuperable obstacle to the realization of his wishes. He succeeded in entering the Institute of St. Andrew, founded by the well-known convert, Rev. George Bampfield, at Barnet; but again his health prevented him from remaining. Finally, he joined the congregation of the Oblates founded by Cardinal Manning at Bayswater, and in 1883 he was ordained priest. Three years later he left the Oblates, and went on the mission at Stoke Newington in North London. Here he built a new church, which was opened in 1888; but shortly afterwards he received serious injury by the accidental fall of some scaffolding, which brought on partial paralysis, and permanently incapacitated him from active work. He continued, however, to be busy with his pen. He was a man of wide reading, and wrote on a large number of subjects. For a while he lived at Bruges, where he founded and edited "St. Luke's Magazine"; but it had only a brief existence, and having partially recovered his health, he returned to England and devoted himself to literature. His two chief works on the Jesuits and Benedictines, respectively, were to have been followed by a similar one on the English secular clergy, had he lived. Though he always professed to aim at setting forth truth unadorned and regardless of consequences, his partisan tone and apparent prejudice gave offence to many. Those who knew him best, however, testified to his singleness of purpose and genuine piety. He was also an authority on Church music and liturgy. His death took place somewhat suddenly, in London, from heart failure, at the age of fifty.

Publications: "History of Church Music" (London, 1817); "Lead Kindly Light" (London, 1893); "English Black Monks of St. Benedict" (London, 1898); "History of the Jesuits in England" (London, 1901); "Thomas Wolsey" (London, 1901); "Little Office B.V.M." (London, 1903); "The Law of the Church" (London, 1906); numerous articles in "Downside Review", "St. Luke's Magazine", "Irish Ecclesiastical Record", etc. He also translated Bacuez, "The Divine Office" (1886); and Bourdaloue, "The Lord's Prayer" (1894).

Dict. Nat. Biog., Supplement 1900–1910, s. v.; obituary notices in *Tablet, Downside Review*, etc.

BERNARD WARD.

Taveggia, Santino. See Krishnagar, Diocese of.

Taverner, John, composer, b. in the County of Norfolk, England, about 1475; d. at Boston, England, 1535 or 1536. He was organist of Boston Parish Church from 1500 to 1525, when he was appointed master of the choristers at Cardinal College, Oxford, by Cardinal Wolsey. His fame as organist and choirmaster was fully equalled, if not eclipsed, by his powers as a composer of masses and motets. He continued at Oxford till 1533, and then retired to Boston. On the strength of a statement of Foxe, in his so-called "Book of Martyrs", Taverner has been branded as a heretic, but it is more than probable that Foxe confounded the composer with John Taverner, a correspondent of Cromwell, or else with Richard Taverner, a Canon of Wolsey's College, Oxford, who revised Matthew's Bible. He wrote nothing for the English Service, but he has bequeathed eight masses, as well as fragments of others, and Latin Magnificats, that stamp him as a composer of the first rank. His beautiful four-part "In nomine" has been altered to fit two English anthems, "O give thanks" and "In trouble and adversity", in Day's "Morning and Evening Prayer" (1565). He contributed three songs to Wynkyn de Worde's English song book, printed in 1530; but by far the greater part of his work is sacred. His "Gaude Maria Virgo", for three voices, and his "Mater Christi", for five voices, are good examples of his style, but he is best known by his "Western Wynde" mass. Although obsessed by the conventions of the early sixteenth century, Taverner showed some good pioneer work, which was afterwards successfully developed by Shepherd, Byrd, Tallis, and Whyte. He must not be confounded with a later John Taverner, who was appointed professor of music at Gresham College in 1610.

Grove's *Dict. of Music and Musicians*, V (new ed., London, 1904–10); Walker, *A History of Music in England* (Oxford, 1907); Grattan-Flood, *Notes on English Church Composers* in MS.

W. H. GRATTAN-FLOOD.

Tavistock Abbey, on the Tavy River in Devonshire, England, founded for Benedictine monks in 961 by Earl Ordgar of Devon, and completed by his son Ordulf in 981, in which year the charter of confirmation was granted by King Ethelred. It was endowed with lands in Devon, Dorset, and Cornwall, and became one of the richest monasteries in the west of England. The church, dedicated to Our Lady and St. Rumon (one of the early Irish saints in Cornwall), was burned by the Danes in 997, but magnificently rebuilt under Livingus, the second abbot. He and his successor Aldred both became bishops of Worcester, and the latter is said to have crowned William the Conqueror. The thirty-sixth abbot, John Dynynton, was granted leave in 1458 to use the mitre and other *pontificalia;* and the thirty-ninth, Richard Banham, was made a lord of Parliament by Henry VIII in 1513. Twenty-five years later the last abbot, John Peryn, with twenty monks, surrendered the monastery to the king, receiving a pension of a hundred pounds. The abbey revenues at the dissolution were estimated at £902. The monastic buildings, with the borough of Tavistock, were granted to John Lord Russell, whose descendant, the Duke of Bedford, still owns them. Nothing is left of the monastery except the refectory, two gateways, and a porch; the splendid abbey church has entirely disappeared.

Dugdale, *Monast. Tavium, a titular see in Galatia Prima, suffragan of Ancyra. Tavium, or Tavia, was the chief city of the Galatian tribe of Trocmi, and owing to its position on the high roads of commerce was an important trading post. There are still extant some of the coins of Marcus Aurelius and Elagabalus. In the temple at Tavium there was a colossal statue of Jupiter in bronze, greatly venerated by the Galatians. There was some doubt about the exact site of the city, but it is to-day generally believed to be the ruins situated close to the village of Nefez Keui, inhabited during the winter by nomadic Turkish tribes, lying in a very fertile plain east of Halys in the caza of Songourlou and the vilayet of Angora. These ruins were partly used in building the neighbouring village of Yuzgad. We find there the remains of a theatre and possibly of a temple of Jupiter; these have a number of inscriptions, mostly Byzantine. In the "Notitiæ Episcopatuum" this see is mentioned up to the thirteenth century as the first suffragan of Ancyra. We have the names of five bishops: Dicasius, present at the Councils of Neocæsarea and Nice; Julian, at the Robber Synod of Ephesus (449), and at the Council of Chalcedon (451), and a signer of the letter from the Galatian bishops to the Emperor Leo (458); Anastasius, present at the Council of Constantinople (553); Gregory at the Council in Trullo (692); Philaretus at Constantinople (869).

Taxa Innocentiana, a Decree issued by Innocent XI, 1 Oct., 1678, regulating the fees that may be demanded or accepted by episcopal chancery offices for various acts, instruments, or writings. According to this Decree bishops or their officials are not allowed to accept anything though freely offered (1) for ordinations or anything connected therewith, such as dimissorial letters, etc.; (2) for institution to benefices; (3) for matrimonial dispensations. In this last case, however, alms to be applied to pious uses may be demanded. A moderate charge, fixed by Innocent, may be exacted by the chancellor for expediting necessary documents, except those granting permission to say Mass, administer the sacraments, preach, etc The Taxa Innocentiana is silent in regard to contentious matters, e. g. the charge for copies of the acts of ecclesiastical trials. Some maintained that Innocent's legislation was promulgated for Italy only, but it evidenced the mind of the Church, and at least in substance was of universal application. The Sacred Congregation of the Council on 10 June, 1896, modified the prescriptions of Innocent, decreeing that while taxes or fees may be imposed according to justice and prudence in matters pertaining to benefices and sacraments, especially matrimony, yet the sacraments themselves must be conferred without charge and pious customs connected therewith observed In other matters not directly affecting the administration of the sacraments, e. g. dispensations from the banns, it is decreed that: (1) laudable customs must be observed and allowances made for various circumstances of time, place, and persons; (2) the poor are not to be taxed; (3) in any case the amount demanded must be moderate, so that persons may not be deterred thereby from receiving the sacraments; (4) as regards matrimony the exaction is to be remitted, if otherwise there would be danger of concubinage; (5) in regard to benefices the tax must be in proportion to the fruits or income of the benefice in question; (6) all such fees are to be determined not by individual bishops but in provincial council, or at least in a special meeting of the ordinaries of the province for this purpose. The approval of the Holy See is required for the fees determined upon. Rome's sanction is given tentatively for five years to Italy, for ten years to other countries.

Andrew B. Meehan.

Taxster (Tayster), John de, sometimes erroneously called Taxter or Taxston, was a thirteenth-century chronicler, of whose life nothing is known except that he was professed as a Benedictine at Bury St. Edmund's 20 Nov., 1244. It is probable that he died in or about 1265, when his chronicle ceases. His work, which in the earlier part is compiled from Florence of Worcester, William of Malmesbury, and Ralph de Diceto, begins with the creation of the world. The value of the chronicle arises from Taxster's account of his own times; and his description of contemporary events was subsequently used by Everisden, Oxenedes, and Bartholomew Cotton. This part of his work has accordingly attracted more attention, and his chronicle for the period 1258–1263 has been printed by Luard in his edition of Cotton (Rolls Series). Taxster's chronicle as a whole has never been printed, and exists only in two MSS., one in the British Museum (Cott., Julius, A. 1.), the other in the College of Arms (Arundelian MS., 6). A faulty MS. for the years 1173–1265 was printed in 1849 for the English Historical Society, and passages relating to German affairs have been included by Pertz in "Mon. Germ. Hist.: Script.", XXVIII.

Edwin Burton.

Taylor, Frances Margaret (Mother M. Magdalen Taylor), Superior General, and foundress of the Poor Servants of the Mother of God, b. 20 Jan., 1832; d. in London, 9 June, 1900. Her father was a Protestant clergyman, the vicar of a Lincolnshire parish where her early years were spent in works of charity among the poor. She was a very clever woman, full of energy, with a wide sympathetic nature and a remarkably retentive memory. In 1854 her patriotism moved her to join Miss Nightingale's staff of nurses, and to go with them to the Crimean War. This threw her into contact with Catholic priests, Sisters of Mercy, and soldiers, and opened her eyes to the truth of the Catholic religion. After instruction she was received into the Church by Father Woollett, S.J. On her return to England she first worked among the poor of London, and made the acquaintance of Lady Georgiana Fullerton, with whose co-operation she laid the foundation of her institute. In addition to this, and to opening various refuges, convents, schools, etc., she did a great deal of literary work. She wrote a good many stories and always employed her pen for the promotion of the Catholic religion. For some time she edited "The Lamp", and helped to start both "The Month", and "The Messenger of the Sacred Heart", to which, as to other Catholic papers and periodicals of the day, she contributed. She had imbibed from Father Dignam, S.J., a great devotion to the Sacred Heart, and was very active in spreading this devotion and the Apostleship of Prayer, especially in Ireland. In 1892 her health gave way, and the rest of her life was suffering, borne with exemplary patience. She died in a home she had founded for penitents in Soho Square, London. Her works are "Memoir of Father Dignam, S.J."; "Retreats given by Father Dignam, S.J."; "Conferences by Father Dignam, S.J."; "The Inner Life of Lady Georgiana Fullerton"; "Tyborne and Who Went Thither"; "Convent Stories"; "Lost, and Other Tales"; "Dame Dolores"; "Life of Father Curtis, S.J."; "Religious Orders"; "Holywell and Its Pilgrims"; "The Stoneleighs of Stoneleigh"; "Irish Homes and Irish Hearts"; "Eastern Hospitals and English Nurses."

FRANCESCA M. STEELE.

Taylor, HUGH, VENERABLE, English martyr, b. at Durham; hanged, drawn, and quartered at York, 25 (not 26) November, 1585. He arrived at Reims on 2 May, 1582, and having been ordained priest was sent thence on the mission on 27 March, 1585. He was the first to suffer under the Statute 27 Eliz. c. 2. lately passed. On 26 November, Marmaduke Bowes, a married gentleman, was hanged for having harboured him. Bowes is described by Challoner as of Angram Grange near Appleton in Cleveland, but is not mentioned in the will of Christopher Bowes of Angram Grange, proved on 30 Sept., 1568, nor in the 1612 pedigree. The sole evidence against him was that of a former tutor to his children, an apostate Catholic. Having been previously imprisoned at York with his wife, he was under bond to appear at the Assizes which began on 23 November at York, and on his arrival found that Taylor was about to be arraigned. Bowes, though always a Catholic at heart, had outwardly conformed to the Established Church. "Before his death he was made a member of the Catholic Church the which he boldly confessed with great alacrity of mind".

JOHN B. WAINEWRIGHT.

Tebaldeo, ANTONIO, Italian poet, b. at Ferrara, in 1463; d. in 1537. His family name (Tebaldi) he changed to Tebaldeo, in consonance with the practice of the Humanists, who sought to Latinize the form of their appellation as much as possible. After serving as tutor to Isabella d'Este and secretary to Lucrezia Borgia, he became an habitué of the court of Leo X at Rome, enjoying the favour of that scholarly pope and the companionship of many of the erudite men and artists then in the Imperial City. He lost all his means in the sack of Rome (1527), and spent the remainder of his life in very narrow circumstances. He wrote verse in both Latin and Italian. His Italian verse is remarkable rather for vices of diction and style than for any poetical excellence. With his artificial manner, his abuse of metaphor, and his studied imagery, he was a forerunner of those extravagant versifiers who, in the seventeenth century, developed the movement called Marinism or *Secentismo*. To Tebaldeo has been ascribed a redaction of Poliziano's play, "Orfeo", which aims to make that piece accord better with the principles of classic composition. He figured among the writers of the time who engaged in the discussion concerning the nature of literary Italian. (See his verse in the edition of Venice, 1530, "Di M. Antonio Tebaldeo ferrarese l'opere d'amore".)

J. D. M. FORD

Te Deum, THE, an abbreviated title commonly given both to the original Latin text and the translations of a hymn in rhythmical prose, of which the opening words, *Te Deum laudamus*, formed its earliest known title (namely in the Rule of St. Cæsarius for monks, written probably when he was Abbot of Lérins, before A. D. 502). This longer title is used in the "Rules for Virgins" composed by St. Cæsarius while Archbishop of Arles, and by his second successor in the same see, St. Aurelian, also in the Rule of St. Benedict; and generally in earlier literature. The hymn is also sometimes styled "Hymnus Ambrosianus", the "Ambrosian Hymn"; and in the Roman Breviary it is still entitled, at the end of Matins for Sunday, "Hymnus SS. Ambrosii et Augustini". It is interesting to note that the title has been changed to "Hymnus Ambrosianus" in the "Psalterium" of the new Roman Breviary of Pius X. This Psalterium has been printed (1912), but became obligatory only from 1 Jan., 1913. The Te Deum is found in the first part of the "Psalterium ("Ordinarium", etc.) The tradition that it was spontaneously composed and sung alternately by these saints on the night of St. Augustine's baptism (A. D. 387) can be traced back to the end of the eighth century, and is referred to in the middle of the ninth century by Hincmar of Reims (*ut a majoribus nostris audivimus*) in his second work, "De prædestinatione" (P. L., CXXV, 290), and in an elaborated form in a Milanese chronicle attributed to Datius, Bishop of Milan (d. about 552), but really dating only from the eleventh century (thus Mabillon, Muratori, Merati, etc.). This tradition is now generally rejected by scholars.

(a) It should naturally have held, from earliest times, a prominent place in Milan; but of the earlier manuscripts of the Te Deum which refer to the tradition in their titles, none has any connexion with Milan, while the "Milan Cathedral Breviary" text (eleventh century) has no title whatever. (b) The tradition ascribing the authorship to the two saints is not unique. Another tradition is represented by the remark of Abbo of Fleury (A. D. 985) in his "Quæstiones grammaticales" (P. L., CXXXIX, 532, §19) concerning the erroneous substitution of "suscepisti" for "suscepturus" in the verse "Tu ad liberandum suscepturus hominem", etc., in what he styles "Dei palinodia quam composuit Hilarius Pictaviensis episcopus". It may be added that an eighth- or ninth-century MS. of the hymn, now at Munich, refers it to St. Hilary. (c) But neither to Hilary nor to Ambrose may the hymn be prudently ascribed, because although both composed hymns, the Te Deum is in rhythmical prose, and not in the classical metres of the hymns known to have been written by them. While, from the ninth century down to the present day, there is no century and no country of Western Europe that has not given its witness to the traditional ascription, the earliest MS., the "Bangor Antiphonary" (seventh cent.) gives as title merely "Ymnum in die dominica", while other early MSS. make no reference to the authorship, either giving no titles or contenting themselves with such general ones as "Laudatio Dei" (MS. of eighth cent.), "Laus angelica" (twelfth cent.), "Laus angelorum" (twelfth cent.), "Hymnus matutinalis" . . ."Hymnus die dominico", "Hymnum dominicale", etc. Other MSS. ascribe the hymn variously to St. Nicetus, Vicetus (obviously a slip of the pen for Nicetus), Nicetius, Nicetes, Neceta (all of these being thought identical with Niceta or Nicetas, Bishop of Remesiana, q. v.), to St. Hilarius, St. Abundius, St. Sisebutus, St. Ambrose, or St. Augustine. (d) The importance of the occasion to which the legend assigns the composition of the hymn (the baptism of St. Augustine) and the comparatively late appearance of the ascription to the two saints are additional arguments against the tradition. Merati thinks the legend may have been based on the words of a spurious sermon, given as no. 92 in an edition of the works of St. Ambrose (Paris, 1549), "De Augustini Baptismo": "In quo una vobiscum cum divino instinctu Hymnum cantavimus de Christi fide". It may be added that the Maurists omitted the Te Deum from their edition of St. Ambrose; that Batiffol ("Hist. du Brév. romain", Paris, 1893, p. 98; authorized and corrected tr., London, 1898, p. 110) writes: "No one thinks now of attributing this cento either to St. Ambrose or to St. Augustine"; that Father Burton, in his "Life of St. Augustine, . . . An Historical Study" (Dublin, 3rd ed., 1897) does not even mention the legend about the dual authorship and the baptism of St. Augustine; and finally that Portalié (see Augustine of Hippo) remarks: "The tradition maintaining that the Te Deum was sung on that occasion by the bishop and the neophyte alternately is groundless".

The other names mentioned above not being favoured by scholars, the question of authorship remained open. In 1894 Dom Morin put forward Nicetas of Remesiana for the honour of authorship. His suggestion has been adopted by Zahn, Kattenbusch, Kirsch (in Germany); Frere, Burn (in England), while the Anglican Bishop of Salisbury considers Morin's conjecture "very plausible"; and in France, by Batiffol. The reasons for this view are: (1) Ten MSS. (the earliest of the tenth century), mostly of Irish origin, name Nicetas (with variant spellings and identifications, however); and Ireland, remote from the continent of Europe, could easily keep until the tenth century a tradition of the fifth. (2) The probable date of composition of the hymn corresponds with that of the literary activity of Nicetas. (3) St. Paulinus of Nola praises (Carmina, xvii, xxvii) the poetic and hymnodal gifts of his friend Nicetas. (4) Gennadius speaks of the neat and simple style of his prose, and Cassiodorus commends his conciseness. These critical appreciations are thought applicable to the style of the Te Deum, which depends for its effect mostly on the nobility of the theme and the simplicity and directness of the expression. (5) The authorship of the treatises "De psalmodiæ bono" and "De vigiliis servorum Dei" was formerly ascribed to Nicetas of Trier, but is now attributed with greatest probability to Nicetas of Remesiana. Their "internal evidence . . . proves that Nicetas felt the need of such a hymn as the Te Deum, and, so to speak, lived in the same sphere of religious thought" (Burn, cii), while parallel passages from his writings (given by Burn, ciii–civ), although offering no direct quotation, exhibit similarity of thought and diction.

The authorship of St. Nicetas is questioned by some scholars (Cagin, P. Wagner, Agaesse, Koestlin, Blume). Among the passages cited to indicate a much earlier origin perhaps the most notable one is that from the "De mortalitate" (xxvi) of St. Cyprian of Carthage, written during the plague in 252: "Illic apostolorum gloriosus chorus; illic prophetarum exsultantium numerus; illic martyrum innumerabilis populus ob certaminis et passionis gloriam coronatus; triumphantes virgines, quæ concupiscentiam carnis et corporis continentiæ robore subegerunt; remunerati misericordes . . ." There is an obvious similarity between this and the verses of the Te Deum: "Te gloriosus apostolorum chorus; te prophetarum laudabilis numerus; te martyrum candidatus laudat exercitus [verses 7–9] . . . Æterna fac cum sanctis tuis gloria munerari [verse 21]". Perhaps the "remunerati" of St. Cyprian and the "munerari" of the oldest texts of the Te Deum are a mere coincidence; but the rest of the similar passages cannot be an accident. Which was the earlier—the Te Deum or the text of St. Cyprian? It is contended that, however well known and highly esteemed the works of the saint, there is little in this particular passage to strike the fancy of a hymn-writer, while it would be a very natural thing for a prose writer to borrow some expressions from such a widely-sung hymn as the Te Deum may have been. Moreover, if the hymn was borrowed from St. Cyprian, why did it not include the "virgines" instead of stopping with "martyrum"? Additional argument for a very early origin of at least the first ten verses of the hymn is found in comparisons between these and the texts and melody of the Prefaces, in the structure of the Gloria in excelsis, in the rhythmic and melodic character of the Te Deum, in the Greek translations.

This archæological argument cannot be stated intelligibly in a few words, but some of its bases may be mentioned: (a) If the Te Deum were composed in the latter years of the fourth century, it would be a unique exception to the hymnology of that time, which was all fashioned in the regular strophic and metric manner introduced and popularized by St. Ambrose. (b) From the point of view of melody, the hymn has three divisions: verses 1–13, 14–20, 21 to the end. The first melody (1–13) is apparently older than the others. (c) From the point of view of rhythm, there are also three divisions: verses 14–21 exhibit perfect conformity with the laws of the "cursus", or rhythmic closes, which date from the fourth century, verses 1–10, however, have only five (4, 6 and 8–10) verses closed with the rhythmical cursus, and these five are supposed to be the result of accident; verses 22 to the end belong to a wholly different category, being taken mostly from the Psalms (xxvii, 9; cxliv, 2; cxxii, 3; xxxii, 22; xxx, 2). It is argued that, judged by melody and rhythm, the first ten verses form a complete hymn (verses 11–13 having been added subsequently as a doxology) to God the Father, while verses 14–21 form a hymn (added in the fourth century) to Christ. As noted above, the first ten verses offer (vv. 7–9) the parallelism with the words of St. Cyprian, and are, for the various reasons outlined, supposed to antedate the year 252. Speculation ascribes their authorship to Pope St. Anicetus (d. about A. D. 168).

Three textual points may be noted here. "Unigenitum" in v. 12 is considered the original reading ("unicum" having supplanted it perhaps through the influence of the Apostles' Creed, in which "unigenitum" was rare). In v. 21 nearly all MSS. read "munerari" (*gloria munerari*) instead of the present "numerari" (*in gloria numerari*) which Blume has found in a twelfth-century MS., and which perhaps was suggested by the words in the Canon of the Mass: "in electorum tuorum jubeas grege numerari". Verse 16, "Tu ad liberandum suscepturus hominem", etc., offers much opportunity for critical discussion. Most of the old MSS. favour "suscepisti" (with "liberandum", followed sometimes by "mundum"—*Tu ad liberandum mundum suscepisti hominem*): but "suscepturus", contended for by Abbo of Fleury, Hincmar, and others, and quoted in a letter of Cyprian of Toulon (about 530), was probably the original word. The verse does not lend itself readily to translation. A fifteenth-century translation runs: "When thou shouldest take upon Thee mankind for the deliverance of men, thou horydest not the Virgin's womb". With similar accuracy a Sarum "Primer" of 1504 has: "Thou (when thou shouldest take upon our nature to delyver man) dydest not abhorre a virgynes wombe". The last "Primer" of Henry VIII (1546) was probably the first to introduce the ambiguous rendering: "When thou tookest upon thee to deliver man". The (Baltimore) "Manual of Prayers" is not more accurate: "Thou having taken upon Thee to deliver man, didst not abhor the Virgin's womb". The "Roman Missal Adapted to the Use of the Laity" (New York, 1901) is laboriously accurate: "Thou, when about to take upon Thee man to deliver him, didst not fear the Virgin's womb". The "Missal for the Use of the Laity" (London, new ed. 1903, cxxxiv) gives a new version in rhyme:

"Thou, to redeem lost man from hell's dark doom,
Didst not abhor the lowly Virgin's womb".

This is not far removed from Dryden's version:

"Thou, who to save the world's impending doom,
Vouchsaf'dst to dwell within a Virgin's womb".

The general rubrics (titulus XXXI) of the Roman Breviary direct the recitation of the Te Deum at the end of Matins: (a) on all feasts throughout the year, whether of nine or of three lessons, and throughout their octaves. It is said on the octave day of the feast of the Holy Innocents, but not on the feast itself unless this should fall on Sunday; (b) on all Sundays from Easter (inclusively) to Advent (exclusively) and from Christmas (inclusively) to Septuagesima (exclusively); (c) on all ferial days during Eastertide (namely from Low Sunday to Ascension Day) except Rogation Monday. For the sake of greater explicitness, the rubrics add that it is not said on the Sundays of Advent, or from Septuagesima to Palm Sunday inclusively, or on ferial days outside of Eastertide. It is said immediately after the last lesson, and therefore replaces the third or ninth responsory, as the case may be; but on days when it is not said, its place is occupied by the responsory. The Te Deum is followed immediately by Lauds except on Christmas Day (when it is followed by the prayer, and this by Mass). In general, the Te Deum may be said to follow the same rubric as the Gloria in excelsis at Mass.

In addition to its use in the Divine Office, the Te Deum is occasionally sung in thanksgiving to God for some special blessing (e. g. the election of a pope, the consecration of a bishop, the canonization of a saint, the profession of a religious, the publication of a treaty of peace, a royal coronation, etc.), and then usually after Mass or Divine Office, or as a separate religious ceremony. When sung thus immediately before or after Mass, the celebrant, who intones the hymn, may wear the vestments appropriate in colour to the day, unless these should happen to be black. Otherwise, while the rubrics prescribe no special colour, violet is forbidden in processions of thanksgiving (*pro gratiarum actione*), green is inappropriate for such solemn occasions, red (though permissible) would not suggest itself, unless some such feast as Pentecost, for example, should call for it. White, therefore, or gold, which is considered its equivalent, is thus left as the most suitable colour. The choir and congregation sing the hymn standing, even when the Blessed Sacrament is exposed, but kneel during the verse "Te ergo quæsumus . . ." At the end the versicles "Benedicamus Patrem" etc. are added, followed by the single prayer "Deus cujus misericordiæ".

There is practically but one plain-chant melody for the hymn, varying greatly, however, in different MSS. The official and typical melody is now given in the Vatican Gradual (1908) in the Appendix (*pro gratiarum actione*) in two forms, the *tonus solemnis* (in which every verse begins with preparatory or intoning notes) and *juxta morem romanum* (in which the verse begins *ex abrupto*). Pothier notes a strong affinity between the melodies of the Te Deum laudamus, te dominum confitemur and those of the Preface, Per omnia . . . Sursum corda. He also points out (Mélodies grégoriennes, 239) a psalmodic turn in the melody of the Te Deum, strengthened by the introduction of a distinct antiphon-form at the words "Æterna fac", etc., the antiphonal melody being thrice repeated. While the chant melody has been frequently used as a *canto fermo* for polyphonic Masses, the polyphonic settings are few compared with many hymns of less prominence. Palestrina, Jacob Haendl, and Felice Anerio have thus treated the old melody. Italian composers of the seventeenth century made settings for several choirs with organ and orchestra. Cherubini's manuscript setting is lost. Berlioz considered the finale of his own setting (for two choirs, orchestra, and organ) "undoubtedly his finest work". Sometimes the alternate verses only are set to music, so that another choir or the congregation may sing the other verses in plain-chant (as in the Miserere, q. v.). The Latin text has been translated into English and has received many settings in that form. Handel's "Utrecht" and "Dettingen" Te Deums are famous. One interesting feature of the latter is that it borrows inspiration for ten of its numbers from a Te Deum composed by the Minorite Francesco Urio, an able Milanese composer of the seventeenth-eighteenth century. Perhaps the most satisfactory of the recent settings of the Te Deum for use in Church is that of Edgar Tinel, written to celebrate the seventy-fifth anniversary of Belgian independence (1830–1905). It is composed for six-voiced mixed choir, orchestra, and organ.

There are about twenty-five metrical translations into English, including the sonorous version of Dryden, "Thee, Sovereign God, our grateful accents praise", and that of the Rev. Clarence A. Walworth, commonly used in American Catholic hymnals, "Holy God, we praise Thy Name", but written before his conversion, as it appeared with date of 1853 in the "Evangelical Hymnal". There are also six versions into English based on Luther's free rendering into German. There are many German versions, of which the "Grosser Gott, wir loben dich" is commonly used in Catholic churches. Probably the most recent Catholic translation is that found in the new edition (London, 1903) of Provost Husenbeth's "Missal for the Use of the Laity", "We praise thee, God: we glorify thee, Lord."

Julian, *Dict. of Hymnology* (2nd ed., London, 1907), s. v., 1119–34, 1547–8, 1709, an extensive and excellent article comprising contributions from John Sarum (i. e. John Wordsworth, Anglican Bishop of Salisbury) on the history and texts of the hymn, Birkbeck on the plain-song melody, Julian on the translations with bibliographical references; Kayser, *Beiträge zur Gesch. und Erklärung der ältesten Kirchenhymnen* (Paderborn, 1881), 435–60.

Morin, *Nouvelles recherches sur l'auteur du "Te Deum"* in *Revue bénédictine* (Feb., 1894), was the first to ascribe the authorship to Nicetas. The ascription was adopted by Burn, *Niceta of Remesiana, His Life and Works* (London, 1905), mentioning (Introduction, xcvii, footnote) other adherents of this view, among them the Anglican Bishop of Salisbury. Burn gives a bibliography. Reviewing Burn's work, Morin declares in the *Rassegna gregoriana* (May–June, 1905) that the hymn can almost certainly be attributed to Nicetas. A much earlier origin is sought by Cagin, *L'Euchologie latine étudiée dans la tradition de ses formules et de ses formulaires. Te Deum ou Illatio?* (Solesmes, 1906), which was reviewed unfavourably by Morin, *Le 'Te Deum' type anonyme de l'anaphore latine préhistorique* in the *Rev. bénédictine* (1907), 180–223, and defended by Agaesse, *Que Nicetas de Remesiana n'est pas l'auteur du "Te Deum"* in the *Revue des sciences eccles.* (Lille, Feb., Apr., June, 1910), who emphasizes the negative argument, considering the silence of antiquity as perhaps equal to a formal denial of Nicetas's authorship. Blume, *Ursprung des ambrosianischen Lobgesanges* in *Stimmen aus Maria-Laach* (1911), nos. 8–10, argues for an origin earlier than A. D. 252. For the first (i. e. Trinitarian) part of the hymn Nolan, *St. Ambrose and St. Augustine the Authors of the "Te Deum"* in *The Tablet* (London, 22 Oct., 1910), 644–5, should be read in connexion with Merati in his notes on Gavantus, *Thesaurus sac. rit.*, II (Venice, 1769), 109–112. A briefer statement of the question at issue (i. e. the traditional ascription to the two saints) is that of Daniel, *Thesaur. hymnolog.*, II (Leipzig, 1844), 279–88, who agrees with Merati in rejecting the ascription.

Daniel gives (*op. cit.*, 283) an imitation of the Te Deum (ascribed to St. Bonaventure) constructed into a Marian canticle: "Te Matrem Dei laudamus, te omnis terra veneratur, æterni patris sponsam", etc., and remarks that, so far as he knew, it had never been used in any public service of the Church. Wordsworth (*op. cit.*) refers to this as a "travestying" of the Te Deum, and expresses his gratification that the imitation had never been in public use. He is answered by Shipley, *A Dict. of Hymnology* in *Eccles. Review* (June, 1895, 451–2), who refers to Legg (Secretary of the "Henry Bradshaw Liturgical Text Society"), *Some Imitations of Te Deum*, showing that in the Middle Ages there was "no such dislike as now prevails, to retouch a masterpiece", that "every popular hymn had a hundred imitations", etc. Dreves, *Analecta hymn.*, XXXI, 212–4, gives a "Te Deum" Marianum (from a fourteenth century MS.) in thirty stanzas of the type: "Te deam digne laudibus et dominam fatemur. Te in terris virginem æternam veneramur. Te feminam eximiam omnes laude famur". Mone, *Lateinische Hymnen des Mittelalt.*, II (Freiburg, 1854), 229–31, gives interesting notes on some Marian imitations, and remarks that the imitators tried, with more or less success, to avoid any occasion for a misunderstanding of their meaning when adapting the Te Deum to the praise of the Blessed Virgin.

For the liturgical beginnings of the Te Deum, see the *Rules* of Sts. Benedict (*P. L.*, LXVI, 436), Cæsarius (*P.L.*, LXVII, 1102), and Aurelian (*P. L.*, LXVIII, 396); see also Blume for the Rules, *Der Cursus S. Benedicti Nursini*, etc. (Leipzig, 1908), 33, 44, 48, 50, 55, 57, 86; and for very significant early paraphrase of Te Deum, "Christi, cæli Domine", 92,—text, 118–9; Batiffol, *Hist. of the Roman Breviary*, tr. Baylay (London, 1898), 109–10; Baudot, *Roman Breviary* (London, 1909), 107, 110, 113. For variants, see Burn, op. cit., 83–91 (the ordinary, the Irish, and the "Milan" texts are given in columns; also the Greek texts). Ott, *L'innodia ambrosiana* in *Rassegna gregoriana* (1907), 491–6, compares, with musical illustrations, the Ambrosian and the Gregorian melody of the hymn; Singenberger, *Guide to Catholic Church Music* (St. Francis, Wisconsin, 1905), 186–7, mentions fifty-three liturgically correct settings for mixed voices and twenty-three for equal voices, with grade, composer, voices, etc. noted; see also *Church Music* (June, 1906, 433–6) for reviews of settings by Ponten, Mitterer, Tinel. Of Tinel's setting Bonvin writes: "Of all the settings of the Te Deum that are known to me that can be used for liturgical purposes I do not hesitate to declare Tinel's the finest and grandest", and reviews it at length. Kurthen, *Das Te Deum als Formproblem für die musikalische Komposition* in *Gregorius-Blatt* (1911), nos. 1–6; Bruders, *Das Te Deum in seinen literarischen Beziehungen* in *Literar. Rundschau* (1 June, 1911).

H. T. Henry.

Tegakwitha (Tekakwitha, Takwita), Catherine, known as the "Lily of the Mohawks", and the "Genevieve of New France", an Indian virgin of the Mohawk tribe, b. according to some authorities at the Turtle Castle of Ossernenon, according to others at the village of Gandaouge, in 1656; d. at Caughnawaga, Canada, 17 April, 1680. Her mother was a Christian Algonquin who had been captured by the Iroquois and saved from a captive's fate by the father of Tegakwitha, to whom she also bore a son. When Tegakwitha was about four years old, her parents and brother died of small-pox, and the child was adopted by her aunts and an uncle who had become chief of the Turtle clan. Although small-pox had marked her face and seriously impaired her eyesight and her manner was reserved and shrinking, her aunts began when she was as yet very young to form marriage projects for her, from which, as she grew older, she shrank with great aversion. In 1667 the Jesuit missionaries Frémin, Bruyas, and Pierron, accompanying the Mohawk deputies who had been to Quebec to conclude peace with the French, spent three days in the lodge of Tegakwitha's uncle. From them she received her first knowledge of Christianity, but although she forthwith eagerly accepted it in her heart she did not at that time ask to be baptized. Some time later the Turtle clan moved to the north bank of the Mohawk River, the "castle" being built above what is now the town of Fonda. Here in the midst of scenes of carnage, debauchery, and idolatrous frenzy Tegakwitha lived a life of remarkable virtue, at heart not only a Christian but a Christian virgin, for she firmly and often, with great risk to herself, resisted all efforts to induce her to marry. When she was eighteen, Father Jacques de Lamberville arrived to take charge of the mission which included the Turtle clan, and from him, at her earnest request, Tegakwitha received baptism. Thenceforth she practised her religion unflinchingly in the face of almost unbearable opposition, till finally her uncle's lodge ceased to be a place of protection to her and she was assisted by some Christian Indians to escape to Caughnawaga on the St. Lawrence. Here she lived in the cabin of Anastasia Tegonhatsihonga, a Christian squaw, her extraordinary sanctity impressing not only her own people but the French and the missionaries. Her mortifications were extreme, and Chauchtière says that she had attained the most perfect union with God in prayer. Upon her death devotion to her began immediately to be manifested by her people. Many pilgrims visit her grave in Caughnawaga where a monument to her memory was erected by the Rev. Clarence Walworth in 1884; and the Councils of Baltimore and Quebec have petitioned for her canonization.

Walworth, *Life and Times of Katerei Tekakwitha* (Buffalo, 1891); Burtin, *Vie de Catherine Tekakwitha, vièrge iroquoise* (Quebec, 1894); Campbell, *Pioneer Priests of North America*, I (New York, 1908).

Blanche M. Kelly.

Tegernsee, called Tegrinseo in 817, Tegernsee in 754, a celebrated Benedictine abbey of Bavaria that was of much importance for the civilization of the early Middle Ages. It was situated on the state road to the Tyrol by Lake Tegern in a south-south-easterly direction from Munich. According to the latest Germanistic researches the word *Tegern* signified in Old High German "large", consequently the name meant "large lake". It was not the Agilolfinger family, as is erroneously supposed, but Counts Adalbert and Otkar (Ottokar) of Warngau and Tegernsee who founded in 746 (not 719) a Benedictine abbey on Lake Tegern near the little Church of Our Saviour that was already in existence; this abbey was consecrated and occupied in 754. Counts Adalbert and Otkar belonged to the family of the Huosi, one of the five old ruling families who had come into the country with the Bavarians. The story of the colonizing of the monastery with monks by St. Othmar of St. Gall is legendary and is based on chronicles of a later era. On account of the disorders caused by the incursions of the Magyars at the beginning of the tenth century the founding of Tegernsee itself and the first decades of its history are hidden in deep obscurity. On the other hand, it is a perfectly well established fact that the founders of the abbey obtained the relics of St. Quirinus, a Roman martyr, from Pope St. Paul I (757–67), not from Pope Zacharias (741–52), and that these relics were translated from Rome to Tegernsee in the second half of the eighth century and were placed in the Church of Our Saviour, the first church of Tegernsee. The first abbot was Adalbert who is mentioned in a charter of 804 as having died recently. As early as the year 770 Abbot Adalbert took part in the Synod of Dingolfing, and just before the close of the eighth century (before 798) Adalbert and his "representative" Zacho were present at a synod at St. Emmeram in Ratisbon. At this synod they were obliged to promise to restore thirteen baptisteries that were in the possession of Tegernsee but which had been claimed by Bishop Atto of Freising. This demand was a result of the efforts of the episcopate of Bavaria of that era to limit as much as possible the parochial labours of the monasteries. The decision, however, was not executed but was adjusted by a settlement made at Tegernsee on 16 June, 804, on the occasion of the dedication of the Church of St. Peter at Tegernsee and the translation to it of the relics of St. Quirinus from the Basilica of St. Saviour (cf. "Historia Frising.", 12, 92).

The abbey soon attained to great distinction and importance, as is evident from a capitulary of the Emperor Louis the Pious of Aachen that was issued in the year 817. This capitulary called upon the monastery of "Tegrinseo" (Tegernsee) among others to furnish military contingents (M.G.L.L.I. sect. 11350, 20).

In the early part of the tenth century the monastery of Tegernsee fell completely into decay on account of the disastrous defeat of the Bavarians by the Magyars in 907, whereby nearly all the religious foundations of Bavaria were entirely destroyed. Laymen with their wives, dogs, and horses settled in the monastery of Tegernsee and finally a fire destroyed the buildings and with them the books and church vestments. When the monastery was restored by Emperor Otto II and Duke Otto of Bavaria in 979 all knowledge of its original foundation had disappeared at Tegernsee. In order to restore and maintain discipline the Emperor Otto called the monk Hartwich (979–982) of St. Maximinus at Trier to be Abbot of Tegernsee. The same charter that contains this appointment of 10 June, 979 (M.G. D.D. II, 1, 219, 199), also contains a grant from the emperor of the right of free election of the abbot, as well as freedom from taxes and the imperial protection, by which the abbey was withdrawn from the suzerainty of the rulers of Bavaria. Consequently the abbey became prosperous once more. Considerable information as to the efforts for reform of this abbot is given by a note in the manuscript of the Gospels, written in uncial characters that belonged to Tegernsee and is now at Munich (Clm. 19101). The note says: "Monastic reform was begun in this monastery by the reverend monk Hartwich of St. Maximinus on 6 May of the year 978. In the year 982 this same Hartwich received staff and benefice from Emperor Otto II and was consecrated by the very venerable Bishop Abraham [of Görz, Bishop of Freising]. The monks made their profession". Abbot Hartwich had an excellent successor (982–1001) in the Benedictine monk Gozbert of St. Emmeram, who had received his religious education at Augsburg. Gozbert introduced the study of the classics at Tegernsee, especially Statius, Persius, the letters of Horace and Cicero, and Boethius; the works of these men were read and copied.

Particularly distinguished among the monks during the administration of this abbot was the poet and prose writer Froumund (d. 20 October, 1012), who in a manuscript still preserved at Munich (Clm. 19412) made a collection of letters and poems of his own and others. He also copied at Cologne the treatise of Boethius "On the Consolation of Philosophy" and brought the copy to Tegernsee. It was this Froumund who brought about the intellectual and literary connexion between his abbey and the monasteries and churches of St. Emmeram at Ratisbon, Feuchtwangen, Augsburg, and Würzburg. It was at this era also that the glass works were established at Tegernsee to make stained-glass windows for Bishop Gottschalk of Freising. The opinion that glass-staining was invented at Tegernsee is erroneous, for before this in the ninth century stained-glass windows can be proved to have existed at St. Gall and in Westphalia. This prosperous period under the immediate successors of Gozbert, namely St. Gotthard (1001–1002), Eberhard I (d. 4 March, 1004), and Beringer (1004–1012), did not last long. As soon after this as the year 1031 Tegernsee was reformed, at the command of the Emperor Henry III, by the monks of Niederaltaich from which place monks, who were accompanied by Abbot Ellinger, were sent to occupy the Abbey of Tegernsee. Abbot Ellinger, however, met with opposition at Tegernsee and was obliged to return to his original monastery, from whence he did not venture to come back to Tegernsee until 1056, dying there in the same year. He was the abbot who began the "Urbar", or book of donations at Tegernsee, and who did so much at Tegernsee to improve and perfect technical skill. In 1015 a colony of monks went from Tegernsee to settle in the monastery of Sts. Ulrich and Afra at Augsburg. The prestige of Tegernsee was still maintained in the twelfth century and continued up to the middle of the thirteenth century. In the imperial documents of the twelfth century the names of the abbots of Tegernsee are often found signed as witnesses, as they were princes of the empire.

During the rule of Abbot Bertold I (1206–1217) the great minnesinger Walther von der Vogelweide stayed at the abbey. Most probably the literary importance of Tegernsee had led him to tie his steed at the monastery gate and to claim its hospitality. However, it is evident from Walther's songs that the singer of the Vogelweide, who rejoiced in the wine-cup, was not greatly delighted by the reception at Tegernsee, for he sang:

> People often told me of Tegernsee,
> How glorious was that house:
> So I went to it more than a mile from the road.
> I am a queer fellow,
> I cannot even understand myself
> And why I think so much of pious folks.
> I am not grumbling at it, for may God bless us both,
> I took the water:
> But henceforth
> I shall keep away from the monks' table.

The lines mean that according to the custom of the time Walther expected a good bumper of wine after the meal, but to his great astonishment only water was brought for the washing of the hands. This short poem of Walther von der Vogelweide, however, is not, as some have sought to prove, to be taken as a justification of the Abbey of Tegernsee in a lawsuit that was then being carried on over a vineyard.

In the thirteenth and fourteenth centuries the abbey suffered greatly from the wars carried on by the princes of Southern Germany, as well as by the prodigality of several of its abbots. In the reign of the Emperor Louis, Tegernsee lost its immediacy and became subject to Bavaria. At the time of the visitations in 1426 the Conventual, Caspar Ayndorffer, who was the second founder of Tegernsee and a close friend of the reforming Cardinal Nicholas of Cusa, was made abbot (1426–1460) by papal authority. He completely reformed Tegernsee and thus made the abbey a centre of the reform movement of that era. Ayndorffer was willing to accept as monks men who were not noble, as well as members of aristocratic families, consequently monastic discipline was maintained until the abbey was suppressed. The monk Ulrich Stöckl (in Latin *Trunculus*) was the legate of the Benedictine abbeys of the Diocese of Freising to the Council of Basle during the years 1432–1437; he wrote a valuable account of the council. As the researches of Guido Maria Dreves show, Stöckl was also a good writer of rhyming poetry. The last and sixty-third Abbot of Tegernsee was the excellent Gregory II Rottenkolber (from 1787), who encouraged learning and sent the young clerics to the Universities of Salzburg and Ingolstadt. He also made a collection of coins and engravings at Tegernsee. The abbey still continued to exist, notwithstanding many changes of fortune, until 1803, in which year it was secularized on 17 March. This sealed its fate, and the "Primas Bavariæ", as the Abbot of Tegernsee was called on account of his primacy over all other Bavarian prelates, resigned. The monastery became the property of the State; the abbey lands situated in Austria were confiscated by Austria; and the monastic buildings were bought by Freiherr von Drechsel for 3000 florins. In 1805 Abbot Rottenkolber and twenty monks were able to purchase for 5000 florins the monastery building for a house where they could lead a common life. In 1810 the abbot died there. In 1817 the former monastery became the property of King Maximilian I, who also bought the building owned by the Benedictines. The king had the place altered into a royal summer residence. At present it belongs to the family of the lately deceased Duke Charles Theodore who established in 1884 at Tegernsee an ophthalmic infirmary for the poor. The splendid library, that contained about 60,000 volumes, 6600 incunabulæ, and more than 2000 manuscripts, was incorporated in part in the National Library at Munich.

The intellectual importance of the Abbey of Tegernsee was less in the sphere of history than in the domains of literature and art. As is learned from a monk of Tegernsee of the fifteenth century, the abbey owned six Tegernsee chronicles that agreed in sense but varied in the way the events were related. Only four of them are known, and these are largely interwoven with legendary additions. They are: the "Translatio des hl. Quirinus" (Petz, "Anecdota," III, 3), that is erroneously ascribed to Froumund; the poetic presentation of the same subject by Metellus called the "Quirinalia"; and the two "Passiones S. Quirini", of which the shorter is the more ancient. Especially important was the purely literary work done at Tegernsee. Mention should be made of the "Ruodlieb", the earliest poetic romance, which was written in rhyming hexametres, not by Froumund, but by some Benedictine monk about the year 1030.

Tegernsee also took a very important part in the development of art, especially, as has already been said, in the making of stained glass. Glass works were established and, by order of Count Arnold Welsen-Klammbach, the churches were adorned with stained-glass windows instead of the old cloth hangings with which the window openings had formerly been covered. In 1083 Abbot Gozbert established a bell foundry which, after Freising, was the oldest in Bavaria. He secured the first bell-founder from Freising, a cleric named Adalrich, who, at the instigation of Abbot Gozbert, cast the bell of St. Quirinus, for which both the mould and the metal had been ready for three years. The glass-painter and monk, Werinher, who was also the goldsmith of Tegernsee, made the double doors of the cathedral of Mainz that were cast in 1014. Werinher, who was also nicknamed Wenzel (Petz, "Anecd.", VI), was a skilful sculptor (*artificiosus anaglypha*). In particular he understood how to ornament the covers of books with lettering and enamel. Tegernsee was also a noted monastic school in the medieval period. About 1067 the celebrated monk Otloh of St. Emmeram expressed his thanks for the knowledge he had gained at the abbey ("in loco illo, quo talia didici, id est in Cœnobio Tegernsee"; cf. Mabillon, "Analecta", 1723, 119). It was also Tegernsee that under the rule of Abbot Quirinus (1568–94) established a printing-press in 1573. The importance of printing was probably recognized at the very first on account of the art of wood-engraving which had been practised for a long time at Tegernsee, and of which very beautiful proof-impressions of the years 1472 and 1477 are still extant. The press at Tegernsee issued chiefly religious and popular works, and also scholarly and liturgical books of great typographical beauty. The architectural remains still existing at Tegernsee are the former monastery church of the fifteenth century, which, however, was so altered by rebuilding at the close of the seventeenth century that it can only be reconstructed by analysis. Over the door of the church is a marble relief dating from 1457, representing the founders of the church. Mention should also be made of the Church of St. Quirinus erected on the spot where, according to legend, a spring bubbled up when the coffin of St. Quirinus rested there during the translation to the monastery church. The building was erected by Abbot Ayndorffer in 1450 to replace a wooden church.

Tegianum. See DIANO, DIOCESE OF.

Tehuantepec, DIOCESE OF (TEHUANTEPECENSIS), in the Republic of Mexico, suffragan of Oaxaca. Its area covers the southern part of the States of Oaxaca and Vera Cruz, through the Isthmus of Tehuantepec. Its population is about 202,000; the residence of the bishop, the city of Tehuantepec, has 10,000 inhabitants.

Burgoa relates the following, which he deciphered from ancient Zapotecan pictures: A short time before the Spanish set foot on Mexican soil the subjects of the King of Tehuantepec begged him to make a sacrifice to their gods, and in particular to Guiscipocoché. This the king did and then said: "The great God announces that the time has come when he shall be driven from this earth because his enemies shall soon arrive from the regions of the rising Sun; these men will be white, and none of the Kings of these regions shall be able to resist their strength or their arms. They will subject us to misery and shall bring in their wake men who will be our priests and to whom those of us who shall remain will be forced to disclose our sins on bended knees".

On 24 April, 1522, Fray Bartolomé de Olmedo with Pedro de Alvarado arrived at Tehuantepec. The monarch, Cosijopii, a relative of the Emperor Montezuma, received them with open arms. He embraced the Catholic Faith, and a few years later erected at his expense in his royal city the convent of S. Domingo. The Franciscan Fathers, as well as the famous Dominican Fray Bartolomé de las Casas, Bishop of Chiapas, preached the Gospel in Tehuantepec. The first priests to settle there were Fray Gregorio Beteta and Fray Bernardo de Albuquerque. A few years later an attempt was made by the descendants of the King Cosijopii to return to paganism, but this plot when discovered was quickly suppressed (see MEXICO). When the See of Oaxaca was created in 1535, all the territory on which the city of Tehuantepec is situated belonged to it and remained so until 1891 when Leo XIII made of it a separate see, suffragan of Oaxaca or Antequera. There are 5 parochial schools with about 600 pupils, 4 Protestant colleges with 70 pupils, and 3 Protestant churches. In the capital, Tehuantepec, there are 14 churches, among which that of Santo Domingo is noted for its phenomenal size and splendid construction. Coatzacoalcos (to-day known as Puerto Mexico) is known for the tradition that from this port the celebrated Quetzalcoatl sailed for his native land.

CAMILLUS CRIVELLI.

Teilo (ELIUD), SAINT, "Archbishop" of Llandaff, b. at Eccluis Gunniau, near Tenby, Pembrokeshire; d. at Llandilo Vawr, Carmarthenshire, probably in or before 560, an old man, but Ussher puts his death at 604. Sir John Rhys thinks that his true name was Eliau or Eilliau; in Latin it usually appears as Teliarus, in Breton as Teliau, and in French as Télo. He was cousin to St. David and born of a good family settled at Penally, near Tenby. His father, whose name was probably Usyllt, may possibly be identified with St. Issell, the patron of the parish church of Saundersfoot. His sister Anaumed, or Anauved, married King Budic of

Armorica, and became the mother of St. Oudaceus, Teilo's successor. The earliest extant biographies of the saint are late and uncritical. Educated under St. Dyfrig or Dubric (q. v.), at Hentland, Herefordshire, and under St. Paul the Old or Paulinus at Whitland, Carmarthenshire, he subsequently ruled the monastic school at Llandaff, named after him Bangor Deilo. The story of his visit to Palestine with SS. David and Padarn (or Paternus) about 518, and their consecration there as bishops by John III, Patriarch of Jerusalem, is not now generally credited; but it seems that about that date, when St. Dubric withdrew to Bardsey, St. Teilo succeeded him at Llandaff. In 547 the "yellow plague" began to ravage Wales, and shortly afterwards St. Teilo with many of his flock crossed to Armorica, where they were hospitably entertained by his friend St. Sampson, Abbot and Bishop of Dol. After seven years and seven months Teilo returned to Wales, and is said to have been elected to the archiepiscopate vacant by the death of St. David, and to have transferred it from Menevia (q. v.) to Llandaff (q. v.); but the more general modern opinion seems to be that in Wales at that epoch the episcopate was not yet diocesan.

The story of the three bodies of the saint, which were discovered the day after his death, was probably invented to account for the fact that the churches at Llandaff, Llandilo Vawr, and Penally, all claimed to possess his body. Doubtless at his death his relics were widely distributed. To-day they are venerated at Landeleau (Finistère), Plogonnac (Finistère), and Saint Télo (Côtes-du-Nord). Five parish churches in Brittany are dedicated to him (Landeleau, Leuhan, Montertelot, Plédéliac, and Saint Télo) as well as a chapel between Plogonnac and Locronan. The modern Catholic church at Tenby bears the names of "Holyrood and St. Teilo". The dedication of twelve churches in the present Anglican Diocese of St. David's, and of six in that of Llandaff, show they owe their origin to this zeal. Borlase argues his connexion with six dedications in Cornwall and Devon. It is stated that he was formally canonized, but no date is given. He is not infrequently represented in Breton churches as riding on a stag. His festival is, or was, kept in Wales and at Saint Télo on 9 February; at Dol, as a double, on 29 November; and in other places in Brittany on 25 November.

JOHN B. WAINEWRIGHT.

Teleology (from Greek *τέλος*, end, and *λόγος*, science) is seldom used according to its etymological meaning to denote the branch of philosophy which deals with ends or final causes. It means the doctrine that there is design, purpose, or finality in the world, that effects are in some manner intentional, and that no complete account of the universe is possible without reference to final causes (for the notion of final cause, see CAUSE). With mechanism (q. v.) teleology admits the determinism of physical efficient causes. It also acknowledges that the object of scientific research is to discover the laws of phenomena, and that any fact is scientifically explained when adequate causes are assigned to it, and the conditions of its occurrence are known. But against mechanism, teleology claims that this determinism, these laws, and the mode of activity of efficient causes reveal the existence of a directive principle and of finality in the works of nature. Hence the question is not whether there are efficient or final causes, whether, for instance, man sees because he has eyes or has eyes in order to see. Final causes and efficient causes are not mutually exclusive. It must be admitted that any result in nature is to be ascribed to an unbroken chain of active causes, and the function of the final cause is not to supply any missing link but to explain how the activity of efficient causes is directed toward useful results. Nor can the teleologist be asked to indicate the end of every activity any more than the mechanist can be required to indicate the efficient cause of every phenomenon. Finally the problem does not refer to conscious and intelligent finality such as is manifested in human purposive actions, for it is obvious that in many of his actions man is guided by the idea of a preconceived plan which he endeavours to realize. Human works are for something; the house is built to live in; the clock is made to keep time; the machine is constructed to perform some work; the statue is carved to realize some ideal; etc. Are we justified in speaking of the works of nature in the same way? When we speak of ends and purposes in nature do we not attribute to it that which is distinctly human? Do we not carry too far the process of personification and analogy, and thereby incur the reproach of anthropomorphism? According to mechanists, because we foresee results we falsely conclude that nature strives to realize them. Ends exist in the mind which studies nature, not in nature itself. To admit ends is mentally to reverse the natural process, to look upon the effect as a cause, and from it to ascend the causal series regressively.

I. It is important at first to make a distinction between extrinsic and intrinsic finality. The former consists in realizing an end which is outside of the being that realizes it, and thus in contributing to the utility and welfare of other beings. In this way the mineral is utilized by the plant, and the plant by the animal. Or again the heat of the sun is a condition of growth and development. From this extrinsic finality result the subordination of various beings, and the order and harmony of the universe. But while extrinsic finality seems obvious in several instances many of its details escape us, and it is easy to make a wrong use of it by attributing false or childish ends to every being and event, and by taking a narrow anthropocentric view of finality. This abuse of final causes called for the vigorous protests of Bacon ("De Dignitate et Augmentis Scientiarum," III, iv), Descartes ("Principia Philosophiæ", I, 28; III, 2, 3; "Meditationes", III, IV), Spinoza (Ethica, I, prop. 36, app.). The exclusive consideration of extrinsic ends contributed probably more than any other cause to the discredit into which teleology fell at the time of the Renaissance. Yet, as Voltaire rightly remarks, it is clear that if the nose was not made to wear spectacles, it was made for the sense of smell (Dictionnaire philosophique, s. v. Causes finales). Here Voltaire appeals to the principle of intrinsic finality which, according to Aristotle and St. Thomas, is primary, while extrinsic finality is derived and secondary.

Intrinsic finality consists in the fact that every being has within itself a natural tendency whereby its activity is directed towards the perfection of its own nature. "As the influx of the efficient cause consists in its own action, so the influx of the final cause consists in its being sought after and desired" (St. Thomas, "De veritate", Q. xxii, a. 2). But this desire or *appetitus* (see APPETITE) is not necessarily conscious. St. Thomas does not hesitate to speak of "natural appetite", "natural inclination", and even "intention of nature", to mean that every being has within itself a directive principle of activity. The final cause is a good which satisfies a tendency springing immediately from the nature (q. v.) of every being. "By the form which gives it its specific perfection, everything in nature has an inclination to its own operations and to its own end, which it reaches through these operations. Just as everything is, such also are its operations and its tendency to what is suitable to itself" (St. Thomas, "Contra Gentiles", IV, xix). Accordingly, God does not direct creatures to their ends from outside, but through their own nature. This teleological view does not suppose that every efficient cause in the world is directed immediately by an intelligence, but by its own natural tendency. The Divine plan of creation is carried out by the various beings themselves acting in conformity with their nature. When, however, this finality is called immanent, this expression must not be understood in a pantheistic sense, as if the intelligence which the world manifests were to be identified with the world itself, but in the sense that the immediate principle of finality is immanent in every being.

II. Thus understood the principle of teleology seems almost obvious. Activity is essential to every being, and the same substance, placed in the same conditions, always acts in the same way. Its effect, therefore, does not happen by chance, for chance cannot account for fixity and stability. Within the substance itself must be found a principle of determination. Now what is a determination but an adaptation and an orientation toward an end? The fact that the world is governed by laws, far from giving any support to the mechanistic conception, is rather opposed to it. A law is not a cause, but the expression of the constant manner in which causes produce their effects. To say that there are laws is simply to state the determinism of nature, and it is precisely to this determinism that St. Thomas appeals to establish teleology. "Every active cause acts for an end, otherwise from its activity one effect would not result rather than another, except by chance" (Summa Theol., I, Q. xliv, a. 4). And again: "It is necessary that every active cause should act for an end. For in a series of causes, if the first be removed, the others also are removed [i. e., fail to produce their effects]. But the final cause is the first of all causes. The reason is that matter does not receive a form [i. e., does not change] except through the influence of an active cause. For nothing of itself passes from *potentia* to *actus* [see Actus et Potentia], and the active cause does not act except in consequence of the intention of an end. Otherwise, if the active cause were not determined to produce some particular effect, it would not produce this rather than some other. In order to produce a determined effect, it must, therefore, be determined to something in particular which serves as an end. As in rational beings this determination takes place through the rational appetite or will, so in other beings it takes place through a natural inclination which is called natural appetite" (Summa Theol., I–II, Q. i, a. 2).

Efficient causes are not indifferent, and their effects are not fortuitous. As a matter of fact, from the many individual activities of the various beings of the world order and harmony result in the universe. And when different forces converge toward a harmonious result, their convergence cannot be explained except by admitting that they tend to realize a plan. Life is essentially teleological. There is a co-ordination of all the organs, the functions of every one depending on those of the others, and tending to the welfare of the whole organism. Little by little the primitive cell develops according to the general type of the species and evolves into the complete organism. To Aristotle's statement that "nature adapts the organ to the function, and not the function to the organ" (De partib., animal., IV, xii, 694b, 13), Lucretius replied: "Nothing in the body is made in order that we may use it. What happens to exist is the cause of its use" (De nat. rerum, IV, 833; cf. 822–56),—an objection which had been presented more forcibly by Aristotle himself (Phys., II, viii, 198b). The function, it is true, is the result of the organ; the eye sees because it is an eye, and, in general, every function is an effect of active causes. But what is not explained by mechanism is the convergence of many different causes toward a given result. If organs are so many mechanisms, it remains to be indicated how these mechanisms were organized. If appeal is made to evolution, it must be remembered that evolution is not a cause, but a mode of development, and that organic evolution rather accentuates the need of final causes. In the inorganic world, the constancy of the laws of nature and the resulting order of the world manifest the existence in every being of a principle of direction and orientation.

The fundamental defect of mechanism consists in giving exclusive attention to the analyzing of every event into its causes, and in forgetting to look for the reason of their synthesis. If we take a clock to pieces, we discover in it nothing but springs, wheels, pivots, levers etc. When we have explained the mechanism which ultimately causes the revolutions of the hands on the dial, shall we say that the clock was not made to keep time? The intelligence that designed it is not in the clock itself which now obeys its own laws. Yet in reality we have an adaptation of means to an end. Thus the unconscious finality in the world leads to the conclusion that there must be an intelligent cause of the world. The whole preceding doctrine is well summed up in the following passage from St. Thomas (Summa Theol., I, Q. ciii, a., ad 3um): "The natural necessity inherent in things that are determined to one effect is impressed on them by the Divine power which directs them to their end, just as the necessity which directs the arrow to the target is impressed on it by the archer, and does not come from the arrow itself. There is this difference, however, that what creatures receive from God is their nature, whereas the direction imparted by man to natural things beyond what is natural to them is a kind of violence. Hence, as the forced necessity of the arrow shows the direction intended by the archer, so the natural determinism of creatures is a sign of the government of Divine Providence".

C. A. Dubray.

Telepathy (*τῆλε*, far, and *παθεῖν*, to experience), a term introduced by F. W. H. Myers in 1882 to denote "the ability of one mind to impress or to be impressed by another mind otherwise than through the recognized channels of sense" (Gurney, "Phantasms of the Living", I, 6); or: "the communication of impressions of any kind from one mind to another, independently of the recognized channels of sense" (Myers, "Human Personality", I, xxi).

I. The term telepathy is sometimes used, in conformity with its derivation, to mean the direct communication between minds at a great distance. Such terms as thought-transference, mind-reading, or mental suggestion would then apply to the direct communication between minds in the same room or at a small distance. Generally, however, at least in English, telepathy connotes only the exclusion of the recognized channels of sensation, irrespective of the distance. It supposes that, in some cases, the usual signs by which ideas are manifested—speech, writing, gestures, muscular contraction, facial expression, etc.—may be dispensed with, and that minds are able to communicate, if not directly and immediately, at any rate through some medium which is distinct from the ordinary medium of sense-perception. Thus understood, telepathy includes two classes of facts.

A. The first class consists of intentional communications, when a person (the agent) by the concentration of his mind on some object makes an effort to transfer an idea to another person (the percipient) who may or may not be aware of the attempt, and who may or may not make an effort to receive the communication. The experiments, made sometimes on normal, more generally and more successfully on hypnotized subjects, include the transference of tastes, sounds, visual images, pain etc.; the guessing of numbers, cards, colours, diagrams etc., thought of by the agent; the execution or inhibition of movements in compliance with the agent's will; the production or cessation of the hypnotic condition at a command mentally given; and other similar transferences of thought. In a few successful instances the agent has been able to produce apparitions of himself or even of a third person to the percipient in another room or house. In these experiments the main difficulty is to make sure that the percipient in no way uses his senses, which are in a state of hyperæsthesia or extraordinary acuteness, and that the correct guesses cannot be accounted for by similar habits, suggestions, and associations in both the agent and the percipient. Exhibitions of so-called mind-reading are generally explainable either by clever collusion, or by muscle-reading when there is contact between the agent and the percipient, or by the interpretation of sensory indications consciously or unconsciously given.

B. The other class of facts consists of spontaneous communications in which, as far as we can know, the agent has no intention of manifesting himself to the percipient. Herein are included especially the intimation of the danger, illness, distress, or death of some person, generally a friend or relative, and the apparition of the phantasm of such a person, especially at the time of his death. The degree of precision and exactness of these monitions varies indefinitely. Sometimes they consist in a merely physical occurrence coincident with the death, such as noise, the fall of some object, of a picture, etc. Sometimes ill-defined and inexplicable feelings of restlessness and uneasiness are experienced, or the sudden idea of what is happening flashes across the mind. Sometimes finally, either in the waking state or in dreams, apparitions are seen, and even entire scenes witnessed in all their details. The main difficulty in these cases is to determine whether they present mere coincidences due to subjective factors, such as habit, association, memory, expectation etc., or a real causality.

II. Two problems are to be solved regarding telepathy: A. Is the existence of telepathy as a fact demonstrated? B. If it is, what is its explanation?

A. Is the fact of telepathy established? In the past thirty or forty years, this subject has been studied critically. A large number of facts have been collected, especially by the Society for Psychical Research, founded in 1882, and have been published in "Phantasms of the Living", the "Proceedings" of the society, and many other works. In France, the "Annales des Sciences Psychiques" also record numerous cases. At present the literature on the subject is very extensive. After considering the cumulative evidence for the existence of telepathy, there cannot fail to remain in the mind at least a general impression that chance does not account for the number of coincidences, which is far greater than could be expected according to chance-probability. In the "Census of Hallucinations", after due allowance for possible causes of error, whereas ordinary chance coincidence would give 1:19,000 as the proportion of the coincidences of apparitions with the fact of death, the actual proportion is 1:43, or 440 times greater than would be expected. In experiments, the proportion of successful attempts varies greatly, yet, in general, it is far above that which chance-coincidence would lead us to expect. Nevertheless, the fact of telepathy is not yet accepted universally as strictly demonstrated. There are so many difficulties to meet, so many causes of error to avoid, and so many obstacles to overcome, that results obtained so far are not looked upon by all as sufficient to give a scientific certitude of the fact.

B. Various theories have been proposed to account for the fact of telepathy. Some, appealing to a preternatural causality, have supposed the intervention of good or evil spirits. But the principle admitted by all scientists, philosophers, and theologians is that a fact must be looked upon as natural until the contrary is proved. The present impossibility of giving a scientific explanation is no proof that there is no scientific explanation. The unexplained is not to be identified with the unexplainable, and the strange and extraordinary nature of a fact is not a justification for attributing it to powers above nature. Another attempt, namely the spiritistic hypothesis, cannot be discussed here (see SPIRITISM). Attempts at a scientific explanation rest either on a psychological basis (Myers, Sir Oliver Lodge) or on a physical and physiological basis (Sir W. Crookes, Flournoy, Ochorowicz). Among psychological attempts is the supposition of the existence of a sub-conscious mind or subliminal self endowed with all the powers required to account for all the facts. While the considerable influence of the subconscious or the subliminal cannot be denied, the theory in its generality has the grave defect of being the fact itself expressed in other terms, and of having for its only proof the fact itself which it seeks to explain. Others simply appeal to supernormal faculties that are purely psychological. Among physiological and physical attempts are the suppositions of some neurotic fluid, brain vibrations, or a special form of energy transmitted from brain to brain through some unknown medium. All these attempts are unsatisfactory, and, according to all, the problem is still unsolved. Further experiments are needed, both to establish the fact itself beyond all doubt, and chiefly to determine its psychological and physical conditions. Until this is done, any theory is premature.

C. A. DUBRAY.

Telese, DIOCESE OF (TELESINENSIS).—Telese, a small town in the Province of Benevento, Southern Italy, is situated in the valley of the Calore, well known for its hot sulphur springs. The ruins of the ancient Telesia, the Tedis of the Oscan coins, are to be seen yet on Monte Acerro. The city was captured by Hannibal in 207 B. C.; Scipio founded a colony there. Having fallen into decay it was rebuilt in the ninth century. Its first bishop mentioned is Agnellus (487); in the tenth century it was subject to the Archbishop of Benevento. In 1612 Bishop Gian Francesco Leoni (1508) transferred the episcopal residence to Cerreto Sannita. In 1818 the see was united to that of Piedimonte d'Alife, but was re-established in 1852. Among its bishops we may note: Alberico Giacquinto (1540), renowned for his learning and piety; Angelo Massarelli (1567), secretary of the Council of Trent, of which he wrote the acts and a diary; Vincenzo Lupoli (1792), a distinguished jurisconsult. The diocese contains 24 parishes with 60,600 inhabitants, 40 secular and 10 regular priests, 2 convents of men and 5 nunneries, and a school for young girls.

U. BENIGNI.

Telesio, BERNARDINO, Italian humanist and philosopher, b. of a noble family at Cosenza, near Naples, 1508; d. there, 1588. He studied successively at Milan, Rome, and Padua. In Southern Italy the revolt against Aristoteleanism had already begun. At Padua Telesio first came to be recognized as a leader of the anti-Aristoteleans. After residing several years in Rome, where he enjoyed the patronage of Paul IV, Telesio returned to Naples, and later founded an academy at Cosenza. His principal work is entitled "De rerum natura juxta propria principia", the first part of which was published in Rome, 1565, and the second in Naples, 1587. He was a radical opponent both of the method and of the content of Aristotelean philosophy. He considered that the scholastic followers of Aristotle relied too much on reason and too little on the senses. The "reasoners", he believed, were over-confident of their power to reach the secrets of nature by syllogistic methods. With conscious humility, therefore, he determined to trust to his senses alone, and, beginning "in the dust", he strove to reach the highest pinnacle of natural truth. This exclusion of reason from the task and the consequent exaltation of sense above every other faculty of the mind resulted naturally in the sensistic doctrine that all knowledge is feeling (*sensus*) or sensation, and in the materialistic doctrine that the soul itself is material. In the content of his philosophy he opposed the Aristotelian doctrine of matter and form, substituting for it the doctrine that everything is composed of matter and force, the two principal forces being heat and cold. Heat is centralized in the sun, and cold in the earth. As the Platonist Patrizzi pointed out, there is an inherent contradiction in Telesio's system. For, if we are to rely on the senses and not on reason, since the senses do not reveal the existence of matter except as modified by forces, the central doctrinal principle is in contradiction with the most important methodological tenet. This point was brought out in the discussions between the advocates of Aristotle and the followers of Telesio in the sixteenth century. Among the most ardent disciples of Telesio were Campanella and Giordano Bruno.

WILLIAM TURNER.

Telesphorus, SAINT, POPE (about 125–136). He was the seventh Roman bishop in succession from the Apostles, and, according to the testimony of St. Irenæus (Adv. hæreses, III, iii, 3), suffered a glorious martyrdom. Eusebius (Hist. eccl., IV, vii, xiv) places the beginning of his pontificate in the twelfth year of Hadrian's reign (128–129), his death in the first year of the reign of Antoninus Pius (138–139). These statements, however, should be compared with Lightfoot, "The Apostolic Fathers", I (London, 1899), 201 sq., section on "Early Roman Successions", and Harnack, "Geschichte der altchristl. Literatur", pt. II, "Die Chronologie", I (Leipzig, 1879), 70 sq. In the fragment of the letter of Irenæus of Lyons to Pope Victor concerning the celebration of Easter (Euseb., "Hist. eccl.," V, xxiv), Telesphorus is mentioned as one of the Roman bishops who always celebrated Easter on Sunday, without, however, abandoning church fellowship with those communities that did not follow this custom. None of the statements in the "Liber pontificalis" and other authorities of a later date as to liturgical and other decisions of this pope are genuine. In the Roman Martyrology his feast is given under 5 January; the Greek Church celebrates it on 22 February.

J. P. KIRSCH.

Telesphorus of Cosenza (THEOPHORUS, THEOLOPHORUS), a name assumed by one of the pseudo-prophets during the time of the Great Schism. He gave out that he was born at Cosenza and lived as a hermit near the site of the ancient Thebes. His book of predictions on the schism was the most popular of the numerous prophetic treatises that were spread broadcast by the many self-constituted prophets of that period. More than twenty manuscripts of it are still extant, and it first appeared in print with various interpolations: "Liber de magnis tribulationibus in proximo futuris, etc." (Venice, 1516). The work was originally compiled about 1386 from the writings of Joachim of Flora, John of Roquetaillande, the "Cyrillic Prophecy", and other apocalyptic treatises whose authors are mentioned in the dedicatory preface addressed to Antoniotto Adorno, the Doge of Venice. Its chief prophecies are: the schism will end in 1393 at Perugia, where the antipope and his followers will be punished; a short period of peace will follow, whereupon the Emperor Frederick III with three antipopes will inaugurate a cruel persecution of the clergy, who will be deprived of all their temporalities; King Charles of France will be imprisoned, but miraculously liberated; the "Angelic Pastor" will ascend the papal throne; under his pontificate the clergy will voluntarily renounce their temporal possessions and a general council will legislate that the income of the clergy is limited to what is necessary for a decent livelihood; the "Angelic Pastor" will take from the German electors the right to elect the emperor, he will crown the French King Charles emperor, and restore the Church to its original poverty and service of God; finally, the pope and the emperor will undertake a crusade, regain the Holy Land, and bring the Jews, Greeks, and infidels back to Christ. A refutation of these prophecies, written by the German theologian Henry of Langenstein, is printed in Pez, "Thesaurus Anecdotorum Noviss," I, II (Augsburg, 1721–9), 507–64.

KAMPERS, *Kaiserprophetien u. Kaisersagen* (Munich, 1896), 235 sq.; PASTOR, *Gesch. der Päpste.*, tr. ANTROBUS, I (London, 1891), 152–5.

MICHAEL OTT.

Tell el-Amarna Tablets, THE, are a collection of some 350 clay tablets found in 1887 amid the ruins of the ancient Egyptian city of Akhetaton (modern Tell el-Amarna) about midway between Memphis and Thebes. 200 of them are now in Berlin, 82 in the British Museum, 50 in Cairo, 22 in Oxford; only a few are private property. They are written in the Babylonian language and cuneiform characters and date from the fifteenth century B. C. They consist mostly of letters and State records sent to Kings Amenhotep III and Amenhotep IV of Egypt, by rulers of Western Asia (Babylonia, Assyria, Mittani) and provincial governors of Amurru (Northern Syria) and Canaan (Palestine). All these documents throw considerable light on the conditions of Western Asia from about 1500 to 1300 B. C.; they contain most precious information concerning the history, geography, religion, and language of the predecessors and contemporaries of the Hebrews in Palestine, and, in many cases, illustrate and confirm what we already know from the Old Testament.

The best work on the Tell el-Amarna tablets (transcription, German translation, glossary, and notes) is that of Knudtzon, *Die El Amarna Tafeln* in *Hinrichs' Vorderasiatische Bibliothek*, II (Leipzig, 1907–9). The Berlin and Cairo tablets were edited by Abel and Winckler, *Der Thontafelfund von El Amarna* (1889–90), and those in the British Museum by Bezold, *The Tell el-Amarna Tablets in the B. M.* (London, 1892). For all tablets known in 1896 see also: Winckler, *Die Thontafeln von Tell-el-Amarna* (transcription, German translation, and glossary); Schrader, *Keilinschriftliche Bibliothek* (Berlin, 1896); English translation by Metcalf (Berlin and New York, 1896); Conder, *The Tell-Amarna Tablets* (2nd ed., London, 1894); Niebuhr, *The Tell-el-Amarna Period; Relations of Egypt and Western Asia in the 15th century B. C. according to the Tell-el-Amarna tablets* (*The Ancient East*), (London, 1901); Flanders Petrie, *Tell el-Amarna* (London, 1894); Idem, *Syria and Egypt from the Tell el-Amarna Letters* (London, 1898); Idem, *A Hist. of Ancient Egypt*, II (4th ed., London, 1904); Jeremias, *Das Alte Testament im Lichte des Alten Orients.* (Leipzig, 1906); Weber, *Die Literatur der Babylonier u. A. A. Vaschalde.

Téllez, Gabriel, Spanish priest and poet, better known by his pseudonym of Tirso de Molina, b. at Madrid, c. 1571; d. at Soria, Aragón, 21 March, 1648. Little is known of his early years except that he studied at Alcalá de Henares. The exact date of his ordination to the priesthood is not known, but the earliest notice of him in that connexion is in 1610 when he is mentioned by Andrés de Claramonte y Corroy in his "Letanía Moral", as Padre Fray Gabriel Téllez of the Order of Nuestra Senora de la Merced. He appears to have devoted the last years of his life to the affairs of his order and occupied responsible offices in it. In 1619 he was superior of a convent at Trujillo in Estremadura; in 1620, and for several years following, he lived in the monastery of the order in Madrid; and in 1645 he became prior of the monastery at Soria where he died three years later. It has been stated that he adopted his *nom de plume* on account of his Holy orders, but this theory is apparently disproved by the fact that both names appeared on the same title-page.

Tirso's first printed volume, "Los Cigarrales de Toledo," appeared in Madrid in 1624 and Barcelona, 1631. The name is taken from *cigarral*, a Toledian word meaning a country house. The work is patterned after Boccaccio's "Decameron" and is a collection of tales and poems and three comedies, supposed to be recited and played by a company of ladies and gentlemen who meet at a *cigarral* for the purpose of diversion. A second collection, entitled "Deleitar aprovechando," appeared in Madrid in 1635, and contains essays, *autos sacramentales*, and three religious tales. As a dramatic writer, Tirso was very prolific. He is credited with having written four hundred plays, but only about eighty are now available. During his life his comedies were published in five parts, the first in Seville, 1627, the third in Tortosa, 1634, the second and fourth in Madrid, 1635, and the last in Madrid, 1636. These contain fifty-nine plays. The play which has given Tirso his fame is his "Burlador de Sevilla y Convidado de Piedra", in which he created the character of Don Juan, afterward immortalized by Mozart in his opera of that name and by Lord Byron in his poem. Hs is at his best in his comedies and his secular *novelas*. He excels in wit, originality of dialogue, and ingenuity of plot.

Ventura Fuentes.

Tellier, Michel Le, b. 19 April, 1603; d. at Paris, 30 Oct., 1685. He was commissioned by Cardinal Mazarin to organize the royal army, and having helped to appease the troubles of the Fronde, he left to his son Louvois in 1666 his duties as secretary of war. After his appointment as chancellor by Louis XIV in 1677 he had a decisive share in the revocation of the Edict of Nantes, which he signed, 2 Oct., 1685, a few days before his death. Before expiring he sang the canticle of Simeon "Nunc dimittis". He shared Louis XIV's illusion that there were almost no Protestants left in France, and that the act suppressing the liberty of Protestant worship was no more than the public recognition of an accomplished fact, the disappearance of Protestantism. His eldest son, Michel Le Tellier, Marquis de Louvois (b. at Paris, 18 Jan., 1641; d. 16 July, 1691), noted for the remarkable expedition with which he organized the armies for the wars of Louis XIV, was partly responsible for this false idea, for he led the king to believe that the dragonades, military expedition which Louvois sent into Protestant villages, had finally overcome all resistance. The youngest son of Michel Le Tellier was Charles-Maurice Le Tellier. Michel's funeral oration was delivered by Bossuet and Fléchier.

Georges Goyau.

Telmessus, titular see in Lycia, suffragan of Myra. Telmessus (or incorrectly Telmissis) was a flourishing city west of Lycia, on a bay of the same name (also called *Glaucus sinus*). It was famed for its school of diviners, consulted among others by Crœsus, prior to declaring war against Cyrus, and by Alexander, when he came to the town after the siege of Halicarnassus. It must not be confounded with a city of the same name in Caria. Telmessus was also called Anastasiopolis in honour of the emperors of that name. Its ruins are located at Makri (1500 inhabitants, half of them Greek), the capital of a caza in the vilayet of Smyrna, and situated upon a rather important harbour. The acropolis is still in existence surrounded by walls erected by the Knights of Rhodes and the Genoese. The ruins include the remains of a theatre and a curious tomb cut in the rock. Makri derives its name from the Macra of the ancients —the Isla Longa of the medieval Italians, which lay at the entrance to the gulf. Le Quien (Oriens Christ., I, 971) mentions two bishops of Telmessus: Hilary (370) and Zenodotus, at the Council of Chalcedon (451). The latter is called "Bishop of the Metropolis of Telmessæi and the Isle of Macra". The "Notitiæ episcopatuum" mentions Telmessus among the suf

fragans of Myra until the tenth century, when it is no longer called Macra; in 1316 mention is made of the See of "Macra and Lybysium". Lybysium or Levissi is about four miles south-west of Makri, and has 3000 inhabitants, nearly all Greeks.

Te Lucis Ante Terminum, the hymn at Compline in the Roman Breviary. The authorship of St. Ambrose, for which Pimont contends, is not admitted by the Benedictine editors or by Biraghi (see Ambrosian Hymnography). The hymn is found in a hymnary in Irish script (described by Blume in his "Cursus", etc.) of the eighth or early ninth century; but the classical prosody of its two stanzas (*solita* in the third line of the original text is the only exception) suggests a much earlier origin. In this hymnary it is assigned, together with the hymn "Christe qui lux es et dies", to Compline. An earlier arrangement (as shown by the Rule of St. Cæsarius of Arles, c. 502) coupled with the "Christe qui lux" the hymn "Christe precamur adnue", and assigned both to the "twelfth hour" of the day for alternate recitation throughout the year. The later introduction of the "Te lucis" suggests a later origin, although in its simple dignity the hymn is not unworthy of the muse of St. Ambrose. The two hymns "Te lucis" and "Christe qui lux" did not maintain everywhere the same relative position; the latter was used in winter, the former in summer and on festivals; while many cathedrals and monasteries replaced the "Te lucis" by the "Christe qui lux" from the first Sunday of Lent to Passion Sunday or Holy Thursday—a custom followed by the Dominicans. The old Breviary of the Carthusians used the "Christe qui lux" throughout the year. The Roman Breviary assigns the "Te lucis" daily throughout the year, except from Holy Thursday (Te Lucis Ante Terminum, p. 2) to the Friday after Easter, inclusively. Merati, in his notes on Gavantus's Thesaurus, says that it has always held, without variation, this place in the Roman Church. As it is sung daily, the Vatican Antiphonary (now passing through the press) gives it many plain-song settings for the varieties of season and rite (e. g. the nine melodies, pp. 117–121, 131, 174, 356, 366).

Mearns and Julian in *Dictionary of Hymnology* (2nd ed., London, 1907), 1135, 1710. To its list of transl. add Bagshawe, *Breviary Hymns and Missal Sequences* (London, s. d.), no. 30; Donahoe, *Early Christian Hymns* (New York, 1908), 41; Henry, *Hymns of the Little Hours* in *Ecclesiastical Review* (Sept., 1890), 204–09; Kent in Shipley, *Annus Sanctus*, part II, 88; Pimont, *Les hymnes du bréviaire romain*, I (Paris, 1874), 124–30, defends (128–9) the simple directness of the language of the second stanza. *Hymns Ancient and Modern* (historical edition, London, 1909), no. 34, gives Latin text and tr., harmonized plainsong and a modern setting credited to the *Katholische Geistliche Gesangbuch* (Andernach, 1608), no. 163; Daniel, *Thesaurus Hymnologicus*, I, 53; Blume, *Der Cursus S. Benedicti Nursini*, etc. (Leipzig, 1908), 65, 68, 75.

Temiskaming, Vicariate Apostolic of, suffragan of Ottawa, Canada, is bounded on the north by Hudson Bay and the Great Whale River; on the south by the height of land, or watershed, except in the Temiskaming district, where the southern boundary is 47° N. lat.; on the east by 72° W. long.; and on the west by 91° W. long. It was erected on 22 Sept., 1908, by dividing the Diocese of Pembroke. Father de Bellefeuille, S.S., and Father Dupuy, of Montreal, first preached the Gospel here in 1836. Annual visits were made to the Indians of the district, missions being held at the Hudson Bay Company's trading posts. The Oblates of Mary Immaculate were given charge in 1843. Father Laverlochère was the first of these zealous missionaries. They established a residence at Fort Temiskaming in 1863, but removed to Ville Marie in 1886. Lumbering succeeded the fur trade and was followed by agriculture, the fertile shores of Lake Temiskaming rapidly attracting settlers. Railway construction with the discovery of silver and gold (1903), advanced the Ontario section. The Catholic population of the vicariate is about 20,000, including some 5000 Indians. Haileybury, Ontario, is the residence of the first vicar Apostolic, the Right Rev. Elie-Anicet Latulipe. There are 17 parishes, 20 missions, and many stations, served by 21 secular priests, 4 Missionaries of the Sacred Heart (who have a college also), and 9 Oblates of Mary Immaculate. The Marist Brothers, the Sisters of the Assumption (novitiate at Haileybury), the Grey Nuns of the Cross, the Sisters of the Sacred Heart, the Sisters of Providence, and the Sisters of the Holy Family conduct four boarding-convents, two hospitals, and one industrial school and refuge for Indians, besides several parochial schools. The Rt. Rev. Elie-Anicet Latulipe, D.D., was born at St. Anicet, Province of Quebec, 3 Aug., 1859. Ordained on 30 May, 1885, he was successively curate at St. Henri, Montreal, chaplain at the convents of the Good Shepherd, Montreal, and St. Anne's, Lachine, rector of Pembroke Cathedral, and pastor of Haileybury. He was named Bishop of Catenna and first Vicar-Apostolic of Temiskaming on 1 Oct., 1908, and consecrated on 30 Nov., 1908.

John R. O'Gorman.

Temnus, a titular see in Asia, a suffragan of Ephesus. Temnus was a little town of Æolia, near the River Hermus, which is shown on its coins. Situated on an elevation it commanded the territories of Cyme, Phocæa, and Smyrna. Under Augustus it was already on the decline; under Tiberius it was destroyed by an earthquake; and in the time of Pliny it was no longer inhabited. It was however rebuilt, and became one of the suffragans of Ephesus. Le Quien (Oriens Christ., I, 707), mentions three bishops: Eustathius, who lived in 451; Theophilus, present at the Council of Nice (787); Ignatius, at Constantinople (869). This see is not mentioned in the "Notitiæ Episcopatuum". Ramsay (Asia Minor, 108) thought the Diocese of Temnus identical with that of Archangelus, which from the tenth to the thirteenth century the "Notitiæ Episcopatuum" assigns to Smyrna. In 1413 the Turks seized the fortress of Archangelus, which they called Kaiadjik, i. e., small rock; this fortress was situated on the plains of Mænomenus, now known as Menemen. Doubtless, Temnus and Menemen are the same. The latter is now the chief place in the vilayet of Smyrna, with 9000 inhabitants, of whom 2000 are Greeks, 500 Armenians, the remainder Mussulmans. However, Texier (Asie Mineure, 227) identifies Temnus with the village of Guzel Hissar, to the north of Menemen.

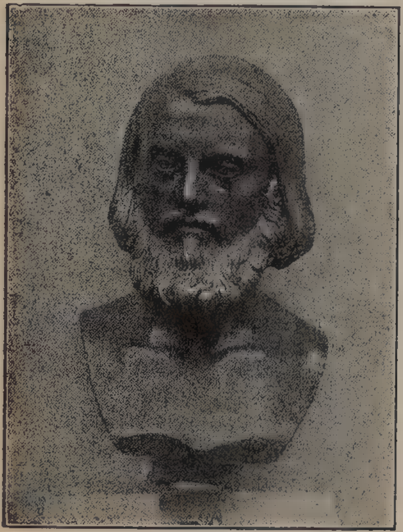
S. Pétridès.

Tempel, Wilhelm (Ernest Leberecht), German astronomer, b. 4 December, 1821, at (Nieder–) Cunnersdorf near Löbau, Saxony; d. 16 March, 1889, in Arcetri near Florence. Having lost his mother in early infancy, he was placed under a schoolmaster from his ninth to his fourteenth year, and employed as sexton, beadle, gardener, and collector of fees on occasions of New Year, of baptisms, and marriages. He then learned the art of lithography, and about his twentieth year, went to Copenhagen with letters of recommendation to a distant relative Lehmann, the father of the Danish statesmen and journalist, Orla Lehmann. During a three-years' stay he was a welcome and frequent guest with a number of artists and academicians. The sculptor Reinhold carved his bust, and the painter Bünsen drew his portrait. His German poems to friends and benefactors show a complete mastery of his native tongue. He became enthusiastic over the literature and national songs of the Danes, and translated selections into German, e. g., "King Réné's Daughter". These three years in Denmark were, as he used to say, his academic career. With a desire to know peoples and countries from experience, he went to Christiania, but soon turned his path to the land of the fine arts. About 1850 he settled in Venice as lithographer. The Palace of the Doge seems to have attracted his artistic tastes, for he became intimately acquainted with the family of the Porter Gambin, whose daughter Marianna he married, embracing at the same time the Catholic faith. His wife testified that Tempel had never been satisfied with his former religion and purposely chose a Catholic companion in life. The marriage proved very happy, although not blessed with children. Contact with cultured people in Venice awakened in him a taste for astronomy. From his earnings he bought a 4-inch (Steinheil) comet-seeker, and in 1859 made two discoveries, one of a comet (designated 1859 I), on 2 April, and another of the Merope-Nebula in the Pleiades, on 19 October. The new talent for discoveries matured in him the plan of embracing the astronomical career. In his enthusiasm he moved to Paris, but found that lack of scientific training precluded entrance to the Imperial Observatory. Greatly disappointed by Leverrier, the director, he moved with his wife to Marseilles in 1860, where he was accepted by Benjamin Valz as assistant astronomer.



HEAD OF WILHELM TEMPEL
By Reinhold in the Observatory, Copenhagen

Tempel began his career in Marseilles with the discoveries of a comet (1860 IV) on 22 October, and of two minor planets on 4 and 8 March, 1861, all with his own 4-inch comet-seeker, on the terrace of the observatory. The position however lasted only half a year, owing partly, it would seem, to continued strained relations with Leverrier. He then settled down once more as lithographer without, however, giving rest to his comet-seeker. From window or garden he discovered, during ten years, no less than thirteen comets and four minor planets, more than half of them new. From Marseilles he began publishing his observations in the "Astronomische Nachrichten". In France he missed cordial and intellectual intercourse, and a literary attempt of his in "Les Mondes", in May, 1863, on the question of the variability of nebulæ, was severely criticized by Leverrier. In the same year (1863) he paid a two-months' visit to his native country, spending most of the time at the observatory of Leipzig. Just two years before, in 1861, a former astronomer of Leipzig, d'Arrest, had built a new observatory at Copenhagen. Unfortunately for Tempel, d'Arrest was the very one who criticized his publication on the Merope-Nebula as exaggerated, although the controversy ended in justifying Tempel's assertion, that nebulæ must be observed with low magnifying powers. Tempel's effort, in 1870, to get a position under d'Arrest was fruitless.

In January, 1871, the Provisional Government ordered the Germans out of Marseilles. In spite of his experiences in France, Tempel sympathized with the unfortunate country during the war. Arrived at Milan he found in Schiaparelli the man who appreciated his talents. Though he had no academic degrees, he was offered a position in the Brera Observatory. Two of Tempel's comets had attracted Schiaparelli's attention: that of 1866 (I) which furnished to him the proof of connexion with the November stream of meteors, and that of 1867 (II) which proved to revolve entirely between the orbits of Mars and Jupiter and to run almost parallel with the latter planet in 1869, so as to furnish a type specimen of planetary perturbation. Comet "1869 III" is called Tempel's "third periodic comet", but its periodicity was not recognized until 1880. Four new comets were discovered in Milan. Comet "1873 II", called Tempel's "second periodic", is remarkable for the shortness of its period, being little over five years, and second only to Encke's comet. Tempel's publication in the Milan "Ephemeris" for 1872 shows that he reduced his own observations. His mind was sufficiently mathematical to acquire the use of logarithms and trigonometry and to draw elliptical orbits. Number V of the Brera Publications contains masterly lithographic plates of a lunar eclipse (1 June, 1863), of the Merope-Nebula, of Jupiter's satellites and a series of Coggia's Comet. A more perfect map of the Pleiades appeared in "Monthly Notices" (XL, 1880). Contact with Schiaparelli brought honours to Tempel. The Vienna Academy rewarded him four times for the discovery of comets, the two of 1869 discovered in Marseilles, and the two of 1871. Once in 1872, in the absence of the director, he received the Emperor of Brazil at the observatory, acted as cicerone, and presented some of his drawings. The year after, he received, through the Brazilian Consul, the diploma of "Knight of the Imperial Brazilian Order of Roses".

When, in 1873, the Arcetri Observatory lost its director Donati, by death, Schiaparelli proposed Tempel as successor. The severe winters of Milan and the prospect of an independent position made it easy for Tempel to accept, although the unfinished state of the buildings and instruments, the title and scanty salary of assistant astronomer, the lack of library and assistants, were fraught with disappointments. After four years' work in Milan (1871–74) Tempel moved to his last station, which he was to hold for fourteen years. He found the observatory situated in an earthly paradise. It was designed and commenced in 1869 by Donati, under the University of Florence, but interrupted in 1872 by Donati's sickness. For two years it had been left in this state. The rain poured in on all sides and a wall of the meridian room had to be supported. A description of the observatory is given by Tempel in the "Astr. Nachr.", CII (1882). The predecessor of Donati, Amici, had constructed two object-glasses, one of 9.4 inches and one of 11 inches, large sizes in those times, but their mountings were imperfect and incomplete. The former had a wooden stand and could only be used on the terrace; pointing to objects of over 40° altitude was found dangerous. The mounting of the largest instrument was parallactic, but without divided circles, without clock-work, without clamp and slow motion. The observing chair was a ladder that did not reach to stars within 20° of the horizon. Both instruments had only one eye-piece. The books present contained no star catalogues, and were lying on the floor. Money was still owing on the building, and no resources for the future open. The habitation was so defective that Tempel had to live in a neighbouring villa until his death.

On examination the object-glasses proved a little defective in colour correction but excellent in definition; hence less adapted for planets, but perfectly suitable for comets, asteroids, and nebulæ, the very programme of Tempel. Nebulæ, however, became now his main field. In Arcetri he picked up only one more comet, “1877 V”. The work with the large equatorial proved very slow and laborious. To find and to identify the stars, the observer had to descend from the ladder, use the comet-seeker on the terrace and make triangulations on the small charts at hand, all without electric light. And yet, after four years' work, Tempel presented to the Royal Academy of the Lincei a collection of drawings of the more interesting nebulæ, which secured him the royal prize given every six years for the best astronomical work in Italy. The Academy even offered to publish the drawings, but the proofs of the lithographs did not satisfy the author. The designs are the more valuable as they contain many stars, measured with a double ring-micrometer. Tempel discovered many new nebulæ, observed a number that had been neglected since Herschel's time, wrote a mass of careful notes that are not yet published, occasionally correcting errors. Extracts of his observations are found in the “Astr. Nachr.” (vols. 93–113). Drawings of the Orion nebula were published in the “Astr. Nachr.”, vol. LVIII (1862), and in the Memoirs of the R. Bohemian Society of 1885 (reviewed in the Vierteljahrsschrift, XXII). Tempel was elected foreign associate of the Royal Astronomical Society of England in 1881, together with Gyldén, Pickering, Tietjen, and Tisserand (Monthly Notices, XLI, 377). In 1886 he was honoured with a letter from King Humbert, handed to him by the Adjutant General, in recognition of his astronomical drawings. In the intercourse with scientific men, the lack of academic training betrayed itself occasionally, and Tempel himself regretted all his life that he had not learnt Latin. Diffusiveness of style and uncritical assertions provoked contradiction. A controversy with Dreyer, the astronomer of Birr Castle, about the reality of spiral forms in many of Lord Rosse's drawings of nebulæ, may be found in “The Observatory” (vols. I–II, 1878). The existence of a faint nebula drawn by Tempel (near H. I 55 Pegasi) was denied by Keeler (Astroph. J. XI, 1900).

Tempel's intercourse with old friends in Copenhagen remained cordial to his end. He received them or friends recommended by them, like brothers, and always regretted that his means did not allow him to revisit Copenhagen. His letters to them breathe a deeply religious spirit. He glories in his honesty from childhood, regrets complaining about injuries received, speaks of the blessings of Providence, of friendship beyond death, gives thanks and praises to God, promises prayers to friends and benefactors, and looks confidently towards eternity. Expressions like these made his Protestant friend say in the “Dagbladet”: “During the many years' sojourn in Italy his mind, which was subject to depressions, had found peace by entering the Catholic Church”. The same friend assured the writer of this article that, on a visit to Arcetri, he had found Tempel very happy in his religious convictions. His dearest company was an old priest who visited him regularly. A Franciscan from the Convent of Quaracchi was his confessor, and the Carthusians of the Certosa were his friends. Towards the end of 1886 Tempel was attacked by a liver complaint and, in the beginning of 1887, by partial paralysis. Unable to observe, he put his notes in order for publication. During his illness he received the sacraments repeatedly. The parish priest of S. Leonardo (now Canon Emilio Nunziati) testifies that Tempel was a thoroughly convinced Catholic and died a saintly death, having his mind clear to the last. Tempel was hardly sixty-eight years old. He is buried near the tomb of Donati, in the cemetery of S. Felice a Elma, a suburb of Florence. He left neither debts nor property, and his widow was provided for by what is called in Italy a “spaccio di sali e tabacchi”, this again, as it seems, through Schiaparelli. More than 186 drawings of nebulæ and stars, with numerous notes, are now the property of the university and deposited in the Tribune of Galileo (via Romana). A list of them is in the “Astron. Nachr.”, CII (1882), and in the “Bohemian Memoirs” (1885).

J. G. HAGEN.

Temperance (Lat. *temperare*, to mingle in due proportions; to qualify) is here considered as one of the four cardinal virtues. It may be defined as the righteous habit which makes a man govern his natural appetite for pleasures of the senses in accordance with the norm prescribed by reason. In one sense temperance may be regarded as a characteristic of all the moral virtues; the moderation it enjoins is essential to each of them. It is also according to St. Thomas (I–II, Q. cxli, a. 2) a special virtue. Thus, it is the virtue which bridles concupiscence or which controls the yearning for pleasures and delights which most powerfully attract the human heart. These fall mainly into three classes: some are associated with the preservation of the human individual; others with the perpetuation of the race, and others still with the well-being and comfort of human life. Under this aspect temperance has for subordinate virtues, abstinence, chastity, and modesty. Abstinence prescribes the restraint to be employed in partaking of food and drink. Obviously the measure of this self-restraint is not constant and invariable. It is different for different persons as well as for different ends in view. The diet of an anchorite would not do for a farm labourer. Abstinence is opposed to the vices of gluttony and drunkenness. The disorder of these is that food and drink are made use of in such wise as to damage instead of benefit the bodily health. Hence gluttony and drunkenness are said to be intrinsically wrong. That does not mean, however, that they are always grievous sins. Gluttony is seldom such; drunkenness is so when it is complete, that is when it destroys the use of reason for the time being. Chastity as a part of temperance regulates the sensual satisfactions connected with the propagation of the human species. The contrary vice is lust. As these pleasures appeal with special vehemence to human nature, it is the function of chastity to interpose the norm of reason. Thus it will decide that they are altogether to be refrained from in obedience to a higher vocation or at any rate only availed of with reference to the purposes of marriage. Chastity is not fanaticism; much less is it insensibility. It is the carrying out of the mandate of temperance in a particular department where such a steadying power is acutely needed.

The virtue of modesty, as ranged under temperance, has as its task the holding in reasonable leash of the less violent human passions. It brings into service humility to set in order a man's interior. By transfusing his estimates with truth, and increasing his self-knowledge it guards him against the radical malice of pride. It is averse to pusillanimity, the product of low views and a mean-spirited will. In the government of the exterior of a man modesty aims to make it conform to the demands of decency and decorousness (*honestas*). In this way his whole outward tenor of conduct and method of life fall under its sway. Such things as his attire, manner of speech, habitual bearing, style of living, have to be made to square with its injunctions. To be sure they cannot always be settled by hard and fast rules. Convention will often have a good deal to say in the case, but in turn will have its propriety determined by modesty. Other virtues are enumerated by St. Thomas as subordinated to temperance inasmuch as they imply moderation in the management of some passion. It ought to be noted, however, that in its primary and generally understood sense temperance is concerned with what is difficult for a man, not in so far as he is a rational being precisely, but rather in so far as he is an animal. The hardest duties for flesh and blood are self-restraint in the use of food and drink and of the venereal pleasures that go with the propagation of the race. That is why abstinence and chastity may be reckoned the chief and ordinary phases of this virtue. All that has been said receives additional force if we suppose that the self-control commanded by temperance is measured not only by the rule of reason but by the revealed law of God as well. It is called a cardinal virtue because the moderation required for every righteous habit has in the practice of temperance a specially trying arena. The satisfactions upon which it imposes a check are at once supremely natural and necessary in the present order of human existence. It is, not, however, the greatest of moral virtues. That rank is held by prudence; then come justice, fortitude, and finally temperance.

JOSEPH F. DELANY.

Temperance Movements.—EUROPE.—Reasons for a temperance movement exist to a greater or less degree in all the countries of Europe, although the kind and amount of alcoholic drinks consumed vary greatly in the different lands. In former days the greatest amount of drunkenness was to be found in Russia and Sweden, while now the latter country is the most temperate of all. On the other hand, conditions at present are very bad in France and Belgium, largely because these are almost the only lands where absinthe is habitually drunk. Unfortunately, it is just in these countries that there are but few signs of an energetic temperance movement, for in them wine and beer are still called "hygienic drinks". A strong opposition to the use of alcoholic liquors exists in Great Britain, in the Scandinavian kingdoms, and, for the last ten years, in the Netherlands and Germany. It is only of late that the southern countries of Europe have begun to take part in the temperance movement, and of these Italy is the most active.

A. *Consumption of Alcohol.*—Statistics as to the consumption of intoxicating liquors should be used with great caution, especially when different countries are compared. The amount of alcohol in various liquors, and even in the same liquor in different countries, varies greatly. The most reliable international statistics concerning alcoholic beverages are probably those repeatedly issued since 1897 by the British Board of Trade. These statistics were taken by the Imperial Bureau of Statistics at Berlin in 1906 as the basis for the excellent papers on the alcohol question that appeared in the "Reichsarbeitsblatt". According to them, the average amount of alcohol in distilled liquors may be taken as 50 per cent; in wine in Germany and Switzerland, 10 per cent; in wine in Italy, France, Belgium, and Holland, 12 per cent; in Great Britain, 15 per cent; the average amount of alcohol in beer may be taken as 4 per cent (in Great Britain, 6 per cent). The alcoholic beverages most generally used are distilled spirits, beer, and wine. The drinking of absinthe, since its prohibition by popular vote in Switzerland in 1908, is limited to France and Belgium, where the prohibition is to a large degree evaded. Distilled spirits is the principal alcoholic beverage in the following countries: Russia, where it is 93 per cent of all the alcoholic beverages consumed; the three Scandinavian countries, 65–69 per cent; Austria-Hungary, 59 per cent. The largest proportion of beer is drunk in Great Britain (78 per cent of all alcoholic beverages consumed) and Belgium (64 per cent). Wine is the alcoholic beverage most used in the following countries: Switzerland, 58 per cent of all alcoholic beverages; France, 75 per cent; Italy, 95 per cent. In Germany, besides a small consumption of wine, an almost equal amount of beer and spirits is used (beer, 49 per cent; spirits, 44 per cent). The figures are, of course, quite different if the question is as to the amount of liquor actually drunk. The amount depends in the first place on whether moderate drinking is the daily habit in a country, or whether alcoholic beverages are drunk only occasionally, even though immoderately; and, secondly, whether beverages containing a large amount of alcohol are most used, or the consumption is of weaker ones, but in larger quantities. This is the reason why the beer-drinking countries rank first when the inquiry is how much alcoholic drink is consumed per capita of population, while, on the other hand, the lands where the largest amounts of wine and brandy are consumed take the lead if the question is as to the amount of alcohol consumed. In the former respect, Belgium stands first with a consumption of nearly 54.22 gallons per capita of population, 49.52 gallons being beer; then come Great Britain and Switzerland, each about 33.01 gallons per capita; Germany, 30.66 gallons; Italy and France, each 28.30 to 30.66 gallons; Denmark, 25.94 gallons. In the other countries the consumption is less than 25 gallons per capita, e. g. Norway, 4 gallons; Holland and Russia, each about 2.35 gallons. On the other hand, the countries where the largest quantity of alcohol is drunk are: France, 4 gallons per capita, and Italy, 3.7 gallons. The countries showing the lowest figures are: Holland, .94 gallon; Russia, .61 gallon; Norway, .51 gallon. Germany and Austria are in the middle with about 2.24 gallons. If, finally, the individual beverages are considered, the largest consumption of distilled spirits is in Denmark, 3.3 gallons per capita, and Austria-Hungary, 2.39 gallons; the largest consumption of beer is in Bavaria and Belgium, where it is more than 50 gallons per capita; the consumption of wine is largest in Italy, 27.59 gallons, and France, 36.55 gallons. The absolute figures are as follows: Germany, 58,962,028.3 gallons of distilled spirits, 1,757,075,471.69 gallons of beer, 87,264,150.94 gallons of wine, for which nearly £150,000,000 ($714,500,000) is paid annually, a sum nearly three times as large as the cost of the German army and navy. The annual expenditure in Austria for alcoholic beverages is about £104,166,000 ($500,000,000).

B. *Development of the Temperance Movement.*—Two main periods are to be distinguished. The first, which began about 1830, was fairly general, but substantially affected only the British Isles and the Germanic countries. The second began in 1850 in Great Britain; after a decade it extended to Scandinavia, and after thirty years to Germany. It was, however, only at the close of the century that it attained its great importance, by gradually obtaining a footing in all civilized countries. In both periods the immediate stimulus came from the United States of North America. The chief distinction between the earlier and later movements is generally expressed thus: that the former laid the emphasis on temperance, the latter on total abstinence. But this hardly reaches the root of the matter. Apart from the fact that even in the earlier period teetotal societies existed in England (from 1832), refraining from spirituous beverages was at that time practically equivalent to total abstinence, as other intoxicating drinks were almost unknown, or at least their injurious qualities were much underrated. Beer was then strongly recommended (even in popular songs) as a "most delicious drink"; thus the brewing industry was encouraged. It was thought that poisonous substances existed only in distilled spirits, consequently nothing was said of combating alcohol, but always distilled spirits, and this through abstinence. The earlier movement is better characterized by calling it the era of naïve enthusiasm, supported especially by religious ideas. Drunkenness was regarded chiefly as a vice to be overcome by strong religious sentiments. Clergymen were the principal leaders of the movement, and the pledge was its highest attainment.

The new movement is more dispassionate; its fundamental ideas are largely hygienic and social. The nature of alcoholic beverages has been more thoroughly investigated and the danger of habitual moderate drinking, which merely avoids intoxication, has been recognized. Intemperance is no longer generally regarded as a matter of individual morality, but as a menace to the public health (because of its effects on the offspring) and as a danger to national welfare (inasmuch as it promotes criminality and immorality, while lessening mental and economic productivity). The present movement is promoted by physicians, sociologists, and government officials; its final aim is rather to do away with the drinking of alcohol either by national prohibition or by local option. Still, of late, the religious side of the movement has shown renewed vigour, especially in rescue work for drunkards; and strong religious organizations have sprung up, especially among the Catholics of Germany and Holland. It is entirely in keeping with the social character of the movement that the effort is made to influence children and young people also (as in the "Bands of Hope") and that even the schools are called on to co-operate by means of special instruction.

The first traces of an organized temperance movement in Europe are found in the union formed at Växjö, Sweden, in 1819, by a number of pupils at a gymnasium under the guidance of Per Wieselgren (1800–77), who afterwards became famous as the father of the Swedish temperance agitation. The members of the union pledged themselves to abstain from all harmful spirituous beverages. However, impulses from America ("American Temperance Society", 1826) first led to the foundation of regular societies—almost immediately in Ireland (New Ross, 1829; by 1830, 60 societies); Scotland (Greenock, 1829; the "Scottish Temperance Society", a central organization, founded in 1831, soon had 300 branches); England (Bradford, 1830; by the end of 1830, 30 local societies; the "British and Foreign Temperance Society", 1831); Sweden (Stockholm, 1830; the "Swedish Temperance Society", a central organization, founded in 1837, had 100,000 members by 1845). The movement spread most rapidly in Ireland, where from 1834 Father Mathew (q. v.), probably the greatest preacher of temperance of all times, laboured with extraordinary success; by 1844 he had secured nearly 5,500,000 adherents. In Dublin alone 180,000 took the pledge from him; later he went to England, gaining 60,000 in London, then to Scotland and America. In 1858 the "Irish Temperance League", now the most important abstinence organization in Ireland, was founded. As in Sweden, the first movement in Norway and Germany was also an independent one, but it did not attain in either country much importance until it came into contact with the American and English movements. In Norway, Kjell Andresen established throughout the country numerous societies which, in 1845, he united into a central organization, "Den norske verening modbraendevinsdrikken", an association that received at once considerable financial aid from the State.

The campaign was opened in Germany about 1800 by a number of medical treatises, especially those of Hufeland (Die Branntweinvergiftung), and also the circular addressed by King Frederick William III of Prussia to the Protestant consistories urging them to exhort the people to abstain from spirits. The first societies were established at Hamburg in 1830 and at Dresden in 1832, through English influence. About 1833 Frederick William III asked the American Government for information concerning the temperance movement. In answer to this request Robert Baird, author of the epoch-making "History of the Temperance Societies in the United States", was sent to Europe in 1835. At Berlin Baird gave the French version of his work to the king, who had it translated immediately into German, and 30,000 copies distributed. The movement was now carried on with great zeal, mainly by the different Churches. The chief workers among the Catholics were: Father Seling (1792–1860) in the Diocese of Osnabrück; the Archpriest Fitzek and Father Schaffranck in Silesia; the missioner Hillebrandt in Westphalia; Father Ketterer and other Jesuits in Ermland; much influence was also exerted by the writings of the popular author Alban Stolz. Father Mathew's work was taken as the model of the movement, but an effort was made to secure greater permanence by forming temperance confraternities; these still exist in the east of Germany. The work was carried on among Protestants by Pastor Böttcher of Hanover (also active as a writer) and by Freiherr von Seld, who covered much territory lecturing on temperance. The result of these labours was that when the first temperance congress was held (Hamburg, 1843) there were already over 450 temperance societies in Northern Germany, and 1702 when the second congress was held (Berlin, 1845). At the same date the total number of abstainers in Germany was stated to be 1,650,000, of whom over 500,000 were in Upper Silesia. This was the culminating point of the movement, which rapidly declined after the Revolution of 1848. Besides the countries already mentioned, the early movement attained prominence only in Holland and Denmark, although the American influence was felt in other countries also. In 1842 the "Nederlandsche Vereeniging tot abschaffing van sterken drank" was formed at Leyden; its membership rose to over 20,000 and then declined. Baird spent 1840 in Denmark; 40 societies were quickly formed there, and, in 1845, were united into a national association with its own newspaper, the "Folkevennen". In Denmark also the conflict between the temperance and total abstinence advocates ended the entire movement.

With the exception of England, where the High Church Anglicans founded (1862) the "Church of England Temperance Society", which quickly attained great success, little progress was made in Europe from 1860 to 1870. Pastor Böttcher, it is true, succeeded in organizing another continental congress at Hanover in 1863, but the interest in temperance had died out. Nearly twenty years afterwards begins the later movement, which in most countries was distinctly influenced by the "Order of Good Templars", and in Switzerland and adjacent countries also by the society of the "Blue Cross", founded by Pastor Rochat at Geneva in 1877 as a society for the rescue of drunkards. In 1868 the "Independent Order of Good Templars" extended from America to England, where, at first, internal dissensions occasioned an acute crisis. About ten years later the order was established in Scandinavia (Norway, 1877; Sweden, 1879; Denmark, 1880). In these countries it proved more successful than anywhere else, particularly in Sweden, where, owing to the exertions of Oscar Eklund and Edvard Wavrinsky, its membership in 1887 was over 60,000. It must be acknowledged that here also internal discords had to be overcome. In 1883 the order entered Germany, appearing first at Hadersleben in the Danish-speaking district, and in 1887 the first German lodge was established at Flensburg. The main strength of the order is still in Schleswig-Holstein and Hamburg. In the same year (1887) the first lodge was established in Switzerland. It is only within the last ten years that grand lodges have been established in Holland and Austria.

Organizations of the different social classes and business men have become of great importance in the new movement. The first of these societies was the "British Medical Temperance Association", formed by the English physicians in 1876. Special organizations for clergymen, teachers, railway men, and workmen have been established, and are striving with increasing success to form international associations. Unfortunately, the Social Democrats have in many instances used the movement as a means for carrying on their own agitation, and in this way have gained the sympathy of many who would otherwise hold aloof from them. This statement, however, has little application to Germany. Women take an increasingly great part in the work of temperance. The "Woman's Christian Temperance Union", established in the United States in 1873, became a world-wide association in 1883, and then affiliated many national associations (some very small) in Europe. Owing to these energetic labours the number of total abstainers has increased greatly in most countries; in some they form from 5 to 12 per cent of the entire population, as: United Kingdom, about 5,000,000 (including 3,200,000 children); Sweden, 500,000; Norway, 240,000 (including 65,000 children); Denmark, 170,000; Germany, over 220,000 (including 85,000 children); Switzerland, 75,000 (including 26,000 children); Finland and Holland, each 30,000; and Iceland, 5000. The total number in Europe may be safely estimated at over 6,500,000.

C. *Present Status of the Temperance Movement.*—Under this head will be considered: the international organizations, which, with one exception, are total abstinence societies; the larger associations of the individual countries; the Catholic movement, which is of chief interest here; finally, the most important congresses, in which in a certain manner the associations show their concentrated strength and the success of the movement.

(1) International Organizations.—The largest organization is still that of the "Independent Order of Good Templars", which has 18 grand lodges in Europe; of these 6 are in Great Britain, 2 in Germany, 1 each in Ireland, Scotland, Denmark, Norway, Sweden, Holland, Belgium, Switzerland, Roumania, and Hungary. There are also some district lodges in France and Russia. The total number of lodges on the Continent is 4661 with 257,638 members, and 1855 lodges for the young with 123,634 members. In Great Britain there are 2266 lodges with 92,725 members and 1380 lodges for the young with 109,220 members. A strong competitor of this order in Switzerland is the "Neutral Independent Order of Good Templars", established in 1906 by Professor Forel, because he considered the large order laid too much stress on religious elements. The Swiss grand lodge of the new order contains 3500 adults and 3200 young members; the German, 2100 members. A large number of the Dutch, Belgian, French, and Hungarian lodges have also joined the Neutral Order. On account of the law in Austria regarding associations a national association with ten local branches has been formed under the special title "Nephalia". The organization next in size is the "Blue Cross" (headquarters at Geneva), which contains about 1550 branches and 60,000 members, including a large number of reformed drunkards (9000 in Germany). Divided as to the different countries the number of societies is as follows: Switzerland, 468; Germany, 661; Denmark, 364 (the organization is here called "Det blaa Kors"); France, 65; there are also several scattered societies in Belgium, Russia, and Hungary. Affiliated to the "Blue Cross" is an association for youth called the "Band of Hope for German Switzerland" (*Deutsch-schweizerische Hoffnungsbund*). A society small in membership but important on account of the circulation of its publications is the "International Anti-Alcoholic Association" (*Int. Alkoholgegnerbund*) with national organizations in Germany and Switzerland. Affiliated with this since 1907 is the "International Bureau for Combating Alcoholism" (*Int. Bureau zur Bekämpfung des Alkoholismus*), Lausanne, conducted by Dr. Hercod, which possesses a large bureau of information.

Notwithstanding their international organizations, two associations, the "Independent Order of Rechabites" and the "Blue Ribbon", are essentially English societies. The "Rechabites" form a life insurance society with 300,000 members, and have a few branches in Germany and Denmark; the "Blue Ribbon" has about 1,000,000, of whom less than a tenth are in Denmark, Norway, and Sweden. The international organization of women, the "Woman's Christian Temperance Union", is strongest in English-speaking countries. Among its numerous branches on the Continent, those of Germany and Switzerland are prominent for their activity, especially in the establishing of temperance eating-houses. Of all the international associations of different social classes the "International Society of Physicians" is, owing to the view now taken of the alcohol question, the most important. This society includes the German-speaking countries, Scandinavia, Russia, and Belgium. The "International Railway Anti-Alcoholic Association" (founded in 1904 by de Terra) has branches in Germany, Austria, Switzerland, and Denmark. The "International Association against the Abuse of Spirituous Beverages", founded in 1905, includes about 30 organizations in Germany, England, Holland, Belgium, France, and Russia. These are temperance societies, and promote equally total abstinence and temperance. The association aims at establishing an international bureau against alcohol.

(2) National Associations.—Most important of those in Germany is the "Association Against the Abuse of Spirituous Beverages" (*Verein gegen Missbrauch geist. Getränke*); this was established in 1883 and has 37,000 members who take no personal pledge. The society carries on its work by periodicals, pamphlets (of which over a million were circulated in 1908), charts, exhibitions etc. Among the total abstinence societies are: the "German Federation of the Blue Cross Societies of the Evangelical Church" (*Deutsche Bund evangelisch-kirchlicher Blaukreuzvereine*), with 8500 members; several societies that have separated from the "Independent Order of Good Templars"; and abstinence societies for various classes of society, as workmen, school-children, teachers, post-office officials, lawyers, philologists etc.; the societies for lawyers and philologists are confined to German territory. In defence of their common interest nearly all the German total abstinence societies have joined the "General German Union for Combating Alcoholism" (*Allgemeiner deutscher Zentralband zur Bekämpfung des Alkoholismus*) of Hamburg, which has a large bureau of information, a section for testing beverages free from alcohol, a bureau for lectures, etc. Germany has altogether sixty large anti-alcoholic organizations.

The movement against alcohol is weak in Austria, probably because the Government puts great difficulties in the way of international organizations. The large associations, about thirty in number, have nearly all sprung up within the last few years. The temperance societies (*Oest. Verein gegen Trunksucht* and similar provincial societies in Vorarlberg, the German Tyrol, and Moravia) have attained considerable importance. The leading abstinence society is undoubtedly the Polish "Eleuterya", with 5300 members in 20 branches. The "Central Union of Austrian Anti-Alcoholic Societies" (*Zentralverband* *öst. Alkoholgegnervereine*"), in Vienna, serves as a common headquarters for most of these societies. Besides the "Neutral Independent Order of Good Templars", Hungary possesses a fairly important abstinence association for workmen (1100 members) and a central organization. The main organizations in Switzerland are international. Compared with these the national societies are not very important, excepting the "Catholic Abstinence League" (see below). Among the national associations all that call for mention are: the "Alliance Abstinence Union" of Lausanne; the temperance societies, the "Society of St. Gall against the Abuse of Spirituous Liquors" (*St. Gallischerverein gegen den Missbrauch geistiger Getränke*), with 14,000 members, and the "Patriotic League of Switzerland against Alcoholism" (*Ligue patriotique suisse contre l'alcoolisme*). The total abstainers have complete control; the active participation of pupils in schools and children is especially worthy of mention. The "Swiss Abstinence Secretariate" at Lausanne is the headquarters for the society. In Holland there is still considerable rivalry between the total abstinence and the temperance advocates. The organizations of the latter are large, particularly the "People's Union" (*Volksbond*), which has over 20,000 members. Most of the societies are connected with the different Churches; the Protestant ones, five in number, have since 1907 been united in the "People's Union of the Christian Anti-Alcoholic Societies of Holland" (*Niederländischer Volksbund der christlichen Antialkoholvereine*).

Hitherto the associations in Belgium and France have been almost exclusively temperance societies; in both countries temperance societies for schoolchildren play an important part. The "French National League against Alcoholism" (*Ligue nat. française contre l'alcoolisme*) has nearly 100,000 members in 1730 branches, of which many are for children. Belgium has also a similar "Patriotic League" and 120,000 children in more than 5000 temperance societies organized during the last thirty years through the efforts of school inspector Robyn. Only the beginnings of a temperance movement are to be found in Italy. In 1907 various local organizations united in the "Italian Anti-Alcohol Federation" (*Federazione Antialcoolista Italiana*), which allows daily half a litre (about a pint) of wine at meal-times. The members of the federation are mainly Social Democrats. Still less organization is there in Spain, where the first associations are just beginning to be formed. Portugal is without organization. Total abstinence prevails in the Scandinavian kingdoms, Iceland, and Finland, although home-brewed beer appears to be still frequently permitted. The Norwegian society "Det Norske Totalafholdsselskab" has 135,000 members. In Sweden, besides the very strong "Independent Order of Good Templars", there are the Social-Democratic "Verdandiorden" and many total abstinence societies for different classes, as physicians, students, teachers, preachers, soldiers, merchants, nurses etc., as well as a society for giving instruction in abstinence. A central abstinence bureau exists in both countries. The largest abstinence society in Denmark is the "Danmarks Afholdsforening" (about 60,000 members). Many total abstainers also belong to the "Good Templars" and the "Blue Cross".

(3) Catholic Temperance Organizations.—Just as Catholics shared in the earlier movement sixty or seventy years ago they have also of late years taken an active part in the battle against alcohol. At first the entirely Catholic countries, excepting Belgium, had not a very large share in the movement. Generally speaking, Germany, Switzerland, Holland, and England have been the chief champions of the cause. About 1885 the Catholic movement began in Belgium. Under the leadership of Abbé Lemmens there now exists a federation consisting of nine large associations with about 600 local branches and 50,000–60,000 members, who, as a body, represent temperance, not total abstinence. The most important of these associations are the "Sint-Jansgenootschap" in the Province of Limburg (which has a division for young people founded and conducted by Canon Senden), the "Onthoudersbond van West-Flanderen", and the "Société belge de Tempérance". The main organization in Germany is the "Alliance of the Cross" (*Kreuzbündnis*), a society of Catholic abstainers, with headquarters at Heidhausen near Werden. This organization was established in 1899 by Father Neumann as a temperance society; in 1904 a separate section for total abstainers was formed, and since 1909 the entire organization has been a total abstinence society, with sections for women (*Frauenbund*), for young people (*Johannesbund*), and for children (*Schutzengelbund*). Altogether the association has a membership of 12,000 adults and 60,000 children. Unfortunately, the children's society has divided, about half of its members joining the "Catholic Temperance Society" (*Kath. Mässigkeitsbund*), established in 1905 (headquarters at Trier). Recently the relations of this latter society to the "Alliance of the Cross" have constantly grown more strained, and it has even established a total abstinence branch (*Kreuzbund*) of its own. Excellent work is done by the Catholics of Switzerland, where the former Bishop of St-Gall, Augustine Egger (1833–1904), laboured as an apostle of temperance. Good feeling exists there between the different tendencies of the movement, although total abstinence is the most conspicuous. The "Swiss Catholic Abstinence League" (*Schweizerische kath. Abstinentenliga*), founded in 1895 with headquarters at St-Gall, has 90 branches and nearly 4000 members, three-fourths of whom are Germans. Affiliated with this society is the "Young People's Union of German Switzerland" (*Deutsch-Schweizerischer Jugendbund*) which has over 60 branches with 10,500 members; a similar union (*Réveil*) for French Switzerland has 22 branches and 1200 members. Nearly all the members of the society previously mentioned, "St. Galler Bezirksvereins gegen Missbrauch geistiger Getränke", are Catholics. In Holland Dr. Ariens and Dr. Banning established in 1895 the "Kruis verbonden" which has over 30,000 members; both this and the special associations for women (*Mariavereenigingen*), which have about 30,000 members, admit temperance and total abstinence advocates. Instead of children's societies, associations have been formed of parents who promise not to give their children (minors) any alcoholic beverage; these are called the "St. Anna vereenigingen" (membership 25,000). These societies are arranged according to dioceses and since 1907 their central organization has been the "Sobrietas" with headquarters at Maastricht. Since 1901 Austria also has had its "Catholic Alliance of the Cross" and "Schutzengelbund"; so far, however, the membership has not reached 1000. Hungary has a Catholic temperance society with 10,000 members. The French Catholics have the "White Cross" society (*Croix blanche*). Some beginnings of international organizations should, finally, be mentioned: the "Abstinence Society for Priests" (650 members) in Germany, Austria-Hungary, Switzerland, and Holland; the "Catholic Academic Abstinence Union" with about 100 members in Germany, Austria, and Switzerland. The "International Catholic Association", opposed to moderate drinking of spirituous liquors, is, so far, of little importance. Mention should also be made of a branch of the Order of Benedictines founded by Father Hager, the members of which are both total abstainers and vegetarians; the mother-house is at Innsbruck.

(4) Congresses.—The great international congresses

against alcoholism meet regularly every two years; the sessions, excepting that held in 1909 in London, have always been held on the Continent. According to official statistics thirteen congresses have been held (1912). The congress has met twice at The Hague, and once at each of the following cities: Paris, Brussels, Antwerp, Christiania, Stockholm, Bremen, Vienna, Budapest, Zürich, Basle, London. At first the advocates of temperance exercised most influence; in 1887 at Zürich and in 1903 at Bremen sharp disputes arose between this party and the total abstainers, who now control the meetings of the congresses. Since 1899 the Holy See has been repeatedly represented. Full reports of the sessions of the congresses are published. For about ten years a German total abstinence congress has been held on an average every two years, the seventh meeting being at Augsburg in 1910; similar congresses have been held for Scandinavia and Finland for the same length of time at the same intervals. The eighth Swiss abstinence congress was held at Lausanne in 1910; at its sessions local option was urged. In other countries the holding of national conferences began at still later dates: the first Austrian congress against alcohol was held at Vienna in 1908; the first Russian at St. Petersburg in 1910; the first Italian at Milan in 1910; the first French total abstinence congress at Grenoble in 1910. A French congress of the opponents of the use of alcohol (held in 1903) was not of much importance. The Catholics of Holland and Belgium have so far had two national congresses. Among the special congresses held by the members of a single organization, those of the "Good Templars" are noteworthy. In some countries, particularly Germany and Switzerland, there are societies which hold educational courses of a scientific character for the study of alcoholism.

(5) Successes of the Temperance Movement.—The main success is the increased understanding, everywhere apparent, of its claims. Civil rulers repeatedly emphasize in their public utterances the great importance of strict temperance, while churchmen of high rank are either total abstainers or else warm friends of the movement, in whose interest they have issued many pastoral letters. As regards legislative action the advance of the movement is slower. Complete prohibition exists in Iceland. In Finland it has been repeatedly demanded from the provincial diet, and a similar demand has been made once in Sweden. As in these two countries the number of deputies who are total abstainers grows continually larger (in Sweden they form one-half of the house), the Governments cannot permanently withstand the pressure. In Sweden the ministry in 1911 appointed a special commission to take the preparatory steps. Prohibition of spirits for the country districts in general exists in Sweden, Norway, and Finland, and a local option law for the cities, which is to a great extent enforced. An energetic struggle is now being carried on in Holland, Switzerland, and Germany for a local option law. In criminal jurisprudence the Pollard system is slowly winning adherents; of late two small German states have adopted it, and it is elsewhere in use. Russia and Switzerland have introduced a government monopoly of spirits, but this has not been of any particular use to the temperance movement, except that in Switzerland one-tenth of the profits (alcohol tithe) must be applied to the work against alcoholism. Many countries voluntarily give such aid, as: Sweden, about 200,000 kronen ($54,000) in 1910–1911; Norway about 17,000 kronen ($4590); Holland, 20,000 florins ($8000), etc. A number of countries have introduced special instruction in temperance into the primary schools, notably Belgium, Sweden (where there is a special course for male and female teachers), Norway, and France. Especially great has been the effect of the temperance movement on the reform of taverns. The celebrated Gothenburg system is largely used in Scandinavia and Finland. In this system the taverns are entrusted by the Government or commune to special societies (*Samlag*), who only receive a limited gain while the profits go to the State or commune for public purposes. In Sweden these profits have amounted in twenty years to 83,000,000 kronen ($22,410,000). The tavern is carried on by a government official appointed for the purpose. The "Independent Order of Good Templars" opposes the system because it gives the communes too great an interest in the sale of alcohol. The "German Society for the Reform of Taverns" (*Deutsche Verein für Gasthausreform*) employs the following method: the inn or tavern established by the commune or by a society is given a manager with a fixed salary, who has in addition a commission on the sale of food and non-alcoholic beverages. It is always provided that strong alcoholic liquors are never to be in stock. There are many temperance taverns in Switzerland and Sweden, and some in Germany, Hungary, and Holland. Reference should, lastly, be made to the very satisfactory increase of provision for the cure of drunkards. In Germany there are over 40 institutions (six Catholic) where treatment is given, besides numerous homes for drunkards belonging to cities and societies. Several cities have appointed official nurses to take care of drunkards; about half of the patients become permanent abstainers. In Switzerland there are about ten such institutions, one being Catholic. These two countries are far in advance of the others in the effort to cure drunkenness.

The bibliography of the temperance question is enormous. Nearly 15,000 publications in Europe and the United States are listed by Abderhalden, *Bibliographie der gesamten wissenschaftl. Literatur über Alkohol u. Alkoholismus* (1904). The current literature of the subject is given by the bibliographical journal *Blätter für die Gesamten Sozialwissenschaften* (Berlin), and by the two international temperance periodicals (see below). The most important systematic, work is, probably, Helenius, *Die Alkoholfrage*, which has excellent bibliographies of all countries. The original work was translated from Finnish into German in 1903. The best historical work is Bergman, *Nykterhetsrörelsens världhistoria* (1900), well illustrated, also issued in a much altered German translation by Kraut (1907). The most important statistical work is that issued by the British Board of Trade mentioned at the beginning of this article, in connexion with which see Hoppe, *Die Tatsachen über den Alkohol.* Year-books concerning the movement in various countries are published by Warming, for Germany and Austria-Hungary; Hercod, for Switzerland; Nielsen, for Denmark; Duckert, for Norway; etc.

Numerous periodicals are published: in Germany, over 70; in Denmark and Sweden, about 25; etc. The most important of these journals are: *Internat. Monatsschrift zur Bekämpfung der Trinksitten* (Basle); *Die Alkoholfrage* (Berlin), issued in German, French, and English; *Mässigkeitsblätter* (Berlin); *Mimer* (Stockholm); *De Wegwijzer* (Amsterdam); *Afholdsbladet* (Christiania); *L'abstinence* (Lausanne); *Folkevennen* (Copenhagen); *Le bien social* (Brussels); *Les annales antialcooliques* (Paris). Catholic periodicals are: *Volksfreund* and *Der Morgen*, for Germany; *Volkswohl* and *La Ligue de la Croix*, for Switzerland; *Kreuzfahrer*, for Austria; *Sobrietas* and *De Drankbestrijding*, for Holland. See also for movement in Belgium: Malherbe and Lemmens, *Les Sociétés de tempérance* (Brussels, 1900); Waslet, *Het Volksgeluk;* Barella, *La lutte antialcoolique en Belgique* (Brussels, 1901); Vermeersch, *Manuel social* (Louvain, 1904); in France: Denis, *Manuel de tempérance;* Bergeret, *L'alcoolisme;* Bertillon, *L'alcoolisme et les moyens de le combattre;* Savoy, *Les trésors de la sainte abstinence;* in Switzerland: Forel, *La boisson dans nos mœurs;* Bunge, *Die Alkoholfrage;* Egger, numerous writings, including *Alkohol, Alkoholismus u. Abstinenz; Alkohol u. Volkswohl*, etc.; in the northern lands: *Erklund, Dryckenskapen* (Stockholm, 1890); Petersson, *En studie öfner Göteborgsystemet;* Halversen, *Det norske Totalafholdsselskab;* Jörgenson, *Afholdssagens historie in Danmark.*

Wilhelm Liese.

Great Britain and Ireland.—In Great Britain and Ireland the State regulates the liquor traffic by imposing duties on the manufacture and importation of spirituous drink and by confining its sale to those who pay for the privilege and fulfil other conditions as to place, time etc. Those who drink, therefore, must pay more for their liquor than its intrinsic value and must observe certain legal limits in the circumstances of their drinking. Thus the State aims by the one act at maintaining public order and promoting social welfare and also at raising revenue from the quasi-monopoly it creates. These two purposes are not always in harmony, which explains to some extent why State interference from the beginning to this day has often failed of success. A full history of liquor legislation and its results would occupy volumes; here there is space only for a brief summary of the chief Acts affecting the British Isles as a whole.

It is significant that up to the Reformation there occurs no civil legislation against drunkenness, although it was prevalent enough in Catholic times. The crop of laws against intemperance began to spring up in the reign of Edward VI, but they can no more be attributed to the higher morality of the new religion than can that monarch's grammar schools to his zeal for education, or Queen Elizabeth's workhouses to her compassion for the poor. All these phenomena point to the passing away of an influence hitherto found sufficient to promote social welfare by moral means. Laws concerning liquor were, indeed, enacted from early times, but their main object was to prevent fraud on the part of the sellers. Scotch legislation, for instance, was busy in the reign of David I (1124–53) regulating the brewing and selling of ale. In England, in 1200, prices were fixed by law for the different sorts of wine, and we find many subsequent enactments tending to encourage the wine trade with the English possessions in France. With the overthrow of the ancient Church and the destruction of her restraining influence, the spread of intemperance became very marked, as is attested by contemporary writers, and the State began to interfere in the interests of public welfare. An English Act was passed in 1495, empowering justices of the peace to suppress at discretion "common alehouses", as centres of disorder. The licensing system was introduced in 1551, by an Act which made the consent of the justices necessary for the establishment of ale-houses. The Irish Parliament in 1556 prohibited the manufacture of *aqua vitæ* except by certain specified classes. At the beginning of the seventeenth century laws were passed in England to prevent inns from becoming public-houses in the modern sense. In 1634 the licensing system was extended to Ireland. The close of this century brought a new element into the question. Hitherto only fermented liquors were commonly drunk in England, for, owing to high duties, the price of imported spirits put them beyond the reach of the people, but in 1689 the Government of the Revolution, out of hostility to France, prohibited the importation of foreign spirits and removed the restrictions on home manufacture, with alarming results to public morality. In spite of the retail trade being put under the licensing system in 1700, by 1724 the passion for gin-drinking had spread "with the rapidity and violence of an epidemic" (Lecky, "English History", I, iii), and in vain was the famous "Gin Act" passed in 1736, making the licence practically prohibitive. Illicit distilling and smuggling spread enormously, and high licences had to be repealed in 1742. Although gradually the State resumed control, still "the fatal passion for drink was at once and irrevocably planted in the nation" (Lecky, op. cit.). From 1751 dates a series of laws dealing more stringently with the conduct of the drink traffic, and in 1755 the licensing system was introduced into Scotland.

An attempt was made in 1828, as the result of a Parliamentary inquiry into illicit spirit-dealing, to simplify and consolidate the various licensing laws for England and Scotland, and, in 1833, for Ireland, and these acts form the basis of the existing law. But experimental legislation still continued. In order to cure the nation of spirit-drinking, to encourage a British industry, and to break up the growing system of "tied houses", an Act was passed in 1830 giving practically free trade in beer. A fortnight after the Act was passed, Sydney Smith wrote: "The New Beer Bill has begun its operations. Everybody is drunk. Those who are not singing are sprawling. The Sovereign People is in a beastly state." The Act failed miserably of its purpose. In less than three months 24,000 licenses were taken out. The number of "tied houses" was not ultimately lessened and the consumption of spirits steadily rose. In 1869 the beerhouses were again brought under the licensing system. Another well-meant but unsuccessful effort to alter popular taste was the establishment (1860–1) of "off" grocers' licences, by which measure Gladstone hoped to wean the people from beer-drinking in public-houses to the use of light wines and spirits at home. Much intermediate and subsequent legislation was concerned with the conditions of holding licences, particularly with the hours of closing. The "Forbes-Mackenzie" Act of 1853 closed the public-houses of Scotland on Sundays, except to travellers, and the measure was extended to Ireland (except five chief towns) in 1878, and to Wales in 1881, with very noticeable results in the decrease of drunkenness. In England the hours of Sunday opening have been restricted to seven. In 1873 a licensing Act prohibited the sale of spirits to children under sixteen, required the confirmation of the County Bench for new licences, and deprived that Bench of the power of granting licences in opposition to local refusal. Other measures for the protection of children were passed, culminating in the Act of 1909 which forbids children under fourteen access to public bars. For the last forty years under the influence of State regulations the number of licensed houses has steadily decreased. Shadwell shows that the number of "on" licenses per 10,000 persons in England and Wales was forty-nine in 1871, thirty-one in 1901, twenty-six in 1909. In Scotland there were 17,713 public-houses in 1829; in 1909 with more than double the population there were 6845 only or 14.03 per 10,000. The decrease in numbers has obtained in Ireland also, but a greater decrease in population has counteracted the relative diminution. With a smaller population than Scotland there are in Ireland more than three times as many licensed houses—in 1909, 22,591 in all. The Act of 1904 has tended to accelerate the decrease of licences by admitting the principle of compensation and giving licence holders for the first time a legal claim to renewal unless forfeited by misconduct. In the eyes of those who desire to suppress altogether traffic in drink for private gain this is considered a step backwards, a view which is strengthened by the notable increase of "clubs" since the passing of the Act. Finally, one marked effect of the Finance Act of 1910, so far as it concerns the Temperance Movement, was to reduce the consumption of spirits by ten millions of gallons; against this must be set an increased consumption of fermented liquors and presumably of illicitly distilled spirits. In the history of State activities for the promotion of temperance must be included the action of the various education departments in making temperance teaching an integral part of the elementary code. A temperance syllabus was made compulsory by the Irish Commissioners in 1906. The English department issued its syllabus for England and Wales in 1909, and a similar syllabus was drawn up for Scotland in 1910. If future generations of the populace indulge in drunkenness, it will not be through ignorance of its evil effects on the human frame and the body politic.

This brief sketch of the history of legislation for the control of the liquor traffic is enough to indicate the nature of the problem. The State interferes to secure such observance of temperance as is necessary for social well-being. But reasonable liberty to do what in itself is not unlawful is also a part of social well-being. Were all its citizens sufficiently self-controlled the State would have no claim to interfere, but in its own interests it has to supply by external pressure defects of personal character. The difficulty, then, is so to legislate that the weak may be protected without the freedom of the temperate being unduly infringed. The most obvious thing to do was to lessen temptation by lessening the number of licensed houses. But this policy involves evils of its own. The giving of licences creates a quasi-monopoloy, and monopolies legally secured have a tendency to breed fraud of every sort. The drink-seller tends to become a publican in the old sense. He pays a heavy sum in excise and licence for the privilege of trading in liquor, and he must recoup himself from the purchaser. Hence, on the one hand, the evils of smuggling or illicit production, and, on the other, of adulterated liquor, of inducements to drink to excess, of "tied houses" in the hands of producers. The heavy taxation, induced both by considerations of revenue and of social welfare, crushes out free competition and brings the trade into a few hands, and thus within the state is begotten a powerful trust, the interests of which are purely financial and not necessarily in harmony with those of the commonwealth. If legislation opposed to those interests has not behind it, as a permanent force, the moral sense of the larger and saner part of the community, it becomes inoperative and defeats itself. Hence true reform in the matter of the drink traffic depends ultimately on rightly educated public opinion.

Until the end of the eighteenth century the medical profession did little to dispel the ancient tradition about the health-giving qualities of strong drink, to which the name given to the distilled essence of fermented liquors, *aqua vitæ*, and the word "spirit" itself remain as witnesses. And in default of the Church, persecuted and gagged by the civil law, there was none amongst the sects to preach temperance as a principle of ascetics. Isolated physicians like Dr. George Cheyne (1671–1743) had pointed out the dangers of spirit-drinking; Dr. Trotter of Edinburgh and Dr. Rush of Philadelphia both published papers to the same effect in 1788. But it was in the United States that the first combined efforts were made to educate public opinion in this matter. In tracing the history of these voluntary associations which aimed at temperance reform primarily by persuading the individual, it will be convenient to deal with the non-Catholic bodies separately; historically they were the first in the field, and, arising in communities predominantly non-Catholic, they are naturally much more numerous. As will be pointed out, though alike in aim, they sometimes differ in method from Catholic organizations. We cannot pretend to give more than a few salient features of so enduring and widespread a movement.

Influenced by the formation at Boston in 1826 of the Society for the Promotion of Temperance Dr. John Edgar, of Belfast, a Presbyterian, founded on the same lines the Ulster Temperance Society in 1829, and the Rev. G. W. Kerr, a Quaker, a similar society at New Ross. Later in the same year the Glasgow and West of Scotland Society was started by John Dunlop. The next year an English society was formed by Henry Forbes in Bradford. All these and many others which sprang up throughout the British Isles originated in the desire to suppress the spirit-drinking which had become so prevalent, and hence their pledges allowed the moderate use of fermented liquors. It was not until 1832 that at Preston under the advocacy of Joseph Livesay total abstainers first appeared, and the word "teetotal", applied to abstinence, came into general use. The new pledge caused a sort of schism in many of the earlier societies, but gradually, as the illogicality of taking alcohol in one form and renouncing its use in another became apparent, teetotalism prevailed almost everywhere. Yet the phenomenon observable to-day, that less spirit consumption means more consumption of beer, was evident even then. Another cause of dissension amongst non-Catholic reformers sprang from erroneous views about the moral character of strong drink itself. In their hatred of its abuse, many extremists declaimed against its use as something intrinsically evil and thus were betrayed into irrational attitudes which injured their cause. If alcohol is evil *in se*, no one is justified in offering it to others, or in licensing its sale by others. The publican must be classed with the pandar: the State must put down the drink traffic by force. In addition to these violent views, men who based their religion on the Bible were hard put to it to explain the toleration and even implicit commendation of the use of wine to be found in its pages, and a vast controversy arose over the question whether the "wine" of Scripture was fermented or not. Undoubtedly, these disputes, and the adoption in many cases of a standpoint opposed to common sense, have done much to prevent the cause of real temperance from progressing, as it might have done, outside the Church, and its practical identification with false religious beliefs has operated to create distrust of the movement amongst many Catholics. But, notwithstanding this ethical confusion amongst the sects, the social and physical benefits of temperance are so marked that its advocacy has had a constant and growing influence upon public opinion. By 1842 the chief societies in England were, the National Temperance Society, the British and Foreign Society for the Suppression of Intemperance, and the British Temperance Association: the Scottish Temperance League was founded in 1844, and in Ireland all the Protestant bodies had drawn new vigour from the great campaign of Father Mathew.

But the mid-century ended in universal political and social disturbance, and the original impulse towards temperance lost for a time much of its vitality. Later, in more settled conditions, the campaign against strong drink took on a more scientific character. It aimed, by the organization of women and children, by teaching temperance in the schools, and by setting forth the physical effects of excessive indulgence, at creating such a weight of opinion as to influence the legislature. The juvenile societies, called "Bands of Hope", so marked a feature to-day of Protestant propaganda, were started in 1847. Inspired by the Prohibition Law of Maine (1851) the United Kingdom Alliance, which had for express object "the total and immediate legislative suppression of the traffic in intoxicating liquors as beverages" and which is still the most active of modern organizations, came into being in Manchester in 1853. We need not trace in greater detail the development during the next half-century of these various societies in the British Isles, a development which, as far as numbers are concerned, is of imposing extent. A recent Presbyterian movement, inaugurated in 1909 in the north of Ireland by the Rev. R. J. Patterson and called "Catch-My-Pal", may be mentioned as having met with much success both there and in England. As for other societies, the Alliance Handbook (and as regards Ireland and Scotland its enumeration is by no means exhaustive) reckons 18 temperance bodies which are legislative and general, 17 which are sectional (Army, Navy, etc.), 22 identified with different "Churches", 14 which are sects or orders of themselves, 10 confined to women, 8 juvenile societies, 62 county and 176 town societies—in all 327. These various associations, of course, produce a large amount of Temperance literature, whether in book form or as newspapers and tracts. This vigorous polemic, as is natural, has called forth similar measures of defence on the part of the trade. The Alliance Annual enumerates 10 main associations of those engaged in the drink traffic and estimates the local societies throughout the United Kingdom at about 700. On the grounds that their trade is a lawful one and, under proper conditions (which they profess their readiness to observe), even necessary for social well-being, the sellers of drink are justified in resisting attacks which deny the soundness of those grounds. No Catholic temperance society will base its opposition to the drink traffic on such unsound foundations.

As an organization existing to teach and make feasible man's duty of self-control, the Catholic Church is the first and the greatest of temperance societies. She teaches, and has always taught, that all are bound under sin not to misuse strong drink themselves or co-operate in the abuse of it by others —and this, whatever means they employ, is the ultimate end of all temperance associations. With the social evil of drunkenness (before she was robbed of her due influence and before the common use of spirits intensified the evil), the Church had been able in great measure to cope by her ordinary discipline—her preaching of self-denial, her administration of the Sacrament of Penance, her institution of penitential seasons, and her canonical legislation. All these moral influences were swept away at the Reformation and nothing effective set in their place. Hence the excesses of the seventeenth and eighteenth centuries are largely attributable to the destruction of Catholicism as a social force. Even after Emancipation in 1829, the effects of the Penal Laws still continued, and it is not till 1838 that we find mention in Great Britain of a purely Catholic temperance association. It is true that in 1819 there was founded at Skibbereen in Kerry a temperance organization presumably Catholic, but it seems to have been rather of the nature of a benefit society with a temperance resolution amongst its rules. At Chelsea, in 1838, the Rev. T. Sisk started a Catholic Total Abstinence Society, and in 1840 we find mention of a South London Catholic Temperance Association which was addressed by Daniel O'Connell. Moreover in the same year a Metropolitan Catholic Association was instituted through the exertions of Mr. John Giles, a Quaker. But these little local efforts were thrown completely into the shade by the gigantic work accomplished (at the providential instigation of another Quaker, William Martin) by the greatest temperance apostle the world has ever seen, Father Theobald Mathew. As a result of his advocacy in the years 1838 to 1845 it is computed that Ireland, with a population of over eight million, counted from three to four million total abstainers, and the annual consumption of spirits, which from 1835 to 1839 averaged 11,595,536 gallons, sank in 1842 to 5,290,650 gallons. The want of permanence that marked this great movement was no doubt mainly due to the catastrophe of the famine, but also in no slight degree to the fact that it won scant support amongst the upper and middle classes and even from the clergy themselves. Its inspiration, however, is alive and growing in strength to-day, not only in the land of its origin, but in Great Britain as well. For Great Britain in 1843 came under the spell of Father Mathew's zeal and eloquence, and many Catholic associations were formed in the towns he visited in England and Scotland as parts of the parochial organization.

After the general reaction that preceded and followed the year of Revolution (1848) there is record of further Catholic effort. St. Patrick's Total Abstinence Society, founded in Dundalk in 1850, still flourishes. In 1858 a Catholic Temperance Hall was opened in Spitalfields by the Rev. Dr. Spratt of Dublin, one of Father Mathew's most zealous coadjutors; in 1858, we are told, a new Roman Catholic Total Abstinence Society was founded in London, where also in 1863 there is recorded a meeting of the Roman Catholic Teetotal Union. But not until 1866, when Archbishop Manning began to take practical interest in the temperance question, was anything attempted on a larger scale. The United Kingdom Alliance of Manchester and the late Mgr. Nugent of Liverpool put facts and figures before him with the result that both in Liverpool and in London in 1873 a Catholic organization was formed called the League of the Cross which, under those zealous leaders, accomplished a vast deal for temperance in Great Britain. Branches of this organization were set up in many parishes abroad as well as in England and Scotland, and under the eyes of its founders it became a great social force. In 1869 Dr. Delany of Cork promoted a temperance revival in his diocese, and the bishops, by their joint pastoral in 1875, gave a great stimulus to the movement. In that year was instituted in Dublin the Confraternity of the Sacred Thirst of Jesus and in Salford the Diocesan Crusade by Bishop, afterwards Cardinal, Vaughan. The Crusade, or Catholic Association for the Suppression of Drunkenness, inaugurated by Dr. Richardson of London, and various lesser associations date from the same period. Another remarkable revival in Catholic advocacy of total abstinence in the British Isles began towards the end of last century. Father James Nugent did wonderful work in Liverpool for the cause. As a temperance reformer, Father F. C. Hays, a nephew of Father Nugent, has won a like renown. In 1896 he founded his Catholic Temperance Crusade, which aims to prevent, rather than reclaim from, intemperance, and includes members who are total abstainers, children over ten who take the resolution till the age of twenty-one years, and associates who lead a strictly temperate life. There is no central governing body, but the crusade readily co-operates with all other temperance endeavours, aiming at establishing some sort of organization in every parish and, by means of lectures and literature, at spreading a healthy public opinion on the matter. The promoter of the crusade has travelled and worked extensively in its interests, and the influence of his zeal is felt in the whole English-speaking world. The League of the Cross, under the care of Canon Murnane, one of Cardinal Manning's earliest and most energetic lieutenants, is renewing its youth in England and Scotland.

A Father Mathew Union, the membership of which is confined to the clergy, was founded in London in 1908. But it is in Ireland, where poverty and depopulation make the ravages of strong drink most apparent, that the most strenuous efforts are being made to combat it. In 1898 there was formed in Dublin by Father James Cullen, S.J., the Pioneer Total Abstinence League of the Sacred Heart which numbers to-day 180,000 members and 172 centres. Particularly noticeable is the large accession to its ranks of the younger clergy. It was the first temperance association to insist on a two-years' probation as a test of purpose and a guarantee of stability; it was enriched by Pius X with many indulgences in 1905. In that year, moreover, the Irish Hierarchy called upon the Capuchins, the religious brethren of Father Mathew, to take up again his work. This they have done with much of his success. Recently under their stimulating zeal one-fourth of the whole population of Limerick took the pledge. Still more recent is the formation by the bishops of the western province of St. Patrick's League of the West, an organization planned to cover the whole of Connaught with a network of temperance societies and to stamp out drunkenness by the most carefully devised methods. Other less heroic devices, like the Anti-Treating League, aim at counteracting one of the most frequent sources of demoralization. Such vigorous and sustained efforts have had a marked effect in Ireland. Arrests for drunkenness, which were 98,401 in 1899, have fallen each year to 68,748 in 1909, and the expenditure on drink, though still appallingly large (£13,310,469), considering the needs and poverty of the country, is now more than a million less than it was ten years ago. And though the "Drink Bill" of the United Kingdom, which was £179,499,817 in 1902, has now decreased to £155,162,485, owing to some extent to the growth of a more enlightened public opinion, there is yet abundant need of temperance propaganda before the population of the British Isles learns as a whole to avoid excessive drinking, as a vice that is both degrading to the individual and very injurious to the State.

JOSEPH KEATING.

IN THE UNITED STATES AND CANADA.—*United States.*—The first temperance work in the United States was due to a reaction against intemperance, which threatened to make the Americans a nation of drunkards. The culminating period of intemperance was the seventy-five years between 1750 and 1825. Nearly everyone drank intoxicating liquor. It was the family beverage. It was the prevailing mark of hospitality. It was regarded as a discourtesy, even an insult, to refuse it. At all functions, public and private, social and commercial, sacred and solemn, intoxicating beverages were used. Not only was liquor regarded as indispensable on such occasions, but the erroneous belief prevailed that no hard work could be accomplished without the stimulating glass. Labourers and mechanics were provided with their quota of liquor, twice a day, at the sound of the town bell, that summoned them regularly at eleven and four o'clock. The farmer stipulated with his help when he hired them for harvesting that they were to receive a certain amount of "spirits", which was generally whisky or New England rum. Strong liquor was supposed to make strong men. This supposition was not questioned until the fatal effects of drinking habits were evident in the multitude who went down to drunkards' graves. Intemperance was widespread, increasing day by day, till it reached its climax at the close of the Revolutionary War. Congress furnished the Colonial troops with liquor to strengthen them in the hardships of war. The soldiers returned to their homes and added to the wave of drunkenness that rose high and spread far and wide. It was commonly stated at the end of the Revolution that the United States consumed more liquor *per capita* than any other nation. It was generally admitted that no man could be found who had not been drunk on some occasion. The outcome of this universal intemperance was a reaction in favour of temperance.

The first pronounced effort at reform was inaugurated by Dr. Benjamin Rush of Philadelphia, a member of the Continental Congress in 1776, and one of the signers of the Declaration of Independence. In 1785 he issued a pamphlet entitled "Inquiry into the effects of ardent spirits on the human body and mind", which was widely read in America and England. No organized movement resulted from it, but it affected public opinion strongly and laid the foundation of subsequent temperance work. The reform inaugurated by Dr. Rush did not advocate total abstinence; the public was not prepared for any such remedial measure. The first step toward it was the abolition of the custom of affording liquor to employees. Then moderation in the use of distilled liquors was encouraged; this developed into abstinence from this class of liquors, and the moderate use of wine, beer, and cider. Finally after a half-century of effort in regulating the use of liquor, it was demonstrated that the plan of moderation had proved a failure, and that the only practical remedy was total abstinence.

The first temperance organization was formed by two hundred farmers in Litchfield, Connecticut, in 1789. The members merely pledged themselves not to give liquor to their farm hands. This action met with bitter opposition from the workmen, who persecuted the members of the new society and heaped every indignity upon them. Such was the prejudice in favour of strong drink that this very moderate temperance movement was considered drastic and revolutionary. The first society of pledged abstainers was formed in April, 1808, at Moreau, Saratoga County, New York. Forty-seven members pledged themselves to abstain from distilled spirits and wine except in case of sickness or at public dinners, under penalty of a fine of twenty-five cents, and fifty cents for actual intoxication. Other societies were established which prohibited not the use but the intemperate use of intoxicating liquors. One of these societies was organized in a tavern, at the bar of which the officers treated the others. Members were fined twenty-five and fifty cents for drunkenness, and a by-law of one society required members who had become drunk to treat all the other members.

The vice of drunkenness called for a more adequate effort than the mere advocacy of moderation. On 13 February, 1826, "The American Temperance Society" was established at Boston. This opened a new era, and paved the way to total abstinence. The new society advocated total abstinence, but, from considerations of prudence, it was not enforced. The purpose of the society was to mould public sentiment and to reform the habits and customs of the community. Gradually men began to see that drunkenness was to be combatted by attacking the drink-habit. Ten years later, in 1836, the second national temperance convention held at Saratoga declared for total abstinence from distilled and fermented liquors. Dr. Dorchester in his "Liquor Problem in All Ages", commenting on the work of this period, says: "In the year 1835 more than eight thousand societies had been formed, with more than one million five hundred thousand members, every state except one being organized. More than four thousand distilleries had been stopped, and eight thousand merchants had ceased to sell ardent spirits. More than twelve hundred vessels in which it is not used sail from our ports." The year 1840 gave birth to the Washingtonian Temperance Society, a total abstinence organization, which began at Baltimore with six members, and grew to six hundred thousand. In time, two-thirds of this large society fell away. Other societies lost members and men who regarded teetotalism as the sovereign remedy of intemperance turned their attention from the drinker and the drunkard to the dealer in liquor, whose livelihood depended on the drinker, and inaugurated another phase of temperance reform, which eventually took the shape of prohibition. Neal Dow of Maine became the leader of the new agitation, and after persistent and unwearying effort succeeded in 1851 in securing the passage of an absolute prohibitory law commonly known as the "Maine Law". In subsequent years prohibition of the liquor traffic became a law in Minnesota, Rhode Island, Massachusetts, Vermont, Michigan, Connecticut, New York, New Hampshire, Delaware, Nebraska, Indiana, Iowa, South Dakota, Illinois, Alaska, North Dakota, Oklahoma, Alabama, Georgia, Kansas, Mississippi, North Carolina, Tennessee. In time the law was repealed in all except the eight latter and Maine (1 Jan., 1911).

Among the early prominent advocates of temperance reform who deserve especial mention are Rev. Lyman Beecher and Dr. Nathaniel Hewitt of Connecticut, Edward C. Delevan, Dr. Clark, and Gerrit Smith of New York, Rev. Thomas P. Hunt of Pennsylvania, Bishop Charles P. McIlravie of Ohio, John B. Gough, Rev. Justin Edwards of Massachusetts, and Abraham Lincoln of Illinois. Before the Civil War the principal organizations that advocated temperance were the Washingtonian Movement, 1840, Rechabites, 1841, Sons of Temperance, 1842, Cadets of Temperance, Templars of Honour and Temperance, 1845, Good Templars, 1851. The first national temperance convention was held at Philadelphia in May, 1833. Twenty-one states were represented, with four hundred delegates. By vote of Congress and approval of President Jackson the sale of spirits to the Indians was prohibited in 1834. On 5 Nov., 1832, General Lewis Cass, secretary of war, issued an order prohibiting the introduction of liquors in any garrison, fort, or camp in the United States. The secretary of the navy offered a money substitute for the grog ration.

An era in temperance work was inaugurated in the United States on 2 July, 1849, which marked the advent of Father Theobald Mathew, the Irish apostle of temperance. He was received at New York with tremendous enthusiasm. Mayor Woodhull and the city council gave him a public reception. At Washington he was entertained by President Taylor, and was admitted to a seat within the bar of the Senate and on the floor of the House, a distinction granted only once previously to a foreigner—General Lafayette. On this occasion, Henry Clay said: "It is but a merited tribute of respect to a man who has achieved a great social revolution—a revolution in which no blood has been shed, a revolution which has involved no desolation, which has caused no bitter tears of widows and orphans to flow, a revolution which has been achieved without violence, and a greater one, perhaps, than has ever been accomplished by any benefactor of mankind." Father Mathew spent two years and a half in the United States and, though in feeble health, travelled 37,000 miles, visiting 25 states, administering the pledge in over 300 of the principal cities and towns to more than 500,000 persons.

Several Catholic total abstinence societies were organized during Father Mathew's visit, but their influence was exerted only in the restricted sphere in which they originated. No bond united them till 1871, when the societies of Connecticut formed a state union, out of which a national union grew, at a convention held at Baltimore on 22 February, 1872. One hundred and seventy-seven societies, comprising 26,481 members, represented Connecticut Rhode Island, New York, New Jersey, Pennsylvania, Maryland, Georgia, Illinois, Ohio, Minnesota, and the District of Columbia. A constitution was adopted, an address was issued to the Catholics of America, and the union was named "The Catholic Total Abstinence Union of America". In the address to the Catholic body, the aim of the convention was proclaimed in these terms: "Our motto is moral suasion. With prohibitory laws, restrictive license systems, and special legislation we have nothing whatever to do. There is blended with our proposed plan of organization the attractive feature of mutual relief. Thus Temperance and Benevolence go hand in hand." Moral suasion was favoured by some, legislative action by others, and a combination of both by a third class. It was finally determined to work on the lines of moral suasion as the belief prevailed that neither prohibitory nor restrictive laws availed unless supported by public opinion. The mind of the convention concerning the suppression and restriction of the liquor traffic was expressed in the following resolution: "Resolved, That this convention, though not deeming it expedient to take part in any political or legislative action, in reference to 'Prohibitory Liquor Laws', recognizes, however, the great good that would accrue from the suppression of public drinking places, and from such legislation as would restrain the manufacture of intoxicating liquors within bounds consistent with public morality, and will gladly hail such legislation whenever the proper authorities may grant it." The convention advocated the organization of subordinate unions of the different states or dioceses in affiliation with the national union. State unions were established in Alabama, California, Connecticut, Illinois, Indiana, Louisiana, Missouri, New Jersey, Ohio, Pennsylvania, Wisconsin, also in Canada. Diocesan unions were formed in Albany, Baltimore, Boston, Brooklyn, Buffalo, Dubuque, Duluth, Erie, Louisville, New York, Philadelphia, Pittsburg, Providence, Savannah, Scranton, Springfield, St. Paul, Syracuse, Wheeling, Wilmington, and Winona.

Annual conventions of the national union were held in different cities of the East and Middle West. Archbishops, bishops, and a host of priests attended the conventions, took active interest in the work of the Union, and propagated its principles in their respective dioceses. The Apostolic delegate, the Most Rev. Diomede Falconio, attended the forty-first convention at Scranton, Pennsylvania, in August, 1911, and gave unmistakable evidence of his interest in the work, in his address to the delegates, and in an eloquent discourse at the public meeting, of which the following is an extract: "Ladies and gentlemen, you here find in your presence a great body of men who, with manly courage and the true Christian spirit, have bound themselves together for the great cause of temperance. Follow their example, for the cause of temperance means the cause of Christian perfection and the cause of suffering humanity. Should you, however, not find it convenient to join their ranks, at least help their cause by your prayers and your constant co-operation. Gentlemen of the Total Abstinence Union, we admire your spirit of self-abnegation in professing the great virtue of total abstinence, and we appreciate your efforts in encouraging it both by words and example. Your associations are of paramount importance for the spiritual and temporal welfare of our people, and are, consequently, of great service to religion and to society."

At the convention of the national union held at Indianapolis, 28 August, 1878, a memorial was forwarded to Pope Leo XIII, who in reply addressed a papal Brief to the members of the union, of which the following is an extract: "Especially pleasing to us is that noble determination of yours to oppose and uproot the baneful vice of drunkenness, and keep far from yourselves and those united with you all incentive to it, for, in the words of the wise man, 'It goeth in pleasantly but in the end it will bite like a snake, and will spread abroad poison like a Basilisk'." A papal Brief was addressed by Pope Pius X to the Rt. Rev. J. Francis Regis Canevin, president of the national union, on 10 July, 1906. The pontiff commended the work of the union in these terms: "Following the example of our predecessors, and especially the latest among them, to whom there seemed to be no greater enemy of the teachings and commands of Christ than the abuse of strong drink, we heartily approve the work of the union, and congratulate all in this commendable assemblage, because they are our associates and helpers in persuading men to practise one of the principal Christian virtues—temperance."

The union is composed of men's, women's, and juvenile societies, and the Priests' Total Abstinence League, and numbers in all over 90,000 members. The women's societies were admitted in 1878 as honorary members, and in 1880 as active members; in 1888 women delegates were first received, the women's societies having previously been represented by men; three years later Miss S. A. Moore of Philadelphia was elected third vice-president.

The union issues a monthly publication "The C. T. A. U. Advocate". In 1911 the union was represented for the first time at the (Thirteenth) International Congress against alcohol, held at The Hague, Holland. It has also joined the Catholic International Society against Alcoholism founded in 1907 by Father Neumann of Mündt, Prussia.

In 1873 "The Women's Crusade" started in Hillsboro, Ohio. The members appealed directly to the saloon-keeper to desist from liquor traffic, visiting all the saloons in the towns in which they were organized. The movement spread from Ohio, through the North Central States, to Iowa, Missouri, Kansas, California, Oregon, and eastward to the Atlantic coast. In Ohio the saloons in two hundred and fifty towns were closed by the crusade. The result of this movement was the organization of a total abstinence society called the Women's Christian Temperance Union, which was established at Cleveland on 18 Nov., 1874, at a national convention of one hundred and thirty-five delegates from about a dozen states. In 1880 six departments were instituted—organization, preventive, educational, evangelistic, social, and legal. At the head of each department was a superintendent. Under each department were sub-departments, in charge of superintendents, the total number of departments and superintendents being thirty-eight. Juvenile societies were formed in the various local unions, and through the efforts of the union scientific temperance instruction was introduced in the schools. In 1910, 22,000,000 children received instruction on the baneful effects of alcohol. In 1883 the union was organized in every state and territory of the United States, and was introduced into Canada. The World's Women's Christian Temperance Union, which has societies in many countries, was a fuller development of the Women's Christian Temperance Union. For nearly twenty years the destinies of the W. C. T. U. were guided by a gifted woman of high character, who had resigned her position as dean of the Woman's College and Professor of Æsthetics in the Northwestern University to devote all her energies to the cause of temperance—Miss Frances E. Willard.

Canada.—In the beginning of the nineteenth century, the sale of intoxicating liquor was scarcely restricted by law in Canada and its use was almost universal. Intemperance developed and spread to such an extent that a reaction set in, and called forth active opposition. A meeting was held at Brockville, Ontario, in the autumn of 1828, and the first pledged Temperance Society in Canada was formed. It was not a total abstinence society. Moderation was inculcated in this and many other societies established throughout the country until 1839, when the total abstinence pledge succeeded the old moderation pledge, as was the case in the United States. Moderation had proved a failure, and total abstinence was adopted as the best remedy against the drink evil. Immediately a noticeable progress was made against intemperance. Societies were organized as "open temperance societies", with no bond of union till 1847, when the Sons of Temperance established a branch in Canada. An executive council governed local societies and systematized their work. An aid to thorough organization was afforded in 1858 by the Independent Order of Good Templars, whose pledge lasted for life, and who admitted women to membership. In 1874 the Women's Christian Temperance Union instituted a union in Canada, and by systematic work gave a strong impulse to temperance reform. The Canada Temperance Union came into existence in 1869, and, after various modifications in name and methods, was replaced in 1877 by the Dominion Alliance for the Total Suppression of the Liquor Traffic. The Alliance worked with vigour in securing legislation for the restriction of the liquor traffic, and was actively engaged in the enforcement of excise laws, throughout most of the provinces of Canada. Since 1850, nearly every Canadian Parliament has been called upon to enact legislation prohibitive or restrictive of the liquor traffic. Repeated petitions made to Parliament for total prohibition urged the enactment of the Canada Temperance Act of 1878, commonly called the "Scott Act", authorizing counties and cities to prohibit the retail sale of liquor. The popular vote was overwhelming in favour of prohibition, but disputes as to its constitutionality and controversy concerning the responsibility of enforcement by federal or provincial authorities rendered it inoperative.

The Church of England Temperance Society, established in a way in every province, was for a time active in the temperance reform movement. In latter years the success of the Protestant societies has been in the way of local option or "banish the bar" campaign. In the rural districts of Ontario this work is popular, and has been effective. The Catholic Church grappled with the drink evil, from the earliest days of the colony of New France. For many years her adherents have been most active in propagating temperance principles through the League of the Cross, the Catholic Total Abstinence Union, and other societies scattered throughout Canada. Since 1900 the Diocese of Peterborough has taken the lead in temperance work. In the episcopal city there is a society of 1200 men. Archbishop Bruchesi of Montreal has taken active interest in the work, and has developed a strong total abstinence sentiment.

Knights of Father Mathew.—The Knights of Father Mathew, a total abstinence and semi-military body, was instituted at St. Louis, Mo., on 26 April, 1872. A life-insurance feature was adopted on 18 July, 1881, having been authorized by a charter empowering the society to include life insurance among its aims and objects, and to form branches of the order, called "councils", throughout the State of Missouri. As the work and benefits of the society became known, invitations to establish councils beyond Missouri were received. At present (1911) it has councils in Missouri, Illinois, Iowa, and Kansas. There are two classes of membership: active and honorary. To be eligible to active membership, it is necessary to be a practical Catholic, to pass a physical examination, and to be not less than sixteen nor more than seventy years of age. For honorary membership, it is sufficient to be a practical Catholic. The Society has been active in promoting temperance and frugality, and has expended over eight hundred thousand dollars in benefits for the families of its deceased members. Councils of the order are permitted to organize branches of Catholic women, to be designated as "Ladies' Auxiliaries of the Knights of Father Mathew," and to be governed by laws in harmony with the laws of the parent organization. The Ladies' Auxiliaries have been instrumental in upbuilding the male organization, in promoting temperance among boys and girls, and have been active in charitable work among the poor. The Knights of Father Mathew and the Ladies' Auxiliaries of the Knights of Father Mathew were affiliated with the Catholic Total Abstinence Union of America in 1895, and have been among its most energetic members in advancing the work of the national union.

WALTER J. SHANLEY.

Templars, KNIGHTS, THE.—The Knights Templars were the earliest founders of the military orders, and are the type on which the others are modelled. They are marked in history (1) by their humble beginning, (2) by their marvellous growth, and (3) by their tragic end.

(1) Immediately after the deliverance of Jerusalem, the Crusaders, considering their vow fulfilled, returned in a body to their homes. The defence of this precarious conquest, surrounded as it was by Mohammedan neighbours, remained. In 1118, during the reign of Baldwin II, Hugues de Payens, a knight of Champagne, and eight companions bound themselves by a perpetual vow, taken in the presence of the Patriarch of Jerusalem, to defend the Christian kingdom. Baldwin accepted their services and assigned them a portion of his palace, adjoining the temple of the city; hence their title "pauvres chevaliers du temple" (Poor Knights of the Temple). Poor indeed they were, being reduced to living on alms, and, so long as they were only nine, they were hardly prepared to render important services, unless it were as escorts to the pilgrims on their way from Jerusalem to the banks of the Jordan, then frequented as a place of devotion. The Templars had as yet neither distinctive habit nor rule. Hugues de Payens journeyed to the West to seek the approbation of the Church and to obtain recruits. At the Council of Troyes (1128), at which he assisted and at which St. Bernard was the leading spirit, the Knights Templars adopted the Rule of St. Benedict, as recently reformed by the Cistercians. They accepted not only the three perpetual vows, besides the crusader's vow, but also the austere rules concerning the chapel, the refectory, and the dormitory. They also adopted the white habit of the Cistercians, adding to it a red cross. Notwithstanding the austerity of the monastic rule, recruits flocked to the new order, which thenceforth comprised four ranks of brethren: the *knights*, equipped like the heavy cavalry of the Middle Ages; the *serjeants*, who formed the light cavalry; and two ranks of non-fighting men: the *farmers*, entrusted with the administration of temporals; and the *chaplains*, who alone were vested with sacerdotal orders, to minister to the spiritual needs of the order.

(2) The order owed its rapid growth in popularity to the fact that it combined the two great passions of the Middle Ages, religious fervour and martial prowess. Even before the Templars had proved their worth, the ecclesiastical and lay authorities heaped on them favours of every kind, spiritual and temporal. The popes took them under their immediate protection, exempting them from all other jurisdiction, episcopal or secular. Their property was assimilated to the church estates and exempted from all taxation, even from the ecclesiastical tithes, while their churches and cemeteries could not be placed under interdict. This soon brought about conflicts with the clergy of the Holy Land, inasmuch as the increase of the landed property of the order led, owing to its exemption from tithes, to the diminution of the revenue of the churches, and the interdicts, at that time used and abused by the episcopate, became to a certain extent inoperative wherever the order had churches and chapels in which Divine worship was regularly held. As early as 1156 the clergy of the Holy Land tried to restrain the exorbitant privileges of the military orders, but in Rome every objection was set aside, the result being a growing antipathy on the part of the secular clergy against these orders. The temporal benefits which the order received from all the sovereigns of Europe were no less important. The Templars had commanderies in every state. In France they formed no less than eleven bailiwicks, subdivided into more than forty-two commanderies; in Palestine it was for the most part with sword in hand that the Templars extended their possessions at the expense of the Mohammedans. Their castles are still famous owing to the remarkable ruins which remain: Safèd, built in 1140; Karak of the desert (1143); and, most important of all, Castle Pilgrim, built in 1217 to command a strategic defile on the sea-coast.

In these castles, which were both monasteries and cavalry barracks, the life of the Templars was full of contrasts. A contemporary describes the Templars as "in turn lions of war and lambs at the hearth; rough knights on the battlefield, pious monks in the chapel; formidable to the enemies of Christ, gentleness itself towards His friends" (Jacques de Vitry). Having renounced all the pleasures of life, they faced death with a proud indifference; they were the first to attack, the last to retreat, always docile to the voice of their leader, the discipline of the monk being added to the discipline of the soldier. As an army they were never very numerous. A contemporary tells us that there were 400 knights in Jerusalem at the zenith of their prosperity; he does not give the number of serjeants, who were more numerous. But it was a picked body of men who, by their noble example, inspirited the remainder of the Christian forces. They were thus the terror of the Mohammedans. Were they defeated, it was upon them that the victor vented his fury, the more so as they were forbidden to offer a ransom. When taken prisoners, they scornfully refused the freedom offered them on condition of apostasy. At the siege of Safèd (1264), at which ninety Templars met death, eighty others were taken prisoners, and, refusing to deny Christ, died martyrs to the Faith. This fidelity cost them dear. It has been computed that in less than two centuries almost 20,000 Templars, knights and serjeants, perished in war.

These frequent hecatombs rendered it difficult for the order to increase in numbers, and also brought about a decadence of the true crusading spirit. As the order was compelled to make immediate use of the recruits, the article of the original rule in Latin which required a probationary period fell into desuetude. Even excommunicated men, who, as was the case with many crusaders, wished to expiate their sins, were admitted. All that was required of a new member was a blind obedience, as imperative in the soldier as in the monk. He had to declare himself forever "serf et esclave de la maison" (French text of the rule). To prove his sincerity, he was subjected to a secret test concerning the nature of which nothing has ever been discovered, although it gave rise to the most extraordinary accusations. The great wealth of the order may also have contributed to a certain laxity in morals, but the most serious charge against it was its insupportable pride and love of power. At the apogee of its prosperity, it was said to possess 9000 estates. With its accumulated revenues it had amassed great wealth, which was deposited in its temples at Paris and London. Numerous princes and private individuals had banked there their personal property, because of the uprightness and solid credit of such bankers. In Paris the royal treasure was kept in the Temple. Quite independent, except from the distant authority of the pope, and possessing power equal to that of the leading temporal sovereigns, the order soon assumed the right to direct the weak and irresolute government of the

Kingdom of Jerusalem, a feudal kingdom transmissible through women and exposed to all the disadvantages of minorities, regencies, and domestic discord. However, the Templars were soon opposed by the Order of Hospitallers, which had in its turn become military, and was at first the imitator and later the rival of the Templars. This ill-timed interference of the orders in the government of Jerusalem only multiplied the intestine dissensions, and this at a time when the formidable power of Saladin threatened the very existence of the Latin Kingdom. While the Templars sacrificed themselves with their customary bravery in this final struggle, they were, nevertheless, partly responsible for the downfall of Jerusalem.

To put an end to this baneful rivalry between the military orders, there was a very simple remedy at hand, namely their amalgamation. This was officially proposed by St. Louis at the Council of Lyons (1274). It was proposed anew in 1293 by Pope Nicholas IV, who called a general consultation on this point of the Christian states. This idea is canvassed by all the publicists of that time, who demand either a fusion of the existing orders or the creation of a third order to supplant them. Never in fact had the question of the crusaders been more eagerly taken up than after their failure. As the grandson of St. Louis, Philip the Fair could not remain indifferent to these proposals for a crusade. As the most powerful prince of his time, the direction of the movement belonged to him. To assume this direction, all he demanded was the necessary supplies of men and especially of money. Such is the genesis of his campaign for the suppression of the Templars. It has been attributed wholly to his well-known cupidity. Even on this supposition he needed a pretext, for he could not, without sacrilege, lay hands on possessions that formed part of the ecclesiastical domain. To justify such a course the sanction of the Church was necessary, and this the king could obtain only by maintaining the sacred purpose for which the possessions were destined. Admitting that he was sufficiently powerful to encroach upon the property of the Templars in France, he still needed the concurrence of the Church to secure control of their possessions in the other countries of Christendom. Such was the purpose of the wily negotiations of this self-willed and cunning sovereign, and of his still more treacherous counsellors, with Clement V, a French pope of weak character and easily deceived. The rumour that there had been a prearrangement between the king and the pope has been finally disposed of. A doubtful revelation, which allowed Philip to make the prosecution of the Templars as heretics a question of orthodoxy, afforded him the opportunity which he desired to invoke the action of the Holy See.

(3) In the trial of the Templars two phases must be distinguished: the royal commission and the papal commission. Philip the Fair made a preliminary inquiry, and, on the strength of so-called revelations of a few unworthy and degraded members, secret orders were sent throughout France to arrest all the Templars on the same day (13 October, 1307), and to submit them to a most rigorous examination. The king did this, it was made to appear, at the request of the ecclesiastical inquisitors, but in reality without their co-operation. In this inquiry torture, the use of which was authorized by the cruel procedure of the age in the case of crimes committed without witnesses, was pitilessly employed. Owing to the lack of evidence, the accused could be convicted only through their own confession and, to extort this confession, the use of torture was considered necessary and legitimate. There was one feature in the organization of the order which gave rise to suspicion, namely the secrecy with which the rites of initiation were conducted. The secrecy is explained by the fact that the receptions always took place in a chapter, and the chapters, owing to the delicate and grave questions discussed, were, and necessarily had to be, held in secret. An indiscretion in the matter of secrecy entailed exclusion from the order. The secrecy of these initiations, however, had two grave disadvantages. As these receptions could take place wherever there was a commandery, they were carried on without publicity and were free from all surveillance or control from the higher authorities, the tests being entrusted to the discretion of subalterns who were often rough and uncultivated. Under such conditions, it is not to be wondered at that abuses crept in. One need only recall what took place almost daily at the time in the brotherhoods of artisans, the initiation of a new member being too often made the occasion for a parody more or less sacrilegious of baptism or of the Mass. The second disadvantage of this secrecy was, that it gave an opportunity to the enemies of the Templars, and they were numerous, to infer from this mystery every conceivable malicious supposition and base on it the most monstrous imputations. The Templars were accused of spitting upon the Cross, of denying Christ, of permitting sodomy, of worshipping an idol, all in the most impenetrable secrecy. Such were the Middle Ages, when prejudice was so vehement that, to destroy an adversary, men did not recoil from inventing the most criminal charges. It will suffice to recall the similar, but even more ridiculous than ignominious accusations brought against Pope Boniface VIII by the same Philip the Fair. Most of the accused declared themselves guilty of these secret crimes after being subjected to such ferocious torture that many of them succumbed. Some made similar confessions without the use of torture, it is true, but through fear of it; the threat had been sufficient. Such was the case with the grand master himself, Jacques de Molay, who acknowledged later that he had lied to save his life. Carried on without the authorization of the pope, who had the military orders under his immediate jurisdiction, this investigation was radically corrupt both as to its intent and as to its procedure. Not only did Clement V enter an energetic protest, but he annulled the entire trial and suspended the powers of the bishops and their inquisitors. However, the offence had been admitted and remained the irrevocable basis of the entire subsequent proceedings. Philip the Fair took advantage of the discovery to have bestowed upon himself by the University of Paris the title of Champion and Defender of the Faith, and also to stir up public opinion at the States General of Tours against the heinous crimes of the Templars. Moreover, he succeeded in having the confessions of the accused confirmed in presence of the pope by seventy-two Templars, who had been specially chosen and coached beforehand. In view of this investigation at Poitiers (June, 1308), the pope, until then sceptical, at last became concerned and opened a new commission, the procedure of which he himself directed. He reserved the cause of the order to the papal commission, leaving individuals to be tried by the diocesan commissions to whom he restored their powers.

The second phase of the process was the papal inquiry, which was not restricted to France, but extended to all the Christian countries of Europe, and even to the Orient. In most of the other countries —Portugal, Spain, Germany, Cyprus—the Templars were found innocent; in Italy, except in a few districts, the decision was the same. But in France the episcopal inquisitions, resuming their activities, took the facts as established at the trial, and confined themselves to reconciling the repentant guilty members, imposing various canonical penances extending even to perpetual imprisonment. Only those who persisted in heresy were to be turned over to the secular arm, but, by a rigid interpretation of this provision, those who had withdrawn their former confessions were considered relapsed heretics; thus fifty-four Templars who had recanted after having confessed were condemned as relapsed and publicly burned on 12 May, 1310. Subsequently all the other Templars, who had been examined at the trial, with very few exceptions declared themselves guilty. At the same time the papal commission, appointed to examine the cause of the order, had entered upon its duties and gathered together the documents which were to be submitted to the pope, and to the general council called to decide as to the final fate of the order. The culpability of single persons, which was looked upon as established, did not involve the guilt of the order. Although the defence of the order was poorly conducted, it could not be proved that the order as a body professed any heretical doctrine, or that a secret rule, distinct from the official rule, was practised. Consequently, at the General Council of Vienne in Dauphiné on 16 October, 1311, the majority were favourable to the maintenance of the order. The pope, irresolute and harassed, finally adopted a middle course: he decreed the dissolution, not the condemnation of the order, and not by penal sentence, but by an Apostolic Decree (Bull of 22 March, 1312). The order having been suppressed, the pope himself was to decide as to the fate of its members and the disposal of its possessions. As to the property, it was turned over to the rival Order of Hospitallers to be applied to its original use, namely the defence of the Holy Places. In Portugal, however, and in Aragon the possessions were vested in two new orders, the Order of Christ in Portugal and the Order of Montesa in Aragon. As to the members, the Templars recognized guiltless were allowed either to join another military order or to return to the secular state. In the latter case, a pension for life, charged to the possessions of the order, was granted them. On the other hand, the Templars who had pleaded guilty before their bishops were to be treated "according to the rigours of justice, tempered by a generous mercy".

The pope reserved to his own judgment the cause of the grand master and his three first dignitaries. They had confessed their guilt; it remained to reconcile them with the Church, after they had testified to their repentance with the customary solemnity. To give this solemnity more publicity, a platform was erected in front of the Notre-Dame for the reading of the sentence. But at the supreme moment the grand master recovered his courage and proclaimed the innocence of the Templars and the falsity of his own alleged confessions. To atone for this deplorable moment of weakness, he declared himself ready to sacrifice his life. He knew the fate that awaited him. Immediately after this unexpected *coup-de-théâtre* he was arrested as a relapsed heretic with another dignitary who chose to share his fate, and by order of Philip they were burned at the stake before the gates of the palace. This brave death deeply impressed the people, and, as it happened that the pope and the king died shortly afterwards, the legend spread that the grand master in the midst of the flames had summoned them both to appear in the course of the year before the tribunal of God. Such was the tragic end of the Templars. If we consider that the Order of the Hospitallers finally inherited, although not without difficulties, the property of the Templars and received many of its members, we may say that the result of the trial was practically equivalent to the long-proposed amalgamation of the two rival orders. For the Knights (first of Rhodes, afterwards of Malta) took up and carried on elsewhere the work of the Knights of the Temple.

This formidable trial, the greatest ever brought to light whether we consider the large number of accused, the difficulty of discovering the truth from a mass of suspicious and contradictory evidence, or the many jurisdictions in activity simultaneously in all parts of Christendom from Great Britain to Cyprus, is not yet ended. It is still passionately discussed by historians who have divided into two camps, for and against the order. To mention only the principal ones, the following find the order guilty: Dupuy (1654), Hammer (1820), Wilcke (1826), Michelet (1841), Loiseleur (1872), Prutz (1888), and Rastoul (1905); the following find it innocent: Father Lejeune (1789), Raynouard (1813), Havemann (1846), Ladvocat (1880), Schottmuller (1887), Gmelin (1893), Lea (1888), Fincke (1908). Without taking any side in this discussion, which is not yet exhausted, we may observe that the latest documents brought to light, particularly those which Fincke has recently extracted from the archives of the Kingdom of Aragon, tell more and more strongly in favour of the order.

In chronological order, the most important works are: DUPUIS, *Hist. de l'ordre militaire des templiers* (Paris, 1654); LEJEUNE, *Hist. critique et apologétique de l'ordre des Templiers* (2 vols., Paris, 1789); WILCKE, *Gesch. des Tempelordens* (2 vols., 2nd ed., Halle, 1860); PRUTZ, *Entwickelung und Untergang des Tempelordens* (Berlin, 1888); GMELIN, *Schuld oder Unschuld des Tempelordens* (Stuttgart, 1893); FINCKE, *Papsttum und Untergang des Tempelordens* (2 vols., Münster, 1907). Documents: *La règle du temple* (Paris, 1886); *Die ursprungliche Templeregel* (Freiburg, 1903); VIOLLET, *Les interrogatoires de Jacques de Molay* (Paris, 1910). See also CLEMENT V.

CHARLES MOELLER.

Temple.—The Latin form, *templum*, from which the English *temple* is derived, originally signified an uncovered area marked off by boundaries; especially a space marked off by the augurs to be excepted from all profane uses. Among the Romans the precincts of a temple were always quadrangular in ground plan; hence the so-called temple of Vesta, one of the most famous sanctuaries of Rome, being circular in plan, was not strictly a temple, but only an *ædes sacra*, or sacred building. When the augurs had determined the boundaries of a temple-enclosure, the boundary lines could not lawfully be interrupted except at one point, which was to serve as an entrance. To mark these boundaries no walls were needed; a formula spoken by the augur was sufficient, and from this ceremony, came the phrase *effari locum*, literally, "to proclaim a place", hence, to define and dedicate.

It is certain that the Indo-Germanic peoples originally had no buildings for the worship of their gods, but worshipped the gods upon mountains, as Herodotus expressly says of the Persians, or believed the supernatural beings were present in groves and trees. Consequently among the ancient Germans the conception of a grove was identified with that of a temple. Among the Greeks, also, the worship of trees seems to be indicated by the word for temple, ναός, which, according to some authorities, signified originally "tree" or "tree-trunk". It is certain that the Greeks believed that at Dodona they heard the voice of the gods foretelling the future from the rustling of the sacred oaks. In the Homeric age, the temple as a space set apart and containing an altar, which was perhaps shaded by a group of trees, was more commonly found than the temple built by man. If actual temples are mentioned in Homer, as at Troy and the fabulous city of the Phæacians, the circumstance is probably attributable to Oriental influence. The pagan Germans were never able to bring themselves to give up their original worship of the gods in groves to any such extent as the Greeks and Romans did under the influence of the East. Still the German peoples were hardly entirely without temples, any more than the Scandinavians, although these temples could only have been of wood. The beginnings of stone temples among the Germans probably go back to the first Christian centuries and are attributable to the influence of their neighbours, the Gauls.

When new temples were built precincts already consecrated to the divinity were preferably chosen. It was also customary to select the highest spot in a city, the acropolis, as the general preference at that time was for high, open spaces. Further the kind of divinity had also influence on the choice of the spot: thus Zeus preferred the heights, Mars the market-places, Hercules the gymnasium, others, the fortified castle, the gates of the city, the plain. If the temple could not be erected on an open space dedicated to the divinity, it was customary to surround the temple by an enclosed precinct, whereby it was separated from all that was profane. Still other buildings were frequently inside this enclosure, as the houses of the priests, or the stalls for the sacrificial animals. Vessels containing water were placed at the entrance; from these, those entering sprinkled themselves in order to be purified from all guilt, as nothing impure was permitted to enter the precincts.

As a rule a Greek temple faced the east. The point towards which a Roman temple faced varied, according to the theory of H. Nissen, who investigated a large number of these temples in respect to this matter. He claimed that the position of the front depended upon the altitude of the sun on the feast day of the respective god. Nissen started from the assumption that the Greeks and Romans regarded the gods as the manifestation of the world-pervading spirit, and as such subordinated them to the original symbol of the world-spirit, the sun. Consequently, according to his theory, the temples were so placed that on the day settled by the calendar as the birthday and feast day of the god the rays of the rising sun fell along the axis of the temple and thus also on his statue. This theory suffers, however, from the fatal uncertainty as to the date the day of dedication fell on. Moreover, the instances in which of late it has been possible to determine the formerly unknown god occupying a temple of known position, so as to test the correctness of this hypothesis, have proved unfavourable to it [Nissen, "Templum" (Berlin, 1869)]. At the same time, however, it remains as a fact that the orientation of the temple was universally customary, just as it was later in the case of the Christian church.

Among the Romans when the building of the temple was completed it was dedicated to the divinity by the public authorities or by a person specially delegated for this office, while the priests only pronounced the formulæ without personally completing the sacred act. The dedication adhered permanently to the soil which was released by it from all other religious obligations and was withdrawn from profane use. The anniversary of the dedication was celebrated annually by a sacrifice.

Among the equipments of the temple were a massive altar, sacrificial tables, movable hearths for fire, sacrificial utensils, and other objects, which were dedicated at the same time as the temple. They formed a temple property that could not be sold. However, in times of necessity, especially of war, these treasures were as often melted down as were the costly church utensils of the medieval era and of later periods. The doorkeeper, who permitted visitors to enter the temple at stated times, also guarded the treasures.

The massive altar, mentioned above, did not stand in the temple but before it. Either it was built upon a high stone platform, and thus united architecturally with the temple, or it stood in front of the steps or in the portico. There was, as a rule, only one sacrificial table in the temple and only one altar in front of it.

The cella of the temple contained the most important object, the statue of the divinity, which stood on a pedestal against the rear wall opposite the entrance. In the earliest period it was made of wood or clay, later it was cast from bronze or made of marble. Besides the statue of the god to whom the temple was dedicated, statues of other gods were at times placed in the temple, partly as ornaments, partly because of their connexion with the principal god.

Taking their use as the basis of classification three kinds of temples may be distinguished: temples for worship, for use in connexion with the *agones*, or festival games, and for the Mysteries. The temple for worship was small and its cella contained only the statue of the god that was the object of veneration; it served religious uses exclusively. This temple frequently had connected with it the temple for the festival games which served for the solemn crowning of the victor in the national competitive contests, and as the place for keeping the apparatus for the festivals. The temples of the mysteries were used by the initiated for the celebration of the secret cults, and differed from the others, so far as the scanty remains permit a judgment, both in extent and form. Such temples were to be found, for instance, at Eleusis and at Samothracia. As has just been said, the temple contained only the statue of the god; it existed not so much for men as for the gods. It was exclusively the house of the god to whom it was dedicated. Still the god was pleased when at the national feasts men appeared in his sanctuary with prayers and incense, and thus these days became religious as well as national festivals.

Again, because the objects placed in the temple were more secure, it served as a treasury both for the State and for private persons. From 438 B. C. the public treasure of Athens was kept in the Parthenon. Naturally the temple also contained the votive offerings presented to the gods, as statues, lamps, wreaths, rings, and bracelets. A list of these objects was annually compiled, and once in four years it was engraved in marble; some fragments of such marbles are still in existence. Sometimes, too, the temple contained the mint.

Besides material things men also found security and protection in the temple against threatening danger. Every temple was an ἄσυλον, that is, it was inviolable, and none ventured to drive a malefactor away from the altar unless such a one wished to draw down the wrath of the gods upon himself. All temples did not grant the same protection: only certain temples had the privilege of unconditional security. Still there were ways of making the right of asylum ineffective, as was shown in the case of the Spartan Pausanias. During the reign of Tiberius the great number of asylums in Asia Minor was a subject of complaint.

As to the form and manner of construction of the temple, we must in the first place not imagine that the Greeks and Romans at all times built for their gods those magnificent structures that even to-day all men of taste admire. The earliest sanctuaries of the gods were cave-temples, if grottoes and crypts deserve this name at all. Even in a later age the worship of Mithras was preferably celebrated in grottoes. Related to the natural cave-temples are the artificial rock-temples, of which magnificent examples are still to be found in India. A third form, found especially in Assyria, Mexico, and Peru, may be called tower, or pyramidal temples, because the actual sanctuary is placed on a truncated pyramid. The fourth, finally, is the classical form of the Greeks and Romans. It is a development of the *megaron*, or ruler's house, of primitive times, which consisted only of a large hall with a portico. This portico was formed by the projecting side-walls of the hall and was ornamented in front with two columns.

Having thus briefly considered the subject as a whole, we will now examine somewhat more closely the kinds of temple used by various civilized nations. This is all the more necessary in order to guard against identifying the temple of the Greeks with that of other peoples. The discussion, however, must be brief, because temples, both pagan and Christian, have always been the highest achievements of architecture and have therefore been treated incidentally in other articles. The oldest architectural remains are those of Egypt. The main point of interest here is the structure of the great temples of the eighteenth to the twentieth dynasties (about 1530–1150 B. C.). Of special importance are the ruins of temples at Thebes or the present villages of Luxor and Karnak. The Egyptian temple is not an organic structure complete in itself; instead of unity there are the following distinct parts: *dromos*, enclosing wall, *pylon*, peristyle, hypostyle, and *sekos*. The temple of the Egyptians therefore consisted of a large complex of buildings and the temple precincts, the whole surrounded by a massive wall, and reached by a broad avenue (*dromos*) bordered by figures of sphinxes and rams. Between the temples of Luxor and Karnak this avenue for processions was nearly a mile and a quarter in length and more than 75 feet wide. In the enclosing wall, which at Karnak was about 32 feet wide, there were several gigantic gateways called pylons, flanked by tower-like buildings. These led into the sacred precincts, within which was a lake. On certain days the statue of the god was rowed round this lake in a golden bark. A second pylon led into the peristyle, or *protikos*, a quadrangular open space containing covered halls with columns; a third pylon led into the hypostyle, or large covered colonnade. The hypostyle was called "the hall of manifestation", and only "the enlightened" were permitted to enter it, the lower classes of the population might come only as far as the peristyle. On the farther side of the hypostyle there were still other large halls which led ultimately to the actual sanctuary, or *sekos*, in which the divinity was represented by a statue or some symbol; only the king or his representative, the high priest, could enter the *sekos*. Beyond this sanctuary were other large halls and chambers for keeping the apparatus for the festivals. A peculiarity of this extended series of sacred buildings is that the greater the distance from the entrance the narrower and lower the structure, so that the *sekos* is only a small dark chamber.

The huge size and rich equipment of Egyptian temples is explained by the fact that they were monuments of the piety of the ruler, royal houses of prayer; consequently the king alone had the right to enter the sanctuary. For this reason the paintings and reliefs on a sunken background (cœlanaglyphic), with which the temple walls were richly ornamented, presented in the most varied forms the homage and worship paid to the ruler. The ruler also showed the depth of his piety by the magnificent festivals which were connected with the temple.

The architecture of the temple was in harmony with the obscure, mysterious, and sensual religious conceptions of the Egyptians. The temple was an inorganic conglomeration of structures fitted the one into the other, that only arouse our astonishment by their size and magnificence. It is hardly necessary to say that no rigid system prevailed in the plan of either the Egyptian temples or those to be mentioned further on, and that there were small temples as well as large.

The Chaldean temples differed essentially from those of the Egyptians; if in the latter the chief extent was horizontal, in the former it was vertical. The large temples of the Chaldeans were constructed so as to form a series of terraces or steps or something like a pile of rectangular prisms, decreasing in size from the base up. According to Herodotus, the temple of Bel at Babylon, built in a series of terraces, measured at the base two stadia (1214 feet) each way. On this broad base the tower-like structure rose in seven stories which were topped by the actual sanctuary. The upper stories were reached by means of an exterior stairway or by an inclined roadway. Halfway up the ascent was a chamber where those who were mounting could sit down and rest. This peculiar form of architecture was certainly influenced by astrology which had so authoritative a position in the Chaldæo-Assyrian religion. The temples raised on terraces were constructed in three, or five, or more stories, according to the importance of the divinity. Besides these there must certainly have been smaller houses of one story for the gods, though of this no positive proof has yet been discovered. Temples raised on terraces have also been found in Mexico and Peru, as, for instance, at Tehuacan and Santiago Guatusca.

The Indian temples are principally grottoes or caves. They are generally constructed in one or two forms: either hewn out of the rock and remaining connected with the main mass, or, cut away from the surrounding mass of rock so as to stand alone. To the first class belong largely the Buddhist temples (*chaitya*), while the latter form is preferred by the Brahmins. The more developed ground-plan of the Buddhist *chaitya* resembles in some points the plan of the early Christian basilica. It is a quadrangular space, its length much greater than its width, and has a kind of apse opposite the entrance. The inner space is divided into several naves by pillars which follow the line of the apse. In the apse is the dagoba, a circular mound like a grave, terminating at the top in a hemisphere with a *ti* or *tee* (stone in the form of an altar). The dagoba is used to hold relics of Buddha, and the entire tumulus is covered by a large umbrella. Noted cave-temples are to be found at Karli in the Chatt mountains (second century B. C.), at Agunta, and at Pandu-Lena. The detached temple consists sometimes of several buildings and halls connected by stairs and bridges. These buildings have been cut out of the parent rock so as to stand in a court surrounded by columned cloisters. Such a temple is the wonderful structure of Kailas (Seat of the Blessed) at Ellora, a work of the ninth century. Sometimes the temple is of small dimensions, as that at Mahavelliopore on the Coromandel Coast, which is hewn out of a detached rock; the ground-plan is a quadrangle, and it rises in several stories like a pyramid built in several terraces.

The typical Greek temple stood alone on a broad foundation platform, built on all sides in terraces, which was called the *crepidoma*. The temple consisted, generally, first, of the *naos*, or *cella*, which was a rectangular enclosed space for holding the statue of the god; second, of the *pronaos*, a portico or vestibule in front of the *cella* with which it was connected by a door, while to the front it had rows of columns with open spaces between; third, the *posticum*, a portico behind the cella and corresponding to the *pronaos*. Large buildings contained two further structures, the *opisthodomos*, a chamber between the *cella* and the *osticum*, and fifth, the peristyle, a covered walk with a system of columns surrounding the temple and open on the outer side. These two last-mentioned parts of the temple were probably added in the seventh century B. C.

The name of the Greek temple varied with its ground-plan. The simplest form was called the temple with *antæ* (*templum in antis*), *antæ* signifying pilasters which form the terminations of walls. If the two side-walls of the *cella* extend a little beyond the transverse wall, and these ends of the side-walls are finished with *antæ*, then these give the name to the entire structure. Two columns generally stand in the space between the two *antæ*. The sense of symmetry led to the same construction at the rear without there being any change in the name. If the portico were formed merely by a row of columns without the aid of walls it was called a prostyle temple; if the same construction were also placed at the rear of the building it was amphiprostyle. The actual creation of the Greek mind was the peristyle, in which the entire temple was surrounded by a row of columns which carried the projecting beams of the roof. A second, inner, row of columns was generally arranged at the front and back of the building. If the columns were replaced by engaged columns on the walls of the cella, the temple was a pseudo-peripteral temple. A temple was called a *dipteros* if it were surrounded by a double colonnade, and *pseudo-dipteros* when the inner row of columns was not used. A circle of columns with a roof over them, but without a cella, formed a monopteral temple. A third method of designating or distinguishing the temples is by the number of columns in front, thus temples are called tetrastyle, hexastyle, octastyle, that is having five, six, or eight columns.

Up to the seventh century B. C. the method of building was very simple: the walls of the cella were made of unburnt brick resting on a stone base, the columns were of wood, for originally the Greek temple in its essential parts was not built of stone. In the buildings of better construction the walls were ornamented with terra-cotta tiles, and the columns were covered with precious metals. The earliest temples were built in the Doric style; this was followed from the sixth century by the Ionic style that came from Asia Minor, and later by the Corinthian style. One style, however, never entirely supplanted another. If in the Doric temple the impression made was that of massiveness, the Ionic temple conveyed a sense of agreeable lightness and grace. The effect produced by the Greek temple was not that of gigantic size, as in the Egyptian, or of colossal mass as in the Assyrian; it arose from the harmonious relation between all its members, by the spiritualizing of the styles of architecture and the ornamentation, as well as by the careful execution of all parts, even those least seen. Thus it became a model for all succeeding centuries, which always return to it after they have tried for a time new architectural designs of their own. The Romans were the first to adopt the plan of the Greek temple, but they impressed their national character upon it in several ways: the foundation platform was frequently omitted or was replaced by a *podium* without any steps except those leading to the entrance; the front was emphasized by prolonging the portico and increasing the number of columns. The finely balanced harmony of the Greeks was sacrificed to ostentatious display of material and the huge size of the structure. The round temple is peculiar to the Romans, who greatly developed it. Among the temples of this style is one of the most important masterpieces of Roman architecture, the Pantheon, as well as several small, graceful structures like that at Tivoli.

However important a Greek or Roman temple may be architecturally, still it is essentially nothing more than a beautiful and stately private house, a dwelling-place of the divinity, not a house of prayer and a place for the people to offer sacrifice. In this is made evident the marked difference between the temple and the Christian church. From the beginning the Christian church was intended to hold all those who believed and its interior was divided into sanctuary and nave for the clergy and the laity. It contained in itself the fruitful seed which enabled it in the course of centuries to develop, even architecturally, far beyond the classical temple. In the latter, excepting in the prostyle temple, the front had hardly any distinctive characteristic, in the peripteral, amphiprostyle, and other temples the back and front were alike. On the other hand, the façades of many Christian churches are works of the finest finish and highest architectural value. Although the temple contained several chambers within, yet this fact exercised no actual influence on its external construction, while in the Christian church, either of the Romanesque or of the Gothic style, the inner arrangement is easily recognized from the external construction. It is a striking fact, and one that is, perhaps, not to be explained entirely by the dislike of the early Christians for the places of heathen worship, that from the beginning the model chosen for the Christian church was not the classic temple, but the basilica, which, as the court and place of exchange, was intended to hold large numbers of people.

BEDA KLEINSCHMIDT.

LITURGY OF THE TEMPLE.—The three great national festivals of the Jews—the Passover, Pentecost, and the Feast of Tabernacles—were the occasion of special liturgical service of the temple (Ex., xxiii, 14, 17; xxxiv, 23; Deut., xvi, 16). Other feasts could be celebrated by local observance. Not so these three national feasts. All males were supposed to appear at Jerusalem on these occasions: "in the place which the Lord thy God shall choose, that his name may dwell there" (Deut., xvi, 6). It was during the Passover, while the lambs for the Pasch were dressed, that the Levites in the Temple chanted the Hallel (Pss. cxiii–cxviii: Vulg., cxii–cxvii). These same Psalms were repeated during the paschal meal,—the first two after the second cup, the remainder after the fourth cup.

The ordinary temple liturgy is not clear to us. Scant and obscure details are preserved in the Sacred Text. The people gathered in the courts of the Temple to receive instruction from the Prophets and to join them in prayer (Is., i, 12–15). The Deuteronomic custom was that the Torah should be read to the people in the Temple at the Feast of the Tabernacles (Deut., xxxi, 10–13). After the Exile, Esdras brought back this custom (II Esd., viii, 5–8). And yet, not even the reading of Torah was the chief purpose of the Temple; it was essentially a "house of prayer for all nations" (Is., lvi, 7); prayer to Jahweh was its chief purpose. It was in the Temple of Silo that Anna prayed for a man child (I Kings, i, 11). In the first Temple of Jerusalem, Solomon said his inspiring prayer for Israel (III Kings, viii, 12–53). Apart from the Psalms, set forms of prayer were rare. In such set forms, the priest offered the first-fruits and tithes before the altar of the Temple (Deut., xxvi, 5–10); and the high-priest laid the sins of Israel upon the head of the scape-goat (Lev., xvi, 21). During the morning and the evening sacrifices, the Levites sang praises to the Lord and gave thanks (I Par., xxiii, 30). These praises would seem to have been the Psalms, since the leader of the Levites in the time of Nehemias was a son of Asaph (II Esd., xi, 17). The titles of many of the Psalms give evidence of their liturgical use in the temple or "the House of Jahweh" that preceded the Temple. The Psalms of Asaph and of the sons of Korah (see PSALMS) at one time made up a liturgical collection for temple service. The sons of Asaph were among the temple levites (I Par., xxv, 1). The sons of Korah were also a levitical family of temple singers (II Par., xx, 19). In fact, there can be no doubt but the Psalms are evidence of a gradual development of a liturgical hymnal for temple service.

Certain elements of synagogal liturgy (see SYNAGOGUE) probably have their origin in temple service. The "Shema" (Deut., vi, 4–9), together with the Ten Commandments and several benedictions, were recited by the priest at the morning sacrifice (Tamid, v). Josephus (Ant. Jud., IV, viii, 13) dates this synagogal practice from the time of Moses.

ZENNER, *Die Chorgesänge im Buche der Psalmen* (Freiburg, 1896); ZENNER-WIESMANN, *Die Psalmen nach dem Urtext* (Münster, 1906). The latter work edits the text over much, and has consequently been put on the *Index* (1911).

WALTER DRUM.

Temple, SISTERS OF THE.—The Sisters of the Temple (whose full title is SISTERS OF THE FINDING OF

JESUS IN THE TEMPLE) are a pre-Reformation foundation. They were established in London for educational purposes at the time of the Crusades by a dean whose name has not come down to us. They spread widely in England in the following centuries, but were driven into exile at the Reformation. In 1860 Cardinal Wiseman, with the generous help of the Abbé Roullin, re-established them in the Archdiocese of Westminster, whence they moved to Clifton. But it was not until a house was opened at Vernon, Normandy, that they began once more to flourish; from Vernon they have opened six houses in France and Belgium, and now number 170 sisters. They have a home for invalid priests at Clifton, and the chief work of the sisters now is nursing among all classes of society. They are known as the Blue Nuns in England and France, from the blue habit they wear.

DATIN, *Discours pour le cinquantenaire des Sœurs de Jésus au Temple* (1910).

FRANCESCA M. STEELE.

Temple of Jerusalem.—The word "temple" is derived from the Latin *templum*, signifying an uncovered place affording a view of the surrounding region; in a narrower sense it signifies a place sacred to the Divinity, a sanctuary. In the Bible the sanctuary of Jerusalem bears the Hebrew name of *Bêt Yehôvâh* (house of Jehovah). The sacred edifice consisted of two chief halls, one called *hêkāl* (the house or temple), or *qôdes* (the Holy), and the other *dĕbîr* (that which is the oracle), or *gôdesh haggodâshim* (the Holy of Holies). The New Testament speaks of it as οἶκος, "the house", ναός, Latin *cella*, "the most holy place of the temple", and ἱερόν, "the whole of the sacred enclosure". The Temple which Solomon erected to the Lord about 966 B. C. was destroyed by Nabuchodonosor in 586 B. C. After the return from captivity Zorobabel raised it again from its ruins (537 B. C.), but in such modest conditions that the ancients who had seen the former Temple wept. In the eighteenth year of his reign, which corresponds to 19 B. C., King Herod destroyed the Temple of Zorobabel to replace it by another which would equal, if not surpass in splendour, that of Solomon.

Many writers admit three temples materially different. Now as the Prophet Aggeus (Vulg., ii, 10) says of that of Zorobabel: "Great shall be the glory of this last house more than of the first", because of the coming of the Messias (v, 8–9), they claim that this prophecy was not fulfilled because Christ never entered the second Temple. Others assert that Zorobabel's work was not completely destroyed but gradually replaced by a larger and much richer temple (Josephus, "Ant. Jud.," ed. Dindorf, XV, xi, 2), and they consequently admit only two materially different temples. The whole difficulty disappears if we choose the Septuagint in preference to the Vulgate. The Prophet has already asked: "Who is left among you, that saw this house in its first glory?" (ii, 4). According to the Septuagint he afterwards says: "The last glory of this house shall be greater than its first glory." To the Prophet, therefore, there was but one and the same house of Jehovah from Solomon to the time of Messias, built always in the same place and according to the same plan, that of the Tabernacle. We may therefore admit three different temples, and this article will describe: I. that of Solomon; II. that of Zorobabel; III. that of Herod.

I. TEMPLE OF SOLOMON. *History.*—Through a motive of pride David had commanded the numbering of his people, in punishment of which God decimated the Israelites by a pestilence. One day the king saw near the threshing-floor of Ornan (Areuna) the Jebusite an angel about to strike the people of the city, whereupon David humbled himself before the Lord, Who forgave him and stayed the plague. The king hastened to purchase the property of the Jebusite for fifty sicles of silver and built an altar on the threshing-floor, upon which he offered holocausts and peace-offerings (II Kings, xxiv). This hill, which is the Mount Moria (II Par., iii, I) of Genesis (xxii, 2), was thenceforth destined to be the site of the Temple of Jehovah, for which David had already amassed great treasures, but the building of which was reserved to Solomon. As hitherto the Hebrews had not cultivated the arts, Solomon addressed himself to Hiram, King of Tyre in Phœnicia, to obtain builders and skilful workers in stone, brass, and the cedar and cypress wood of Lebanon. After seven and a half years of toil the king was able to dedicate solemnly the Temple of the true God. Near the sacred precincts he afterwards built large buildings, among which the Bible makes special mention of the palace of the king, that of the queen, Pharao's daughter, the house of the forest, the porch of the throne, and that of pillars.

Site.—Mount Moria, which stretches from north to south, is a long spur, or promontory, connected at the north with Mount Bezetha and bounded on the east and west by two deep valleys which are joined at their southern extremity (see JERUSALEM, VIII, 345 d). Between its two steep declivities the crest of the hill afforded but narrow space for buildings, and to secure an adequate site for the Temple, the courts, and royal palaces a platform was formed by raising sustaining walls of carefully-hewn beautiful stones measuring eight or ten cubits (III Kings, v, 17; vii, 9–10). According to Jewish tradition the Temple stood on the highest point of Mount Moria, while the royal quarters were built south of its enclosure and on a lower level.

It is generally admitted that the "sacred rock" in the centre of the Mosque of Omar (see JERUSALEM, VIII, 360 d) formed the foundation of the altar of holocausts in the Temple of Jerusalem. On this hill, according to an ancient tradition, Abraham made ready to sacrifice his son Isaac; here, near the threshing-floor of Ornan, the exterminating angel restored his sword to its scabbard; and on this threshing-floor, which according to custom was situated at the highest point, David erected an altar to the Lord. If this prominent rock was constantly spared at the various rebuildings of the platform it must have been because of its associations. Moreover, it corresponds to all the requirements of Exodus (xx, 24 sq.) for the altar of holocausts. It is a limestone rock, unhewn and irregular, fifty-eight feet long, by forty-five wide, and standing three or four feet above the ground. Furthermore, in its upper almost level surface there is a hole whereby it is believed the blood and the water of the ablutions flowed into the cavity beneath to be carried off by a subterranean conduit to the valley of Cedron. The Mishna (Yoma, II, i) asserts that under the altar of holocausts there was a canal of this kind. This point admitted, the "sacred rock" will serve as a mark to discover the exact site of the house of Jehovah, because the latter opened to the east opposite the altar of holocausts and consequently west of the court of the priests which contained the altar.

Sources.—The chief sources of information concerning the plan, construction, and adornment of the Temple are, first III Kings, vi, vii; then the parallel account in II Par., iii, iv, which tends to magnify the dimensions immeasurably. The Prophet Ezechiel described the Temple in the light of a heavenly vision, and though his description is symbolic it agrees in its essential features with that of the Book of Kings; to all appearances he describes the Lord's house as he saw it while he performed his priestly duties. The information supplied by Josephus and the Middoth treatise of the Mishna inspires less confidence; it seems based rather on the Temple of Herod than on that of Solomon. Indeed we possess but a brief description of the first Temple and the technical terms used by the Bible are not always readily intelligible in modern times; hence there is great diversity of opinion among writers who have attempted to reconstruct the Temple of Solomon in its architectural details.

Architecture and Measurement.—Solomon reproduced in solid materials and double proportions the Tabernacle which Moses had built in the desert (Wisdom, ix, 8), the entire plan of which is therefore outlined (Ex., xxvi, xxxvi). With regard to the style adopted by the Phœnician architects we know simply that at that period the architecture of all Semitic peoples was very similar to that of the Egyptians. In Egypt there were two measures of length; the smaller cubit formed of the breadth of six hands or twenty-four fingers and equal to 1 ft. 5¾ inches; the large or royal cubit, which was a handbreadth (three inches) longer. The lesser cubit of six hands, or twenty-four fingers, existed in the eastern empire, but it was somewhat longer, being equal to 1 ft. 7⅓ inches. The large or royal cubit was likewise longer, being equal to 1 ft. 9⅙ inches. Now judging from the excavations made at Taanath and Megiddo in Palestine the royal Babylonian cubit, introduced by the long Chaldean domination, was the one in use at that time (Benzinger, "Hebr. Archäologie", 190). It is probable that only the small cubit was in use at the time of the Babylonian Captivity, hence the sacred writer (II Par. iii, 3) gives the dimensions of the Temple by the "first measure", or ancient cubit, and Ezechiel (xl, 5; xliii, 13) adds to each cubit a handbreadth (the ancient *palmus minor*, one-sixth of the small cubit) in order to obtain the length given in the Book of Kings. The royal Babylonian cubit therefore was the *mesura verissima* (Ezech., xliii, 13) used in the construction of the Temple of Solomon.

The Holy Place; the Holy of Holies.—The house of God was of rectangular shape, sixty cubits long from east to west by twenty cubits wide and thirty high (III Kings, vi, 2; II Par., iii, 3). These were the interior dimensions which did not include the thickness of the walls, as is shown by numerous texts. This space was divided into two chambers of unequal size. The first, the *hêkāl*, or Holy Place (see plan, fig. I), was forty cubits long by twenty wide. It was entered at the eastern end by a square gate (III Kings, vi, 33), ten cubits in breadth (Ezech., xli, 2). The framework was of wild-olive wood, furnished with two doors of cypress wood. Each door was subdivided vertically into two leaves which folded by means of hinges (III Kings, vi, 33, 34). On the other side of the compartment was a pentagonal-shaped gate (III Kings, vi, 31) with an opening of six cubits through a partition wall two cubits in thickness (Ezech., xli, 3–4). It opened into the *dĕbîr*, or Holy of Holies (2), a chamber measuring twenty cubits every way.

The two doors of wild-olive wood in the gate opened towards the east and stood always open to allow the passage of fresh air and the smoke of incense to enter the interior, but a veil of byssus in violet, purple, and scarlet, embroidered with cherubim, always concealed the Holy of Holies (II Par., iii, 14), which was entered only by the high-priest once a year. On the doors of the two gates Solomon caused figures of cherubim, palm-trees, and blossoming flowers to be carved and overlaid with gold (III Kings, vi, 32, 35). The walls of *dĕbîr* and *hêkāl* were lined with boards of cedar adorned with colocinths and flowers carved in relief and profusely overlaid with gold. Within the *dĕbîr* even the fir-wood floor was covered with plates of fine gold and the front was closed with chains of the same metal (III Kings, vi, 15).

Secondary Chambers.—The whole building, including the Holy of Holies which formed the chief part, was thirty cubits high. Now as the interior of the *dĕbîr* was only twenty cubits high there must have been above it a space of ten cubits. The height of the Holy Place is not indicated in the Bible, but there is mention of "cenacles", or upper chambers (II Par., iii, 9); hence the Holy Place must have been of the same height as the *dĕbîr* and like it have had above it a chamber ten cubits high. The same text informs us that these "upper chambers" were richly adorned like those below and there is little doubt that the Tabernacle was preserved in the large upper chamber (III Kings, viii, 4; Par., v, 5), and in the lower one relics and remembrances of the life in the desert. In front of the *hêkāl* was the vestibule or porch (3) *ûlâm*, Greek *προνάος*, of the same length as the Temple but only ten cubits deep (III Kings, vi, 3); it was a kind of stately tower, recalling the pylons of the Egyptian temples and like them having a large gateway without doors. II Paralipomenon (iii, 4) states that its height was one hundred and twenty cubits. But a porch six times higher than it was long would be so out of proportion that many exegetes are inclined to reduce this figure to sixty cubits, the height of the porch of the Temple of Zorobabel. According to Ezechiel the walls were six cubits thick.

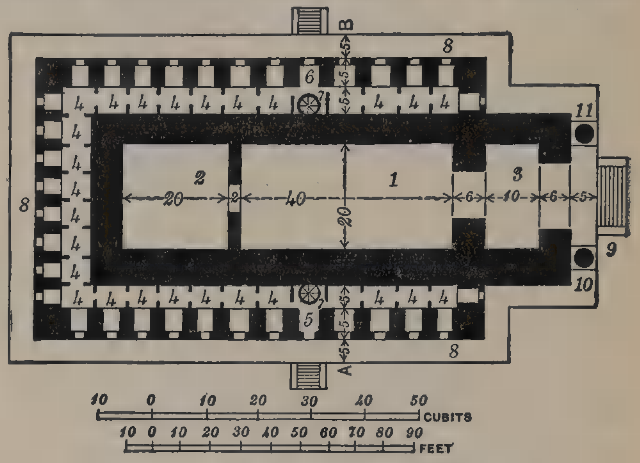

Fig. 1. Plan of the Temple of Solomon

1. The Holy Place. 2. The Holy of Holies. 3. The porch. 4. Side chambers. 5–6. Doors of the side chambers. 7. Winding stairways. 8. Foundations. 9. Grand staircase. 10. Pillar of Jachin. 11. Pillar of Booz.

Along the three other sides of the sanctuary rose a building divided into three stories (III Kings, vi, 5–6), each story having thirty chambers [Ezech., xli, 6; Ant. Jud., VIII, iii, 2]. (4) The house of Jehovah was so sacred that the beams of cedar which supported the ceilings of the side chambers were not suffered to be fastened to the walls of the Temple; hence in the walls of the Holy Place and the Holy of Holies there were three recesses in which rested the ends of the joists. Thus the under chambers were five cubits in breadth, those of the first floor six cubits, and those of the second seven. Each story was five cubits high. The entrance was by a door (5) which opened to the south (III Kings, vi, 6–8); Ezechiel (xli, II) mentions another (6) on the north, which would be very natural. Ascent from one floor to another was made by means of a winding-stair (7), and it is very probable that the upper chambers, or cenacles, were reached by way of one of the stories of the porch. In these low-ceiled and narrow cells were preserved the archives, the public treasure, the accessories of worship, and the sacred vestments (cf. III, Kings, viii, 4; II Par., v, 5). In this manner the Holy Place and the Holy of Holies were completely surrounded by imposing structures.

Roofs and Windows.—The Temple was covered with a roofing formed of beams and planks of cedar (III Kings, vi, 9). Any broad surface which rests on a framework instead of on arches of mason-work is unstable and cannot prevent the rain leaking through; hence it is our opinion that the roofs of Solomon's temple were sloping, and the planks covered with large slabs. On the other hand several writers consider that they were flat. The upper story of the Holy of Holies, the numerous small chambers of the adjacent building, as also the porch, were furnished with windows having fixed gratings of wood, of which mention is made in the text (III Kings, vi, 4). The walls of the *hêkāl* had similar openings at the north and south, at least in the lower portion; but the position of these windows scarcely allowed the admission of light into the large chamber, which, furthermore, was lighted night and day by numerous lamps. The windows were intended rather to permit the circulation of fresh air and the escape of incense-smoke through the side chambers. The Holy of Holies seems to have had no windows and was always enveloped in darkness (III Kings, viii, 12).

Bronze Pillars.—It should be borne in mind that the entire building was constructed of the beautiful red and white limestone of the country, which could be polished like marble. We cannot believe that such a sumptuous monument was built on the earth without any foundations. Moreover Ezechiel tells us (xli, 8) that it rested on a foundation six cubits high, which formed all about it a border five cubits broad (8). The porch was reached by a stairway of ten steps [Ezech, xl, 49, (9)], which in ancient times were always rather high. At the top of the stairway on the foundation stood two pillars of molten brass each eighteen cubits high and twelve cubits in circumference (III Kings, vii, 15). The pillars were hollow, but the metal was four fingers in thickness (Jer., lii, 21). The capitals which surmounted them were five cubits high, and their tops were fashioned in the shape of lilies. They were richly adorned with network, garlands, pomegranates, foliage, etc., but despite the details furnished by the Bible (III Kings, vii, 16-19; II Par., iii, 13-17), it is very difficult to reconstruct them in their true form. The pillar which stood at the right of the porch door (10) was called Jachin, "He will establish", and that on the left Booz, "in strength". There is no mention in the text of base or pedestal, but some sort of a base would not have been out of place. Despite their squat shape these magnificent pillars recall the obelisks before the pylons of the Egyptian temples.

Furniture.—In the *hêkāl* before the gate of the *dĕbîr* stood the altar of incense, a rectangular square chest of cedar wood, each side measuring a cubit wide and two cubits high. The wood was completely covered with plates of gold (III Kings, vi, 20, 22; vii, 48; I Par., xviii, 18; II Par., iv, 19). At the north side stood the table of gold on which the loaves of proposition were set every Sabbath. III Kings, vii, 48, speaks of only one golden table for these sacred loaves, while I Par., xxviii, 16, and II Par., iv, 19, mention several, but the text has been mutilated by the copyist, for elsewhere (II Par., xiii, 11, and xxix, 18) there is likewise mention of only one. The ten tables of II Par., iv, 8, were those which held the candlesticks. On each side of the south and north courts stood five candlesticks of pure gold adorned with flowers which held gold oil-lamps, probably seven in number. The snuffers, bowls, knives, mortars, cups, censers, and other vessels were likewise all of pure gold (III Kings, vii, 48–50; II Par., iv, 8–9; 21–22). The Ark of the Covenant made by Moses in the Desert, with its staves, stood in the *dĕbîr* (III Kings, viii, 6). It contained a golden vessel holding manna, the rod of Aaron, and the two tables of the Law (Heb., ix, 4). At the ends of the Ark with wings outspread stood two cherubim ten cubits high carved from wild-olive wood and covered with gold. The inner wings met above the mercy-seat or cover of the Ark and the outer wings touched the walls (see Ark).

Court of the Priests.—On the north, south, and west sides of the building was a court about twenty cubits wide which extended in front of the house a distance of one hundred cubits each way (Ezech., xl, 47). This was the "inner court" (III Kings, vi, 36), called also the "court of the priests" (II Par., iv, 9), because they alone entered it, laymen being admitted only in exceptional circumstances (cf. IV Kings, xii, 12; Jer., xxxv, 1 sq., and xxxvi) (10). It was surrounded by a wall of three rows of polished stones and one row of beams of cedar (III Kings, vi, 36), probably placed edgewise in the form of a railing. The court was paved with stone slabs (II Par., vii, 3) and was entered by three doorways on the north, south, and east sides (Jer., xxxviii, 14; lii, 24; Ezech., xl, 28, 32, 35), the last-named was called the "king's gate" (I Par., ix, 18). In this court opposite the porch gate and at a distance of twenty-two cubits stood the brazen altar of holocausts (III Kings, viii, 64), which was twenty cubits in length and breadth and ten cubits high (II Par., iv, 1). The ascent to it was made by an incline facing the east. According to Ezech., xlii, 13 sq., the altar consisted of a square base measuring twenty cubits on the sides and one cubit high, with a trench around the border; on the base stood a large section eighteen cubits sideways and two high, above which was a second section sixteen cubits sideways and four high. Lastly came the *harel*, "mountain of God", measuring fourteen cubits on the sides and two high. The top of the altar consisted of the *ariel*, "hearth of God", having at each corner a horn one cubit high, and of a section one cubit high surmounted by a crown.

Between the Temple and the altar, but somewhat towards the south, was the famous "sea of molten brass", a vessel "round all about", the height of it five cubits and the diameter ten cubits. The outer brim which was a handbreadth (four fingers) in thickness was adorned with colocynths. It contained 2000 *bates* (III Kings, vii, 23–26). (The capacity must have been doubled by the copyist, for a *bate* equals 36⅖ litres; but the interior diameter of the vessel instead of allowing a capacity of 72,800 litres allows barely 36,000.) The brazen sea rested upon twelve oxen, likewise of brass, which stood in four groups facing the four cardinal points. This magnificent vessel was used by the priests for washing their hands and feet at the hours of sacrifice. Along each of the right and left wings of the Temple were arranged five movable brazen vessels. On four wheels a cubit and a half in diameter stood a base four cubits in width and length and three high; the ledges were decorated with figures of oxen, lions, and cherubim. On this vehicle was fixed a cylinder a cubit and a half in diameter and a cubit high, on which was placed a laver four cubits in diameter and shaped like an elongated dish. Four shoulders fastened at the four corners of the base supported the laver (III Kings, vii, 27–39). These movable lavers each having a capacity of forty bates, were chiefly used for washing the flesh of the victims. There has recently been discovered at Larnaca in Cyprus a Phœnician vessel in brass which corresponds in the smallest details to that described in the Bible (see Benzinger, op. cit., 218, 221).

Outer Court.—The inner court (III Kings, vi, 36), also called the "upper court" (Jer., xxxvi, 10), implies the existence of an outer and lower court, and the court of the priests (II Par., iv, 49) supposes another for laymen. There is mention of still another in the time of Josaphat (II Par., xx, 5), but we have very little interesting information concerning these courts, which must have been completed and adorned by the successors of Solomon. It is stated, for instance, that Joatham "built the highest gate of the house of the Lord" (IV Kings, xv, 35), which refers to a new gate, probably north of a court. On the other hand Achaz replaced the altar of holocausts by another, the model of which he had seen at Damascus. He also removed the twelve brazen oxen and the graven bases of the ten movable lavers and changed the gate of the Sabbath and the outer entrance for the king (IV Kings, xvi, 10–18). Ezechias emptied the treasury of the

Temple and took away the plates of gold and silver with which he himself had covered the doors and the lintels, and gave them to purchase peace from Sennacherib (IV Kings, xviii, 15–16) Manasses profaned the Temple of Jehovah by the worship of idols (IV Kings, xxi, 4). At last the monument of Solomon, in ancient times more celebrated for its splendour than its size, was reduced to ashes by Nabuchodonosor in 586.

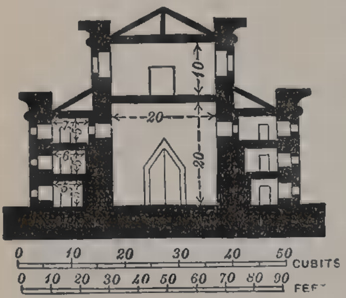

Fig. 2. Elevation of the Temple of Solomon in A–B of Plan

II. Temple of Zorobabel.—In 537 Sassabasar, appointed Governor of Jerusalem by Cyrus, King of Persia, and Zorobabel, a descendant of King Joachim, returned from captivity with a vast number of Jews and armed with authority to rebuild the Temple of Jerusalem. In the seventh month after their return the altar of holocausts of unhewn stones was set up on the foundations of the former one. In the second month of the second year they laid the first stone of the new Temple. But the work was impeded and even suspended through the hostility and plots of the Samaritans, and the Temple was not finished until 516 (I Esd., iii, 6). The Temple of Zorobabel was sixty cubits broad and the same in height (I Esd., vi, 3), these being the interior dimensions. Josephus tells us (Ant. Jud., XV, xi, 1) that this was really its height, for Herod reminded the people that the height of the second Temple was sixty cubits less than that of the first, making the Temple of Solomon one hundred and twenty cubits high, according to II Par., iii, 1. It is difficult to say whether the breadth of sixty cubits ascribed by the decree of Cyrus to the Temple was in round numbers, or whether the figures indicate the smaller cubit then in use, but it matters little, for if the breadth were really sixty royal cubits it would mean only that the side chambers had been enlarged five cubits on each side. The Holy Place and the Holy of Holies in Zorobabel's Temple retained the dimensions they had in Solomon's, and they remained the same in the third Temple.

We know from Esdras (iii, 12) and from Aggeus (ii, 3) that the Temple of Zorobabel was much inferior to that of Solomon. The poverty of the new Temple consisted chiefly in the scarcity of its furnishing. The Ark of the Covenant had not been recovered and the *dĕbîr* was empty, but as it was the dwelling-place of God on earth the entrance was once more screened with a costly veil. In the Holy Place stood a new altar of incense and a table for the loaves of proposition, but there was only one seven-branch candlestick. Treasures once more accumulated, and the entire furnishing was again in gold or covered with plates of gold, including the walls. In 168 B. C. the precious metals adorning the Temple aroused the covetousness of Antiochus Epiphanes, who "took away the golden altar, and the candlestick of light, and all the vessels thereof, and the table of proposition, and the pouring vessels, and the vials, and the little mortars of gold, and the veil, and the crowns, and the golden ornament that was before the temple, and he broke them all in pieces" (I Mach., i. 23). Judas Machabeus hastened to provide the house of God with new furnishings. The table of proposition escaped the destruction of the Temple by Titus and with other sacred utensils figures in the conqueror's triumphal procession at Rome (Bell. Jud., VII, v, 4–6). The inner court had the same circumference as that in the first Temple (I Esd., vi, 4), and according to Hecatæus, as quoted by Josephus, the altar of holocausts had the same dimensions as that of Solomon. The Mishna (Middoth, III, vi,) mentions a movable vessel on wheels. Josephus (Ant. Jud., XI, iv, 7) relates that Zorobabel had erected several porches with vestibules within the inner precincts of the temple and in I Mach., iv, 38, 57, there is mention of chambers built in the inner court.

During the heroic wars of the Machabees with the Syrians the Temple had to undergo many vicissitudes. The walls with their large towers built by Judas Machabeus for the protection of the Temple (I Mach., iv, 60) were destroyed by Antiochus Eupator (I Mach., vi, 62), but Jonathan and Simon soon rebuilt them (Ant. Jud., XIII, v, 11). In 63 B. C. Pompey, after taking the city, laid siege to the Temple, in order to break the last resistance of the Jews (Ant. Jud., XIV, iv, 4), and nine years later the procurator Crassus despoiled it of its riches (Ant. Jud., XIV, vii, 1). Finally Herod, made King of the Jews by the Senate, was obliged to take the city by storm and to besiege the fortress of the Temple (Ant. Jud., XVI, xvi, 2 sq.).

III. Temple of Herod. *History.*—Herod undertook the restoration of the Temple in its original splendour and traditional arrangements. The buildings were demolished one after another according as the materials for the new structures were available. A host of priests became masons and carpenters and themselves took charge of tearing down and rebuilding the sanctuary, which task was accomplished in eighteen months. Nearly 10,000 workmen were employed on the other buildings. After eight years' labour (10 B. C.) the new edifice was opened for service. But this monument, which in its vast proportions and magnificence rivalled the most beautiful buildings of antiquity and far surpassed even that of Solomon, was completed only in A. D. 62 or 64 (Cf. John, ii, 20), at that time 18,000 workmen being still employed (Ant. Jud., XX, ix, 7). For Herod doubled the artificial platform which held the Temple of Zorobabel, enlarging the sacred precincts to the south and especially to the north where the galleries reached as far as the rock of Baris and the Antonia (Ant. Jud., XV, xi, 3; Bell. Jud., I, xxi, 1; V, v, 2). The Temple with its courts, galleries, and porches occupied the whole of the present site of the *haram esh sherif*, which measures 1070 feet on the north, 1540 on the east, 920 on the south, and 1630 on the west. The Temple of Herod consisted of two courts, an inner and an outer one. The former included all the buildings of the Temple properly so called and was divided into: (1) The Court of the Priests, which contained the house of God and the altar of holocausts; (2) the Court of Israel; and (3) the Court of the Women. All the space between the inner court and the outer wall of the platform was called the Court of the Gentiles, because non-Jews were permitted to enter it. The following are the arrangements of the Temple according to Josephus (Ant. Jud., XV, xi; Bell. Jud., V, v), other sources being indicated in the course of the descriptions.

Priests' Court and House of God.—The Court of the Priests formed a rectangle one hundred and eighty-seven cubits from east to west and one hundred and thirty-seven cubits from north to south [(Middoth, II, 6 (fig. 3)]. To the west stood the house of Jehovah and to the east the altar of holocausts. The sanctuary was reached by a stairway of twelve steps (2), which terminated in a majestic porch one hundred cubits high and the same in breadth (3). A door without leaves twenty cubits wide and forty high led into a vestibule eleven cubits wide. According to the Mishna this doorway was flanked by two square-shaped pillars each formed of ten cubes measuring four cubits on the sides. On these two pillars rested a sort of entablature formed of five oaken beams, separated from each other by square stones set on a line with the pillars. It was a reproduction of the triumphal arches then so common in the East. Upon the immense trellis, or grille, stretched a golden vine, of which the grapes, according to Josephus, were of the height of a man. He adds that it extended twenty-five cubits from north to south and that its top was seventy cubits from the ground. Tacitus (Ann., V, v) also speaks of this vine. Above it Herod placed a colossal golden eagle, the Roman eagle, which greatly displeased the Jews (Ant. Jud., XVII, vi, 2–4). The *hêkāl* (4) and the *dĕbîr* retained their ancient dimensions in length and breadth, but their height was increased to sixty cubits. A doorway ten cubits wide and twenty high gave access to the Holy Place. The door leaves were of carved wood covered with leaves of gold, and the door was further embellished with a magnificent curtain of Babylonian-dyed linen. The richly-decorated chamber contained the altar of perfumes before the entrance to the *dĕbîr*, north of the table of proposition and south of the seven-branch candlestick. It was not so well lighted or aired as that of Solomon. The priests alone entered this court to offer incense every night and morning, to trim the lamps, and change the loaves of proposition on the Sabbath-day. It was near the altar of incense that the angel appeared to Zacharias (Luke, i, 11).

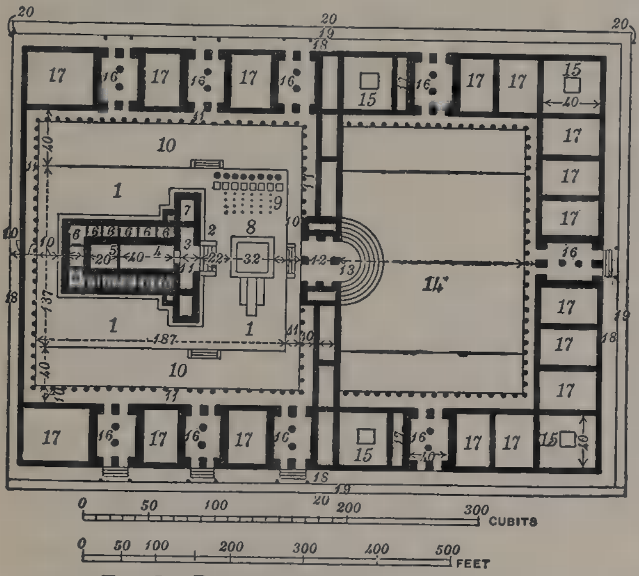

FIG. 3. PLAN OF THE TEMPLE OF HEROD

(1) Court of the priests; (2) Stairway of the Temples; (3) Porch and vestibule; (4) The Holy Place; (5) The Holy of Holies; (6) Side chambers; (7) Entrance to the winding stairway; (8) Altar of holocausts; (9) Abattoir; (10) Court of Israel; (11) Gallery; (12) Beautiful Gate; (13) Stairway of fifteen steps; (14) Court of the women; (15) Hypethral room; (16) Gate; (17) Hall; (18) Hel; (19) Stairway of 14 steps; (20) Court of the gentiles.

The entrance to the *dĕbîr* had no doors, but, as formerly, was shielded by a costly curtain. According to the Mishna (Yoma, V, i) no partition wall separated the *hêkāl* from the *dĕbîr*, the latter being formed by two veils hung the distance of a cubit from each other; but Josephus distinguished between the two chambers giving the dimensions of each. Furthermore he speaks only of one veil "at the entrance" of the *dĕbîr*, which must signify a doorway. Moreover, the absence of a partition would have necessitated a curtain sixty cubits long by twenty broad, which would never have sealed hermetically the Holy of Holies. The statement of the rabbis on this point is open to suspicion. They could not have been ignorant that according to the Gospel (Matt., xxvii, 51; Mark, xv, 38; Luke, xxiii, 45), when Christ died on the cross the veil of the temple was rent in two from top to bottom. The *dĕbîr* was empty. Only the high-priest entered it once a year. Above the *dĕbîr* and the *hêkāl* was a story forty cubits high, so the entire building was the same height as the porch. On the north, south, and west sides was a building divided into three stories each twenty cubits high. The ground floor and the first floor each had thirteen chambers six cubits wide (6) and the top floor twelve. A doorway (7) opened northward from the vestibule on a winding-stair three cubits in diameter and located in the corner formed by the wall of the house and the projection of the porch. The two walls which formed the cage of the stairway were five cubits thick. In the opposite corner to the south was a similar cage intended to facilitate the outflow of water. The total width of the house, including the side chambers, was fifty-four cubits and near the porch seventy cubits, and its total length, including the porch, was one hundred and six cubits, allowing six cubits thickness for the walls. The base was ten cubits larger than the dimensions given above.

Twenty-two cubits east of the house stood the altar of holocausts, constructed of unhewn stone (8). The rabbis speak of a three-tiered altar, ten cubits high and thirty-two cubits along the sides of the base, and twenty-four in the centre (Maimonides, "Beth Haberasch", II, 16). The figures of Josephus, fifty cubits on the sides by fifteen high, are obviously incorrect. North of the altar (9) four rows of rings were fastened in the ground and were used while slaying the animals. Next came eight marble tables for cutting up and washing the flesh of the victims, and higher up were eight pillars with hooks for suspending and flaying the animals (Middoth III, 5–V, ii; Talmud, Shek, VI, 4). Laymen were admitted to this court only when they offered sacrifice, for they had to place their hands on the head of the victims. The four sides of the court were surrounded by a parapet of stones a foot and a half high.

Court of Israel.—Five steps led down from the court of the priests to the court of Israel, which surrounded the former on three sides (10). At the north and south it was forty cubits wide and on the east only eleven cubits. A gallery ten cubits wide (11), supported by splendid marble columns, went round this court, probably on the west side also, and afforded a shelter from the sun and rain. Men only were admitted here and only the king was permitted to be seated.

East of this court opposite the house of God (12) rose a superb gateway, the most beautiful of all, which according to Josephus and the Mishna (Middoth, I, 4) was the gift of Nicanor, a wealthy Alexandrian Jew. This was the θύρα ὡραία, the *porta speciosa* (Acts, iii, 2), where St. Peter healed the man crippled from birth. It was fifty cubits high and forty wide, and its gates of Corinthian brass, carved and covered with plates of gold and silver, were so heavy that twenty men were required to move it. Josephus adds that among the signs premonitory of the destruction of the Temple this gate opened of itself at midnight about the year 30 B. C. (Bell. Jud., VI, v, 3).

Court of the Women.—From the Gate of Nicanor a semicircular stairway (13) of fifteen steps led down to the women's court (14), surrounded by a gallery on the north, east, and south. Here the women were admitted and places were reserved for them on the north and south, but the men also frequented this court and usually crossed it when they went to the Temple. There were benches there, for it was permitted to sit (cf. Mark, xii, 41). Along the sides probably near the Gate of Nicanor, were thirteen boxes, an inscription indicating the special purpose of each: oil, wood, priestly vestments, doves, etc. There Christ saw the rich men and the poor widow deposit their offering (Luke, xxi, 1). At the four corners were four hypethral chambers, forty cubits square(15). According to the Talmud the north-west chamber was where the unclean and lepers, who had been healed, bathed and were declared clean by the priests. In the north-east chamber the priests sorted the wood; in the south-west oil and wine were preserved in vaults; in the south-east those who had fulfilled the vow of Nazarites shaved their heads (cf. Num., vi, 13 sqq; Acts, xviii, 18). In these chambers it was also permitted to wash, cook etc. According to Middoth, II, 5, there were also in this court four chambers in which certain women were lodged.

Gates and Chambers.—Three sides of the inner court were surrounded by buildings forty cubits broad, separated by nine gates in the shape of towers (16), four on the north and four on the south, of which only two opened into the women's court, with the eastern gate. These gateways or rather sumptuous porches were 40 cubits in height, breadth, and length. A large bar divided the entrance into two bays each ten cubits broad and twenty high with wooden leaves covered with plates of gold and silver. The vestibule was thirty cubits square and its six arches were supported by two pillars twelve cubits in circumference. At the sides of the court of Israel five steps led to the gateway whose vestibule was likewise provided with ten steps or an incline. There are still three gates within the *haram esh sherif*, the Golden Gate, the double gate, and the triple gate, constructed according to the same plan. Between these gates was a series of chambers devoted to various uses (17). West of the second southern gate was the *lishkat gazit*, hall of the Sanhedrin (Middoth, II, 5), with a chamber, for the instruction of the people, and in the court of the women was the γαζοφυλάκιον, hall of the treasury (Ant. Jud., XIX, vi, 1). This vast edifice rested on a foundation with a projection of ten cubits forming a deambulatory (18), which was reached by a stairway of twelve or fourteen steps. This was the *hel;* it was surrounded by a stone parapet called *sôrêg* and in front of the nine gates stood pillars with inscriptions in Greek and Latin notifying visitors that every non-Jew was forbidden under pain of death to approach nearer the Temple. Some years ago one of the pillars with a Greeek inscription was found in the vicinity of the *haram esh sherif*.

Outer Court.—The remainder of the vast platform formed the outer court of the gentiles. It was paved with large slabs and surrounded on all sides by a double gallery formed of two rows of columns twenty-five cubits high. That overlooking the valley of Cedron was called "Gate of Solomon" (cf. I Par., ix, 18). It was certainly prior to Herod, and Josephus dates its origin from Solomon, himself. He relates that in A. D. 62 or 64 the 18,000 workmen still employed on the adornment of the Temple began to lack work and requested that they might demolish the Gate of Solomon; but this, although ancient, was so beautiful and the cost of replacing it would have been so great that King Agrippa II decided to preserve it and to employ the workmen in paving the city streets (Ant. Jud., XX, ix, 7). Whether it dates from the kings of Juda or only from Zorobabel it is sufficient to afford an idea of the magnificence of the first two temples of Jerusalem. At the corners of these galleries were chambers (*pastophoria*) for the guards. From the side towards the city the entrance to the sanctuary was made through several gates of surpassing beauty, four on the west of the esplanade, two on the south, one on the east, and one on the north. On a lower terrace in the centre Herod erected a royal basilica, a sumptuous building divided into three naves by four rows of forty-one Corinthian columns. Each column was more than five feet in diameter. At the north of the esplanade he built two vast courts surrounded by gates which extended to the scarp of the rock of Baris. These courts communicated with the Antonia only by two stairways (cf. Acts, xxi, 35).

Temporal Power. See POPE, THE; STATES OF THE CHURCH.

Temptation (Lat. *tentare*, to try or test) is here taken to be an incitement to sin whether by persuasion or by the offer of some good or pleasure. It may be merely external, as was the case of Christ's encounter in the desert after the forty days' fast; or it may be internal as well, inasmuch as there is a real assault upon a person's will power. It arises sometimes from the propensity to evil inherent in us as a result of original sin. Sometimes it is directly chargeable to the intervention of the Devil, who can furnish the imagination with its sinful subject-matter and stir up the lower powers of the soul. Not infrequently both causes are at work. Temptation is not in itself sin. No matter how vivid the unholy image may be, no matter how strong the inclination to transgress the law, no matter how vehement the sensation of unlawful satisfaction, as long as there is no consent of the will, there is no sin. The very essence of sin in any grade is that it should be a deliberate act of the human will. Attack is not synonymous with surrender. This, while obvious enough, is important especially for those who are trying to serve God sedulously and yet find themselves beset on all sides by temptations. They are apt to take the fierceness and repetition of the onset as proof that they have fallen. A wise spiritual guide will point out the error of this conclusion and thus administer comfort and courage to these harassed souls.

Temptations are to be combated by the avoidance, where possible, of the occasions that give rise to them, by recourse to prayer, and by fostering within oneself a spirit of humble distrust of one's own powers and of unbounded confidence in God. The resistance which a Christian is bound to offer need not always be direct. Sometimes, particularly when there is question of reiterated evil interior suggestions, it may be useful to employ an indirect method, that is, to simply ignore them and quietly divert the attention into another channel. Temptations as such can never be intended by God. They are permitted by Him to give us an opportunity of practising virtue and self-mastery and acquiring merit. The fact of temptation, no matter how large it looms in a person's life, is not an indication that such an one is under the ban. Indeed those whom God calls to special heights of sanctity are just those who may expect to have to wrestle bravely with temptations more numerous and fearsome than fall to the lot of the average mortal.

JOSEPH F. DELANY.

Temptation of Christ.—In the Catholic translation of Holy Writ, the word "temptation" is used in various senses, the principal of which are the following: (1) the act of testing or trying (Deut., iv, 34; Tob., ii, 12; Luke, xxii, 28; etc.); (2) enticement to evil (Matt., xxvi, 41; I Cor., x, 13; etc.); (3) the state of being tempted (Matt., vi, 13; Luke, iv, 13; etc.); (4) that which tempts or entices to evil (James, i, 12; II Pet., ii, 9; etc.); (5) the name of a place (Ex., xvii, 7; Deut., vi, 16; etc.). Taken in an unfavourable sense as denoting enticement to evil, temptation cannot be referred directly to God or to Christ, so that when we read in Gen., xxii, 1, for instance, "God tempted Abraham", and in John, vi, 6, "Hoc autem dicebat tentans eum", literally: "This He [Jesus] said tempting him [Philip]", the expressions must be taken in the sense of testing, trying. According to St. James (i, 12 sqq.), the natural source of man's temptations is concupiscence, or that proneness to evil which is the result of the fall of Adam, and which remains in human nature after baptismal regeneration, and even though the soul is in the state of sanctifying grace (cf. Rom., viii, 1). Concupiscence becomes sinful only when freely yielded to; when resisted with God's help, it is an occasion of merit. Together with inward concupiscence, and outward creatures, which may be the occasion of sin (I John ii, 15 sqq.), the chief cause of temptation is Satan, "the tempter" (Matt., iv, 3), bent on man's eternal ruin (Eph., vi, 10 sqq.). In the Lord's Prayer, the clause "Lead us not into temptation" is an humble and trusting petition for God's help to enable us to overcome temptation when His Fatherly Providence allows us to experience the allurements of evil. Prayer and watchfulness are the chief weapons against temptation (Mark, xiv, 38; etc.). God does not allow man to be tempted beyond his strength (I Cor., x, 13).

Like Adam, Christ, the second Adam, endured temptation only from without, inasmuch as His human nature was free from all concupiscence; but unlike Adam, He withstood the assaults of the Tempter on all points, thereby affording His mystical members a perfect model of resistance to their spiritual enemy, and a permanent source of victorious help (Heb., iv, 15–16). In our first three Gospels (Matt., iv, 1–11; Mark, i, 12–13; Luke, iv, 1–13), the narrative of Christ's temptation is placed in immediate connexion with His baptism on the one hand, and with the beginning of His public ministry on the other. The reason of this is clear. The Synoptists naturally regard the baptism of Christ as the external designation of Jesus from above for His Messianic work to be pursued under the guidance of the Holy Spirit bestowed upon Him on this occasion; and they no less naturally regard Christ's sojourn in the desert where He was tempted, as His own immediate preparation for that great work under the guidance of the same Holy Spirit. As our first three Gospels agree concerning the time to which they assign the temptation of Christ, so they are at one in ascribing the same general place to its occurrence, viz. "the desert", whereby they no doubt mean the Wilderness of Judea, where Jesus would indeed be, as St. Mark says: "with beasts". From St. Mark (i, 13)—with whom compare St. Luke iv, 2—we learn that Jesus Christ was tempted during the forty days which He spent in the desert (cf. St. Augustine, "Harmony of the Evangelists", II, xvi), so that the three onsets given in detail by St. Matthew and St. Luke are apparently the three final assaults of Satan against Christ. The first of these assaults is directly connected in both St. Matthew and St. Luke with the prolonged fast of Jesus in the wilderness. The Tempter suggested to Jesus that He should use His miraculous power to relieve His hunger, by changing into bread the loaf-like flints of the desert. The two other assaults are given in a different order, St. Matthew adhering probably to the order of time, and St. Luke to that of place. The spot pointed out by tradition as the summit from which Satan offered to Jesus dominion over all earthly kingdoms is the "Quarantania", a limestone peak on the road from Jerusalem to Jericho. As regards the Temple's pinnacle from which the Tempter bade Jesus cast Himself down, it was not the top of the House of Yahweh, but probably the roof of Solomon's portico from which, at a later date, St. James was actually hurled to the pavement below (Eusebius, "Hist. eccl.", IV, xiii).

According to St. Luke (iv, 13), after having subjected Christ to all kinds of temptations,—the Messianic import of which is undoubted,—Satan withdrew, awaiting a favourable opportunity like that which followed Christ's prolonged fast in the desert. The later conflict thus alluded to is no other than that of Christ's Passion (cf. Luke, xxii, 53; John, xiv, 30). The ministry of angels to Jesus, in connexion with His temptation, is mentioned in Mark, i, 13. Satan's exact manner of appearance to Jesus is not stated by the Evangelists. Despite the difficulties urged, chiefly by non-Catholic scholars, against the historical character of the three temptations of Jesus, as recorded by St. Matthew and St. Luke, it is plain that these sacred writers intended to describe an actual and visible approach of Satan, to chronicle an actual shifting of places, etc., and that the traditional view, which maintains the objective nature of Christ's temptations, is the only one meeting all the requirements of the Gospel narrative.

FRANCIS E. GIGOT.

Tencin, PIERRE-GUÉRIN DE, French statesman and cardinal, b. at Grenoble, 22 August, 1680; d. at Lyons, 2 March, 1758. After studying with the Oratorians at Grenoble he entered the Sorbonne, where he became prior in 1702, and obtained the doctorate in 1705. He was then appointed Vicar-General of Sens and, in 1721, accompanied Cardinal de Rohan to Rome as his conclavist, to support the candidacy of Cardinal Conti (Innocent XIII), from whom he had obtained a promise to bestow the purple on the unworthy French minister Dubois. He remained at Rome as French chargé d'affaires until Benedict XIII, with whom he was very influential, consecrated him Archbishop of Embrun (26 June, 1724). With the selfish motive of paving his way to higher ecclesiastical honours, he was overzealous in the persecution of the Jansenists, and, at the provincial synod which he held at Embrun from 16 August to 28 September, 1727, he suspended Bishop Jean Soanen of Senez, a prelate eighty years of age, who had appealed against the Bull "Unigenitus". On 22 February, 1739, Tencin was created cardinal, of the title of Sts. Nereus and Achilleus. He remained at Rome as French ambassador until 1742, when he took possession of the archiepiscopal See of Lyons, to which he had succeeded on 19 November, 1740. King Louis XV appointed him minister of state in September, 1742. After the death of the Prime Minister Fleury, to whom he owed much of his political advancement, his influence began to decrease. The death of his profligate sister, Madame Tencin, on 4 Dec., 1749, removed the greatest spur of his political ambition, and in 1752 he retired to his See of Lyons.

MICHAEL OTT.

Tenebræ is the name given to the service of Matins and Lauds belonging to the last three days of Holy Week. This service, as the "Cæremoniale episcoporum" expressly directs, is to be anticipated and it should be sung shortly after Compline "about the twenty-first hour", i. e. about three p. m. on the eve of the day to which it belongs. "On the three days before Easter", says Benedict XIV (Institut., 24), "Lauds follow immediately on Matins, which in this occasion terminate with the close of day, in order to signify the setting of the Sun of Justice and the darkness of the Jewish people who knew not our Lord and condemned Him to the gibbet of the cross." Originally Matins on these days, like Matins at all other seasons of the year, were sung shortly after midnight, and consequently if the lights were extinguished the darkness was complete. That this putting out of lights dates from the fifth century, so far at least as regards the night Office, is highly probable. Both in the first Ordo Romanus and in the Ordo of St. Amand published by Duchesne a great point is made of the gradual extinction of the lights during the Friday Matins; though it would seem that in this earliest period the Matins and Lauds of the Thursday were sung throughout with the church brightly illuminated (*ecclesia omni lumine decoretur*). On Friday the candles and lamps were gradually extinguished during the three Nocturns, while on Saturday the church was in darkness from beginning to end, save that a single candle was kept near the lectern to read by.

All this suggests, as Kutschker has remarked, that the Office of these three days was treated as a sort of funeral service, or dirge, commemorating the death of Jesus Christ. It is natural also that, since Christ by convention was regarded as having lain three days and three nights in the tomb, these obsequies should have come in the end to be celebrated on each of the three separate occasions with the same demonstrations of mourning. There can be no reasonable doubt that it was from the extinguishing of lights that the service came to be known as Tenebræ, though the name itself seems to have arisen somewhat later. The liturgist de Vert has suggested an utilitarian explanation of the putting out of the candles one by one, contending that the gradual approach of the dawn rendered the same number of lights unnecessary, and that the number was consequently diminished as the service drew to a close. This view seems sufficiently refuted by the fact that this method of gradual extinction is mentioned by the first Ordo Romanus on the Friday only. On the Saturday we are explicitly told that the lights were not lit. Moreover, as pointed out under Holy Week (VII, 437), the tone of the whole Office, which seems hardly to have varied in any respect from that now heard in our churches, is most noticeably mournful—the lessons taken from the Lamentations of Jeremias, the omission of the Gloria Patri, of the Te Deum, and of blessings etc., all suggest a service cognate to the Vigiliæ Mortuorum, just as the brilliant illumination of the Easter eve spoke of triumph and of joy, so the darkness of the preceding night's services seems to have been designedly chosen to mark the Church's desolation. In any case it is to be noticed that the Office of these three days has been treated by liturgical reformers throughout the ages with scrupulous respect. The lessons from Jeremias in the first Nocturn, from the Commentaries of St. Augustine upon the Psalms in the second, and from the Epistles of St. Paul in the third remain now as when we first hear of them in the eighth century.

The Benedictine Order, who normally have their own arrangement of psalms and nocturns, differing from the Roman, on these three days conform to the ordinary Roman practice. Even the shifting of the hour from midnight to the previous afternoon, when no real darkness can be secured, seems to have been prompted by the desire to render these sublime Offices more accessible to clergy and laity. Already in the thirteenth century it seems probable that at Rome Tenebræ began at four or five o'clock on the Wednesday (see Ord. Rom., xiv, 82, and Ord. Rom., xv, 62). Despite the general uniformity of this service throughout the Western Church, there was also a certain diversity of usage in some details, more particularly in the number of candles which stood in the Tenebræ hearse, and in some accretions which, especially in the Sarum Use, marked the termination of the service. With regard to the candles Durandus speaks of as many as seventy-two being used in some churches and as few as nine or seven in others. In England the Sarum Ordinal prescribed twenty-four, and this was the general number in this country, variously explained as symbolizing the twenty-four hours of the day, or the twelve Apostles with the twelve Prophets. A twenty-fifth candle was allowed to remain lighted and hidden, as is done at the present day, behind the altar, when all the others had been gradually extinguished. At present, the rubrics of the "Ceremoniale," etc., prescribe the use of fifteen candles. The noise made at the end of Tenebræ undoubtedly had its origin in the signal given by the master of ceremonies for the return of the ministers to the sacristy. A number of the earlier Ceremoniales and Ordines are explicit on the point. But at a later date others lent their aid in making this knocking. For example Patricius Piccolomini says: "The prayer being ended the master of ceremonies begins to beat with his hand upon the altar step or upon some bench, and all to some extent make a noise and clatter". This was afterwards symbolically interpreted to represent the convulsion of nature which followed the death of Jesus Christ.

Tenedos, a titular see, suffragan of Rhodes in the Cyclades. The island, called in Turkish Boghaz-Adassi, has an area of 16 square miles and 5000 inhabitants, of whom 3000 are Greek schismatics. It is a caza of the sanjak of Lemnos in the vilayet of Rhodes. It seems to have been called by various names, such as Leucophrys, Calydna, Phœnice, and Lyrnessus. The name Tenedos is derived from Tenes, one of the heroes of the Trojan War. In this connexion Homer and Virgil make frequent mention of the island, which must have been used by the Greeks as a station for their fleet. Captured by the Persians, who used it as a naval station, it afterwards became the ally and tributary of Athens, to which it was faithful during the Peloponnesian War until the peace of Antalcidas in 358 b. c. Subject to Alexander and his successors, though retaining its internal organization, it fell into the power of the Romans in 129 b. c. and was ravaged by Verres. In 73 b. c. Lucullus destroyed a part of the fleet of Mithridates there. Justinian built there large storehouses to contain the grain brought from Alexandria (Procopius, "De ædificiis", V, i). The Venetians captured it in 1377; Mohammed II wrested it from them in the fifteenth century, but they recaptured it in 1656, though but for a short time. Canaris burned the Turkish fleet there in 1822. Le Quien (Oriens christ., I, 947–50) mentions the bishops: Diodorus, at Sardica in 344; Anastasius, a partisan of Nestorius; Florentius in 451; Joseph in 1356. In September, 1369, Harmodius, Bishop of Boreia Potamia, was transferred to the metropolitan See of Tenedos (Miklosich and Müller, "Acta patriarchatus Constantinopolitani", I, 511). At first a suffragan of Cyzicus and then of Mitylene, at least from the tenth century (Gelzer, "Ungedruckte . . . Texte der

Notitiæ episcopatuum", 559; "Georgii Cyprii Descriptio orbis romani", 83), Tenedos was raised to the rank of a metropolitan see shortly after the death of Andronicus III in 1341 (Gelzer, op. cit., 601; 608). In 1342 it had already become such (Miklosich and Müller, op. cit., I, 230). In October, 1368, the metropolitan See of Tenedos was given to the metropolitan of Peritheorium in Thrace (op. cit., I, 501). In a "notitia" of the fifteenth century the see is no longer mentioned.

S. VAILHÉ.

Teneriffe, DIOCESE OF (TENERIFENSIS), suffragan of Seville, formerly called Nivariensis from Nivaria, the ancient name of the island (Pliny, VI, xxxii; Filippo Bergamo, XVI, "sup. chronic."). Teneriffe, which is situated in the centre of the Canary Archipelago, is the principal, most fertile, and most populous of the islands. It contains the famous Pico de Teyde (Peak of Teneriffe), the ancient Mount Atlante, rising 12,200 feet high, a guiding point for sailors since the time of the Phœnician Hercules. This diocese comprises the Islands of Teneriffe, Palma, Gomera, and Ferro (Hierro), is situated between 13° and 16° W. long., and has belonged to Spain since the time of its conquest, 1402–1496. Teneriffe was the last of the Canary Islands to surrender; more Spanish blood was shed in its conquest than in the subjugation of the empires of the Incas and Montezumas. In the battle of Acentejo alone 900 of the 1120 who composed the conquering army were lost. The aborigines, of the Guanche race, were, however, quick to assimiliate the manners and the customs of the conquerors, and if this island were the last to surrender, it was soon the centre of the political and military organizations, although not of the ecclesiastical, because of the unexpected translation of the first see in the Canaries from Rubicón on the Island of Lanzarote to Las Palmas of the Gran Canaria.

The people, however, through their representatives petitioned the Cortes of Cadiz (14 Sept., 1813) for their own ecclesiastical administration. It is interesting to note that it was one of these representatives, who, being at Philadelphia in 1788, urged through the Nuncio Vincenti the establishment of the first Catholic diocese in the United States of America (Diario de las Cortes de Cadiz sesion de 18 de Enero de 1813). As a result of their petition an auxiliary bishop was appointed in 1816, and the Diocese of Teneriffe was erected in 1819 by the Bull of Pius VII dated 1 February, 1818, the Church of Los Remedios at San Cristóbal de la Laguna being designated as the cathedral. In 1823 the Nuncio Mastai Ferreti, during his voyage to Chile, was impressed by the importance and the necessity of this see, and on this account when later as Pius IX he was obliged by the Concordat of 1851 with Spain to suppress it, he did so with regret, and in 1876, when certain concessions and modifications of this concordat were solicited, one of the conditions for granting them was the restoration of this see. This was granted, but, as the Bull of suppression had never been issued, Rome was not obliged to take any steps for the re-establishment. In the ninety-two years of its existence, besides the vicars capitular who have administered the diocese during the time of vacancies, the following bishops have governed the see: Folgueras Sión, first bishop, academician, author of various works, including a translation of Juvenal (1825–48); Lluch and Urquinaona, bishops of Gran Canaria, as administrators Apostolic (1825–48); Infante Macias, author of a volume of sermons (1877–82); Cervera Cervera (1882–4); Torrijos Gómez (1888–94); and since 1894 the present bishop, Mgr. Nicolás Rey Redondo, who was born at Melgar de Fernamental, Burgos, Spain, on 6 Jan., 1834, ordained in 1860, appointed to this see on 21 May, 1894, and consecrated at Burgos, 9 Sept., 1894.

The diocese numbers 208,000 souls, and has a cathedral, fifty-nine parishes, a seminary, 6 religious communities of men: Missionaries of the Immaculate Heart of Mary, 1; Lazarists, 3; Christian Brothers, 2; and 14 houses of women: Dominicanesses, 1; Franciscanesses, 1; Conceptionists, 1; Assumptionists, 1; Teaching Sisters of St. Dominic, 2; Servants of Mary, 3; Franciscan Hospitaller Sisters, 1; Sisters of Charity, 3; Little Sisters of the Poor, 1. A Catholic daily, "Gaceta de Tenerife", and the official bulletin, "Buletín oficial del obispado de Tenerife", are published in the diocese. Among the notable personages who are natives of this island may be mentioned the Ven. José Anchieta, apostle of Brazil, and Ven. Pedro Bethancourt, founder of the Bethlemites, a hospitaller order of Latin America. It has also given two martyrs to the Church, Fray Luis de Aguirre, Augustinian, in Guecija, Granada, and the Jesuit, Pedro Parrado de León, in Japan, three archbishops, and ten bishops, six to America and four to Europe. Among the notable buildings may be mentioned the cathedral rebuilt by the present bishop, the parochial churches of La Concepción of Laguna, and those of Santa Cruz, Orotava, and Realejo-bajo, Garachico and Icod on the Island of Teneriffe, and Salvador on the Island of Palma, all containing art works of merit. The pulpit of the cathedral, carved in marble, and that of La Concepción, a wood carving, bear comparison with those of the churches of Brussels.

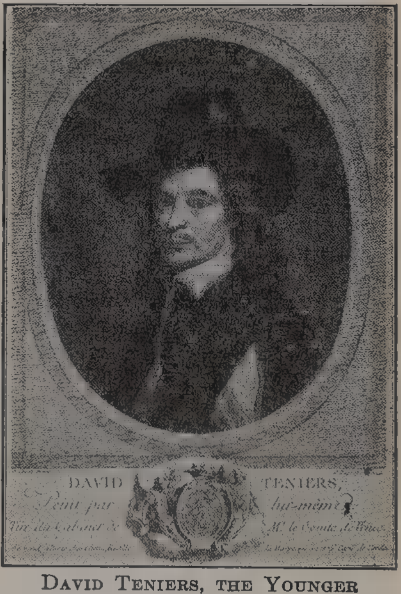
JOSÉ RODRÎGUEZ MOURE.



DAVID TENIERS, THE YOUNGER
Engraved from a self-portrait

Teniers, DAVID, the name of two eminent Flemish landscape painters; the elder, b. at Antwerp in 1582; d. there in 1649; the younger, b. at Antwerp in 1610; d. at Brussels in 1694. Of these two men, the younger was by far the greater, eclipsing in skill the work of his father. Teniers the elder was the son of a mercer, Julian Teniers, and was brought up and trained by his elder brother. He entered for a while the school of Rubens, later on visited Italy, and studied under Elsheimer in Rome. He returned to his own country in 1606 and spent the rest of his life at Antwerp, painting landscape pictures, illustrations from rural sports, and some classical and historical scenes. His son, David Teniers the younger, was one of four brothers, David, Julian, Theodore, and Abraham, and he in his turn had a son and a grandson named David. Nothing whatever is known of the persons who taught the younger Teniers; in all probability he was brought up in his father's studio, although it has been stated by some writers that he worked under Rubens, or under Brouwer. He certainly was on terms of intimate acquaintance with Rubens, but we hear nothing of this acquaintance until 1637, when he married Anne, the daughter of Brueghel, the pupil of Rubens, and the great painter came to the wedding. The girl was not yet seventeen; she bore Teniers five children and died in 1656. Six months later, Teniers married Isabel, the daughter of an eminent person who was secretary to the Council of Brabant.

Teniers is said to have received a fortune with each wife, and to have made a great deal of money from the sale of his pictures. It is certain that he had ample means, was able to purchase a château, to live in good circumstances, and eventually to obtain admission to the ranks of the nobility after he had ceased to exercise his profession for gain. The statement of his appeal to be received as a member of an old family and the description of his coat of arms are still in existence. He was patronized by the Governor of the Netherlands, the Archduke William, and by his successor Don Juan of Austria. Philip IV and Christina of Sweden were also amongst the eminent persons who gave him commissions for pictures. He was a man of the greatest industry, and his delightful little works, perhaps numbering nearly eight hundred in all, are to be found all over Europe. As a rule, they are scenes from peasant life, painted in beautiful colour schemes and dexterously handled. They can be studied especially in the galleries of Dresden, Glasgow, the National Gallery in London, the Louvre, the Prado, the Imperial Gallery at Vienna, and the Hermitage at St. Petersburg. Of these galleries the Louvre has the greatest number, possessing nearly forty examples of the work of this skilful painter. Alone amongst the members of his family, he appears to have been a practical Catholic.

Wauters, *The Flemish School of Painting* (Brussels, 1877).

George Charles Williamson.

Tennessee.—The State of Tennessee lies between 35° and 36° 30′ N. lat. and 81° 37′ and 90° 28′ W. long. Its greatest length from east to west is 432 miles, and its extreme width 109 miles; its total area is 43,022 square miles. It touches eight states on its borders, a greater number than is touched by the boundaries of any other state in the Union except Missouri. It is unequalled in the number and excellence of its navigable rivers. The Mississippi River washes its western boundary and the placid Tennessee and beautiful Cumberland, with sources in other states, furnish cheap water transportation for the varied products of the soil and of the mines.

THE GREAT SEAL OF THE STATE OF TENNESSEE
XVI
AGRICULTURE
COMMERCE
1796

I. Physical Characteristics.—The state has eight great natural divisions: the Appalachian chain of mountains, called the Unakas, rises on its eastern borders, the highest peaks of which attain an elevation of more than 6000 feet above the sea. Adjoining these mountains on the west and in between them and the Cumberland table-land is the valley of east Tennessee, a succession of ridges and minor valleys running in almost unbroken lines from north-east to south-west. Next in order comes the Cumberland table-land, an elevated plateau, which rises 2000 feet above the sea. The soil of this division is sandy, thin and unproductive, and of but little agricultural importance. Beneath it, however, are buried vast treasures of coal and iron, and its area is 5100 square miles. Rising against the western edge of the Cumberland table-land and extending to the Tennessee River, with an average elevation of 1000 feet above the sea, are the highlands or terrace lands, diversified in places with rolling hills and wide valleys. The soil in this divison is of varying fertility and of great agricultural importance and wealth. In the centre of these highlands and surrounded by them is the great central basin. The soil of this basin is highly productive of all crops suitable to the altitude, and it has been well named "The Garden of Tennessee". Its area is 5450 square miles and it has an average depression of 300 feet below the highlands. The next natural division is the western valley, or the Valley of the Tennessee. This is a comparatively narrow valley with spurs from the highlands running in towards it and sometimes down to the margin of the Tennessee River. The soil is fertile, but marshy spots covered with cypress occur in places along the river. The average width of this valley is ten or twelve miles and its length the breadth of the state. It has an area of 1200 square miles and an elevation of 350 feet above the sea. The plateau or slope of west Tennessee is the seventh natural division and peculiar in having but few rocks, differing in this particular from all the divisions above mentioned. It is a great plain, sloping gradually towards the Mississippi River and varying widely in the character of its soil and scenery. Furrowed with river valleys, this division extends for a distance of 84 miles, when it abruptly terminates in the greater plain, the bottoms of the Mississippi. The soil of this division is light and very fertile. The bottoms of the Mississippi form the last natural division of the state and constitute a low, fertile, alluvial plain teeming with a luxurious vegetable life that is almost tropical.

These eight natural divisions have been reduced to three civil divisions: (1) east Tennessee comprises all the territory from the North Carolina line to about the centre of the Cumberland table-land; (2) middle Tennessee extends from the dividing line on the Cumberland table-land to the Tennessee River; (3) west Tennessee extends from the Tennessee River to the Mississippi River. The climate is mild, resulting from latitude and elevation interwoven and modified by varieties of soil, position, exposure, and chains of mountain ranges, so that the characteristic climate of every state in the Union may be found in it. In the spring and autumn the climate is unsurpassed. The summer and winter seasons are short. The mean annual temperature is about 57 in the valley of east Tennessee, 58 in middle Tennessee, and 59 in west Tennessee.

II. History.—The first expedition of white men into the country included within the limits of the present State of Tennessee was that of Fernando De Soto in the year 1540. Accounts given of De Soto's marches by his followers have led to the belief that he entered Tennessee near its eastern boundary and advanced across almost its entire width, reaching the Mississippi River at a point now occupied by the city of Memphis. At the time of this expedition Tennessee was unoccupied except by the Cherochee Indians, who inhabited that part bordering on the Tennessee River; the Choctaws, the upper Cumberland; Shawnees, the lower Cumberland; and the Chickasaws used and claimed the territory between the Tennessee and Mississippi Rivers, now west Tennessee. The rich section of middle Tennessee was then regarded by the Indians as common hunting-ground and was not used by them for any other purpose. In 1673 Father Marquette and Joliet descended the Mississippi River and made maps of the country, especially noting Chickasaw Bluffs, on which Memphis is now situated. In 1682 La Salle made his famous voyage down the Mississippi, claiming the territory for France, and named it Louisiana. He stopped at Chickasaw Bluffs and constructed a cabin and fort which he named "Prud 'homme", made a treaty with the Indians, and established trading-posts. Other French trading-posts were soon thereafter established among the Indians. Among these was the post of M. Charleville, the French trader who built the first store at Salt Lick on the Cumberland, where Nashville now stands. The English, in the meantime, were colonizing the country from the Atlantic seaboard westward, and in 1756 completed their first structure in Tennessee, when the first English settlements were made within its limits.

In 1772 the Watauga settlement established a free and independent Government with the first written Constitution adopted in America. This Government continued until the beginning of the Revolution in 1775, preserving its independence of all other Governments, including that of North Carolina, its mother colony, until the beginning of the conflict with Great Britain, when the Watauga and Nollachucky settlements of Tennessee formed themselves into the Washington District. In 1776 these settlements were annexed to the State of North Carolina and became Washington County. In 1779 a band of adventurous spirits from Watauga, led by James Robertson, known as "The Father of Tennessee", reached the present site of Nashville. The settlement was then called Nashboro. Captain Demonbreun, a Frenchman, had, however, established a post at the same place in 1775. In 1780 another band of colonists reached Nashville by way of the Cumberland and Tennessee Rivers, and in the same year a public meeting or convention was held in Nashville, which adopted articles of agreement for the common defense and general welfare, the control of this Government being vested in a court or government of notables, consisting of ten. This settlement was engaged in almost constant warfare with the Indians. In 1780 an army of Tennessee colonists was organized for service against the British. These colonists, having been isolated from the colony of North Carolina by the mountains, were up to this year so constantly engaged in resisting the attacks of the Indians, it was impossible to render much, if any, assistance directly against the British. However, after the defeat of the Revolutionary army by General Clinton in North Carolina, an army of Tennessee colonists, led by Colonel Isaac Shelby and Colonel John Sevier, advanced into North Carolina and after several successful engagements with detachments of the British army met and annihilated on King's Mountain an army of British veterans under command of the distinguished British officer, Colonel Ferguson. The skill and gallantry of the officers and the valour of the men of Tennessee in this battle mark it as one of the glorious events of the state's history.

In 1785 the territory including the State of Tennessee was ceded by North Carolina to the United States. Some dissatisfaction having arisen between the colonists of Tennessee and the Government of North Carolina, in August, 1784, a convention composed of delegates from several of the counties petitioned Congress to accept the cession of North Carolina and permit the inhabitants of the territory to form a government to be admitted into the Union as a state. In September of the same year a convention was held at Jonesboro, but adjourned without taking any decisive action. Another convention was held in the same place in November, 1785, and a provisional Constitution was put into operation. The new state was called "Frankland, the Land of the Free". The name was soon after changed or recognized as "Franklin", when or by whom cannot be accurately determined. North Carolina continued to legislate and execute her laws within the jurisdiction of Franklin, and a compromise was ineffectually attempted. Pending these negotiations and the operations of the contending Governments, control of the State of Franklin was generally recognized, peace was maintained among the colonists under the laws of Franklin, and a continuous Indian warfare carried on. The cession of North Carolina was attempted by Congress, 2 April, 1790, and the country was governed as a territory for six years, during which the Indian wars were constant and bloody. In 1813 news reached Nashville of the outbreak of the Indians in Alabama and several massacres by them of the whites, particularly the settlement at Fort Mimms near Mobile. A public meeting was held, resulting in a request to General Andrew Jackson to take command of an army of volunteers called by the Legislature of the State of Tennessee and enrolled in service after a few days. Although Jackson was then convalescing from wounds he had received in a fray with the Bentons, within nine days he took command of the volunteer army and proceeded against the Indians. After several encounters they were signally defeated and their power utterly and permanently broken at Enotachopco and Tohopeka on 24 and 27 January, 1813. It was the creation of this army under Jackson that gave Tennessee the name of "The Volunteer State".

On 8 Jan., 1815, Jackson with an army consisting largely of Tennesseeans fought the battle of New Orleans. The main attack of the British, who were commanded by Sir Edward Packingham, one of the ablest of Wellington's lieutenants and composed of veterans seasoned by the Napoleonic wars, was defeated by the Tennessee riflemen under Generals Carroll and Coffee. With the adoption of the Constitution of 1834 Tennessee entered upon a new epoch in her history and then became an important factor in national politics. Jackson was elected president in 1828 and re-elected in 1832. James K. Polk was elected president in 1844. Tennesseeans figured prominently in the Mexican War of 1847, 30,000 volunteers tendering their services upon the call of Governor Brown. On 9 Feb., 1861, an election was held upon the question of holding a convention to determine whether or not Tennessee should secede from the Union of States. The State refused to secede by a vote of 24,794 favouring secession to 88,803 in favour of the Union. After the proclamation of President Lincoln on 15 April calling for 75,000 troops, a series of proclamations were issued declaring the ports of the seceded states in a state of blockade and all vessels acting under the seceded states guilty of piracy. This announcement of the purpose of the Federal Government to resort to coercion produced a revolution of sentiment in Tennessee. The Legislature, convened in extra session 25 April, passed an ordinance of secession and submitted it to popular vote in an election to be held 8 June, 1861. The ordinance was ratified by a vote of 104,913 in its favour to 47,238 against it.

Meantime an intense Union sentiment developed extensively in east Tennessee. The leading statesmen of that section, Andrew Johnson, afterwards President of the United States, Wm. G. Brownlow, Thomas A. R. Nelson, and Horace Maynard, espoused the cause of the Union. A convention was held on 17 June, 1861, at Greenville, to consider the formation of a new state composed of east Tennessee and such adjoining counties of middle Tennessee as might vote to be included. The new state was never formed, but many east Tennesseeans joined the Federal army. Many of the bloodiest battles of the Civil War were fought within the borders of Tennessee: Fort Henry, Fort Donelson, Shiloh, Murfreesboro or Stone's River, Nashville, Franklin; the battle of Chickamauga was fought largely on the Georgia border and for the possession of Tennessee. On 15 Feb., 1862, in consequence of the fall of Fort Donelson, the Legislature adjourned to Memphis. On 22 Feb., 1862, Gen. Grant issued an order suspending civil government in Tennessee and declaring martial law. President Lincoln appointed Andrew Johnson, Brigadier-General and Military Governor of Tennessee. In 1865 the Constitution of the state was amended so as to abolish slavery, and also to prohibit the General Assembly from making laws recognizing the right of property in man. On 4 March, 1865, Governor Johnson was inaugurated as Vice-President of the United States, and on 5 April following, Wm. G. Brownlow was inaugurated governor.

Following the return of the Confederate soldiers the Legislature passed a number of enactments which were strongly opposed by the conservative wing of the Union, which led to sentiments of animosity more bitter than the feelings engendered by war. One of these laws practically disfranchised all persons except those who had always been unconditional Union men. Tennessee was readmitted to the Union, 23 July, 1866, Andrew Johnson, then President of the United States, signing the bill. Tennessee was the only one of the seceding states to abolish slavery by its own act. From the beginning of the slavery agitation there was a strong abolition party in Tennessee. In 1820, "The Emancipator", the first abolition journal in the United States, was published by Elihu Embry at Jonesboro. The Ku Klux Klan was organized in Pulaski, middle Tennessee, in the summer of 1866, and was originally intended for the amusement of a band of young men who had returned from the Confederate army. It afterwards spread throughout the South, becoming a strongly partisan organization operated for the protection of Confederate sympathizers against the evils and dangers of the period. In 1869 the Confederate element regained control of the State, and on 10 June, 1870, another constitutional convention was held. The Constitution there adopted was ratified by the people, 26 March, 1871, and is still in force.

III. Population.—The population of the state under the federal census of 1900 was 2,020,616: 1,021,224 males and 999,392 females; of whom 2,002,870 were native born: 1,010,793 males and 992,077 females. The coloured population, including mulattoes, Chinese, and others not of the white race, was 480,430: 238,522 males and 241,908 females. In 1910 the population was 2,184,789, an increase of 8.1 per cent.

IV. Resources.—The resources of Tennessee are abundant, rich, and varied. In the eastern and a large part of the middle divisions minerals abound in practically inexhaustible beds, principally coal, iron, copper, lead, and zinc. Oil and natural gas is found in some sections. There are over 200 varieties of marble found in Tennessee. In middle Tennessee grass and grain are abundant and the stock-breeding interests in this section are famous. Here phosphate rock in great volume and richness is found. In west Tennessee fruits and grain are extensively produced. The principal products of this section are cotton and corn. The timber interests of the state are large and extensive, numerous forests in various sections of the state (poplar, oak, gum, hickory, and other varieties of timber) being untouched. The chief agricultural products are cotton, wheat, hay, corn, forage, and tobacco. The value of these products, according to the census of 1900, was $70,745,242. Animal products such as dairy, poultry, eggs, honey, and wax amount to $35,421,198. The chief manufactories are flour and grist mills, producing annually, according to the census of 1900, products valued at $21,798,929: lumber and timber, $18,127,784; tobacco, snuff, cigars, etc., $3,010,602. These with other manufactures make an annual production valued at $108,144,565. The productions of the mines were: coal, $5,399,721; phosphate rock, $1,308,872; iron, $1,123,527; marble, $518,256; limestone and dolomites, $482,033; all others, $761,373, aggregating $9,533,782.

V. Education.—With a scholastic population of 771,734, of which 587,088 are white and 184,646 coloured, there are enrolled in the public schools of Tennessee, 411,910 white and 100,248 coloured pupils. There are over 200 universities, colleges, and private training schools in the state. Its universities are among those leading in the South, notably: Vanderbilt University, University of Nashville, and Peabody Normal College at Nashville; University of the South at Sewanee; University of Tennessee at Knoxville; Cumberland University at Lebanon; Fisk, Roger Williams, and Walden Universities and Meharry Medical College at Nashville, the last four being devoted to the higher education of negroes. For Catholic education, diocese and population see Nashville, Diocese of.

VI. Religion and Religious Regulations.—The present Constitution of the State of Tennessee declares that "all men have a natural and indefeasible right to worship Almighty God according to the dictates of their own conscience; that no man can of right be compelled to attend, erect or support any place of worship or maintain any minister against his consent; that no human authority can, in any case whatever, control or interfere with the rights of conscience; and that no preference shall be given by law to any religious establishment or mode of worship. That no political or religious test, other than an oath to support the Constitution of the United States and of this state, shall ever be required as a qualification to any office or public trust in this state". Christmas Day and Good Friday are legal holidays. Doing or exercising on Sunday any of the common avocations of life, acts of real necessity or charity excepted, is forbidden. The mere violation of this law is not indictable, but a succession of such acts, if done so openly as to attract public observation, is indictable as a nuisance. It is forbidden by law to swear profanely or curse in the hearing of any justice of the peace or to use profane or blasphemous language in public places; any person executing any public duty, convicted of profanely swearing or cursing, must forfeit and pay one dollar for each oath or curse. There is no provision in law for the use of prayer in the Legislature, but the rules of each branch usually provide for the appointment of a chaplain by the respective speakers. There is no statute in this state modifying the rule at common law requiring a clergyman to disclose communications made in confessions. The question has not been decided by its courts, but it is probable that when the question is presented the courts of the state will follow the rule generally adopted by the courts of other states on this subject, which is, that all communications in the nature of confessions or applications for spiritual guidance, made to a priest or clergyman as such, in confidence and in the course of the discipline required by the church of which the clergyman is a member, are privileged.

According to the census bulletin of 1906, the church membership of all denominations was 697,570: total Protestant bodies, 677,947: Baptists, Southern and National conventions, 253,141; Free Baptists, 1,840; Free Will Baptists, 3,093; Duck River, etc. (Baptist Church of Christ), 4,099; Primitive Baptists, 10,204; coloured Primitive Baptists, 3,268; Congregationalists, 2,426; Disciples of Christ, 14,904; Churches of Christ, 41,411; Lutheran, United Synods in the South, 1,678; Methodist Episcopal, 46,180; Methodist Protestant, 2,716; Methodist Episcopal Church South, 140,308; African Methodists, 50,662; Presbyterian Church in U. S. A., 6,786; Cumberland Presbyterians, 42,464; Presbyterian Church in U. S., 21,390; Coloured Cumberland Presbyterians, 6,640; Presbyterian, Associated Reformed Synod of the South, 1504; Protestant Episcopal Church, 7874; United Brethren in Christ, 2875; other Protestant bodies, 12,484; Roman Catholic Church, 17,252; Jewish congregations (heads of families), 919; all other bodies, 1452.

VII. State Laws.—A. *Oaths* are to be administered upon the New Testament in the usual form, kissing the book as seal of confirmation of the same. Those conscientiously scrupulous about taking the book oath may be sworn by calling on God to witness the truth of the statements to be made. Persons conscientiously scrupulous about taking an oath may make solemn affirmation in the words required. Persons may also be sworn according to the forms of their own country or particular religious creed.

B. *Marriage* cannot be contracted with a lineal ancestor or descendant, nor a lineal ancestor or descendant of either parent, nor the child of a grandparent, nor the lineal descendant of the husband or wife as the case may be, nor the husband or wife of the parent or lineal descendant. The intermarriage of white persons with negroes, mulattoes or persons of mixed blood descended from a negro to the third generation inclusive, or their living together as man and wife in this state is prohibited and punishable by imprisonment in the penitentiary. A second marriage cannot be contracted before a dissolution of the first, but the first shall be regarded as dissolved for this purpose if either party has been absent five years and is not known to the other party to be living. All regular ministers of the Gospel of every denomination, and Jewish rabbis, having the care of souls, all justices of the peace, judges, chancellors, the governor, speaker of the Senate, and speaker of the House of Representatives may solemnize the rite of matrimony. No formula need be observed for such solemnization, except that the parties shall respectively declare in the presence of the minister or officer, that they accept each other as husband or wife.

C. *Divorce.*—The following are causes of divorce from the bonds of matrimony: impotency or incapacity; second marriages in violation of previous marriage still subsisting; adultery; wilful and malicious desertion; absence of either party without reasonable excuse for two years; conviction of crime which, by the laws of the state, renders the party infamous; conviction of any crime which, by the laws of the state, is declared a felony and sentenced to confinement in the penitentiary; if either party has attempted the life of the other by poison or other means showing malice; refusal on the part of the wife to remove with her husband to this state, without reasonable excuse, and wilfully absenting herself from home for two years; that woman was pregnant at time of marriage by another person without knowledge of her husband; habitual drunkenness acquired after marriage. The following are causes of divorce from bed and board and from the bonds of matrimony at the discretion of the court: if the husband is guilty of such cruel and inhuman treatment or conduct towards his wife as renders it unsafe and improper for her to cohabit with him and to be under his domination and control; that he has offered such indignities to her person as to render her condition intolerable and thereby force her to withdraw; that he has abandoned her or turned her out of doors and refuses or neglects to provide for her. The petitioner must reside within the state for two years next preceding the filing of the petition. If upon false rumour, apparently well founded, of the death of one of the parties who has been absent two whole years, the other party marries again, the party remaining single may upon returning obtain a restoration of conjugal rights or a dissolution of the marriage. This dissolution of a marriage shall not in any wise affect the legitimacy of the children of same.

D. *Wills* may be verbal or written, but a verbal will is valid only so far as relates to personal property. A nuncupative or verbal will is a verbal declaration made by one in his last sickness as to the disposition of his property after death, made with the intention and purpose to dispose of such property, and where the estate exceeds $250 it must be made in the hearing and presence of at least two disinterested persons. Lands can be devised only by a written will attested by two witnesses, the subscription of the witnesses being made in the testator's presence; or by holographic will, a paper written entirely by the testator, the handwriting to be proved by at least three credible witnesses, every part of such writing to be in the testator's hand. Personalty may be disposed of by a paper containing a disposition of property to take effect after death, although neither written nor signed by the testator, if such paper can be shown to be the will of the testator and is complete in itself as to its provisions. No particular form is required.

E. *Cemeteries.*—All managers and trustees of any cemetery have full power to adopt and use all rules and regulations necessary for the good government, order, and discipline of the cemetery under their charge and keeping, not in conflict with any law of the state. They may appoint as many day and night watchmen on their grounds as they deem expedient. Such watchmen, and also all of their superintendents, gardeners, agents, and gate-keepers stationed on said grounds, may take the oath required by law of constables, exercise and possess all the powers of police officers within said cemetery and within one hundred yards of said cemetery grounds.

F. *Pensions.*—The State has a pension system under which pensions are allowed to disabled soldiers, Federal and Confederate, that enlisted from the State of Tennessee in Tennessee regiments or were citizens of this state at the time of their enlistment in regiments of other states. They must be residents of Tennessee, or former citizens of other states who enlisted in some regiment and who have been citizens of this state for one year. The character of the applicants as soldiers must have been free from dishonour, and it must appear that they are not already entitled to pension under the laws of the Federal Government or of any other state, and that they are not already in possession of a competency, the object of the law being to provide for the indigent and disabled. A pension is withheld from any pensioner who may habitually waste the state's bounty in dissipation or other dishonourable manner. Pensions are also granted to widows whose husbands were killed or died while in active service in the Civil War, and to the widows of deceased soldiers who were married to such soldiers prior to the year 1870, if such widows are of good moral character and in indigent circumstances. The number on the pension rolls for 1910 was 7899, of which 5367 were veterans and 2530 widows. The annual appropriation for this purpose is $475,000.

G. *Excise.*—By Acts of 1909 the sale of any intoxicating liquor, including wine, ale, and beer, within four miles of any public or private schoolhouse where school is kept, whether the school be then in session or not, is prohibited. At the same session an Act was passed prohibiting the manufacture of such liquors in the state. These measures virtually prohibit the sale or manufacture of liquor anywhere in the state.

VIII. Prisons.—The state penitentiary is at Nashville. A branch prison is located at Brushy Mountain, east Tennessee, where the State owns extensive coal mines, in which a large number of prisoners are worked. The operation of these mines has been very profitable to the State. At the main prison are a number of manufactories operated by lessees of convict labour. There is also a large farm connected with the penitentiary on which convict labour is employed. The affairs of the penitentiary are administered by a commission of three, appointed by the governor.

IX. Charities.—A. *Associations.*—Any association of individuals for the support of public worship, to build churches, and for the maintenance of all missionary undertakings may be incorporated. All property belonging to any religious, charitable, scientific, literary, or educational institution is exempt from taxation, except such part thereof as is used in secular business to compete with a like business which pays taxes to the State. Where rents and profits are used exclusively for religious or charitable purposes, including church parsonages not exceeding $5000 in value, and in cases where buildings are used partially for the purposes named and other portions rented out or otherwise used, the assessor shall, in making assessment, apportion the same and assess that portion for taxation which is under this section taxable. All property belonging to any of the above-named institutions and not used for any purpose is not exempt. All clergymen are exempt from jury service.

B. *Trusts.*—The general rule is that a trust for a charitable purpose must be of such a tangible nature that a court of equity can deal with it. It must be to some person, body, or association of persons having a legal existence and with capacity to take and administer the trust for some definite and lawful purpose. A devise or bequest made directly to a voluntary or unincorporated association must fail for want of capacity in the devisee to take it as a gift for itself; but if the gift be sufficiently definite and made to competent trustees for the benefit of the unincorporated institution or association it will be good, that is, if the will defines how such bequest is to be applied. The distinction taken in England between superstitious and charitable uses, being inconsistent with the principles of religious freedom that obtain in this state, is not recognized. Gifts for the good of the soul, or for prayers for the soul of the testator, or for the dead whether in or out of the chapel or church, or for the maintenance of Catholic priests are valid. A charitable use, where neither law nor public policy forbids, may be applied to almost anything that tends to promote the well-being and well-doing of social man and in favour of all religions of whatever form and creed.

C. *Institutions.*—There are three hospitals for the insane, one in each of the civil divisions of the state: at Bolivar, Nashville, and Knoxville. A Confederate Soldiers' Home and a home for blind girls is maintained at Nashville; also a school for blind boys and girls and an industrial school for boys and girls, both white and coloured at the same place. A school for the deaf and dumb is maintained at Knoxville.

Thos. J. Tyne.

Tenney, William Jewett, author, editor, b. at Newport, Rhode Island, 1814; d. at Newark, New Jersey, 20 Sept., 1883. Graduating from Yale in 1832 he studied medicine, but abandoned it for the law and, on being admitted to the bar, opened an office in New York. He then tried journalism on the editorial staff of the "Journal of Commerce," and contributed editorially to the "Evening Post", during 1841–43 and 1847–48. In 1853 he entered the service of D. Appleton and Co., publishers, as editor, and, in addition to a large amount of literary and critical work, began for them, in 1861, the compilation of the "Annual Cyclopædia" which he continued till his death. He indexed T. H. Benton's "Abridgment of the Debates of Congress" and added a sixteenth volume to the series (New York 1857–60). He edited the "Queens of England" (1852); and wrote a "Military and Naval History of the Rebellion in the U. S." (1865), and a "Grammatical Analysis" (1866). During a long residence at Elizabeth, N. J., he held several local public offices including that of collector of the port during President Buchanan's administration. He became a convert to the Catholic Faith and married, as his second wife, Sarah, daughter of Orestes H. Brownson (q. v.).

Thomas F. Meehan.

Tentyris (Tentyra), seat of a titular suffragan see of Ptolemais in Thebaid Secunda. The city was the capital of the nome of that name, according to Amélineau, the real name being Nikentori or Nitentori, which signifies willow wood or willow earth. Others give the derivation from the goddess Hathor, or Aphrodite, who was specially worshiped there. The crocodile is recognized as the deity of the city and was also venerated as such in the other Egyptian cities, which caused many quarrels, notably with Ombos. Little is known of Christianity in that place, as only the names of two ancient bishops are given: Pachymius, companion of Melece at the beginning of the fourth century; and Serapion, or Aprion, contemporary and friend of the monk St. Pachomius, who had in his diocese his celebrated convent of Tabennisi. It is to-day Denderah, a town of 6000 inhabitants in the district of Qeneh. The temple of Hathor is still to be seen, built on the foundation of another, yet more ancient, which was in existence during the reign of Cheops under the fourth dynasty, and in which was found the celebrated zodiac now in Paris; there are also the temples of Mammisi and of Isis, of the Roman or Ptolemaic epoch.

S. Vailhé.

Tenure, Ecclesiastical.—I. In the feudal system an ecclesiastical fief followed all the laws laid down for temporal fiefs. The suzerain, e. g. bishop, abbot, or other possessor, granted an estate in perpetuity to a person, who thereby became his vassal. As such, the grantee at his enfeoffment did homage to his overlord, took an oath of fealty, and made offering of the prescribed money or other object, by reason of which he held his fief. These requirements had to be repeated as often as there was a change in the person of the suzerain or vassal. These fiefs were granted by churchmen to princes, barons, knights, and others, who thereupon assumed the obligation of protecting the church and domains of the overlord. This system of feudal tenure was not always restricted to lands, as church revenues and tithes were often farmed out to secular persons as a species of ecclesiastical fief. Strictly speaking, however, a fief was usually defined as immovable property whose usufruct perpetually conceded to another under the obligation of fealty and personal homage. A fief was not ecclesiastical simply because its overlord was a churchman; it was requisite also that the domain granted should be church property. Lands, which belonged to the patrimony of an ecclesiastic, became a secular fief if he bestowed them on a vassal.

All fiefs were personal and hereditary, and many of the latter could be inherited by female descent. Fiefs bestowed by the Church on vassals were called active fiefs; when churchmen themselves undertook obligations to a suzerain, the fiefs were called passive. In the latter case, temporal princes gave certain lands to the Church by enfeoffing a bishop or abbot, and the latter had then to do homage as pro-vassal and undertake all the implied obligations. When these included military service, the ecclesiastic was empowered to fulfil this duty by a substitute. It was as passive fiefs that many bishoprics, abbacies, and prelacies, as to their temporalities, were held of kings in the medieval period, and the power thereby acquired by secular princes over elections to ecclesiastical dignities led to the bitter strife over investitures. These passive fiefs were conferred by the suzerain investing the newly-elected churchman with crozier and ring at the time of his making homage, but the employment of these symbols of spiritual power gradually paved the way to exorbitant claims on the part of the secular overlords (see INVESTITURES, CONFLICT OF). Among papal fiefs were included not merely landed estates, however vast, but also duchies, principalities, and even kingdoms. When the pope enfeoffed a prince, the latter did homage to him as to his liege lord, and acknowledged his vassalage by an annual tribute. Pius V (29 Mar., 1567) decreed that, in future, fiefs belonging strictly to the Patrimony of St. Peter should be incorporated with the Pontifical States whenever the vassalage lapsed, and that no new enfeoffment take place. John, King of England, declared that he held his realm as a fief from the pope in 1213, and James II, King of Aragon, accepted the same relation for Sardinia and Corsica in 1295. The most famous papal fief was the Kingdom of Naples and Sicily, springing from investitures of 1059 and 1269. Modern conditions in Italy have made impossible any continuance of such feudal relations.

II. As to the tenure by which church lands are now held by legal titles before the civil law, see PROPERTY, ECCLESIASTICAL; and TRUSTEE SYSTEM.

III. For the perpetual tenure by incumbents of benefices and ecclesiastical dignities, see BENEFICE.

W. H. W. FANNING.

Teos, titular see, suffragan of Ephesus in Asia Minor. A city of Caria, situated on a peninsula opposite Samos, it was an asylum for the Greeks, likewise for the Minyæ of Orchomenos; then came colonies from Ionia, Athens, and Bœotia and gradually the population became Grecian. This very prosperous city was one of the first attacked by the Persians; the inhabitants fled into Thrace and founded Abdera, during the reign of Cyrus. Those who remained in Teos allied themselves with the Athenians. Later they revolted, going over to the Spartan rule, but were afterwards reconquered by the Athenians. The walls, recently discovered, 3¾ miles in circumference, date from this time, as do also the greater part of the monuments which made it one of the most beautiful cities of Ionia. Teos was celebrated for its wine and, therefore, for the worship of Bacchus. Here was born the poet Anacreon. Here too was the home of a body of bacchanalian artists who furnished actors for the theatres of Asia and the Archipelago. It was the beginning of the ancient theatre. In order to further commerce and the pursuit of the fine arts, Teos, after having saved the fleet of the Roman prætor Regulus from Antiochus, King of Syria, secured for its territory in 193 B. C. from Rome and a great number of Grecian cities the right of perpetual asylum, this privilege being largely due to the temple of Bacchus. During the Christian era almost nothing is known of this city. It figures in all the "Notitiæ Episcopatuum" as a suffragan of Ephesus, but in the fifteenth century no mention is made of it. Teos is believed to have been destroyed by an earthquake. Among its bishops Le Quien (Oriens christianus, I, 727) mentions: Maximus at the Council of Nice; Gennadius at Chalcedon, 451; finally St. Sisinnius, who is said to have lived about the eleventh century, and whose feast days are 2 February and 14 July, at Torcelli near Venice. To-day Teos is known as Sighadjik, near Sivri-Hissar; it is a nahié of the sanjak of Smyrna; its ruins have furnished a great many inscriptions.

S. VAILHÉ.

Tepic, DIOCESE OF (TEPICENSIS).—Diocese of the Mexican Republic, suffragan of the Archbishopric of Guadalajara. Its area is that of the federal state of the same name, that is, 10,951 sq. m., besides a few parishes situated in the western part of Jalisco. It has a population of 171,837 inhabitants (Census of 1910). The principal city which is also the residence of the bishop and the political head is Tepic, 3146 feet above sea level and has 16,805 inhabitants. All this territory was discovered and devastated and the natives cruelly treated by the famous Nuno de Guzman in 1530. It is said that during the conquest, many plots and even attempts at insurrection were made, not only by the allied Indians but also by the Spanish themselves. To check this evil, some were hanged and others were put in prison; many were tortured to obtain confessions as to the instigators of these conspiracies, the object of which in most cases was to return to Mexico. These cruelties caused such despair among the Indians who carried the supplies of the expedition that a great many committed sucide by hanging themselves in groups of ten. The Spanish had already established themselves, and cities such as Tepic, Compostela, S. Blas, Acaponetam, etc. had already been founded when religious services were established. These soon developed and thrived after the foundation of the Bishopric of Guadalajara in 1548.

The mountainous region of the wonderful provinces of Nayarit, inhabited by barbarous and ferocious tribes of Indians, were still remaining refractory to civilization and Christianity. In 1668 the Franciscan Fathers J. Caballero and Juan B. Ramirez attempted, but in vain, to penetrate these mountains. The venerable Father Margil of the convent of Zacatecas also tried to reach these regions in 1711, but he was forced to retreat without satisfaction. Nayarit, which belonged to the Bishopric of Durango since its creation in 1620, remained so until the Bishop of Durango gave the mission of civilizing this wild country to Father Tomas de Solchaga, S.J., professor of moral theology at the college at Durango; he was successful in penetrating the country to the heart of the mountains and there began to sow fruitful seeds in 1716. When the Marquis of Valero was Viceroy of New Spain he received through the royal cedula of Philip V an order to subdue the Indians of that territory and make them swear allegiance to the Spanish monarch; after many bloody battles and with many difficulties and hardships, he succeeded, with the help of his brave captains in taking possession of the famous Mesa del Tonatiy. At his request the Father Provincial of the Society of Jesus of New Spain sent several missionaries to convert the newly-conquered Indians. They soon established flourishing missions which, when the Jesuits were expelled by the Decree of Charles III, included the following missions: Santa Rita, Santa Teresa, Iscatán, Jesus María, SSma. Trinidad, Giuanamota, and Rosario. After the expulsion of the Jesuits the parish priest of Bolaños on several occasions visited the reductions. The Franciscan Fathers took charge of the missions until the year 1807, when the Fathers of the College of Nuestra Señora de Zacatecas returned and remained until the mother-house at Zacatecas was abolished.

In 1891 Leo XIII created the Diocese of Tepic which became suffragan of the Archbishopric of Guadalajara; it was completed with several parishes situated in the present State of Jalisco. The bishopric has 1 seminary and 72 alumni; 23 Catholic schools and 6 Catholic colleges with about 3,000 alumni. The present bishop is the Rt. Rev. Andrew Segura, who was consecrated, 16 Sept., 1906. There are 3 Protestant churches.

CAMILLUS CRIVELLI.

Tepl, a Premonstratensian abbey in the western part of Bohemia, included in the Archdiocese of Prague; it was founded in 1193 by the blessed martyr Hroznata, a Bohemian nobleman (d. 1217). The first monks came from the Abbey of Strahov in Prague. Tepl escaped any damage in the Hussite Wars, probably on account of the military spirit of its Abbot, Račko of Risenberg (1411–44), who was aided by his relatives. It suffered, however, all the more during the era of the Reformation. Luther's doctrine soon found adherents among the subjects of the abbey. In 1525 there was a rebellion against the abbot and peace was not restored until the ringleaders of the revolt were executed. In the following years a number of the monks left the order and married. Monastic discipline was restored by Abbot Johann Kurz (1555–59), who also established a theological school. But his successor, Johann Meyskönig (1559-85), had a struggle with insubordination in the monastery. With the aid of the archbishop he was able to improve the monastery and the school. He brought back most of his subjects to the Catholic Church by compulsion, after gentle treatment had failed. The reform was continued by Mathias Göhl (1585–96). Andreas Ebersbach (1598–1629) was a zealous reformer of the abbey and raised it to such a height that it was called the "nursery of pastoral work". Parochial work and higher education are still important features of the life of the abbey. The abbey has the pastoral care of twenty-four parishes that are all in the western part of Bohemia, a section which is almost entirely German. A twenty-fifth parish is being formed. The abbey has a theological school of the order with a two-years' course and three professors. Since 1809 it has had charge of the German *gymnasium* at Pilsen where there are fourteen canons. It also owns the celebrated cure of Marienbad. It supports hospitals at Tepl and Marienbad. The members of the abbey include 84 priests, 13 clerics, and 2 novices. The present monastery building was erected by Abbot Raimund Wilfert II (1688–1724); the library was built by Abbot Gilbert Helmer (since 1900). The Romanesque church, with additions in the style of the transition to the Gothic, is one of the oldest churches of Bohemia.

KLEMENS LÖFFLER.

Teramo, DIOCESE OF, in southern Italy. In the past the city was injured by earthquakes. It is situated at the confluence of the Tordino and the Vessola in a very fertile district, and was formerly noted for its manufacture of delf; ore is found in the vicinity. The cathedral is far from being uniform in style, the façade being like a fortress wall in which a Gothic gate had been constructed; it contains, however, several works of art, among them the tomb of Bishop Nicola Arcioni (1317). The Churches of S. Domenico and of S. Francesco are also worth visiting. In ancient days it was called Interamnia and was the seat of government of the Præcutii, a Samnite people; in 315 B. C. a Roman colony, Interamnia Præcutiana, was settled there; from them is derived the name of the entire region, Abruzzi, a name already adopted in the sixth century. Among the ruins of the Roman period are an amphitheatre, a theatre, and an aqueduct. After the Longobard invasion it became the residence of a *gastaldo*, depending on the Duke of Spoleto; under the Franks it was the seat of a count. In the beginning of 1108 it was annexed by the Normans; in 1155 Count Loretello rebelled against King Roger and destroyed the city, soon rebuilt through the efforts of Bishop Guido (1122), for which he and his successors were granted the investiture of the principality. Probably at this time arose the custom of the bishops of Teramo of pontificating armed and having arms also on the altar. Hardly had the town risen again when it began a series of quarrels with Ascoli, which more than once threatened to become sanguinary. Teramo resisted till the end of 1270 during the Angevin invasion. A little later the bishops abandoned their temporal sovereignty and a royal captain was installed. In the beginning of the fifteenth century the Melatino, di Janni, and Acquaviva began to struggle for possession of the town. In 1416 it was sacked by Lordino, a Frenchman, exasperated by being deprived of the title of high constable of the kingdom; during the pillage the treasures of the cathedral, including a precious silver altar frontal, disappeared.

The city which at that time contained 70,000 inhabitants began to decay. From 1438 till 1443 it belonged to the principality which Francesco Sforza had formed in the Marches. Alfonso made it the capital of the Abruzzi, and in 1459 Giosia Acquaviva was made Duke of Teramo, against the will of the citizens. The following year it was taken by Piccinino for Réné of Anjou; in 1461 it was retaken by Matteo di Capua. In 1519 Andrea Acquaviva assumed anew the lordship of Teramo and besieged the town; but he was forced to resign. About 600 A. D., according to St. Gregory the Great, the Abruzzian church having been long without a bishop, the election of Opportunus was procured; hence the origin of the see dates back to the fifth century at least, and the bishop's title was taken not from the town but from the district. It may be even more ancient. Among its other prelates were: St. Berardus (1115), descended from the family of the Counts dei Marsi; Matteo de Balato (1251), captured during the inroad of the Ascolani and liberated through the intervention of Innocent IV; Blessed Antonio Fatati (1450), counsellor of King Alfonso I; Gian Ant. Campano (1463), a littérateur and poet; Giacomo Silveri-Piccolomini (1553), distinguished at the Council of Trent; Leonardo Cassiani (1693), who improved the state of the clergy; Michele Milella (1859), incarcerated by the new government in 1861. In 1818 the Diocese of Ortona, which is now only an archipresbyteral church, was incorporated with the See of Teramo. The latter is immediately subject to the Holy See and contains 121 parishes, 220 secular and 13 regular priests, 3 houses of religious and 1 of monks, 2 institutes for boys and 4 for girls.

U. BENIGNI.

Terce.—The origin of Terce, like that of Sext and None, to which it bears a close relationship, dates back to Apostolic times. As has already been stated (see NONE) according to an ancient custom of the Romans and Greeks, the day and the night respectively were divided into four parts of about three hours each. The second division of the day hours was that of Terce from nine o'clock until midday. These divisions of the day were also in vogue among the Jews at the time of Christ. In the New Testament we find mention of the sixth hour in Matt., xx, 5; xxvii, 45; Mark, xv, 33; John, xix, 14; of the ninth hour, in Matt., xxvii, 46; Mark, xv, 34; Acts, x, 3 and 30. (See NONE.) The hour of Terce is mentioned in the following passages: the householder hires labourers at the third hour, Matt., xx, 3; Jesus is crucified at the third hour, Mark, xv, 25; the Holy Ghost descends upon the Apostles on the day of Pentecost at the third hour, Acts, ii, 15. Some of these texts prove that these three hours were, in preference to others, chosen for prayer by the Christians, and probably also by the Jews, from whom the Christians appear to have borrowed the custom. We find frequent mention in the Fathers of the Church and the ecclesiastical writers of the third century of Terce, Sext, and None as hours for daily prayers. For example, Tertullian, Clement of Alexandria, and the Canons of Hippolytus (see Clement, "Stromat.", VII, vii, in P. G., IX, 455-458). Tertullian says expressly that we should always pray, and that there is no prescribed time for prayer, but adds: "As regards the time, there should be no lax observation of certain hours—I mean, of those common hours which have long marked the divisions of the day, the third, the sixth, and the ninth—and which we may observe in Scripture to be more solemn than the rest" (De Orat., XXXIII, xxv, in P. L., I, 1191–1193).

Clement and Tertullian in these passages refer only to private prayer at these three hours. The Canons of Hippolytus also speak of these three hours as suitable for private prayer. However, on the days called "days of station", that is to say Wednesday and Friday, which were set apart as especially consecrated to prayer, and Sunday, these hours were recited in public (Canon, xx, xxvi). St. Cyprian remarked that these three hours had been observed in the Old Testament, and that Christians should also observe them (De Oratione, XXXIV, in P. L., IV, 541). In the fourth century the custom of praying at these hours became more frequent, and even obligatory, at least for monks (see the texts of the Apostolic Constitutions, of St. Ephrem, of St. Basil, of the author of "De Virginitate" quoted in Bäumer-Biron, "Histoire du bréviaire", 116, 121, 129, 186). Our texts say nothing as to what were the elements of the prayer of Terce, Sext, or None before the fourth century. Doubtless, like all prayers at that time, they were composed of psalms, canticles, hymns, and litanies. It is from the fourth century onwards that we can gather a more precise idea as to the composition of the hour of Terce. In the fourth century, as we have said, the custom of prayer at Terce spread, and tended to become obligatory, at least for monks. There is no mention in the "Peregrinatio ad Loca Sancta" of an office of Terce on ordinary days. Some authors have misunderstood the text here, but there is no mention of a meeting at this hour, except on Sunday and during Lent (see Cabrol, "Etude sur la Peregrinatio Silviæ", Paris, 1895, p. 45, 46). The hour of Terce is also mentioned in St. Jerome, "Ep. ad Lætam." in P. L., XXII, 875; "Ep. ad Eustoch." in P. L., XXII, 420; in the Life of St. Melania the Younger, "Analecta Bollandiana", VIII, 1889, p. 16; in Cassian, "De instit. cœnob.", in P. L., LXIX, 112, 126, etc.

At this period it is composed of the same elements as the hours of Sext and None; the distribution is the same, and it is clear that the three "little hours" were composed at the same time and that they have the same origin. The psalms of Terce are different from those of the other two hours. There were also certain varieties of composition. Thus, in certain countries, three psalms were assigned to Terce, six to Sext, nine to None, in virtue of the symbolism.

The composition varies also in the various liturgies. In the Greek Church Terce is composed of two parts, each made up of psalms (two for the first, three for the second), with invitatory, troparia, and final prayer. (See Neale and Littledale, "Commentary on the Psalms", I, p. 34.) In the Benedictine Rite, Terce comprises, on week days, the Gradual Psalms, 119, 120, and 121, with a capitulum, verse, Kyrie, Pater, and prayer. On Sundays and Mondays the Gradual Psalms are replaced by three octonaries (i. e. three sections of eight verses each) of Psalm cxviii. In the Mozarabic Rite, three octonaries of Ps. cxviii are also recited, the composition otherwise differing very little. In the main, the recitation of three psalms at Terce, as at the other two "little hours" of the day, is founded on a universal and very ancient tradition. Divergencies on this point are only exceptional. The practice of the Roman Liturgy, which at first sight appears to be somewhat different, may be traced to this tradition also. In this rite a part of Ps. cxviii is recited at Terce as well as at the other "little hours", the psalm being divided into three double octonaries. After the new Psalter arranged in 1911–12, the psalms are: on Sunday, Ps. cxviii (three divisions); on Monday, Ps. xxvi (two divisions); on Tuesday, Ps. xxxix (three divisions); on Wednesday, Ps. liii (two divisions); on Thursday, Ps. lxxii (three divisions); on Friday, Ps. xxxix (two divisions); on Saturday, Ps. ci (three divisions). The number three is therefore preserved in each case. The hymn "Nunc Sancte nobis Spiritus" recalls the descent of the Holy Ghost upon the Apostles. The other elements are the same as for Sext and None.

The Fathers of the Church and the liturgists of the Middle Ages considered the hour of Terce as corresponding to the hour of Christ's condemnation to death. They also often point out on this occasion the mysteries of the number three, which in ecclesiastical symbolism is a sacred number (see Bona, loc. cit.). What gives to it its especial dignity, however, is its association with the Descent of the Holy Ghost upon the Apostles on the day of Pentecost at this very hour ("seeing it is but the third hour of the day", Acts, II, 15). In several liturgies, and particularly in the Roman, this connexion is brought to mind by one or other of the formulæ. Again, this is the reason why, from the earliest times, the hour of Terce was chosen as that of the Mass on feast days. Sometimes, also, this hour is called in liturgical language *hora aurea* or *hora sacra* (see Durandus, "De rit. eccles.", c. viii).

F. Cabrol.

Terenuthis, titular see, suffragan of Antinoë in Thebais Prima. Le Quien (Oriens christ., II, 611) mentions two of its bishops: Arsinthius in 404; Eulogius at the Council of Ephesus in 431. The monks sometimes sought refuge there during incursions of the barbarian Maziks (Cotelier, "Ecclesiæ græcæ monumenta", I, 393). John Moschus went there at the beginning of the seventh century (Pratum spirituale, LIV, CXIV). There is frequent mention of this town in Christian Coptic literature. The present village of Tarraneh in the Province of Beherah replaces Terenuthis, the ruins of which lie about a mile and a quarter to the west. It has 1330 inhabitants. About nine and a quarter miles distant are the Lakes of Nitria and Scetis, near which were the lauras of these names.

S. Vailhé.

Teresa of Jesus, Saint (Teresa Sanchez Cepeda Davila y Ahumada), b. at Avila, Old Castille, 28 March, 1515; d. at Alba de Tormes, 4 Oct., 1582. The third child of Don Alonso Sanchez de Cepeda by his second wife, Doña Beatriz Davila y Ahumada, who died when the saint was in her fourteenth year, Teresa was brought up by her saintly father, a lover of serious books, and a tender and pious mother. After her death and the marriage of her eldest sister, Teresa was sent for her education to the Augustinian nuns at Avila, but owing to illness she left at the end of eighteen months, and for some years remained with her father and occasionally with other relatives, notably an uncle who made her acquainted with the Letters of St. Jerome, which determined her to adopt the religious life, not so much through any attraction towards it, as through a desire of choosing the safest course. Unable to obtain her father's consent she left his house unknown to him on 2 Nov., 1535, to enter the

Carmelite Convent of the Incarnation at Avila, which then counted 140 nuns. The wrench from her family caused her a pain which she ever afterwards compared to that of death. However, her father at once yielded and Teresa took the habit.

After her profession in the following year she became very seriously ill, and underwent a prolonged cure and such unskilful medical treatment that she was reduced to a most pitiful state, and even after partial recovery through the intercession of St. Joseph, her health remained permanently impaired. During these years of suffering she began the practice of mental prayer, but fearing that her conversations with some worldly-minded relatives, frequent visitors at the convent, rendered her unworthy of the graces God bestowed on her in prayer, discontinued it, until she came under the influence, first of the Dominicans, and afterwards of the Jesuits. Meanwhile God had begun to visit her with "intellectual visions and locutions", that is manifestations in which the exterior senses were in no way affected, the things seen and the words heard being directly impressed upon her mind, and giving her wonderful strength in trials, reprimanding her for unfaithfulness, and consoling her in trouble. Unable to reconcile such graces with her shortcomings, which her delicate conscience represented as grievous faults, she had recourse not only to the most spiritual confessors she could find, but also to some saintly laymen, who, never suspecting that the account she gave them of her sins was greatly exaggerated, believed these manifestations to be the work of the evil spirit. The more she endeavoured to resist them the more powerfully did God work in her soul. The whole city of Avila was troubled by the reports of the visions of this nun. It was reserved to St. Francis Borgia and St. Peter of Alcantára, and afterwards to a number of Dominicans (particularly Pedro Ibañez and Domingo Bañez), Jesuits, and other religious and secular priests, to discern the work of God and to guide her on a safe road.

The account of her spiritual life contained in the "Life written by herself" (completed in 1565, an earlier version being lost), in the "Relations", and in the "Interior Castle", forms one of the most remarkable spiritual biographies with which only the "Confessions of St. Augustine" can bear comparison. To this period belong also such extraordinary manifestations as the piercing or transverberation of her heart, the spiritual espousals, and the mystical marriage. A vision of the place destined for her in hell in case she should have been unfaithful to grace, determined her to seek a more perfect life. After many troubles and much opposition St. Teresa founded the convent of Discalced Carmelite Nuns of the Primitive Rule of St. Joseph at Avila (24 Aug., 1562), and after six months obtained permission to take up her residence there. Four years later she received the visit of the General of the Carmelites, John-Baptist Rubeo (Rossi), who not only approved of what she had done but granted leave for the foundation of other convents of friars as well as nuns. In rapid succession she established her nuns at Medina del Campo (1567), Malagon and Valladolid (1568), Toledo and Pastrana (1569), Salamanca (1570), Alba de Tormes (1571), Segovia (1574), Veas and Seville (1575), and Caravaca (1576). In the "Book of Foundations" she tells the story of these convents, nearly all of which were established in spite of violent opposition but with manifest assistance from above. Everywhere she found souls generous enough to embrace the austerities of the primitive rule of Carmel. Having made the acquaintance of Antonio de Heredia, prior of Medina, and St. John of the Cross (q. v.), she established her reform among the friars (28 Nov., 1568), the first convents being those of Duruelo (1568), Pastrana (1569), Mancera, and Alcalá de Henares (1570).

A new epoch began with the entrance into religion of Jerome Gratian, inasmuch as this remarkable man was almost immediately entrusted by the nuncio with the authority of visitor Apostolic of the Carmelite friars and nuns of the old observance in Andalusia, and as such considered himself entitled to overrule the various restrictions insisted upon by the general and the general chapter. On the death of the nuncio and the arrival of his successor a fearful storm burst over St. Teresa and her work, lasting four years and threatening to annihilate the nascent reform. The incidents of this persecution are best described in her letters. The storm at length passed, and the province of Discalced Carmelites, with the support of Philip II, was approved and canonically established on 22 June, 1580. St. Teresa, old and broken in health, made further foundations at Villanueva de la Jara and Palencia (1580), Soria (1581), Granada (through her assistant the Venerable Anne of Jesus), and at Burgos (1582). She left this latter place at the end of July, and, stopping at Palencia, Valladolid, and Medina del Campo, reached Alba de Tormes in September, suffering intensely. Soon she took to her bed and passed away on 4 Oct., 1582, the following day, owing to the reform of the calendar, being reckoned as 15 Oct. After some years her body was transferred to Avila, but later on reconveyed to Alba, where it is still preserved incorrupt. Her heart, too, showing the marks of the Transverberation, is exposed there to the veneration of the faithful. She was beatified in 1614, and canonized in 1622 by Gregory XV, the feast being fixed on 15 October.

St. Teresa's position among writers on mystical theology is unique. In all her writings on this subject she deals with her personal experiences, which a deep insight and analytical gifts enabled her to explain clearly. The Thomistic substratum may be traced to the influence of her confessors and directors, many of whom belonged to the Dominican Order. She herself had no pretension to found a school in the accepted sense of the term, and there is no vestige in her writings of any influence of the Areopagitic, the Patristic, or the Scholastic Mystical schools, as represented, among others, by the German Dominican Mystics. She is intensely personal, her system going exactly as far as her experiences, but not a step further.

A word must be added on the orthography of her name. It has of late become the fashion to write her name Teresa or Teresia, without "h", not only in Spanish and Italian, where the "h" could have no place, but also in French, German, and Latin, which ought to preserve the etymological spelling. As it is derived from a Greek name, *Tharasia*, the saintly wife of St. Paulinus of Nola, it should be written Theresia in German and Latin, and Thérèse in French.

The bibliography of St. Teresa is exceedingly lengthy. Unfortunately, even de Curzon's *Bibliographie Thérèsienne* (Paris, 1902) is far too incomplete and inaccurate to be of much use. Here we can only deal with her own writings. The autographs of the life written by herself, and of the *Book of Foundations* have been published in photo-lithography by Don Vicente de la Fuente (Madrid, 1873 and 1880 respectively); the *Interior Castle*, under the direction of Cardinal Lluch (Seville, 1882); the *Way of Perfection* (MS. of the Escorial) and the *Visitation of Nunneries* by Don Francisco Herrero Bayona (Valladolid, 1883), with a transcript of the MS. of the *Way of Perfection* preserved at Valladolid. Of the remaining works, the *Relations*, the *Exclamations*, the *Conceptions*, the *Maxims*, the *Constitutions*, and the poems (about thirty-six of these being considered genuine), no autographs, or only small fragments, are known to exist. The *Seven Meditations on the Lord's Prayer* are not authentic. The most recent English translations are by Lewis: *Life* and *Relations*, ed. Zimmerman (4th ed., London, 1911); *Foundations*, with the *Visitation* and *Constitutions* (London, 1871, a new edition being now in the press). The *Interior Castle*, *Exclamations*, and the *Way of Perfection*, translated by the Benedictines of Stanbrook, ed. Zimmerman; the two former, London, 1906 (a second edition being now in the press); the third, London, 1911. The *Conceptions of Divine Love*, the *Maxims* and the poems, by the same translators and editor, are also in the press. Pending the publication of a complete English edition of the *Letters* we cannot do better than refer the reader to the *Lettres de Sainte Thérèse, par le R. P. Grégoire de St. Joseph* (3 vols., 2nd ed., 1906). Mention must be made of the new French translation of the works of the saint (with numerous documents and *pièces justifica-*

tives, not previously published): *Œuvres complètes de Sainte Térèse, par les Carmélites du premier monastere de Paris* (6 vols., Paris, 1907–10); *St. Teresa*, ed. Burke (New York, 1911).

Benedict Zimmerman.

Teresian Martyrs of Compiègne, The Sixteen Blessed, guillotined at the Place du Trône Renversé, now called Place de la Nation, Paris, 17 July, 1794. They are the first sufferers under the French Revolution on whom the Holy See has passed judgment, and were solemnly beatified 27 May, 1906. Before their execution they knelt and chanted the "Veni Creator", as at a profession, after which they all renewed aloud their baptismal and religious vows. The novice was executed first and the prioress last. Absolute silence prevailed the whole time that the executions were proceeding. The heads and bodies of the martyrs were interred in a deep sand-pit about thirty feet square in a cemetery at Picpus. As this sand-pit was the receptacle of the bodies of 1298 victims of the Revolution, there seems to be no hope of their relics being recovered. Their names are as follows: (1) Madeleine-Claudine Ledoine (Mother Teresa of St. Augustine), prioress, b. in Paris, 22 Sept., 1752, professed 16 or 17 May, 1775; (2) Marie-Anne (or Antoinette) Brideau (Mother St. Louis), sub-prioress, b. at Belfort, 7 Dec., 1752, professed 3 Sept., 1771; (3) Marie-Anne Piedcourt (Sister of Jesus Crucified), choir-nun, b. 1715, professed 1737; on mounting the scaffold she said "I forgive you as heartily as I wish God to forgive me"; (4) Anne-Marie-Madeleine Thouret (Sister Charlotte of the Resurrection), sacristan, b. at Mouy, 16 Sept., 1715, professed 19 Aug., 1740, twice subprioress in 1764 and 1778. Her portrait is reproduced opposite p. 2 of Miss Willson's work cited below; (5) Marie-Antoniette or Anne Hanisset (Sister Teresa of the Holy Heart of Mary), b. at Rheims in 1740 or 1742, professed in 1764; (6) Marie-Françoise Gabrielle de Croissy (Mother Henriette of Jesus), b. in Paris, 18 June, 1745, professed 22 Feb., 1764, prioress from 1779 to 1785; (7) Marie-Gabrielle Trézel (Sister Teresa of St. Ignatius), choir-nun, b. at Compiègne, 4 April, 1743, professed 12 Dec., 1771; (8) Rose-Chrétien de la Neuville, widow, choir-nun (Sister Julia Louisa of Jesus), b. at Loreau (or Evreux), in 1741, professed probably in 1777; (9) Anne Petras (Sister Mary Henrietta of Providence), choir-nun, b. at Cajarc (Lot), 17 June, 1760, professed 22 Oct., 1786. (10) Concerning Sister Euphrasia of the Immaculate Conception accounts vary. Miss Willson says that her name was Marie Claude Cyprienne Brard, and that she was born 12 May, 1736; Pierre, that her name was Catherine Charlotte Brard, and that she was born 7 Sept., 1736. She was born at Bourth, and professed in 1757; (11) Marie-Geneviève Meunier (Sister Constance), novice, b. 28 May, 1765, or 1766, at St. Denis, received the habit 16 Dec., 1788. She mounted the scaffold singing "Laudate Dominum". In addition to the above, three lay sisters suffered and two *tourières*. The lay sisters are: (12) Angélique Roussel (Sister Mary of the Holy Ghost), lay sister, b. at Fresnes, 4 August, 1742, professed 14 May, 1769; (13) Marie Dufour (Sister St. Martha), lay sister, b. at Beaune, 1 or 2 Oct., 1742, entered the community in 1772; (14) Julie or Juliette Vérolot (Sister St. Francis Xavier), lay sister, b. at Laignes or Lignières, 11 Jan., 1764, professed 12 Jan., 1789. The two *tourières*, who were not Carmelites at all, but merely servants of the nunnery were: (15 and 16) Catherine and Teresa Soiron, b. respectively on 2 Feb., 1742 and 23 Jan., 1748 at Compiègne, both of whom had been in the service of the community since 1772. The miracles proved during the process of beatification were (1) The cure of Sister Clare of St. Joseph, a Carmelite lay sister of New Orleans, when on the point of death from cancer, in June, 1897; (2) The cure of the Abbé Roussarie, of the seminary at Brive, when at the point of death, 7 March, 1897; (3) The cure of Sister St. Martha of St. Joseph, a Carmelite lay sister of Vans, of tuberculosis and an abcess in the right leg, 1 Dec., 1897; (4) The cure of Sister St. Michæl, a Franciscan of Montmorillon, 9 April, 1898. Five secondary relics are in the possession of the Benedictines of Stanbrook, Worcestershire.

John B. Wainewright.

Terill (Bonville), Anthony, English theologian, b. at Canford, Dorsetshire, in 1623; d. at Liège, 11 Oct., 1676. His mother was a Catholic but his father was estranged from the Faith, and in consequence the young Anthony was reared in heresy until his fifteenth year, when he was converted and left England, taking the alias Terill. He studied for about three years at the English College of St. Omer and then began his studies for the priesthood at the English College, Rome, where he was ordained on 16 March, 1647. Two months later he entered the Jesuit novitiate at San Andrea. After his noviceship he was successively penitentiary at Loreto, professor of philosophy at Florence, professor of philosophy and scholastic theology at Parma, director of theological studies and professor of theology and mathematics at the English College, Liège, and for three years rector of the same college where he died with a reputation for "extraordinary piety, talent, learning, and prudence". He wrote "Conclusiones philosophicæ" (Parma, 1657), "Problema mathematico-philosophicum de termino magnitudinis ac virium in animalibus" (Parma, 1660), "Fundamentum totius theologiæ moralis, seu tractatus de conscientia probabili" (Liège, 1668), and "Regula morum" which was published shortly after his death (Liège, 1677). His reputation as a moral theologian was established by these last two works. In the "Fundamentum" he ably defended the doctrine of probabilism, and in the "Regula morum" refuted the objections brought against his first work by the Dominican Concina, the Jesuit Elizalde, and other exponents of the Rigorist School. Amort speaks of him as "eruditissimum et probabilistarum antesignanum".

Edward C. Phillips.

Termessus, a titular see, suffragan of Perge in Pamphylia Secunda. This is one of the most ancient cities of the Pisidians, inhabited by the Solymi, whose name was preserved for several centuries in Mount Solyma, known to-day as Gulddéré-Dagh, and was referred to by Homer, II, VI, 184, and Strabo, XIII, 630. A warlike city, Termessus maintained its independence even under the dominion of the Persians, and refused to receive Alexander the Great, who dared not besiege it (Arianus, I, 27). Under the successor of Alexander, Termessus preserved its autonomy and, in 189 B. C., formed an alliance with the Roman consul, Cn. Manlius, who confirmed it; under the Emperor Domitian it still enjoyed this alliance. Subsequently the city was incorporated with the Province of Pisidia and later with that of Pamphylia. From the ruins of the monuments which remain, it is evident that this was one of the richest and the most civilized cities of Asia Minor; as far back at least as the fourth century B. C., it had been colonized by the Hellenic race. Among its bishops we note: Euresius present at the Council of Nicæa in 325; Timothy at Epheseus in 431; Sabinianus in 448; and Auxentius in 458. Timothy and Sabinianus bear the double title of Termessus and Eudocias. Ramsay (Asia Minor, 18) has taken for granted that these two names refer to one and the same city, but in the year 458 we find at the same period Auxentius, Bishop of Termessus, and Innocentius, Bishop of Eudocias; moreover, in the Ecthesis of Pseudo-Epiphanius, towards 640 (Gelzer, "Ungedruckte . . . Texte der Notitiæ episcopatuum", 541), in the Notitiæ of Leon le Sage and of Constantin Porphyrogenetus ("Georgii Cyprii Descriptio Orbis Romani", ed. Gelzer, 74), these two archdioceses are absolutely distinct in the tenth century. It is not known when the Diocese of Termessus or the city disappeared. The ruins of the city situated at Karabounar, Keui in the sanjak of Adalia and the vilayet of Koniah, figure among the richest monuments of antiquity in Asia Minor.

S. Vailhé.

Termoli, Diocese of (Thermularum), on the Italian coast of the Adriatic, having a small harbour near the mouth of the Petraglione. In ancient days it was called Buca; in 1567 it was put to fire and sword by the Turks. Termoli contains a fine Gothic cathedral. It is first mentioned as a diocese in 946, when Benefetto, an usurper of the episcopal see, was forced to withdraw by order of Agapitus II; the earliest known legitimate bishop was Scio (969). Among his successors were: Jacopo Cini, O.P. (1379), author of a commentary on the "Sentences"; Domencio Girada (1381), a learned Servite theologian; Fedrico Merzio (1602), a collaborator of Baronius. In 1818 this see was united with Guardia Alferia, a small town near Cerrato, which had its first bishop in 1075 and its last in 1775. Termoli is suffragan of Benevento, and contains 19 parishes, 54 secular priests, and 1 convent of nuns.

U. Benigni.

Ternan, Saint, Bishop of the Picts, flourished in the sixth century. Much obscurity attaches to his history, and it is difficult to reconcile his chronology as given by various writers. Some say that he was consecrated by St. Palladius in 440, others that he was a monk of Culross in Fife, one of the monasteries founded by St. Serf, or Servan, the tutor of St. Kentigern. The Picts were not converted till about 570, by the zeal of St. Columba. St. Kentigern died in 603, and St. Serf of Culross died in 583 (feast 1 July). It is safe to assert that St. Ternan was a contemporary of St. Serf. In the "Aberdeen Martyrology" there is mention of "the Gospel of St. Matthew belonging to St. Ternan", which was "enshrined in a metal case or *cumdach* (book shrine), covered with silver and gold, after the Irish fashion." St. Ternan is commemorated on 12 June. He must not be confounded with St. Trumwine.

Terni. See Narni and Terni, Diocese of.

Terracina, Sezze, and Piperno, Diocese of (Terracinensis, Setinensis et Privernensis), in the Province of Rome. The city of Terracina is near the estuary of the Amaseno, on a promontory (the old town), and beside the Via Appia (the new town, founded by Pius VI). The harbour, one of the safest in the Mediterranean, is frequented mostly by coasting-vessels engaged in exporting grain from the Pontine marshes, and wine, oil, and vegetables from the Lepinian hills; hunting in the neighbouring woods and the fishing industry are also carried on with profit by the inhabitants. There are ruins of the temple of Rome and Augustus, at the place now occupied by the cathedral of St. Cæsareus, containing the pillars of the temple and an ambo with mosaics. On one of the promontories are ruins of the great temple of Venus; also traces of the fortifications and of the palace of Theodoric. Terracina, called by the Romans Tarracina, the ancient Auxur, was a Latin city, and was subject to Rome under the kings. Later it was captured by the Volscians, who in 406 B. C. ceded it to the Romans. Hannibal, after capturing Capua, failed to take it. Under Antoninus Pius the harbour was enlarged. It was included in Pepin's donation to the Holy See, but about 780 was captured by the Byzantines, who, however, were expelled by Charlemagne. The Saracens landed there on several occasions during the ninth century. Later it was a fief of the Frangipani, but Gregory IX included it among the places which were always to be immediately subject to the Holy See. In 1798, the French commander having been slain during a revolt, the city was sacked. According to tradition, the first Bishop of Terracina was St. Epaphroditus. The most ancient Christian record of the city is that of the martyrdom of St. Julianus, priest, and St. Cæsareus, deacon, who were cast into the sea under Trajan; in the third century St. Quartus (bishop?) suffered. The first bishop whose date is known with certainty is Sabinus (313). Among his successors were: an African priest, St. Silvianus, a fugitive during the Vandal persecution (about 443); Petrus (590), during whose episcopate the Jews were persecuted so severely in Terracina that St. Gregory the Great had to intervene; under Agnellus, former Bishop of Fundi, which city had been destroyed, the two dioceses were united; the last three letters only of the name of another Bishop of Terracina, . . . vsa, are preserved in an inscription (Corp. Inscr. Lat., X, I, 6419); other bishops were: Joannes (969), who made the vow that the inhabitants of the city should offer each year 6,000 eels to the monastery of Monte Cassino; Ambrosius (1066), a Benedictine and ecclesiastical reformer; Gregorius (1106), a Benedictine, surnamed *Columna Ecclesiæ*. About this time, if not earlier, the sees of Piperno (Privernum) and Sezze (Setia), situated on the side of the Lepinian hills, were united to Terracina. The earliest of the seven known bishops of Piperno is Bonifacius (769). There is moreover an ancient Christian cemetery at Piperno. The first mention of a Bishop of Sezze is a reference to Stephanus (1036); in the time of Pollidius (1046), St. Ligdanus founded the Monastery of St. Cecilia near Sezze; among the others was Lando, who in 1178, under the name of Innocent III, usurped the papal tiara. The union of the three dioceses was confirmed by Honorius III (1217) during the episcopate of Simeone. Among his successors were: the Franciscan Fra Giovanni (1362), who consecrated the cathedral; Zaccaria Mori (1510), present at the Fifth Lateran Council; Ottaviano Rovera (1545), nuncio in Switzerland and Spain; Bernardo M. Conti (1710), brother of Innocent XIII, cardinal. In 1725 Benedict XIII restored the See of Piperno and Sezze, declaring them united *æque principaliter*. Bishop Francesco Antonio Mondelli (1805) was exiled in 1809, for refusing to take the oath of loyalty to Napoleon. The famous Cistercian Abbey of Fossa Nuova is within the territory of this see. The diocese, which is immediately subject to the Holy See, contains 22 parishes, 45,000 inhabitants, 94 secular and 15 regular priests, 3 religious houses for men, 10 for nuns, 1 institute for boys and 3 for girls.

U. Benigni.

Terrasson, André, French preacher, b. at Lyons in 1669; d. at Paris, 25 April, 1723. He was the eldest son of a councillor of the Lyons presidial (court of justice). Entering the Congregation of the

Oratory he devoted himself to preaching, and winning high reputation was called to fill important pulpits. He preached the Lenten sermons of 1717 before Louis XIV, next at the Court of Lorraine, and later twice in the metropolitan church of Paris with considerable success; the last of these series broke down his health and led to his death. His eloquent diction, which was enhanced by his outward action, was marked by nobility and simplicity of thought, by forcefulness and absence of artificiality. His good judgment led him to avoid mere brilliancy of expression and clever artifices of speech, but he was sometimes cold, perhaps as a result of his Jansenistic proclivities. About fifty of his discourses, mostly delivered as Lenten lectures, are preserved, and were published at Paris (4 vols., 1726, 1736).

Gaspard, brother of the preceding, b. at Lyons, Oct., 1680; d. at Paris, 2 Jan., 1752. He was also a member of the Oratory, teaching humanities and afterwards philosophy. His oratorical gifts were revealed at Troyes, 1711, on delivering the funeral oration of the Dauphin, son of Louis XIV; but he did not devote himself to the pulpit till after his brother's death, when he fulfilled several engagements which the latter had made. Soon his reputation increased beyond that of André. For five years he preached at Paris, and finally delivered a Lenten course in the Church of Notre Dame. More stubborn even than his brother, he appealed time after time against the Bull "Unigenitus"; he even published anonymously twelve "Lettres sur la justice chrétienne" (Paris, 1733), in which, to support the Jansenists whom the bishops deprived of the sacraments, he endeavoured to prove the inutility of sacramental confession. This work was condemned by the faculty of theology at Paris (1 Sept., 1734), and by the Archbishops of Sens and Embrun, as containing erroneous, schismatical and heretical assertions. Terrasson had to leave the Oratory and abandon preaching. He withdrew to the Diocese of Auxerre where the bishop, M. de Caylus, a well-known Jansenist, confided to him the care of Treigni. But he was soon arrested (Oct., 1735) by the order of the king for his Jansenistic activities, and was confined during nine years either at Vincennes or with the Minims of Argenteuil. A belated retractation, the authenticity or sincerity of which has never been well established, was attributed to him. He was living in retirement with his family when he died. As a preacher his chief characteristics are simplicity and clearness, but at times he carries the subdivision of his matter to excess; his style is somewhat dry and lacks vigour. Like his brother he holds a high place among the orators of second rank. A volume of his discourses appeared at Utrecht in 1733, but the first real edition was at Paris in 1744 (4 vols.). The sermons of the two brothers were reprinted by Migne in his "Collection des orateurs sacrés", XXIX (Paris, 1849).

Antoine Dégert.

Terrestrial Paradise (פרדס, *παράδεισος*, *Paradisus*). The name popularly given in Christian tradition to the scriptural Garden of Eden, the home of our first parents (Gen., ii). The word paradise is probably of Persian origin and signified originally a royal park or pleasure ground. The term does not occur in the Latin of the Classic period nor in the Greek writers prior to the time of Xenophon. In the Old Testament it is found only in the later Hebrew writings in the form פרדס (*Pardês*), having been borrowed doubtless from the Persian. An instructive illustration of the origin and primary meaning of the term appears in II Esdras (ii, 8) where "Asaph the keeper of the king's forest" (הפרדס, *happerdês*) is the custodian of the royal park of the Persian ruler. The association of the term with the abode of our first parents does not occur in the Old-Testament Hebrew. It originated in the fact that the word *παράδεισος* was adopted, though not exclusively, by the translators of the Septuagint to render the Hebrew גן־עדן, or Garden of Eden described in the second chapter of Genesis. It is likewise used in divers other passages of the Septuagint where the Hebrew generally has "garden", especially if the idea of wondrous beauty is to be conveyed. Thus in Gen., xiii, 10, the "country about the Jordan" is described as a "paradise of the Lord" (rendering followed by the Vulgate). Cf. Numbers, xxiv, 6 (Greek) where the reference is to the beautiful array of the tents of Israel, also Isaias, i, 30; Ezechiel, xxxi, 8, 9, etc. Those interested in speculation as to the probable location of the Scriptural Garden of Eden, the primeval home of mankind, are referred to the scholarly work of Friedrich Delitzsch, "Wo lag das Paradies?" (Berlin, 1881). In the New-Testament period the word paradise appears with a new and more exalted meaning. In the development of Jewish eschatology which marks the post-Exilic epoch the word paradise or "Garden of God", hitherto mainly associated with the original dwelling-place of our first parents, was transferred to signify the future abode of rest and enjoyment which was to be the reward of the righteous after death. The term occurs only three times in the New Testament, though the idea which it represents is frequently expressed in other terms, v. g. "Abraham's bosom" (Luke, xvi, 22). The signification of the word in these remarkably few passages can be determined only from the context and by reference to the eschatological notions current among the Jews of that period. These views are gathered chiefly from the Rabbinical literature, the works of Josephus, and from the apocryphal writings, notably the Book of Enoch, the Book of Jubilees, the Apocalypse of Baruch, etc. An inspection of these sources reveals a great confusion of ideas and many contradictions regarding the future paradise as also concerning the original Garden of Eden and the condition of our first parents. The scanty references to *Sheol* which embody the vague eschatological beliefs of the Hebrews as expressed in the earlier Old Testament writings give place in these later treatises to elaborate theories worked out with detailed descriptions and speculations often of a most fanciful character. As a sample of these may be noted the one found in the Talmudic tract "Jalkut Schim., Bereschith, 20". According to this description the entrance to paradise is made through two gates of rubies beside which stand sixty myriads of holy angels with countenances radiant with heavenly splendour. When a righteous man enters, the vestures of death are removed from him; he is clad in eight robes of the clouds of glory; two crowns are placed upon his head, one of pearls and precious stones, the other of gold; eight myrtles are placed in his hands and he is welcomed with great applause, etc. Some of the Rabbinical authorities appear to identify the paradise of the future with the primeval Garden of Eden which is supposed to be still in existence and located somewhere in the far-distant East. According to some it was an earthly abode, sometimes said to have been created before the rest of the world (IV Esdras iii, 7, cf. viii, 52); others make it an adjunct of the subterranean *Sheol*, while still others place it in or near heaven. It was believed that there are in paradise different degrees of blessedness. Seven ranks or orders of the righteous were said to exist within it, and definitions were given both of those to whom these different positions belong and of the glories pertaining to each ("Baba bathra", 75 *a*, quoted by Salmond, Hastings, "Dict. of the Bible", s. v. "Paradise"). The uncertainty and confusion of the current Jewish ideas concerning paradise may explain the paucity of reference to it in the New Testament. The first mention of the word occurs in Luke, xxiii, 43, where Jesus on the cross says to the penitent thief: "Amen I say to thee, this day thou shalt be with me in paradise". According to the prevailing interpretation of Catholic theologians and commentators, paradise in this instance is used as a synonym for the heaven of the blessed to which the thief would accompany the Saviour, together with the souls of the righteous of the Old Law who were awaiting the coming of the Redeemer. In II Corinthians (xii, 4) St. Paul describing one of his ecstasies tells his readers that he was "caught up into paradise". Here the term seems to indicate plainly the heavenly state or abode of the blessed, implying possibly a glimpse of the beatific vision. The reference cannot be to any form of terrestrial paradise, especially when we consider the parallel expression in verse 2, where relating a similar experience he says he was "caught up to the third heaven". The third and last mention of paradise in the New Testament occurs in the Apocalypse (ii, 7), where St. John, receiving in vision a Divine message for the "angel of the church of Ephesus", hears these words: "To him that overcometh, I will give to eat of the tree of life, which is in the paradise of my God." In this passage the word is plainly used to designate the heavenly kingdom, though the imagery is borrowed from the description of the primeval Garden of Eden in the Book of Genesis. According to Catholic theology based on the Biblical account, the original condition of our first parents was one of perfect innocence and integrity. By the latter is meant that they were endowed with many prerogatives which, while pertaining to the natural order, were not due to human nature as such—hence they are sometimes termed preternatural. Principal among these were a high degree of infused knowledge, bodily immortality and freedom from pain, and immunity from evil impulses or inclinations. In other words, the lower or animal nature in man was perfectly subjected to the control of reason and the will. Besides this, our first parents were also endowed with sanctifying grace by which they were elevated to the supernatural order. But all these gratuitous endowments were forfeited through the disobedience of Adam "in whom all have sinned", and who was "a figure of Him who was to come" (Rom., v) and restore fallen man, not to an earthly, but to a heavenly paradise.

According to Josephus (Ant. Jud., I, i, 3), the Nile is one of the four great rivers of paradise (Gen., ii, 10 sqq.). This view, which has been adopted by many commentators, is based chiefly on the connection described between Gehon, one of the yet unidentified rivers, and the land of Cush, which, at least in later times, was identified with Ethiopia or modern Abyssinia (cf. Vulgate, Gen., ii, 13). Modern scholars, however, are inclined to regard this African Cush as simply a colony settled by tribes migrating from an original Asiatic province of the same name, located by Fried. Delitsch (op. cit., 71) in Babylonia, and by Hommel ("Ancient Hebrew Tradition", 314 sqq.) in Central Arabia.

HURTER, *Theologiæ Dogmaticæ Compendium*, II (Innsbruck, 1893), 264–83; VON HUMMELAUER, *Comment. in Genesim* (Paris, 1895): Comment. in Cap. ii; VIGOUROUX, *Dict. de la Bible*, s. v.; GIGOT, *Special Introduction to the Study of the Old Testament*, Pt. I, 168 sqq. (New York, 1901).

JAMES F. DRISCOLL.

Terrien, JEAN-BAPTISTE, dogmatic theologian, born at St-Laurent-des-Autels, Maine-et-Loire, 26 Aug., 1832; d. at Bellevue, near Paris, 5 Dec., 1903. He entered the Society of Jesus at Angers, 7 Dec., 1854; taught philosophy for two years and dogmatic theology for twenty-two at the seminaries of Laval (France), 1864–80, and St. Helier (Jersey), 1880–88, then, after being spiritual father at Laval he was appointed professor of dogmatic theology and taught three years, 1891–94, at the Catholic Institute of Paris, remaining afterwards in this city as spiritual father and writer. During his first period of teaching, he did not publish any theological work, except a treatise, "De Verbo incarnato", Jersey, 1882, for private circulation; there are also five or six other treatises in MS. or lithographed, which form a substantial body of Positive rather than Scholastic theology, after the manner and doctrine of Cardinal Franzelin. In a quite different style is framed a neo-Thomistic monograph, published at Paris in 1894: "S. Thomæ Aquinatis, O.P., doctrina sincera de unione hypostatica Verbi Dei cum humanitate amplissime declarata". At this time, Father Terrien began to apply his deep knowledge of theology to popular instruction, and published the following doctrinal treatises in French: "La Dévotion au Sacré-Cœur de Jésus, d'après les documents authentiques et la théologie", 1893; Italian translation by G. M. Rossi (Naples, 1895); "La grâce et la gloire ou la filiation adoptive des enfants de Dieu étudiée dans sa réalité, ses principes, son perfectionnement, et son couronnement final", 2 vols., 1897; new ed., 1908; "La Mère de Dieu et la Mère des hommes d'après les Péres et la théologie", 4 vols., 1900, 1902. These three works form unquestionably the most conspicuous part of Terrien's literary performance, as they are highly valuable on account of precision and richness of doctrine.

XAVIER LE BACHELET.

Tertiaries (from the Latin *tertiarius*, the relative adjective of *tertius*, "third"), or what is known as "Third Orders", are those persons who live according to the Third Rule of religious orders, either outside of a monastery in the world, or in a religious community. The idea which forms the basis of this institute is in general this, that persons who on account of certain circumstances cannot enter a religious order, strictly so-called, may, nevertheless, as far as possible enjoy the advantages and privileges of religious orders. This is most clearly expressed in the Rule of the Third Order of St. Francis which, although not the oldest, has, nevertheless, become the model for the rule of almost all other Third Orders. Tertiaries are divided into Regular and Secular (see THIRD ORDERS).

FERDINAND HECKMANN.

Tertullian (QUINTUS SEPTIMIUS FLORENS TERTULLIANUS), ecclesiastical writer in the second and third centuries, b. probably about 160 at Carthage, being the son of a centurion in the proconsular service. He was evidently by profession an advocate in the law-courts, and he shows a close acquaintance with the procedure and terms of Roman law, though it is doubtful whether he is to be identified with a jurist Tertullian who is cited in the Pandects. He knew Greek as well as Latin, and wrote works in Greek which have not come down to us. A pagan until middle life, he had shared the pagan prejudices against Christianity, and had indulged like others in shameful pleasures. His conversion was not later than the year 197, and may have been earlier. He embraced the Faith with all the ardour of his impetuous nature. He became a priest, no doubt of the Church of Carthage. Monceaux, followed by d'Alès, considers that his earlier writings were composed while he was yet a layman, and if this be so, then his ordination was about 200. His extant writings range in date from the apologetics of 197 to the attack on a bishop who is probably Pope Callistus (after 218). It was after the year 206 that he joined the Montanist sect, and he seems to have definitively separated from the Church about 211 (Harnack) or 213 (Monceaux). After writing more virulently against the Church than even against heathen and persecutors, he separated from the Montanists and founded a sect of his own. The remnant of the Tertullianists was reconciled to the Church by St. Augustine. A number of the works of Tertullian are on special points of belief or discipline. According to St. Jerome he lived to extreme old age.

The year 197 saw the publication of a short address by Tertullian, "To the Martyrs", and of his great apologetic works, the "Ad nationes' and the "Apologeticus". The former has been considered a finished sketch for the latter; but it is more true to say that the second work has a different purpose, though a great deal of the same matter occurs in both, the same arguments being displayed in the same manner, with the same examples and even the same phrases. The appeal to the nations suffers from its transmission in a single codex, in which omissions of a word or several words or whole lines are to be deplored. Tertullian's style is difficult enough without such superadded causes of obscurity. But the text of the "Ad nationes" must have been always rougher than that of the "Apologeticus", which is a more careful as well as a more perfect work, and contains more matter because of its better arrangement; for it is just the same length as the two books "Ad nationes".

The "Ad nationes" has for its entire object the refutation of calumnies against Christians. In the first place they are proved to repose on unreasoning hatred only; the procedure of trial is illogical; the offence is nothing but the name of Christian, which ought rather to be a title of honour; no proof is forthcoming of any crimes, only rumour; the first persecutor was Nero, the worst of emperors. Secondly, the individual charges are met; Tertullian challenges the reader to believe in anything so contrary to nature as the accusations of infanticide and incest. Christians are not the causes of earthquakes and floods and famine, for these happened long before Christianity. The pagans despise their own gods, banish them, forbid their worship, mock them on the stage; the poets tell horrid stories of them; they were in reality only men, and bad men. You say we worship an ass's head, he goes on, but you worship all kinds of animals; your gods are images made on a cross framework, so you worship crosses. You say we worship the sun; so do you. A certain Jew hawked about a caricature of a creature half ass, half goat, as our god; but you actually adore half-animals, As for infanticide, you expose your own children and kill the unborn. Your promiscuous lust causes you to be in danger of the incest of which you accuse us. We do not swear by the genius of Cæsar, but we are loyal, for we pray for him, whereas you revolt. Cæsar does not want to be a god; he prefers to be alive. You say it is through obstinacy that we despise death; but of old such contempt of death was esteemed heroic virtue. Many among you brave death for gain or wagers; but we, because we believe in judgment. Finally, do us justice; examine our case, and change your minds. The second book consists entirely in an attack on the gods of the pagans; they are marshalled in classes after Varro. It was not, urges the apologist, owing to these multitudinous gods that the empire grew.

Out of this fierce appeal and indictment was developed the grander "Apologeticus", addressed to the rulers of the empire and the administrators of justice. The former work attacked popular prejudices; the new one is an imitation of the Greek Apologies, and was intended as an attempt to secure an amelioration in the treatment of Christians by alteration of the law or its administration. Tertullian cannot restrain his invective; yet he wishes to be conciliating, and it breaks out in spite of his argument, instead of being its essence as before. He begins again by an appeal to reason. There are no witnesses, he urges, to prove our crimes; Trajan ordered Pliny not to seek us out, but yet to punish us if we were known;—what a paralogism! The actual procedure is yet more strange. Instead of being tortured until we confess, we are tortured until we deny. So far the "Ad nationes" is merely developed and strengthened. Then, after a condensed summary of the second book as to the heathen gods, Tertullian begins in chapter xvii an exposition of the belief of Christians in one God, the Creator, invisible, infinite, to whom the soul of man, which by its nature is inclined to Christianity, bears witness The floods and the fire have been His messengers. We have testimony, he adds, from our sacred books, which are older than all your gods. Fulfilled prophecy is the proof that they are divine. It is then explained that Christ is God, the Word of God born of a virgin; His two comings, His miracles, passion, resurrection, and forty days with the disciples, are recounted. The disciples spread His doctrine throughout the world; Nero sowed it with blood at Rome. When tortured the Christian cries, "We worship God through Christ". The demons confess Him and they stir men up against us. Next, loyalty to Cæsar is discussed at greater length than before. When the populace rises, how easily the Christians could take vengeance: "We are but of yesterday, yet we fill your cities, islands, forts, towns, councils, even camps, tribes, decuries, the palace, the senate, the forum; we have left you the temples alone". We might migrate, and leave you in shame and in desolation. We ought at least to be tolerated; for what are we?—a body compacted by community of religion, of discipline, and of hope. We meet together to pray, even for the emperors and authorities, to hear readings from the holy books and exhortations. We judge and separate those who fall into crime. We have elders of proved virtue to preside. Our common fund is replenished by voluntary donations each month, and is expended not on gluttony but on the poor and suffering. This charity is quoted against us as a disgrace; see, it is said, how they love one another. We call ourselves brethren; you also are our brethren by nature, but bad brethren. We are accused of every calamity. Yet we live with you; we avoid no profession, but those of assassins, sorcerers, and such like. You spare the philosophers, though their conduct is less admirable than ours. They confess that our teaching is older than theirs, for nothing is older than truth. The resurrection at which you jeer has many parallels in nature. You think us fools; and we rejoice to suffer for this. We conquer by our death. Inquire into the cause of our constancy. We believe this martyrdom to be the remission of all offences, and that he who is condemned before your tribunal is absolved before God.

These points are all urged with infinite wit and pungency. The faults are obvious. The effect on the pagans may have been rather to irritate than to convince. The very brevity results in obscurity. But every lover of eloquence, and there were many in those days, will have relished with the pleasure of an epicure the feast of ingenious pleading and recondite learning. The rapier thrusts are so swift, we can hardly realize their deadliness before they are renewed in showers, with sometimes a blow as of a bludgeon to vary the effect. The style is compressed like that of Tacitus, but the metrical closes are observed with care, against the rule of Tacitus; and that wonderful maker of phrases is outdone by his Christian successor in gemlike sentences which will be quoted while the world lasts. Who does not know the *anima naturaliter Christiana* (soul by nature Christian); the *Vide, inquiunt, ut invicem se diligant* (see, they exclaim, how they love one another), and the *Semen est sanguis Christianorum* (The blood of Christians is seed)? It was probably about the same time that Tertullian developed his thesis of the "Testimony of the soul" to the existence of one God, in his little book with this title. With his usual eloquence he enlarges on the idea that common speech bids us use expressions such as "God grant", or "If God will", "God bless", "God sees", "May God repay". The soul testifies also to devils, to just vengeance, and to its own immortality.
